The Talmud and its study spread from Babylon to Egypt, northern Africa, Italy, Spain, France, and Germany, regions destined to become the abodes of the Jewish spirit; and in all these countries intellectual interest centered in the Talmud. The first great reaction against its supremacy was Karaism, which arose in the very stronghold of the Geonim within two centuries after the completion of the Talmud. The movement thus initiated and the influence of Arabic culture were the two chief factors which aroused the dormant forces of Judaism and gave inspiration to the scientific pursuits to which the Jewish spirit owed many centuries of marvelous and fruitful activity. This activity, however, did not infringe in the least on the authority of the Talmud; for although it combined other ideals and intellectual aims with Talmudic study, which it enriched and perfected, the importance of that study was in no wise decried by those who devoted themselves to other fields of learning. Nor did the speculative treatment of the fundamental teachings of Judaism lower the position of the Talmud; for Maimonides, the greatest philosopher of religion of his time, was likewise the greatest student of the Talmud, on which work he endeavored to base his philosophic views. A dangerous internal enemy of the Talmud, however, arose in the Cabala during the thirteenth century; but it also had to share with the Talmud the supremacy to which it aspired.

During the decline of intellectual life among the Jews which began in the sixteenth century, the Talmud was regarded almost as the supreme authority by the majority of them; and in the same century eastern Europe, especially Poland, became the seat of its study. Even the Bible was relegated to a secondary place, and the Jewish schools devoted themselves almost exclusively to the Talmud; so that "study" became synonymous with "study of the Talmud." A reaction against the supremacy of the Talmud came with the appearance of Moses Mendelssohn and the intellectual regeneration of Judaism through its contact with the Gentile culture of the eighteenth century, the results of this struggle being a closer assimilation to European culture, the creation of a new science of Judaism, and the movements for religious reform. Despite the Karaite inclinations which frequently appeared in these movements, the great majority of the followers of Judaism clung to the principle, authoritatively maintained by the Talmud, that tradition supplements the Bible; and the Talmud itself re-

(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

tained its authority as the work embodying the traditions of the earliest post-Biblical period, when Judaism was molded. Modern culture, however, has gradually alienated from the study of the Talmud a number of Jews in the countries of progressive civilization, and it is now regarded by the most of them merely as one of the branches of Jewish theology, to which only a limited amount of time can be devoted, although it occupies a prominent place in the curricula of the rabbinical seminaries. On the whole Jewish learning has done full justice to the Talmud, many scholars of the nineteenth century having made noteworthy contributions to its history and textual criticism, and having constituted it the basis of historical and archeological researches. The study of the Talmud has even attracted the attention of non-Jewish scholars; and it has been included in the curricula of universities.

Edict of Justinian.

The external history of the Talmud reflects in part the history of Judaism persisting in a world of hostility and persecution. Almost at the very time that the Babylonian saboraim put the finishing touches to the redaction of the Talmud, the emperor Justinian issued his edict against the abolition of the Greek translation of the Bible in the service of the Synagogue, and also forbade the use of the δευτέρωσις, or traditional exposition of Scripture. This edict, dictated by Christian zeal and anti-Jewish feeling, was the prelude to attacks on the Talmud, conceived in the same spirit, and beginning in the thirteenth century in France, where Talmudic study was then flourishing. The charge against the Talmud brought by the convert Nicholas Donin led to the first public disputation between Jews and Christians and to the first burning of copies of the work (Paris, 1244). The Talmud was likewise the subject of a disputation at Barcelona in 1263 between Moses ben Naḥman and Pablo Christiani. In this controversy Naḥmanides asserted that the haggadic portions of the Talmud were merely "sermones," and therefore devoid of binding force; so that proofs deduced from them in support of Christian dogmas were invalid, even in case they were correct. This same Pablo Christiani made an attack on the Talmud which resulted in a papal bull against it and in the first censorship, which was undertaken at Barcelona by a commission of Dominicans, who ordered the cancelation of passages reprehensible from a Christian point of view (1264). At the disputation of Tortosa in 1413, Geronimo de Santa Fé brought forward a number of accusations, including the fateful assertion that the condemnations of pagans and apostates found in the Talmud referred in reality to Christians. Two years later, Pope Martin V., who had convened this disputation, issued a bull (which was destined, however, to remain inoperative) forbidding the Jews to read the Talmud, and ordering the destruction of all copies of it. Far more important were the charges made in the early part of the sixteenth century by the convert Johann Pfefferkorn, the agent of the Dominicans. The result of these accusations was a struggle in which the emperor and the pope acted as judges, the advocate of the Jews being Johann Reuchlin, who was opposed by the obscurantists and the humanists; and this controversy, which was carried on for the most part by means of pamphlets, became the precursor of the Reformation. An unexpected result of this affair was the complete printed edition of the Babylonian Talmud issued in 1520 by Daniel Bomberg at Venice, under the protection of a papal privilege. Three years later, in 1523, Bomberg published the first edition of the Palestinian Talmud. After thirty years the Vatican, which had first permitted the Talmud to appear in print, undertook a campaign of destruction against it. On New-Year's Day (Sept. 9), 1553, the copies of the Talmud which had been confiscated in compliance with a decree of the Inquisition were burned at Rome; and similar burnings took place in other Italian cities, as at Cremona in 1559. The Censorship of the Talmud and other Hebrew works was introduced by a papal bull issued in 1554; five years later the Talmud was included in the first Index Expurgatorius; and Pope Pius IV. commanded, in 1565, that the Talmud be deprived of its very name. The first edition of the expurgated Talmud, on which most subsequent editions were based, appeared at Basel (1578–1581) with the omission of the entire treatise of 'Abodah Zarah and of passages considered inimical to Christianity, together with modifications of certain phrases. A fresh attack on the Talmud was decreed by Pope Gregory XIII. (1575-85), and in 1593 Clement VIII. renewed the old interdiction against reading or owning it. The increasing study of the Talmud in Poland led to the issue of a complete edition (Cracow, 1602–5), with a restoration of the original text; an edition containing, so far as known, only two treatises had previously been published at Lublin (1559–76). In 1707 some copies of the Talmud were confiscated in the province of Brandenburg, but were restored to their owners by command of Frederick, the first king of Prussia. The last attack on the Talmud took place in Poland in 1757, when Bishop Dembowski, at the instance of the Frankists, convened a public disputation at Kamenetz-Podolsk, and ordered all copies of the work found in his bishopric to be confiscated and burned by the hangman.

Attacks on the Talmud.

The external history of the Talmud includes also the literary attacks made upon it by Christian theologians after the Reformation, since these onslaughts on Judaism were directed primarily against that work, even though it was made a subject of study by the Christian theologians of the seventeenth and eighteenth centuries. In 1830, during a debate in the French Chamber of Peers regarding state recognition of the Jewish faith, Admiral Verhuell declared himself unable to forgive the Jews whom he had met during his travels throughout the world either for their refusal to recognize Jesus as the Messiah or for their possession of the Talmud. In the same year the Abbé Chiarini published at Paris a voluminous work entitled "Théorie du Judaïsme," in which he announced a translation of the Talmud, advocating for the first time a version which should make the work generally accessible, and thus serve for attacks on Juda-

PAGE FROM TRACTATE SHABBAT OF THE ROMM EDITION OF THE BABYLONIAN TALMUD, WILNA, 1886.

ism. In a like spirit modern anti-Semitic agitators have urged that a translation be made; and this demand has even been brought before legislative bodies, as in Vienna. The Talmud and the “Talmud Jew” thus became objects of anti-Semitic attacks, although, on the other hand, they were defended by many Christian students of the Talmud.

In consequence of the checkered fortunes of the Talmud, manuscripts of it are extremely rare; and the Babylonian Talmud is found entire only in a Munich codex (Hebrew MS. No. 95), completed in 1369, while a Florentine manuscript containing several treatises of the fourth and fifth orders dates from the year 1176. A number of Talmudic codices containing one or more tractates are extant in Rome, Oxford, Paris, Hamburg, and New York, while the treatise Sanhedrin, from Reuchlin's library, is in the grand-ducal library at Carlsruhe. In the introduction to vols. i., iv., viii., ix., and xi. of his “Diḳduḳe Soferim, Variæ Lectiones in Mischnam et in Talmud Babylonicum,” which contains a mass of critical material bearing on the text of Babli, N. Rabbinovicz has described all the manuscripts of this Talmud known to him, and has collated the Munich manuscript with the printed editions, besides giving in his running notes a great number of readings collected with much skill and learning from other manuscripts and various ancient sources. Of this work, which is indispensable for the study of the Talmud, Rabbinovicz himself published fifteen volumes (Munich, 1868–86), containing the treatises of the first, second, and fourth orders, as well as two treatises (Zebaḥim and Menaḥot) of the fifth order. The sixteenth volume (Ḥullin) was published posthumously (completed by Ehrentreu, Przemysl, 1897). Of the Palestinian Talmud only one codex, now at Leyden, has been preserved, this being one of the manuscripts used for the editio princeps. Excepting this codex, only fragments and single treatises are extant. Recently (1904) Luncz discovered a portion of Yerushalmi in the Vatican Library, and Ratner has made valuable contributions to the history of the text in his scholia on Yerushalmi (“Sefer Ahabat Ẓiyyon we-Yerushalayim”), of which three volumes have thus far appeared, comprising Berakot, Shabbat, Terumot, and Ḥallah (Wilna, 1901, 1902, 1904).

Early Editions.

The first edition of Babli (1520) was preceded by a series of editions, some of them no longer extant, of single treatises published at Soncino and Pesaro by the Soncinos. The first to appear was Berakot (1488); this was followed by the twenty-three other tractates which, according to Gershon Soncino, were regularly studied in the yeshibot. The first edition by Bomberg was followed by two more (1531, 1548), while another was published at Venice by Giustiniani (1546–51), who added to Bomberg's supplements (such as Rashi and the Tosafot, which later were invariably appended to the text) other useful marginal glosses, including references to Biblical quotations and to parallel passages of the Talmud as well as to the ritual codices. At Sabbionetta in 1553, Joshua Boaz (d. 1557), the author of these marginalia, which subsequently were added to all editions of the Talmud, undertook a new and magnificent edition of the Talmud. Only a few treatises were completed, however; for the papal bull issued against the Talmud in the same year interrupted the work. As a result of the burning of thousands of copies of the Talmud in Italy, Joseph Jabez published a large number of treatises at Salonica (1563 *et seq.*) and Constantinople (1583 *et seq.*). The mutilated Basel edition (1578–81) and the two editions which first appeared in Poland have been mentioned above. The first Cracow edition (1602–5) was followed by a second (1616–20); while the first Lublin edition (1559 *et seq.*), which was incomplete, was followed by one giving the entire text (1617–39); this was adopted for the Amsterdam edition (1644–48), the partial basis of the edition of Frankfort-on-the-Oder (1697–99). Many useful addenda were made to the second Amsterdam edition (1714–19), which was the subject of an interesting lawsuit, and which was completed by the edition of Frankfort-on-the-Main (1720–22). This latter text has served as the basis of almost all the subsequent editions. Of these the most important are: Prague, 1728-39; Berlin and Frankfort-on-the-Oder, 1734–39 (earlier ed. 1715–22); Amsterdam, 1752–65; Sulzbach, 1755–63, 1766–70; Vienna, 1791–1797, 1806–11, 1830–33, 1840–49, 1860–73; Dyhernfurth, 1800–4, 1816-21; Slawita, Russia, 1801–6, 1808–13, 1817–22; Prague, 1830–35, 1839–46; Wilna and Grodno, 1835–54; Czernowitz, 1840–49; Jitomir, 1858–64; Warsaw, 1859–64, 1863–67 *et seq.*; Wilna, 1859–66; Lemberg, 1860–65 *et seq.*; Berlin, 1862–68; Stettin, 1862 *et seq.* (incomplete). The edition of the Widow and Brothers Romm at Wilna (1886) is the largest as regards old and new commentaries, glosses, other addenda, and aids to study.

Two other editions of Yerushalmi have appeared in addition to the editio princeps (Venice, 1523 *et seq.*), which they closely follow in columniation—those of Cracow, 1609, and Krotoschin, 1866. A complete edition with commentary appeared at Jitomir in 1860–67. The latest edition is that of Piotrkow (1898–1900). There are also editions of single orders or treatises and their commentaries, especially noteworthy being Z. Frankel's edition of Berakot, Pe'ah, and Demai (Breslau, 1874–75).

“Variæ Lectiones” and Translations.

A critical edition of Babli has been proposed repeatedly, and a number of valuable contributions have been made, especially in the huge collections of variants by Rabbinovicz; but so far this work has not even been begun, although mention should be made of the interesting attempt by M. Friedmann, “Kritische Edition des Traktates Makkoth,” in the “Verhandlungen des Siebenten Internationalen Orientalisten-Congresses, Semitische Section,” pp. 1–78 (Vienna, 1888). Here the structure of the text is indicated by such external means as different type, sections, and punctuation. The edition of Yerushalmi announced by Luncz at Jerusalem promises a text of critical purity.

The earliest allusion to a translation of the Talmud is made by Abraham ibn Daud in his historical “Sefer ha-Ḳabbalah” (see Neubauer, “M. J. C.” i. 69), who, referring to Joseph ibn Abitur (second half of 10th cent.), says: “He is the one who translated the entire Talmud into Arabic for the calif Al-Ḥakim." The tradition was therefore current among the Jews of Spain in the twelfth century that Ibn Abitur had translated the Talmud for this ruler of Cordova, who was especially noted for his large library, this tradition being analogous to the one current in Alexandria in antiquity with regard to the first Greek translation of the Bible. No trace, however, remains of Joseph Abitur's translation; and in all probability he translated merely detached portions for the calif, this work giving rise to the legend of his complete version. The need of a translation to render the contents of the Talmud more generally accessible, began to be felt by Christian theologians after the sixteenth century, and by Jewish circles in the nineteenth century. This gave rise to the translations of the Mishnah which have been noted elsewhere (see Jew. Encyc. viii. 618, *s.v.* Mishnah). In addition to the complete translations mentioned there, single treatises of the Mishnah have been rendered into Latin and into modern languages, a survey being given by Bischoff in his "Kritische Geschichte der Thalmud-Uebersetzungen," pp. 28–56 (Frankfort-on-the-Main, 1899). Twenty treatises of Yerushalmi were translated into Latin by Blasio Ugolino in his "Thesaurus Antiquitatum Sacrarum," xvii. (1755), xxx. (1765); and the entire text of this Talmud was rendered into French by Moïse Schwab ("Le Talmud de Jérusalem," 11 vols., Paris, 1871–1889). The translation by Wünsche of the haggadic portions of Yerushalmi has already been mentioned; and an account of the translations of single portions is given by Bischoff (*l.c.* pp. 59 *et seq.*). In 1896 L. Goldschmidt began the translation of a German version of Babli, together with the text of Bomberg's first edition; and a number of volumes have already appeared (Berlin, 1898 *et seq.*). The insufficiency of this work apparently corresponds to the rapidity with which it is issued. In the same year M. L. Rodkinson undertook an abridged translation of the Babylonian Talmud into English, of which seven volumes appeared before the translator's death (1904); Rodkinson's point of view was quite unscholarly. Of translations of single treatises the following may be mentioned (see Bischoff, *l.c.* pp. 68–76): Earlier Latin translations: Ugolino, Zebaḥim, Menaḥot (in "Thesaurus Antiquitatum Sacrarum," xix.), Sanhedrin (*ib.* xxv.); G. E. Edzard, Berakot (Hamburg, 1713); F. B. Dachs, Sukkah (Utrecht, 1726). Noteworthy among the Jewish translators of the Talmud are M. Rawicz (Megillah, 1863; Rosh ha-Shanah, 1886; Sanhedrin, 1892; Ketubot, 1897); E. M. Pinner (Berakot, 1842, designed as the first volume of a translation of the entire Talmud); D. O. Straschun (Ta'anit, 1883); and Sammter (Baba Meẓi'a, 1876). Their translations are entirely in German. Translations published by Christian scholars in the nineteenth century: F. C. Ewald (a baptized Jew), 'Abodah Zarah (Nuremberg, 1856); in 1831 the Abbé Chiarini, mentioned above, published a French translation of Berakot; and in 1891 A. W. Streane prepared an English translation of Ḥagigah. A French version of several treatises is included in J. M. Rabbinovicz's works "Législation Civile du Talmud" (5 vols., Paris, 1873–79) and "Législation Criminelle du Talmud" (*ib.* 1876), while Wünsche's translation of the haggadic portions of Babli (1886–89) has been mentioned above.

Function in Judaism.

To gain a comprehensive view of the Talmud it must be considered as a historical factor in Judaism as well as a literary production. In the latter aspect it is unique among the great masterpieces of the literatures of the world. In form a commentary, it became an encyclopedia of Jewish faith and scholarship, comprising whatsoever the greatest representatives of Judaism in Palestine and in Babylon had regarded as objects of study and investigation and of teaching and learning, during the three centuries which elapsed from the conclusion of the Mishnah to the completion of the Talmud itself. When the Mishnah, with the many ancient traditions to which it had given rise since the latter centuries of the Second Temple, was incorporated into the Talmud as its text-book, the Talmud became a record of the entire epoch which was represented by the Jewish schools of Palestine and Babylon, and which served as a stage of transition from the Biblical period to the later aspect of Judaism. Although the Talmud is an academic product and may be characterized in the main as a report (frequently with the accuracy of minutes) of the discussions of the schools, it also sheds a flood of light on the culture of the people outside the academies. The interrelation between the schools and daily life, and the fact that neither teachers nor pupils stood aloof from that life, but took part in it as judges, instructors, and expounders of the Law, caused the Talmud to represent even non-scholastic affairs with an abundance of minute details, and made it an important source for the history of civilization. Since, moreover, the religious law of the Jews dealt with all the circumstances of life, the Talmud discusses the most varied branches of human knowledge—astronomy and medicine, mathematics and law, anatomy and botany—thus furnishing valuable data for the history of science also.

The Talmud, furthermore, is unique from the point of view of literary history as being a product of literature based on oral tradition and yet summarizing the literature of an entire epoch. Aside from it, those to whose united efforts it may be ascribed have left no trace of intellectual activity. Though anonymous itself, the Talmud, like other products of tannaitic and amoraic literature, cites the names of many authors of sayings because it was a universal practise to memorize the name of the author together with the saying. Many of these scholars are credited with only a few sentences or with even but one, while to others are ascribed many hundreds of aphorisms, teachings, questions, and answers; and the representatives of Jewish tradition of those centuries, the Tannaim and the Amoraim, received an abundant compensation for their renunciation of the fame of authorship when tradition preserved their names together with their various expositions, and thus rescued even the least of them from oblivion. The peculiar form of the Talmud is due to the fact that it is composed almost entirely of individual sayings and discussions on them, this circumstance being a result of its origin:

(In the possession of J. D. Eisenstein, New York.)

the fact that it sought especially to preserve the oral tradition and the transactions of the academies allowed the introduction only of the single sentences which represented the contributions of the teachers and scholars to the discussions. The preservation of the names of the authors of these apothegms, and of those who took part in the discussions, transactions, and disputations renders the Talmud the most important, and in many respects the only, source for the period of which it is the product. The sequence of generations which constitute the framework of the history of the Tannaim and Amoraim may be determined from the allusions contained in the Talmud, from the anecdotes and stories of the academies, and from other valuable literary material, which exhibit the historical conditions, events, and personages of the time, not excepting cases in which the facts have been clothed in the garb of legend or myth. Although it was undertaken with no distinctly literary purpose, it contains, especially in its haggadic portions, many passages which are noteworthy as literature, and which for many centuries were the sole repositories of Jewish poetry.

Its Authority.

After the completion of the Talmud as a work of literature, it exercised a twofold influence as a historical factor in the history of Judaism and its followers, not only in regard to the guidance and formulation of religious life and thought, but also with respect to the awakening and development of intellectual activity. As a document of religion the Talmud acquired that authority which was due to it as the written embodiment of the ancient tradition, and it fulfilled the task which the men of the Great Assembly set for the representatives of the tradition when they said, "Make a hedge for the Torah" (Ab. i. 2). Those who professed Judaism felt no doubt that the Talmud was equal to the Bible as a source of instruction and decision in problems of religion, and every effort to set forth religious teachings and duties was based on it; so that even the great systematic treatise of Maimonides, which was intended to supersede the Talmud, only led to a more thorough study of it. In like manner, the Shulḥan 'Aruk of Joseph Caro, which achieved greater practical results than the Mishneh Torah, of Maimonides, owed its authority to the fact that it was recognized as the most convenient codification of the teachings of the Talmud; while the treatises on the philosophy of religion which strove as early as the time of Saadia to harmonize the truths of Judaism with the results of independent thinking referred in all possible cases to the authority of the Talmud, upon which they could easily draw for a confirmation of their theses and arguments. The wealth of moral instruction contained in the Talmud exercised a profound influence upon the ethics and ideals of Judaism. Despite all this, however, the authority enjoyed by it did not lessen the authority of the Bible, which continued to exercise its influence as the primal source of religious and ethical instruction and edification even while the Talmud ruled supreme over religious practise, preserving and fostering in the Diaspora, for many centuries and under most unfavorable external conditions, the spirit of deep religion and strict morality.

The history of Jewish literature since the completion of the Talmud has been a witness to its importance in awakening and stimulating intellectual activity among the Jews. The Talmud has been made the subject or the starting-point of a large portion of this widely ramified literature, which has been the product of the intellectual activity induced by its study, and to which both scholars in the technical sense of the word and also a large number of the studious Jewish laity have contributed. The same faculties which had been exercised in the composition of the Talmud were requisite also for the study of it; the Talmud therefore had an exceedingly stimulating influence upon the intellectual powers of the Jewish people, which were then directed toward other departments of knowledge. It is a noteworthy fact that the study of the Talmud gradually became a religious duty, and thus developed into an intellectual activity having no ulterior object in view. Consequently it formed a model of study for the sake of study.

The Talmud has not yet entirely lost its twofold importance as a historical factor within Judaism, despite the changes which have taken place during the last century. For the majority of Jews it is still the supreme authority in religion; and, as noted above, although it is rarely an object of study on the part of those who have assimilated modern culture, it is still a subject of investigation for Jewish learning, as a product of Judaism which yet exerts an influence second in importance only to the Bible.

The following works of traditional literature not belonging to the Talmud have been included in the editions of Babli: Abot de-Rabbi Natan; Derek Ereẓ Rabbah; Derek Ereẓ Zuṭa; Kallah; Semaḥot; Soferim.

Bibliography: The manuscripts, editions, and translations have been discussed in the article. For an introduction to the Talmud the following works may be mentioned in addition to the general ones on Jewish history: Weiss, *Dor*, iii.; Halevy, *Dorot ha-Rishonim*, ii., Frankfort-on-the-Main, 1901; H. L. Strack, *Einleitung in den Talmud*, 2d ed., Leipsic, 1894 (covers the Mishnah also and contains an extensive bibliography of the Talmud); M. Mielziner, *Introduction to the Talmud*, Cincinnati (also gives good bibliography of the Talmud; the second part of this work contains a clear discussion of the hermeneutics and the methodology of the Talmud). On the Palestinian Talmud: Z. Frankel, *Mebo*, Breslau, 1870; J. Wiener, *Gib'at Yerushalayim*, Vienna, 1872 (reprinted from *Ha-Shaḥar*); A. Geiger, *Die Jerusalemische Gemara*, in his *Jüd. Zeit.* 1870, pp. 278-306 (comp. *Monatsschrift*, 1871, pp. 120-137); I. Lewy, *Interpretation des Ersten Abschnitts des Palästinischen Talmud-Traktates Nesikin*, in *Breslauer Jahresbericht*, 1895, pp. 1-19. On the Babylonian Talmud: Z. Frankel, *Beiträge zur Einleitung in den Talmud*, in *Monatsschrift*, 1861, pp. 168-194, 205-212, 258-272; N. Brüll, *Die Entstehungsgeschichte des Babylonischen Talmuds als Schriftwerkes*, in his *Jahrb.* 1876, ii. 1-123. On the earlier works introductory to the Talmud: J. H. Weiss, in *Bet Talmud*, i., ii., Vienna, 1881, 1882; Samuel b. Hophni, *Madkhal ila 'al-Talmud* (= "Introduction to the Talmud"; this is the earliest work bearing the title and is known only through a quotation in the lexicon of Ibn Janaḥ, *s.v.* דרש); Samuel ha-Nagid, *Mebo ha-Talmud* (forming an appendix to the first volume of modern editions of the Talmud); Joseph ibn 'Aḳnin, an introduction to the Talmud (Hebr. transl. from the Arabic), edited in the *Jubelschrift des Breslauer Seminars zum Siebzigen Geburtstage Frankels*, 1871. For other works on the subject see Talmud Hermeneutics; a list is given in Jellinek, *Konṭres ha-Kelalim*, Vienna, 1878. General articles on the Talmud in reviews and encyclopedias: Emil Deutsch, in *Quarterly Review*, 1867, frequently reprinted and translated; J. Derenbourg, in Lichtenberg's *Encyclopédie des Sciences Religieuses*, 1882, xii. 1007-1036; Arsène Darmesteter, in *R. E. J.* xviii. (*Actes et Conferences*, pp. ccclxxxi.-dcxlii.); S. Schechter, in Hastings, *Dict. Bible*, extra vol., 1904, pp. 57-66; E. Bischoff, *Talmud-Katechismus*, Leipsic, 1904. On the literature of the Talmud commentaries see Talmud Commentaries. On grammatical and lexicographical aids to the study of the Talmud see Jew. Encyc. vi.

80, *s.v.* GRAMMAR, HEBREW, and *ib.* iv. 580-585, *s.v.* DICTIONARIES, HEBREW.. On the terminology of the Talmud see, in addition to the works on Talmudic methodology: A. Stein, *Talmudische Terminologie, Alphabetisch Geordnet*, Prague, 1869; W. Bacher, *Die Exegetische Terminologie der Jüdischen Traditionslitteratur:* part i., *Die Bibelexegetische Terminologie der Tannaiten*, Leipsic, 1899 (original title, *Die Aelteste Terminologie der Jüdischen Schriftauslegung*); part ii., *Die Bibel- und Traditionsexegetische Terminologie der Amoräer*, ib. 1905.

W. B.

TALMUD COMMENTARIES: The commentaries on the Talmud constitute only a small part of halakic literature in comparison with the responsa literature and the commentaries on the codices. At the time when the Talmud was concluded the traditional literature was still so fresh in the memory of scholars that there was no need of writing Talmudic commentaries, nor were such works undertaken in the first period of the gaonate. Palṭoi Gaon (*c.* 840) was the first who in his responsa offered verbal and textual comments on the Talmud. Ẓemaḥ b. Palṭoi (*c.* 872) paraphrased and explained the passages which he quoted; and he composed, as an aid to the study of the Talmud, a lexicon which Abraham Zacuto consulted in the fifteenth century. Saadia Gaon is said to have composed commentaries on the Talmud, aside from his Arabic commentaries on the Mishnah (Benjacob, "Oẓar ha-Sefarim," p. 181, No. 430). According to the Karaite Solomon b. Jeroham, a commentary on Yerushalmi by Ephraim b. Jacob existed as early as the time of Saadia, although this is highly improbable (Pinsker, "Liḳḳuṭe Ḳadmoniyyot," Supplement, p. 4; Poznanski, in "Kaufmann Gedenkbuch," p. 182).

Earliest Attempts.

The last three great geonim, Sherira, Hai, and Samuel b. Ḥofni, did much in this field. Most of Sherira's comments were explanations of difficult terms. Many of these are quoted by Abu al-Walid (Bacher, "Leben und Werke des Abulwalid Merwân ibn Gānāḥ," etc., p. 85). It appears from the quotations in the "'Aruk" that Hai Gaon wrote commentaries on at least eleven treatises (Kohut, "Aruch Completum," xiii. *et seq.*). Abu al-Walid quotes Hai's commentary on Shabbat (Bacher, *l.c.* p. 87). In the eleventh century commentaries on the Talmud were composed not only in Babylon but also in Africa, Spain, and Germany. In the first half of that century Nissim b. Jacob, of Kairwan in northern Africa, composed his "Kitab Miftaḥ Maghaliḳ al-Talmud" (Hebr. title, "Sefer Mafteaḥ Man'ule ha-Talmud" = "Key to the Locks of the Talmud"), a commentary in which he explains difficult passages by references to parallel ones and occasionally to Yerushalmi also. The work of Hananeel b. Ḥushiel corresponds more to a commentary in the exact sense of the term. He sums up the Talmudic discussions, perhaps in order to facilitate the halakic decision, devoting his attention principally to determining the correct text of the Talmud. The first teachers in Spain, Enoch ben Moses, Joseph ibn Abitur, Isaac ibn Ghayyat, and Isaac Albargeloni, are also known to have composed commentaries on the Talmud (Weiss, "Dor," iv. 276 *et seq.*). Naḥmani quotes Talmudic comments from a work by Samuel ha-Nagid (Benjacob, *l.c.* No. 481). According to a not entirely authenticated statement (*ib.* No. 247), the famous exegete Abraham ibn Ezra composed a commentary on the treatise Ḳiddushin. In Germany, Gershom b. Judah engaged in similar labors, though his commentaries have come to light only in the last century: they appear to have been the chief sources used by Rashi (1040–1105), the greatest commentator of the Talmud. Although Rashi drew upon all his predecessors, yet his originality in using the material offered by them has always been admired. His commentaries, in turn, became the basis of the work of his pupils and successors, who composed a large number of supplementary works that were partly in emendation and partly in explanation of Rashi's, and are known under the title "tosafot." These works were printed together with Rashi's commentaries in the first editions of single Talmud treatises, and then in the collective editions. The tosafot included in the present editions are taken from various collections. There are tosafot of Sens, tosafot of Evreux, tosafot of Touques, etc. (Winter and Wünsche, "Die Jüdische Litteratur," ii. 465). Instead of the simple, strictly logical method of exegesis a dialectic method showing great acumen is frequently employed in the tosafot. Originating in the German and French schools, and thence adopted by the Spanish and Arabic, it found in the following centuries (13th to 15th) brilliant representatives in Moses b. Naḥman, Solomon ben Adret, and others in Spain, as well as in various scholars in Turkey, although the Oriental Jews generally followed the simple method of Talmud study. The commentators are called "rishonim" (elders) down to the sixteenth century, and subsequently "aḥaronim" (juniors).

Rashi.

In the sixteenth century the hair-splitting dialectic study of the Talmud known as the PILPUL came to the fore. The method called "ḥilluḳ," originating in Augsburg and Nuremberg, claimed chief attention, especially through the influence of Jacob POLLAK of Poland, that country becoming in the course of the century the principal center of the study of the Talmud. Special rules were formulated for composing the ḥilluḳim (Jellinek, in Keller's "Bikkurim," i. 3). It is frequently intimated in subsequent pilpulistic works that the author himself regards his expositions as artificial, though he believes them to contain a grain of truth. This method still dominates to some extent the study of the Talmud in the eastern countries of Europe. But Jewish science demands a scientific treatment of the Talmud—an examination of its sources and parallel passages from a historical, archeological, and philological point of view, a methodical analysis of its text, and a comparative study of it by the side of other monuments of antiquity.

Method of Ḥilluḳim.

The Palestinian Talmud was studied much less than the Babylonian, although occasional comments on Yerushalmi are found in Alfasi and other earlier authorities, especially in the commentary of Samson of Sens on the mishnaic order Zera'im. The first connected commentary on many treatises of Yerushalmi was composed in the seventeenth century by R. Joshua Benveniste, who had at hand R. Solomon Sirillo's commentary on certain treatises. Elijah

Palestinian Talmud.

Fulda commentated in 1710 the order Zera'im and part of the order Neziḳin. The greater part of Yerushalmi was edited about the middle of the eighteenth century by Mendelssohn's teacher David Fränkel; and a complete commentary was written by Moses Margolioth. Noteworthy as commentators in the nineteenth century are Nahum Trebitsch and Zacharias Frankel.

The commentaries on Babli may be divided into: (1) "perushim," running commentaries accompanying the text; (2) "tosafot" (additions), glosses on Rashi's commentary; (3) "ḥiddushim" (novellæ), explicit comments on certain passages of the Talmud text; and (4) "haggahot," or marginal glosses. As appears from the following chronological list, the treatises Seder Mo'ed, Nashim, and Ḥullin, which deal particularly with the religious life and which were therefore made special subjects of study and instruction, were most frequently commentated, while the Seder Ḳodashim is less often made the subject of comment. In the subjoined list only the edited commentaries are enumerated, no note being taken of treatises on which there are no commentaries. The letter "W" indicates the Wilna (Widow & Brothers Romm) Talmud edition of 1886.

Chronological List of Commentators on Both Talmudim.

Eleventh Century.

Nissim b. Jacob (d. 1040), Sefer Mafteaḥ (see above; Ber., Shab., 'Er.), ed. I. Goldenthal, Vienna, 1847; in W.

Gershom b. Judah (d. 1040), perush (Ber., Ta'an., B. B., entire Seder Ḳodashim excepting Zeb.); in W.

Hananeel b. Ḥushiel (d. 1050), perush (Seder Mo'ed, Seder Neziḳin excepting B. B.); in W.

Solomon b. Isaac (Rashi), commentary on thirty treatises; in all editions.

Twelfth to Fifteenth Century.

Samuel b. Meïr, commentary on Baba Batra from the third section and on the last section of Pesaḥim; in all editions.

Isaac b. Nathan, commentary on Makkot; in all editions, beginning with 19b.

Eliezer b. Nathan, commentary on Nazir; in W.

Jacob Tam (d. 1171), ספר הישר, on thirty-one treatises, Vienna, 1811.

Isaac b. Samuel of Dampierre, tosafot to Ḳiddushin; in W.

Joseph ibn Migash, ḥiddushim (Sheb., Salonica, 1759; B. B., Amsterdam, 1702).

Moses b. Maimon, perush (R. H.), Paris, 1865.

Judah Sir Leon (d. 1224), tosafot (Ber., in ברכה משולשת), Warsaw, 1863.

Samson of Sens, tosafot (Shab., 'Er., Men., in all editions; Soṭah in W.).

Perez, tosafot (Beẓah, Ned., Naz., Sanh., Mek., Me'i., in all editions; B. Ḳ., Leghorn, 1819).

Moses of Evreux, tosafot (Ber.); in all editions.

Samuel of Evreux, tosafot to Soṭah, *ib.*

Samuel of Falaise, tosafot to 'Abodah Zarah, *ib.*

Baruch, tosafot to Zebaḥim, *ib.*

Meïr Abulafia (d. 1244), יד רמה (B. B., Salonica, 1803; Sanh., *ib.* 1798).

Judah b. Benjamin ha-Rofe, perush (Sheḳ.); in W.

Peraḥyah b. Nissim (c. 1250), ḥiddushim, in מעשה רוקח, Venice, 1752.

Isaiah di Trani (*c.* 1250), tosafot (i., B. Ḳ., B. M., B. B., 'Ab. Zarah, Niddah, Shab., Ḥag.; ii., 'Er., R. H., Yoma, Suk., Meg., M. Ḳ., Pes., Beẓah, Ned., Naz., Lemberg, 1862; Ket., Giṭ., in W.).

Jonah Gerondi (d. 1263), ḥiddushim (Sanh., in סם חיים), Leghorn, 1801.

Moses b. Naḥman (d. *c.* 1270), ḥiddushim (Ber., 'Er., Pes., M. Ḳ., Ḥag., R. H., Suk., Ta'an., Meg., in לקוטות הרמב"ן, Salonica, 1791; Shab., in אוצר נחמד, Presburg, 1837; Yeb., Homburg, 1700; Ket., Metz, 1765; Giṭ., Niddah, in חמשה שטות, Sulzbach, 1762; B. B., Venice, 1723).

Todros ha-Levi (d. 1283), אוצר הכבוד (on the haggadot), Novidvor, 1808; ḥiddushim (Meg., Yoma, in סם חיים), Leghorn, 1801.

Aaron ha-Levi (d. 1293), ḥiddushim (Ket., Prague, 1742; Beẓah, in מראה האופנים, Leghorn, 1810).

Meïr of Rothenburg (d. 1293), tosafot to Yoma; in all editions.

Solomon b. Adret (d. 1310), ḥiddushim (Shab., R. H., Meg., Yeb., Ned., B. Ḳ., Ḥul., Constantinople, 1720; Sheb., Salonica, 1729; Niddah, Altona, 1737; Men., Warsaw, 1861; 'Er., *ib.* 1895).

Yom-Ṭob b. Abraham, ḥiddushim (Sheb., Salonica, 1805; 'Er., Ta'an., M. Ḳ., Ket., B. M., Amsterdam, 1729; R. H., Königsberg, 1858; Yoma, Constantinople, 1754; Meg., Warsaw, 1880; Yeb., Leghorn, 1787; Ḳid., Sabbionetta, 1553; Giṭ., Salonica, 1758; 'Ab. Zarah, in אורין תליתאי, *ib.* 1759; Sanh., in לשון חכמים, Leghorn, 1781; Sheb., in מעשה הצדיקים, *ib.* 1780; Mak., Sulzbach, 1762; Ḥul., Prague, 1735; Niddah, Vienna, 1868).

Menahem Me'iri (*c.* 1300), בית הבחירה (Shab., Leghorn, 1794; Yoma, *ib.* 1760; Meg., Ḥag., Ta'an., Prague, 1810; Ned., Naz., Soṭah, Beẓah, Berlin, 1859; Yeb., Salonica, 1794).

Asher b. Jehiel (d. 1327), perush (Ned., Naz.), in W.; tosafot (Ber., in ברכה משולשת, Warsaw, 1862; Suk., Jerusalem, 1903; R. H., *ib.* 1871; Meg., *ib.* 1884; 'Ab. Zarah, *ib.* 1888; Giṭ., Constantinople, 1711; B. M., Dyhernfurth, 1823; Sanh., Ḥul., in חמשה שטות, Sulzbach, 1762; Sheb., Venice, 1608; Niddah, under the title תורת שלמים, Venice, 1741); Aaron ha-Levi, חידושי הרא"ה, Ḳid., Husiatyn, 1902; חידושי מהר"ם חלאווה (Pes.), Jerusalem, 1873.

Isaac Aboab (d. 1493), ḥiddushim (in the responsa of Moses Galante), Venice, 1608.

Sixteenth Century.

Jacob be-Rab (d. 1546), ḥiddushim (Ket., Ḳid.), in his responsa, Venice, 1663.

1549. Joshua Boaz Baruch, the indexes עין משפט נר מצוה, תורה אור, Venice.

1552. Mattathias Delacrut, ḥiddushim ('Er.), Lublin.

1561. Joseph ibn Leb, ḥiddushim (Ket., B. Ḳ., Sheb., Constantinople, 1561; Giṭ., *ib.* 1573).

Solomon Luria (d. 1573), ים של שלמה (Beẓah, Lublin, 1636; Yeb., Altona, 1740; Ḳid., Berlin, 1766; Ket., Lemberg, 1862; Giṭ., Berlin, 1761; Ḥul., Cracow, 1615); חכמת שלמה on nineteen treatises, Cracow, 1581.

1573. Judah b. Moses, מסורת תלמוד ירושלמי, Constantinople.

1577. Jacob (מוהרי ק"ש), תולדות יעקב (Beẓah), Jerusalem, 1865.

1587. Samuel Jaffe Ashkenazi, יפה מראה, on the haggadot of Yerushalmi, Venice, 1590.

Abraham Burjil, לחם אבירים (Yeb., Ket., B. Ḳ., Bik.), *ib.* 1605.

1591. Joseph ibn Ezra, עצמות יוסף (Ḳid.), Salonica.

Bezaleel Ashkenazi, שטה מקובצת (Ber., Warsaw, 1863; Beẓah, Constantinople, 1731; Ket., *ib.* 1738; Naz., Leghorn, 1774; Soṭah, *ib.* 1800; B. Ḳ., Venice, 1762; B. M., Amsterdam, 1726; B. B., Lemberg, 1809; Seder Ḳodashim, excepting Ḥul., in W.).

Seventeenth Century.

1602. Samuel b. Eleazer, ḥiddushim (Ket., Giṭ.), Prossnitz.

1603. Jedidiah Galante, ḥiddushim (Beẓah, Yeb., Giṭ., B. Ḳ., 'Ab. Zarah), Venice.

1608. Abraham Ḥayyim Shor, תורת חיים ('Er., Pes., B. Ḳ., B. M., B. B. Sanh., Sheb., 'Ab. Zarah, Ḥul.), Lublin; צאן קדשים (Seder Ḳodashim), Wandsbeck, 1729.

Mordecai Jaffe (d. 1611), מסורות חדשות (glosses); in W.

Moses b. Isaiah, ḥiddushim (Zeb.), Berlin, 1701.

1612. Samuel Edels, ḥiddushim (מהרש"א on all treatises), Lublin.

1614. Issachar Bär, באר שבע (Hor., Ker., Soṭah, Ḥul.), Venice.

1619. Meïr Lublin, מאיר עיני חכמים (on most of the treatises), *ib.*

Isaac ha-Levi, ḥiddushim (Sheb., Beẓah, Yeb., Ḳid., Ket., 'Ab. Zarah, Ḥul.), Neuwied, 1736.

Abraham di Boton (d. 1625), ḥiddushim (B. Ḳ., in מהררי נמרים), Venice, 1599.

Joseph di Trani (d. 1639), ḥiddushim (Ḳid.), *ib.* 1645.

Joel Sirkes (d. 1640), haggahot; in W.

Joshua b. Solomon (d. 1648), מגני שלמה (Shab., Pes., Beẓah, Yeb., Ket., Ḳid., B. Ḳ., Ḥul.), Amsterdam, 1715.

Lipmann Heller (d. 1654), מלאכת יום טוב (notes); in W.

1652. Ḥiyya Rofe, מעשי חייא (on nineteen treatises), Venice.

1660. Mordecai Kremsier, קטרת המזבח (on the haggadot of Ber.), Amsterdam.

1662. Joshua Benveniste, שדה יהושע (Yer. Zera'im, Constantinople, 1662; Mo'ed, Nashim, Neziḳin, *ib.* 1754).

Meïr Schiff b. Jacob, ḥiddushe halakot (i., ii., Sheb., Beẓah, Ket., Giṭ., B. Ḳ., B. M., B. B., Sanh., Zeb., Ḥul.), Ẓolkiev, 1826, and in the editions.
Joshua Höschel (d. 1663), ḥiddushim (B. Ḳ., B. M., B. B.), Frankfort-on-the-Main, 1725.
1664. Solomon Algazi, לחם סתרים (ʻAb. Zarah, Ber., Ḥul., Venice, 1664; תאוה לעינים, Salonica, 1655; and זהב שיבה, Constantinople, 1683; on haggadot).
1669. Aaron Samuel Kaidanover, ברכת הזבח (Zeb., Men., ʻEr., Ker., Tem., Meʻi.), Amsterdam, 1669; תפארת שמואל (Pes., Beẓah, Yeb., Ket., Giṭ., B. Ḳ., B. M., Ḥul.), Frankfort-on-the-Main, 1696.
1670. Jonah Teomim (d. 1699), קיקיון דיונה (on thirteen treatises), Amsterdam.
1671. Moses Benveniste of Segovia, דובב שפתי ישנים (Ber., Seder Moʻed), Smyrna.
Ḥayyim ben Israel Benveniste (d. 1673), המרא וחיי (Sanh.), Leghorn, 1802.
1682. Samuel Eliezer b. Judah, ḥiddushe aggadot, Frankfort.
1686. Isaac Benjamin Wolf, ḥiddushim (B. M.), *ib.*
Moses ibn Ḥabib (d. 1696), שמות בארץ (R. H., Yoma, Suk.), Constantinople, 1727.
1693. Moses b. Simeon, פנים מסבירות (Ber., Seder Moʻed), Prague.
1698. Judah b. Nissan, בית יהודה (Yeb., Ket., Ḳid., Giṭ., B. Ḳ., B. M., B. B., Ḥul.), with ḥiddushim of David Oppenheim, Dessau.
1698. Naphtali Cohen, ברכת יהודה (Ber.), Frankfort.
1699. Samuel Ẓarfati, דברי שמואל (Ber., ʻEr., Beẓah, R. H., B. Ḳ., Hor.), Amsterdam.
Meïr Schiff b. Soloman, דרך אניה בלב ים (Ber., Sheb., Beẓah, Pes., Men.), Fürth, 1798.
Baruch Angel, ḥiddushim (Ket., Giṭ., B. Ḳ., B. M., Sheb., ʻAb. Zarah, Ḥul.), Salonica, 1717.
Nehemiah b. Abraham Feiwel Duschnitz, דברי נב"א (on twelve treatises), Amsterdam, 1694.
Judah Liva b. Bezaleel גור מריה (Shab., ʻEr., Pes.), Lemberg, 1861.

EIGHTEENTH CENTURY.

1700. Joseph b. Jacob, ראש יוסף (on the haggadah), Amsterdam.
Elijah Spira (d. 1712), אליהו רבה (Ḳid., Ket., Giṭ., B. Ḳ., B. M., Ḥul.), Fürth, 1768.
Abraham Broda (d. 1717), אשל אברהם (Pes., Giṭ., B. M., B. B.), Frankfort-on-the-Main, 1747; תולדות אברהם (Ḳid., Ket.), Fürth, 1769; ḥiddushim (B. Ḳ., B. M., Sanh. in הדושי הגאונים), Offenbach, 1723.
1710. Elijah b. Judah, perush on Yer. Zeraʻim and Sheḳ., Amsterdam, 1710; B. Ḳ., B. M., B. B., Frankfort, 1742.
1710. Abraham Naphtali Spitz, מלא רצון (on most of the treatises), Frankfort-on-the-Main.
1711. Samuel Shotten, כוס הישועות (Seder Neziḳin, excepting Hor.), *ib.*
1714. Akiba b. Judah Löb, האהל עולם (Ket.), *ib.*
1715. Meïr Eisenstadt (d. 1744), פנים מאירות (part i., Zeb., Shab., Ḥul., Amsterdam, 1715; part ii., Giṭ., Sulzbach, 1733; part iii., Ḳid., Beẓah, *ib.* 1738; also B. Ḳ., Sudilkov, 1832).
Joseph ha-Kohen Tanuji (d. 1720), בני יוסף (B. Ḳ., B.M., ʻAb. Zarah), Leghorn, 1793.
1720. Solomon Kohen, ḥiddushim (on eleven treatises), Wilmersdorf.
1725. Samuel di Avila, כתר תורה (Naz.), Amsterdam.
Menahem Nahum b. Jacob, זכרון מסחן (on fourteen treatises), Dyhernfurth, 1726.
1728. Johanan Kremnitzer, אורח מישור (Naz.), Berlin.
1728. Elijah b. Jacob, ברכת אליהו (Pes., Ḳid., Ket., Giṭ., B. Ḳ.), Wandsbeck.
Elijah ha-Kohen (d. 1729), אגדת אליהו (Yer. Zeraʻim), Smyrna, 1755.
1729. Judah of Gross-Glogau, קול יהודה (on most of the treatises), Amsterdam.
1729. Jacob b. Joseph Reischer, עיון יעקב (on haggadot), Wilmersdorf.
1730. Menahem Manuele, זרע ברוך (on most of the treatises), Wandsbeck.
1731. Isaac b. David, פני יצחק (Ber., Seder Moʻed), Amsterdam.
Jacob b. Joseph Kremer, זרע ישראל (R. H., Amsterdam, 1731; Meg., Altona, 1735).
Aryeh Löb b. Asher, גבורות ארי (Taʻan.), Wilna, 1862; טורי אבן (R. H., Ḥag., Meg.), Metz, 1781.
1733. Selig b. Phoebus, עולת אהרון (on haggadot), Offenbach.
1733. Ephraim b. Samuel, לוית חן (on most of the treatises), Altona.
1737. Ẓebi Hirsch b. Joshua, גאון צבי (Yeb., Ket., Ḳid., B. Ḳ., B. M., Ḥul.), Prague.
1739. Jacob Joshua Falk (d. 1756), פני יהושע (Ket., Giṭ., Ḳid., Amsterdam, 1739; Ber., Shab., Pes., R. H., Suk., Frankfort-on-the-Main, 1752; B. Ḳ., B. M., *ib.* 1756; Ḥul., Mak., Sheb., Fürth, 1780).
1740. Shabbethai b. Moses, מנחת כהן (on most of the treatises), Fürth.
1741. Israel b. Moses, נצח ישראל (on the mathematical passages), Frankfort-on-the-Oder.
1743. David Fränkel, קרבן עדה and שירי קרבן (Yer. Seder Moʻed, Dessau, 1743; Seder Nashim, *ib.* 1757).
1750. Moses Margolioth, פני משה (Yer. Nashim, Amsterdam, 1750; Neziḳin, Leghorn, 1770).
1751. Jacob Samosc, חדות יעקב (Ber., Suk., Beẓah, Ḳid., B. Ḳ., B. M., Sheb.), Rödelheim.
1755. Aaron b. Nathan, שם אהרון (on most of the treatises), Zolkiev.
1756. Ḥayyim Joseph David Azulai, שער יוסף (Hor.), Leghorn.
Akiba Eger (d. 1758), משנת דרבי עקיבא (Ber., Shab., ʻEr., Pes., Beẓah, Suk., Yeb., Ket., Ḳid., Giṭ., Seder Neziḳin, Seder Ḳodashim, Niddah), Fürth, 1781.
1757. Joseph b. Meïr Teomim (d. 1793), פורת יוסף (Yeb., Ket.), Zolkiev, 1757; ראש יוסף (Ḥul., Frankfort-on-the-Oder, 1794; Sheb., Meg., Lemberg, 1863).
1760. Isaiah Berlin, קשות מיושב and אומר השכחה (notes on all the treatises; ḥiddushim on Naz.), n.p.; haggahot in W.
1763. Joseph Darmstadt, עץ יוסף (Ber., Beẓah, Meg.), Carlsruhe.
Jonathan Eybeschütz (d. 1764), הסדי יהונתן (on most of the treatises), Piotrkow, 1897.
1766. Isaac Ashkenazi, גבול יהודה (Giṭ., Ket., B. Ḳ.), Salonica.
1766. Isaac Nuñez-Vaez, שיח יצחק (Yoma, Leghorn, 1766; Ḥag., *ib.* 1794).
Jacob Emden (d. 1776), glosses; in W.
1776. Elijah Sidlov, עטרת אליהו (Zeb., Men., Tem.), Fürth, 1776.
1776. Eleazar Kallir (d. 1801), אור חדש (Pes., Frankfort-on-the-Oder, 1776; Ḳid., Vienna, 1799).
Judah Lissa, מראה כהן (Zeb.), Frankfort-on-the-Main, 1776; מנחת כהן (Men.), Prague, 1788.
1777. Itzig b. Samson, קרבן אשם (Yoma, Beẓah, Sheb., Ḥul., ʻAr., Tem., Meʻi., Ker.), Sulzbach.
1778. Saul b. Aryeh (d. 1790), בית תלמוד (on fourteen treatises), Amsterdam.
1778. Raphael Peiser, אור לישרים (Pes., Shab., Beẓah, Ket., R. H., Ḥul.), Dyhernfurth, 1778; גולת התתיות (Ḳid., Giṭ.), *ib.* 1805.
1781. Eliezer de Avila, מגן גבורים (i., B. M., Hor.; ii., Ket., Ḳid., Leghorn, 1781–85).
1784. Nathan Maas, בנין שלמה (Sanh., Offenbach, 1784; ʻAb. Zarah, *ib.* 1796).
1784. Ezekiel Landau ציון לנפש חיה = צ"ל"ח (Pes., Prague, 1784; Ber., *ib.* 1791; Beẓah, *ib.* 1799; Sheb., ʻEr., Warsaw, 1879; R. H., Yoma, Suk., Taʻan., Ḥag., Meg., *ib.* 1890; Ḥul., Zeb., Men., *ib.* 1891); glosses; in W.
Elijah Wilna (d. 1797), glosses and elucidations of both Talmudim in various editions.
1785. Moses Katz, דרבוני זהב (Sheḳ.), Fürth.
1786. Phinehas Horwitz, הפלאה (part i., Ket., Offenbach, 1786; part ii., Ḳid., *ib.* 1801; part iii., Ber., Munkacs, 1895).
1786. Meïr Barby, ḥiddushe halakot (i., Beẓah, Pes., Ḳid., Ket., Dyhernfurth, 1786; ii., Yoma, Suk., Giṭ., Ḥul., Sheb., Prague, 1793).
Uziel Meisels, עץ הדעת טוב (Sheb.), Lemberg, 1886.
1788. Wolf Lasch, קדושת ישראל (i., ii., Ket., Ḳid., Giṭ., Brünn, 1788; Vienna, 1829).
1789. Joseph David Sinzheim, יד דוד (Ber., entire Seder Moʻed), Offenbach.
David Schiff (d. 1792), לשון הזהב (on most of the treatises), *ib.* 1822.
1791. Levi Pollak, עמודי שטים לבית לוי (B. Ḳ., B. M., B. B., Sheb., ʻAb. Zarah), Prague.
1792. Isaac b. Ẓebi, טהרות הקדש (Zeb.), Lemberg.
1792. Meïr Spitz, כתית למאור (R. H., Yoma, Suk., Meg., Taʻan.), Vienna.
1794. Judah Najar, אלפי יהודה (Sheb.), Leghorn, 1794; שמחת יהודה (Ker.), Pisa, 1816.
1796. Baruch b. Samuel Zanwil, זרע שמואל (Ket.), Vienna, 1796.
1796. Joseph b. Moses, מעשה חושב (B. Ḳ.), Lemberg.
1799. Elijah Ventura, ככבא דשביט (on twenty-one treatises), Salonica.
Aryeh Judah Löb Teomim, אילת אהבים (Ber., Shab., Pes., Beẓah, Ḥul., Ḳid., Sheb.), Zolkiev, 1802.

Ḥayyim Shabbethai Lago, שמחת עולם (Ber., Pes., Ḳid., Sanh., Ḥul.), Salonica, 1801.
Abraham b. Jacob Mutal, תורת נזיר (Naz.), n.p., 1821.
Ḥayyim Abraham b. Samuel, ḥiddushim (Shab., R. H., Suk., Ḥul.), Salonica, 1804.

Nineteenth and Twentieth Centuries.

1801. Ẓebi Hirsch Horwitz, מחנה לוי (14 treatises), Offenbach.
1801. Eleazar Karpeles, מאבני המקום (Hor.), Prague; ערכי עדי (Ḥul., 'Ar.), *ib.* 1815.
1802. Bezaleel Ronsburg, הורה גבר (Hor.), Prague; מעשי ר"ב, notes, in W.
1802. Eleazar Löw, שמן רוקח (Ber., Pes., Beẓah), Prague.
1804. Abraham Aryeh Kahana, אור הנערב (on most of the treatises), Ostrog.
1810. Meïr Schlesinger, דברי מאיר (Shab., R. H., Giṭ., B. M.), Prague.
1811. Jacob Simeon Shabbethai, מתת אלהים (Meg., Ta'an.), Pisa, 1821; אביר יעקב (Ker.), *ib.* 1811.
1814. Jacob Günzburg, זרע יעקב (Ber., Shab.), Prague.
1815. Benedetto Frizzi, פתח עינים (on haggadot), Leghorn.
1821. Nahum Trebitsch, שלום ירושלים (Yer. Seder Mo'ed), Vienna.
1822. David Deutsch, אהל דוד (on most of the treatises), Vienna, 1822, 1825; Presburg, 1836; Ungvar, 1867.
Moses Sofer, חידושי חתם סופר (Beẓah, Piotrkow, 1898; B. B., *ib.* 1896; Shab., Vienna, 1889; Ḥul., Giṭ., *ib.* 1893; Pes., Jerusalem, 1894); haggahot in W.
1822. Gabriel Cohen, עיני ישראל (B. B., Sheb.), Vienna.
1823. Jacob Lissa, בית יעקב (Ket.), Hrubisov.
1824. Marcus Hirsch, דרך המלך (Seder Mo'ed excepting Shab., 'Er., Ḥag.), Prague.
Shalom Ullmann (d. 1825), דברי ו"ש (on most of the treatises), Vienna, 1826.

W. B. M. Ri.

Classes of Rules.

TALMUD HERMENEUTICS: The science which defines the rules and methods for the investigation and exact determination of the meaning of the Scriptures, both legal and historical. Since the Halakah, however, is regarded simply as an exposition and explanation of the Torah, Talmud hermeneutics includes also the rules by which the requirements of the oral law are derived from and established by the written law. These rules relate to: (*a*) grammar and exegesis; (*b*) the interpretation of certain words and letters and superfluous words, prefixes, and suffixes in general; (*c*) the interpretation of those letters which, in certain words, are provided with points; (*d*) the interpretation of the letters in a word according to their numerical value (see Gematria); (*e*) the interpretation of a word by dividing it into two or more words (see Notariḳon); (*f*) the interpretation of a word according to its consonantal form or according to its vocalization; (*g*) the interpretation of a word by transposing its letters or by changing its vowels; and (*h*) the logical deduction of a halakah from a Scriptural text or from another law.

Compilations of such hermeneutic rules were made in the earliest times. The tannaitic tradition recognizes three such collections, namely: (1) the seven Rules of Hillel (baraita at the beginning of Sifra; Ab. R. N. xxxvii.); (2) the thirteen Rules of R. Ishmael (baraita at the beginning of Sifra; this collection is merely an amplification of that of Hillel); and (3) the thirty-two Rules of R. Eliezer b. Jose ha-Gelili. The last-mentioned rules are contained in an independent baraita which has been incorporated and preserved only in later works. They are intended for haggadic interpretation; but many of them are valid for the Halakah as well, coinciding with the rules of Hillel and Ishmael.

It must be borne in mind, however, that neither Hillel, Ishmael, nor Eliezer ben Jose ha-Gelili sought to give a complete enumeration of the rules of interpretation current in his day, but that they omitted from their collections many rules which were then followed. For some reason or other they restricted themselves to a compilation of the principal methods of logical deduction, which they called "middot" (measures), although the other rules also were known by that term (comp. Sifre, Num. 2 [ed. Friedmann, p. 2a]).

Dates of the Rules.

All the hermeneutic rules scattered through the Talmudim and Midrashim have been collected by Malbim in "Ayyelet ha-Shaḥar," the introduction to his commentary on the Sifra, and have been arbitrarily reckoned at 613, to correspond with the 613 commandments. The antiquity of the rules can be determined only by the dates of the authorities who quote them; in general, they can not safely be declared older than the tanna to whom they are first ascribed. It is certain, however, that the seven middot of Hillel and the thirteen of Ishmael are earlier than the time of Hillel himself, who was the first to transmit them. At all events, he did not invent them, but merely collected them as current in his day, though he possibly amplified them.

The Talmud itself gives no information concerning the origin of the middot, although the Geonim regarded them as Sinaitic (הלכה למשה מסיני; comp. R. Samson of Chinon in his "Sefer ha-Keritot"). This can be correct only if the expression הלכה למשה מסיני means nothing more than "very old," as is the case in many Talmudic passages. It is decidedly erroneous, however, to take this expression literally and to consider the middot as traditional from the time of Moses on Sinai.

The middot seem to have been first laid down as abstract rules by the teachers of Hillel, though they were not immediately recognized by all as valid and binding. Different schools interpreted and modified them, restricted or expanded them, in various ways. Akiba and Ishmael and their scholars especially contributed to the development or establishment of these rules. Akiba devoted his attention particularly to the grammatical and exegetical rules, while Ishmael developed the logical. The rules laid down by one school were frequently rejected by another because the principles which guided them in their respective formulations were essentially different. According to Akiba, the divine language of the Torah is distinguished from the speech of men by the fact that in the former no word or sound is superfluous. He established two principles broadening the scope of the rule of his teacher Nahum of Gimzo, who had declared that certain particles, like את, גם, and או, were inclusive and certain others, such as אך, רק, and מן, were exclusive. These two principles are: (1) אין רבוי אחר רבוי אלא למעט (= "one inclusion added to another is equivalent to an exclusion"; Sifra, Ẓaw, Pereḳ, 11 [ed. Weiss, p. 34d]); and (2) לשונות רבויין הן (= "words are amplifications"; Yer. Shab. xix. 17a). Hence he interprets the following forms of expression as amplifications: an infinitive before a finite verb, *e.g.*, הכרת תכרת (Sanh. 64b); the doubling of a word, *e.g.*, איש איש (Yeb. 71a); and the repetition of a term by a synonym, *e.g.*, ודבר ואמר (Yer. Soṭah viii. 22b).

Ishmael, on the contrary, lays down the principle, דברה תורה כלשון בני אדם (= "the Torah speaks in the language of men"; Sifre, Num. 112). The Bible may, therefore, have employed superfluous words and sounds; and forced values should not be assigned to them for the purpose of deducing new rules therefrom. The same statement holds with regard to the repetition of an entire section. Ishmael is of the opinion that "the Torah at times repeats a whole section of the Law in order to give a new application to it" (כל פרשה שנאמרה במקום אחד וחזרו שנאה במקום אחר לא שנאה אלא בשביל דבר שנתחדש בה; Sifre, Num. 2, according to the reading of Elijah Wilna). It is not necessary, therefore, to draw a new inference from every repetition. Thus, for instance, in Num. v. 5-8 the Torah repeats the section on אשם גזלות in Lev. v. 20-26 (vi. 1-7, A. V.) for the purpose of teaching the new ruling that in certain cases recompense for sin shall be made directly to the priests. Akiba asserts, on the other hand (in Sifre, *l.c.*, according to the reading of Elijah Wilna), that "Everything that is said in a section so repeated must be interpreted" (= כל מה שנאמר בה צריך להדרש), and that new deductions may be drawn from it. According to this view, in Num. v. 5-8, for example, a new meaning must be sought in the repetition of the Law.

Akiba's Rules.

According to Akiba, the traditional vocalization in the Bible of a word which may be read in various ways is well founded (יש אם למקרא); and he deduces many rules from the meanings which such words have according to traditional pointing. This rule had been formulated before Akiba by a tanna named R. Judah ben Ro'eẓ, who is not mentioned elsewhere, and of whom, consequently, nothing more is known (comp. Sanh. 4a).

Ishmael, in opposition to Akiba, follows the principle יש אם למסורת, *i.e.*, that the tradition regarding only the consonantal text is authoritative, and that rules may be deduced only from that text. A single example will serve to illustrate the difference between the methods of the two schools. In Lev. xxi. 11, in the law which forbids a priest to defile himself by touching a corpse, the word נפשת is written defectively. Since the traditional reading indicates the plural, "nafshot," Akiba draws the conclusion that a quarter-log of blood, the minimum quantity by which a priest may be rendered unclean through contact with a single corpse, also defiles him when it issues from two bodies. According to Ishmael, however, this minimum quantity defiles a priest only when it issues from a single corpse; for the word, according to the consonantal text, is to be read in the singular "nafshat" (comp. Sanh. 4a, b, Ḥul. 72a, and Tosafot to both passages).

According to Akiba, laws may be deduced from the juxtaposition of two legal sections, since "every passage which stands close to another must be explained and interpreted with reference to its neighbor" (כל פרשה שהיא סמוכה לחבירתה למדה הימנה; Sifre, Num. 131). According to Ishmael, on the contrary, nothing may be inferred from the position of the individual sections, since it is not at all certain that every single portion now stands in its proper place. Many a paragraph which forms, strictly speaking, the beginning of a book and should stand in that position, has been transposed to the middle.

Ishmael explains the occurrence of a section in a place where it does not properly belong (ולמה נכתב כאן) by declaring that "there is no first or last in the Scriptures" (אלא מפני שאין מקדם ומאחר בתורה), not as due to any special reason (Mek., ed. Weiss, p. 48a; Eccl. R. i.; comp. Pes. 6b, where R. Pappa defines this principle in such a manner that it does not contradict Ishmael's rules concerning "Kelal u-feraṭ"). Eliezer b. Jose ha-Gelili expanded this rule in his baraita and divided it into two parts (Nos. 31 and 32). The opposition between the schools of Ishmael and Akiba lessened gradually, and finally vanished altogether, so that the later tannaim apply the axioms of both indiscriminately, although the hermeneutics of Akiba predominated. In this way all the principles cited above obtained general recognition.

A more detailed discussion of the seven rules of Hillel and of the thirteen of Ishmael may now be given, together with certain other important canons of Talmud hermeneutics.

1. Ḳal (ḳol) wa-ḥomer: The first rule of Hillel and of Ishmael, called also "din" (conclusion). This is the argument "a minori ad majus" or "a majori ad minus." In the Baraita of Eliezer b. Jose ha-Gelili this rule is divided into two (Nos. 5 and 6), since a distinction is made between a course of reasoning carried to its logical conclusion in the Holy Scriptures themselves ("ḳal wa-ḥomer meforash") and one merely suggested there ("ḳal wa-ḥomer satum"). The completed argument is illustrated in ten examples given in Gen. R. xcii. The full name of this rule should be "ḳal wa-ḥomer, ḥomer we-ḳal" (simple and complex, complex and simple), since by it deductions are made from the simple to the complex or vice versa, according to the nature of the conclusion required. The major premise on which the argument is based is called "nadon," or, at a later period, "melammed" (that which teaches); the conclusion resulting from the argument is termed בא מן הדין, or, later, "lamed" (that which learns). The process of deduction in the ḳal wa-ḥomer is limited by the rule that the conclusion may contain nothing more than is found in the premise. This is the so-called "dayyo" law, which many teachers, however, ignored. It is formulated thus: דיו לבא מן הדין להיות כנדון ("The conclusion of an argument is satisfied when it is like the major premise"). The discovery of a fallacy in the process of deduction is called "teshubah" (objection), or, in the terminology of the Amoraim, "pirka." The possibility of such an objection is never wholly excluded, hence the deduction of the ḳal wa-ḥomer has no absolute certainty. The consequences of this are: (*a*) that the conclusions have, according to many teachers, no real value in criminal procedure, a view expressed in the axiom that the conclusion is insufficient to punish the violator of an inferred prohibition (אין עונשין מן הדין; Sifre, Num. 1); (*b*) that very often a passage is interpreted to mean something which may be inferred by means of a ḳal wa-ḥomer (מילתא דאתיא בק"ו טרח וכתב לה קרא; Pes. 18b; Yoma 43a).

2. Gezerah shawah ("Similar laws, similar verdicts"): The second rule of Hillel and of Ishmael, and the seventh of Eliezer b. Jose ha-Gelili. This may be described as argument by analogy, which infers from the similarity of two cases that the legal decision given for the one holds good for the other also. The term "gezerah shawah" originally included arguments based on analogies either in word or in fact. Before long, however, the latter class was designated as "heḳḳesh," while the phrase "gezerah shawah" was limited to analogy in the case of two different Biblical laws containing a word common to both. The gezerah shawah was originally restricted to a *δὶς λεγόμενον*, *i.e.*, a word occurring only in the two passages offering the analogy. Since such a word is found nowhere else, there is no reason to assume that it bears different meanings in the two passages. The gezerah shawah consequently attaches to the word in the one passage the entire sequence of ideas which it bears in the other. Such a gezerah shawah is purely lexicographical, as seeking to determine the exact signification of a word by comparison with another passage in which the full meaning of such word is clear. The rule thus demonstrates itself. An example will illustrate this more clearly. The phrase מלק את ראשו ("to wring off the head") occurs only twice in the Pentateuch, namely, in Lev. i. 15 and *ib.* v. 8. In the latter passage, however, the meaning of the phrase is more closely defined by ממול ערפו ("from the neck"). The Sifra (ed. Weiss, p. 9a) concludes, therefore, that the nearer definition, "from the neck," in the second passage, is part of the concept of the word מלק, and, consequently, that in the former passage, also, מלק means "to wring the head from the neck." At a later period, however, the gezerah shawah emerged from these narrow bounds and inferred the identity of legal requirements from the identity of their terminology, even when such terminology occurred in many passages besides the two which formed the analogy. Thereby the gezerah shawah lost its inherent power of demonstration; for it is wholly unreasonable to attribute to a word a meaning which happens to be associated with it in a single passage, when various other passages connect ideas entirely different with the same word. Since, moreover, each individual teacher might choose which two expressions he would select for a gezerah shawah, contradictory conclusions might be drawn, which would each have the same claim to validity, since both were obtained by a gezerah shawah. Consequently, in order to be binding, a gezerah shawah was obliged to conform to two requirements which, on the one hand, greatly restricted its application, and, on the other, gave legal decisions thus obtained the value of those deduced from a superfluous word in the Holy Scriptures. These conditions are: (*a*) אין אדם דן גזירה שוה מעצמו ("No one may draw a conclusion from analogy upon his own authority"; Pes. 66a; Niddah 19b). This rule, however, is not to be regarded as implying that every gezerah shawah must have been handed down from Sinai, as Rashi (on the various passages) and many expositors who followed him explained it, but that the use of this method of hermeneutics is to be permitted only to an entire board or council, and is to be employed only when its results agree with the traditional halakah, which thereby acquires the importance of a law implied in the Scriptures. In Yerushalmi this rule reads: אדם דן גזירה שוה לקיים תלמודו ואין אדם דן ג"ש לבטל תלמודו ("From a gezerah shawah conclusions may be deduced which support tradition, but not such as are opposed to tradition"; comp. Maimonides in the introduction to his "Mishneh Torah"). (*b*) The words of the text which form the basis of the deduction from analogy must be free, *i.e.*, they must be superfluous and non-essential, or they may not be used (מופנה להקיש ולדין הימנו גזירה שוה). This limitation of the gezerah shawah, however, to superfluous words is not generally recognized. Akiba considers the gezerah shawah valid when neither of the two words is superfluous (אינו מופנה כלל). According to Ishmael, it is sufficient if the analogy is free on one side (מופנה מצד אחד), *i.e.*, if one of the two words forming the basis of the analogy is pleonastic. Eliezer alone requires both words to be superfluous (מופנה משני צדדים; comp. Hoffmann, "Zur Einleitung in die Halachischen Midraschim," p. 6).

3. Binyan ab mi-katub eḥad ("A standard from a passage of Scripture"): A certain passage serves as a basis for the interpretation of many others, so that the decision given in the case of one is valid for all the rest.

4. Binyan ab mi-shene ketubim ("A standard from two passages of Scripture"): By this rule a decision in two laws having a characteristic in common (הצד השוה) is applied to many other laws which have this same characteristic. Ishmael unites rules 2 and 4 in his third rule, while the same combination forms the eighth rule of Eliezer b. Jose ha-Gelili.

5. Kelal u-ferat and **ferat u-kelal** ("General and particular, particular and general," *i.e.*, limitation of the general by the particular and vice versa): According to Ishmael, this principle has eight special applications, and thus includes eight separate rules in his scheme (Nos. 4–11). This method of limitation is one of the main points of difference between Ishmael and Akiba. According to the former, who follows his teacher R. Neḥunya b. ha-Ḳanah, the particular is only an elucidation of the preceding general expression, so that the latter includes only what is contained in the particular (כלל ופרט אין בכלל אלא מה שבפרט). But if still another general follows the particular, the two general expressions are defined by the intermediate particular, so that the law applies only to what is like the particular (כלל ופרט וכלל אי אתה מרבה אלא כעין הפרט). Akiba, on the contrary, applies the rule of increase and decrease (רבוי ומיעוט) which had been taught him by his teacher Nahum of Gimzo. According to this principle, the general followed by a particular subsumes everything which is like the particular (Sanh. 45b, 46a). If, however, another general term follows the particular, the former subsumes also what is not similar to the latter. The two general terms are decreased in only one respect by the intermediate particular (רבוי ומיעוט ורבוי ריבה הכל ומאי מיעט דבר אחד; Shebu. 26a; comp. also Rashi on Sanh. *l.c.*).

6. Ka-yoẓe bo mi-maḳom aḥer ("Like that in another place"): The explanation of a Biblical passage according to another of similar content.

7. Dabar ha-lamed me-'inyano ("Something proved by the context"): Definition from the context. Ishmael omits rule 6 entirely, and has another (No. 13) instead which is not found in Hillel, and which reads thus: שני כתובים המכחישים זה את זה עד שיבא הכתוב השלישי ויכריע ביניהם ("If two passages contradict each other, this contradiction must be reconciled by comparison with a third passage"). The method of solution of such opposing statements by the help of a third passage is a point of divergency between Ishmael and Akiba. According to the latter, the third sentence decides in favor of one of the two contradictory statements (Mek., ed. Weiss, 6a); according to the former, it modifies the interpretation of both. With regard to the meaning of words which are pointed in the text, Simeon b. Eleazar laid down the rule that if the pointed part of the word (נקודה) is equal to the unpointed part (כתב) in length, the word must not be interpreted at all; but if one part is longer than the other, such part must be interpreted (Gen. R. lxxviii.). Concerning the interpretation of words by a change of letters or vowels the rule is: אל תקרא ("Do not read so, but so"). Under this rule the integrity of the text itself is not assailed, the changes made being only for the purpose of explanation.

To support a halakic decision, and more especially to find a point of departure in the Haggadah, the traditional reading of a word is altered by transposition of its consonants or by substitution of others which are related to them, or the consonant-group is retained with alteration of its vowels, the last method being the most frequent. A halakic example of this form of hermeneutics is the interpretation of the word "kapot" (bough; Lev. xxiii. 40) as though it were "kaput" (bound; Sifra, ed. Weiss, p. 102d; Suk. 32a). It is noteworthy, moreover, that only the Tannaim derived new halakot with the aid of these rules, while the Amoraim employed them only in advancing haggadic explanations or in establishing the old halakot of the Tannaim.

W. B. J. Z. L.

TALMUDIC LAW: The development of thousands of years is represented by the Jewish law as it is found in the Shulḥan 'Aruk, Ḥoshen Mishpaṭ, of Joseph Caro (16th cent.), as well as in numerous other works which elaborate or elucidate individual passages in various ways. The history of the Hebrew code falls into three chief epochs: (1) the Pentateuch, (2) the Talmud, and (3) post-Talmudic literature. The Pentateuch forms the basis of the Talmud, while the latter serves in its turn as a foundation for post-Talmudic law, which has tenaciously maintained its validity in less cultured countries to the present day. Although these three periods are closely related in so far as the later epochs were developed from the earlier, they must be regarded as mutually independent, since they represent different phases of evolution. As controverting the theory which formerly prevailed, especial stress must be laid upon the fact that in the course of time the changes both in material and in spiritual life profoundly modified Jewish law, the stages of whose evolution are linked together only by the legal fictions common to all history of law. It may accordingly be said that there were three judiciary systems: the Mosaic, the Talmudic, and the rabbinic. The Talmudic code is generally termed the "Mosaic-Talmudic," since the authorities of the Talmud took the Mosaic law as their basis. From the point of view of judicial history, however, the Talmud must be regarded as an independent structure; and it is therefore more correct to use the simple term "Talmudic law." The present article excludes all reference to rabbinic law, and discusses only those aspects of the Mosaic system which facilitate an intelligent comprehension of the Talmudic code.

Three Historical Periods of Jewish Law.

Religious and Secular Law.

The Torah, revealed by God, was the basis of the code; and God Himself was consequently the Supreme Source of law. The Talmud, like the Torah, drew no distinction between religious and secular law, thus conforming to the general custom of ancient peoples, especially in the East. One result of this peculiarity was the wide range and close articulation of the Talmudic system, since the commandments of religion influenced secular law, and modified civil relations in so far as any infraction of them was punishable. It is impossible, therefore, to differentiate sharply between religious and secular law. Everything pertaining to the former is discussed more properly under Halakah, and is, therefore, omitted here so as to render possible a brief outline of secular jurisprudence and a citation of parallels with other systems. While the application of modern legal categories to Talmudic law is foreign to its nature, it can not be avoided; a careful check, however, must be kept upon this method. In like manner a careful distinction must be drawn between the civil and the penal codes of Talmudic law. While the civil code was actually enforced, the penal code was a dead letter; for the Romans, about 30 c.e., had withdrawn all criminal jurisdiction from the Jews (Sanh. 41a; Yer. Sanh. i. 1, vii. 2; Mommsen, "Römische Geschichte," v. 512). After the destruction of the Temple, in the year 70, jurisdiction in civil cases as well seems to have been given to the Roman courts (Mommsen, *l.c.* p. 548; Frankel, "Der Gerichtliche Beweis nach Mosaisch-Talmudischem Rechte," pp. 45, 142; *idem*, "Zeitschrift für die Religiösen Interessen," i. 153, 189), although this can have been only a temporary measure, and, in view of the power possessed by the parties involved to refuse to submit to such a court, can never have been rigidly enforced. Civil jurisdiction may be regarded, therefore, as a right which really existed, while criminal law was, for the most part, merely theoretical from the very beginning. Survivals from the period of independence, Pentateuchal laws, and the penal codes of foreign rulers are the component elements of the criminal law of the Talmud. Very frequent, moreover, are the instances in which exegeses of Biblical passages served as sources, often elucidating laws which were never actually enforced. The origin of the Talmudic penal code explains the majority of its peculiarities as well as its weaknesses and its merits. The merits consist chiefly in leniency. Thus, for example, while the code recognized capital punishment and the frequency of its infliction as ordered by the Pentateuch, it rendered the death-sentence practically impossible, since this penalty was so conditioned by requirements of proof of malice aforethought that finally guilt could no longer be proved. Capital punishment, even for murder, was so abhorrent to the authorities of tradition that its infliction was to be prevented by all legal means (Mak. i. 10 *et passim*). In view of these circumstances and principles, the penal law in general and its theoretical development in particular aimed at strengthening moral consciousness and at rousing a sense of guilt. In like manner, the punishments inflicted were mild. Thus, a thief was obliged to return twice the value of the stolen goods, while early Roman law visited a thief caught in the act with a terrible penalty, which was extended under the empire to other forms of theft as well. The Germans frequently punished theft with death or at least with amputation of a hand or a foot.

Civil and Penal Codes.

The impetus to the development of the Talmudic code was given by the study of the divine law, the precepts of which had to be expounded and elucidated even to the least dot on the smallest letter. No other people ever honored its national literature so highly or guarded it so carefully as the Jews did the teachings of Moses. Numerous scholars of the Law consequently arose, who may be regarded as jurists both individually and collectively. Every place of any size had its bet ha-midrash, where men of all vocations gathered daily for discussions. The result of five centuries of this activity was the Talmudic code. The civil law was intelligible even to laymen, and it was, moreover, interpreted by scholars; consequently its development was essentially practical, not merely theoretical as was that of the criminal code. These scholars, all working without compensation, evolved a legal system which in scope and excellence stands far above the period of civilization for which and in which it was created. The wealth of Talmudic law and its comparative freedom from defects are best seen when it is compared with a compendium of modern law, such as Josef Kohler's "Einführung in die Rechtswissenschaft" (2d ed., Berlin, 1905).

Absence of Commercial Law.

The history of the Jews explains the fulness of development in the code of civil law, its deficiencies as regards public law, and the entire absence therefrom of international law. In civil law the most noteworthy features are the provisions relating to persons, property, claims, family estates, and inheritance. A distinct branch of commercial law, such as has been highly developed among modern nations, does not exist in the Talmudic code, although regulations concerning commerce are not lacking; for in Talmudic times the Jews were not as distinctly a commercial nation as they became in the post-Talmudic and medieval periods. Indeed, the highly developed system of damages, as, for instance, in the case of injuries by animals (Kohler, *l.c.* p. 96), characterizes them as an agricultural people. The following is a list of the various legal articles in The Jewish Encyclopedia:

Abetment

While the foregoing list will give an idea of the extent of the Talmudic code, an estimate of its value compared with other systems may be gained by a perusal of the following list of rubrics which do not occur in the Talmud. The pages cited in parentheses are those of Kohler's above-mentioned work:

Associations (p. 81; societies only)
Bankruptcy (p. 145)
Bills of Exchange and Kindred Matters (p. 88; promissory notes only)
Commercial Firms (p. 79)
Counterfeiting (p. 155)
Defamation of Character, Slander, Calumny, etc. (p. 174; no specific penalty was fixed for these crimes; they were branded as most immoral; and the severest divine punishment was invoked upon the offender)
Embezzlement (included under theft, and does not constitute a specific crime; p. 175)
Insurance (pp. 66 *et seq.*)
Joint-Stock Companies (p. 68)
Lawful Duels (as ordeals, which ceased in Italy in the thirteenth century; p. 170)
Lex Talionis (p. 161)
Limited Liability Companies and Financial Trusts (p. 82)
Maritime Law (p. 87; river law, however, existed)
Ordeals (p. 133)
Pardon (p. 166)
Secrets of Manufacture and Commerce (p. 172)

High Development of Talmudic Law.

The penal code made no provision for a public prosecutor or for torture, although the latter was employed in Europe until the last quarter of the eighteenth century. A few examples will serve to show the lofty standard of the civil and marriage codes of the Talmud. According to Talmudic law, the agent was equal in all respects to the party he represented; and the Jews even allowed betrothal, itself a contract, to take place by proxy (*ib.* p. 32). On this subject Kohler says (*l.c.* p. 27): "Representation is an institution of elaborate development, introduced at a comparatively recent period by legal regulation. It is a creation of the highest type, rendering it possible for one to own a fortune of millions without having to administer it in person." Among other ancient peoples the debtor was held responsible for his debt with liberty, life, and limb, the law relating to debt being based on the value of the debtor; Talmudic law, however, agrees with modern codes, which permit the debtor neither to be sold as a slave nor to be deprived of his liberty in any other way. The payment of a debt was a moral, not a legal, obligation (B. B. 174a and parallel passages; comp. Kohler, *l.c.* p. 58).

The Jewish laws relating to family life did not recognize the unlimited authority of the head of the household as did Roman law, but, on the contrary, a son who had attained his majority (13 years) might hold property in his own name. In the Christian world this was not the case until after the reign of Justinian (*ib.* p. 93). The law of inheritance, as in modern codes, recognized the system based on kinship. Jewish law restricted the prohibitions against consanguineous marriages, and permitted divorce. With regard to these cardinal points of marriage legislation, modern codes, in opposition to canon law, adopt the same point of view as Judaism, probably because derived from the Roman law. There are numerous legal questions and even judicial principles in which modern views coincide with those of the Talmud, and to which a general allusion may be made.

Assyro-Babylonian Influence.

The Talmud has been completed for 1,400 years; and the greater part of the legal material which it contains is more than 2,000 years old. It is therefore self-evident that foreign elements from the great civilized nations of the ancient world must have exercised an influence on it. Following the chronological order, mention should first be made of the Assyro-Babylonian elements. With regard to the relation of the Mosaic law to the code of Hammurabi, see Hammurabi and the literature there cited, as well as numerous later works. There can be no doubt that the Assyro-Babylonian laws outlived the state by centuries, while their influence was felt even in the Christian period, and may still be traced in Talmudic law. The most common terms for written contracts, "sheṭar" and "geṭ," are Babylonian; and clay tablets were still used in Talmudic times for promissory notes (Blau, "Althebräisches Buchwesen," p. 18). A receipt was called "ẓober," *i.e.*, "ẓebiru" in Assyrian contracts. Giṭ. 86a gives the text of a contract regarding the sale of slaves, the first part of which is apparently Assyrian in origin. Even in post-Talmudical literature, as in the "Sefer ha-Sheṭarot" of Judah b. Barzillai (ed. Halberstam, Berlin, 1898), there are distinct reminiscences of Babylonian formulas. The contracts included in this work number more than seventy, and in them the phrase "the contracting party has made all stipulations 'in accordance with his pleasure'" recurs in all varieties of terminology (*e.g.*, pp. 9 *et seq.*). The same formula appears in Babylonian contracts, this example, like others, being furnished by Pick ("Assyrisches und Talmudisches Kulturgeschichte und Lexicalische Notizen," pp. 22, 30).

Influence of Roman Law.

Incomparably greater was the influence exerted by Greco-Roman jurisprudence in later days. The lingua Franca of the East, even during the period of Roman sovereignty, was the κοινή; so that about seventy of the seventy-seven foreign legal terms that are found in the Talmud (Löw, in Krauss, "Lehnwörter," ii. 630), are Greek, only the remaining few being Latin. As a rule the Jews learned Roman law from the actual practise of the courts and not from legal writings only. Greek terms are used for document, will, protocol, guardian, contract, hypothec, purchase, accusation, accuser, attorney, and the like; and Latin words for legacy, bill of indictment, divorce, etc. Roman law, with its high development, exercised a much greater influence on the Talmudic system than has hitherto been shown, thorough investigations having as yet been made only sporadically. Frankel ("Gerichtlicher Beweis," pp. 58 *et seq.*) thinks that the majority of the legal cases in Talmudic law have parallels in the Roman code. "The same subjects are often treated in both, and form a basis for the application of the legal principles. This resemblance was due to the conditions and requirements of the time; and for the same reason many legal provisions are common to both codes." The difference between the two lies, in his view, "in the divergent mental processes of Orientals and Occidentals, so that Talmudic law formulated anew the very parts it borrowed from the Roman code. The Oriental in his method of investigation is characterized by acuteness and facility of comprehension; so that he is guided in his legal enactments by the vivacity of his mind rather than by a principle. . . . The Occidental is marked by thoughtfulness: he desires a universal concept, not a schematized nexus or a reduction to some principle. He therefore combines the law into a harmonious whole, while the code of the Oriental consists of disconnected parts."

Although this characterization is in the main correct, it must be borne in mind that Frankel underestimates the influence of the Roman code on the Talmud. Several Talmudists of the early part of the second century were so deeply versed in the Roman civil law that they decided cases according to it if they were so requested. Constantin l'Empereur of Oppyck, in his "De Legibus Ebræorum Forensibus" (1637; reprinted by Surenhuis in his "Mischna," iv.), was the first to compare the Roman and Talmudic systems, although he did not postulate any adaptation from the one code by the other.

Subsequently Zunz ("Etwas über die Rabbinische Litteratur," 1818), Jost ("Gesch." iv. 144, and appendix), Frankel (*l.c.*), Krochmal ("Moreh Nebuke ha-Zeman," 1845), and others (comp. Blau, "Concursus Vitiorum" [in Hungarian], pp. 8, 11, 13) made similar comparisons.

Influence of Persian Law.

The Jews lived for a time both under the ancient Persian régime of the Achæmenidæ (550–330 B.C.) and under the neo-Persian dynasty of the Sassanids (250–500 C.E.). Persian law has, therefore, also been a factor, although the present knowledge both of the Achæmenian and the Sassanid codes is insufficient for an estimate of the extent of their influence on the Jews. The Talmud, on the other hand, characterizes the legal system of the Sassanids as a superficial one, and quotes some extracts in support of its assertions, *e.g.*, the creditor may seize the security (B. B. 173, borrowed from Turkish law). See further Frankel, *l.c.* p. 56, where the theory is advanced that Sassanid law influenced the code of the Babylonian Talmud.

Compilations of Talmudic Law.

Among the compilations of Talmudic law, the "Mishneh Torah," or religious code, of Maimonides took a foremost place. Superior in system and arrangement to its predecessors and successors alike, even though its author did not codify the law of the Talmud in the strict sense of the term, but only the rabbinico-legal system as formulated at the time, it served as an authority for subsequent centuries. The Christian literature on the subject in the sixteenth and seventeenth centuries, and, to a great extent, even the modern literature of the nineteenth century, are dependent upon this work, even in cases where the treatises are termed "Mosaic-Talmudic." The authors who combined Talmudic and legal knowledge were, generally speaking, rare; for the majority were either Talmudists or jurists, but not both.

In recent times Rapoport has begun a systematic compilation of Talmudic law (the laws of inheritance, endowments, obligations, etc.); and his work has been favorably received by the eminent historian of jurisprudence, Josef Kohler of Berlin. Rapoport, however, has not drawn a sharp distinction between the three chief epochs, the Mosaic, the Talmudic, and the rabbinic, nor has he paid sufficient heed to the historical criticism contained in traditional literature. Much work still remains to be done in this field.

W. B. L. B.

TALMUD TORAH:

TALMUD TORAH: Public free school for poor and orphaned boys, who are there given an elementary education in Hebrew, the Scriptures (especially the Pentateuch), and the Talmud (Halakah), and are thus prepared for the YESHIBAH. The Talmud Torah school is known simply as the Talmud Torah, and has the essential elements of the HEDER, the latter being a private self-supporting school.

In the remotest time of Jewish history the father was the sole teacher of his children (Deut. xi. 19). The institution known as the "be rab" or "bet rabban" (house of the teacher), or as the "be safra" or "bet sefer" (house of the book), is supposed to have been originated by Ezra and his Great Assembly, who provided a public school in Jerusalem to secure the education of fatherless boys of the age of sixteen years and upward. But the school system did not develop till JOSHUA BEN GAMLA the high priest caused public schools to be opened in every town and hamlet for all children above six or seven years of age (B. B. 21a). Strict discipline was observed. Rab, however, ordered Samuel b. Shilat to deal tenderly with the pupils, to refrain from corporal punishment, or at most to use a shoestrap in correcting pupils for inattention. A stupid pupil was made monitor until able to grasp the art

Origin of Schools.

of learning. Raba fixed the number of pupils at twenty-five for one teacher; if the number was between twenty-five and forty an assistant teacher ("resh dukana") was necessary; and for over forty, two teachers were required. The expense was borne by the community. There is a difference of opinion regarding the qualification of the "melammed" (teacher). Raba preferred one who taught his pupils much, even though somewhat carelessly, while R. Dimi of Nehardea preferred one who taught his pupils little, but that correctly, as an error in reading once adopted is hard to correct (*ib.*). It is, of course, assumed that both qualifications were rarely to be found in one person. Only married men were engaged as teachers.

Girls Excluded.

Girls were invariably excluded from the Talmud Torah, first because teaching them is not obligatory, and second because they are "light-minded." R. Eliezer said: "Whosoever teaches his daughter the Torah is as one who teaches her frivolity" (Soṭah 21b). Maimonides, however, held that the prohibition refers to the Talmud, and not to the Bible ("Yad," Talmud Torah, i. 13). Girls were mostly taught privately, and received a fair education. The teaching in the Talmud Torah consumed the whole day, and in the winter months a few hours of the night besides. Teaching was suspended in the afternoon of Friday, and in the afternoon of the day preceding a holy day. On Sabbaths and holy days no new lessons were assigned; but the work of the previous week was reviewed on Sabbath afternoons by the child's parent or guardian (Shulḥan 'Aruk, Yoreh De'ah, 245).

The Talmud Torah did little for the religious teaching and training of the pupils; this was left to parents or guardians. The main object of the early schools was to instruct the pupil in the laws of Moses and in the knowledge of the rabbinical writings, more from a literary than from a practical standpoint. In later times, influenced in a measure by the Christian parochial schools of the thirteenth century, the reading of the prayers and benedictions and the teaching of the principles of the Jewish faith were included. In almost every community an organization called "Ḥebra Talmud Torah" was formed, whose duty was to create a fund and provide means for the support of public schools, and to control all teachers and pupils.

R. Asher b. Jehiel (1250-1328) decided to allow withdrawals from the funds of the Talmud Torah for the purpose of meeting the annual tax collected by the local governor, since otherwise great hardships would fall upon the poor, who were liable to be stripped of all their belongings if they failed in the prompt payment of their taxes (Responsa, rule vi., § 2). On the other hand, money from the general charity fund was at times employed to support the Talmud Torah, and donations for a synagogue or cemetery were similarly used (*ib.* rule xiii., §§ 5, 14).

In the Responsa.

Samuel di Medina (1505-89) ruled that in case of a legacy left by will to a Talmud Torah and guaranteed by the testator's brother, the latter was not held liable if the property had been consumed owing to the prolonged illness of the deceased (Responsa, Ḥoshen Mishpaṭ, No. 357). A legacy for the support of a yeshibah and Talmud Torah in a certain town, if accompanied by a provision that it may be managed "as the son of the testator may see fit," may be transferred, it was declared, to a yeshibah elsewhere (*ib.* Oraḥ Ḥayyim, i., No. 60; see also "Paḥad Yiẓḥaḳ," *s.v.* הקדש, p. 43a).

Solomon b. Abraham ha-Kohen (16th cent.) decided that it requires the unanimous consent of the eight trustees of a Talmud Torah to engage teachers where a resolution has been passed that "no trustee or trustees shall engage the service of a melammed without the consent of the whole" (Responsa, ii., No. 89, ed. Venice, 1592).

The Pinkes Record.

As a specimen of the medieval organization of these schools that of the Cracow schools may be selected. From the congregational record (pinḳes) of Cracow in 1551 it appears that the Talmud Torah society controlled both private and public schools. It passed the following taḳḳanot: (1) The members shall have general supervision over the teachers and shall visit the Talmud Torah every week to see that the pupils are properly taught. (2) No melammed may teach the Pentateuch except with the translation "Be'er Mosheh" (Judæo-German transl. by Moses b. Issachar, Prague, 1605), "which is in our vernacular"; for the advanced pupils he shall use no other than the Rashi commentary. (3) A melammed in the primary class shall teach not more than twenty-five pupils and shall have two assistants. (4) One melammed shall not compete with another during the term of his engagement, and shall not seek to obtain a pupil in charge of another teacher, even at the expiration of the term, unless the father or the guardian of the pupil desires to make a change. (5) The members of the Ḥebra Talmud Torah shall hire a competent and God-fearing melammed, with an assistant, for poor and orphaned boys at the bet ha-midrash. (6) The melammed and assistant shall teach pupils the alphabet (with the vowels), the Siddur, the Pentateuch (with the "Be'er Mosheh" translation), the Rashi commentary, the order of the prayers, etiquette, and good behavior—every boy according to his grade and intelligence; also reading and writing in the vernacular. The more advanced shall be taught Hebrew grammar and arithmetic; those of the highest grade shall study Talmud with Rashi and Tosafot. (7) Boys near the age of thirteen shall learn the regulations regarding tefillin. (8) At the age of fourteen a boy who is incapable of learning Talmud shall be taught a trade or become a servant in a household.

Sources of Income.

The income of the society was derived from several sources: (*a*) one-sixth of the Monday and Thursday contributions in the synagogues and other places of worship; (*b*) donations at circumcisions from guests invited to the feast; (*c*) donations at weddings from the groom and the bride and from invited guests; (*d*) one-tenth of the collections in the charity-box known as the "mattan ba-setar." The election of officers was made by ballot—three gabba'im, three vice-gabba'im, and a treasurer. Only learned and honorable men over thirty-six years of age were eligible for election. The taḳḳanot regulating these sources of the Talmud Torah's income were in existence in the time of R. Moses Isserles. R. Joel Sirkes, rabbi of Cracow in 1638, indorsed these regulations and added many others, all of which were confirmed at a general assembly of seventy representatives of the congregations on the 25th of Ṭebet, 5398 (1638; F. H. Wetstein, "Ḳadmoniyyot," document No. 1, Cracow, 1892).

The Talmud Torah organization in Rome included eight societies in 1554, and was reconstituted Aug. 13, 1617 (Rieger, "Gesch. der Juden in Rom," p. 316, Berlin, 1895). Later, certain synagogues assumed the name "Talmud Torah," as in the case of one at Fez in 1603 (Ankava, "Kerem Ḥemed," ii. 78, Leghorn, 1869) and one at Cairo. This was probably because the school was held in or adjoined the synagogue.

Curriculum.

The Sephardim conducted their schools more methodically. The one in Amsterdam was highly praised by R. Sheftel b. Isaiah Horowitz ("Wawe ha-'Ammudim," p. 9b, appended to "Shelah," Amsterdam, 1698). Shabbethai Bass, in the introduction to his "Sifte Yeshanim" (p. 8a, *ib.* 1680), describes this Talmud Torah and wishes it might serve as a model for other schools. He says: "It is built near the synagogue, and has six rooms, each accommodating a separate class under a melammed. The first class is for small boys who are learning to read their prayers. In the second class they learn the Pentateuch from beginning to end, with the musical accents. In the third, they translate the Pentateuch into the vernacular and use the Rashi commentary, divided into the regular weekly sidrot. In the fourth, they learn the Prophets and the Hagiographa, with the proper accents and translation. In the fifth, they learn grammar and begin upon a series of halakic excerpts from the Talmud, the text being in Hebrew and the explanations in the vernacular. Before the approach of a holy day they memorize the laws in the Shulḥan 'Aruk pertaining to that holy day. The sixth class is preparatory to the yeshibah in the bet ha-midrash and is conducted by the ḥakam-rabbi. In this class every day one halakah, with the commentaries of Rashi and the Tosafot, is studied, and compared with the conclusions in the codes of Maimonides, Asheri, and Caro. The hours of study are from 8 to 11 in the morning, and from 2 to 5 in the afternoon; in winter, till the Minḥah prayer. The expense of maintaining this school is defrayed from a fund contributed by the members of the Ḥebra Talmud Torah. This Sephardic school made an exception to the rule of keeping the pupils in Talmud Torah all day, and a few hours of the night in the short winter days."

The Modern Talmud Torah.

The Talmud Torah at Nikolsburg, Moravia, from 1724 to 1744, gave poor boys an education equal to that which was offered their more fortunate companions. The studies consisted of Siddur, Ḥumesh (Pentateuch), and Talmud (Güdemann, "Quellenschriften zur Gesch. des Unterrichts und der Erziehung bei den Deutschen Juden," p. 275). The schools in eastern Europe retained the ancient type and methods of the Ashkenazic schools up to the middle of the nineteenth century, when a movement for improvement and better management took place in the larger cities. Thus at Odessa, in 1857, the Talmud Torah, which had existed ever since the city was chartered, was reorganized into a model school by distinguished pedagogues. In 1881 S. J. Abramowitch was appointed principal over 400 pupils. In 1904 two branches were opened in the suburbs with an additional 400 pupils. The boys are furnished text-books and clothing free. The expenses are about 20,000 rubles annually. There is a Talmud Torah in every city within the Pale in Russia. The income is derived from the Jewish tax on meat and from private contributions.

In Jerusalem the Talmud Torah of the Sephardim, called "Tif'eret Yerushalayim," was reorganized by the ḥakam bashi R. Raphael Meïr Panejil in 1891, with 300 pupils and 13 teachers; there the boys learn Arabic and arithmetic in addition to other subjects, which range from the alphabet to the Talmud. The time of study is from sunrise to sunset. The largest contributions for the support of the school come from the Sassoons in Bombay and Calcutta, through the meshullaḥim. The Ashkenazic Talmud Torah and yeshibah 'Eẓ Ḥayyim, with 35 teachers and over 1,000 pupils, succeeded the school established by R. Judah he-Ḥasid of Siedlce. It was started with a fund contributed by Hirsch Wolf Fischbein and David Janover in 1860. The annual expenditure is about $10,000, over half of which is collected in the United States. At Jaffa the Talmud Torah and yeshibah Sha'are Torah was organized in 1886 by N. H. Lewi, with 9 teachers and 9 classes for 102 boys. Its expenses are about $2,000 yearly, mostly covered by donations from abroad.

In America.

In America the Machzikei Talmud Torah in New York was organized in 1883 by Israel (Isidor) Rosenthal. It maintains schools on its own premises at 225-227 East Broadway. It instructs over 1,100 boys at a yearly expense of about $12,000. On Jan. 22, 1905, the society opened a branch at 67 East 7th street, to which Jacob H. Schiff donated $25,000. The society is managed by a board of directors and a committee of education. The studies comprise elementary Hebrew, the reading of the prayers, the translation of the Pentateuch into Yiddish and English, and the principles of the Jewish faith and practise. The time of study occupies only two hours per day, after public-school hours, as all pupils attend the city schools for secular education. There are several other Talmud Torahs in New York; and similar institutions exist in all cities of the United States and Canada that have a large Jewish population. See EDUCATION; ḤEDER; PEDAGOGICS; YESHIBAH.

TAM, JACOB. See JACOB BEN MEÏR TAM.

TAM, JACOB B. DAVID IBN YAḤYA: Portuguese-Turkish rabbi and physician; born in Portugal in the second half of the fifteenth century;

died in Constantinople between 1534 and 1542. His father, David b. Solomon (d. Constantinople, 1504), one of the most prominent members of the great Yaḥya family, fled from Portugal to Naples in 1493, and thence went to Constantinople about 1497. Tam, who accompanied his father on both journeys, was recognized as a Talmudical authority, and presumably he succeeded Elijah Mizraḥi as rabbi of the Turkish capital. It is stated that he was the body-physician of Sultan Sulaiman and a renowned authority on Mohammedan law, but there is reason to believe that his admirers exaggerated his importance. Tam's 213 responsa, which, under the name "Ohole Tam," form a part of "Tummat Yesharim" (edited by Benjamin b. Abraham Motal, Venice, 1622), constitute all that has been preserved of his writings. The preface to "Yosippon," attributed to him and first published in the Constantinople edition of 1510, is really the work of Judah Leon b. Moses Mosconi (see Jew. Encyc. vii. 260, *s.v.* Joseph ben Gorion). Tam had two sons, **Joseph** and **Gedaliah,** and a grandson, **Tam b. Gedaliah,** whose actual name, as in the case of his grandfather, was Jacob.

S. P. Wi.

TAMAN: Peninsula between the Black Sea and the Sea of Azof; now included in the Russian province of Kuban. It contains the Cossack settlement of Taman, which has (1897) a population of 4,291. The peninsula was the seat of prosperous Greek colonies at the beginning of the Christian era. That a large number of Jews lived there at that time and subsequently is testified to by the Byzantine historian Theophanes (d. 817) in his "Chronographia." In 680 (or 679) Taman was captured by the Chazars, and was then known as Tame, from which originated the Russian Tmutarakan. The peninsula and the settlement near the site of the present town of Taman were known also under other names, among them Matega (by the Venetians). In 965 the Chazars were expelled from Taman by the Russian prince Swyatoslaw, a Russian colony being established at Tmutarakan; and in 1016 they were driven from their remaining Crimean possessions. In 1475, at the time of the conquest of the Crimea by Mohammed II., Taman was under the rule of the Guizolfis, descendants of the Genoese Jew Simeon de Guizolfi (see Guizolfi, Zacharias).

In the excavations made on the Taman peninsula after the middle of the nineteenth century there were discovered about sixty tombstones which once marked Jewish graves. The inscriptions on two of these tombstones were partly deciphered; on the others only single Hebrew letters could be made out. All of them bear Jewish symbols — candelabra, shofar, and lulab. Of the two partly deciphered inscriptions one belongs to the fourth or fifth century, and contains the name of Menahem, son of Amtz; the other dates back to the eighth or ninth century, and contains the words "in this grave lies the body of Mir[iam]." A marble slab which forms a part of the wall in the lodge of the synagogue in Theodosia bears the name of the "respected Joshua, the son of Meïr of Taman Ashkenazi," who died on Wednesday, the 27th of Ṭebet, 5269 (Dec. 31, 1508). See Crimea; Kaffa; Karaites; Kertch.

H. R. J. G. L.

TAMAR: 1. City mentioned in the vision of Ezekiel (Ezek. xlvii. 19) as one terminus of the southern boundary-line of Canaan, which extended thence through Meriboth-kadesh to the Mediterranean. According to Ezek. xlviii. 28, moreover, this entire district was to belong to the tribe of Gad. A comparison of this boundary-line with that given in Num. xxxiv. 3-5 shows that Tamar was probably situated in the border-land of Moab, near the Dead Sea.

2. Same as Hazazon-Tamar.

S. S. O.

TAMAR: 1.—Biblical Data: Daughter-in-law of Judah. After the death of her husband, Er, she married his brother Onan; but when he also died, Judah sent her back to her father's house, fearing to let her marry his third son, Shelah. When Tamar saw that Shelah, having reached maturity, did not marry her, she disguised herself and met Judah on his way to Timnath. Supposing her to be of questionable virtue, he approached her and entered into relations with her that resulted in her pregnancy. As a pledge of payment, he left with her his staff, seal, and belt. When her condition was discovered, and she was about to be burned to death in punishment for unchastity, she confronted her father-in-law with the tokens he had left with her, declaring that she was with child by the man to whom they belonged. She bore him the twins Zarah and Pharez (Gen. xxxviii.).

——**In Rabbinical Literature:** Tamar was the daughter of Shem, the son of Noah. Shem was a priest, and when Tamar was charged with fornication (Gen. R. lxxxv. 11) she was condemned to be burned to death in conformity with Lev. xxi. 9.

In the house of Judah, her father-in-law, she was extremely virtuous and timid, and used to keep her face constantly covered with a veil, so that Judah failed to recognize her when he saw her sitting by the roadside (Soṭah 10b; Gen. R. lxxxv. 9). Tamar prayed to God that she might not go barren from Judah's house, and resolved upon the course which she subsequently pursued (Gen. R. lxxxv. 8). In reply to Judah's questions she declared that she was not a Gentile, and that she was unmarried (Gen. R. lxxxv. 9; Soṭah 10a). When she had become pregnant she was not at all ashamed of her condition, but boasted to all that she would be the mother of kings and redeemers (Gen. R. lxxxv. 11). When charged with unchastity, she was unwilling to assert directly that she was with child by her father-in-law, for she feared that such a disclosure might humiliate him, and she was ready to die rather than incriminate him (Ber. 43a; Soṭah 12b). She was willing, however, indirectly to cause him to confess, and therefore sent him the articles which he had left her as a pledge, and which had been taken from her by Samael and restored by Gabriel. After her innocence had been proved, Judah continued to live with her in marital relations (Soṭah 10b).

2.—Biblical Data: Sister of Absalom, and the victim of the passion of her half-brother Amnon. At the suggestion of Jonadab, his confidant, Amnon feigned illness, and Tamar was sent by the king to his apartment to prepare food for him. Amnon took advantage of this opportunity to dishonor her forcibly, after which he drove her away. Weeping and lamenting, she went to her brother Absalom, in whose house she remained. Absalom avenged his sister two years later by killing Amnon (II Sam. xiii.).

——In Rabbinical Literature: Tamar was the natural daughter of David by a captive whom he married after she had abjured her Gentile religion, and who became the mother of Absalom. Because of her illegitimacy it would have been lawful for her to marry Amnon, the son of David, and she therefore besought him (II Sam. xiii. 13) not to dishonor her, but to ask the king to bestow her on him as his wife, a request which would surely have been granted (Sanh. 21a).

S. J. Z. L.

TAMARISK: Tree, several species of which are found in and around Palestine. The Hebrew term for the tamarisk is doubtful. The word אשל, which occurs three times in the Old Testament, is interpreted by modern scholars as meaning "a tamarisk," and is so rendered in the Revised Version. Abraham planted a "tamarisk-tree" (R. V.) in Beer-sheba (Gen. xxi. 33; A. V. gives "a grove"). "Saul was sitting . . . under the tamarisk-tree in Ramah" (I Sam. xxii. 6, R. V.). Finally, the bones of Saul and his sons were buried "under the tamarisk-tree in Jabesh" (I Sam. xxxi. 13, R. V.). The parallel passage of I Chron. x. 12 has אלה, which is rendered "oak-tree" by both the English versions (R. V., margin, "terebinth"). Therefore אשל in the last-mentioned passage is rendered "tree" in the Authorized Version.

S. M. Sel.

TAMID (in full, **'OLAT TAMID**): Treatise in the Mishnah and the Babylonian Gemara; devoted chiefly to the regulations regarding the morning and evening burnt offerings (comp. Ex. xxix. 38-42; Num. xxviii. 3-8), but dealing also with other ceremonies in the ritual of the Temple which are binding on the priests and the Levites. In most editions this treatise stands ninth in the order Ḳodashim, and it is divided into seven chapters (six in Lowe's edition of the Mishnah), containing thirty-four paragraphs in all.

Ch. i.: The priests kept watch in three places in the Temple; where the young priests were on guard, and where the older ones slept who held the keys (§ 1); all who sought admission to remove the ashes from the altar were obliged to prepare themselves by a ritual bath before the officer appeared; when he appeared and when he called upon the priests to draw lots (§ 2); the mutual greetings of the priests (§ 3); how the one chosen by lot to remove the ashes from the altar performed his duties (§ 4).

Ch. ii.: How the other priests continued the task of cleansing the altar (§ 1); the piling of the ashes, in the center of the altar, into a hillock, which was considered an adornment (§ 2); the supply of fuel for the altar and the kind of wood used (§ 3); the arrangement of the wood and fire in layers (§§ 4-5).

Ch. iii.: The drawing of lots for various official duties, such as slaying the tamid, sprinkling its blood, and cleansing the altar and the candlestick (§ 1); the announcement of the time of slaying the morning sacrifice (§ 2); the bringing of the sacrificial lamb, which was given to drink from a golden cup before it was killed; who was charged with taking it to the place of sacrifice (§§ 3-5); the mode of cleansing the inner altar and the candlesticks, together with the statement, in conformity with Ezek. xliv. 2, that no man ever passed through the postern on the southern side of the large door; how the opening of this great portal was heard as far as Jericho, as was the sound of the trumpets and other music of the Temple (§§ 6-9).

Ch. iv.: The ritual for killing and dismembering the sacrificial lamb; how the parts of the sacrifice were brought to the altar.

Ch. v.: The daily morning prayer in the Temple, which was supplemented on the Sabbath by a benediction on the division of priests who then completed their duties (§ 1); the drawing of lots for offering incense; the question as to whether one might make this offering twice, and the mode of burning the incense (§§ 2-5); the "magrefah," a musical instrument used in the Temple (see Organ), and the various priestly and Levitical meanings of the signals given on it (§ 6).

Ch. vi.: Additional details in regard to offering incense.

Ch. vii.: The ritual used in case the high priest himself performed the sacrifice; the mode in which he pronounced the benediction on the people; the divergency of this benediction from that bestowed by the priests outside the Temple, and the music which accompanied the high priest's performance of his functions (§§ 1-3); enumeration of the Psalms sung by the Levites in the Temple on the various days of the week (§ 4).

Although the extant Babylonian Gemara covers only ch. i., ii., and iv. of Tamid, it contains several sayings and ethical maxims of importance, as well as stories and legends of much interest. The following saying may be cited as a specimen (29a): "The Pentateuch and the writings of the Prophets and the mishnaic sages contain many exaggerated expressions which can not be taken literally, such as, 'The cities are great and walled up to heaven'" (Deut. i. 28). On the legends contained in this treatise concerning Alexander the Great, his conversation with the sages of the South, his journey to Africa, and his adventures among the Amazons and at the gate of paradise, see Jew. Encyc. i. 342 *et seq.*, *s.v.* Alexander the Great.

W. B. J. Z. L.

TAMMUZ (Assyrian, "Dumuzi"): Babylonian deity supposed to be referred to in Ezek. viii. 14. He is regarded as the husband, or sometimes as the son, of the goddess Ishtar, who descended to Hades every year in the fourth month, named after him, and remained there till the following spring. He is accordingly supposed to represent the spirit of the spring vegetation; and there was a period of mourning in Babylonia to mark the discontinuance of growth. It has been suggested that the fast of the Seventeenth of Tammuz was a survival in Jewish folk-lore of the mourning for Tammuz; while the myth of Adonis in classical literature has also been associated with the legend. The reference in Ezekiel to the women weeping for Tammuz certainly shows a trace of a cult in early Israel; but how far it extended it is difficult to say. W. Robertson Smith attempted to associate the Tammuz-worship with the sacrificial rites connected with "the king of the woods."

S. J.

TAMMUZ (תמוז): Fourth ecclesiastical and tenth civil month of the Hebrew calendar. It consists of twenty-nine days, and corresponds to part of June and part of July. During the last years of the Second Temple the 14th of Tammuz was declared a feast-day in commemoration of a victory gained by the Pharisees over the Sadducees in a dispute regarding the interpretation of the Law (Ta'an. iv. 6). The 17th of Tammuz is the public fast-day called "Shib'ah 'Asar be-Tammuz," in commemoration of the breaking down of the walls of Jerusalem by Nebuchadnezzar. As stated in Jer. xxxix. 2, this catastrophe occurred on the 9th day of the month; the 17th was selected because, during the siege of Jerusalem by Titus, a similar catastrophe happened on that day (Ta'an. 26a; Shulḥan 'Aruk, Oraḥ Ḥayyim, 549).

According to the Megillat Ta'anit (iv. 6), four other calamities had overtaken the people of Israel on the 17th: the breaking of the tables of the Law by Moses, the cessation of the perpetual offering, the burning of the Torah and the erection of an idol in the sanctuary by Apostomus (comp. Josephus, "Ant." xx. 5, § 4; *idem*, "B. J." ii. 12, § 2), and the discontinuance of the sacrifices. With the 17th begin the three weeks of mourning over the destruction of Jerusalem, which end with the 9th of Ab. During this period it is forbidden to celebrate marriages, to cut the hair, to bathe, etc. (Shulḥan 'Aruk, Oraḥ Ḥayyim, 551). The pious fast every day during these three weeks (*ib.*). The 27th of Tammuz is the anniversary of the burning of the tanna Ḥanina ben Teradion during the Hadrianic persecutions (additions to Megillat Ta'anit, ed. Neubauer, in "M. J. C." ii. 24).

J. I. Br.

TANG, ABRAHAM: English author; flourished in London in the latter half of the eighteenth century. In 1773 he published a philosophic commentary on Ecclesiastes which gives evidence of some classical scholarship. The mythology of Greece and of Rome is presented in this commentary in a very clear and concise manner; and the "Anthologia Græca," Ovid, Vergil, and Seneca are frequently cited. Tang wrote also an exposition of the Talmudical passages in which the sayings of the "Ancients of Athens" are quoted (London, 1772); this work was dedicated to R. Moses of Minsk.

Bibliography: *Jew. Chron.* Dec. 19, 1884.

J. G. L.

TANGIER. See Morocco.

TANḤUM B. ELIEZER: Lithuanian rabbi and merchant; born 1746; died in Grodno Jan. 12, 1819. He was the son of R. Eliezer of Urle (Orle), in the government of Grodno, and succeeded his father in that rabbinate. Later he occupied the position of "rosh bet din" at Grodno, where his father had been called as rabbi. Upon his failure to secure the rabbinate of Grodno after the death of his father (1791), Tanḥum engaged in business, in which he was very successful. There is a tradition that he enjoyed the confidence of the last king of Poland and that he was well thought of by Emperor Alexander I. His signature is first under the resolutions adopted by the Jewish delegates who met in Wilna in 1818 to select three deputies to reside permanently in St. Petersburg and represent Jewish affairs before the government (see Jew. Encyc. i. 345, *s.v.* Alexander I.). Tanḥum left several works in manuscript under the collective title "Neḥamat Ẓiyyon"; these in 1860 were in possession of his grandson Elijah Perez of Wilna. His son was Issachar Bär b. Tanḥum.

Bibliography: Fuenn, *Kiryah Ne'emanah*, pp. 35, 236, Wilna, 1860; Friedenstein, *'Ir Gibborim*, pp. 54, 69-70, Wilna, 1880.

E. C. P. Wi.

TANḤUM BAR ḤANILAI (or **ILAI**): Palestinian amora of the third century, although his father's name suggests a Babylonian origin. He transmitted the sayings of Joshua ben Levi, Johanan, and Bar Ḳappara. In the Babylonian Talmud he appears as the author of decisions which in the Jerusalem Talmud are attributed to older authorities. Thus, in Sanh. 93a he is said to be the author of a decision which in Pesiḳ. xi. (ed. Buber, p. 99a) is ascribed to Eleazar b. Pedat. On the other hand, halakic sentences of his have been preserved in the Jerusalem Talmud (Ma'as. 48b; Ḥag. 76a; Ter. 41c; Shab. 5d; Ta'an. 65a). Among those who transmitted sayings of his were Abbahu (Cant. R. ii. 7) and Tanḥuma (Pesiḳ. R. 112).

It appears from Yer. Ta'an. 65a, b that Tanḥum bar Ḥanilai was active as a preacher, and that he once preached with Abba bar Zabdai and Josefa. He died during a Ḥanukkah festival (Yer. M. Ḳ., end). His sayings were of a high ethical and moral character: "God speaks thus to Israel: 'My daughter [*i.e.*, the Torah] is in thy hands; thy daughter [soul] is in My hands. If thou protect Mine, then will I protect thine'" (Tan., Ki Tissa, end). With regard to the prohibition against certain kinds of food, he said: "A physician once visited two sick people; the one who had no hope of recovery was permitted to eat everything, while the one who had every prospect of recovery was allowed only certain foods. So God treats the Jews; because they have hope of a future life, He gives them certain dietary laws; while the heathen, who have no part in the life to come, are permitted to eat of all things" (Lev. R. xiii. 2).

Tanḥum bar Ḥanilai's haggadah is especially characteristic because of his system of connecting the last words of one Bible paragraph with the opening words of the next, as Lev. i. 16 with ii. 1 (Lev. R. iii. 4), Lev. xii. 2 *et seq.* with xiii. 2 *et seq.* (Lev. R. xv. 5), Ps. xciv. 1 with xciii. 5 (Midr. Teh. *ad loc.*), and Num. v. 12 *et seq.* with v. 2 *et seq.* (Num. R. ix. 4). Haggadic sayings of his are quoted in the following places: Sanh. 7a, 100a; 'Ab. Zarah 18b, 19b; B. M. 86b; Shab. 22a; Ḥag. 7a; Ber. 8b, 13b; Meg. 15b; Mak. 10a; Yer. Ta'an. 68c; Gen. R. iv. 6, xci., beginning; Pesiḳ. R. 21, end; Ex. R. xlii., end; and Lev. R. xxvi. The Midrash Mishle begins with a prooemium by Tanḥum bar Hanilai, although his name is not mentioned in any other part of the book. He is mentioned twice in the Pirḳe Rabbi Eli'ezer (xxxix., xlix.) by the name of Tanḥum.

W. B. S. O.

TANḤUM B. ḤIYYA: Palestinian amora of the third century; a pupil of Simeon b. Pazzi, whose sayings he transmits. In the Babylonian Talmud he is constantly referred to as R. Tanḥum b. Ḥiyya of Kefar 'Akko (M. Ḳ. 25b; Yeb. 45a), of which place he was a native; he resided, however, in Tiberias, where on one occasion, with the aid of Aḥa, the lord of the castle, he ransomed some Jewish women who probably had been taken there by Roman troops (Yeb. 45a). He was a member of the commission which determined the intercalations of the calendar (Yer. Sanh. 6c). He was on terms of friendship with Assi, who visited him (Yer. Shab. 6c), and he maintained friendly relations with Hananiah b. Papa (Yer. M. Ḳ. 83c). Tanḥum was wealthy and philanthropic. It is recorded that when his mother purchased meat for the household a similar quantity was always purchased for distribution among the poor (Lev. R. xxxiv. 1).

Only three halakic sayings by him have been preserved (Bek. 57b; Yer. Meg. 75a, twice); but several of his haggadic utterances are extant. The following may be mentioned: "When one who has learned, taught, and observed the Law fails to prevent the evil which it is in his power to prevent, or to confirm the good which it is in his power to confirm, then shall smite him the curse pronounced [Deut. xxvii. 26] over those who fail to confirm 'all the words of this law'" (Yer. Soṭah 21d). He interpreted Prov. vi. 32 ("Whoso committeth adultery with a woman lacketh understanding") as referring to those who seek office for the sake of gain (Pesiḳ. R. 22 [ed. Friedmann, p. 111a]). Tanḥum was the author also of a prayer to be read by any one who has had an ominous dream (Yer. Ber. 9a). It was told in Babylon that when Tanḥum died all the statues in Tiberias moved from their places (M. Ḳ. 25b, according to the correct reading in Rabbinovicz's "Variæ Lectiones," *ad loc.*).

Bibliography: Frankel, *Mebo*, pp. 130b, 131a; Bacher, *Ag. Pal. Amor.* iii. 636-639.
W. B. J. Z. L.

TANḤUM BAR JEREMIAH: Palestinian amora of the fourth century; pupil of R. Manis the Elder. In the town of Ḥefer in Galilee he once rendered a legal decision on a religious question, whereupon his attention was called to the fact that his action was unwarranted, since his teacher resided within twelve miles of that place. Only one halakic decision of his—regarding the liturgy—is extant (Yer. Ber. 7b). He was the author of several haggadic sentences (Midr. Teh. to Ps. xxxi.; Gen. R. iv. 8; Lam. R. ii. 1; and Pesiḳ. 163b).

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 751-752; Frankel, *Mebo*, p. 131a; Heilprin, *Seder ha-Dorot*, ii. 152b.
E. C. S. O.

TANḤUM BEN JOSEPH YERUSHALMI: Oriental philologist and exegete of the thirteenth century. He was a scholar of great merit and was one of the last representatives of the rationalistic school of Biblical exegesis in the Orient; he is called by modern writers "the Ibn Ezra of the East." He lived in Palestine, perhaps for a time in Egypt also, and had a son, Joseph, who maintained a correspondence with David, the grandson of Maimonides (comp. Brody in "Sammelband," 1893, issued by the Meḳiẓe Nirdamim). Tanḥum's very existence was unknown to European scholars until the eighteenth century, when fragments of his works were brought from the Orient by Pocock, who published some of them in his "Porta Mosis." Tanḥum skilfully handled the Arabic language, in which he composed his works; he possessed some knowledge of Greek, and was well versed in philosophy and natural science. He was the author of "Kitab al-Ijaz wal-Bayan," consisting of commentaries on the Biblical books, with an introduction entitled "Kulliyyat" giving a sketch of Hebrew grammar and an account of the philologists of the Middle Ages.

With the exception of those on Ezra and Nehemiah, the commentaries are found in manuscript, complete or in fragments, in the libraries of St. Petersburg, Oxford, and London; and they are known also through quotations made either by the author himself or by later writers. The commentaries which have been published are: "Ad Libros V. T. Commentarii Arabici Specimen una cum Annott. ad Aliquot Loca Libri Judicum" (ed. Ch. F. Schnurrer, Tübingen, 1791); "Commentarii in Prophetas Arabici Specimen," etc. (ed. Theodor Haarbrücker, Halle, 1842); "Commentarii Arabici in Lamentat." (ed. Cureton, London, 1843); "Commentaire sur le Livre de Habakkouk, Publié en Arabe avec une Traduction Française par Salomon Munk" (in Cahen's French Bible, vol. xvii.); "Arab. ad Libros Samuelis et Regum Locos Graviores, Edidit et Interpretationem Latinam Adjecit Th. Haarbrücker" (Leipsic, 1844); on Joshua, by the same editor (published with the "Blätter aus der Veitel-Heine-Ephraim Lehranstalt," Berlin, 1862); extracts from the commentary on Judges, published by Goldziher in his "Studien," 1870; on Ḳohelet (ed. Samuel Eppenstein, Berlin, 1888); on Jonah (ed. Kokowzow, in the "Rosen-Festschrift," St. Petersburg, 1897). In his commentaries, Tanḥum, being a decided adversary of midrashic exegesis, endeavored to give a philological or a philosophical interpretation of the Scriptural text. He quotes the prominent exegetes from Saadia down to Abraham ibn Ezra.

Tanḥum wrote also "Al-Murshid al-Kafi," a lexicon giving in alphabetical order the etymologies and significations of all the vocables found in Maimonides' "Mishneh Torah," and of a great number of those found in the Mishnah. The main sources used are the "'Aruk" and Maimonides' commentary on the Mishnah. The author quotes Saadia, Ibn Janaḥ, Dunash, Moses ibn Ezra, and other prominent philologists. Specimens of the "Murshid," still extant in manuscript (Bagdad, Jerusalem, and Oxford), have been published by Wilhelm Bacher under the title "Aus dem Wörterbuche Tanchum Jerushalmi's" (Strasburg, 1903).

W. B. I. Br.

TANḤUM OF NAVE. See Tanḥuma b. Abba.

TANḤUMA B. ABBA: Palestinian amora of the fifth generation; one of the foremost haggadists of his time. He was a pupil of Ḥuna b. Abin (Num. R. iii.; Gen. R. xli.), from whom he transmits halakic (Yer. Ḥal. 57d; Shab. 10c) as well as haggadic sayings (Yer. Pe'ah 15b; Shab. 11d; 'Ab. Zarah 43a). He received instruction also from Judah b. Shalom (Midr. Teh. to Ps. cxix. 2) and R. Phinehas (Yer. Sheḳ. 49d). According to Bacher, he resided in Nave, a town in Peræa (comp. Neubauer, "G. T." p. 23).

Retort to the Emperor.

Of Tanḥuma's life the Babylonian Talmud relates the following incident, probably based on an actual occurrence. The emperor—a Christian ruler no doubt being meant—said to Tanḥuma, "Let us all become one people." To this the latter replied, "Yes; but since we are circumcised we can not become like you; whereas you, by having yourself circumcised, may become like us." The emperor thereupon said, "You have answered me correctly; but he who worsts the king must be thrown to wild beasts." This was done, but the animals did Tanḥuma no harm. An unbeliever who stood by remarked that perhaps they were not hungry, whereupon he himself was thrown after Tanḥuma and was instantly torn to pieces (Sanh. 39a).

With regard to Tanḥuma's public activity, the only fact known is that he ordered a fast on account of a drought. Two fasts were held, but no rain came, whereupon Tanḥuma ordered a third fast, saying in his sermon: "My children, be charitable unto each other, and God will be merciful unto you." On this occasion one man gave money to his divorced wife, who was in need; Tanḥuma thereupon lifted his face toward the heavens and prayed: "Lord of the Universe, this hard-hearted man took pity on his wife when he saw that she was in need, and helped her, although not obliged to do so; how much more shouldest Thou, the Gracious and Merciful, be filled with pity when Thou seest Thy beloved children, the sons of Abraham, Isaac, and Jacob, in need." As soon as he had ceased praying, rain came, and the world was relieved of its distress (Gen. R. xxxiii.; Lev. R. xxxiv.).

His Haggadot.

Tanḥuma is not often mentioned as a halakist: a few remarks on and explanations of halakic teachings are ascribed to him in the Palestinian Talmud (Yer. 'Er. 26c; Pes. 37b, d; Yoma 44d; Sheḳ. 47c; Ta'an. 67a), while the Babylonian Talmud mentions an objection raised by him against a halakic thesis advanced by the Palestinian schools (Ḥul. 55b). As a haggadist, on the other hand, he is frequently mentioned, and the numerous haggadic sentences of his which are still preserved touch every province of the Haggadah. He often points out the Scriptural bases for the sayings of older authors, always using the characteristic formula of introduction: "I give the reason"; that is, "I cite the Biblical authority" (Yer. Ber. 12c; Gen. R. iv. 3; Lev. R. xxi.). He also explains and annotates older sayings (Gen. R. xxiv.), adjusts differing traditions (Lev. R. xxiv. 5), and varies the text of old haggadic sentences (Gen. R. xliii. 3). His own haggadic teachings differ but little from those of his contemporaries, although some of his interpretations approach the simple exegetic method. An example of this is furnished by his interpretation of Eccl. iii. 11, where he explains the word "ha-kol" as meaning "the universe" (Gen. R. ix. 2).

Tanḥuma often made use of symbolism to illustrate his thought. Some of his haggadic utterances may be quoted: "Just as the spice-box contains all kinds of fragrant spices, so must the wise youth be filled with all kinds of Biblical, mishnaic, halakic, and haggadic knowledge" (Cant. R. v. 13). On Isa. xlv. 3 Tanḥuma said: "Nebuchadnezzar grudged his son and successor Evil-merodach his treasures, wherefore he filled iron ships with gold and sunk them in the Euphrates. When Cyrus conquered Babylonia and decided to rebuild the Temple in Jerusalem, he diverted the river into another channel, and 'the treasures of darkness, and hidden riches of secret places' were given to him" (Esth. R. iii. 1).

Polemics.

Tanḥuma often held religious disputations with non-Jewish, especially Christian, scholars; and he himself tells of one which took place in Antioch (Gen. R. xix. 4). He was asked concerning Gen. iii. 5, where the word "Ke-Elohim [yode'e ṭob wa-ra']" seems to point to a plurality of gods. Tanḥuma replied that such a construction was refuted by the immediately preceding words, "yodea' [singular] Elohim." His frequent intercourse with non-Jews led him to formulate the following rule: "When a non-Jew greets you with a blessing, answer him with an 'Amen'" (Yer. Ber. 12c; Suk. 54a). The Pesiḳta Rabbati contains about eighty proems said to have originated with Tanḥuma, and beginning with the phrase "Thus said R. Tanḥuma." A great number of proems bearing his name are found also in the Midrash Tanḥuma. In addition to these proems several lengthy sections of the Pesiḳta Rabbati as well as of the Midrash Tanḥuma are followed by the note "Thus explained [or "preached"] R. Tanḥuma." See Tanḥuma, Midrash.

W. B. J. Z. L.

Three Midrashim.

TANḤUMA, MIDRASH: Name given to three different collections of Pentateuch haggadot; two are extant, while the third is known only through citations. These midrashim, although bearing the name of R. Tanḥuma, must not be regarded as having been written or edited by him. They were so named merely because they consist partly of homilies originating with him (this being indicated by the introductory formula "Thus began R. Tanḥuma" or "Thus preached R. Tanḥuma") and partly of homilies by haggadic teachers who followed the style of R. Tanḥuma. It is possible that R. Tanḥuma himself preserved his homilies, and that his collection was used by the editors of the midrash. The three collections were edited at different times; they will, therefore, be treated in chronological order.

Tanḥuma A: The collection published by Buber (Wilna, 1885), who gathered the material from several manuscripts. This collection, consisting of homilies on and haggadic interpretations of the weekly sections of the Pentateuch, is the oldest of the three, as well as perhaps the oldest compilation of its kind arranged as a running commentary on the Pentateuch. It is even older than Bereshit Rabbah, which quotes several of its decisions. This midrash (Tanḥuma) was edited in the fifth century, before the completion of the Babylonian Talmud, to which work it nowhere refers. On the contrary, a passage in the Babylonian Talmud seems with probability to indicate that the redactor of that work had referred to the Midrash Tanḥuma. This passage (Ḳid. 33b) says that two amoraim differed in their interpretations of the words "and [they] looked after Moses, until he was gone into the tabernacle" (Ex. xxxiii. 8). One amora interpreted the words in a complimentary sense, while the other held that the people looked after Moses and made unfavorable remarks about him. The favorable interpretation only is given in the Talmud, while the adverse opinion is referred to with the words "ki de-ita" (as it is said). Inasmuch as the adverse view is given in the Tanḥuma Peḳude (ed. Buber, p. 65a), it is extremely probable that the words "ki de-ita" in the Talmud have reference to the former work, or that the reference originally read "ki de-ita be-Tanḥuma" (as it is said in the Tanḥuma), the words "be-Tanḥuma" having been eliminated later.

The homilies contained in Midrash Tanḥuma A begin with the words "As the Scriptures say" or sometimes "As it is written." Then follow a verse (in most cases taken from the Hagiographa), its explanation, and a homily on the particular passage of the Pentateuch referred to. Several of the homilies on the first, third, and fourth books of the Pentateuch begin with brief halakic dissertations bearing on the passages to which the homilies refer. The halakic treatises consist of a question introduced with the words "Yelammedenu rabbenu" (May our teacher instruct us), and of a reply beginning with the phrase "Kak shanu rabbotenu" (Thus have our teachers instructed us); the replies are always taken from either a mishnah or a baraita. Many of the homilies close with words of hope and encouragement regarding the future of the Jews; but several of them are abbreviated and not entirely completed, this curtailment being apologized for in the words "Much more might be said on this subject, but we shall not tire you" (Noaḥ xxvi. 27b), or "This passage has been elucidated by several other interpretations and expositions, but in order not to tire you we quote only that which is necessary for to-day's theme" (Ḥuḳḳat xvi. 57a).

Contents.

Although essentially a haggadic midrash, Tanḥuma A contains many halakic sayings. In addition to its sixty-one introductions to homilies, which contain halakic questions and answers, there are several halakic rules and decisions quoted throughout the work. These halakic passages were taken from the Mishnah or the Baraita, and not from the Babylonian Talmud; indeed, many of the decisions given are in opposition to those of the latter work (comp. Buber, Introduction, pp. 15 *et seq.*). The haggadic contents of the midrash are also very extensive and varied; it contains, too, simple explanations of Scriptural passages; several refutations of heretics; explanations of the differences between "ḳere" and "ketib" and between words written "plene" (male) and defectively ("ḥaser"); interpretations according to noṭariḳon and gemaṭria; several narratives and parables; and numerous aphorisms, moral sayings, and popular proverbs.

Some of the aphorisms and proverbs may be cited here: "One may not give an honest man an opportunity to steal, much less a thief" (Wayishlaḥ xii. 85b). "The office seeks those that would escape it" (Wayiḳra iv. 2b). "If you yield not to wickedness it will not follow you nor dwell by you" (Tazria' xi. 20b). "Do the wicked no good in order that thou reap not that which is evil" (Ḥuḳḳat i. 50a).

This Tanḥuma midrash has been referred to in many other midrashim, as, for example, all the Rabbot, Pesiḳta de-Rab Kahana, Pesiḳta Rabbati, and in the midrashim to Samuel, Proverbs, and Psalms, which all quote passages from it. The Geonim also and the older rabbinical authorities made use of it, and cited halakic as well as haggadic sentences from it (comp. Buber, *l.c.* pp. 37 *et seq.*). The first to refer to this midrash by the name of Tanḥuma, however, was Rashi, who mentions it in several passages of his commentary, and quotes from it. Most of Rashi's quotations are taken from Tanḥuma A (see Buber, *l.c.* pp. 44 *et seq.*).

Tanḥuma B, or Yelammedenu: This second midrash with which the name of Tanḥuma is associated is known as the "Yelammedenu" from the opening words of the halakic introductions to the homilies—"Yelammedenu rabbenu" (May our teacher instruct us). It is referred to also under the name of Tanḥuma, though by only a few authorities, as Hai Gaon and Zedekiah ben Abraham (Buber, *l.c.* pp. 44a, 50a). The reason for this confusion of names may be found in the fact that a later collection of midrashim (Tanḥuma C) included a great part of the material contained in the Yelammedenu, especially that referring to the second book of the Pentateuch. The Yelammedenu, which contains several passages from Tanḥuma A, is often cited in the "'Aruk," and has been extensively referred to by the redactor of the Yalḳuṭ. Other old rabbinical authorities refer to the Yelammedenu by that name, and quote passages from it; but otherwise the work has been completely lost.

Tanḥuma C: The third haggadic midrash to the Pentateuch bearing the name of Tanḥuma contains many passages taken from A and B. It is, in fact, an amended edition of the two earlier works, with various additions by later authors. Its homilies on Genesis are original, although they contain several revised passages from Tanḥuma A as well as from the Yelammedenu, the Babylonian Talmud being largely drawn upon for additional interpretations and expositions. The part referring to Exodus is borrowed almost entirely from the Yelammedenu, with the exception of the Wayaḳhel and Peḳude sections, which contain homilies not embodied in the lost work. For the portions to the books of Leviticus, Numbers, and Deuteronomy the redactor of this midrash has made extensive use of the material that he found in Tanḥuma A, which he has revised and supplied with numerous additions. The first authority to cite this midrash was Rashi, who in some passages of his commentary refers to Tanḥuma C and not to the A collection (comp. Buber, *l.c.* pp. 44 *et seq.*). Because of the fact that the third midrash contains much of the material of the lost Yelammedenu, the two works were often confounded. Some authorities believed that it was the Tanḥuma C and not the Yelammedenu which had been lost (Menahem de Lonzano, in "Ma'arik," *s.v.* "Tanḥuma"; comp. Azulai, "Shem ha-Gedolim," ii.). Others erroneously considered this midrash identical with the Yelammedenu, thinking the work had a double title; and the first editions of Tanḥuma C appeared, therefore, under the title "Midrash Tanḥuma, Called Also the Yelammedenu."

Literary History.

Tanḥuma C was first published at Constantinople in 1522, and was reprinted without emendation at Venice in 1545. The third edition, which served as a basis for all the later editions, was published at Mantua in 1563 by Meïr b. Abraham of Padua and Ezra of Fano. This edition contains several additions, consisting of single sentences as well as of entire paragraphs, which Ezra of Fano selected from two of the original manuscripts and also from the Yalḳuṭ. Ezra indicated the added matter by marking it with open hands, but in the following editions these marks were omitted, so that it is no longer possible to distinguish between original contents and material added by revisers. Ezra of Fano further added to his edition an index of all halakic decisions, as well as of the legends and parables contained in this midrash; this index has been retained in all later editions.

W. B. J. Z. L.

TANḤUMA B. SKOLASTIḲAI: Palestinian teacher of the Law. His period is not known, but according to a conjecture (see "'Aruk," *s.v.* "Askolastika") he was the son of that Joshua b. Hananiah who in Gen. R. lxiv. 10 is called "Askolastikus." Tanḥuma is mentioned but once in the Palestinian Talmud, namely, in Ber. 7d, where it is said that he read the following prayer: "May it be Thy will, O Lord my God, and the God of my fathers, that the evil desire which dwells within our hearts shall be destroyed. Thou hast created us to do Thy bidding, and we are constrained to follow Thy will. Thou desirest it, and we also desire it, but the yeast in our dough [*i.e.*, the tendency toward evil] hinders us. Thou knowest that we do not possess strength enough to withstand it; let it therefore be Thy will to destroy and suppress it, so that we may do according to Thy will with all our hearts." According to Frankel ("Mebo," 131b), Tanḥuma b. Skolastiḳai is identical with Tanḥuma b. Abba (comp. Bacher, "Ag. Pal. Amor." iii. 470).

W. B. J. Z. L.

TANḤUMA B. YUDAN: Palestinian amora of the fourth century, some of whose haggadic utterances have been preserved. The words ואחר כבוד in Ps. lxxiii. 24 are interpreted by him as implying that on account of the honor in which Esau held his father, Isaac, the recognition of Jacob's merit in this world was delayed (Pesiḳ. R. xxiii. 124a). On account of the different meanings of the two names of God he declared (Yer. Ber. 14b), with reference to Ps. lvi. 2, that he praised the name of God regardless of whether it indicated severe justice ("middat ha-din") or mild grace ("middat ha-raḥamim"). From the fact that in Judges vi. 24 (see margin) God is given the name of "Peace" he deduces that it is forbidden to use the word "peace" as a term of greeting in an unclean place (Lev. R. ix., end). Two other sayings of Tanḥuma b. Yudan are really transmitted baraita sentences (Yer. Ber. 11d [comp. Frankel, "Mebo," p. 24b]; Yer. Yoma 38b; in the latter passage it is noted that the saying is contained in a baraita).

Bibliography: Frankel, *Mebo*, p. 131a; Bacher, *Ag. Pal. Amor.* iii. 752-753; Heilprin, *Seder ha-Dorot*, ii. 192a.

W. B. J. Z. L.

TANNA. See Tannaim and Amoraim.

TANNA DEBE ELIYAHU: Composite name of a midrash, consisting of two parts, whose final redaction took place at the end of the tenth century of the common era. The first part is called "Seder Eliyahu Rabbah" (thirty-one chapters); the second, "Seder Eliyahu Zuṭa" (fifteen chapters). A distinct reference to this midrash occurs in the Talmud in Ket. 106a: "Elijah used to come to R. Anan, upon which occasions the prophet recited the Seder Eliyahu to him. When, however, R. Anan had given this decision [one previously narrated in the Talmud] the prophet came no more. R. Anan fasted in consequence, and begged forgiveness, whereupon the prophet came again; but R. Anan had such great fear of Elijah that, in order to avoid seeing him, he made a box and sat in it until the recitation was over" (but see Jew. Encyc. i. 552, *s.v.* Anan). Hence, according to Rashi, the midrash has the two names, "Rabbah" for the earlier, and "Zuṭa" for the later lectures. Anan was a

Origin of the Name.

Babylonian amora of the third century. The collection of baraitot concerning him, referred to in this midrash, is cited in the Babylonian Talmud under the title "Tanna debe Eliyahu" (see below); and the utterances in question are found in the midrash itself. The tosafot to Ketubot (106a, *s.v.* והיינו) say that the midrash consists of a large book and a small one. R. Nathan in his "'Aruk" (*s.v.* סדר, ii.) says: "The midrash contains baraitot which the prophet taught to Anan, and consists of two parts, a large seder with thirty chapters, and a small seder with twelve chapters; and all of the Tanna debe Eliyahu cited in the Talmud is to be found in these baraitot." The inner connection between these two midrashim is a loose one, and it is only in sections 5 to 10 that the second refers to the first.

The Underlying Principle of the Book.

The underlying theme of the Tanna debe Eliyahu, which, with many interruptions, runs through the whole work, is the evolution of the world-system. The midrash calls the single periods of the history of man "shiṭṭot" (series). The first series, which deals with the beginning of the world and extends to the moment when man was driven out of Eden, consists of two subsections, (*a*) "Ma'aseh Merkabah" and (*b*) "Ma'aseh Bereshit." The six series of the world-system, however, were created in the divine mind even before any being, with the exception of Israel, existed. They were: (1) the divine law (תורה); (2) hell (גיהנם) and (3) paradise (גן עדן), or punishment and reward in the future world; (4) the throne (כסא הכבוד), or the divine government of the world; (5) the name of the Messiah (שם המשיח), or the restoration of the universe when about to be destroyed; and (6) the Temple (בית המקדש), or the dependence of man upon God. Even before these six foundations, however, Israel was, as stated above, already in being in the divine mind, because without Israel there could have been no Torah (Friedmann, "Seder Eliyahu," p. 161).

The second series embraces the period from the expulsion of man from Eden to the Flood. In the ten generations from Adam to Noah man did not adhere to "meekness," did not do what was right (*ib.* p. 80), but fell lower and lower until he practised violence, theft, immorality, and murder. For this reason his destruction became a necessity (*ib.* p. 190).

The Periods of Jewish History.

The third series extends from the Flood to King Manasseh of Judah. It treats of the time of the study of the Law, of the priestly office, of the kingdom, and of the end of Israel's prosperity through the evil administration of Manasseh. In the days of Abraham the period of "tohu wa-bohu" (confusion) ceases and the 2,000 years of law begin. This time is divided into the following periods: (1) the sojourn of the children of Israel in Egypt, the Exodus, to Joshua; (2) the kingdom of love extending to Samuel; (3) the kingdom of fear, to the time of Elijah; (4) the kingdom of truth, to the time of Jeroboam II.; (5) the time of Israel's salvation from oppression under Hezekiah; (6) from the time of Hezekiah to the reign of Manasseh (see Friedmann, "Mebo," v. 108).

The fourth series is filled with "meekness" (*ib.* p. 163). Whoever studies the Torah receives "meekness" as a reward. In addition there is a second recompense, which is the Mishnah. In this introduction of the Mishnah there is a trace of apology intended for those who believe that only the Torah was delivered on Sinai. The fifth series extends from King Manasseh to the building of the Second Temple (*ib.* p. 163). The last series treats of the future. God, surrounded by all the saints, sits in His bet ha-midrash and counts up the generations of the different periods of time, what they have learned, and what reward they shall receive therefor (*ib.* p. 4). The future of these saints will be like the beginning of the life of man (*ib.* p. 164).

The Three Periods.

These six series are again divided into three main periods: (1) the present world; (2) the Messianic period; and (3) the future world. These are subdivided into: (*a*) 2,000 years of confusion ("tohu"); (*b*) 2,000 years of the Torah; (*c*) 2,000 years of the Messiah; (*d*) inauguration of a general peace; (*e*) the future world (*ib.* p. 115).

Besides this fundamental idea both parts of the midrash emphasize the importance of virtue, of a religious life, and of the study of the Law, and exhort to repentance and almsgiving, greater tolerance toward both Jews and non-Jews, diligent study and respect for scholars, modesty and humility, and the avoidance of non-Jewish manners and customs. The midrash, further, attempts to prove that all human life is based on the two extremes, toil in the sweat of the brow, and the regaining of the freedom of the soul. Hence it begins with the expulsion of Adam from Eden (Gen. iii. 24), and closes with the same theme. The cherubim in Eden are identified with man, and are the symbol of the reward of well-doing; the flaming sword is hell, the punishment for evil-doing. The way to the tree of life is said to be "derek ereẓ" (good behavior); while the guarding of the tree of life is like the guarding of the word of God. By derek ereẓ the midrash understands that which is fitting, useful, and honest; and these three qualities are the fundamental principles upon which the human world-system and society rest. An example of derek ereẓ in this midrash is the following: The princes of the Philistines possessed derek ereẓ, because when the Philistines wished to convey the Ark to the Israelites they would not send it back without sacrifices (I Sam. vi. 3; Friedmann, *l.c.* p. 58). On the other hand, the inhabitants of Beth-shemesh did not possess it, inasmuch as instead of bowing before the Ark they rejoiced and danced before it boldly, so that misfortune came upon them and 50,000 of them fell (*ib.*).

Quality of Derek Ereẓ.

The opposite of derek ereẓ is "to walk in the crooked way," *i.e.*, to do unworthy deeds and to give oneself up to immorality. Yet no nation of the world, with the exception of Egypt, has sunk so low as this. In ordinary life, however, the transgression of a command or prohibition, indecency, or even theft is a most pronounced opposite of derek ereẓ; and every father of a family should strive to preserve those depending on him from these vices, because they belong to those evils which might bring about the destruction of the world.

The twelve chapters of the second part of the midrash are characterized by the fact that the narratives showing why in this world things often go amiss with the good and well with the wicked, are commonly introduced by the words "It happened" (מעשה) or "Once on a time" (פעם אחת). The midrash is sometimes interspersed with very beautiful prayers (see, for example, Friedmann, *l.c.* pp. 6, 18, 19, 28).

The Tanna debe Eliyahu is the only haggadic work which contains a rabbinic-karaitic polemic. In the second chapter of the second part is an account of a meeting of the author with a Karaite, who possesses a knowledge of Scripture, but not of the Mishnah; the differences discussed, however, are not important. The polemical attitude is much more noticeable in ch. xv. of the first part. There the following points are treated in detail: (1) washing the hands (comp. Ḥul. 106a; Shab. 62b; Soṭah 4b); (2) slaughtering (comp. Ḥul. 27a); (3) partaking of human blood (comp. Ker. 20b); (4) prohibition against eating fat (comp. Lev. vii. 23; Ker. 4b; Pinsker, "Liḳḳuṭe Ḳadmoniyyot," p. 20); (5) robbery from a Jew and from a non-Jew (comp. B. Ḳ. 113b); (6) degrees of relationship as bearing on marriage (comp. "Eshkol ha-Kofer," p. 117b); (7) grades of purity (comp. *ib.* p. 111b; Shab. 13a). Unlike other polemics, this one is not couched in acrimonious terms; but it adopts a mild, conciliatory tone.

Composed in the Tenth Century.

As to the time of the composition of the work, all scholars agree in assigning it to the end of the tenth century; but as to the place where it was written, authorities differ. Whereas certain scholars (*e.g.*, Zunz, Rapoport, Bacher, Oppenheim, and Hochmuth) suppose Babylonia or Palestine, Güdemann is of the opinion that the work was written in Italy, or at least that its author must have been an Italian who had traveled a great deal and had been as far as Babylon, who learned there of the polemic between the Rabbinites and Karaites, but who abstained from mentioning Europe or Italy because he considered he would be likely to create a greater impression among his fellow countrymen by relating observations which he had made abroad. Furthermore, the fact that he knew nothing of Babylonia beyond its name shows that he could not have been a native of that region. Derenbourg also places the origin of the work in Rome. Grätz goes farthest of all, by simply identifying the Babylon of the midrash with Rome, and the fights of Gog and Magog described in the work with the devastating invasion of the Hungarians into Italy from 889 to 955. The most radical opponent of this view is Friedmann. For him all arguments concerning the age of the Tanna debe Eliyahu and against its identification with the Seder Eliyahu mentioned in Ket. 10b, are only superficial and only apparently sound; and he accordingly assigns the origin of the work "eo ipso" to Babylonia.

The age of the midrash is approximately ascertainable by three data contained in the book itself. (1) In ch. ii. the author speaks of the seventh century of the 2,000 years of the Messianic period as having passed; this period began in 242 C.E., hence the time of writing must have been the tenth century. (2) The second datum relates to the temporal reckoning of the jubilees, and is treated by Rapoport in "Toledot de-R. Natan," p. 144. (3) The third datum (ch. xxx.) indicates that nine centuries had passed since the destruction of the Temple; hence the last redaction of the midrash falls in the interval between 968 and 984.

Examples of Exegesis.

Of especially original midrashim contained in the work a few may be noticed here. On the passage "and set me down in the midst of the valley which was full of bones" (Ezek. xxxvii. 1-11) it is said, "Instead of 'bones' [עצמות] should be read 'tree of death' [עץ מות]; for it was the same tree which, through Adam's disobedience, brought death to him and to all his descendants" (v. 24). "'And this man went up out of his city yearly' [I Sam. i. 3]: from these words it appears that Elkanah went to Shiloh four times a year, three times in accordance with the legal prescription, and once in addition, which last journey he had assumed voluntarily" (Friedmann, *l.c.* p. 47). "On the day of Adam's death his descendants made a feast, because on account of his age he had long been a burden to himself and to them" (*ib.* p. 81). "'I will not execute the fierceness of mine anger' [Hos. xi. 9]: God has sworn to His people that He will not give them in exchange for another people, nor change them for another nation" (Friedmann, *l.c.* p. 127). "'The fool hath said in his heart, there is no God' [Ps. xiv. 2]: a man may not say in his heart, 'This world is a tohu wa-bohu; I will give myself up to sensual pleasures and will retire from the world'" (xxiii. 127-128). "From the words 'Israel was holiness unto the Lord' [Jer. ii. 3] it follows that the holiness of God, of the Sabbath, and of Israel is the same" (Friedmann, *l.c.* p. 133).

The passages in the Talmud cited in Tanna debe Eliyahu are: Shab. 13a; Pes. 94a, 112a; Meg. 28b; Ḳid. 80b; 'Ab. Zarah 5b, 9a; Sanh. 92a; Tamid 32a. Those cited in the Talmud under "Tanu Rabbanan" and found also in this midrash are: Shab. 88b and Giṭ. 36b = Tanna debe Eliyahu (ed. Friedmann), p. 78; Pes. 49a = *ib.* p. 30; Pes. 49a = *ib.* p. 68; Suk. 52a = *ib.* p. 20; R. H. 18a = *ib.* p. 53; Meg. 14a = *ib.* p. 82; Ḳid. 82a = *ib.* p. 101; B. Ḳ. 97b = *ib.* p. 21; B. B. 90b = *ib.* p. 77; B. B. 147a = *ib.* p. 157; Sanh. 19a = *ib.* p. 147; Sanh. 43b = *ib.* p. 102; Sanh. 109a = *ib.* p. 168; Sheb. 39a = *ib.* p. 132; Yeb. 62b = *ib.* p. 78. Furthermore, in the midrash are found sentences of the following amoraim: Johanan, Joshua b. Levi, R. Abbahu, and Eleazar.

Editions.

The first edition of the midrash appeared at Venice in the year 1598, prepared from a copy dated 1186. In 1677 an edition by Samuel b. Moses Haida, with changes in the text and with a commentary (בעורין דאשא זקוקין דנורא), appeared in Prague. The text itself was presented in a "nusḥa ḥadasha" (new text) and in a "nusḥa yeshana" (old text), being wholly distorted from its original form by Talmudic and cabalistic interpolations. This edition consists of three parts, the first two of which contain the text of the Rabbah and the Zuṭa (thirty-one and twenty-nine chapters respectively). These two parts are preceded by prefaces bearing the titles "Mar Ḳashshisha" or "Sod Malbush ha-Neshamah" (Mystery of the Clothing of the Soul) and "Mar Yanuḳa" or "Sod Ḥaluḳa de-Rabbanan" (Mystery of the Clothing of the Rabbis). Then follows an introduction (common to part ii. and part iii.), with the title "Sha'ar Shemuel" (Gate of Samuel), and a third part consisting mainly of an exegesis of ch. xx.

The following editions are specially to be recommended, namely: that by Jacob b. Naphtali Herz of Brody, with a commentary, "Yeshu'at Ya'aḳob" (Zolkiev, 1798); that by Abraham b. Judah Löb Schick, with the commentary "Me'ore Esh" (Sidlkov, 1835); that by Isaac Elijah b. Samuel Landau, with a commentary, "Ma'aneh Eliyahu" (Wilna, 1840). Among the best editions is the Warsaw one of 1880 containing both texts. The latest edition appeared in Vienna in 1900 and 1903, under the titles "Seder Eliyahu Rabbah" and "Seder Eliyahu Zuṭa," after a Vatican manuscript of the year 1073, critically revised, and with a commentary entitled "Me'ir 'Ayin," and a voluminous introduction by M. Friedmann. In this edition Seder Eliyahu Zuṭa is divided into fifteen chapters.

W. B. S. O.

TANNAIM AND AMORAIM: The name "tanna" is derived from the Aramaic "teni" or "tena" (= "to teach"), and designates in general a teacher of the oral law, and in particular one of the sages of the Mishnah, those teachers of the oral law whose teachings are contained in the Mishnah and in the Baraita. The term was first used in the Gemara to indicate a teacher mentioned in the Mishnah or in a baraita, in contradistinction to the later authorities, the Amoraim. Not all the teachers of the oral law who are mentioned in the Mishnah are called tannaim, however, but only those belonging to the period beginning with the disciples of Shammai and Hillel and ending with the contemporaries of Judah ha-Nasi I. The authorities preceding that period are called "zeḳenim ha-rishonim" (the former elders). In the time of the Amoraim the name "tanna" was given also to one well versed in the Mishnah and the other tannaitic traditions.

The Name.

The period of the Tannaim, which lasted about 210 years (10-220 C.E.), is generally divided by Jewish scholars into five or six sections or generations, the purpose of such division being to show which teachers developed their principal activity contemporaneously. Some of the tannaim, however, were active in more than one generation. The following is an enumeration of the six generations and of the more prominent tannaim respectively belonging to them:

First Generation (10-80 C.E.): Principal tannaim: the Shammaites (Bet Shammai) and the Hillelites (Bet Hillel), 'Aḳabya b. Mahalaleel, Rabban Gamaliel the Elder, Ḥanina, chief of the priests ("segan ha-kohanim"), Simeon b. Gamaliel, and Johanan b. Zakkai.

Second Generation (80-120): Principal tannaim: Rabban Gamaliel II. (of Jabneh), Zadok, Dosa b. Harkinas, Eliezer b. Jacob, Eliezer b. Hyrcanus, Joshua b. Hananiah, Eleazar b. Azariah, Judah b. Bathyra.

Third Generation (120-140): Principal tannaim: Ṭarfon, Ishmael, Akiba, Johanan b. Nuri, Jose ha-Gelili, Simeon b. Nanos, Judah b. Baba, and Johanan b. Baroḳa. Several of these flourished in the preceding period.

Fourth Generation: This generation extended from the death of Akiba (*c.* 140) to that of the patriarch Simeon b. Gamaliel (*c.* 165). The teachers belonging to this generation were: Meïr, Judah b. Ilai, Jose b. Ḥalafta, Simeon b. Yoḥai, Eleazar b. Shammua, Johanan ha-Sandalar, Eleazar b. Jacob, Nehemiah, Joshua b. Ḳarḥa, and the above-mentioned Simeon b. Gamaliel.

Fifth Generation (165-200): Principal tannaim: Nathan ha-Babli, Symmachus, Judah ha-Nasi I., Jose b. Judah, Eleazar b. Simeon, Simeon b. Eleazar.

Sixth Generation (200-220): To this generation belong the contemporaries and disciples of Judah ha-Nasi. They are mentioned in the Tosefta and the Baraita but not in the Mishnah. Their names are: Polemo, Issi b. Judah, Eleazar b. Jose, Ishmael b. Jose, Judah b. Laḳish, Ḥiyya, Aḥa, Abba (Arika). These teachers are termed "semi-tannaim"; and therefore some scholars count only five generations of tannaim. Christian scholars, moreover, count only four generations, reckoning the second and third as one (Strack, "Einleitung in den Talmud," pp. 77 *et seq.*).

For the term "amora" and a list of the generations of amoraim, see AMORA.

W. B. J. Z. L.

The following list enumerates all the zeḳenim ha-rishonim, tannaim, and amoraim mentioned in the Talmudic-Midrashic literature, those who are well known and frequently mentioned as well as those whose names occur once only in the Mishnah and Tosefta or in the Talmud and Midrash. To this pretannaitic period belong the so-called "pairs" ("zugot") of teachers: Simeon the Just and Antigonus of Soko; Jose ben Joezer and Jose ben Johanan; Joshua ben Peraḥyah and Nittai of Arbela; Judah ben Tabbai and Simeon ben Sheṭaḥ; Shemaiah and Abtalion; Hillel and Shammai.

Stars indicate that separate articles appear under the names so marked.

J. L. G.

TANNENBAUM, ABNER: Yiddish and Hebrew journalist; born at Schirwind, East Prussia, March 1, 1848. He studied in Kamenetz-Podolsk and in the Kishinef Lyceum, and was awarded a diploma by the Imperial University of Odessa for his historical and geographical studies. He chose a commercial career, and, after having held various positions, became manager of a wholesale drug business. In 1887 he emigrated to New York, where he devoted himself to journalism.

Tannenbaum has translated into Yiddish several of the works of Jules Verne, among which may be mentioned "Kalt und Warm," London, 1895, and "Gesucht und Gefunden," New York, 1896. He is especially known as a popularizer, among Russian immigrants, of the secular sciences, having written extensive treatises on historical topics, natural science, etc., in almost all Yiddish periodicals of the United States. He is the author of a "History of the Jews in America" (2 parts, New York, 1905) and of a "Commercial, Industrial, and Agricultural Geography of the United States" (*ib.* 1905).

J. L. La.

TANUJI, ISHMAEL HA-KOHEN: Egyptian rabbi and author of the sixteenth century. He was a descendant of the Tanuji (from "Tanjah" =

"Tangiers") family of Tunis, to which belonged R. Samuel ha-Kohen and his son R. Judah, both rabbis of Jerusalem. In 1543 he wrote a book, popular in style, entitled "Sefer ha-Zikkaron" and containing halakic decisions on current topics (Ferrara, 1555). As the chief of the Egyptian rabbis he appended his name to an approbation of the responsa of R. Elijah ben Ḥayyim (Ranaḥ). There still exists in Egypt a synagogue in which Ishmael ha-Kohen Tanuji had been wont to pray, and which is therefore called by his name (see Jew. Encyc. v. 72a, line 1).

Bibliography: Azulai, *Shem ha-Gedolim*, i. 111; Fuenn, *Keneset Yisrael*, p. 674.

G. N. T. L.

TANYA: Collection of ritual laws and customs, published first at Mantua, 1514, then at Cremona, 1565, and later in two other editions. The epigraph of the Mantua edition reads as follows: "'Minhag Abot Sefer Tanya' was terminated in the month of Siwan, 5074 of Creation" (= 1314). This is interpreted by Dukes ("Orient, Lit." v. 219), to mean that the work was originally called "Minhag Abot" and that it was composed in 1314. Buber (introduction to his edition of "Shibbole ha-Leḳeṭ"), however, proves that 1314 is a misprint for 1514, which is the date of the first edition. Steinschneider supposes that the "Minhag Abot" mentioned by Abraham ha-Levi in his treatise "Ha-Hora'ah" (see "Oẓar Neḥmad," ii. 152) is the same as "Tanya." This book is arranged in the same way as the "Shibbole ha-Leḳeṭ," which, as well as its author, Zedekiah ben Abraham, is often quoted. The author of the "Tanya," besides, frequently cites as his teachers Benjamin b. Abraham (Zedekiah's brother) and Judah b. Benjamin; and in certain places the expression "I, Jehiel the scribe," is found. These details gave rise to a discussion among different authorities as to the authorship of the book, which is variously ascribed to Judah b. Benjamin, to a pupil of his, and to Jehiel b. Asher b. Jekuthiel.

Among the opinions of modern scholars that of Osias Schorr may be mentioned, namely, that the "Tanya" is simply a copy of the "Shibbole ha-Leḳeṭ," called "Tanya" after its initial word, but written in such a way as to make it appear the copyist's own composition; *e.g.*, in many places Schorr declares the copyist ascribes this or that to the "Shibbole ha-Leḳeṭ" to make it appear that he took only so much from that work. Where the author of the "Shibbole" refers to "my brother Benjamin" the copyist of the "Tanya" omits the words "my brother." The copyist for the most part confined his attention to the Law, neglecting the customs. He also added extracts from Maimonides' "Yad."

Bibliography: Azulai, *Shem ha-Gedolim*; Benjacob, *Oẓar ha-Sefarim*, p. 657, No. 660; Conforte, *Ḳore ha-Dorot*, p. 21a; Schorr, in *Ẓiyyon*, i. 147–148; *idem*, in *He-Ḥaluẓ*, i. 103–105; Steinschneider, *Cat. Bodl.* col. 2771.

W. B. M. Sel.

TÄNZER, AARON: Austrian rabbi; born at Presburg, Hungary, Jan. 30, 1871; studied at the Presburg Rabbinerschule, and Oriental philology and history at the University of Berlin (Ph.D. 1895). In 1896 he was called to Hohenems as chief rabbi of Tyrol and Vorarlberg; and since 1904 he has been rabbi of Meran (Tyrol). He is the author of "Die Religionsphilosophie Josef Albo's," Frankfort-on-the-Main, 1896; "Der Israelitische Friedhof in Hohenems," Vienna, 1901; "Judenthum und Entwickelungslehre," Berlin, 1903; and "Geschichte der Juden in Tirol und Vorarlberg," vol. i., *ib.* 1903–4.

S.

TAPPUAH: 1. City in the Shefelah, described as lying between the towns of En-gannim and Enam; probably situated north of the Wadi al-Sunṭ, and identical with the modern 'Artuf (Josh. xv. 34). **2.** City in Ephraim, marking the western boundary of the tribe (Josh. xvi. 8). **3.** The land of Tappuah, which belonged, with the exception of the city of the same name, to the tribe of Manasseh (Josh. xvii. 8). It was one of the thirty-one districts whose kings were vanquished by the Jews when they first invaded Palestine (Josh. xii. 17). **4 (En-tappuah).** Southern boundary of the tribe of Manasseh (Josh. xvii. 7). **5.** Son of Hebron (I Chron. ii. 43).

Bibliography: Schwarz, *Palestine*, pp. 89, 102, Philadelphia, 1850.

J. S. O.

TARASCON (Hebrew, טרשקון, טאראשקן): City in the department of Bouches-du-Rhône, France. In 1276 King Charles I. intervened in behalf of its Jews against the inquisitors, who had obliged them to enlarge the wheel-shaped badge worn by them, and had extorted large sums from them in the guise of a fine. Several Jews who were expelled from Languedoc in 1306 went to Tarascon, where they were cordially received; but in 1308 Charles II., on the complaint of Christians, forbade Jews to hold public office. Queen Jeanne, however, took the Tarascon Jews under her protection (1348 and 1378); and her daughter, Marie de Blois, treated them still more favorably, making no distinction whatever between her Jewish and her Christian subjects (1390). Louis II. of Anjou exempted them (1400) from all new taxes, and granted them a special letter of protection ("sauvegarde"), by the terms of which the other inhabitants of Tarascon were enjoined to provide for their defense and for the preservation of their property. Louis III. appointed conservators of these privileges in order to remove the Jews from the arbitrary jurisdiction of the courts.

In 1454 King René issued a decree mitigating the severity of the edict of Charles I. relative to the wearing of the badge; but in 1460, at the request of the syndics, he ordered that no Jew should thenceforth hold public office, on pain of a fine of fifty marks in silver. In 1475 he obliged the Jews of the city to pay him a subsidy of 8,000 florins. Owing to their letter of protection of 1400, the Jews of Tarascon did not suffer during the bloody excesses committed in Provence in 1484 by a band of reapers; and in 1489 the municipal council, in conformity with the "sauvegarde," took steps which enabled the Jewish inhabitants to escape from the populace, which had attacked their quarter.

This quarter was commonly called the "Carrière des Juifs," or simply the "Carrière," though the names "Juzataria" and "Juateria" also occur occasionally. It included, on the one side, the portion of the Rue du Château between the royal court and the château of King René, and, on the other side, the portion which separated the traverse, now the Rue des Juifs, from the monastery of the Benedictines of St. Honorat. When some Jews settled outside of the Carrière a royal decree of 1377 ordered them to return to their former domicil, on pain of a fine of 100 livres. In case of necessity, however, the Jews were permitted to go outside as far as the Rue des Baptêmes, but the condition was made that they should construct no gate or other opening to this street near the Church of St. Marthe.

The exact site of the synagogue is unknown. In 1368 the community paid to the public treasury a tax of 10 oboles for the possession of this building. In the Middle Ages the community had two cemeteries, one of them situated on the island of Tarnègue near the old commandery of St. Antoine, and the other outside of the Condamine gate between the road to Maillane and that to St. Georges. In 1526 the latter became the property of the city, which erected a pest-house on the plot.

The following scholars of Tarascon are known: R. Eliezer and his brother Joshua, Solomon of Salon, Israel of Valabrègue, Immanuel ben Jacob (Bonfils), Joseph Caspi, Don Bonafous, Samuel b. Judah and his brother En Bondavi of Marseilles; also the following physicians: Comprat Asser, Bonjuhas Guassin, Rossel, Ferrier, Bellant, Nathan, Jacob of Lunel, Orgier, Maystre Aron, Mosse Meyr, and Joseph b. Joseph.

J.* 1889); Nostradamus, *Histoire de Provence*, part 6; Renan-Neubauer, *Les Rabbins Français*, pp. 477, 561, 688; idem, *Les Ecrivains Juifs Français*, pp. 692 *et seq.*; *Revue des Langues Romanes*, 1897, pp. 224-226.

S. S. K.

ṬARFON (Greek, Τρύφων; Yer. Bik. 64c): Tanna of the third generation, living in the period between the destruction of the Temple and the fall of Bethar. He was of priestly lineage, and he expressly states that he officiated in the Temple with the priests (Yer. Yoma iii. 7); in the pride of his rank he used to demand the heave-offering even after the Temple had fallen (Tosef., Ḥag. iii., end). His devotion to his mother was such that he used to place his hands beneath her feet when she was obliged to cross the courtyard barefoot (Ḳid. 61b), while his generosity made him return to the father the redemption-money for the first-born, although it was his priestly perquisite (Tosef., Bek. vi. 14). Once, in a time of famine, he took 300 wives so that they might, as wives of a priest, exercise the right of sharing in the tithes (Tosef., Ket. v. 1). On one occasion, when from his window he saw a bridal procession evidently of the poorer classes, he requested his mother and sister to anoint the bride that the groom might find more joy in her (Ab. R. N. xli., end). Although he was blessed with riches, he possessed extraordinary modesty; in one instance he deeply regretted having mentioned his name in a time of peril, since he feared that in using his position as teacher to escape from danger he had seemingly violated the rule against utilizing knowledge of the Torah for practical ends (Ned. 62b).

As Halakist.

Although as a halakist R. Ṭarfon was an adherent of the school of Shammai, only two passages describe him as following its teachings (Yeb. 15b; Yer. Sheb. iv. 20), and he always inclined toward leniency in the interpretation of those halakot of Shammai which had not actually been put into practise (Kil. v. 6; Yeb. xv. 6; Ket. v. 2); often he decided in direct opposition to the Bet Shammai when it imposed restrictions of excessive severity (Yeb. xv. 47; Naz. v. 5). R. Ṭarfon was also the author of independent halakot, one being on the form of benediction when quenching thirst with water (Ber. vi. 8), and another on the benediction for the eve of the Passover (Pes. x. 6). The majority of his rulings, however, deal with subjects discussed in the orders Nashim, Ḳodashim, Ṭohorot, and Neziḳin. In those found in Ṭohorot his tendency is always toward severity, while in Neziḳin are found his sayings on lost objects and usufruct (B. M. iv. 3, v. 7), the payment of debts, the money due a woman when she receives a bill of divorce (Ket. ix. 2, 3), and damage caused by cattle (B. Ḳ. ii. 5, and the baraitot connected with this passage, p. 26). If he had belonged to the Sanhedrin, the death-penalty would have been abolished (Mak. i. 10; comp. Frankel, "Der Gerichtliche Beweis," p. 48, Berlin, 1846). R. Ṭarfon engaged in halakic controversies with R. Akiba (Ket. 84a; Pes. 117, 118), but the two agreed with regard to a tosefta (Miḳ. i.; Ḳid. 66; Yer. Yoma i. 1; Ter. iv. 5; Mak. i. 10; Ker. v. 3), with R. Simeon (Men. xii. 5; possibly, however, an error for R. Akiba), and R. Eleazar ben Azariah (Yad. iv. 3). Other sayings of his have been preserved which were accepted without controversy (Pes. 117a, 118a; Giṭ. 83a); and two of his apothegms are especially noteworthy as indicating his intense earnestness: "The day is short, the labor vast, the toilers idle, the reward great, and the Master urgent" (Ab. i. 15); "It is not thy task to complete the work, neither art thou a free man that thou canst withdraw thyself; if thou hast learned much, great shall be thy reward, for He that doth hire thee will surely repay thee for thy toil; yet the requital of the pious is in the future" (Ab. i. 17). In the discussion as to the relative importance of theory and practise, Ṭarfon decided in favor of the latter.

Incidents of His Life.

When Eliezer ben Hyrcanus was sick, and a deputation was sent to him, R. Ṭarfon acted as the spokesman, addressing him as follows: "Master, thou art of more worth to Israel than the sun, for that gives light only on earth, while thou dost shed thy rays both in this world and in the world to come" (Sanh. 101a; Mek., Baḥodesh, xi. [ed. Weiss, p. 80a]). In like manner he led a number of scholars in a visit to R. Ishmael ben Elisha, upon the death of the sons of the latter (M. Ḳ. 28b); and when Jose the Galilean, R. Ṭarfon, R. Eliezer ben Azariah, and R. Akiba assembled to decide on the disputed sayings of Eliezer ben Hyrcanus, Ṭarfon was the first speaker (Tosef., Giṭ. vii.; Giṭ. 83a). He was one of those whose names occurred in the deposition of Gamaliel II., and it is expressly stated that he was addressed as "brother" by the other scholars. He is said to have dwelt at Jabneh, although it is evident that he lived also in Lydda (Ta'an. iii. 9; B. M. iv. 3; Ḥag. 18a).

R. Ṭarfon was accustomed to open his haggadic discourses with a halakic question (Tosef., Ber. iv. 16). In his own upper chamber at Jabneh it was decided that benevolence should be practised according to the injunction of Ps. cvi. 3 (Esth. R. vi. 2, 5). Ṭarfon held that God did not allow His glory to overshadow Israel until the people had fulfilled a task (Ab. R. N. ii.), and that death can overtake one only when he is idle (comp. Gen. xlix. 33).

Domestic Life.

On festivals and holy days R. Ṭarfon was accustomed to delight his wife and children by preparing for them the finest fruits and dainties (Yer. Pes. 37b). When he wished to express approval of any one, he would say, "'A knop and a flower' [Ex. xxv. 33]; thou hast spoken as beautifully as the adornments of the candlestick in the Temple"; but when it was necessary to upbraid another, he would say, "'My son shall not go down with you'" (Gen. R. xci.), repeating the words of Jacob to his sons in Gen. xlii. 38. When he perceived that his two nephews, whom he was instructing personally, were becoming careless, he interrupted his lecture and regained their attention by saying, "Then again Abraham took a wife, and her name was Johanna" (instead of Keturah; Gen. xxv. 1), whereupon his pupils interrupted him by exclaiming, "No, Keturah!" (Zeb. 26b). His chief scholars were R. Judah ('Er. 45b; Yeb. 101b), Simeon Shezari (Men. 31b), and Judah ben Isaiah ha-Bosem (Ḥul. 55b).

R. Ṭarfon was extremely bitter against those Jews who had been converted to the new faith; and he swore that he would burn every book of theirs which should fall into his hands (Shab. 116a), his feeling being so intense that he had no scruples against destroying the Gospels, although the name of God occurred frequently in them.

Tan.* pp. 342–352; Ḥamburger, *R. B. T.* ii. 1196; Derenbourg, *Hist.* pp. 379 *et seq.* A list of the mishnayot which mention R. Ṭarfon is given by Schürer, *Gesch.* ii. 378, note 137; of the Tosefta passages in which his name occurs, by Zuckermandel in his edition of the Tosefta; of similar sections in the Mekilta, Sifra, and Sifre, by Hoffmann, *Zur Einleitung in die Halachischen Midraschim*, p. 85, Berlin, 1887.

W. B. S. O.

TARGUM: The Aramaic translation of the Bible. It forms a part of the Jewish traditional literature, and in its inception is as early as the time of the Second Temple. The verb תרגם, from which the noun תרגום is formed, is used in Ezra iv. 7 in reference to a document written in Aramaic, although "Aramit" (A. V. "in the Syrian tongue") is added. In mishnaic phraseology the verb denotes a translation from Hebrew into any other language, as into Greek (see Yer. Ḳid. 59a, line 10, and Yer. Meg. 71c, line 11; both statements referring to the Greek version of Aquila); and the noun likewise may refer to the translation of the Biblical text into any language (see Meg. ii. 1; Shab. 115a). The use of the term "Targum" by itself was restricted to the Aramaic version of the Bible (see Bacher, "Die Terminologie der Tannaiten," pp. 205 *et seq.*). In like manner, the Aramaic passages in Genesis, Jeremiah, Daniel, and Ezra were briefly called "Targum," while the Hebrew text was called "Miḳra" (see Yad. iv. 5; Shab. 115b).

Name.

As an interpretation of the Hebrew text of the Bible the Targum had its place both in the synagogal liturgy and in Biblical instruction, while the reading of the Bible text combined with the Targum in the presence of the congregation assembled for public worship was an ancient institution which dated from the time of the Second Temple, and was traced back to Ezra by Rab when he interpreted the word "meforash" (Neh. viii. 8) as referring to the Targum (Meg. 3a; Ned. 37b; comp. Yer. Meg. 74d, line 48; Gen. R. xxxvi., end). The rules for reading the Targum are formulated in the Halakah (see Meg. iii. and the Talmud *ad loc.*; Tosef., Meg. iv.). The Targum was to be read after every verse of the parashiyyot of the Pentateuch, and after every third verse of the lesson from the Prophets. Excepting the Scroll of Esther, which might be read by two persons in turn, only one person might read the Targum, as the Pentateuch or prophetic section also was read by a single person. Even a minor might read the Targum, although it was not fitting for him to do so when an adult had read the text. Certain portions of the Bible, although read, were not translated (as Gen. xxxv. 22), while others were neither read nor translated (as Num. vi. 24–26; II Sam. xi.–xiii.). The reader was forbidden to prompt the translator, lest any one should say that the Targum was included in the text of the Bible (Ulla in Meg. 32a). With regard to the translation of Biblical passages, Judah ben Ilai, the pupil of Akiba, declared that whosoever rendered a verse of the Bible in its original form was a liar, while he who made additions was a blasphemer (Tosef., Meg., end; Ḳid. 49a; comp. the geonic responsum in Harkavy, "Responsen der Geonim," pp. 124 *et seq.*, and the quotation from Midr. ha-Gadol in "J. Q. R." vi. 425). A passage in Ab. R. N. (Recension B, xii. [ed. Schechter, p. 24]) referring to R. Akiba's early training says that he studied the Bible and the Targum; but allusions to the Targum as a special subject of study in connection with the Bible are excessively rare. It must be assumed, however, that the Targum was an integral part of the Biblical course of study designated as "Miḳra"; and Judah b. Ilai declared that only he who could read and translate the Bible might be regarded as a "ḳaryana," or one thoroughly versed in the Bible (Ḳid. 49a). In Sifre, Deut. 161 the Targum is mentioned as a branch of study intermediate between the Miḳra and the Mishnah.

The professional translator of the text of the Bible in the synagogue was called "targeman" ("torgeman," "metorgeman"; the common pronunciation being Meturgeman; see Meg. iv. 4). His duties naturally formed part of the functions of the communal official ("sofer") who had charge of Biblical instruction (see Yer. Meg. 74d). Early in the fourth century Samuel ben Isaac, upon entering a synagogue, once saw a teacher ("sofer") read the Targum from a book, and bade him desist.

Liturgical Use.

This anecdote shows that there was a written Targum which was used for public worship in that century in Palestine, although there was no definitely determined and generally recognized Targum, such as existed in Babylonia. The story is told (Yer. Ber. 9c) that Jose b. Abin, an amora of the second half of the fourth century, reprehended those who read a Targum to Lev. xxii. 28 which laid a biased emphasis on the view that the command contained in that verse was based on God's mercy (this same paraphrase is still found in the Palestinian Targum); see also the statements on the erroneous translation of Ex. xii. 8, Lev. vi. 7, and Deut. xxvi. 4 in Yer. Bik. 65d; as well as Yer. Kil. viii., end, on Deut. xiv. 5; and Meg. iii. 10 on Lev. xviii. 21. In addition to the anecdotes mentioned above, there are earlier indications that the Targum was committed to writing, although for private reading only. Thus, the Mishnah states (Yad. iv. 5) that portions of the text of the Bible were "written as a Targum," these doubtless being Biblical passages in an Aramaic translation; and a tannaitic tradition (Shab. 115a; Tosef., Shab. xiv.; Yer. Shab. 15c; Massek. Soferim v. 15) refers to an Aramaic translation of the Book of Job which existed in written form at the time of Gamaliel I., and which, after being withdrawn from use, reappeared in the lifetime of his grandson Gamaliel II. The Pentateuchal Targum, which was made the official Targum of the Babylonian schools, was at all events committed to writing and redacted as early as the third century, since its Masorah dates from the first half of that century. Two Palestinian amoraim of the same century urged the individual members of the congregation to read the Hebrew text of the weekly parashah twice in private and the Targum once, exactly as was done in public worship: Joshua ben Levi recommended this practise to his sons (Ber. 8b), while Ammi, a pupil of Johanan, made it a rule binding on every one (*ib.* 8a). These two dicta were especially instrumental in authorizing the custom of reciting the Targum; and it was considered a religious duty even in later centuries, when Aramaic, the language of the Targum, was no longer the vernacular of the Jews. Owing to the obsolescence of the dialect, however, the strict observance of the custom ceased in the days of the first geonim.

Disuse.

About the middle of the ninth century the gaon Naṭronai ben Hilai reproached those who declared that they could dispense with the "Targum of the scholars" because the translation in their mother tongue (Arabic) was sufficient for them (see Müller, "Einleitung in die Responsen der Geonen," p. 106).

At the end of the ninth or in the beginning of the tenth century Judah ibn Ḳuraish sent a letter to the community of Fez, in which he reproved the members for neglecting the Targum, saying that he was surprised to hear that some of them did not read the Targum to the Pentateuch and the Prophets, although the custom of such a perusal had always been observed in Babylonia, Egypt, Africa, and Spain, and had never been abrogated. Hai Gaon (d. 1038) was likewise much astonished to hear that the reading of the Targum had been entirely abandoned in Spain, a fact which he had not known before (Müller, *l.c.* p. 211); and Samuel ha-Nagid (d. 1056) also sharply criticized the scholars who openly advocated the omission of the reading of it, although according to him the Targum was thus neglected only in the northern provinces of that country (see the responsum in Berliner, "Onḳelos," ii. 169). As a matter of fact, however, the custom did entirely cease in Spain; and only in southern Arabia has it been observed until the present time (see Jacob Saphir, "Eben Sappir," i. 53b; Berliner, *l.c.* p. 172), although the Targum to the hafṭarot, together with introductions and poems in Aramaic, long continued to be read in some rituals (see Zunz, "G. V." pp. 410, 412; *idem*, "Literaturgesch." pp. 21 *et seq.*; *idem*, "Ritus," pp. 53, 60 *et seq.*, 81; Bacher, in "Monatsschrift," xxii. 220–223). In the synagogues of Bokhara the Persian Jews read the Targum, together with the Persian paraphrase of it, to the hafṭarah for the last day of Passover (Isa. x. 32–xii.; see "Zeit. für Hebr. Bibl." iv. 181).

The Aramaic translations of the Bible which have survived include all the books excepting Daniel and Ezra (together with Nehemiah), which, being written in great part in Aramaic, have no Targum, although one may have existed in ancient times.

Targumim to the Pentateuch: 1. Targum Onḳelos or **Babylonian Targum:** The official Targum to the Pentateuch, which subsequently gained currency and general acceptance throughout the Babylonian schools, and was therefore called the "Babylonian Targum" (on the tosafistic name "Targum Babli" see Berliner, *l.c.* p. 180; "Mordekai" on Giṭ. ix., end, mentions an old "Targum Babli" which was brought from Rome). The title "Targum Onḳelos" is derived from the well-known passage in the Babylonian Talmud (Meg. 3a) which discusses the origin of the Targumim: "R. Jeremiah [or, according to another version, R. Ḥiyya bar Abba] said: 'The Targum to the Pentateuch was composed by the proselyte Onḳelos at the dictation of R. Eliezer and R. Joshua.'" This statement is undoubtedly due to error or ignorance on the part of the scholars of Babylonia, who applied to the Aramaic translation of the Pentateuch the tradition current in Palestine regarding the Greek version of Aquila. According to Yer. Meg. 71c, "Aquila the proselyte translated the Pentateuch in the presence of R. Eliezer and R. Joshua, who praised him in the words of Ps. xlv. 3." In this passage, moreover, R. Jeremiah is described as transmitting the tradition on the authority of R. Ḥiyya bar Abba. There is no doubt that these accounts coincide; and the identity of אונקלוס הגר and עקילס הגר is also clear, so that Onḳelos and Aḳylas (Aquila) are one and the same person (but see Onḳelos). In the Babylonian Talmud only the first form of the name occurs; the second alone is found in the Palestinian Talmud; while even the Babylonian Talmud mentions Onḳelos as the author of the Targum only in the passage cited. The statements referring to Onḳelos as the author of the Aramaic translation of the Pentateuch originated in the post-Talmudic period, although they are based entirely on Meg. 3a. The first citation of a targumic passage (on Gen. xlv. 27) with the direct statement "Onḳelos has translated" occurs in Pirḳe R. El. xxxviii. The gaon Sar Shalom, writing in the ninth century, expressed himself as follows on the Targum Onḳelos: "The Targum of which the sages spoke is the one which we now have in our hands; no sanctity attaches to the other Targumim. We have heard it reported as the tradition of ancient sages that God wrought a great thing [miracle] for Onḳelos when He permitted him to compose the Targum." In a similar fashion Maimonides speaks of Onḳelos as the bearer of ancient exegetic traditions and as a thorough master of Hebrew and Aramaic (see Bacher, "Die Bibelexegese Moses Maimunis," pp. 38-42). The designation "Targum Onḳelos" was accordingly established in the early portion of the geonic period, and can no longer be effaced from the terminology of Jewish learning.

Babylonian Influence.

The accepted Targum to the Pentateuch has a better claim to the title "Targum Babli" (Babylonian Targum), as has already been explained. It is noteworthy, moreover, that the Jews of Yemen received this Targum, like that to the Prophets, with the Babylonian punctuation (see Merx, "Chrestomathia Targumica"); and the colophon of a De Rossi codex states that a Targum with Babylonian punctuation was brought to Europe (Italy) from Babylon in the twelfth century, a copy with the Tiberian punctuation being made from it (see Berliner, *l.c.* ii. 134). In the Babylonian Talmud the accepted Targum is called "our Targum," thus connoting the Targum of Babylonia or of the Babylonian academies (Ḳid. 49a, "Targum didan," for which Maimonides, in his "Yad," Ishut, viii. 4, substitutes "Targum Onkelos"). Passages from the Targum are cited with great frequency in the Babylonian Talmud with the introductory remark "As we translate" (Berliner *l.c.* p. 112), and the Babylonian geonim also speak of "our Targum" as contrasted with the Palestinian Targum (see Hai Gaon in Harkavy, *l.c.* Nos. 15, 248).

The Targum Onḳelos, moreover, shows traces of Babylonian influence in its language, since its vocabulary contains: (1) Aramaic words which occur elsewhere in the Babylonian vernacular, *e.g.*, the Hebrew ראה ("to see") is always translated by **חזא**, and not by the Palestinian **חמא**, while the Hebrew **סביב** ("round about") is rendered by **חזור חזור** and not by **סחור סחור**; (2) Aramaic words used to render Greek words found in the Palestinian Targum; (3) a few Persian words, including "naḥshirkan" (hunter; Gen. xxv. 27); and "enderun" (*ib.* xliii. 30) instead of the Greek *κοιτών* found in the Palestinian Targum. These peculiarities, however, justify only the assumption that the final redaction of the Targum Onḳelos was made in Babylonia; for its diction does not resemble in any other respects the Aramaic diction found in the Babylonian Talmud; indeed, as Nöldeke has shown ("Mandäische Grammatik," p. xxvii.), "the official Targum, although redacted in Babylonia, is composed in a dialect fundamentally Palestinian." This statement is confirmed by the text of the Targum Onḳelos, by the results of historical investigations of its origin, and by a comparison of it with the Palestinian Targum. These researches into its history show that the Targum which was made the official one was received by the Babylonian authorities from Palestine, whence they had taken the Mishnah, the Tosefta, and the halakic midrashim on the Pentateuch. The content of the Targum shows, moreover, that it was composed in Palestine in the second century; for both in its halakic and in its haggadic portions it may be traced in great part to the school of Akiba, and especially to the tannaim of that period (see F. Rosenthal in "Bet Talmud," vols. ii.-iii.; Berliner, *l.c.* p. 107). The Targum Onḳelos can not be compared unqualifiedly with the Palestinian Targum, however, since the latter has been preserved only in a much later form; moreover the majority of those fragments which are earliest seem to be later than the redaction of the Targum Onḳelos. Yet even in this form the Palestinian Targum to the Pentateuch furnishes sufficient evidence that the two Targumim were originally identical, as is evident from many verses in which they agree word for word, such as Lev. vi. 3, 4, 6-7, 9, 11, 18-20, 22-23. The difference between the two is due to two facts: (1) the Pentateuchal Targum of the tannaitic period was subjected to a thorough and systematic revision, which may have taken place in Palestine, this revision of subject-matter being followed by a textual revision to make it conform with the vernacular of the Babylonian Jews; and (2) the version of the Targum resulting from this double revision was accepted and committed to writing by the Babylonian academies.

Peculiarities.

Despite the fact that the Targum was thus reduced to a fixed form in Babylonia, the Palestinian meturgemanim had full license to revise and amplify it, so that the final redaction as it now exists in the so-called "Targum pseudo-Jonathan" (and this is true in even a greater degree of the "Fragmenten-Targum" mentioned below), though it was made as late as the seventh century, approximates the original Targum much more closely both in diction and in content, and includes many elements earlier than the Targum bearing the name of Onḳelos and belonging in its final form to the third century.

The Masorah on the Targum Onḳelos is first mentioned in the "Patshegen," a commentary on this same Targum, written in the thirteenth century; it was edited by Berliner (1877), and reedited in alphabetical order by Landauer ("Letterbode," viii., ix.). This Masorah contains statements concerning the divergencies between the schools of Sura and Nehardea, exactly as the Talmud (Zeb. 54a; Sanh. 99b) alludes to controversies between Rab and Levi over individual words in the Targum. The system followed in the revision of the subject-matter which resulted in the Targum Onḳelos becomes clear when the latter is compared with the Palestinian Targum. The principal object being to conform the Targum as closely as possible to the original text both in diction and in content, explanatory notes were omitted, and the Hebrew words were translated according to their etymological meaning, although the geographical names were retained in their Hebrew form almost without exception, and the grammatical structure of the Hebrew was closely followed. The paraphrastic style of translation affected by the Targumim generally, in order to obviate all anthropomorphisms in reference to God, is observed with special care in the Targum Onkelos, which employs paraphrases also in the poetic sections of the Pentateuch and in many other cases. In some instances the original paraphrase is abbreviated in order that the translation may not exceed the length of the text too greatly; consequently this Targum occasionally fails to represent the original, as is evident from paraphrases preserved in their entirety in the Palestinian Targum, as in the case of Gen. iv. 7, 10; xlix. 3, 22; Ex. xiv. 15; Num. xxiv. 4; and Deut. xxix. 17. An example of an abbreviated paraphrase is found also in the Targum Onkelos to Deut. i. 44, as compared with the paraphrase in Soṭah 48b made by a Babylonian amora of the third century.

Supposed Authorship.

2. **The Palestinian Targum (Targum Yerushalmi):** A responsum of Hai Gaon, already cited with reference to the Targumim, answers the question concerning the "Targum of the Land of Israel [Palestine]" in the following words: "We do not know who composed it, nor do we even know this Targum, of which we have heard only a few passages. If there is a tradition among them [the Palestinians] that it has been made the subject of public discourse since the days of the ancient sages [here follow the names of Palestinian amoraim of the third and fourth centuries], it must be held in the same esteem as our Targum; for otherwise they would not have allowed it. But if it is less ancient, it is not authoritative. It is very improbable, however, in our opinion, that it is of later origin" (comp. "R. E. J." xlii. 235). The following statement is quoted ("Kol Bo," § 37) in the name of R. Meïr of Rothenburg (13th cent.) with reference to the Targum: "Strictly speaking, we should recite the weekly section with the Targum Yerushalmi, since it explains the Hebrew text in fuller detail than does our Targum; but we do not possess it, and we follow, moreover, the custom of the Babylonians." Both these statements indicate that the Palestinian Targum was rarely found in the Middle Ages, although it was frequently quoted after the eleventh century (see Zunz, "G. V." pp. 66 *et seq.*), especially in the "'Aruk" of Nathan b. Jehiel, which explains many words found in it. Another Italian, Menahem b. Solomon, took the term "Yerushalmi" (which must be interpreted as in the title "Talmud Yerushalmi") literally, and quoted the Palestinian Targum with the prefatory remark, "The Jerusalemites translated," or "The Targum of the People of the Holy City." After the fourteenth century Jonathan b. Uzziel, author of the Targum to the Prophets, was believed to have been the author of the Palestinian Targum to the Pentateuch also, the first to ascribe this work to him being Menahem Recanati in his commentary on the Pentateuch. This error was probably due to an incorrect analysis of the abbreviation ת"י (= "Targum Yerushalmi"), which was supposed to denote "Targum Jonathan." The statement in the Zohar (i. 89a, on Gen. xv. 1) that Onkelos translated the Torah, and Jonathan the Miḳra, does not mean, as Ginsburger thinks ("Pseudo-Jonathan," p. viii.), that according to the Zohar Jonathan translated the entire Bible, and thus the Pentateuch; but the word "Miḳra" here refers to the Prophets (see "R. E. J." xxii. 46). It is possible, however, that the view, first advanced by Recanati, that Jonathan composed also a Targum on the Pentateuch, was due to a misinterpretation of the passage in the Zohar. Azariah dei Rossi, who lived in the sixteenth century, states ("Me'or 'Enayim," ed. Wilna, p. 127) that he saw two manuscripts of the Palestinian Targum which agreed in every detail, one of which was entitled "Targum Yerushalmi" and the other "Targum Jonathan b. Uzziel." The editio princeps of the complete Palestinian Targum was printed from the latter (Venice, 1591), thus giving currency to the erroneous title.

Relation to Onkelos.

In addition to the complete Palestinian Targum (pseudo-Jonathan) there exist fragments of the Palestinian Targum termed "Targum Yerushalmi"; but of these fragments, comprised under the generic term "Fragment-Targum," only those were until recently known which were first published in Bomberg's "Biblia Rabbinica" in 1518 on the basis of Codex Vaticanus No. 440. A few years ago, however, Ginsburger edited under the title "Das Fragmententhargum" (Berlin, 1899) a number of other fragments from manuscript sources, especially from Codex Parisiensis No. 110, as well as the quotations from the Targum Yerushalmi found in ancient authors. This work rendered a large amount of additional material available for the criticism of the Palestinian Targum, even though a considerable advance had already been made by Bassfreund in his "Fragmenten-Targum zum Pentateuch" (see "Monatsschrift," 1896, xl.). The general views concerning the Palestinian Targum and its relation to Onḳelos have been modified but slightly by these new publications. Although the relation of the Targum Yerushalmi to Onkelos has already been discussed, it may be added here that the complete Palestinian Targum, as it is found in the pseudo-Jonathan, is not earlier than the seventh century; for it mentions Ayeshah ('A'ishah) (or, according to another reading, Khadija [Ḥadijah]) and Fatima, the wife and daughter of Mohammed, as wives of Ishmael, who was regarded as Mohammed's ancestor. It originated, moreover, at a period when the Targum Onkelos was exercising its influence on the Occident; for the redactor of the Palestinian Targum in this form combined many passages of the two translations as they now exist in the Targum Yerushalmi and the Targum Onkelos (see "Z. D. M. G." xxviii. 69 *et seq.*), besides revealing his dependence on the Onkelos in other respects as well. The fragments of the Targum Yerushalmi are not all contemporaneous; and many passages contain several versions of the same verses, while certain sections are designated as additions ("tosefta"). The text of the majority of the fragments is older than the pseudo-Jonathan; and these remnants, which frequently consist of a single word only or of a portion of a verse, have been fused according to a principle which can no longer be recognized; but they may have consisted in part of glosses written by some copyist on the margin of the Onḳelos, although without system and thus without completeness. Many of these fragments, especially the haggadic paraphrases, agree with the pseudo-Jonathan, which may, on the other hand, be older than some of them. In like manner, haggadic additions were made in later centuries to the text of the Targum, so that an African manuscript of the year 1487 alludes to the capture of Constantinople by the Turks in 1453. Early in the twelfth century Judah ben Barzillai wrote as follows with regard to these additions: "The Palestinian Targum contains haggadic sayings added by those who led in prayer and who also read the Targum, insisting that these sayings be recited in the synagogue as interpretations of the text of the Bible." Despite the numerous additions to the Palestinian Targum, and notwithstanding the fact that the majority of the fragments are of later date than Onḳelos, both pseudo-Jonathan and the fragments contain much that has survived from a very early period; indeed, the nucleus of the Palestinian Targum is older than the Babylonian, which was redacted from it.

Targum to the Prophets: 1. The Official Targum to the Prophets: Like the Targum Onḳelos to the Pentateuch the Targum to the Books of the Prophets gained general recognition in Babylonia in the third century; and from the Babylonian academies it was carried throughout the Diaspora. It originated, however, in Palestine, and was then adapted to the vernacular of Babylonia; so that it contains the same linguistic peculiarities as the Targum Onḳelos, including sporadic instances of Persian words (*e.g.*, "enderun," Judges xv. 1, xvi. 12; Joel ii. 16; "dastaka" = "dastah," Judges iii. 22). In cases where the Palestinian and Babylonian texts differ, this Targum follows the latter ("madinḥa'e"; see Pinsker, "Einleitung in die Babylonische Punktuation," p. 124). It originated, like the Targum to the Pentateuch, in the reading, during the service, of a translation from the Prophets, together with the weekly lesson. It is expressly stated in the Babylonian Talmud that the Targum accepted in Babylonia was Palestinian in origin; and a tannaitic tradition is quoted in the passage already cited from Megillah (3a), which declares that the Targum to the Prophets was composed by Jonathan b. Uzziel "from the mouths of Haggai, Zechariah, and Malachi," thus implying that it was based on traditions derived from the last prophets. The additional statements that on this account the entire land of Israel was shaken and that a voice from heaven cried: "Who hath revealed my secrets to the children of men?" are simply legendary reflections of the novelty of Jonathan's undertaking, and of the disapprobation which it evoked. The story adds that Jonathan wished to translate the Hagiographa also, but that a heavenly voice bade him desist. The Targum to Job, which, as already noted, was withdrawn from circulation by Gamaliel I., may have represented the result of his attempts to translate the Hagiographa (see Bacher, "Ag. Tan." i. 23 *et seq.*; 2d ed., pp. 20 *et seq.*). JONATHAN B. UZZIEL is named as Hillel's most prominent pupil (comp. JEW. ENCYC. vi. 399, *s.v.* HILLEL); and the reference to his Targum is at all events of historical value, so that there is nothing to controvert the assumption that it served as the foundation for the present Targum to the Prophets. It was thoroughly revised, however, before it was redacted in Babylonia. In the Babylonian Talmud it is quoted with especial frequency by Joseph, head of the Academy of Pumbedita (see Bacher, "Ag. Bab. Amor." p. 103), who says, with reference to two Biblical passages (Isa. viii. 6 and Zech. xii. 11): "If there were no Targum to it we should not know the meaning of these verses" (Sanh. 94b; M. Ḳ. 28b; Meg. 3a). This shows that as early as the beginning of the fourth century the Targum to the Prophets was recognized as of ancient authority. Hai Gaon apparently regarded Joseph as its author, since he cited passages from it with the words "Rab Joseph has translated" (commentary on Ṭohorot, quoted in the "'Aruk"; see Kohut, "Aruch Completum," ii. 293a, 308a). As a whole, this Targum resembles that of Onḳelos, although it does not follow the Hebrew text so closely, and paraphrases more freely, in harmony with the text of the prophetic books. The Targum to the Prophets is undoubtedly the result of a single redaction.

Targum Jonathan.

2. A Palestinian Targum (Targum Yerushalmi): This Targum to the prophetic books of the Bible is frequently cited by early authors, especially by Rashi and David Ḳimḥi. The Codex Reuchlinianus, written in 1105 (ed. Lagarde, "Prophetæ Chaldaice," 1872), contains eighty extracts from the Targum Yerushalmi, in addition to many variants given in the margin under different designations, many of them with the note that they were taken from "another copy" of the Targum. Linguistically they are Palestinian in origin. Most of the quotations given in the Targum Yerushalmi are haggadic additions, frequently traceable to the Babylonian Talmud, so that this Palestinian Targum to the Prophets belongs to a later period, when the Babylonian Talmud had begun to exert an influence upon Palestinian literature. The relation of the variants of this Targum to the Babylonian Targum to the Prophets is, on the whole, the same as that of the fragments of the Palestinian Targum to the Onḳelos; and they show the changes to which the targumic text was subjected in the course of centuries, and which are shown also both by the earliest editions of the Targum to the Prophets and by their relation to the text of the Codex Reuchlinianus. This question is discussed in detail by Bacher, "Kritische Untersuchungen zum Prophetentargum" ("Z. D. M. G." xxviii. 1-58). Additions ("tosefta") to the Targum to the Prophets, similar in most cases to those in the Targum Yerushalmi, are also cited, especially by David Ḳimḥi. The chief extant portion of this Palestinian Targum is the translation of the hafṭarot (see Zunz, "G. V." pp. 79, 412).

Targum Yerushalmi.

Targum to the Hagiographa: The Babylonian Targumim to the Pentateuch and that to the Prophets were the only ones which enjoyed official recognition; so that even in Babylonia there was no authorized Targum to the Hagiographa, since this portion of the Bible furnished no sidrot for public worship. This fact is mentioned in the legend, already noted, that Jonathan ben Uzziel was forbidden to translate the Hagiographa. Nevertheless, there are extant Targumim on the hagiographic books; they are, for the most part, Palestinian in origin, although the Babylonian Talmud and its language influenced the Targumim on the Five Megillot.

A Separate Group.

1. To the Psalms and to Job: These Targumim form a separate group, and, in view of their entire agreement in diction, hermeneutics, and use of the Haggadah, may have a common origin. In no other Targum, excepting the Targum Sheni to Esther, does ἄγγελος, the Greek word for "angel," occur. In rendering Ps. xviii., the Targum to Psalms avails itself of the Targum to II Sam. xxii., although it does not reproduce the linguistic peculiarities found in the Babylonian recension of the latter. The Targum to Psalms contains an interesting dramatization of Ps. xci., cxviii, and cxxxvii., while both in it and in the Targum to Job the two constant themes are the law of God and its study, and the future life and its retribution. In Ps. cviii. 12 the parallel construction in the two sections of the verse is interpreted in such a way as to mention Rome and Constantinople as the two capitals of the Roman empire, thus indicating that the work was composed before the fall of Rome in 476. The Targum to Job iv. 10 (where שְׁנֵי is read instead of שִׁנֵּי) also seems to allude to the division of the empire; and this hypothesis is confirmed by the presence of a Greek and a Latin word in the Targum to Job, which in all cases renders "nagid" or "nadib" by ἄρχων (on this word as an official title in the Jewish communities, see Schürer, "Gesch." ii. 518), and translates "ḥanef" by "delator," a term which was applied in the Roman empire to the vilest class of informers. Characteristic of both these Targumim is the fact that they contain more variants from the Masoretic text in vowel-points and even in consonants than any other Targum, about fifty of them occurring in the Targum to Psalms, and almost as many being found in the Targum to Job, despite its relative brevity. A number of these variants occur also in the Septuagint and in the Peshiṭta, thus affording a confirmation of the early date of composition assigned to the two Targumim. Both of these contain, moreover, a number of variants, fifty verses of Job having two, and sometimes three, translations, of which the second is the original, while the later reading is put first (for a confirmation of the statements in "Monatsschrift," xx. 218, see Perles, *ib.* vii. 147, and "R. E. J." xxi. 122). The Targum to Psalms, like that to Job, is quoted by Naḥmanides under the title "Targum Yerushalmi" (Zunz, "G. V." p. 80).

2. To Proverbs: This Targum differs from all other Judæo-Aramaic translations of the Bible in that it shows Syriac characteristics, and also agrees in other respects with the Peshiṭta, to which, according to Geiger ("Nachgelassene Schriften," iv. 112), one-half of it corresponds word for word. This Targum contains scarcely any haggadic paraphrases. It may be assumed either that its author used or, rather, revised the Peshiṭta, or, with a greater degree of probability, that the Targum to Proverbs was derived from the same source as the Peshiṭta of that book, the Syriac version itself being based on a translation originally intended for Jews who spoke the Syriac dialect. This Targum also is quoted in the "'Aruk" and by Naḥmanides as "Targum Yerushalmi" (Zunz, *l.c.*).

3. To the Five Megillot: These Targumim are alike in so far as all of them are essentially detailed haggadic paraphrases. This is especially the case in the Targum to Canticles, in which the book is interpreted as an allegory of the relation between God and Israel and of the history of Israel. In the "'Aruk," the first work to cite these Targumim, the Targum to Canticles is once (*s.v.* פלטיא) called "Targum Yerushalmi"; and Rashi applies the same name (Targ. Yer. to Deut. iii. 4) to the second Targum on Esther, the so-called "Targum Sheni," which may be termed, in view of its length, and of the fact that it betrays eastern Aramaic influences in its diction, an Aramaic midrash on Esther. This last-named work, which is quoted as early as the Massek. Soferim (xiii. 6), has proved extremely popular. The Book of Esther is the only one of the hagiographic books which has a Targum noticed by the Halakah, rules for its reading having been formulated as early as the tannaitic period. The other "scrolls," however, were also used to a certain extent in the liturgy, being read on festivals and on the Ninth of Ab, which fact explains the discursiveness of their Targumim.

4. To Chronicles: This Targum follows the Palestinian Targumim both in language and in its haggadic paraphrases, although it shows the influence of the Babylonian Talmud also. It remained almost wholly unknown, however, not being cited even in the "'Aruk," nor included in the first editions of the Targumim. It was first published in 1680 (and 1683) by M. F. Beck from an Erfurt codex of 1343; and it was again edited, by D. Wilkins in 1715, on the basis of a Cambridge manuscript of 1347, this edition containing a later revision of the targumic text.

Apocryphal Additions to Esther.

Among the apocryphal additions to Esther the "Ḥalom Mordekai" (Dream of Mordecai) has been preserved in a Targum which is designated in a manuscript as an integral portion of the Targum to the Hagiographa. This passage, divided into fifty-one verses in Biblical fashion, has been printed in Lagarde's edition of the Targumim ("Hagiographa Chaldaice," pp. 352-365) and in Merx's "Chrestomathia Targumica," pp. 154-164 (see Bacher in "Monatsschrift," 1869, xviii. 543 *et seq.*). On the Targum to the Book of Tobit, known to Jerome, and preserved in a recension published by A. Neubauer ("The Book of Tobit," Oxford, 1878), see Dalman, "Grammatik des Jüdisch-Palästinensischen Aramäisch," pp. 27-29). It is probable, moreover, that a complete Aramaic translation of Ben Sira once existed (*ib.* p. 29).

The view prevailed at an early time that the amora Joseph b. Ḥama, who had the reputation of being thoroughly versed in the Targumim to the Prophets, was the author of the Targumim to the

Hagiographa. In the Masseket Soferim (*l.c.*) a quotation from the Targum Sheni to Esth. iii. 1 is introduced by the words "Tirgem Rab Yosef" (Rab Joseph has translated); and a manuscript of 1238, in the municipal library of Breslau, appends to the "Dream of Mordecai" the statement: "This is the end of the book of the Targum on the Hagiographa, translated by Rab Joseph." The manuscript from which the copyist of the Breslau codex took the "Dream of Mordecai," together with this colophon, included therefore all the Targumim to the Hagiographa, excepting that to Chronicles, the one to Esther standing last (see "Monatsschrift," xviii. 343). In his commentary on Ex. xv. 2 and Lev. xx. 17, moreover, Samuel ben Meïr, writing in the twelfth century, quoted targumic passages on Job and Proverbs in the name of R. Joseph. The belief that Joseph was the translator of the Hagiographa was due to the fact that the phrase frequently found in the Talmud, "as Rab Joseph has translated," was referred to the Targum to the Hagiographa, although it occurred only in passages from the Prophets and, according to one reading (Soṭah 48b), in a single passage of the Pentateuch. The Palestinian characteristics of the hagiographic Targumim, and the fact that the translations of the several books are differentiated according to the grouping noted above, prove that the view is historically baseless. The Tosafot (to Shab. 115a, below), since they ascribed a tannaitic origin to the Targum to the Hagiographa (comp. Tos. to Meg. 21b), naturally refused to accept the theory of Joseph's authorship.

TARNOPOL: Town of eastern Galicia, Austria; situated on the Sereth. It was founded in 1540 by the Polish hetman Johann Tarnowski. Polish Jews were at once admitted, and soon formed a majority of the population; during the sixteenth and seventeenth centuries there were 300 Jewish families in the city. Among the towns destroyed by Chmielnicki during his march of devastation from Zloczow through Galicia was Tarnopol, the large Jewish population of which carried on an extensive trade. Shortly afterward, however, when the Cossacks had been subdued by John Casimir II., of Poland, the town began to prosper anew, and its Jewish population exceeded all previous figures. It may be noted that Ḥasidism at this time dominated the community, which opposed any introduction of Western culture. During the troublous times in the latter part of the eighteenth century the city was stormed (1770) by the adherents of the Confederacy of Bar, who massacred many of its inhabitants, especially the Jews.

After the second partition of Poland, Tarnopol came under Austrian domination; and Joseph Perl was able to continue his efforts to improve the condition of the Jews there, which he had begun under Russian rule. In 1813 he established a Jewish school which had for its chief object the instruction of Jewish youth in German as well as in Hebrew and various other branches. The controversy between the Ḥasidim and the Maskilim which this school caused resulted four years later in a victory for the latter, whereupon the institution received official recognition and was placed under communal control. Since 1863 the school policy has gradually been modified by Polish influences, and very little attention has been given to instruction in German. The Tempel für Geregelten Gottesdienst, opened by Perl in 1819, also caused dissensions within the community, and its rabbi, S. J. Rapoport, was forced to withdraw. This dispute also was eventually settled in favor of the Maskilim. The present (1905) rabbi of the Tempel is Dr. Taubeles, who officiates also as a teacher of religion in the local gymnasium. The Jewish community is still growing, and at present numbers 14,000 in a total population of 30,415. The Jews are engaged principally in an active import and export trade with Russia through the border city of Podwoloczyska.

J. S. O.

TARNOW: Town of Austrian Galicia. An organized community existed there in the middle of the sixteenth century. The Jews were, for the most part, under the jurisdiction of the lords of Tarnow, the city being the hereditary possession of the latter. In 1637 Ladislaus Dominik granted the Jews a privilege placing them under the jurisdiction of the castle, assuring them of protection, and permitting them to engage in commerce on the same footing as other citizens. In 1654, however, popular jealousy, combined with the intrigues of the magistracy, secured the abrogation of this privilege; but when the town was brought to the verge of ruin in 1670 by the plague, conflagrations, and attacks of the Swedes, Alexander Janusz, its overlord, was forced to restore the privilege to the Jews in the interest of the town. This privilege was confirmed by Michael Radziwill in the same year, by Stanislaus Koniecepolski in 1676, and by Katarina Radziwill in 1681 and 1684.

In 1670 Janusz succeeded in effecting the following agreement between the Jewish inhabitants and the magistrate and the gilds: (1) the Jews should pay 30 per cent of all municipal taxes; (2) they should purchase goods only from the gilds within the town, except at the annual and weekly fairs; (3) they should surrender to the gilds a certain percentage of all goods purchased in the markets for retail purposes.

When misfortune on misfortune had reduced Tarnow to ruins early in the eighteenth century, its revival was due to the Jews, who paid, in accordance with a decree of Paul, Prince Sanguszko, then the lord of Tarnow, about three-fourths of all the taxes of the municipality (1730), receiving in return certain commercial privileges. Scarcely had the town been reestablished by these measures when the citizens, and even more eagerly the Christian gilds, resumed their attacks upon the Jews and the Jewish gilds, which had been organized about that time. This crusade was headed by the clergy, who insisted on Jewish isolation, although they maintained profitable business relations with the synagogue of Tarnow. In 1765 the community of Tarnow numbered 2,325 persons, but it ceased to exist after the first partition of Poland (1772).

TARRAGONA (טרכונה, טרגונה): Capital of the province of Tarragona, Spain; the ancient **Tarraco.** It was called the "City of the Jews" by Edrisi (ed. Conde, p. 64), and contained a community at an early date, as is shown by Jewish coins discovered in the course of excavations there some decades ago (Helfferich, "Der Westgothische Arianismus," p. 68, Berlin, 1860). The Jews' quarter was in the street now known as Plaza de las Monjas de la Enseñanza; and their cemetery was near the Plaza del Milagro. When the Count of Barcelona won Catalonia from the Moors, he granted rights and privileges to the Jews of Tarragona, whose ghetto contained ninety-five houses in 1239. They elected their own administrators, and engaged in commerce, industry, and brokerage, their circumstances and their taxes being similar to those of their coreligionists at Barcelona and other Catalonian cities. In 1322 the Archbishop of Tarragona confiscated the property of the Jews of the city, and in 1348 almost 300 Jews were killed at Tarragona and the neighboring Solsona, while in 1391 the community suffered the same fate as that of Barcelona, many of its members being slain. Even after this Tarragona was the residence of a number of Jews, who were noted for their piety. Isaac Arama officiated for some time as rabbi there; and a certain D. Benjamin was city physician. Two tombstones with Hebrew inscriptions, dating from the years 1300 and 1302, have recently been found at Tarragona: one (1½ meters wide and 43 centimeters high) marks the grave of Ḥayyim b. Isaac, who died in the month of Nisan, 1300; and the other commemorates Hananiah b. Simeon ארלבי, perhaps Alrabi.

Tarragona must not be confounded with Tarazona in Aragon, where the philosopher and apologist Shem-Ṭob ben Isaac ibn Shaprut lived for a time, and where there was a small but wealthy community, which paid a poll-tax of 145 "sueldos jaqueses" in 1282, and one of 200 "sueldos" in the middle of the fourteenth century.

G. M. K.

TARRASCH, SIEGBERT: German physician and chess-master; born at Breslau March 5, 1862; studied medicine at the universities of Berlin, Halle, and Nuremberg, in which last-named city he engaged in practise as a physician. Tarrasch has been one of the most successful of modern chess-players, as the following list shows. In the tournaments at Manchester, Dresden, and Leipsic he lost but a single game.

1884. Nuremberg, first prize.
1885. Hamburg, tied for second prize.
1887. Frankfort-on-the-Main, divided fifth and sixth prizes.
1889. Breslau, first prize.
1890. Manchester, first prize.
1892. Dresden, first prize.
1894. Leipsic, first prize.
1895. Hastings, fourth prize.
1896. Nuremberg, fourth prize.

1898. Vienna, first prize.
1902. Monte Carlo, sixth prize.
1903. Monte Carlo, first prize.
1905. Ostend, divided second and third prizes with Janowski.

In 1893 he played a drawn match with Tchigorin, 9 games all, 4 being drawn. In 1905, at Nuremberg, he played with Marshall a match of eight games up (draws not counted) in which the American player won only one game.

Tarrasch is an able writer on chess; and his annotations of games evince great analytical power. For some time he was joint editor with Gottschall of the "Schachzeitung." He has published "Dreihundert Schachpartieen Gespielt und Erläutert" (Leipsic, 1894).

TARREGA: City of Catalonia. Jews were among its inhabitants when the counts of Barcelona took Catalonia from the Moors. They enjoyed certain privileges, which were confirmed in 1332 and later. At the special request of the king the community was permitted in 1346 to build a new synagogue 80 feet long, 50 feet wide, and 60 feet high; also a school. On this occasion Pedro Montell, vicar of the Bishop of Vich, assured the Jews that, in conformity with canonical law, their cemeteries should not be desecrated, nor they themselves disturbed on their holy days; further that any one found guilty of acting contrary to this assurance would be strictly punished. Three years later, on the Ninth of Ab (July 26), the citizens of Tarrega attacked the Jews, killing more than 300, throwing their bodies into a pit, and plundering their houses. The survivors, robbed of all their possessions, fled, and remained hidden until the danger had passed.

Many Jews of Tarrega were killed during the persecutions of 1391; but a small community continued to dwell in the town, and it sent delegates to the funeral services held for King James at Cervera. In the civil war of 1462 some Jews of Tarrega and Cervera were killed and their possessions confiscated.

J. M. K.

TARSHISH: In the genealogical table of the Noachidæ, Tarshish is given as the second son of Javan and is followed by Kittim and Dodanim (Gen. x. 4; I Chron. i. 7). As with all these names, Tarshish denotes a country; in several instances, indeed, it is mentioned as a maritime country lying in the remotest region of the earth. Thus, Jonah flees to Tarshish from the presence of Yhwh (Jonah i. 3, iv. 2). With Pul, Tubal, and Javan, it is mentioned as one of the remote places that have not heard of Yhwh (Isa. lxvi. 19, comp. lx. 9; Ps. lxxii. 10; Ezek. xxxviii. 13). Any large vessel capable of making a long sea-voyage was styled a "ship of Tarshish," though this did not necessarily mean that the vessel sailed either to or from Tarshish (Ps. xlviii. 7; I Kings x. 22, xxii. 48; Isa. ii. 16; *et al.*). It seems that in parallel passages referring to Solomon's and Jehoshaphat's ships (I Kings *l.c.*) the author of Chronicles did not understand the meaning of "ships of Tarshish" (II Chron. ix. 21, xx. 36).

Tarshish appears to have had a considerable trade in silver, iron, tin, and lead (Jer. x. 9; Ezek. xxvii. 12). It gave its name, besides, to a precious stone which has not yet been satisfactorily identified (see Gems). The Targum of Jonathan renders the word "Tarshish" in the prophetical books by "sea," which rendering is followed by Saadia. Moreover, the term "ships of Tarshish" is rendered by Jewish scholars "sea-ships" (comp. LXX., Isa. ii. 16, *πλοῖα θαλάσσης*). Jerome, too, renders "Tarshish" by "sea" in many instances; and in his commentary on Isaiah (*l.c.*) he declares that he had been told by his Jewish teachers that the Hebrew word for "sea" was "tarshish." In Isa. xxiii. 1 the Septuagint, and in Ezek. xxvii. 12 both the Septuagint and the Vulgate, render "Tarshish" by "Carthage," apparently suggested by Jewish tradition. Indeed, the Targum of Jonathan renders "Tarshish" in I Kings xxii. 48 and Jer. x. 9 by "Afriḳi," that is, Carthage.

Josephus ("Ant." i. 6, § 1), apparently reading "Tarshush," identifies it with Tarsus in Cilicia. This identification was adopted by Bunsen and Sayce ("Expository Times," 1902, p. 179); but it seems from Assyrian inscriptions that the original Hebrew name of Tarsus was not "Tarshush." Bochart (in his "Phaleg"), followed by many later scholars, identifies Tarshish with Tartessus, mentioned by Herodotus and Strabo as a district of southern Spain; he thinks, moreover, that "Tartessus" is the Aramaic form of "Tarshish." On the other hand, Le Page Renouf ("Proc. Soc. Bibl. Arch." xvi. 104 *et seq.*) refutes this theory, declaring besides that Tartessus never really existed. Renouf's opinion is that "Tarshish" means a coast, and, as the word occurs frequently in connection with Tyre, the Phenician coast is to be understood. Cheyne (in "Orientalische Litteraturzeitung," iii. 151) thinks that "Tarshish" of Gen. x. 4, and "Tiras" of Gen. x. 2, are really two names of one nation derived from two different sources, and might indicate the Tyrsenians or Etruscans. Thus the name may denote Italy or the European coasts west of Greece.

s. M. Sel.

TARSUS: Turkish town in the vilayet of Adana, 12 miles from the Mediterranean, on the River Cydnus. During the Roman period it was the capital of Cilicia. It was important on account of its commerce and its textile products, and was famed for its schools of rhetoric. In Tarsus, as in Cilicia generally, the original population was Semitic, a fact reflected in the tradition that the city was a Phenician colony (Dio Chrysostom, "Orationes," xxxiii. 40), while on Phenician coins it was often called "Taraz" (תרז). Josephus ("Ant." i. 6, § 1), in agreement with rabbinical literature (Gen. R. xxxvii. 1; Yer. Meg. 71b; Targ. Yer. to Gen. x. 4), identified the city with Tarshish (Gen. x. 4), and accordingly believed it was to Tarsus that Jonah wished to flee ("Ant." ix. 10, § 2). A monument to Jonah was discovered in Tarsus in 1876; but it doubtless dates from the Christian period.

The Hellenization of the city began in the days of Alexander the Great; this influence was fully felt by the Jews, who had been colonized at Tarsus by the Seleucids about 170 B.C. During the reign of Antiochus Epiphanes a revolt of these colonists proved a factor in Jewish history (II Macc. iv. 30–38). Nothing further is known regarding the Jews of this city, although it later became famous as the birthplace of Saul of Tarsus, who lived there for a time (Acts ix. 11, xi. 25, xxi. 39, xxii. 3) and claimed Roman citizenship in virtue thereof. Ramsay, followed by Schürer, has proved (see Hastings, "Dict. Bible," ii. 105, *s.v.* "Diaspora") that a Jew could not have been a citizen in a Greek town unless the sovereign had ordered that the Jews of the city in question form a separate gens, an event which must have happened in Tarsus, probably, as Ramsay thinks, at the instance of Antiochus Epiphanes ("Expository Times," xvi. 18 *et seq.*).

The city of Tarsus is frequently mentioned by the Rabbis. There R. Jose ben Jasian boarded a vessel (Eccl. R. vii. 11), and R. Nahum ben Simai lectured (Pesiḳ. R. 15 [ed. Friedmann, p. 78a]). The Rabbis allude to the inhabitants and the language of Tarsus in connection with Bigthan and Teresh (Esth. ii. 21), although the exact meaning of this passage is not clear. The presence of Jews in Tarsus is further evidenced by inscriptions: one in Rome names a certain Asaphat of Tarsus (Levy, in "Jahrbuch für die Gesch. der Juden," ii. 287), and an epitaph found at Jaffa was inscribed to the memory of one Judah ben Joseph of the same city (Schürer, "Gesch." 3d ed., iii. 17). Mention is likewise made of one Isaac, elder of the synagogue of the Cappadocians at Tarsus, who was a dealer in linen ("Pal. Explor. Fund, Quarterly Statement," No. 110, p. 18), proving not only the existence of a Jewish community at Tarsus but also Jewish participation in mercantile pursuits. In the Middle Ages the town came under the dominion of the Isaurians and other barbarians, later falling into the hands of the Arabs and Turks, who deprived it of its importance. Its present (1905) permanent population is about 7,000.

TARTAK: Deity mentioned but once in the Bible (II Kings xvii. 31). His name occurs together with that of Nibhaz or Nibhan, who was a divinity of the Avites, a tribe colonized by Sargon on Israelitish soil. In the Babylonian Talmud (Sanh. 63a; comp. Yalḳuṭ Shim'oni, 234) R. Judah, transmitting a saying in the name of Abba Arika, states that Tartak was worshiped in the form of an ass. All attempts to identify this god have thus far proved unsuccessful. No similar divinity is found among the Babylonians or Assyrians; and an Egyptian parallel exists only in so far as the ass was sacred to the god Typhon and was sacrificed to him.

E. C. S. O.

TARTAN (Assyrian, "tartanu," "turtanu"): Title of an Assyrian official; twice mentioned in the Bible. A tartan, accompanied by a "rabsaris" and a "rab-shakeh," was sent to Jerusalem by Sennacherib to command Hezekiah to surrender the city (II Kings xviii. 17); and another is mentioned as Sargon's envoy to Ashdod in the year of a prophecy of Isaiah (Isa. xx. 1). The title was borne only by the two generals next to the king; thus there were a "tartanu rabu" (great tartan) and a "tartanu shanu" (second tartan). It is no longer possible to identify the tartans mentioned in the Bible, although the names of three of these officials are known: Ashur-isku (?)-udannim in 720 (the first year of Sargon's reign), Ilu-ittea in 694 (the beginning of the reign of Sennacherib), and Bel-emuranni in 686.

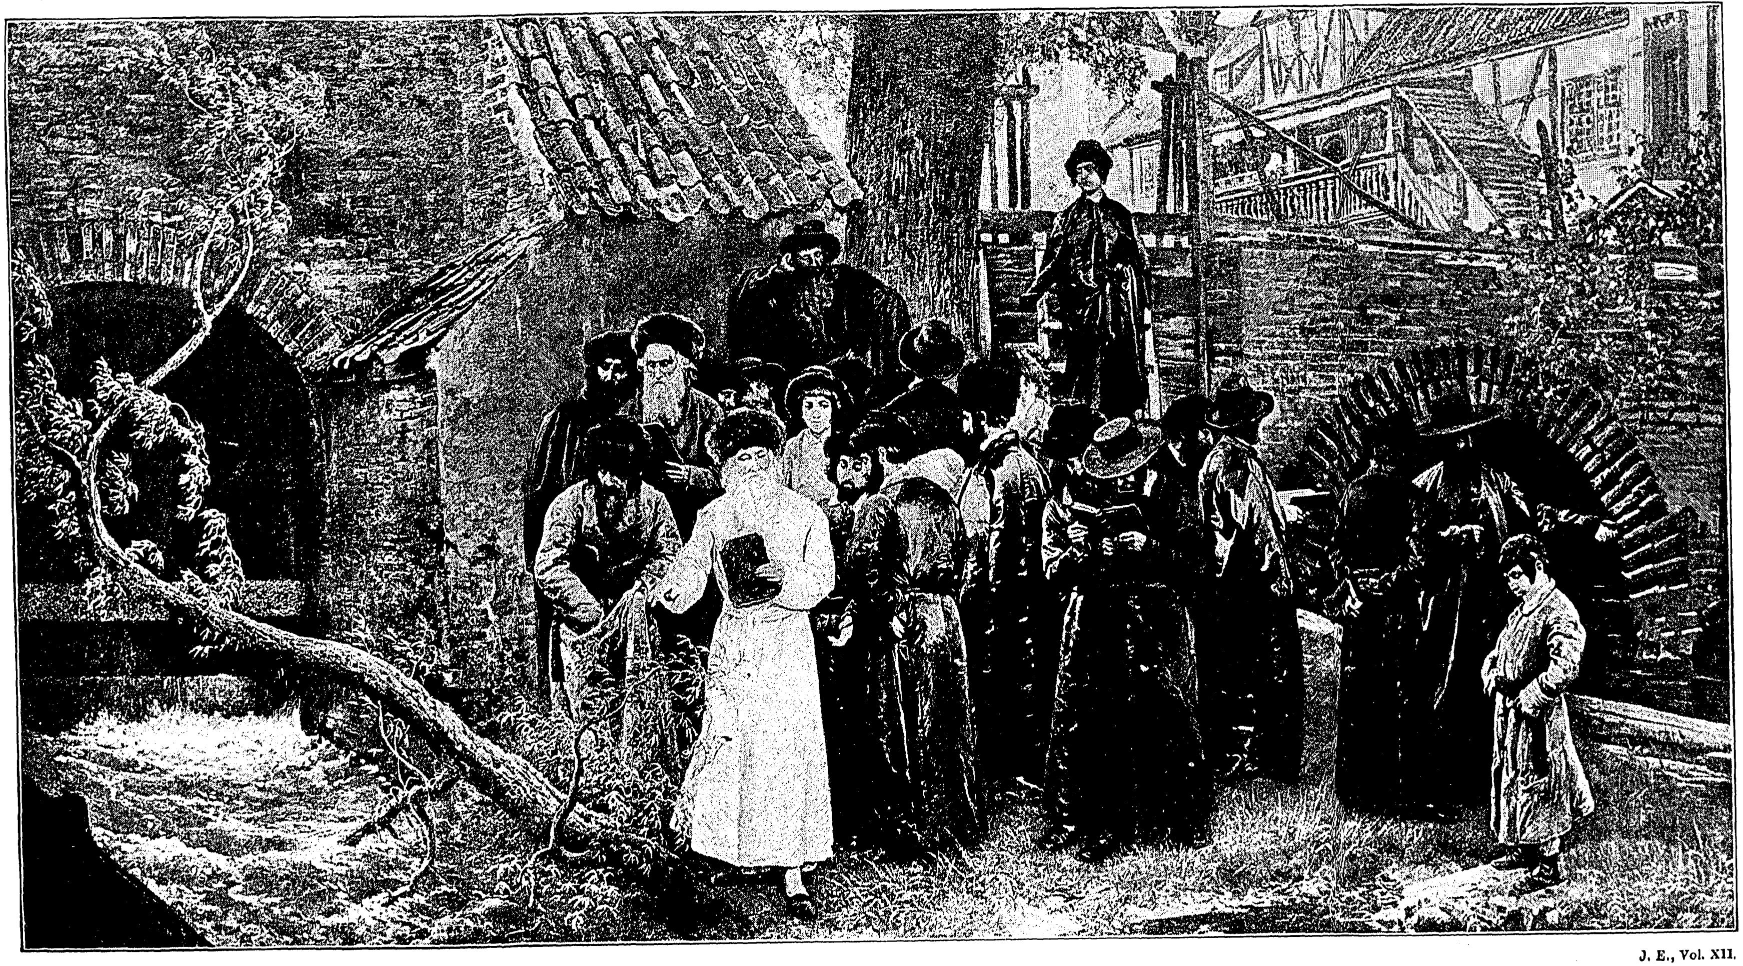
TASHLIK: Propitiatory rite, the name of which is derived from the passage (Micah vii. 18–20) recited at the ceremony. In illustration of the sentence "Thou wilt cast all their sins into the depths of the sea," it is customary to congregate near a running stream on the afternoon of New-Year's Day, when Micah vii. 18–20 is recited and penitential prayers are offered. The prayers and hymns used are given in Emden's Siddur ("Bet Ya'aḳob," ii. 54b, 55a, Warsaw, 1881).

When and where the custom was first introduced is problematical. Kalman Schulman (in "Ha-Meliẓ," 1868, viii., No. 14) is of the opinion that it is referred to in Josephus ("Ant." xiv. 10, § 23), in the decree of the Halicarnassians permitting Jews to "perform their holy rites according to the Jewish laws and to have their places of prayer by the sea, according to the customs of their forefathers." The Zohar, perhaps, refers to the custom when it says that "whatever falls into the deep is lost forever; . . . it acts like the scapegoat for the ablution of sins" (Zohar, Leviticus, p. 101a, b). But the fact that the Talmud, the geonic literature, and the early casuistic authorities are silent on this custom gives the impression that it originated not earlier than the fourteenth century, with the German Jews. The first direct reference to it is by R. Jacob Mölln (d. 1425) in "Sefer Maharil" (p. 38a, Warsaw, 1874), where, by the midrashic haggadah of the "Sefer ha-Yashar," he explains the minhag as a reminder of the "'Aḳedah" incident; *i.e.*, Satan, by throwing himself across Abraham's path in the form of a deep stream, endeavored to prevent him from sacrificing Isaac on Mount Moriah; Abraham and Isaac nevertheless plunged into the river up to their necks and prayed for divine aid, whereupon the river disappeared (comp. Tan., Wayera, 22). Mölln, however, forbids the practise of throwing pieces of bread to the fish in the river during the ceremony, especially on the Sabbath, being opposed to carrying the bread without an 'Erub. This shows that in his time tashlik was duly performed, even when the first day of New-Year fell on the Sabbath, though in later times the ceremony was on such occasions deferred till the second day. The significance of the fish is thus explained by R. Isaiah Horowitz



Stryowski pinxit.

TASHLIK CEREMONY IN GALICIA

J. E., Vol. XII.

("Shelah," p. 214b): (1) they illustrate man's plight, and also arouse him to repentance: "As the fishes that are taken in an evil net" (Eccl. ix. 12); (2) as fishes have no eyebrows and their eyes are always wide open, they symbolize the guardian of Israel, who slumbereth not. Moses Isserles gives this explanation: "The deeps of the sea saw the genesis of Creation; therefore to throw bread into the sea on New-Year's Day, the anniversary of Creation, is an appropriate tribute to the Creator" ("Torat ha-'Olah," iii. 56).

The cabalistic practise of shaking the ends of one's garments at the ceremony, as though casting off the "ḳelippot" (lit. "shells"; *i.e.*, the clinging demons of sin), has caused many who are not cabalists to denounce the whole custom, as it created the impression among the common people that by literally throwing their sins into the river to be swept away by the stream, they might escape them without repenting and making amends. The Maskilim in particular have ridiculed the custom and characterized it as heathenish. The best satire on this subject is by Isaac Erter, in his "Ha-Ẓofeh le-Bet Yisrael" (pp. 64-80, Vienna, 1864), in which Samael watches the sins of the hypocrites dropping into the river. The Orthodox Jews of New York perform the ceremony in large numbers from the Brooklyn and Manhattan bridges.

S. J. D. E.

TATNAI (R. V. **Tattenai**): Governor of Cœle-Syria under Darius Hystaspes (Ezra v. 3). He was one of those who tried to prevent Zerubbabel and Jeshua from continuing the building of the Temple, and who sent to Darius asking that search be made in the royal archives to ascertain whether there was any foundation for the claim put forward by the Jews that Cyrus had given them permission to rebuild the sanctuary.

According to Eduard Meyer ("Entstehung des Judenthums," p. 32, Halle, 1896; comp. also Justi, "Iranisches Namenbuch"), the Old Persian name was probably "Thithinaya" or "Thathanaia." Both the Septuagint and Josephus ("Ant." xi. 4, §§ 5, 6, 7) transcribe the name by Σισίνης.

TAUBES, AARON MOSES B. JACOB: Rumanian rabbi and author; born in Lemberg 1787; died in Jassy 1852. He became rabbi of Sniatyn and its districts in 1820, and in 1841 was appointed rabbi of Jassy, where he remained until his death. His works are: (1) "To'afot Re'em," responsa on the four parts of the Shulḥan 'Aruk. Among these are some written to his son R. Samuel and some to his grandson R. Shalom Taubes (Zolkiev, 1855). (2) "Ḳarne Re'em," novellæ on the Talmud, mentioned in "She'elat Shalom," No. 254. (3) Novellæ on Alfasi (according to Walden in his "Shem ha-Gedolim he-Ḥadash," Let. A, No. 129), which remained in manuscript. He corresponded on halakic subjects with Rabbi Solomon Kluger and with Rabbi Jacob Ornstein, author of "Yeshu'ot Ya'aḳob."

TAUSIG, CARL: Polish pianist and composer; born at Warsaw Nov. 4, 1841; died at Leipsic July 17, 1871. He received his early musical education from his father, Aloys T. Tausig (1820-85), who was a pupil of Thalberg and a composer of brilliant pianoforte music. When Carl was fourteen years of age his father took him to Weimar to study under Liszt, whose favorite pupil he soon became. In 1858 he made his début in public at an orchestral concert conducted by Bülow at Berlin; and during the following two years he gave concerts in various German cities. After a sojourn at Dresden he went to Vienna (1862), where, however, his classical programs and his artistic views failed to find acceptance. He married in 1865 and settled in Berlin, where he opened a Schule des Höheren Klavierspiels, and occasionally gave pianoforte recitals. Shortly before his death he made several concert tours through Germany and Russia, and was everywhere received with enthusiasm.

Carl Tausig ranks with Liszt and Rubinstein as one of the three greatest pianists of the nineteenth century. He was one of the stanchest champions of the "music of the future," and a close personal friend of Richard Wagner. It was he who formulated a plan for raising 300,000 thaler for building the Bayreuth Theater, and who "with his exceptional endowment and splendid energy seemed to regard the execution of this plan as his own particular task" (Richard Wagner, "Gesammelte Schriften," ix. 385). An epitaph composed by Wagner (*l.c.* p. 386) was inscribed on Tausig's tombstone.

Of Tausig's original compositions and numerous arrangements of classical works the following may be mentioned: "Deux Etudes de Concert," replacing an earlier pianoforte transcription of his symphonic ballad "Das Geisterschiff"; "Ungarische Zigeunerweisen," a composition for pianoforte; "Nouvelles Soirées de Vienne"; "Tägliche Studien," finger exercises of high value; a selection of studies from Clementi's "Gradus ad Parnassum"; a transcription of Bach's "Toccata und Fuge für die Orgel in D moll"; and adaptations of Weber's "Aufforderung zum Tanz," of six Beethoven quartets, and of Wagner's "Die Meistersinger von Nürnberg."

TAUSSIG, EDWARD DAVID: American naval officer; born at St. Louis, Mo., Nov. 20, 1847. Educated at the public schools of his native city, he entered the United States Naval Academy at Annapolis in 1863, graduating in 1867, since which date he has been in active service. In 1868 he was appointed ensign; 1870, master; 1872, lieutenant; 1892, lieutenant-commander; and 1902, captain. He served on the Pacific and European stations and in the coast-survey until 1898, when he was made commander of the "Bennington." He took possession of Wake Island for the United States, and was placed in charge of Guam when that island was ceded by Spain on Feb. 1, 1899. During the following year he served in the Philippines, and during the early part of 1900 in China, assuming command of the "Yorktown" in June of the latter year. From Nov., 1901, to May, 1902, he served in the navy-yard at Washington, D. C., and at Boston, and was then appointed commander of the "Enterprise." Since the beginning of 1903 he has been commander of the navy-yard at Pensacola, Fla.

Although of Jewish descent, Taussig was brought up in the Unitarian Church.

BIBLIOGRAPHY: *Who's Who in America*, 1905.

A. F. T. H.

TAUWITZ, EDUARD: German composer; born Jan. 21, 1812, at Glatz; died July 26, 1894, at Prague. While studying law at the University of Breslau he devoted himself to music under the direction of Wolf and Mosovius. At the same time he took charge of the Akademische Gesangverein. Having decided not to follow a juridical career, he left Breslau in 1837 to accept a call to Wilna as director of the orchestra of the theater there. In 1840 he went in the same capacity to Riga, but in 1843 returned to Breslau, and two years later accepted a similar position in Prague, where he also taught music. On the death of Leopold Zwonar he succeeded him as the director of the Sophienakademie.

Tauwitz was a very prolific composer of songs; he wrote in addition two operettas, "Schmolke und Bakel" and "Bramante." Of his songs the following are worthy of special mention: "Zwölf Soldatenlieder für Vier- und Fünfstimmigen Männergesang" and "Zweiundzwanzig Banner- und Schwertlieder für Vierstimmigen Männergesang."

S.

TAW (ת): The twenty-second letter of the Hebrew alphabet. Its name is connected with "taw" = "sign" (see ALPHABET). "Taw" has a twofold pronunciation: (1) a soft, lisping sound uttered with a gentle expiration, like the Greek "theta" and the English "th" in "thin," and (2) a hard, attenuated sound without expiration, like the English "t"; the latter pronunciation is indicated by a "dagesh lene" in the letter. In the classification of letters (consonants) as it is found for the first time in "Sefer Yeẓirah" (iv. 3), the "taw" is included in the group of linguals דטלנת, which are formed at the upper edge of the tongue. According to modern phonetic terminology, "taw" is a surd mute dental, corresponding to which is the sonant dental "d." "Taw" sometimes interchanges with the lingual "ṭet" and the dental "shin." It occurs both as a radical and as a formative element. As a numeral "taw" has (in the later period) the value 400.

T. I. BR.

TAWUS, JACOB B. JOSEPH: Persian translator of the Bible; flourished in the sixteenth century. The polyglot Pentateuch printed at Constantinople in 1546 included a Persian translation in Hebrew characters, in addition to the Targum of Onḳelos and the Arabic rendering by Saadia Gaon. In his preface the editor of the polyglot referred to this version as "a Persian translation which a wise and learned man, R. Jacob b. Joseph Tawus, has made for us"; this is followed by a statement indicating that the translator or the translation had been brought to Constantinople by Moses Hamon, the physician of Sulaiman I. Of the two interpretations, the view which makes the word "hebi'o" refer to the translator, thus implying that Jacob Tawus went to Constantinople at the request of Moses Hamon, is probably correct, as the editor expressly says "us"; the version accordingly seems to have been made by Tawus at Constantinople specifically for this polygot. Except for these data, nothing is known concerning the translator, whose name denotes "peacock." About 1570, however, a certain Jacob ben Issachar Tawus is described in a responsum of R. Moses Alshech (No. 103) as a thorough Talmudist. According to Zunz (in Geiger's "Wiss. Zeit. Jüd. Theol." iv. 391), this Jacob ben Issachar was a nephew of the translator, a view which is far more plausible than that of Kohut, who seeks to identify him with the translator himself by substituting the name Issachar for Joseph ("Kritische Beleuchtung," etc., p. 10). When Moses Hamon accompanied Sulaiman on his first Persian campaign (1534–35), he may have induced the scholarly Persian Jew to return with him to Constantinople (see Grätz, "Gesch." ix. 34). Jacob Tawus based his work on the old traditions of the Judæo-Persian Bible translations (see JEW. ENCYC. vii. 317), although he was influenced in many passages by the Targum of Onḳelos and Saadia's Arabic version, as well as by the commentaries of Rashi and Ibn Ezra. His version, transcribed in Persian characters, was reprinted in 1657 in the fourth volume of the London Polyglot, with a Latin translation by Thomas Hyde; but it remained almost unnoticed until Munk recognized its true character, and determined its date in his "Notice sur R. Saadia Gaon" (Paris, 1838). The work is apparently known to a certain extent among the Jews of Persia, inasmuch as Simeon Ḥakam, the latest Judæo-Persian translator of the Pentateuch, states in the preface to his "Miḳra Meforash" (Jerusalem, 1901, vol. i.) that he remembered seeing as a youth a copy of the Constantinople Polyglot of the Pentateuch in his native place, Bokhara, although he became acquainted with the translation by Tawus only when he found it in the London Polyglot at Jerusalem.

BIBLIOGRAPHY: Kohut, *Kritische Beleuchtung der Persischen Pentateuch-Uebersetzung des Jacob b. Joseph Tawus*, Leipsic, 1871; A. Geiger's review of the same in *Jüd. Zeit.* x. 103–113.

W. B.

ṬAWWAH, ABRAHAM BEN JACOB IBN: Algerian Talmudist; flourished at Algiers in the sixteenth century. On his mother's side he was a grandson of Solomon b. Simeon Duran, and therefore a descendant of Naḥmanides and a great grandson of Simeon b. Ẓemaḥ Duran I., to all of whom as his ancestors he refers frequently in his responsa. Ṭawwah was the contemporary of Solomon b. Ẓemaḥ Duran and of his brother Simeon b. Ẓemaḥ Duran II., the latter's son Ẓemaḥ having been Ṭawwah's pupil. Of Ṭawwah's responsa thirty-five were inserted in the fourth part of Simeon b. Ẓemaḥ Duran's responsa entitled "Ḥuṭ ha-Meshullash"; others are quoted in part and also copied by various authorities. Judah 'Ayyash quotes a part of Ṭawwah's responsa, entitled "Nofek," in his "Bet Yehudah" (p. 113a) and his "Maṭṭeh Yehudah" (p. 20b), and Solomon Ẓeror, in his "Peri Ẓaddiḳ," No. 10, quotes that part of his responsa entitled "Sappir." It may be concluded that Abraham ibn Ṭawwah divided his responsa into twelve parts, calling them after the precious stones in the high priest's breastplate.

TAX-GATHERERS (מוכסין): During the Egyptian government of Palestine the taxes of each city were annually leased to the highest bidder (Josephus, "Ant." xii. 4, § 3). The lessee paid into the royal treasury a fixed annual sum; and whatever the revenue yielded in excess was his gain, whereas if the sum was not realized he had to bear the loss. Under Ptolemy IV., Philopator, all the royal revenues from Cœle-Syria, Phenicia, and Judea were leased by Joseph ben Tobiah, nephew of the high priest Onias II. He held the office of tax-collector for twenty-two years, and was succeeded by his son Hyrcanus. How exacting the tax-collectors must have been may be judged from the fact that in spite of the increase of the annual rental from 8,000 to 16,000 talents, Joseph and Hyrcanus were still able to accumulate immense riches. The former, according to Josephus (*ib.* § 4), beheaded twenty distinguished citizens of Ascalon and Scythopolis for refusing to pay their taxes, and then confiscated their possessions. However, both father and son showed great leniency toward their coreligionists; and their accumulated wealth raised the material condition of Judea.

In Palestine Under Egyptian Rule.

In the Talmud.

Under the government of Palestine by the Syrian kings all the taxes were collected by state officials. The Romans left to the governors or procurators the collection of the regular taxes, such as the land-tax and poll-tax, but leased the customs duties, the market tolls, and similar special imposts. The lessees were generally Roman knights; but there were among them Jews also. Mention is made of a Jewish tax-gatherer named John, who headed a deputation sent to Florus by the inhabitants of Cæsarea (Josephus, "B. J." ii. 14, § 5). The fact that they were helping the Romans in the exaction of the heavy taxes imposed upon the Jews, combined with the rapacity of some tax-collectors who, taking advantage of the indefiniteness of the tariffs, overcharged the taxpayer, rendered this class of officials hateful to the people. Hence the stringent Jewish legislation which classified the tax-collectors with robbers. Thus, for instance, it was forbidden to take payment in coin from the treasury of the tax-gatherer or to receive alms from it, because the money had been gained by robbery (B. Ḳ. x. 1; "Yad," Gezelah, § 5; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 370, 389). The tax-gatherer was ineligible to serve as judge or even as a witness (Sanh. 25b). If one member of a family was a tax-gatherer, all its members were liable to be considered as such for the purposes of testimony, because they would be likely to shield him (Sheb. 39a).

In the Middle Ages.

During the Middle Ages the position of tax-collector was often filled by Jews. Mention is made of Jewish tax-collectors in France as early as the sixth century (Gregory of Tours, "Historia Francorum," vii. 23). In 587 the Council of Mâcon issued among other prohibitions one against farming the taxes to Jews. That this prohibition was disregarded is seen from the fact that the Council of Meaux (849) deemed it necessary to renew it. The collection of Jewish taxes was always entrusted to Jews; during the reign of Charles V. (1364-80) Menassier of Vesoul was receiver-general of the Jewish taxes for the north of France, and Denis Quinan for Languedoc. The kings likewise often entrusted to Jews the position of receiver-general of taxes. Among the renowned receivers mention may be made of Joseph Pichon, Joseph of Ecija, and Samuel ibn Waḳar, all of whom paid with their lives for the riches they had accumulated in office. Until the regency of John I. of Castile (1385) Jews held the position of tax-receivers in Portugal also.

In Germany the Jews were very early excluded from all public offices; and it can not be ascertained whether they ever filled there the position of tax-receiver. It seems, however, that such Jewish officials existed in Austria in the thirteenth century; for in a document dated 1257 two Jews are mentioned as the king's financiers. In Hungary the Jews were excluded from the office in 1279 by the Council of Buda. The higher Polish nobility, however, depended largely on the Jews for tax-collectors; until lately the Russian government also made use of Jewish tax-gatherers ("sborschiki") for the collection of taxes from the Jews; and it still leases to the highest bidder the special Jewish taxes, such as that on kasher-meat ("korobka"), and on the candles used for Sabbath and for other religious purposes. Until the middle of the seventeenth century the customs duties were generally leased by the Turkish government to Jews. According to Manasseh ben Israel (1656), "the viceroy of Egypt has always at his side a Jew who bears the title 'ṣarraf bashi,' or 'treasurer,' and who gathers the taxes of the land. At present Abraham Alkula holds the position." Alkula was succeeded by Raphael Joseph Halabi, the rich friend and protector of Shabbethai Ẓebi (Grätz, "Gesch." x. 34). See Publican.

J. I. Br.

TAXATION.—Biblical Data: The Bible gives scant information concerning the secular or political taxes of the Jews. Practically all that can be gathered is the following: Just as Abraham (Gen. xiv. 20) voluntarily gave a tenth "of all" (*i.e.*, according to the context, of the whole spoil taken in war), so the Israelitish and foreign subjects of the kings of Israel voluntarily brought presents to their rulers.

These gifts were withheld by churlish people only (comp. I Sam. x. 27), but were given by all others (*ib.* xvi. 20; II Sam. viii. 2, 11 *et seq.*; xii. 30; I Kings x. 10, 25; II Kings iii. 4; II Chron. ix. 24; Isa. xvi. 1; Ps. lxxii. 10). A chief source of the king's income consisted in his landed possessions (I Chron. xxvii. 25 *et seq.*; II Chron. xxvi. 10); but a money- or poll-tax is not mentioned among the royal prerogatives, even in the detailed description of them with which Samuel tried to deter the people from choosing a king (I Sam. viii. 11-17). The census of the people which was ordered by David (II Sam. xxiv. 1 *et seq.*) was intended perhaps to furnish a basis for a methodical distribution of the military burdens and taxes; but Solomon was the first monarch to systematize the furnishing of foodstuffs (I Kings iv. 7-28), and to demand toll from the merchants (*ib.* x. 15), and he, moreover, made the lot of the people an inordinately heavy one (xii. 4), probably imposing an additional money-tax. The later kings again received only voluntary gifts from their subjects, as is recorded of the time of Jehoshaphat and Hezekiah (II Chron. xvii. 5, xxxii. 23), a money-tax being levied in time of war only, when the demands of victorious enemies had to be satisfied (II Kings xv. 20, xxiii. 35).

The repugnance of the free Israelites to the payment of a money-tax was overcome by the post-exilic foreign rulers. Although the Persian kings exempted the priests and Levites (Ezra vii. 24), they demanded toll (הלך) and other imposts which likewise had to be paid in money (Ezra iv. 13; Neh. v. 4: "We have borrowed money for the king's tribute"). The taxes often grew to be an especially heavy burden under the Ptolemaic and Seleucidan kings. These rulers employed tax-farmers, who, of course, endeavored not only to collect the taxes, but also to derive a large personal profit in addition (I Macc. xi. 28, xiii. 15; Josephus, "Ant." xii. 4, §§ 1, 4 *et seq.*). Josephus (in the passage just cited) narrates that Joseph, the son of Tobias, accumulated great wealth as a tax-farmer, although he had to pay to the Egyptian king Euergetes the enormous sum of 16,000 talents. The Seleucidan kings likewise demanded a poll-tax (I Macc. x. 29: *φόρους*, according to "Ant." xii. 3, § 3, denoting what is paid per head).

This tax was imposed by the Roman rulers also. Julius Cæsar, it is true, showed himself very lenient toward the Jews, and even was considerate with regard to the Sabbatical year ("Ant." xiv. 8, § 3); but under Augustus conditions changed. During the latter's reign a "descriptio orbis" was completed, in which the property of the inhabitants of the whole Roman empire was set down. He chose twenty of the most eminent men, and sent them into all the countries of the subjugated peoples, to make a list of persons and property; moreover he wrote with his own hand a "breviarium totius imperii," which contained a list of the number of citizens carrying arms and of the allies, of the tributes or taxes, etc. This census was introduced into Judea when Herod's son Archelaus was removed, in the year 760 of the foundation of Rome, and was exiled to Vienna in Gaul; it is mentioned in Matt. xxii. 17. The precise amount of this tax is not known, nor can it be estimated with certainty from the fact that the denarius is called the "coin of the census" (A. V. "tribute money") in Matt. xxii. 19; for these words may mean also "a sample of the Roman coins with which the tribute is paid." In any case the tax imposed by the Romans was high and oppressive.

Refusal to pay taxes involved rebellion against the suzerainty of the Romans, as in the case of Judas the Gaulonite in the year 760 of the foundation of Rome ("Ant." xviii. 1, § 1).

Transferred to Nobles and Church Dignitaries.

——**Middle Ages:** A direct result of the persecutions of the Jews in the eleventh and twelfth centuries was that they came under the immediate protection of the rulers; this, in turn, led to their becoming KAMMERKNECHTE. The imperial rights were often transferred to minor rulers. Thus, the widow of Duke Roger of Apulia bequeathed to the church of Salerno the revenues derived from the Jews; and in like manner the Jews of Bohemia, in the twelfth century, came under the immediate protection of the Bohemian princes. In the thirteenth century the Jews became at times the wards of the ecclesiastical potentates also, to whom they were then obliged to pay their taxes. For example, in 1209 the taxes paid by the Jews of the archbishopric of Mayence fell into the coffers of Archbishop Siegfried; in 1212 the Jewish taxes for Provence were paid to the church of Arles.

Special Taxes.

The assessment of taxes to be paid by individual members of the communities was the duty of the elders, who took into consideration both the property owned by each member and his yearly income. Particularly wealthy Jews, by placing themselves under the personal protection of the ruler, sometimes escaped communal taxes; this aroused the anger of the communities and caused them to complain to the emperor. As a rule only Jewish physicians and such Jews as had rendered the state special services were exempt from taxation. The following twelve taxes, which may almost be termed "official," were generally levied upon German Jews of medieval times:

(1) The Coronation Tax: When this tax was introduced is not known; but the Jews of the entire German empire were compelled to pay a certain sum whenever a new ruler ascended the throne. At the coronation of Philip the Fair the Jews of Champagne paid a tax of 25,000 florins French money; while the Jews of Italy, upon the accession of a pope, paid a tribute consisting of one pound of pepper and two pounds of cinnamon.

(2) Taxation on Dress: In 1405 the Jews of several German and French cities were allowed to purchase exemption from wearing the Jewish badge by payment of a higher annual tax (Weizsäcker, "Reichstagsacten," v. 637).

(3) The Golden Opferpfennig: Introduced by Ludwig the Bavarian (1342). The income derived from this tax amounted in the fourteenth century

to 30,000 gulden. Beginning with the seventeenth century it was gradually abolished (see OPFERPFENNIG, GOLDENER).

(4) Judengeleitsgeld: For each safe-conduct a payment of 1 turnose was exacted, and even a Christian, if traveling with a Jew, had to pay this fee.

(5) Landfrieden Protection Tax: This was one of the heaviest taxes imposed upon the Jews, and was paid only when the latter had been publicly assured that protection had been granted them, as, for example, by Henry IV. (1103) and Henry of Hohenstaufen (1254), by the cities of Worms, Mayence, and Oppenheim (1260), and by Archbishop Werner of Mayence (1265).

(6) The Leibzoll (see JEW. ENCYC. vii. 669).

(7) The Real Estate and Building Tax: Levied as early as the ninth century. When a Jew purchased a house or a lot he placed himself under the protection of the local church or monastery, to which he paid a certain tribute: for a house, one-tenth of the income derived from it; for a lot, a certain quantity of barley, wheat, and wine. The custom of acquiring real property under the protection of the Church was rendered more difficult during the thirteenth century, measures against it being taken in Normandy, 1222, in northern Germany, 1240, in Gascony, 1288, and by Charles of Valois, 1324. Toward the middle of the fifteenth century it fell entirely into disuse.

(8) The Reichssteuer: Imposed by the emperor Wenceslaus (1383). The right to levy taxes upon the Jews was granted to cities only on condition that one-half of the income thus derived should be paid into the treasury of the state. A similar Jewish tax existed in France from the middle of the fourteenth century.

(9) Royal and Papal Protection Tax: From the twelfth century the popes granted letters protecting the Jews against the severity of their overlords. The amounts paid for these privileges varied from 1,000 to 3,000 marks for each letter. Such taxes were received by popes Alexander III., Clement III., Innocent III. (1199), Honorius III. (1217), Gregory IX. (1235), Innocent IV. (1246), and Innocent V. The same class of tax was imposed in England for the renewal of charters; *e.g.*, 4,000 marks were paid to John in 1200.

(10) The Servitium: Sum paid in lieu of personal services. It was first paid in Spain and in France in the middle of the thirteenth century, especially under Charles the Wise, when exemption from statute labor might be purchased with money. It was collected also in Germany, especially in Cologne.

(11) The Tenth Pfennig: Levied upon all German Jews within the jurisdiction of the archbishops of Mayence. The fact that the archbishops had this prerogative caused a rupture between John II. and Emperor Rupert (1403–4); eventually an agreement was reached by which the emperor acquired the right to levy the tax.

(12) The Third Pfennig: Imposed by the Nuremberg Reichstag (Aug. 9, 1422) to defray the expenses of the Hussite war. It was levied on all Jews of the German empire, which, for that purpose, was divided into four districts presided over by Margrave Bernhard of Baden, Palsgrave John of Neumarkt, Landgrave John of Lupfen, and Freiherr della Scala of Bavaria.

Besides these regular taxes, however, the Jews were often forced to pay extra tributes. Noteworthy instances of such extra taxation occurred under Conrad IV. and Ludwig the Bavarian, but especially under Emperor Sigismund (1416, 1418, 1423). The specifically Jewish taxes, in various forms, continued to be levied until the nineteenth century, and were not abolished until the Jews had been generally accorded full civic rights. It should be added that, while more onerous, taxes on Jews were, as a rule, not more numerous than those levied on all citizens possessing means. See SPAIN; TALLAGE.

TAXO: The mysterious name of "the man of the tribe of Levi" who, under a Roman governor in the time of Herod, according to the Assumptio Mosis, ix. 1–7, underwent martyrdom with his seven sons amidst the cruel persecution of the Zealots (vi.-viii.). He exhorted his sons thus: "Let us die rather than transgress the commands of the Lord of Lords, the God of our Fathers, for if we do this and die our blood will be avenged before the Lord." Here the story breaks off abruptly. It appears, however, that Josephus ("Ant." xiv. 15, § 5) refers to this martyrdom of Taxo during Herod's cruel onslaught against the Zealots, when he states that "one old man was caught within one of these caves with seven children and a wife, and rather than permit any of these to surrender he killed them all and finally himself, preferring, as he said, death to slavery, and reproaching Herod with the meanness of his family although he was king." Charles, in the "Assumptio Mosis" (1897), thinks that "Taxo" (תכסא) is a corruption of the word הקנא ("the Zealot"), and that the Samaritan legend of Moses in Heidenheim's "Vierteljahrschrift" (1871, iv. 210), in speaking of a "Levite" who would be a zealous battler for the congregation "and die and after three days rise again," refers to the same Taxo mentioned in the "Assumptio Mosis." According to Gen. R. lvii. end, "Taḥash" ("Taḥshon") signifies a rebel.

K.

TAYLOR, CHARLES: English Christian Hebraist; born in London 1840; educated at King's College, London, and St. John's College, Cambridge, of which he is now master. In 1874 he published an edition of "Coheleth"; in 1877 "Sayings of the Jewish Fathers," an elaborate edition of the Pirḳe Abot (2 ed., 1897); and in 1899 a valuable appendix giving a list of manuscripts. This is probably the most important contribution to rabbinic learning of any living Christian Hebraist. Taylor discovered the Jewish source of the "Didache" in his "Teaching of the Twelve Apostles," 1886, and has published also "Essay on the Theology of the Didache," 1889.

Taylor took great interest in Professor Schechter's work in Cairo, and the genizah fragments presented to the University of Cambridge are known as the Taylor-Schechter Collection. He was joint editor with Schechter of "The Wisdom of Ben Sira," 1899. He has published separately "Cairo Genizah Palimpsests," 1900.

He has published also several works on geometry.

Bibliography: *Who's Who in England.*

J.

ṬAYYIB: Tunisian family, first known in the second half of the seventeenth century. The more prominent members are the following:

Abraham Ṭayyib: Grandson of Abraham b. Isaac Ṭayyib (see below); lived at the end of the eighteenth century. He was the author of "Ḥayye Abraham" (Leghorn, 1826), a commentary on the treatises Shabbat, Pesaḥim, Megillah, Ta'anit, Mo'ed Ḳaṭan, Yebamot, Ketubot, Ḳiddushin, Baba Ḳamma, Sanhedrin, Makkot, Shebu'ot, 'Abodah Zarah, and 'Arakin. Appended to it are notes on Maimonides' "Yad," on Alfasi, and on Rashi to the Pentateuch.

Abraham ben Isaac Ṭayyib (surnamed **Baba Sidi**): Rabbi of Tunis, where he died in 1741. He was a companion of Ẓemaḥ Ẓarfati and one of the teachers of Isaac Lombroso, chief rabbi of Tunis. He was the author of novellæ on the treatises of the order Ḳodashim, printed in Jacob Faitusi's "Mizbaḥ Kapparah" (Leghorn, 1810). Other novellæ of his are to be found in Joseph Tanuji's "Bene Yosef" (Salonica, 1726).

Ḥayyim ben Abraham Ṭayyib: Rabbi of Tunis, and author of "Derek Ḥayyim" (printed with his father's Ḥayye Abraham"), a commentary on Pesaḥim, Ketubot, Ḳiddushin, Baba Meẓi'a, and Ḥullin.

Isaac ben Benjamin Ṭayyib: Rabbi and cabalist of Tunis; died in 1830. He was the author of: (1) "'Erek ha-Shulḥan," novellæ on the four divisions of the Shulḥan 'Aruk, Oraḥ Ḥayyim (Leghorn, 1791; preface by Joseph Sarko, who seems to have been Isaac's teacher), Yoreh De'ah (*ib.* 1798), Ḥoshen Mishpaṭ (*ib.* 1815; Tunis, 1890–92), and Eben ha-'Ezer (Leghorn, 1844); (2) "Wawe ha-'Ammudim" (*ib.* 1837), a commentary on Eliezer of Metz's "Sefer Yere'im," cabalistic in spirit and containing quotations from cabalistic works; (3) "Ḥuḳkot ha-Pesaḥ" (*ib.* 1853), novellæ on the part of the Shulḥan 'Aruk containing the laws regarding the Passover feast; (4) "Sefer ha-Zikkaron" (Tunis, 1892), in two parts, the first being a collection of Isaac's divers notes, and the second a cabalistic commentary on Abot and on the Pesaḥ Haggadah.

J. M. Sel.

ṬEBET: Tenth ecclesiastical and fourth civil month; it invariably has twenty-nine days. The name, like those of the other months, appears to be taken from the Assyro-Babylonians, who called their tenth month, described as the month of violent rains, "Ṭebetu" (Delitzsch, "Wörterbuch," p. 298). This month fell near the close of the rainy season in Palestine, to which fact the gloss in Ta'an. 6b alludes, holding that the year will be fertile if Ṭebet be "ugly" (*i.e.*, rainy). The observation that that year will be a good one in which Ṭebet is "widowed" (*i.e.*, rainless) presupposes that a sufficient precipitation had preceded the month, the rainy season normally beginning with the month of Ḥeshwan (the 8th month).

Of notable events and dates connected with this month, the following are among the more important: Ṭebet 1 and 2: Seventh and eighth days of Ḥanukkah. Ṭebet 5: See Ezek. xxxiii. 21; R. H. 18b. Ṭebet 8: Day on which the translation of the Septuagint was completed, when the earth was shrouded in darkness for three days ("Megillat Ta'anit," end). Ṭebet 9: Fast-day, but for reasons not known (*ib.*; Shulḥan 'Aruk, Oraḥ Ḥayyim, 580); it is said to have been the day on which Ezra died (*ib.*), and Abu Ḥusain Joseph ibn Nagdela was killed on this day (1066). Ṭebet 10: Fast-day, commemorating the beginning of the siege of Jerusalem under Nebuchadnezzar (see Jer. lii. 4; II Kings xxv. 1; Ezek. xxiv. 1; R. H. 18b); when this fast-day falls on the Sabbath, it is observed on the day following. Ṭebet 12: Ezekiel received a revelation (Ezek. xxix. 1). Ṭebet 20: Death of Moses Maimonides (1204). Ṭebet 24: The discomfiture of the Sadducean party (B. B. 115b) by Johanan ben Zakkai (according to "Megillat Ta'anit," this occurred on the 24th of Ab). Ṭebet 25: Said to have been the day of Alexander the Great's appearance before the walls of Jerusalem (Yoma 60a). Ṭebet 28: Another anti-Sadducean feast-day ("Megillat Ta'anit," x.); on this day the majority of the Sanhedrin passed over to the Pharisees.

E. G. H.

ṬEBUL YOM: Name of a treatise in the Mishnah and in the Tosefta; in most editions of the Mishnah it is tenth in the order Ṭohorot. According to Lev. xv. 5 *et seq.*, one who takes the prescribed bath still remains unclean until sunset. The degree of uncleanness in such a case is slight, and according to rabbinical interpretation neither the "ḥallah" nor sanctified flesh is rendered unclean by being touched by such a person, even before sunset; it is merely rendered unfit ("pasul"). Profane or unsanctified things may be touched by him without fear. The treatise Ṭebul Yom more closely defines the degree of uncleanness attaching to such a person, and stipulates also how far the purity of anything is affected by his touch. The treatise comprises four chapters, containing twenty-six paragraphs in all.

Ch. i.: Regulations concerning bread and other things which are of such a form that if a ṭebul yom or any other uncleanness touches part of them the whole is rendered unclean.

Ch. ii.: Concerning liquids touched by a ṭebul yom; when such contact renders the whole unfit, and when it affects only the part touched.

Ch. iii.: Continuation of ch. ii.: regulations concerning liquids easily rendered unclean.

Ch. iv.: Regulations concerning utensils touched by a ṭebul yom; enumeration of halakic rules which have undergone changes in the course of time; of the halakic regulations which R. Joshua declared were introduced by the sages ("soferim"), and which he was unable to explain.

In the Tosefta the treatise is divided into two chapters.

W. B. J. Z. L.

TEDESCHI, MARCO: Italian rabbi and poet; born at Piova, Piedmont, in 1817; died at Triest in

1870. He removed to Vercelli with his father (d. 1836), who had been appointed rabbi there; and in 1838 he went to Turin to study under R. Hillel Cantoni. He was successively elected rabbi of Nizza-Monferrato, Saluzzo, Asti, and Triest. His principal poems were published by Vittorio Castiglione in the "Yelid Kinnor" (Drohobycz, 1886). He translated from the French "Les Prières d'un Cœur Israélite." Marco Tedeschi was celebrated as a preacher.

S. V. C.

TEDESCHI, MOSES ISAAC: Italian translator, Biblical commentator, and teacher; born at Triest June 6, 1821; died there June 17, 1898. He lectured on Biblical exegesis in the Tamud Torah of his native city, and occasionally delivered sermons on holy days. He was the author of the following works: "Ho'il Mosheh," comprising commentaries on the Earlier Prophets (Göritz, 1870), the Book of Job (Padua, 1877), the Psalms (Leghorn, 1880), the Five Megillot and the Book of Proverbs (*ib.* 1880), the Pentateuch (*ib.* 1881), the Minor Prophets (Triest, 1887), the books of Daniel, Ezra, and Nehemiah, and Chronicles (Przemysl, 1889); "Musar Melakim," a collection of ethical homilies based on the Pirḳe Abot (Triest, 1878); "Zeker Rab," an Italian translation of the didactical prose-poem of Mussafia (Padua, 1878); "Oẓar Nirdefe Leshon 'Ibri," on Hebrew synonyms (*ib.* 1879); "Simḥat ha-Regel," homilies and glosses on the Targum to Proverbs. The author's autobiography is appended to the last-named work. He published also, in "Ha-Asif" (1886), an introduction to the Minor Prophets.

TEDESCO, IGNAZ AMADEUS: Austrian pianist; born at Prague 1817; died at Odessa Nov. 13, 1882; a pupil of Triebensee and Tomaschek at Prague. He made numerous successful concert tours, especially in southern Russia, and settled at Odessa, although he lived for a short time at Hamburg (1848) and London (1856).

As a pianist Tedesco was distinguished for his fine technique; he was called the "Hannibal of octaves." In recognition of his ability he was appointed pianist to the Grand Duke of Oldenburg. He wrote brilliant salon music, comprising a pianoforte concerto, caprices de concerts, mazurkas, nocturnes, rhapsodies, waltzes, and transcriptions.

TEFILLIN. See PHYLACTERIES.

TEHERAN: Capital and commercial center of Persia; situated about seventy miles south of the Caspian Sea. The chief development of the city took place within the last half of the nineteenth century, under Shah Naṣir al-Din, whose court physician, J. E. POLAK, was a Jew. The antiquity of Teheran is not great, since its existence can hardly be traced beyond the twelfth century. It appears gradually to have taken the place of the ancient Rai, which sank slowly into oblivion and is now a mass of ruins in the suburbs of Teheran. Rai itself had a long history, being the ancient metropolis of Media mentioned in the Apocrypha as Rages (Tobit i. 14 *et seq.*) or Ragau (Judith i. 15), in the Avesta and Old Persian inscriptions as Ragha or Raga (Vendidad, i. 15; Yasna, xix. 18; Behistun, ii. 70-74, iii. 1-10), and in the classics as Rhagæ (Strabo, §§ 1, 3, 19, etc.). It is mentioned as an emporium of Jewish trade by Ibn Khordadhbeh, 817 (see JEW. ENCYC. iv. 189, *s.v.* COMMERCE).

Teheran covers a considerable area, as the wall which surrounds it is eleven miles in circuit and is pierced by twelve gates. The Europeans reside in the northern section of the city, where the foreign legations are located. The Jews live in a quarter of their own. In their daily life they are subject to much the same restrictions and disabilities as the Gabars and the Armenians; and they were formerly liable to acts of persecution which resulted in reducing them to a state of misery, ignorance, and degradation. A riot against them occurred in Teheran as late as May 16, 1897. The Alliance Israélite

Universelle has accomplished a great deal toward removing this condition of affairs by bettering the position of the Jews in the community and by establishing schools for the education of the children. The Alliance report for 1904 shows a combined attendance of nearly 400 pupils at the two schools, established six years previously for boys and for girls. The occupations of the Jews in Teheran, as elsewhere in Persia, are largely those of traders, silversmiths, wine-merchants, and petty dealers. Teheran has a total population of 250,000, including about 5,000 Jews.

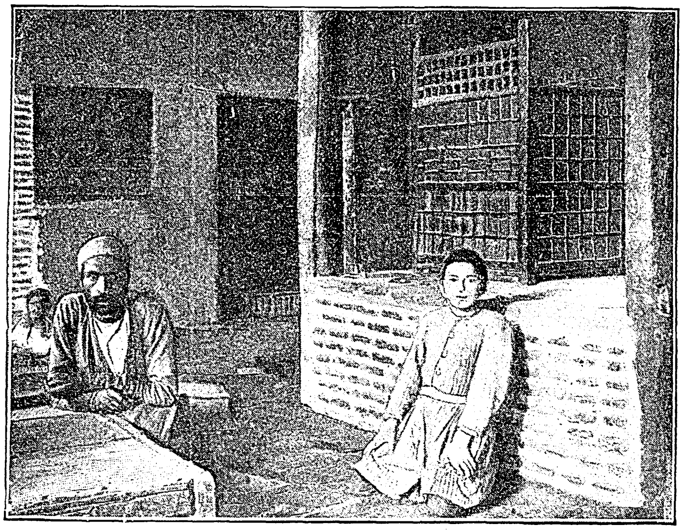
TEḤINA, ABBA (called also **Teḥina ben Perisha** ["the Pharisee"] or **Ḥasida** ["the pious one"]): A leader of the Zealots. Together with Eleazar ben Dinai, he is mentioned in the remarkable dictum of Johanan ben Zakkai concerning the Zealots: "Since the murderers have increased, the expiation ceremony of the 'eglah 'arufah [the heifer whose neck is broken for a murder the perpetrator of which is unknown; Deut. xxi. 1-9] has come into abeyance because of the many murders by these only too well-known Zealots. Such murderers are Eleazar ben Dinai and Teḥina, who was formerly called 'the Pharisee' and later on received the name of 'the Murderer'" (Soṭah ix. 9; Sifre, Deut. 205).



Synagogue of Asher the Physician at Teheran.
(From a photograph by E. N. Adler.)

This Teḥina has aptly been identified by Derenbourg ("Essai sur l'Histoire et la Géographie de la Palestine d'Après les Thalmuds et les Autres Sources Rabbiniques," i. 279-280, Paris, 1867) with the Abba Teḥina Ḥasida of Eccl. R. ix. 7. Derenbourg, however, takes the epithet "Ḥasid" to be ironical; but he ignores the very nature of the passage to which he refers and which is as follows: "Teḥina the Essene [Ḥasid] with the title Abba [see Kohler, "Abba, Father," in "J. Q. R." xiii. 567-575], returning to his native town on Friday afternoon shortly before the beginning of the Sabbath, and carrying upon his shoulder a bundle containing the provisions for his household for the Sabbath, met a disease-stricken man unable to move, who asked him to have pity on him and bring him into the town, where his wants might receive the necessary attention. This placed Teḥina in a quardary: he was afraid if he left his bundle he might lose all his Sabbath provisions; and if he did not aid the sick man, he (Teḥina) would be accounted as guilty of death. His better impulses proving victorious, he carried the sick man to a safe place, and then went back for his bundle. Meanwhile it had grown dark; and the people, seeing him carry a bundle on Sabbath eve, wondered, saying, 'Is this Abba Teḥina the Pious?' Teḥina himself was in doubt as to whether he had really violated the Sabbath, when a miracle happened: God caused the sun again to shine forth to show that the Sabbath had not yet begun, as it is written (Mal. iii. 20 [A. V. iv. 2]): 'But unto you that fear my name shall the sun of righteousness arise with healing in his wings.'" Later the punctilious Essene became a fierce Zealot (see Zealots).

Eleazar ben Dinai is mentioned by Josephus several times, while Teḥina is not. He has been identified with the Alexander mentioned together with Eleazar b. Dinai by that author (Josephus, "B. J." ii. 12, § 4; see Eleazar ben Dinai); but Alexander appears to be identical with Amram, cited as companion of Ben Dinai in "Ant." xx. 1, § 1 (comp. Cant. R. iii. 5: "In the days of Amram [?] and in the days of Ben Dinai they attempted to bring about the Messianic time by violence"; see Grätz, "Gesch." 3d ed., iii. 431), whereas it is quite possible that Teḥina is identical with 'Αννιβας who was executed by order of Fadus (Josephus, "Ant." *l.c.*; Grätz, *l.c.* p. 278). TEḤINNAH. See Devotional Literature.

TEITELBAUM, MOSES: Austrian Ḥasid; died July 17, 1841. According to Löw, he signed his name **Tamar,** this being the equivalent of **Teitelbaum,** which is the Yiddish for **Dattelbaum** = "palm-tree." He officiated as rabbi, first in Przemysl, and later in Sátoralja-Ujhely, to which latter place he was called in 1809. In Ujhely he founded a Ḥasidic congregation which was independent of the Galician leaders. In 1822 Teitelbaum was suspected of having supplied amulets to certain Jewish culprits who had been cast into prison for libel, in order to assist them in escaping. When called upon to vindicate himself he declared that the amulets in question served only as substitutes for the mezuzah and that their only purpose was to protect their bearers against demons.

Teitelbaum enjoyed an enviable reputation, even R. Moses Sofer paying him homage. He was the author of: "Yismaḥ Mosheh" (1849; 2d ed. 1898), homilies on the Torah; "Tefillah le-Mosheh," commentaries on the Psalms; and "Heshib Mosheh," a collection of responsa.

TEIXEIRA, TEIXEYRA, TEXEIRA, or **TEIXARA:** Noble Portuguese Marano family, originally bearing the surname of **Sampayo.** In accordance with a decree of King Philip IV. of Spain, its coat of arms—azure, a cross potencée or—was included in the Spanish roll of arms. In the patent, dated 1643, conferring nobility on Diego Teixeira his armorial bearings are blazoned as follows: Quarterly, 1 and 4, or, an eagle displayed purple; 2 and 3, checky or and sable (sixteen fields); bordure gules, charged by eight "S's" argent. This coat of arms was exchanged by the family, with the exception of a few members, for another, probably that of the De Mattos, with whom they intermarried, the new bearings being: Gules, a fir-tree sinople, rooted argent between two lions rampant, affronte, or, armed azure. The family was known also as **Teixeira de Mattos,** and members of it, distinguished for their riches, philanthropy, commercial activity, and influence, have resided until very recently in Hamburg, Holland, London, Vienna, and Venice.

Diego Teixeira Sampayo (Abraham Senior Teixeira): Portuguese Marano; left Portugal for Antwerp in 1643; died at Hamburg Jan. 6, 1666. After a brief residence at Antwerp he settled in Hamburg, professing Catholicism until Good Friday in 1647 or 1648, when he and his wife openly acknowledged Judaism, while Diego, who was approaching seventy, together with his two sons, one of whom was born out of wedlock, was circumcised by a rabbi. The imperial government thereupon demanded the surrender of Diego's person and the confiscation of his estate, but the senate of Hamburg energetically opposed this demand (M. Grunwald, "Portugiesengräber," p. 124). Diego Teixeira, who never added "de Mattos" to his name, was known in Hamburg only as the "rich Jew." He rode in an ornate carriage upholstered with velvet, had liveried servants, and kept a princely house, which, in 1654, was for some time the residence of Queen Christina of Sweden, to whom Diego had been recommended by the Spanish ambassador D. Antonio Pimentel, and by whom he was held in high esteem. He always took a keen interest in the affairs of his coreligionists; and at his intercession in 1657 King Frederick III. of Denmark granted them privileges, which were later confirmed by Christian V. For several years he was the head of the Spanish-Portuguese community in Hamburg, and at his son's wedding he presented the congregation with a ewer and a basin of silver plated with gold, while in 1659 he contributed 15,000 marks for the erection of a synagogue. It was he who supplied the copper roofing for the great Church of St. Michael in Hamburg, and when the elders asked for his bill he requested them to accept it receipted without payment. There still exist two benevolent institutions founded by Diego Teixeira and his wife, Sara d'Andrade (d. Dec. 5, 1693): Zur Ausstattung Dürftiger Jungfrauen and Zur Auslösung von Gefangenen.

BIBLIOGRAPHY: Archenholtz, *Mémoire de Christine de Suède*, i. 450, iii. 228, Amsterdam, 1651; Grätz, *Gesch.* x. 23; D. H. de Castro, *Keur van Grafsteenen*, pp. 104 *et seq.*; Grunwald, *Portugiesengräber*, pp. 123 *et seq.* (the epitaphs being given on p. 86).

Manuel Teixeira (Isaac Ḥayyim Senior Teixeira): Only son of Diego Teixeira and Sara d'Andrade; born in Lisbon about 1625; died at Amsterdam June 5, 1705. He was twice married, his second wife being Esther Gomez de Mesquita, whom he wedded at Hamburg April 7, 1654. Like his father, he was the financial agent and resident minister of Queen Christina of Sweden, retaining this position until 1687, as is proved by the patent of dismissal given him by her (Archenholtz, "Mémoire de Christine de Suède," iv.). Christina esteemed her ambassador so highly for his integrity and discretion that when the magistracy of Hamburg attempted to prevent him from leaving the city the queen regarded their action as a personal affront. She considered Teixeira's opinions and advice of such value that she recommended her ambassador Rosenbach to follow his counsels, "for they are wise and clever, and I approve of them," while in one of her letters to Count Wassenau the queen said: "Teixeira has written you a letter so clever and sagacious that King Solomon himself could not have improved upon it. I can only add that you must do all things as he bids you, and undertake nothing in opposition to his views. . . . Be careful not to do anything without his sanction" (Archenholtz, *l.c.* iii. 399, 465).

During her repeated visits to Hamburg, Queen Christina always took up her residence in Teixeira's house, which was situated in the most beautiful portion of the town, on the Jungfernstieg; she remained there for an entire year in 1661. When she revisited Hamburg in July, 1666, and instead of accepting the hospitality of the municipal council became the guest of Teixeira, the rabble, instigated by the clergy, endeavored to storm the house. For more than a quarter of a century Teixeira served the queen faithfully, and, even when, in 1685, he refused to advance further sums on her appanage, her governor-general, Olivekraus, did not succeed in disgracing him; on the contrary, she maintained a correspondence with him until her death.

Although Manuel Teixeira, like his father, kept a princely house and moved in the highest circles, he was a faithful adherent of Judaism, and supported a Talmud Torah in which Jacob Sasportas was employed as teacher. Like many other Jews of Spanish-Portuguese extraction, he was a follower of Shabbethai Ẓebi. In 1670, when the Jews were threatened with expulsion from Vienna and from the Austrian domains, Teixeira, in response to the appeal of the Vienna community, advocated their cause with great devotion. He accordingly wrote to several of his friends among the grandees of Spain and invoked the aid of Cardinal Azzolino at Rome, the confidential friend of Queen Christina, while at his request the queen herself wrote to the papal nuncio in Vienna and sent Teixeira letters for the dowager empress and for the empress. Manuel must have removed to Amsterdam before 1699, since in that year he was head of the Spanish-Portuguese congregation in that city.

TEIXEIRA, PEDRO: Portuguese traveler; born at Lisbon of Marano parents; died about the middle of the seventeenth century either at Verona (according to De Barrios, who is followed by Wolf, Zunz, and others) or at Antwerp (according to Barbosa Machado), whither he had removed from Venice. A man of education and a close observer, he traveled for eighteen months through the Philippines, China, and parts of America, and, after spending two years at Lisbon, undertook a scientific journey to India, Persia, and other countries. As a result he published "Relaciones de Pedro Teixeira d'el Origen, Descendencia, y Sucesion de los Reyes de Persia, y de Hormuz, y de un Viage Hecho por el Mismo Autor Dende la India Oriental Hasta Italia por Tierra" (Antwerp, 1610), containing a history of the kings of Persia according to Persian sources, as well as a fund of information on the Jews of Aleppo, Bagdad, and other cities, with notes on Jewish monuments. It served as a guide for Thomas de Pinedo and others, and has been translated into English by W. J. Sinclair, and edited by D. Fergeson; the latter also supplied the edition with an introduction.

TEḲI'AH. See Shofar.

TEKOA: City of southern Judea, frequently mentioned in the Old Testament. The "wise woman" who brought about the recall of Absalom was a resident of the city (II Sam. xiv. 2 *et seq.*), and it was also the home of the prophet Amos (i. 1), the herdsman and the gatherer of sycamore fruit. The fortification of Tekoa by Rehoboam (II Chron. xi. 6) gave it strategic importance. In the post-exilic period its inhabitants were Calebites (I Chron. ii. 24); and they aided Nehemiah in rebuilding the wall (iii. 5, 27).

The site of Tekoa is fixed by Biblical data. It was in the south (Jer. vi. 1), and in the vicinity of the valley of Berachah ("blessing"), near the desert to which it gave its name (II Chron. xx. 20, 26; I Macc. ix. 33). The place is still more accurately localized in Josh. xv. 60, where the Greek text of a passage lost in the Hebrew places it, together with Beth-lehem and other towns of the hill-country of Judah, south of Jerusalem. According to the "Onomasticon" of Eusebius and Jerome, it lay twelve Roman miles (eighteen kilometers) south of that city and to the east of Beth-lehem on the edge of the desert. The site of the city is represented by the modern Khirbat Taḳu'ah, a mass of scantily inhabited ruins, with ancient cisterns and tombs and the remains of a church, lying on a hill which commands a wide landscape. Since the days of Jerome the grave of Amos has been shown there. The Mishnah speaks in high praise of the oil of Tekoa; and medieval Arabic authors mention its honey.

Seasons.

TEḲUFAH (lit. "turn," "cycle"): Season of the year. The four teḳufot are: (1) Teḳufat Nisan, the vernal equinox (March 21), when the sun enters Aries; this is the beginning of spring, or "'et ha-zera'" (seed-time), when day and night are equal; (2) Teḳufat Tammuz, the summer solstice (June 21), when the sun enters Cancer; this is the summer season, or "'et ha-ḳaẓir" (harvest-time), when the day is the longest in the year; (3) Teḳufat Tishri, the autumnal equinox (Sept. 23), when the sun enters Libra, and autumn, or "'et ha-baẓir" (vintage-time), begins, and when the day again equals the night; (4) Teḳufat Ṭebet, the winter solstice (Dec. 22), when the sun enters Capricornus; this is the beginning of winter, or "'et ha-ḥoref" (stripping-time), when the night is the longest during the year. Each teḳufah, according to Samuel Yarḥinai, marks the beginning of a period of 91 days and 7½ hours.

Table of the Teḳufot During 1905–14.

Year.	Teḳufat Ṭebet.	Day in Ṭebet.	Teḳufat Nisan.	Day in Nisan.	Teḳufat Tammuz.	Day in Tammuz.	Teḳufat Tishri.	Day in Tishri.

*Adar II.

It will be noticed that the teḳufot fall from fourteen to eighteen days later than the true solar equinox or solstice; this, however, does not interfere with the calendar, which follows the figures of R. Ada.

Superstition.

An ancient and widely believed superstition is connected with the teḳufot. All water that may be in the house or stored away in vessels in the first hour of the teḳufah is thrown away in the belief that the water is then poisoned, and if drunk would cause swelling of the body, sickness, and sometimes death. Several reasons are advanced for this. Some say it is because the angels who protect the water change guard at the teḳufah and leave it unwatched for a short time. Others say that Cancer fights with Libra and drops blood into the water. Another authority accounts for the drops of blood in the water at Teḳufat Nisan by pointing out that the waters in Egypt turned to blood at that particular moment. At Teḳufat Tammuz, Moses smote the rock and caused drops of blood to flow from it. At Teḳufat Tishri the knife which Abraham held to slay Isaac dropped blood. At Teḳufat Ṭebet, Jephthah sacrificed his daughter (Abudarham, "Sha'ar ha-Teḳufot," p. 122a, Venice, 1566).

The origin of the superstition can not be traced. Hai Gaon, in the tenth century, in reply to a question as to the prevalence of this custom in the "West" (*i.e.*, west of Babylon), said it was followed only in order that the new season might be begun with a supply of fresh, sweet water. Ibn Ezra ridicules the fear that the teḳufah water will cause swelling, and ascribes the belief to the "gossip of old women" (*ib.*). Hezekiah da Silva, however, warns his coreligionists to pay no attention to Ibn Ezra's remarks, asserting that in his own times many persons who drank water when the teḳufah occurred fell ill and died in consequence. Da Silva says the principal danger lies in the first teḳufah (Nisan); and a special announcement of its occurrence was made by the beadle of the congregation ("Peri Ḥadash," on Oraḥ Ḥayyim, 428, end). The danger lurks only in unused water, not in water that has been boiled or used in salting or pickling. The danger in unused water may be avoided by putting in it a piece of iron or an iron vessel ("Bet Yosef" on the "Ṭur," and Isserles' note to Shulḥan 'Aruk, Oraḥ Ḥayyim, 455, 1; "Be'er Heṭeb," to Yoreh De'ah, 116, 5). R. Jacob Mölln required that a new iron nail should be lowered by means of a string into the water used for baking maẓẓot during the Nisan teḳufah ("Sefer Maharil," p. 6b, ed. Warsaw).

J. J. D. E.

TELASSAR (תלאשר): City, along with Gozan, Haran, and Reseph, which Rabshakeh mentions as having been conquered by Sennacherib's predecessors (II Kings xix. 12; Isa. xxxvii. 12). This city was inhabited by the Bene 'Eden. The cuneiform inscriptions mention a Bit-Adini, located in the upper Mesopotamian country, which may be identical with the Biblical place. "Telassar" is probably, as Schrader holds, the same name as "Til-Ashshuri" (the hill of Ashur), and may have been given to any place on which a temple was built. One such place is found east of the Tigris, as shown by Schrader; and another, mentioned by Tiglath-pileser III., was probably in Babylonia. Esarhaddon, too, mentions one near the land of the Mitanni. Telassar, then, being a possible general name, is located in at least three sections of the great Mesopotamian valley by as many separate cuneiform documents.

E. C. I. M. P.

TELCS, EDUARD: Hungarian sculptor; born at Baja May 12, 1872. At the age of twelve he went to Budapest and studied decorative art, but he soon left that city for Vienna, where he was educated for four years in the Allgemeine Bildhauerschule, winning the Füger gold medal with his "St. Boniface Striking Down the Banner of Wotan." He next entered Professor Zumbusch's school, where he studied for three years, gaining the school's first prize with his "Two Drinkers," which later won a medal of the second class at the World's Fair in Antwerp. Telcs attracted particular attention in 1900 by being awarded, for his monument in honor of Empress Elizabeth of Austria, first prize among many competitors. He is now (1905) at work on a statue of the poet Vörösmarty to be erected in

Budapest, and another of Kossuth in Kecskemet, having been awarded both these commissions as a result of competition.

S. L. V.

TELESINUS: Jew of Telesia, who lived at Rome about 480. Not only did Pope Gelasius refer to him, in a letter to Bishop Quingesius, as a "vir clarissimus" and his most deserving friend, but he recommended Telesinus' relative Antonius (Antius) to the bishop. Telesinus, moreover, is mentioned in papal documents as the physician of Pope Gelasius. Of late it has been denied that Telesinus was physician in ordinary to Gelasius or even a physician at all.

Of the Eighteenth Dynasty.

TELL EL-AMARNA: Name derived from the Beni 'Amran or El-Amarna Bedouins, and now given to the extensive ruins and rock-cut tombs which are the last relics of the ancient royal city of Khut Aten. These ruins are in middle Egypt, on the east bank of the Nile, near the villages of Hagg Ḳandil on the south and Et-Tell on the north. They are the ruins of a city built by Amenophis IV., of the eighteenth Egyptian dynasty. Shortly after the beginning of his reign, Amenophis broke away from the worship of all gods except Aten, the god of the solar disk. He accordingly removed from Thebes, which for centuries had been the Egyptian capital, and built a new city, in which ancient traditions and invested religious interests should not be able to oppose his reforms. He selected the site now known as El-Amarna, in the Hermopolitan nome in central Egypt, in which a royal palace and a temple of Aten were soon surrounded by residences of nobles and of others who would naturally follow in the train of royalty. After the death of Amenophis the old religion reasserted itself, the royal residence was soon moved back to Thebes, and the city which he had been at so much pains to build fell into decay. As the reign of Amenophis was less than twenty years, the occupation of his new capital can not have been long. Its site was never reoccupied, so that the course of the streets of Khut Aten and the plans of the ancient palaces and houses may still be traced in the mound.

The position of the palace of Amenophis was discovered by Petrie during his excavation at El-Amarna in 1891–92. It is indicated on the mound to-day by a building erected to preserve some painted stucco pavements which once formed a part of the palace. These paintings, as well as those in the neighboring tombs, prove that the artists of the time of Amenophis had emancipated themselves from ordinary Egyptian conventions, and represented objects much more naturally than had hitherto been the case.

The attention of the modern world was first called to El-Amarna by the discovery, accidentally made by a peasant woman late in 1887, of more than 300 cuneiform tablets, which turned out to be letters written to Amenophis III. and Amenophis IV. by kings of various Asiatic countries and by Egyptian officials or vassals in Phenicia, Syria, and Palestine. This correspondence opened vistas of Oriental history that had been entirely unsuspected. Kadashman-Bel and Burnaburiash, kings of Babylon; Ashuruballit, a king of Assyria; Dushratta, a king of Mittani; and a king of Alashia (supposed to be Cyprus)—all had friendly correspondence with the Egyptian kings. An entirely new conception of international relations at this period was thus acquired; and the remarkable fact was established that the language of diplomatic intercourse was then the cuneiform Babylonian. The majority of the letters were from vassals or officials in places like Gebal, Tyre, Sidon, Lachish, Jerusalem, etc.—letters which proved that even in writing to Egyptians the natives of this region used Babylonian cuneiform. Thus a long domination of these countries by Babylonian influence, before the Egyptian conquest by Thothmes III., was evident. The contents of the letters afford a vivid picture of the way in which the Asiatic empire of Egypt was disintegrating under the weak administration of Amenophis IV.

The El-Amarna Tablets.

Amenophis IV. had an Asiatic mother. He was accordingly more interested in preserving these letters than most Egyptian kings would have been; those which had been written to his father he took to his new capital, while those which were written to himself were stored in the same archive, where they remained until 1887. After their discovery the British Museum purchased 87 of them, the Berlin Museum 160 (a considerable number being fragments), the Gizeh Museum at Cairo obtained 60, while about 20 were purchased by private persons.

TELLER, LEOPOLD: Hungarian actor; born at Budapest April 3, 1844. For a time he studied medicine at the University of Vienna, but in 1862 he went to Laibach, where he joined a theatrical company. During the following ten years he played at small theaters in Iglau, Klagenfurt, Troppau, Budapest, Leipsic, and Liebenstein; and from 1874 to 1890 he was a member of the "Meininger," and appeared in such rôles as *Shylock*, *Iago*, *Gessler*, *Franz Moor*, and *Marinelli*. On leaving the "Meininger" he secured an engagement at the Stadttheater in Hamburg, where his principal rôles were *Graf Trast*, *Doctor Crusius*, and *Graf Menges*. In 1899 he retired from the stage, and settled as teacher of elocution in Hamburg. He has written a play entitled "Wintersonnenwende," which has met with considerable success.

TELLHEIM, CAROLINE. See Bettelheim, Caroline von.

TEMAN: Originally, the name of a tribe and then of a district of the Edomites. In Biblical genealogy it is the name of the eldest son of Eliphaz, the first-born of Esau, and one of the "dukes" of Edom (Gen. xxxvi. 11, 15, 42; I Chron. i. 36, 53). The genealogy here noted proves that Teman was one of the most important of the Edomite tribes, and this is confirmed by the fact that "Teman" is used as a synonym for Edom itself (Amos i. 12; Obad. 9; comp. Jer. xlix. 20, 22; Hab. iii. 3). The Temanites were famed for their wisdom (Jer. xlix. 7; Baruch iii. 22); Eliphaz, the oldest and wisest of the friends of Job, is described as a member of this tribe (Job ii. 11 *et passim*).

Teman is referred to in Obad. 9 as a part of the mount of Esau, while Amos i. 12 mentions it in connection with the Edomitic "palaces of Bozrah"; Ezek. xxv. 13 speaks of it in contrast to the southern boundary Dedan. The "Onomasticon" of Eusebius (260, 155) mentions a region called Thaiman, in Gebalene (the GEBAL of Ps. lxxxiii. 8 [A. V. 7]), and thus in the district of Petra, noting also an East Teman, a town with a Roman garrison fifteen (according to Jerome, five) miles from Petra.

E. C. I. BE.

TEMERLS, JACOB BEN ELIEZER (known also as **Jacob Ashkenazi**): German Talmudist and cabalist; born at Worms at the end of the sixteenth century; died at Vienna about 1667. At an early age Temerls went to Poland, and for some years directed a Talmudical school at Lublin. Thence he removed to Kremenetz, where he passed the greater part of his life. In his old age he settled at Vienna, where he remained until his death. He enjoyed a high reputation both as a Talmudist and as a cabalist, and was lauded by his contemporaries for his great piety. He is said to have fasted forty years, during which period he never left the bet ha-midrash.

Temerls was the author of "Sifra di-Ẓeni'uta de-Ya'aḳob," containing a cabalistic commentary on the Pentateuch and rules for the study of the Cabala (Amsterdam, 1669). He left in manuscript: "She'elot u-Teshubot," a collection of responsa, quoted in "Emunat Shemuel" (§ 53); a comprehensive commentary on the Pentateuch and the Megillot, quoted by himself in his "Sifra di-Ẓeni'uta de-Ya'aḳob"; a commentary on the "Idrot"; a commentary on difficult passages in the Babylonian and Palestinian Talmuds; explanations of some passages of the Zohar, the books of the Prophets, and the Hagiographa; and a dissertation on Luria's cabalistic writings.

S. I. BR.

TEMESVAR: Hungarian city. The oldest gravestone in the Jewish cemetery is dated 1636, and was erected in memory of Azriel Assach of Salonica. Between 1552 and 1716 large numbers of Spanish Jews settled in Temesvar, where the Turkish government received them with favor; but after the capture of the city in 1716 by Prince Eugene their treatment became less favorable, for Temesvar and its district were annexed to Hungary and administered as an Austrian province. In 1718 the provincial government ordered the expulsion of the Jews from the city on the charge of being Turkish spies. The order was not strictly enforced, however, on account of the influence of Moses Lopez Pereira Diego d'AGUILAR, the founder of the Sephardic community; Maria Theresa even permitted five other Spanish Jewish families to settle in the city. D'Aguilar presented to the Sephardic community mantles of the Law and silver crowns for the scrolls of the Torah. At that time the Spanish Jews had a society for the promotion of the study of the Bible, while another association received official recognition from the Count of Wallis, the commander-in-chief of the citadel.

Residence Limited.

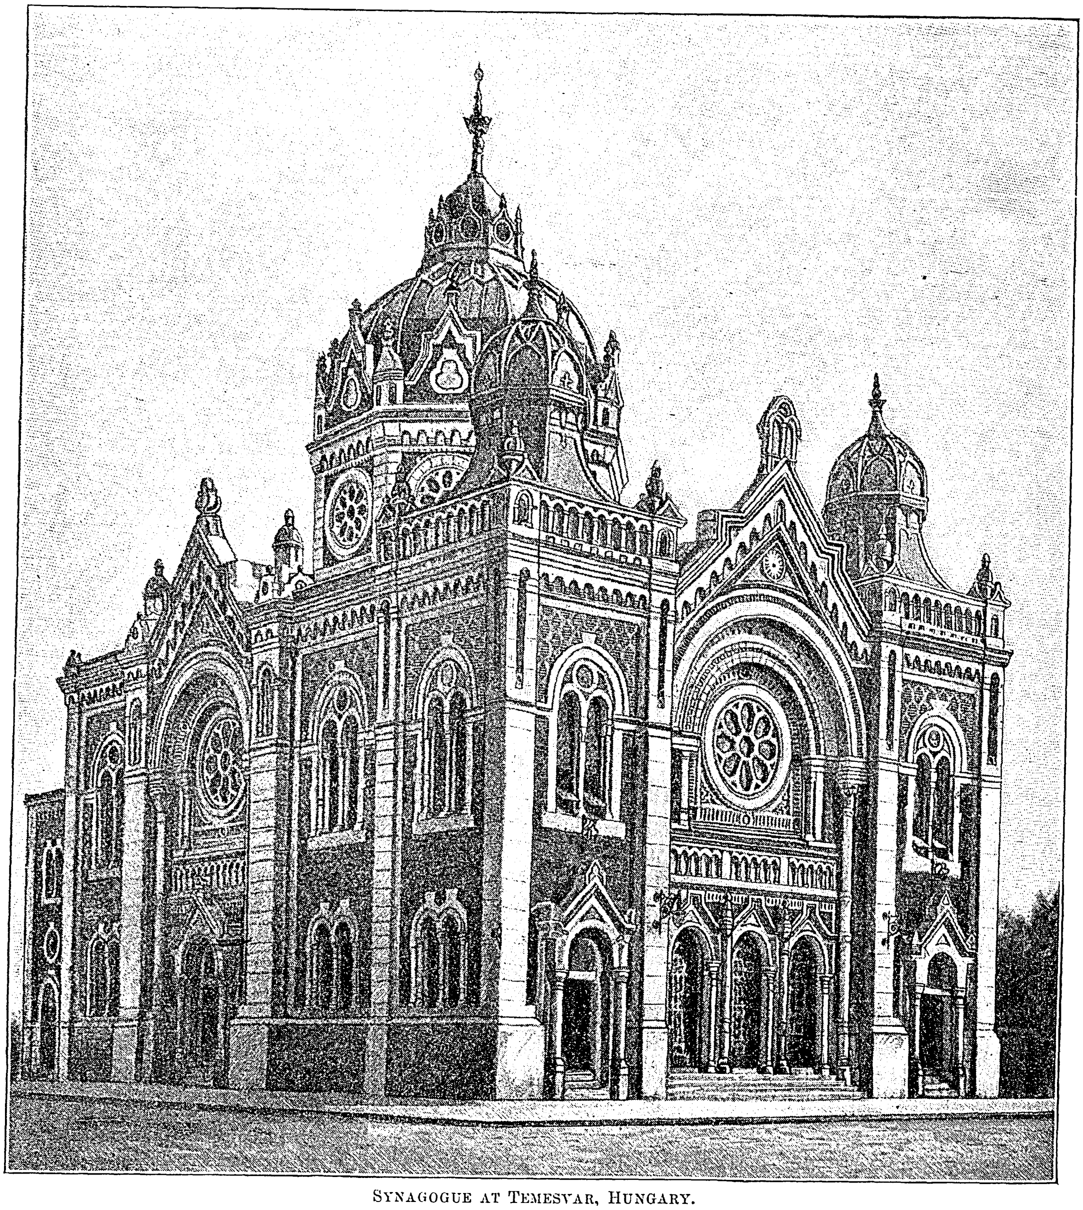
As in Bohemia and Moravia, the Jews of Temesvar were oppressed by the restrictions formulated by Maria Theresa in 1776. Only forty-nine were permitted to reside in the city. They were restricted to a single community, headed by a dayyan and a rabbi; nor might they contract marriages or leave the city without the permission of the authorities. Only eight were allowed to engage in commerce; and the distinction between Ashkenazim and Sephardim was abolished, the whole Jewry being comprised under the term "protected Jews of the cities and counties of the Banat." Jews from other places were forbidden to enter the city except for commercial purposes, when they were required to pay a daily tax of five groschen for protection, and were obliged to leave the city at night. Jews were forbidden either to have Christian servants or to live in the houses of Christians, and were compelled to reside in a ghetto in the citadel, their quarter being bounded by the streets now called Varoshaz, Szerb, Erzsibet, and Jenö. Marriages might be performed only by the rabbi of Temesvar, and all Jews who died in the province were to be buried in the cemetery of the city. It was not until the reign of Joseph II. (1780–90) that the condition of the Jews of Temesvar began to improve.

The community's most important society, next to the charitable organization, is the Jewish Women's Club of the citadel, one of the oldest societies of Hungary, founded by Sarolta Fischel in 1846. This is the famous Jewish society which gave Louis Kossuth 800 crowns for patriotic purposes on the outbreak of the Hungarian revolution. During the occupation of Bosnia and Herzegovina this society rendered valuable aid by sending food to the wounded; and at the time of the flood at Szegedin, in 1879, it materially assisted the poor, especially by maintaining a soup-kitchen. The community supports two other women's clubs, founded in 1847 and 1869 respectively, as well as the Talmud Torah (a charitable organization), the Maskil el Dal, and a ḥebra ḳaddisha, the last-named established in 1748, although its hospital in the citadel has since been demolished.

Temesvar has had the following rabbis: Jacob Moses of Belgrade (Sephardi; 1739); Eliezer Lipmann, author of the commentary "Migdal Dawid" (1748); Jonathan Trebitsch, chief rabbi of Transylvania (1752); Johanan b. Isaiah (1775); Ẓebi Hirsch

b. Israel (Hershele Ḥarif; 1782); and David b. Ẓebi Oppenheim (1801), and his son David Hirsch Oppenheim, author of "'Enc ha-Da'at" (Budapest, 1829). The rabbinate of Temesvar has always included the entire district composed of Lugos, Versecz, Karansebes, Pancsova, and Nagy Becskerek. In 1863 Moritz Hirschfeld was elected rabbi, and was succeeded by Moritz Löwy. Since 1860, however, internal dissensions have divided the community into factions, with the Reform rabbi, Moritz Löwy, at the head of the one in the city, and the Orthodox rabbi, Jakob Singer, leading that in the citadel.

The latter contains a synagogue in the Renaissance Gothic style, designed by Leopold Baumhorn; the city possesses a synagogue in the Moorish style, built in 1865. There is a small Sephardic synagogue in the citadel, but the Spanish Jews in Temesvar are now very few, and their old place of worship, the Judenhof, founded in 1760, has been demolished to make room for the new Reform synagogue.



Synagogue at Temesvar, Hungary.
(From a photograph.)

The earliest Jewish census at Temesvar was taken in 1739, when there were 139 Ashkenazim and 81 Sephardim (46 families altogether). In 1755 there were 23 Jewish families in the city; 53 in 1772; 76 in 1776; and 72 in 1781. In 1840 the Jewish population of the city was about 1,200, of whom 750 lived in the citadel, 340 in the city, and about 50 in the suburbs. In 1858 the number was 2,202; in 1890, 4,870; and in 1901, 5,788 (including Jewish soldiers, 5,916). The total population of Temesvar is 53,033.

TEMPLE, ADMINISTRATION AND SERVICE OF: The affairs of the Second Temple were managed by a board of fifteen appointed officers ("memunnim"). The Mishnah records the following names of officers of the Temple without stating their respective periods of activity; but it is presumed they were those appointed in the time of Agrippa: (1) Johanan b. Phinehas, in charge of the seals given in exchange for money to purchase sacrifices; (2) Ahijah, of libations; (3) Mattithiah b. Samuel, of allotments (*i.e.*, the selection of priests for the day); (4) Pethahiah, of the nests of fowls (for sacrifices); (5) Ben Ahijah, of the health department (treating especially a disease of the bowels caused by the bare feet touching the cold marble pavement); (6) Neḥunya, of the digging of wells (for the pilgrims on the highways leading to Jerusalem); (7) Gebini (Gabinimus), of announcements (the Temple crier); (8) Ben Geber, of the gates (opening and closing them); (9) Ben Babi, of the wicks for the candlestick ("menorah"); (10) Ben Arza, of the cymbals (leading the music of the Levites); (11) Hugras (Hugdas) b. Levi, of the musical instruments; (12) the Garmu family, of the preparation of the showbread; (13) the Abṭinas family, of the incense; (14) Eleazar, of the curtains; and (15) Phinehas, of the vestments (Sheḳ. v. 1; comp. Maimonides, "Yad," Kele ha-Miḳdash, vii. 1).

Officers.

Seven trustees ("amarkelim") and three cashiers ("gizbarim") had charge of the Temple treasury. In the courts were thirteen contribution-boxes in the shape of shofarim, with narrow necks and broad bases (Sheḳ. vi.). The half-shekel contribution for public sacrifices, etc., was demanded on the first of Adar and was payable by the twenty-fifth of the same month (*ib.* i. 1, 3). There was a special room, called "Lishkat Ḥashsha'im" (Secret Chamber), for anonymous donations, out of which fund the worthy poor were supported. Into the Vessel Chamber the people threw donations of silver and gold vessels. Every thirty days this chamber was opened by the cashiers, who selected such vessels as could be utilized in the Temple, the rest being sold and the proceeds applied to a fund for repairing the Temple building ("bedeḳ ha-bayit"; *ib.* v. 4).

The priestly officials were: the high priest, his deputy ("segan"), and his two attendants ("ḳatolikin" = "catholicus").

Priestly Guard.

A strict watch over the Temple was maintained, the guard being composed of three priests and twenty-one Levites. The priests were stationed one at the Chamber of the Flame ("Bet ha-Niẓoẓ"), one at the Chamber of the Hearth ("Bet ha-Moḳed"), and one at the Chamber (attic) of Abṭinas (see diagram, page 95). The Levites kept guard as follows: one at each of the five gates of the mount entrances; one at each of the four corners within the mount enclosure; one at each of the five important gates of the courts; one at each of the four corners within the court; one at the Chamber of Sacrifice; one at the Chamber of Curtains; and one behind the "Kapporet" (Holy of Holies). The captain of the guard saw that every man was alert, chastising a priest if found asleep at his post, and sometimes even punishing him by burning his shirt upon him, as a warning to others (Mid. i. 1).

The priests were divided into twenty-four patrols ("mishmarot"), which were changed every week. The patrol was quartered partly in the Chamber of the Flame and principally in the Chamber of the Hearth, both of which were on the north side of the inner court ("'azarah"). The latter chamber was a capacious one, surmounted by a dome. Half of the chamber extended outside the court to the "ḥel," a kind of platform surrounding the courts, which was considered as secular, in contrast to the sacred premises within, where the priests were not allowed to sit down, much less to sleep. A fire was always kept burning in the outer extension, at which the priests might warm their hands and bare feet. Here also they might sit down and rest for a while. At night the elder priests slept here on divans placed on rows of stone steps one above another. The younger priests slept on cushions on the floor, putting their sacred garments under their heads and covering themselves with their secular clothing (Tamid i. 1). The elder priests kept the keys of the Temple, putting them at night under a marble slab in the floor; to this slab a ring was attached for lifting it. A priest watched over or slept on the slab until the keys were demanded by the officer in the morning.

The king when visiting the Temple had no rights beyond those of the ordinary Israelite; only the kings of the house of David were privileged to sit down in the 'azarah (Soṭah 41b; Tamid 27a).

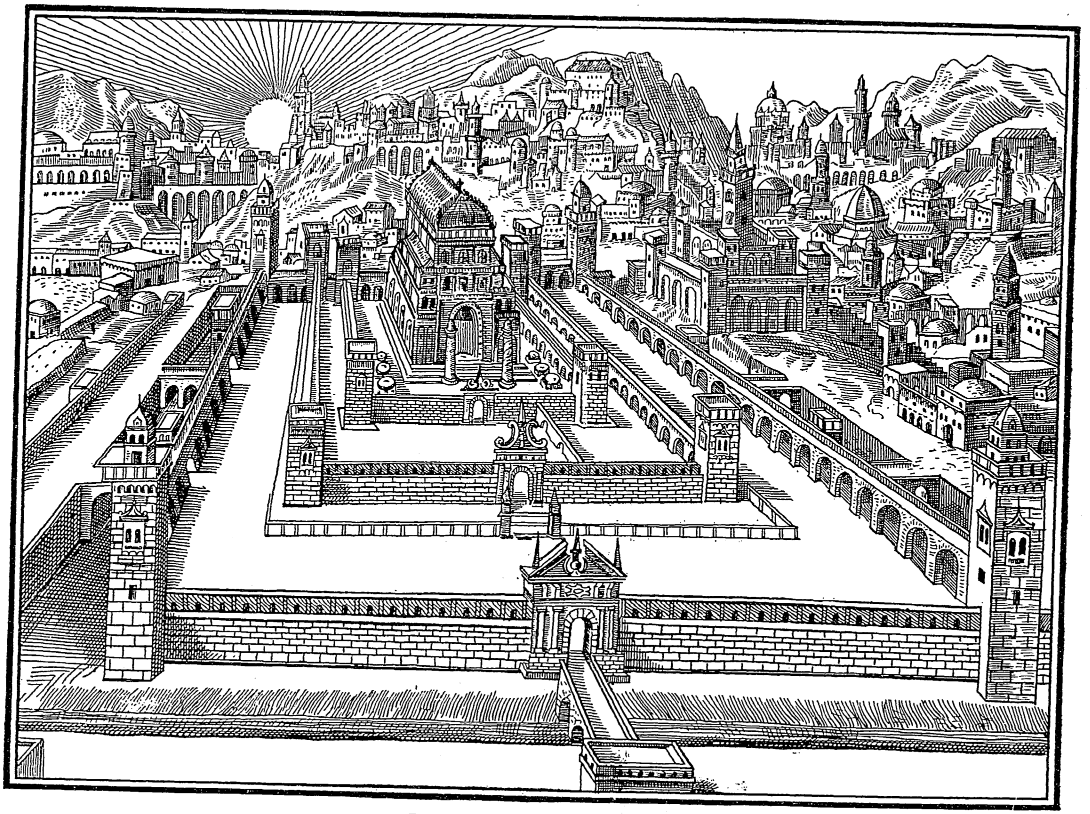
The Judiciary.

The major Sanhedrin, composed of 71 members, sat in the Chamber of Hewn Stone ("Lishkat ha-Gazit") on the extreme north of the priests' hall. Two tribunals of minor Sanhedrin, each composed of twenty-three members, sat one by the south gate of the mount and one in front of the hall on the north side. The sessions were held from the morning sacrifice till that of the afternoon. On Sabbaths and holy days, to facilitate increased business the major Sanhedrin sat outside on the ḥel (Sanh. 88b), and the minor Sanhedrin assembled in the bet ha-midrash situated on the mount (Tosef., Ḥag. ii.).

Local Divisions and Water-Supply.

Entrance within the enclosure of the mount was permitted to any one who was decently attired and who carried no burden. Israelites when ritually unclean and Gentiles were not allowed to pass beyond the "soreg," a fence which surrounded the courts at a distance of ten cubits. The outer court, called "'Ezrat Nashim" (Women's Hall), was for the use of ordinary Israelites. The priests' hall was reserved for the priests and Levites; occasionally, however, men and women presenting sin-offerings, sacrifices on which they were required to place the hands ("semikah"), made use of it. At the festivals, to accommodate the large crowds, all Israelites were permitted to enter the priests' hall, on which occasion the curtain of the vestibule was raised to show the people the interior of the "Hekal" (see Pilgrimage). The people, though tightly packed, were able to find sufficient space in which to prostrate themselves, this being one of the miracles associated with the Temple. The people crowded to within eleven cubits behind the Holy of Holies (Yoma 21a).

Another phenomenon was the water-supply. A spring rising below the Holy of Holies from an opening as narrow as the antennæ of a locust increased when it reached the entrance to the Hekal to the size of a warp-thread; at the entrance to the vestibule it assumed the size of a woof-thread; and at the house of David it became an overflowing brook (Yoma 77b, 78a). This spring is referred to in the passage "And behold, waters issued out from under the threshold of the house . . . at the south side of the altar" (Ezek. xlvii. 1, 2); it was the mysterious spring that filled the bath of Ishmael the high priest, situated by the attic of Abṭinas on the south of the court, at the water-gate. There was another bath, in a passage under the Chamber of the Hearth, for the use of any ordinary priest who might become ritually unclean. This was reached by a winding staircase. The priest, having bathed, dried himself by the fire; he then dressed and returned to his comrades above, with whom he waited until the gates were opened, when he left the 'azarah, being unfit for service till sunset of the same day.



The Temple at Jerusalem.
(From a Passover Haggadah, printed at Amsterdam, 1695.)

Order of Service.

The order of the priests' daily service in the Temple was as follows: One of the priests arose early and bathed before the arrival of the officer, who usually came about cockcrow. The officer knocked at the door of the Chamber of the Hearth, and the priests opened it. He called for the priest who had bathed, and ordered him to decide by lot which of the priests should serve that day. The officer then took the keys and entered through the wicket ("pishpush") of the door to the 'azarah, followed by the priests who formed the patrol, each holding two torches. The patrol was divided into two sections; one going through the colonnade on the east, and one on the west, the sections meeting on the south side at the chamber where they prepared the "ḥabittin" (the baked cake for the meal-offering). The priests now asked one another "Is all well?" and received the answer "All is well." The officer assigned by lot the making of the ḥabittin. Similarly he selected a priest to clean the altar of ashes, his comrades uttering the warning: "Be careful not to touch the sacred vessels before thou sanctifiest [by washing] thy hands and feet at the laver; and see that the coal-shovel ["maḥtah"] is in its place [near the "kebesh," the inclined plank or bridge leading to the altar]." Proceeding without

UTENSILS OF THE TEMPLE.
(From an illuminated Hebrew manuscript of the 13th century in the Bibliothèque Nationale, Paris.)

any light save that of the pyre ("maʿarakah") on the altar, he disappeared below, and was next heard operating the machinery for raising the laver from the well. This consisted of a wooden wheel and shaft and a chain, a device designed by the high priest Ben Ḳaṭṭin. The noise caused by this operation fixed the time for washing hands and feet. The priest took the silver "maḥtah" and ascended the altar; pushing the large coals aside, he took a shovelful of ashes and charred wood, and, descending, turned northward and deposited the ashes in a heap on the floor three handbreadths from the "kebesh," where also the ashes from the golden altar and the candlestick were placed. The authorities disagree as to the disposition of the ashes: some say they fell through a grate in the floor; others, that they were removed later. Observing his act, the priest's comrades hurried to wash their hands and feet at the laver. They then took large shovels ("magrefot") and made a heap ("tappuaḥ") of the ashes of the altar in the center, other priests meanwhile using flesh-hooks to place aside the portions of the sacrifices that had not been consumed during the night. When the heap of ashes was sufficiently large it was removed outside the city. The priests now brought pieces of all kinds of wood except olive and vine, and built a new pyre, on which they replaced the unconsumed portions of the sacrifices. For a second pyre, intended for the burning of incense, they selected the best fig-wood. Having lit the two pyres, they descended from the altars.

The Tamid Sacrifice.

The officer then ordered the priests to decide by lot who should slaughter the sacrificial victim, who should sprinkle the blood, who should clean the ashes from the golden altar and from the golden candlestick, and who should attend to the sacrifices in detail. This being done, the officer commanded: "Go ye and see if it is time to commence the sacrificial service!" Mounting to an eminence of the Temple, they looked toward the east, till at length one shouted, "Barḳai!" (the morning light has appeared). Mattithiah b. Samuel said they asked him, "Has the light in the east reached Hebron?" and he answered, "Yes." The mention of Hebron was made to honor the memory of the patriarchs buried there. The officer then said: "Go and fetch a lamb from the Chamber of the Lambs" (situated at the northeast corner of the ʿazarah). The priests entered also the Vessel Chamber and took therefrom ninety-three vessels of silver and gold. The lamb was now examined by the light of torches to see whether it was free from blemishes; and water from a golden cup was given it to drink. The priest selected by lot then dragged the animal to the abattoir, north of the altar. Meanwhile other priests advanced with the "ṭeni," a gold dish in the shape of a basket of a "tarḳab" measure; the "kuz," a gold pitcher; and two keys wherewith to open the Hekal, one from the outside and one from within through the wicket or lattice of a cell on the north side of the vestibule. The bolt was thrown back and the doors unlocked, causing a noise which was heard a long distance and which was the signal for the shoḥeṭ to slaughter the perpetual morning sacrifice ("tamid shel shaḥarit") at the abattoir, while the priest in the Hekal carefully gathered up all the ashes of the golden altar into the ṭeni, put this on the floor, and went out. The priest with the kuz cleared the candlestick of ashes, leaving the two lights nearest to the east to burn till the evening. If he found them extinguished he renewed and relighted them, after which he trimmed the other lamps. In front of the candlestick were three marble steps, on the top one of which the priest stood to trim and light the lamps. When he had finished he put the kuz on the second step and went out. On the first step the tongs and snuff-dishes were placed (Maimonides, "Yad," Bet ha-Beḥirah, iii. 11). The ṭeni was removed by the priest chosen to remove the ashes of the altar after the incense had been offered; the kuz, by the priest who in the afternoon attended to the two lights of the candlestick that had been burning all day.

The Abattoir.

The slaughter of the lamb was effected as follows: The front legs were bound to the hind legs, the head pointing south with its face toward the west. The shoḥeṭ stood facing the west. The morning tamid was slaughtered at the northwest corner, that of the afternoon at the northeast corner, of the altar at the second ring. There were twenty-four rings, in four rows, fixed to the floor on hinges; in these the heads of the animals were held in position. The priest who received the blood in a basin stood facing the south. He sprinkled the blood on both sides of the northeast and southwest corners of the altar. The removal of the hide and the dissection of the carcass were shared by the priests, and were followed by the meal-offering (Lev. vi. 13). This accomplished, the priests went to the Chamber of Hewn Stone. There the officer directed them to recite one benediction ("Ahabah Rabbah") and to read the Ten Commandments and the "Shemaʿ," after which they blessed the people. On Sabbaths they blessed also with "love, brotherhood, peace, and friendship" the patrol that was about to go off duty.

The Incense Service.

Finally, the priests drew lots for the incense service, and the various assignments were made, only those who had not been previously selected being admitted to the ballot. The priests that were not to share in the service of the day now removed their priestly garments and then, having delivered them to an attendant who placed them in the proper lockers, dressed themselves in their secular clothes and retired from the ʿazarah till their next turn.

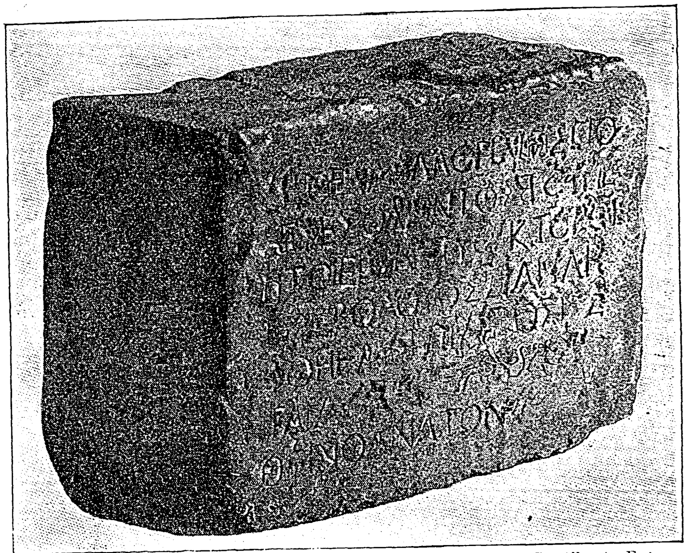
During the sacrifice the Levites were at their stations on the steps leading to the priests' hall, and in front of the dukan; but they did not commence their music until the libation at the conclusion of the service. The musical instrument called the "magrefah," somewhat similar to the organ, stood between the altar and the vestibule. Its tones, which could be heard a long distance, were the signal for the priests to prostrate themselves: this took place after the incense-offering.

Special honor was paid to the high priest. He was attended by three priests: one on his right, one on his left, and one holding up the breastplate adorned with precious stones. The high priest entered the Hekal alone, and after the curtain was lowered, he prostrated himself and retired. The officer who waited in the vestibule, on hearing the sound of the bells on the hem of the high priest's garment, raised the curtain. After the high priest had left, the officer who acted as sagan entered the Hekal and prostrated himself; and on his retirement the other priests entered and followed his example. In case the high priest desired to offer the incense he was assisted by the officer and two attendants.

Honor to the High Priest.

At the conclusion the priests bearing the five empty vessels—the basket, pitcher, ladle, spoon, and cover—used in the service of the altar, and those carrying the candlestick and incense, stood in line on the staircase of the vestibule, and, raising their hands as high as their shoulders, recited the priestly benediction.

The high priest then offered the libation of wine ("nesakim"). The officer stood in the corner with kerchief (flag) in hand, and two priests with silver trumpets by the table, the cymbals meanwhile playing between them. The trumpeters sounded "teḳi‘ah, teru‘ah, teḳi‘ah"; the high priest commenced the ceremony of the libation; the officer unfurled the kerchief; the cymbals clashed; and the Levites sang hymns accompanied by music. During the pauses the trumpet sounded "teḳi‘ah," and the people in the ‘azarah prostrated themselves; at every pause a teḳi‘ah and a prostration. The order of the daily Psalms from Sunday to Saturday was as follows: Ps. xxiv., xlviii., lxxxii., xciv., lxxxi., xciii., xciv.



Greek Inscription, Found on Site of Temple Area, Forbidding Gentiles to Enter Within the Inner Temple Walls.
(In the museum at Constantinople.)

J. J. D. E.

TEMPLE OF HEROD: In the eighteenth year (20–19 B.C.) of his reign Herod rebuilt the Temple on a more magnificent scale. There are many evidences that he shared the passion for building by which many powerful men of that time were moved. He had adorned many cities and had erected many heathen temples; and it was not fitting that the temple of his capital should fall beneath these in magnificence. Probably, also, one of his motives was to placate the more pious of his subjects, whose sentiments he had often outraged.

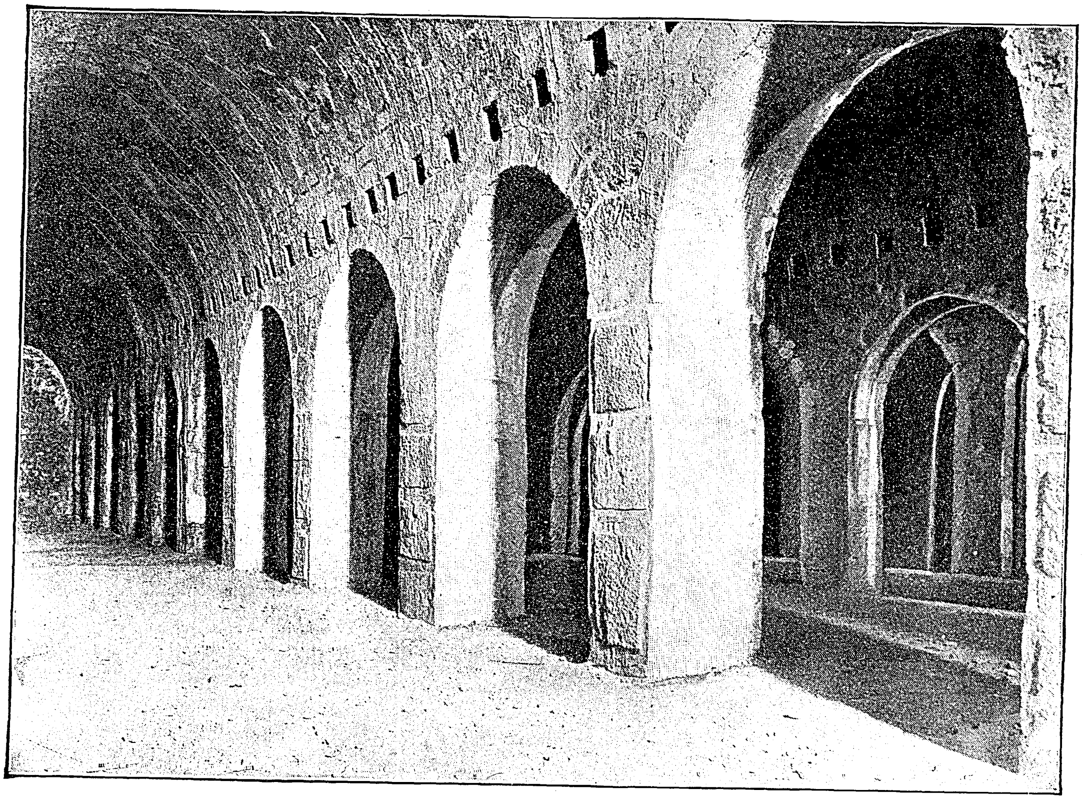
The Jews were loth to have their Temple pulled down, fearing lest it might not be rebuilt. To demonstrate his good faith, Herod accumulated the materials for the new building before the old one was taken down. The new Temple was rebuilt as rapidly as possible, being finished in a year and a half, although work was in progress on the outbuildings and courts for eighty years. As it was unlawful for any but priests to enter the Temple, Herod employed 1,000 of them as masons and carpenters.

Dimensions.

The Temple proper as reconstructed by Herod was of the same dimensions as that of Solomon, viz.: 60 cubits long, 20 cubits wide, and 40 cubits high. This space was divided into the Holy of Holies and the "Hekal." The former measured 20 × 20 cubits; the latter, 20 × 40 ("B. J." v. 5, § 5). At the entrance to the outer Temple hung a veil embroidered in blue, white (byssus), scarlet, and purple; the outer Temple was separated from the Holy of Holies by a similar curtain. The outer curtain was folded back on the south side, and the inner one on the north side, so that a priest in entering the Holy of Holies traversed the outer Temple diagonally. The Holy of Holies was quite empty. In the Holy Place stood the altar of incense, near the entrance to the Holy of Holies the seven-branched golden Candlestick to the south, and the table of showbread to the north. Above the gate of the Temple were golden vines and grape-clusters as large as a man ("Ant." xv. 11, § 3; "B. J." v. 5, § 4). The Temple building had an upper story similar in size to the lower ("B. J." v. 5, § 5). Side-structures, as in Solomon's Temple, afforded space for three stories of chambers on the north, south, and west sides of the Temple. These chambers were connected by doors; and trapdoors afforded communication from those of one story to those of the story immediately above or below. The whole breadth of the structure including the side-buildings was 70 cubits (Mid. iv. 7).

East of Herod's Temple there was, as in Solomon's, a porch, 100 cubits wide, 100 cubits high, and 20 cubits deep, thus extending 15 cubits on either side of the Temple ("B. J." v. 5, § 4). Its gateway, which had no gates, was 20 cubits broad and 70 cubits high. Over this gateway Herod erected a golden eagle, which was afterward pulled down by the Jews ("Ant." xvii. 6, § 2). The front of the porch was covered with gold ("B. J." v. 5, § 4); and it was most brilliant when the rays of the morning sun fell upon it.

In front of the Temple, 22 cubits distant from the porch, stood the altar of burnt offering, constructed of unhewn stones. Its length and breadth were each 50 cubits, and its height 15 cubits ("B. J." v. 5, § 5). To the north of the altar twenty-four rings were fixed in the ground, to which the sacrificial animals were tied. Near by were eight pillars supporting cedar beams, on which the carcasses of the animals were hung. There were also eight marble tables for preparing sacrificial flesh (Mid. iii. 5, v. 2; Tamid iii. 5; Sheḳ. vi. 4). On the south was a bronze laver for the priestly ablutions (Mid. iii. 6; Yoma iii. 10).

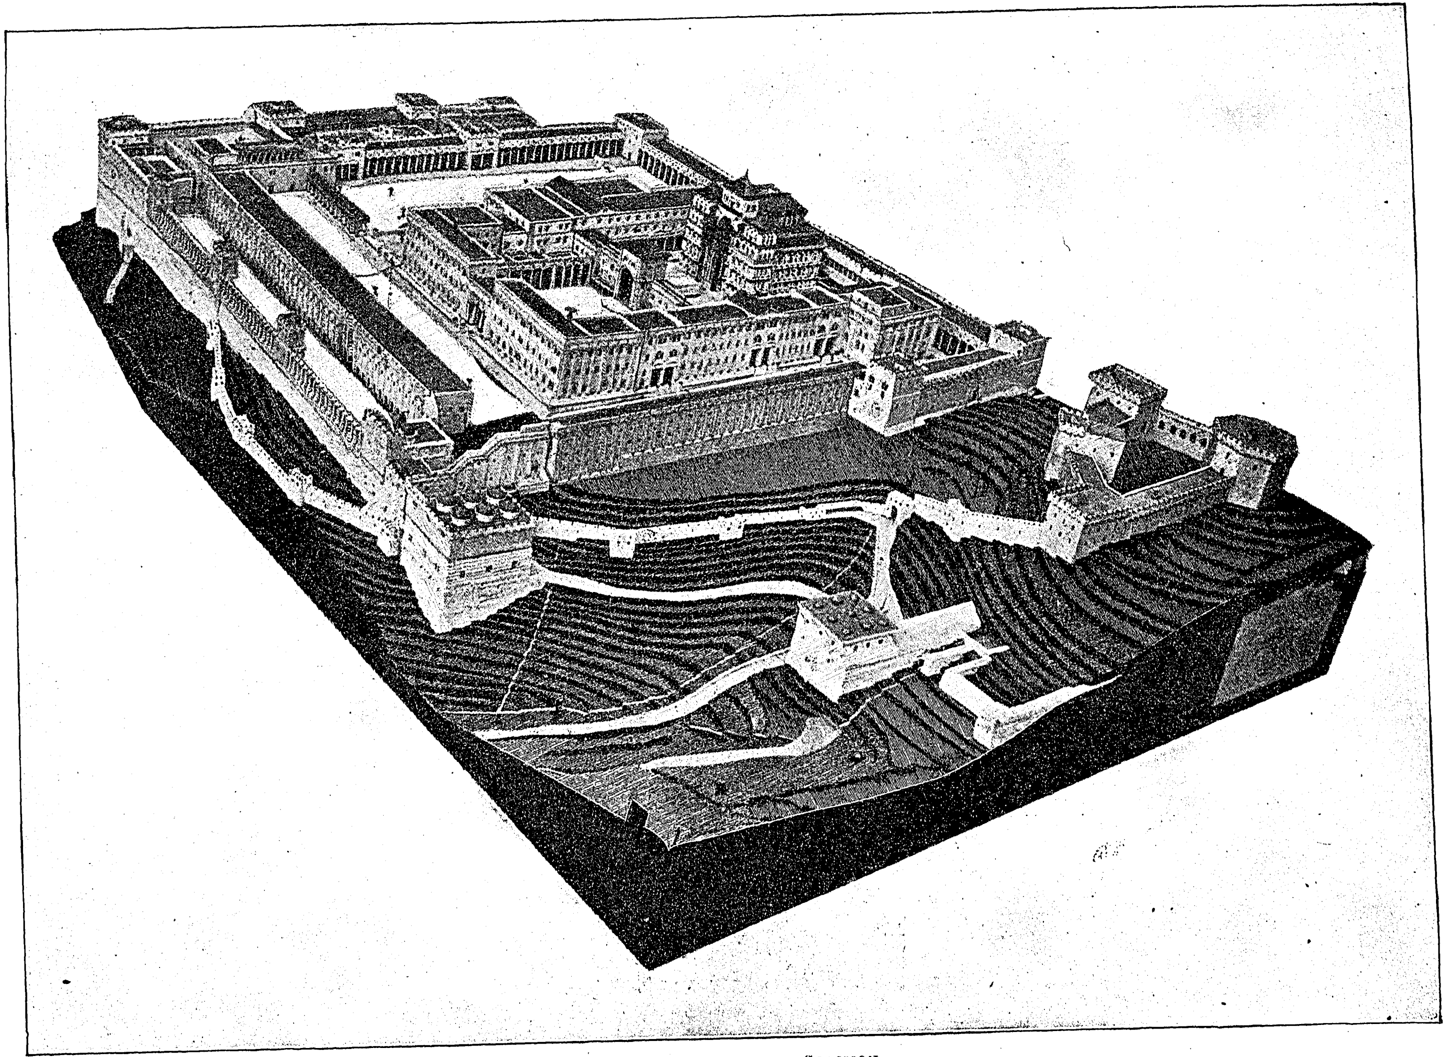


Substructure of Temple of Herod, Now Called "Solomon's Stables."
(From a photograph by the American Colony at Jerusalem.)

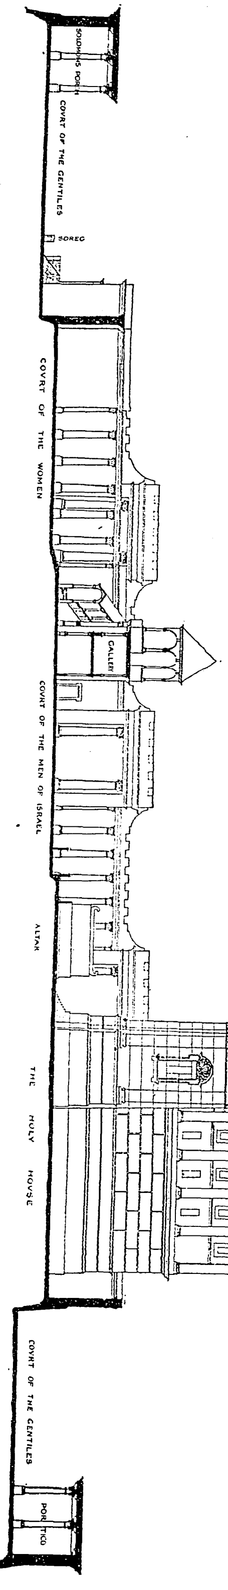
The Temple Courts.

If sacred tradition compelled Herod to conform closely to the ancient plan of the holy house, allowing him to vary little from precedents save in its façade, his Grecized taste and his genius for building found ample scope in the Temple courts and cloisters. First of all, he greatly enlarged the Temple area. Josephus says that before the time of Herod the Temple area was square, each side being a stadium ("Ant." xv. 11, § 3—conflicting with the statement of Hecatæus, see Jew. Encyc. xii. 97b), and that Herod so enlarged the courts that the perimeter was increased to six stadia ("B. J." v. 5, § 2). If the first part of this account is true, only the length of the Temple area was enlarged, the width remaining the same. It is more probable that Herod enlarged the area in both dimensions, though it is possible that it had been enlarged to the size of a square stadium by one of the Hasmoneans. The size to which Herod increased the area was almost that of the present Ḥaram enclosure. The sacred territory has been increased since the time of Herod only on the north.

In order to obtain space for this area on the top of a hill the sides of which sloped so steeply, it was necessary to extend artificially the surface of the hill itself. This was done, especially to the south, where the massive masonry (called by the Arabs "Solomon's Stables") which Herod constructed to support a pavement on a level with the surface of the hill farther to the north may still be seen. The whole was surrounded by a battlemented wall ("B. J." iv. 9, § 12). The number of gates which this wall contained is somewhat uncertain, as Josephus and the Mishnah differ. The former says ("Ant." xv. 11, § 5) that there were four gates in the western wall. Probably one of these was at the southwest corner and led to the upper city over the bridge where Robinson's arch may still be seen. This bridge, broken down by Pompey, was reconstructed; indeed, the remains of the arch in the modern wall are evidence that it was rebuilt. Probably there was another gate some 600 feet farther to the north,



VIEW OF THE TEMPLE OF SOLOMON.
(Reconstructed by Schick.)



SECTIONAL VIEW OF THE TEMPLE OF HEROD, LOOKING SOUTH.
(Reconstructed by Sanday.)

where Wilson's arch (comp. Warren and Conder, "Jerusalem," pp. 195 *et seq.*) supported a causeway across the valley to the city. The gates in the south wall may be more easily traced. Josephus says ("Ant." xv. 11, § 5) that it had gates in the middle; these the Mishnah calls "gates of Huldah," and they may still be traced in the substructures of the present wall. From them a double tunnel leads by an inclined plane under the modern mosque Al-Aḳṣa to the level of the Temple courts. About 250 feet farther to the east a triple gate may also be traced. Josephus does not mention this; but perhaps it was the second Huldah gate of the Mishnah.

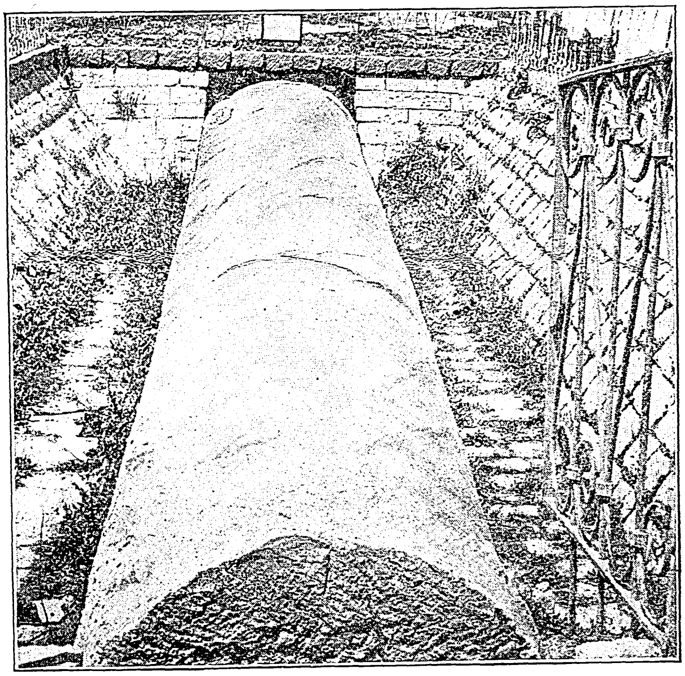
The Cloisters.

Around the entire interior of this wall were ranged porticoes or cloisters. The finest were those on the south. They consisted of four rows of Corinthian columns of white marble; and there were 162 columns in all. The ceilings were of carved wood ("Ant." xv. 11, § 5; "B. J." v. 5, § 2). The eastern cloister was known as "Solomon's Porch" (John x. 23; Acts iii. 11, v. 12); it must accordingly have been believed that there were here Solomonic substructures.

The Gates.

The open space beyond the cloisters was paved with various kinds of stone, probably forming a mosaic. This outer court was, strictly speaking, not a part of the Temple. Its soil was not sacred, and it might be entered by any one. Some distance within, one came to an interior court which was raised 15 cubits above the other. Access to it was gained by means of fourteen steps. This was the beginning of the sanctuary. It probably coincided with the elevated court still to be seen in the central part of the Ḥaram area. This raised court was surrounded by a terrace 10 cubits in breadth ("B. J." v. 5, § 2). A breastwork of stone ran around the whole at the level of the steps. On it were placed at frequent intervals inscriptions in Greek and Latin forbidding a non-Jew to enter farther on pain of death. One of these has been recovered. It reads: "No foreigner may pass within the lattice and wall around the sanctuary. Whoever is caught, the guilt for the death which will follow will be his own" (comp. "Pal. Explor. Fund, Quarterly Statement," 1871, p. 132; Benzinger, "Arch." p. 404; Nowack, "Lehrbuch der Hebräischen Archäologie," ii. 77). This enclosure was penetrated by nine gates. Four of these were on the north, four on the south, and one on the east, the western side having none. The eastern part of this court was separated from the western, and formed the court of the women. Women might pass beyond the court of the Gentiles into this court alone. The Temple proper might be entered by men only. One of the four gates on the north and one on the south gave entrance to the women's hall, as did likewise the sole gate which led on the east from the court of the Gentiles. The remaining six of the nine gates led into the court of the men. A large gate led from the court of the women into the court of the men. The gates had double doors which were covered with silver and gold donated by a certain Alexander of Alexandria. The gate on the east was especially magnificent, and was covered with Corinthian bronze. The greatest of all the gates was, however, the "gate of Nicanor," which led from the court of the women into the court of the men. It was the "great gate," its height being 50 cubits and its breadth 40 cubits ("B. J." v. 5, § 3); fifteen steps led up to it from the women's court. Whether this gate or the one directly east of it in the eastern wall of the women's court was the gate "Beautiful" of Acts iii. 2 can not now be determined. Each gate was porch-like in form.

Along the enclosing wall of the men's court was a series of chambers for storing utensils, vestments, and other articles. Within this western court, or court of the men, was another raised platform, to which access was gained by twelve steps, and on which the Temple, as already described, was situated. On the north the fortress which had existed from the time of Nehemiah was rebuilt and named "Antonia" in honor of Mark Antony. It was connected with the Temple by a secret passage ("Ant." xv. 11, § 7).



Column from the Temple of Herod.
(From a photograph by the Palestine Exploration Fund.)

The construction of all this work occupied, according to John ii. 20, forty-six years; in reality, however, it was not completed until the procuratorship of Albinus (62-64 C.E.), more than eighty years after its commencement. Less than a decade later (70) it was destroyed by fire during the siege of Jerusalem by Titus.

TEMPLE OF MOUNT GERIZIM. See Gerizim, Mount.

TEMPLE OF ONIAS. See Leontopolis.

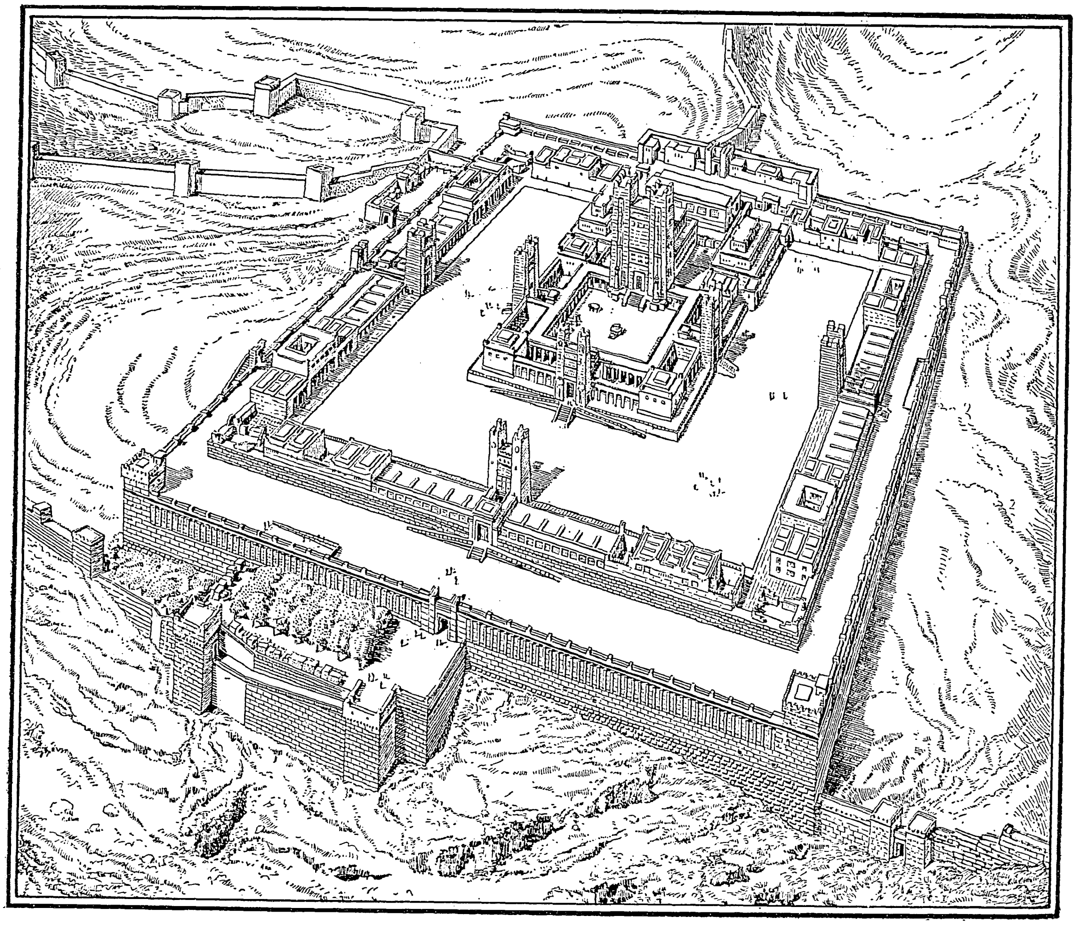
TEMPLE, PLAN OF SECOND: The plan and description of the Second Temple according to Talmudic sources were as follows:

Mount Moriah, known as the "Har ha-Bayit" (Mount of the House), had an area of 500 × 500 cubits or ells (1 cubit = 21.85 inches). It was lowest on the east side, rising gradually to its highest point on the west, and was walled on all sides. The main entrance was on the south, and consisted of two gates near the center, the one on the right for admission, and the other for exit. The two gates were named "Huldah," after the prophetess who used to preach there to the people; the space on this side being the greatest, 265 cubits in width. The next largest space, 115 cubits, was on the east side. The eastern gate was called "Shushan" because it bore a model of Susa, the capital of Persia, in recognition of the permission given by that government to rebuild the Temple. The entrance on the north was through the "Tadi" gate, *i.e.*, the gate of obscurity or privacy, it being used only by those who were ceremonially unclean and by mourners and those under the ban. The space on this side was 100 cubits. The space on the west was the least of all, measuring only 63 cubits to the court wall. The gate on this side was called "Ḳiponus," meaning "garden bower," from the fact that Joshua planted on its site the herbs, etc., from which the ingredients for the incense were derived. Each gate was 10 cubits wide and 20 cubits high. The height of the walls above the gates is not recorded; but it does not appear that they were raised much above the lintels. The Tadi gate had no lintel, but was triangular in shape, this distinguishing it as a private entrance. The walls were all 5 cubits thick and of a uniform height. From the eastern side of the mount, which, as stated above, was the lowest, a flight of steps, consisting of thirty-nine of a rise of ½ cubit each and one of 1 cubit (total, 20½ cubits), gave access to the floor of the Hekal, which was nearly level with the top of the eastern wall, rendering it easy for the priest to observe the inside of the Holy of Holies while standing on Mount Olivet opposite the eastern gate, when he sprinkled the ashes of the red heifer in the direction of the Sanctuary.

A reticulated fence of sticks, called "soreg," 10 handbreadths in height and at a distance of 10 cubits from the outer wall of the courts, surrounded the

The Soreg.

Temple. This fence was on the edge of the foundation of the platform called "ḥel," which was between the fence and the courts. The soreg served as a barrier beyond which Gentiles and the ceremonially unclean might not pass (Kelim i. 8); and it was provided with a guarded entrance opposite each gate of the courts. The exclusion of Gentiles angered the Greeks, who, when they gained control over the Jews, made thirteen openings in the soreg; but after the Maccabean victory these breaches were repaired.



The Temple Area.
(Reconstructed by Chipiez.)

Leading up from the ḥel to the courts were twelve marble steps, each of ½ cubit rise. These steps were protected from the sun and rain; and on them the people sat and rested (Pes. 13b).

The Courts.

Within the soreg were the courts: the outer court, known as "'ezrat nashim" (women's hall), to the east, and the inner court, the Temple enclosure, to the west. The two together measured 135 × 322 cubits, the dimensions of the outer court being 135 × 135 cubits and those of the inner one 135 × 187 cubits. The Temple service was conducted in the inner court, the outer one being used mainly for the gathering of the people, including women (hence its name), especially during the celebration of the water libation at the close of the first day of Sukkot, when the women occupied the galleries above (see Gallery). This court contained four unroofed chambers, one at each corner, each measuring 40 × 40 cubits. They were used as follows: (1) that on the southeast as the Chamber of the Nazarites, where, after the expiration of their terms, the Nazarites cooked their peace-offerings and burned their superfluous hair; (2) that on the northeast as the Chamber of Wood, where fuel for the altar and the hearth was stored; (3) that on the northwest as the Chamber of the Lepers, where, after they had been cured and had bathed on the eighth day of their purification, lepers remained prior to their admittance to the inner court for the anointing of their toes, etc.; (4) that on the southwest as the Chamber of Oils, in which oil for the candlestick and the meal-offering, as well as wine for the libation, was kept.

The inner court, with the Nicanor gate in the center, was 7½ cubits higher than the outer one, and was connected with the latter by fifteen steps (each of ½ cubit rise). On these steps the Levites sang the "hymns of degrees," fifteen in number (Ps. cxx.–cxxxv.), corresponding with the number of steps (Yoma 38a); these were recited at the festival of the rejoicing of the water (Suk. 51b). Several chambers built under the inner court opened on either side of the staircase into the outer court below; among these were two music chambers for the Levites. In the inner court above were two chambers, one on each side of the Nicanor gate. On the right was the Chamber of Phinehas, the vestment-keeper, who had charge of the priests' lockers built in the wall and who arranged for the 24 patrols ("mishmarot"; Tamid v. 3). To the left was the Chamber of the Pancake-Makers ("'ose ḥabittim"), where twelve cakes were prepared daily, six for the morning and six for the afternoon sacrifice (*ib.* i. 3). The high priest had a special chamber called "lishkat parhedrin" (πάρεδροι = "assessors") = "the Counselors' Chamber" (Yoma 10a). The inner court was divided. On the east was the Israelites' hall ("'ezrat Yisrael"), 135 × 11 cubits; and on the west the priests' hall ("'ezrat kohanim"). Slats or sticks, also a step of 1 cubit rise, divided the priests' hall from that of the Israelites. In front of the priests' hall stood the dais (Dukan), three stone steps, from the highest of which the priests blessed the people. This hall contained also several chambers (Mid. v. 16).

The Hall of the Priests.

The space between the priests' hall and the vestibule of the Temple proper was 54 cubits. The altar occupied 32 cubits, leaving 22 cubits vacant. The space of 135 cubits along the width of the 'azarah, from north to south, was made up as follows: 8 cubits space from the wall; 12½ cubits for the four rows of posts on which the slaughtered sacrificial victims were hung and flayed; 4 cubits for the eight marble tables, in two rows, on which the animal sacrifices were washed (*ib.* iii. 2); 4 cubits between the tables and the rings; 24 cubits for the twenty-four rings, in four rows, to which the animals were secured for slaughtering (*ib.* v. 2); 8 cubits between the rings and the altar; 32 cubits for the altar; 30 cubits for the "kebesh" (plank or bridge) leading up to the altar; and 12½ cubits to the southern wall. In front of the kebesh were two tables. The laver stood southwest of the altar.

On the north of the 'azarah was the Chamber of the Hearth ("Bet ha-Moḳed"), which extended to the ḥel, and part of which was used as a shelter for the patrol. This chamber was capacious and was surmounted by a dome. Four small chambers opened into it: (1) the one in which the sacrificial lambs were kept, on the southwest; (2) that in which the showbread was made, on the southeast; (3) a chamber in which the stones of the altar defiled by the Greeks were preserved (I Macc. ii. 25), on the northeast; (4) the bath-chamber, on the northwest. A row of slats or sticks divided the Bet ha-Moḳed, separating the sacred part within the court from the secular part in the ḥel. In the bath-chamber was a trap-door leading to a bath and lavatory below (*ib.* i. 6; Tamid iii. 3).

The Vestibule.

The vestibule was 6 cubits higher than the 'azarah, and was connected with it by twelve steps, each of ½ cubit rise. The front wall of the vestibule was 100 cubits long from north to south; its thickness was 5 cubits; and its height up to the Hekal was 100 cubits (*ib.* iv. 7). The entrance to the vestibule was 20 cubits wide and 40 cubits high. It had in place of doors a richly embroidered curtain. The lintel of this entranceway consisted of five superimposed oaken beams artistically carved. The lower one extended 1 cubit on each side over the entrance, which was 20 cubits wide; the second beam extended 2 cubits, or 1 cubit beyond the first; and so on to the fifth, which extended 5 cubits on each side, bringing its total length to 30 cubits. A row of stones separated each beam from the next (*ib.* iii. 4). Cross-beams of cedar stretched from the vestibule wall to that of the Hekal. From the ceiling of the vestibule were suspended golden chains, up which the young priests climbed to see the crowns in the windows of the Hekal, such as the crowns of Helem, Tobijah, Jedaiah, and Hen ben Zephaniah "for a memorial in the Temple of the Lord" (Zech. vi. 14; Mid. iii. 5). From the cedar cross-beams was suspended a golden vine on the branches of which various donors hung nuggets of gold and precious vessels. The vine was a symbol of Israel. The dimensions of the vestibule were 11 cubits from east to west and 70 cubits along the Hekal (*ib.* iv. 7). In it stood two tables: one of marble, to the right, on which were laid the loaves of showbread prior to their being taken into the Hekal; and one of gold, to the left, on which the old loaves were temporarily placed (Sheḳ. vi. 4; Men. xi. 7). On each side, north and south of the vestibule, was a Chamber of Knives ("Bet Ḥalifot"), each chamber being 11 × 15 × 8 cubits; evidently they were used for other purposes besides the storing of the sacrificial knives. A wicket on either side of the vestibule gave entrance to the closets or cells around the Hekal. The southern wicket, however, was always closed.

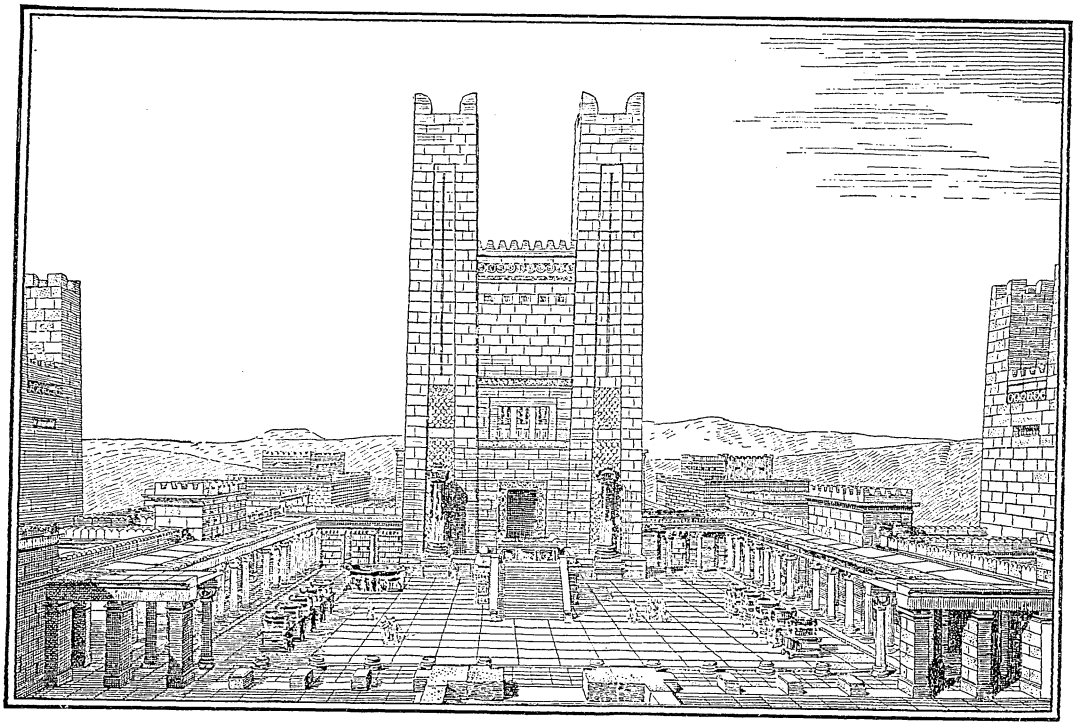
The Hekal.

The Temple proper, known as the Hekal, had an entrance 10 × 20 cubits, with a double door. The thickness of the walls was 6 cubits. The height of the Hekal was 100 cubits, made up as follows: foundation 6 cubits; inner height 40; paneling (entablature) 1; receptacle for water, which might drop through a leak in the roof, 2; beams 1; concrete of ceiling 1; attic 40; paneling 1; receptacle for dripping 2; beams 1; concrete of ceiling 1; balustrade 3; device to exclude the ravens 1 (*ib.* vi. 5). It is thus seen that the Hekal was a two-story building, the upper story being of the same size as that below. The Hekal proper was 20 × 40 × 40 cubits. Besides the golden table to the right, on which every Sabbath the showbread was placed, and the seven-branched candlestick to the left, were five tables along the north and five tables along the south, with five menorot on each side, which Solomon had added to the Temple. The golden altar stood between the showbread-table and the candlestick, a little nearer the vestibule. The Hekal had windows near the top.

The dimensions of the Holy of Holies were 20 × 20 × 40 cubits. It was divided from the Hekal by two curtains. The outer one was folded back to the right; the inner, to the left. There was a space of 1 cubit between the two, which was considered doubtful ground, it being uncertain whether it belonged to the Hekal or to the Holy of Holies; hence the space was named "ammah ṭeraḳsin" (*τάραξις* = "confusion"). Nearly in the center of the Holy of Holies, somewhat toward the west, was the foundation-stone ("eben shetiyyah"), on which was placed the Ark of the Covenant. In the Second Temple the Ark was missing, and the eben shetiyyah was there exposed to the extent of three thumb-breadths (about 6 inches) from the ground.

Cells and Attic.

Thirty-eight cells surrounded the Hekal. There were fifteen, in three rows of five cells each on the north side, and the same number on the south. The bottom row was 5 cubits deep; the second, 6 cubits; and the third, 7 cubits. The length of the cells from east to west is not recorded; but it is presumed to have been about 8 cubits. On the west side of the Hekal were eight cells in three rows, namely, two of three cells each and one, the uppermost, of two. Their depth corresponded with that of those on the sides. Three doors in each cell connected it with the side and upper cells, except in the case of the two corner cells on the northeast and southeast, each of which had 1 (2 ?) in addition, connecting with the Hekal and the vestibule. The door of the southeast cell to the vestibule was, however, never used (*ib.* iv. 7). The cells had bay windows. The thickness of the walls was 5 cubits, and there was a space of 3 cubits between the lower cells and the wall, 5 cubits thick, which surrounded the cells; this space on the north and south sides was a "mesibbah" (winding passageway). A bridge reached from this passage to the upper cells on the northwest. From the upper cells southwest the bridge stretched upward to the southeast corner of the Hekal, connecting with the attic, whence a trap-door and staircase led down to the roof of the Hekal (*ib.* iv. 5). On the south side a leader carried off the rain from the roofs of the Hekal and of the upper cells (*ib.*).



Court of Priests.
(Reconstructed by Chipiez.)

The use of the attic above the Hekal and of the 38 cells is not mentioned in the Talmud, but there is no doubt that they were built for defense and for the storage of weapons, etc., when necessary. The two chambers for knives in the vestibule are significant in this connection.

It appears that there was a colonnade or veranda inside the courts; the size of it is not recorded.

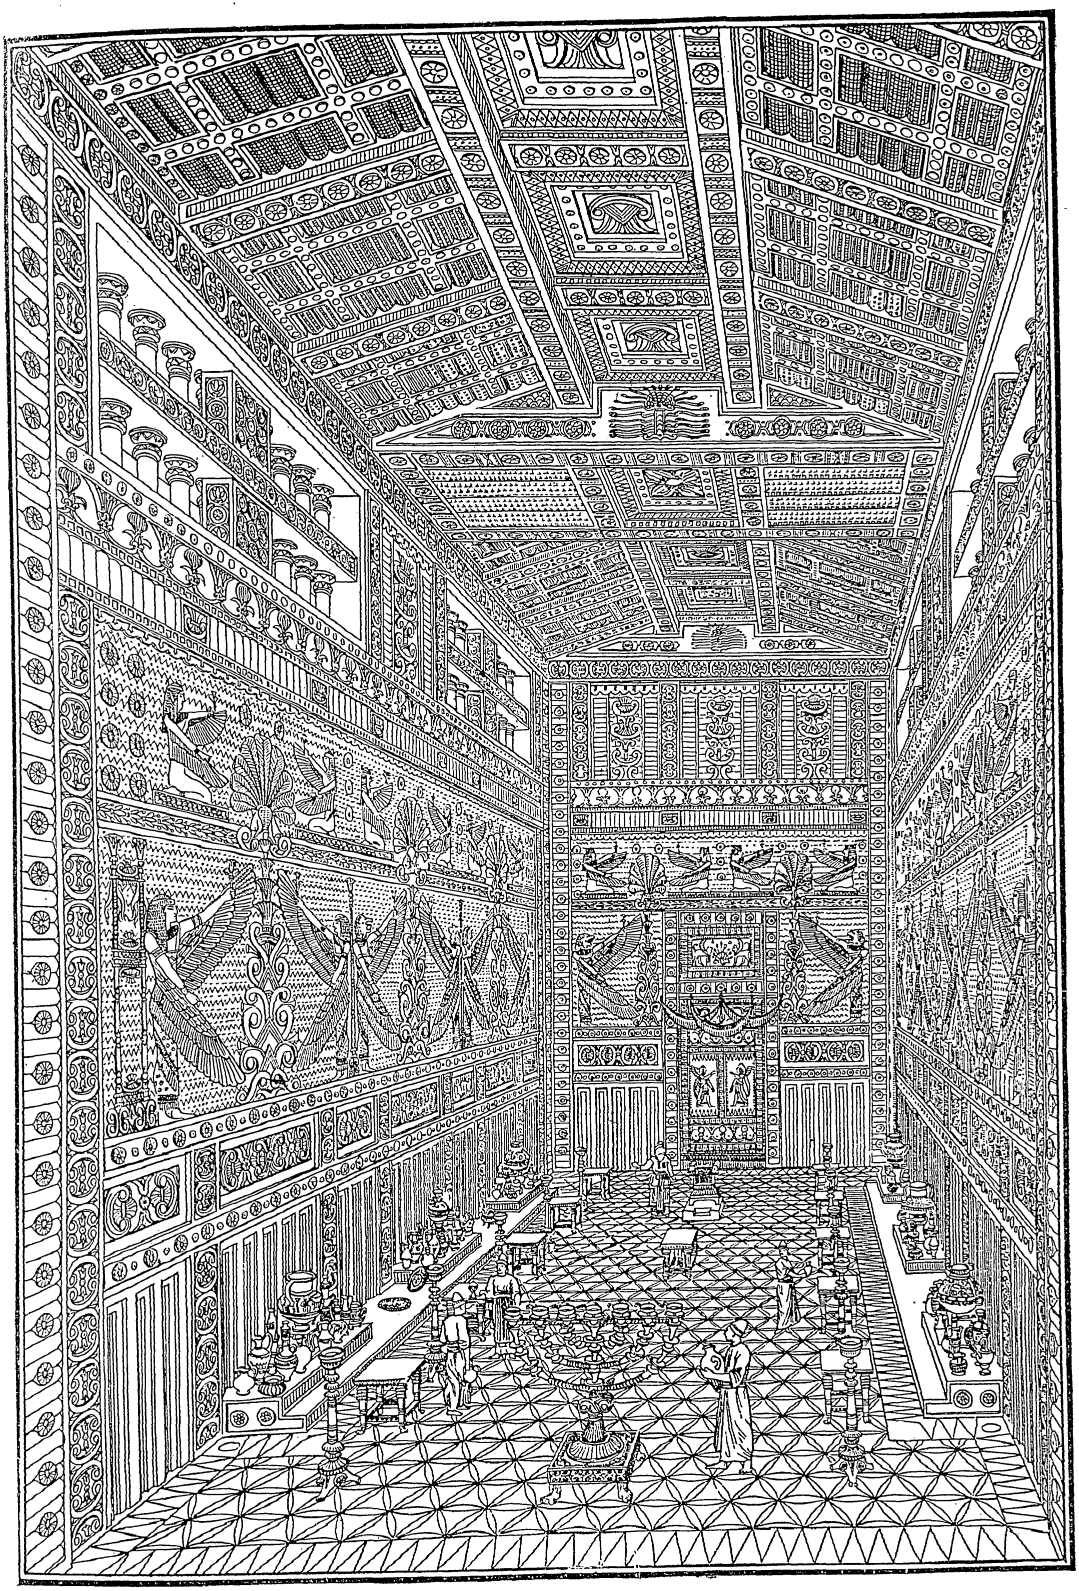
J. J. D. E.

TEMPLE IN RABBINICAL LITERATURE: Mount Moriah, on which the Temple was erected, is known by tradition as the spot where Adam was born and where he built an altar to God; where Cain and Abel offered their sacrifices; and



HOLY OF HOLIES OF THE TEMPLE AT JERUSALEM.

(Reconstructed by Chipiez.)

Site.

where Noah built an altar after the Flood (Gen. viii. 20). Abraham offered Isaac as a sacrifice on this "mount of the Lord" (*ib.* xxii. 14); David purchased the spot from Araunah "to build an altar unto the Lord" (II Sam. xxiv. 21); and finally it was chosen as the site of the permanent altar in the Holy of Holies of Solomon's Temple (Maimonides, "Yad," Bet ha-Beḥirah, ii. 2). The stone on which rested the Ark of the Covenant was called "eben shetiyyah" = "the foundation-stone," on which the world was based (Yoma 54b). The west side of the mount was selected for the Temple site because the Shekinah rests in the west (B. B. 25a), and also in opposition to the rite of the heathen, who worship the sun in the east (Maimonides, "Moreh," iii. 45).

Mount Moriah was allotted by Joshua to the tribes of Judah and Benjamin. The area of the mount, the halls, and the chambers of the courts were assigned to Judah; but the vestibule ("ulam"), the Hekal, and the Holy of Holies were built on the lot of Benjamin. However, a strip of land running into the Hekal, on which stood the altar, belonged to Judah. According to another authority, Jerusalem was not divided among the tribes, and Mount Moriah became their common property.

King David proposed to build the Temple; and he designed the plans and prepared the materials. God would not, however, allow him to build it because he had been a man of war and had shed blood (I Chron. xxviii. 3); but its erection was entrusted to Solomon, who, being a man of peace, was well fitted to construct an edifice representing peace. The people, being aware of this fact, anxiously

awaited Solomon's accession. A haggadah says David once overheard the people say: "How soon will the old man die, that his son may commence to build the Temple and we may visit the house of the Lord?" Their talk pleased David somewhat; and he chanted: "I was glad when they said unto me, Let us go into the house of the Lord" (Ps. cxxii. 1). The Almighty consoled David, assuring him that "A day in thy courts is better than a thousand" (*ib.* lxxxiv. 10); that is, God prefers one day of David's study of the Law in the courts of learning to 1,000 offerings of sacrifice in the Temple by Solomon (Mak. 10a). In the same sense Raba said: "One who is engaged in the study of the Law need bring neither a burnt offering, a sin-offering, nor a meal-offering" (Men. 110a), showing the tendency of the Talmudists to belittle the importance of sacrifices.

Legends of David and Solomon.

David was apprehensive lest his enemies should assign his sin with Bath-sheba as the reason for God's refusal to allow him to build the Temple: he therefore appealed for divine intervention, praying, "Show me a token for good; that they which hate me may see it, and be ashamed" (Ps. lxxxvi. 17). God granted his wish when Solomon had finished the Temple and was about to bring in the Ark to the Holy of Holies. At this moment the doors slammed to and could not be opened. Solomon thereupon recited twenty-four hymns and cried: "Lift up your heads, O ye gates . . . ye everlasting doors; and the King of glory shall come in" (*ib.* xxiv. 7). But no response came. Finally he prayed, "O Lord God, turn not away the face of thine anointed: remember the mercies of David thy servant" (II Chron. vi. 42); and immediately the doors opened of themselves. Then the enemies of David were cast down, and their faces turned black, the people being convinced that the sin of David had been forgiven (Shab. 30a).

Everything connected with the Temple is distinguished as "yedid" = "amiable," "beloved." A Talmudic epigram runs: "Solomon, who was named Jedidiah [= "God's beloved"; II Sam. xii. 25], had built the Temple [Tabernacle], referred to as 'amiable' [Ps. lxxxiv. 1] and situated in the lot of Benjamin 'the beloved' [Deut. xxxiii. 12], in honor of God, who is 'beloved' [Isa. v. 1], in order that the sins of Israel who is 'dearly beloved' [Jer. xii. 7] might be forgiven" (Men. 53a, b).

Through the agency of Ashmedai, Solomon acquired the Shamir, either a worm or an exceedingly hard stone, which hewed or cut with perfect ease all kinds of granite, marble, and glass necessary in building the Temple (Giṭ. 68b). Indeed, its mere touch cleft the hardest substance in existence (Soṭah 9a). In size the shamir was no larger than a grain; and it had been preserved since the Creation. R. Oshaya (Hoshaiah) declared that Solomon planted in the Temple various kinds of aromatic trees of gold, bearing fruit which, when the heathen entered the Temple, withered away, but which the Almighty will restore in the future Temple: "It shall blossom abundantly . . . the glory of Lebanon shall be given unto it" (Isa. xxxv. 2; Yoma 21b). "Lebanon" is the poetic name of the Temple, because the latter was built of cedars of Lebanon.

Herod's Temple.

Solomon's Temple was an artistic structure of the highest conception. In its commanding position on the mount, in the pleasing effect of its white stone ornamented with cedar-wood, and in its symmetrical proportions it surpassed Herod's Temple, though the latter exceeded the former in mere magnificence. "One who did not see Herod's Temple missed seeing the most beautiful building in the world. It was constructed entirely of polished granite interspersed with dark-colored marble, with beveled edges, set in plaster. Herod even proposed to fill up the edges with gold; but the Rabbis advised him to abstain from doing so, as the white plaster combined with the granite and marble gave the Temple the appearance of waves of the sea" (Suk. 57b). Thus it is evident that Herod was somewhat gaudy in his taste and that his Temple was less artistic in design and coloring than that of Solomon. Two views are expressed in commenting on the verse "The glory of this latter house shall be greater than that of the former" (Hag. ii. 8). One is that the Temple was more beautiful than its predecessor, while the other says it was only "greater" in years, alluding to the fact that it stood 420 years, whereas that of Solomon existed for 410 years only (Mid. iv. 6; B. B. 3a).

The Two Temples Compared.

The sacredness of Solomon's Temple was greater than that of Herod's, as the latter lacked five important accessories: (1) the Ark and the "kapporet" (mercy-seat, cherubim), (2) the divine fire, (3) the Shekinah, (4) the Holy Spirit, and (5) Urim and Thummim (Yoma 21b). It lacked also the pot of manna and Aaron's staff alongside the Ark, the jar of holy oil, and the coffer with jewels of gold presented by the Philistines as a trespass-offering on returning the Ark (I Sam. vi. 8). King Josiah, anticipating the fall of the Temple, concealed these sacred objects (Yer. Sheḳ. vi. 1). Evidently they were hidden in the subterranean passage under the Temple, where, it is claimed, were buried also, as soon as the Temple was finished, all the parts of the Tabernacle (Soṭah 9a). A priest in the Temple once noticed that the flooring under his feet was uneven; and he showed it to a comrade, with a view to investigation. No sooner had he spoken about it, however, than a spark issued from a crevice in the floor and killed him. The priests then surmised that the Ark was buried in that place. R. Hoshaiah says that the priest pounded the floor with a hammer, whereupon a fire arose and consumed him (Yer. Sheḳ. vi. 2; Yoma 54a). In the Second Temple two curtains, instead of the cedar-wood partition of the First Temple, separated the Hekal from the Holy of Holies. The First Temple was destroyed on account of three sins, namely, bloodshed, immorality, and idolatry. In the Second Temple there were learning, obedience to the commandments, and charity, but there were also enmity and malevolence among the people, which outweighed the three great sins for which the First Temple was destroyed (Yoma 9b).

After the destruction of the Temple the Rabbis endeavored to enshrine its memory in the hearts of the Jews. As a reminiscence of its usage ("zeker le-miḳdash ") R. Johanan b. Zakkai ordered that the celebration of the lulab be continued for seven days during the Sukkot festival as had been the custom in the Temple, although in Temple times the celebration was observed outside the sanctuary on one day only (Suk. iii. 12). As a sign of mourning for the destruction of the Temple, one should not whitewash or paint his house entirely, but should leave a space about one cubit square above the door (B. B. 60b). See Sanctuary.

J. J. D. E.

TEMPLE, THE SECOND: The Temple of Solomon was destroyed by Nebuchadnezzar in 586 B.C. (II Kings xxv. 9). It is usually supposed that its sacred site was desolate and unused for fifty years, until the accession of Cyrus made the rebuilding of the Temple possible. This view is shown by Jer. xli. 5 to be mistaken; for two months after the city was destroyed a company of men from Samaria, Shechem, and Shiloh came to keep the Feast of Ingathering at Jerusalem. It is true that Giesebrecht (*ad loc.*) argues that the men were bound for Mizpah and not for Jerusalem; but if that be so the whole narrative is meaningless. No reason is known why at this date men from a distance should go to Mizpah to worship. More probably they were on their way to Jerusalem, when the messenger from Mizpah enticed them into that town. It is probable, therefore, that, though the building was in ruins, the site of the Temple was used by the poor Hebrews resident in Palestine as a place of worship all through the Exile.

The Decree of Cyrus.

With the accession of Cyrus in 538 it became possible—that monarch replacing the old Assyro-Babylonian policy of transportation by a policy of toleration—for the Jews to resuscitate their religious institutions. The Chronicler, who wrote much of the Book of Ezra, represents Cyrus as issuing a decree for the rebuilding of the Temple at Jerusalem; but this assertion is of doubtful authority. The Aramaic document in Ezra relates that the sacred vessels which Nebuchadnezzar had carried away were delivered to Sheshbazzar with authority to take them back and rebuild the Temple (Ezra v. 14, 15). It states also that Sheshbazzar "laid the foundations of the house," but it is doubtful if any building was then done, as the house remained unbuilt in the time of Haggai, twenty years later. The Chronicler (Ezra iii. 1) declares that Zerubbabel (whom he puts in place of Sheshbazzar, thus placing him twenty years too early) "builded the altar of the God of Israel, to offer burnt offerings thereon"; but as Haggai (ii. 14) declared that all which was offered here was unclean, it is altogether probable that the altar was the same that had been used throughout the Exile, and that the Chronicler's statement is a mistake.

The Rebuilding.

In the second year of the reign of Darius Hystaspes (519) the real rebuilding began. The people were aroused to the effort by the preaching of Haggai and Zechariah; and in the course of three years the rebuilding was accomplished. It is now generally recognized that the representation in the Book of Ezra, that the work was begun immediately upon the accession of Cyrus and was then interrupted by opposition from Israel's neighbors, is unhistorical.

Dimensions.

Of the dimensions of this Temple there are given but few data. Hecatæus, a Greek writer contemporary with Alexander the Great, is quoted by Josephus ("Contra Ap." i. 22) as saying that the Temple area was enclosed by a wall a plethra, or 500 Greek feet, in length and 100 Greek cubits in breadth, *i.e.*, 485½ × 145½ English feet. The altar was built of unhewn stones in conformity with the precepts of the Law (comp. I Macc. iv. 44 *et seq.*). The dimensions of the building were probably the same as those of Solomon's Temple, though the edifice was apparently at first lacking in ornament. It was probably because the building was less ornate that the old men who had seen the former Temple wept at the sight of its successor (Ezra iii. 12; Josephus, "Ant." xi. 4, § 2). Nehemiah in rebuilding the city wall followed the lines of the former wall, and it is altogether likely that the old lines were followed in building the walls of the Temple also. The statement in Ezra vi. 3 that Cyrus gave permission to make the Temple 60 cubits high and 60 cubits broad has probably no connection with its actual dimensions: how the statement arose can now be only conjectured. The authorities for this period make no mention of the palace of Solomon. If the wall of the Temple was at this period less than 500 feet long, the whole Temple court occupied but about one-third the length of the present Ḥaram area, and less than half its width (comp. Baedeker, "Palestine and Syria," ed. 1898, p. 39). It is probable that the site of Solomon's palace either lay desolate or was covered by other dwellings.

The Temple was surrounded by two courts (I Macc. i. 22, iv. 48); but until the time of Alexander Jannæus (104–79 B.C.) it would seem that these were separated by a difference of elevation only. That ruler surrounded the inner court with a wall of wood because the Pharisees, with whom he was unpopular, had pelted him with citrons while officiating at the altar at the Feast of Tabernacles (comp. "Ant." xiii. 13, § 5). The inner court contained chambers for storing the garments of the priests (I Macc. iv. 38, 57). The stone altar of burnt offering probably occupied the site of the bronze altar in Solomon's Temple.

Furniture of the Temple.

The Temple, or Holy Place, seems to have had two veils or curtains at its front (*ib.* iv. 51). It had also one holy candlestick, a golden altar of incense, and a table of showbread (*ib.* i. 21, 22). Separated from the Temple by another veil was the Holy of Holies (Josephus, "B. J." v. 5, § 5). According to Josephus, this contained nothing; but, according to the Mishnah (Mid. iii. 6), the "stone of foundation" stood where the Ark used to be, and the high priest put his censer on it on the Day of Atonement. According to the Babylonian Talmud (Yoma 22b), the Second Temple lacked five things which had been in Solomon's Temple, namely, the Ark, the sacred fire, the Shekinah, the Holy Spirit, and the Urim and Thummim.

In the time of Nehemiah there were two towers, named respectively Hananeel and Meah, which probably formed parts of a fortress on the site afterward occupied by the tower Antonia (comp. Neh. xii. 39, and Mitchell in "Jour. Bib. Lit." xxii. 144). The small size of the Temple area at this period makes it improbable that this fortress adjoined the Temple court. The "gate of the guard" (Neh. xii. 39) was probably an entrance into the Temple court on the north side.

History.

From the time of Zerubbabel to the time of Antiochus Epiphanes the history of this Temple was comparatively uneventful. Sirach (Ecclus.) l. 1 *et seq.* says that "Simon, son of Onias, the great priest," repaired the Temple and fortified it; but the text of the passage is corrupt. In the year 168 Antiochus, as a part of a policy to enforce Hellenistic practises on the Jews, robbed the Temple of its candlestick, golden altar, table of showbread, and veils (these being its distinctive furniture), and compelled the high priest to sacrifice swine upon its altar. This led to the Maccabean revolt (comp. I Macc. i.), as a result of which the Jews after three years regained possession of their Temple and rededicated it. They carefully replaced the stone altar of burnt offering with stones which had not been defiled, and replaced the other characteristic articles of furniture (*ib.* iv. 43–56). Judas Maccabeus at this time fortified the Temple with high walls and towers (*ib.* iv. 60, vi. 7); so that thenceforth the Temple was the real citadel of Jerusalem. These walls were pulled down by Antiochus V. (*ib.* vi. 62), but were restored by Jonathan Maccabeus ("Ant." xiii. 5, § 11). The fortifications were afterward strengthened by Simon (I Macc. xiii. 52). At the time of the rededication, in the year 165, the front of the Temple was decorated with gilded crowns and shields (*ib.* iv. 57).

At some time during the ascendency of the Hasmonean dynasty a bridge was built across the Tyropœon valley to connect the Temple with the western hill ("Ant." xiv. 4, § 2). This bridge was probably situated at the point where Robinson's arch (so called because its nature and importance were first discovered by Prof. Edward Robinson; see his "Biblical Researches," ed. 1856, i. 287 *et seq.*) may still be seen. The nature and purpose of this bridge have been regarded as obscure problems; but there can be little doubt that the structure was intended to afford easy access to the Temple from the royal palace which the Hasmoneans had built on the western hill ("Ant." xx. 8, § 11). From this palace the movements of people in the Temple courts could be seen, as Josephus records; and as the Hasmoneans were high priests as well as monarchs, the purpose of the bridge is clear.

In 63 B.C. Pompey, the Roman general, captured Jerusalem and had a hard struggle to take the Temple ("Ant." xiv. 4). In the conflict the bridge was broken down. In exploring Jerusalem Sir Charles Warren found its remains, or the remains of its successor, lying in the ancient bed of the Tyropœon valley eighty feet below (comp. Warren and Conder, "Jerusalem," p. 184, London, 1884). Pompey did not harm the Temple itself or its furniture; but nine years later Crassus plundered it of all its gold ("Ant." xiv. 7, § 1). In 37 B.C Herod during his siege of Jerusalem burned some of the cloisters about the courts, but did not otherwise harm the Temple (ib. 16, § 2).

TEMPLE OF SOLOMON.—Biblical Data:

David, according to II Sam. vii. 2 *et seq.*, desired to build a temple for YHWH, but was not permitted to do so, although, according to the Chronicler (I Chron. xxii. 14 *et seq.*), he prepared for the building a large quantity of material, which he later gave to his son Solomon. David also purchased a thrashing-floor from Araunah the Jebusite (II Sam. xxiv. 21 *et seq.*), on which he offered sacrifice; and there Solomon afterward built his Temple (II Chron. iii. 1). In preparation for the building Solomon made an alliance with Hiram, King of Tyre, who furnished him with skilled workmen and, apparently, permitted him to cut timber in Lebanon. Solomon began to build the Temple in the fourth year of his reign; its erection occupied seven years (I Kings vi. 37, 38).

The structure was 60 cubits long, 20 cubits wide, and 30 cubits high (I Kings vi. 2). It faced the east (Ezek. xlvii. 1). Before the Temple stood a porch 20 cubits long (corresponding to the width of the Temple) and 10 cubits deep (I Kings vi. 3). II Chron. iii. 4 adds the curious statement (probably corrupted from the statement of the depth of the porch) that this porch was 120 cubits high, which would make it a regular tower. The stone of which the Temple was built was dressed at the quarry, so that no work of that kind was necessary within the Temple precincts (I Kings vi. 7). The roof was of cedar, and the whole house was overlaid with gold (I Kings vi. 9, 22).

Structure.

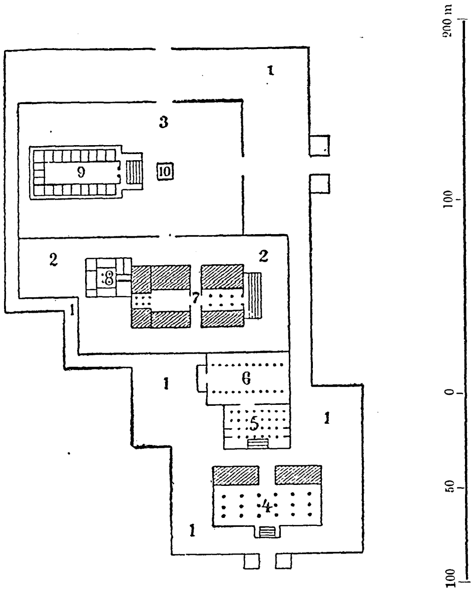
The structure was three stories in height. The wall was not of equal thickness all the way up, but had ledges on which the floor-beams rested. Around the structure was a series of chambers, of varying size because of the differences in the thickness of the wall. Those of the lowest story were 5 cubits in depth; those of the second 6; and those of the third, 7. The Temple was also provided with windows of fixed latticework (I Kings vi. 4, 6, 8, 10). At the rear of this edifice was the Holy of Holies, which was in form a perfect cube, each of its dimensions being 20 cubits. The interior was lined with cedar and overlaid with pure gold. The Holy of Holies contained two cherubim of olive-wood, each 10 cubits high (I Kings vi. 16, 20, 21, 23–28) and each having outspread wings 10 cubits from tip to tip, so that, since they stood side by side, the wings touched the wall on either side and met in the center of the room (comp. CHERUB). According to II Chron. iii. 14, a veil of variegated linen separated the Holy of Holies from the rest of the Temple.

The rest of the building, the Holy Place, was of the same width and height as the Holy of Holies, but 40 cubits in length. Its walls were lined with cedar, on which were carved figures of cherubim, palm-trees, and open flowers, which were overlaid with gold. Chains of gold further marked it off from the Holy of Holies. The floor of the Temple was of fir-wood overlaid with gold. The door-posts, of olive-wood, supported folding-doors of fir. The doors of the Holy of Holies were of olive-wood. On both sets of doors were carved cherubim, palm-trees, and flowers, all being overlaid with gold (I Kings vi. 15 *et seq.*).

The Pillars.

Before the Temple, Solomon erected two bronze pillars, called Jachin and Boaz. Each of these was 18 cubits in height, and was surmounted by a capital of carved lilies, 5 cubits high. Before the Temple, a little to the southeast (I Kings vii. 39), there stood the molten sea, a large laver 10 cubits in diameter, ornamented with knops. This laver rested on the backs of twelve oxen (*ib.* vii. 23-26). The Chronicler gives its capacity as "three thousand baths" (II Chron. iv. 5-6) and states that its purpose was to afford opportunity for the ablutions of the priests.

Another article of Temple furniture is described as a "base." It was a portable holder for a small laver, and was made of bronze, provided with wheels, and ornamented with figures of lions, cherubim, and palm-trees. These vessels especially excited the admiration of the Jews. The author of the books of the Kings describes their minute details with great interest (I Kings vii. 27-37). Each of these "bases" supported a laver which held "forty baths" (I Kings vii. 38). From II Kings xvi. 14 it is learned that a brazen altar stood before the Temple. II Chron. iv. 1 says that this altar was 20 cubits square and 10 cubits high; according to I Kings vii. 48 there stood before the Holy of Holies a golden altar of incense and a table for show-bread. This table was of gold, as were also the five candlesticks on each side of it. The implements for the care of the candles—tongs, basins, snuffers, and fire-pans—were of gold; and so were the hinges of the doors. The Temple was surrounded by a court, which was separated from the space beyond by a wall of three courses of hewn stone, surmounted by cedar beams (I Kings vi. 36). The Chronicler calls this the court of the priests (II Chron. iv. 9).



PLAN OF THE ROYAL BUILDINGS ERECTED BY SOLOMON ON THE TEMPLE MOUND (ACCORDING TO STADE).

1. Great court. 2. Middle court. 3. Temple court. 4. House of Lebanon. 5. Porch of pillars. 6. Throne porch. 7. Royal palace. 8. Harem. 9. Temple. 10. Altar.

The Vessels.

The Temple did not stand alone; it was part of a splendid pile of buildings which Solomon constructed in immediate connection with it. This pile included Solomon's own residence, the palace of Pharaoh's daughter, the throne-room, the "porch of pillars," and "the house of the forest of Lebanon" (I Kings vii. 1-8). These were so arranged that in entering the palace enclosure one came first to the "house of the forest of Lebanon," with its splendid pillars, then to the inner "porch of pillars," the hall of state, or throne-room, Solomon's private dwelling, and, lastly, to the palace of Pharaoh's daughter. For the splendor of these buildings Solomon was indebted to Phenician architects and workmen (I Kings vii. 40-47).

E. C. G. A. B.

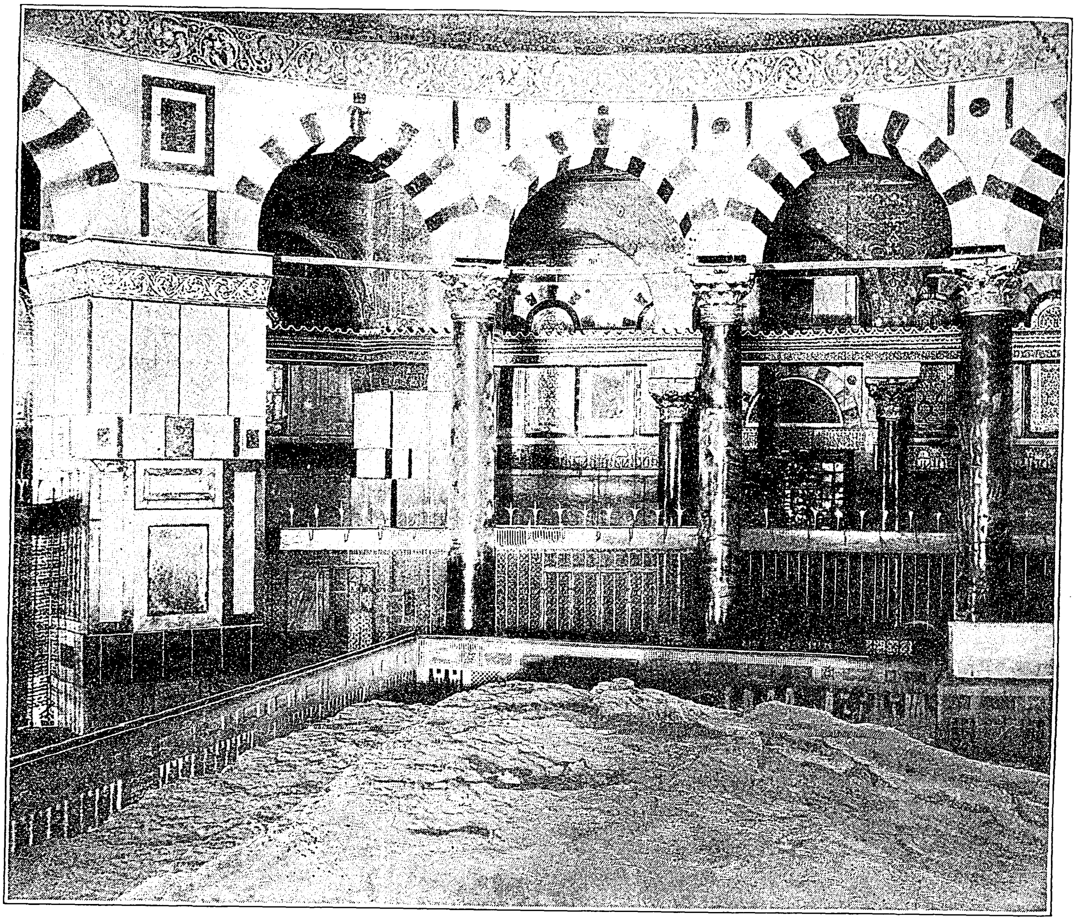
——**Critical View:** When the Temple was constructed it was, together with Solomon's palace, by far the most splendid pile of buildings that the Hebrews had ever seen. Even to this day, as one comes from the surrounding country to Jerusalem, the city seems magnificent, although in comparison with a European capital it is far otherwise. Similarly the influence of environment may be seen in the description of Solomon's Temple. With the lapse of time Israel's fortunes declined, and the age of Solomon seemed even more glorious in comparison with later obviously decadent periods; and this increased the tendency to exaggerate the splendor of the Temple. Moreover, religious reforms made some of the arrangements of the Temple seem unorthodox, and various scribes seem to have amplified its description; as they did not always have the same point of view, present accounts are confused to a degree (comp. Stade's "Zeitschrift," 1883, pp. 129 *et seq.*). One of the exaggerations of later times probably produced all those statements which declare that the inner parts of the Temple and all its implements were overlaid with gold (comp. Kittel, "Königsbücher," in Nowack, "Hand-Kommentar," pp. 46-55).

Exaggerations in Account.

As a result of editorial reworking of the description, the narrative in Kings contains no account of the great brazen altar which stood before the Temple. Ex. xx. 24 *et seq.* provided that an altar might be made of earth or unhewn stone; and as it offended a later age to think that Solomon made an altar of bronze, its description was removed from I Kings vii. Nevertheless it is recorded elsewhere (*ib.* viii. 64; II Kings xvi. 14) that it was a part of the furniture of the original Temple. Later scribes, too, are responsible for those statements which represent David as desiring to build the Temple, and as making preparation for it. Had he desired to build it he certainly could have done so. But in his reign the nomadic idea still prevailed, and a tent was thought to be YHWH's proper dwelling (comp. II Sam. vii. 6). Later generations, to whom the Temple seemed a necessity, could not understand why so venerated a man as David did not build it; hence these statements.

There can be no doubt that the Temple of Solomon was situated upon the more easterly of the two hills which form the site of the present Ḥaram area in Jerusalem, in the center of which area is the Mosque of Omar. Fergusson, Trupp, Lewin, and W. R. Smith held that the Temple was built in the southwest corner of the present Ḥaram area; but the view is false. That site is a part of an artificial extension of the level of the Temple area over the Tyropœon valley, and probably was not made before the time of Herod. The most probable site of the Temple is just west of the "Dome of the Rock" in the center of the Mosque of Omar. The bronze altar was probably on this rock. The mosque was built over a rock the traditions of which were sacred; probably the site was the same as that of the temple which Hadrian erected to Jupiter. This in turn was on the site of Herod's temple, which would naturally be on that of Solomon's. The persistency of sacred sites in the East makes this most likely.

The Site.



Interior of the "Dome of the Rock" Showing Traditional Site of Holy of Holies.
(From a photograph by the American Colony at Jerusalem.)

It was probably a sacred place of the Jebusites before David's time, though II Sam. xxiv. connects its consecration with an incident in David's reign. Solomon's palace probably lay to the south of the Temple. The most probable arrangement of the buildings is that suggested by Stade ("Gesch. des Volkes Israel," i. 314, 315).

The Biblical text makes it clear that Solomon received from Hiram, King of Tyre, much aid in constructing his buildings. As the Hebrews were an agricultural people, this aid probably involved not only material (cedar-wood, etc.), but architectural direction and skilled craftsmen. The architectural features will be considered later. Among the details which were probably copied from Tyre were the two pillars Jachin and Boaz. Herodotus (ii. 44) says that the temple at Tyre contained two such, one of emerald and the other of fine gold. In the same way the ornamentation of palm-trees and cherubim were probably derived from Tyre, for Ezekiel (xxviii. 13, 14) represents the King of Tyre, who was high priest also, as being in the "garden of God." Probably both at Tyre and at Jerusalem the cherubim and palm-tree ornaments were survivals of an earlier conception—that the abode of God was a "garden of Eden." The Tyrians, therefore, in their temple imitated to some extent the primitive garden, and Solomon borrowed these features (comp. PARADISE). Similarly, the bronze altar was a Phenician innovation; and probably the same is true of the bronze implements which were ornamented with palm-trees and cherubim. The Orthodox Israelitish altar was of earth or unhewn stone. The Decalogue of Ex. xx. (Elohist) prohibited the making of graven images, while that of Ex. xxxiv. (Jahvist) prohibited the making of molten gods; and the Deuteronomic expansions prohibited the making of any likeness whatever. All these are, to be sure, later than Solomon's time; but there is no reason to believe that before that time the Hebrews had either the skill or the wealth necessary to produce ornamentation of this kind.

Comparison with Other Temples.

Several temples in Babylonia, many in Egypt, and some of the Phenicians are now known. In Babylonia the characteristic feature was a "ziggurat," or terraced tower, evidently intended to imitate a mountain. The chamber for the divine dwelling was at its top. The early Egyptian temples consisted of buildings containing two or three rooms, the innermost of which was the abode of the deity. A good example is the granite temple near the sphinx at Gizeh. The Middle Empire (12th dynasty) added obelisks and pylons, and the New Empire (18th dynasty) hypostyle halls. The Phenician temples varied somewhat in form, and were surrounded by courts. Solomon's Temple was not a copy of any of these, but embodied features derived from all of them. It was on the summit of a hill, thus expressing the Babylonian idea of the divine abode; it was surrounded by courts, like the Phenician temples and the splendid temple of Der al-Bakri at Thebes, while its general form reminds one of Egyptian sanctuaries. The two pillars Jachin and Boaz had their parallel not only at Tyre but at Byblus, Paphos, and Telloh (see, however, De Sarzec, "Découvertes en Chaldée," pp. 62-64). In Egypt the obelisks expressed the same idea. All these were phallic emblems, being survivals of the primitive Hamito-Semitic "maẓẓebah" (comp. W. R. Smith, "Rel. of Sem." 2d ed., p. 208; Schmidt, "Solomon's Temple," pp. 40 *et seq.*). Jachin and Boaz were really isolated columns, as Schick has shown ("Die Stiftshütte, der Tempel in Jerusalem," etc., pp. 82 *et seq.*), and not, as some have supposed, a part of the ornamentation of the building. Their tops were crowned with ornamentation as if they were lamps; and W. R. Smith supposed (*l.c.* p. 488) that they may have been used as fire-altars. This assumes that they contained cressets for burning the fat.

A Miniature World.

The chambers which surrounded the Holy Place in Solomon's Temple are said in I Chron. xxviii. 12 to have been storehouses for the sacred treasure. These are paralleled in Babylonian and Egyptian temples by similar chambers, which surrounded the naos, or hypostyle hall, and were used for similar purposes. The "molten sea" finds its parallel in Babylonian temples in a great basin called the "apsu" (deep). As the ziggurat typified a mountain, so the apsu typified the sea. The Temple thus became a miniature world. This apsu was used as early as the time of Gudea and continued in use till the end of Babylonian history; it was made of stone and was elaborately decorated (comp. Jastrow, "Rel. of Bab. and Assyria," p. 653). In Solomon's Temple there was nothing to correspond to the hypostyle hall of an Egyptian temple; but this feature was introduced into Solomon's palace. The "house of the forest of Lebanon" and the "porch of pillars" remind one strongly of the outer and the inner hypostyle hall of an Egyptian temple.

Solomon's Temple was, then, a fine example of an Oriental temple. Although it had features in common with the temples of all the races kindred to the Jews, it combined those features in a new and independent way, so that the Temple at Jerusalem was one of the most interesting architectural products of the Hamito-Semitic religious life.

The Temple Solomon's Chapel.

The Temple of Solomon was in reality an innovation in Israel. It was a part of a regal magnificence which was foreign to the national life, and which had to be introduced from outside and patterned on foreign models; and it was looked upon with little favor by many of his subjects. Moreover, the Temple was erected upon a site but recently conquered from the Jebusites, and which for the Israelites had no sacred associations. Other sites —those of Shechem, Beth-el, Hebron—were consecrated by patriarchal tradition (Gen. xxii. 2 is the product of a later time), but Jerusalem was unhallowed by such associations, and its sanctuary was full of foreign innovations. When Jeroboam revolted and erected Beth-el and Dan into royal sanctuaries he perpetuated a ritual of a simpler and more national character (comp. I Kings xii. 28). The Temple at Jerusalem was in reality Solomon's chapel —a part of that regal pile of buildings which he had constructed not so much for the use of his subjects as for his personal aggrandizement. It was later events, such as Sennacherib's invasion, Isaiah's conception that Jerusalem was inviolable, the Deuteronomic reform (which made all sanctuaries except that at Jerusalem illegal), and, above all, the tragic events of the Exile, which made this Temple supremely sacred in the thought of Jews of later times.

E. C.

TEMPLER, BERNHARD: Austrian theologian; born at Brzesko, Galicia, May 1, 1865; educated at the University and the Bet ha-Midrash of Vienna, and at the Hochschule für die Wissenschaft des Judentums at Berlin. At the age of fifteen he began contributing articles to various Hebrew periodicals, and two years later he published his "Dober Ṭob" (Lemberg, 1882), novellæ and commentaries on obscure Talmudic passages. Of other works from his pen may be mentioned: "Peḳuddat ha-Ẓaddiḳim" (Cracow, 1883), comments on Biblical passages; and

"Die Unsterblichkeitslehre (Psychologie, Messianologie und Eschatologie) bei den Jüdischen Philosophen des Mittelalters" (Leipsic, 1895).

S.

TEMURAH ("Exchange"): Treatise in the Mishnah, Tosefta, and Babylonian Talmud mainly concerned with the regulations in Lev. xxvii. 10, 33 regarding the exchange of consecrated things. In most editions of the Mishnah this treatise is the sixth in the order Ḳodashim. It is divided into seven chapters, containing altogether thirty-four paragraphs.

Ch. i.: Regarding those who are allowed to make an exchange; things that may be exchanged, and things that may not be exchanged (§§ 3-6). Regulations concerning drawn water which is unfit for the miḳweh; concerning water for sprinkling, and a field in which there is a grave that can not be found (§§ 4-5).

Ch. ii.: In what ways the sacrifices of the congregation are different from the sacrifices of individuals (§§ 1-2). Difficulties connected with consecrated objects in general which do not affect objects consecrated through temurah and vice versa (§ 3).

Ch. iii.: Sacrifices in which the young of the sacrificial animal is equivalent to the sacrificial animal itself; sacrifices in which this is not the case (§§ 1-2). What must be done when some one consecrates a female animal for a sacrifice for which only a male animal is appropriate (§§ 3-4). In what ways the first-born and the tenth are different from other sacrificial animals (§ 5).

Ch. iv.: The young of a sin-offering; temurah in connection with a sin-offering; other regulations concerning sin-offerings. Cases in which the bringer of the sin-offering dies before the sacrifice is made; in which the sin-offering has been lost and found again; in which a sin-offering with a blemish is consecrated.

Ch. v.: How, an animal being pregnant, its young may be consecrated while still unborn (§§ 1-3). The form of words with which a temurah is made.

Ch. vi.: Things that may not be placed on the altar (§§ 1-4). The young of animals which may not be placed on the altar may be sacrificed; sacrificial animals which have become unfit ("ṭerefah") through sickness may not be redeemed (§ 5).

Ch. vii.: In what ways things which have been consecrated for the altar are different from things which are dedicated only for the maintenance of the Temple, and in what ways they are similar (§§ 1-3). What sacrificial objects must be burned and what buried; in this connection are enumerated other unconsecrated things which must be partly burned and partly buried (§§ 4-6).

The Tosefta to this treatise is divided into four chapters, and contains various additions to and amplifications of the Mishnah. The Gemara of the Babylonian Talmud contains, in addition to the discussions and explanations of the Mishnah, many interesting haggadic utterances. Of these, two deserve special notice: (1) the saying concerning the custom of not writing down sentences of oral teaching, and how this was abrogated because if it had been adhered to the oral teaching would have been forgotten (14b), and (2) that concerning the numerous halakic utterances which were forgotten in the days of mourning for the death of Moses (16a).

W. B. J. Z. L.

TEMURAH, MIDRASH (or **MIDRASH TEMUROT**): Ethical haggadic work consisting of three chapters. Its tendency is to prove that changes and differences are necessary to the world's welfare, and that earthly contrasts—as wealth and poverty, beauty and ugliness—serve to harmonize the whole, thus giving evidence of the divine wisdom. From this purpose the work has derived its name.

In the third chapter of the Midrash Temurah, Ps. cxxxvi. is interpreted as referring to the changes in human life mentioned in Eccl. iii. 1-8. The first and second chapters introduce R. Ishmael and R. Akiba as lecturers; and for that reason this midrash was erroneously ascribed to those two tannaim. Certain passages in the work indicate that it was not written until the end of the twelfth or the beginning of the thirteenth century. According to Jellinek, the author of the Midrash Temurah made use of the works of Ibn Ezra as well as of Galen's dialogue on the soul; this would show that he could not have lived before the latter part of the twelfth century. The literary style of the work, which contains in the initial chapter later Hebraisms as well as some medical terms, also points to the twelfth century. The first chapter includes anthropological, and the second cosmogonic, passages. The first author to refer to this work as the Midrash Temurah was Gedaliah ibn Yaḥya, in his "Shalshelet ha-Ḳabbalah" (ed. Amsterdam, p. 24b). The midrash was first printed by Azulai, after part ii. of his "Shem ha-Gedolim" (Leghorn, 1786); later it was reprinted with the Agadat Bereshit (Zolkiev, 1804). The last-named edition is that included by A. Jellinek in his "Bet ha-Midrash" (i. 106-114).

W. B. J. Z. L.

TEN: The art of counting was founded on the number of the fingers and toes, which constituted the basis for the quinary, decimal, and vigesimal systems, according to whether one hand was used or two, or whether the toes were included or not. Among the ancient Hebrews the decimal system prevailed, as is shown by the Hebrew names for the numbers from one to ten. In the later development likewise the number ten preserved its importance as a higher unity, although the number seven, which was, like three, a sacred number, predominated in religious usage.

Bible.

Ten forms a basal unit in the round numbers of the measurements of Noah's ark, and is clearly present in the dimensions of the Tabernacle (Ex. xxvi.-xxvii.) and of both Solomon's and Ezekiel's temples (I Kings vi., vii.; Ezek. xl.-xlii.), and in the number of the commandments (Ex. xx.; Deut. v.); and possibly it served to measure the week (Gen. xxiv. 55; comp. Dan. i. 14). It appeared also in the ritual for the

Day of Atonement (Lev. xvi. 29), which was observed on the tenth day of the seventh month, and in the celebration of the Passover (Ex. xii. 3). The Egyptians were visited with ten plagues (Ex. viii.–xi.); as a punishment ten women were to bake bread in one oven (Lev. xxvi. 26), while of a hundred who went forth to war ten only would remain alive (Amos v. 3). Furthermore, "a new song" was played in the Temple on an instrument of ten strings (Ps. cxliv. 9), and Jacob promised to give God a tenth of all that He might give him (Gen. xxviii. 22). Abraham bestowed a tenth of everything on the priest (Gen. xiv. 20), so that the Levites and the poor received a tithe (Num. xviii. 26; Lev. xxvii. 30-32; *et al.*), while according to a very ancient custom the king demanded a similar portion (I Sam. viii. 15, 17).

Ten is used also as a round number (Gen. xxxi. 7; Num. xiv. 22; Job xix. 3; I Sam. i. 8; *et al.*), and it often occurs in the Bible, although a large portion of its symbolic interpretations are unwarranted. The multiples of ten likewise occur frequently; but seventy (as in Num. xi. 16) is to be regarded as a multiple of seven. In general, ten is the number of completion, of perfection, of foundation, and the like.

Talmud and Midrash.

In the Talmud and Midrash the number ten is still more important: out of a single incomplete series of sayings beginning with a definite number, twenty-six commence with ten ("Pirḳe de-Rabbenu ha-Ḳadosh," in Schönblum, "Sheloshah Sefarim Niftaḥim," pp. 39–41, Lemberg, 1877). It is found also both in the Halakah and in the Haggadah.

In the regulations governing the day on which the scroll of Esther is to be read a "large" city is defined as one in which there are ten men who have no occupation, and hence are always free for divine service (Meg. i. 3; comp. Baṭlanim); and in Meg. iv. 3 nine functions are enumerated at which ten men must be present, since they form a congregation in themselves (Abot iii. 6; Meg. 23b; see Jew. Encyc. viii. 603b). Ten classes of families were distinguished in regard to racial purity (Ḳid. iv. 1), and just as many kinds of leprosy in houses (Neg. xiii. 1), while ten verses of Scripture in which God's attributes are mentioned were to be recited on New-Year's Day (R. H. iv. 6). Ezra instituted ten laws (B. Ḳ. 82a, top), and there were ten special legal regulations for Jerusalem (*ib.* 82b). A large number of similar laws existed. Josephus, for example, states ("B. J." vi. 9, § 3) that as a rule not less than ten men gathered around every Passover meal.

Haggadah.

The Haggadah is even more partial to the number ten, as a reference to a few selected passages will show. The world was created by ten utterances of God, while between Adam and Noah, as well as between Noah and Abraham, there were ten generations. Ten things were created in the evening twilight of the first Friday, including the rainbow, the art of writing, the stylus, and the two tables of the Law (Abot v. 1–6). There are, moreover, ten things (the instances cited number twelve) which form a series in the order of their strength, so that one overcomes the other: rock, iron, fire, water, cloud, wind, the body (which inhales the wind), anxiety, wine, sleep, death, and alms (B. B. 11a). Ten measures of wisdom came down from heaven to earth, the land of Israel taking nine, and the rest of the world one. The same proportion is observed in the distribution of beauty between Jerusalem and the world; nine-tenths of the wealth in the world was Rome's; of poverty, Babylon's; of pride, Elam's; of bravery, Persia's; of lice, Media's; of magic, Egypt's; of immorality, Arabia's; of shamelessness (or bastards), Mesene's; of gossip, women's; of drunkenness, Ethiopia's; of sleep, slaves' (Ḳid. 49b; Ab. R. N., Recension A, xxviii., beginning; Recension B, xli.; comp. "Monatsschrift," xxii. 270–276). There are also midrashic works whose titles contain the number ten: Ten Martyrs (Jellinek, "B. H." ii. 66, vi. 19–35); The Ten Signs of the Messiah (*ib.* ii. 58); and The Exile (*ib.* iv. 133, v. 113).

Pythagorean speculation ascribed a peculiar creative power to the number ten, which is important also in Jewish mysticism. According to the "Sefer Yeẓirah," a work based on Pythagorean principles, beside the twenty-two letters of the alphabet stand "the ten digits, since they, as a complete decade, form the higher principle of existence which is superior to that of the letters" (Bloch, "Gesch. der Entwickelung der Kabbala," p. 23; translation of the chief passages, p. 27; comp. Epstein, "Recherches sur le Sepher Yeçira," p. 29; Lehmann, "Aberglaube und Zauberei," p. 122; and Jew. Encyc. iii. 474 *et seq.*, *s.v.* Cabala [the Ten Sefirot]).

The custom of pouring out ten glasses of wine for the mourners on the day of a funeral (Sem., end) and for a bridegroom on the wedding-day belongs to the domain of folk-lore.

TENANT. See Landlord and Tenant.

TENCZER, PAUL: Hungarian author; born at Nagy Bejom April 11, 1836; died at Budapest Feb. 6, 1905. He was educated at Keszthely and in Budapest, where he studied law. In 1861 he was one of the founders of the society for the naturalization and emancipation of Hungarian Jews; and from 1862 to 1867 he edited the "Magyar Izraelita," the organ of that society. In 1868 he was elected a member of the Diet, in which he was one of the leaders of the Radical party.

Tenczer founded the periodicals "Magyar Ujság" and "Neues Politisches Volksblatt," the latter of which he edited for eighteen years. He was prominent both in Jewish and in communal affairs in Budapest, and it was due to his efforts that tuition was made free in the public schools of the Hungarian capital.

S. L. V.

TENNESSEE: One of the Southern States of the American Union; admitted in 1796—the third after the incorporation of the original thirteen; seceded June 18, 1861; readmitted in 1866. A few Jews were among a number of traders who settled near the Holston River, in the present Hawkins county, in 1778; otherwise no traces of Jewish settlement during the eighteenth century are found. The first congregations organized were those of MEMPHIS (see JEW. ENCYC. viii. 463) and Nashville (see below).

Chattanooga: Jews settled here in 1858; but for many years divine services were held only during the holy days. About 1890 the Mizpah congregation was organized and Reform worship introduced, the officiating rabbis being successively Judah Wechsler, L. Weiss, Moses Gries, L. Rubinstein, S. H. Sonneschein, and Leo Mannheimer. The present (1905) incumbent is the Rev. Jonah Wise. An Orthodox congregation, the B'nai Zion, has also been established. The societies organized for benevolent purposes are: the Hebrew Ladies' Aid Association; the Jewish Relief Society of Chattanooga; the Federation of the Sons and Daughters of Zion; Chattanooga Lodge I. O. B. B. Two of the most prominent members of the community have been Adolph Ochs and George W. Ochs, the former as editor of the "Chattanooga Times," and the latter as mayor and president of the Chamber of Commerce, the Board of Education, and the Library Association. As publishers of the "New York Times" and the "Philadelphia Public Ledger," both brothers now reside on the Atlantic coast. Chattanooga has a population of 30,154, including not more than 600 Jews.

Knoxville: The community of Knoxville is divided into two Orthodox congregations—Beth-El and Cheska Emunah. Recently (1904) a B'nai B'rith lodge has been organized; a Young Men's Hebrew Association was formed in 1900. The Ladies' Hebrew Benevolent Society and the Jewish Ladies' Sewing Circle attend to the needs of the poor. The Rev. I. Winnick is the rabbi of the Cheska Emunah congregation. Knoxville has a population of 32,637, including about 700 Jews.

Nashville: In 1845 several Jewish families settled in Nashville. Additions to these resulted in the establishment in 1854 of the Congregation Magen David, with Abraham Schwab as president. Another congregation was formed at the same time under the name B'nai Jeshurun; and this in 1865 was merged in the Reform congregation Ohavai Sholom, with the Rev. Judah Wechsler as rabbi. The latter congregation, whose pulpit has been occupied in turn by H. Goldammer, L. Tintner, I. S. Moses, and I. Lewinthal (the present incumbent), is progressive and prosperous; it has a synagogue on Vine street and a cemetery with a mortuary chapel. Its membership is 225, and 150 pupils attend the Sabbath-school. A Ladies' Auxiliary Society is attached to it. The Orthodox congregation Adath Israel is fully organized, and its membership has been augmented by an influx of Russian immigrants. The following benevolent societies have been established: Maimonides Lodge I. O. B. B.; Gal-Ed Lodge, Free Sons of Israel; the Hebrew Relief Society (founded 1885); and the Standard Club (1880; a social organization). Nashville has a population of 80,865, of whom about 2,400 are Jews.

Brownsville (population 2,645) and **Jackson** (population 10,039) both have congregations. Though the Jewish population of Brownsville is only 100, its congregation, known as Adas Israel, was established and its burial-ground purchased as early as 1867. The present incumbent of the rabbinate is Emil Tamm. Its synagogue was dedicated in 1882 by Dr. M. Samfield of Memphis. West Tennessee Lodge I. O. B. B. and a Ladies' Hebrew Relief Association discharge the charitable obligations of the community. Jackson, with a Jewish population of 150, has a congregation and a synagogue. A B'nai B'rith lodge was formed there in 1903. **Columbia** and **Clarksville** have small Jewish communities; and Jewish settlers are found in **Franklin, Ripley, Murfreesboro, Bristol, Pulaski,** and **Dyersburg.**

A. M. Sa.

TENT (אהל): The usual home of nomads, who are accordingly described as dwelling in tents (Gen. iv. 20). As distinguished from the hut of boughs ("sukkah") it is a portable habitation of skin or cloth stretched over poles. The tent of the ancient Israelites was in all probability very similar to that of the modern Bedouins of Syria and Arabia. The covering of the tent ("yeri'ah") originally consisted of skins, later of the modern coarse tent-cloth spun of the hair of black goats (comp. Cant. i. 5); the Arabs accordingly speak of their "houses of hair" ("bait wabar," "bait sha'r"). This cloth, which is spun in long narrow strips on primitive looms by the Bedouin women, felts quickly, and is proof against the heaviest rains. The strips are sewed together to form a covering of the required size, and are stretched over three rows of three tent-poles each ("'ammudim"; Judges xvi. 26). The center poles are somewhat higher than those in front and behind, and the covering of the tent consequently falls away slightly on either side, where the rows of poles, also, are frequently lower, so that the roof is somewhat arched; Isaiah accordingly compares the heavens to a tent which is spread out (Isa. xl. 22).

The covering of the tent was held in place by strong cords ("metarim," Ex. xxxv. 18, Isa. liv. 2, Jer. x. 20; "yeter," Job iv. 21), which were fastened to wooden pegs driven into the ground ("yated"; see below), whence were derived such phrases as "nasa'," with or without "yated," in the sense of breaking camp (Gen. xxxv. 16 *et passim*). A tent-cloth was hung from the top in such a way as to give protection against wind and sun; and a curtain suspended on the three middle poles divided the tent into two sections, one for the men and the other for the women ("ḥeder"; Judges xv. 2; Gen. xliii. 30), since only the wealthiest had special tents for the latter (Gen. xxiv. 67, xxxi. 33). The tents of a clan or a family were grouped as a camp, a small number being pitched in a circle (comp. "ṭirah" [= "enclosure"] used as a term for the camp of the Israelites), while larger encampments formed long rows.

The tents were furnished with extreme simplicity. A few coarse straw mats covered a portion of the floor and served for both chairs and beds, while a hole in the ground in the men's division formed the hearth. A round piece of leather was spread on the floor as a table ("shulḥan"), and bags of goatskin ("no'd," "ḥemet") with the hair outward contained water, milk, or grain, the equipment being completed by a baking-pan, a few rough metal spoons, a hand-mill for grinding grain, and saddles for the camels.

After settling in the land of Canaan, and in proportion as they became agriculturists, the Hebrews ceased to dwell in tents, although, for religious reasons, the Rechabites long observed the ancient mode of life; and even to the latest period the Hebrew language retained, even in cases where the primitive idea was no longer present, a number of terms originally derived from life in tents, as is shown by the phrase "halak le-oholo" = "to return home" (comp. Josh. xxii. 4 *et seq.*; Judges vii. 8, xix. 9; I Kings xii. 16), and by the frequent mention of tents in symbolic language (*e.g.*, in Isa. xxii. 23, xxxviii. 12; Ezra ix. 8; Jer. iv. 20).

The word "yated" (Ex. xxvii. 19, xxxv. 18, xxxviii. 31; Judges iv. 21, 22; Isa. xxxiii. 20, liv. 2) designates a tent-pin. Among the Bedouins to-day the poles which form the framework of the tent, as well as part of the tent-cloth placed upon them, are held in place by ropes fastened to pegs driven into the ground at a certain distance from the tent. These pegs are of wood, about a foot long and an inch in diameter, pointed at one end, and with a hook at the other, to which the rope can be tied. The Hebrew equivalent for the expression "to pitch a tent" is, therefore, "taḳa'" (comp. Gen. xxxi. 25; Jer. vi. 3), which means "to drive in the tent-pins." In the same way "to pull out the tent-pins," as noted above, means to strike tent for a journey.

TE'OMIM, HEZEKIAH (FEIWEL) BEN JONAH: Rabbi at Przemysl; lived in the seventeenth and eighteenth centuries. He was the author of "Teḳa' be-Shofar" (Breslau, 1719), containing documents concerning the litigation between the author and the community of Przemysl, which, in spite of a formal contract, had nominated for rabbi Samuel of Lemberg, formerly rabbi of Slonim.

Bibliography: Steinschneider, *Cat. Bodl.* col. 845.

TE'OMIM, JONAH BEN ISAIAH: Bohemian rabbi at Prague; died at Metz April 16, 1669. After having exercised the function of rabbi at Nikolsburg and in several other Bohemian communities he was called in 1660 to the rabbinate of Metz. In 1666 he was appointed rabbi of Posen, but he was prevailed upon by the community of Metz to remain in the latter city. Te'omim was the author of

"Nimuḳim," containing notes on David ben Samuel's "Ṭure Zahab" (on Ḥoshen Mishpaṭ; Cracow, 1692), and "Ḳiḳayon de-Yonah," novellæ on three Talmudical treatises (Amsterdam, 1669–70).

TE'OMIM, JONAH (ḤAYYIM) BEN JOSHUA FEIWEL: Rabbi successively at Przemysl, Zülz, and Breslau; lived in the seventeenth and eighteenth centuries; son-in-law of David Oppenheim, rabbi of Prague, and later of Hirsch ben Benjamin, rabbi of Berlin. He was the author of: "'Aleh de-Yonah," novellæ on Shulḥan 'Aruk, Ḥoshen Mishpaṭ, and including some parts of his commentary on Maimonides' "Perush ha-Mishnah"; "Ḳonṭres R. Ḥayyim Yonah," novellæ on the laws called גרמי (Jesnitz, 1723); and novellæ on Shebu'ot (*ib.* 1724).

TE'OMIM, JOSEPH BEN MEÏR: Galician rabbi; born at Lemberg in 1727; died at Frankfort-on-the-Oder in 1793. While still young he succeeded his father in the position of preacher and rabbinical instructor in the yeshibah of Lemberg. Later he went to Berlin, where he stayed several years in the bet ha-midrash of Daniel Jafe. Then he resumed his former position at Lemberg, and in 1782 was appointed rabbi at Frankfort-on-the-Oder, where he remained until his death.

Te'omim, who was one of the foremost rabbis of his time, was a thorough student of rabbinical literature, and was not unlearned in the secular sciences. He wrote: "Peri Megadim," a twofold commentary on the Oraḥ Ḥayyim—one part being entitled "Mishbeẓot Zahab," containing a supercommentary on David ben Samuel's "Ṭure Zahab," and the other "Eshel Abraham," on Abraham Abele's "Magen Abraham" (Frankfort-on-the-Oder, 1753); "Porat Yosef," novellæ on Yebamot and Ketubot, with rules for halakic decisions (Zolkiev, 1756); "Ginnat Weradim," seventy rules for the comprehension of the Talmud (Frankfort-on-the-Oder, 1767); "Peri Megadim," a twofold commentary on the Yoreh De'ah—one part being entitled "Mishbeẓot Zahab," containing a supercommentary on David ben Samuel's "Ṭure Zahab," and the other "Sifte Da'at," on Shabbethai Kohen's "Sifte Kohen" (ש"ך; Berlin, 1772); "Tebat Gome," on the Sabbatical sections (Frankfort-on-the-Oder, 1782); "Shoshanat ha-'Amakim," a methodology of the Talmud, published together with the preceding; "No'am Megadim," commentaries on the prayers, published with the prayer-book "Hegyon Leb." Te'omim left in manuscript "Sefer ha-Maggid" (a commentary on the Pentateuch and the Hafṭarot, sermons for Sabbaths and festivals, and a twofold commentary on Pirḳe Abot) and "Em la-Binah" (a Hebrew, Aramaic, and Chaldaic lexicon; Neubauer, "Cat. Bodl. Hebr. MSS." No. 1500). In the introduction to the last-named work Te'omim mentions a great number of writings of his own, on halakot and ethics, which are no longer in existence.

TE'OMIM (ARYEH JUDAH), LÖB BEN MOSES (called also **Zunz** or **Zinz**): Rabbi and scholar of the seventeenth and eighteenth centuries; lived in Pinczow, and later in Plotzk. He was the author of the following works: "Ya'alat Ḥen" (Zolkiev, 1802), sermons on different parashiyyot; "Geṭ Meḳushshar" (Warsaw, 1812), compendium to that part of Maimonides' "Yad" which treats of divorce; "Magen ha-Elef," called also "Shem Ḥadash" (*ib.* 1817), on the regulations of the ritual codex referring to the Passover festival (to this work are appended notes on the "Maḥaẓit ha-Sheḳel" of Samuel ha-Levi Kolin); "She'elot u-Teshubot Gur Aryeh Yehudah" (Zolkiev, 1827), compendium of the four ritual codices; "Ḥiddushim" (Warsaw, 1830), treating of the sheḥiṭah and ṭerefah; "Simḥat Yom-Ṭob" (*ib.* 1841), complete commentary on the treatise Beẓah; "She'elot u-Teshubot Meshibat Nefesh" (*ib.* 1849), responsa on the ritual codices; "Ḥiddushim" (*ib.* 1859), compendium of the ritual codex Yoreh De'ah; "Birkat ha-Shir" (n.p., n.d.), a Passover Haggadah together with commentary; "Melo ha-'Omer," commentary on the Pentateuch and the Five Megillot; and "Ṭib Ḥaliẓah" and "Ṭib Ḳiddushin" (n.p., n.d.), collections of responsa on the ceremony of ḤALIẒAH as observed in modern times, and on marriage contracts.

TE'OMIM, MEÏR BEN SAMUEL: Polish Talmudist of the eighteenth century; died July, 10, 1773. Meïr was a grandson of Joseph Te'omim, and was a preacher in Lemberg. He wrote: "Nofet Ẓufim" (included in his son Joseph Te'omim's "Rab Peninim"; Frankfort-on-the-Oder, 1782); "Birkat Yosef we-Eliyahu Rabba" (Zolkiev, 1750). According to his son Joseph, he wrote a work entitled "'Emeḳ Halakah," comprising explanations of a large part of the Talmud. His decisions are cited in the works of later Talmudists.

S. S. A. PE.

TEPLITZ: Town in northern Bohemia, about 46 miles northwest of Prague. The earliest documentary evidence of the presence of Jews there is dated 1414; but the earliest Jewish source referring to them belongs to the end of the sixteenth century. In 1480 the Jewish community obtained from the town a burial-ground and built a synagogue. In an agreement dated Aug. 1, 1583, the Jews bound themselves to pay the town a certain sum yearly, in return for which they were permitted the unrestricted use of the baths. The Thirty Years' war caused a decrease in the number of Jews in Teplitz; in 1621 there were only 24 Jewish families there, occupying 11 houses; but in spite of this small number the old synagogue was torn down and rebuilt on a larger scale.

With the counter-reformation in Bohemia evil times came to the community in Teplitz. Those Jews who had no fixed business there were expelled (1667); this left only 8 families (34 persons); and though enough returned to bring the number up to 262 before the year expired, in 1668 they were again forced to leave the town. The Jews were by this time restricted to the Judengasse, and as a distinctive badge they were required to wear a large ruff around the neck. About this time, too, the old cemetery was closed and a new one opened. The wearing of the white ruff around the neck was abolished in 1781, in accordance with the decree of toleration issued by Emperor Joseph. Three years later, in accordance with a law relating to the Jews throughout the empire, the Teplitz Jews, whose disputes hitherto had been settled by their rabbi, were placed under the jurisdiction of the civil authorities.

After 1848, when the walls of the ghetto disappeared and the Jews obtained full liberty, the community grew appreciably. The Jews were active not only in commerce, but in manufacture, the introduction and development of which must be largely attributed to them, for they were among the founders and first builders of factories in Teplitz. Hosiery and glassware are the chief manufacturing products. In 1862 the second cemetery was closed and a new one opened. In 1883, about 400 years after the building of the first place of worship, a new basilican synagogue was erected at a cost of 150,000 kronen.

Whether the Jews of Teplitz had a rabbi previous to 1548 is doubtful, as the following clause is found among the instructions given them in that year by the lord of the manor Radislau: "The Jews of Teplitz must in the future conform to the order issued to earlier Jews, forbidding them to submit their difficulties to the rabbi in Prague, and requiring them to lay them before the elder of the Jewry and the local authorities in Teplitz." No mention is here made of a rabbi in the latter place. Probably the first rabbi was Nathan, son of Rabbi Joseph, who died in 1599, and whose tombstone was discovered in the old cemetery. Other rabbis known to have officiated in Teplitz were: Jacob, son of Monasch (d. 1717); Simḥah Kohen Poppers (d. 1744); Abraham Kohen Poppers (d. 1775); Isaac Kalisch (d. 1783); Naphtali Herz Emden (d. 1796); Joseph b. Abraham (d. 1800); Solomon Strasser (d. 1820); Isaiah Levi Eidlitz (d. 1831); Zacharias Frankel (called to Dresden in 1836); David Pick (district rabbi; d. 1878); Adolf Rosenzweig (to 1887, when he was called to Berlin); Adolf Kurrein (the present [1905] incumbent).

The communal institutions of Teplitz include a ḥebra ḳaddisha, a biḳḳur ḥolim, an almshouse (founded 1834), a brides' dowry society (founded 1866), a women's society (Nashim Ẓidḳoniyyot), a society for the aid of sick and necessitous women, a Tempelverein (founded 1882 for the building and decoration of the synagogue), Samel's orphan foundation, Philipp Spitz's Chanukkastiftung for clothing poor school-children at Ḥanukkah, Wilhelm Rindskopf's institute for the blind, a society for the support of poor wayfarers passing through Teplitz, and a hospital for residents or visitors in need of treatment at the springs (founded in 1836 by Naphtali Katz).

The following table shows the growth of the Jewish population of Teplitz:

Year.	Number of Jewish Inhabitants.	Year.	Number of Jewish Inhabitants.
1414	20	1786 (47 houses)	452
1590	78	1791	403
1621	96	1792	425
1640	211	1823 (50 houses)	496
1650	231	1835	554
1660	237	1870	1,290
1667	262	1880	1,720
1674	154	1890	1,900
1702 (944 Christians)	187	1900	3,000
1724	321		

The total resident population of Teplitz is 30,000.

S. A. KU.

TERAH: Father of Abraham, Nahor, and Haran (Gen. xi. 26). His original home was Ur of the Chaldees; but later he emigrated with his sons to Haran, where he died (Gen. xi. 32). According to Joshua's remarks at the assembly of the Israelites at Shechem, he was an idolater (Josh. xxiv. 2). Modern exegetes do not agree as to the etymology of the name "Terah," some identifying it with the Assyrian "turahu" (wild goat), with which the name of the Mesopotamian town Til-sha-turakhi might be compared, while others suppose it to be identical with the Syriac "tarḥa." Recently the name "Terah" has been regarded as a mutilation of "yeraḥ" (moon); in this case it would refer to a mythological person.

According to the Midrash (Gen. R. xxxviii.), Terah, in addition to being an idolater himself, made and sold idols; and during his absence he compelled Abraham to act as a merchant for him. The "Sefer ha-Yashar" (ed. Leghorn, 1876, pp. 14b *et seq.*) regards him as a great general of Nimrod, whom he accompanied on all his campaigns. Angry at Abraham for the destruction of his idols, Terah accused his son before Nimrod, who condemned him to be burned to death. Thereupon Abraham persuaded his father to emigrate to Canaan. See ABRAHAM IN APOCRYPHAL AND RABBINICAL LITERATURE.

W. B. S. O.

TERAPHIM (תרפים): Plural word of unknown derivation used in the Old Testament to denote the primitive Semitic house-gods whose cult had been handed down to historical times from the earlier period of nomadic wanderings. The translation of the term "teraphim" by the Greek versions, as well as its use in the Scriptures, gives an excellent idea of the nature of these symbols. Thus Aquila renders the word by "figures"; the Septuagint in Genesis by "images," in Ezekiel by "carved images," in Zechariah by "oracles," and in Hosea by "manifest objects" (*δῆλοι*). The Authorized Version often simply transcribes the word, as in Judges xvii. 5, xviii. 14 *et seq.*, and Hos. iii. 4, but frequently translates it "images," as in Gen. xxxi. 19 *et passim.* The rendering "images" occurs in I Sam. xix. 13 also, "idols" in Zech. x. 2, and "idolatry" in I Sam. xv. 23.

The form of the word in Hebrew must be regarded as a plural of excellence. Just as "Elohim" denotes "gods" and "God," the form "teraphim" is applicable to each single object as well as to the entire class (comp. I Sam. xix. 13 and Gen. xxxi. 19).

——**Biblical Data:** That teraphim were really images of human shape and of considerable size is plainly seen from I Sam. xix. 13, where Michal, the daughter of Saul, places one in David's bed in order to conceal his escape from her enraged father. It is furthermore evident that they were not too large to be easily portable, inasmuch as Gen. xxxi. 19 mentions that Rachel, without her husband's knowledge, stole the teraphim which belonged to her father, Laban, and, when she wished to conceal them, placed them among the camel's furniture and sat upon them (Gen. xxxi. 34).

Nature of Cult.

The nature of the teraphim cult and its gradual decay seem also perfectly clear. It may be noted that teraphim were regarded in early times as representatives of real gods endowed with divine attributes (comp. Gen. xxxi. 30, where Laban, rebuking Jacob for Rachel's theft of the teraphim, asks, "Wherefore hast thou stolen my gods?"), and that evidently the teraphim cult was practically on a plane with Yhwh worship. In Judges xvii. 5 Micah has "an house of gods" (בית אלהים) with a duly appointed priest; he makes an ephod (see below) and teraphim, which were used together with "a graven image" and "a molten image" made from silver dedicated to Yhwh; the figures were evidently Yhwh images. The value of the teraphim to the family and the tribe is shown by the statements that Rachel stole them from her father (Gen. xxxi. 19), and that the Danites, when they went to spy out the land of Laish, took away by force from the house of Micah not only the Yhwh images just mentioned, but also the ephod, the teraphim, and the Levitical priest (see Judges xviii.).

Acceptance and Rejection.

In early times teraphim-worship was undoubtedly tolerated by the Yhwh religion, as may be seen, for example, from I Sam. xix. 13 (the story of Michal, the daughter of Saul), where it is tacitly implied that a teraphim was a usual piece of furniture in the household of a loyal follower of Yhwh. In Hos. iii. 4 and in Gen. xxxi. 19, also, teraphim are alluded to without comment, although Prof. H. P. Smith ("Samuel," p. xxxiv.) thinks he detects a touch of sarcasm in the latter passage. It is certain, however, that teraphim soon became an object of distinct condemnation in the Yhwh cult.

In Gen. xxxv. 2 *et seq.* Jacob orders that the "strange gods" (אלהי הנכר), by which teraphim images were probably meant, be put away by his household and buried. The spot which was thus defiled was made a holy place by Joshua (Josh. xxiv. 20–26). Furthermore, in I Sam. xv. 23 Samuel in his rebuke to Saul is made to classify teraphim with iniquity (און) and rebellion (מרי). Josiah, the reforming king, did away with the magicians and wizards as well as with the teraphim and idols (גללים), all of which are grouped together as "abominations" (II Kings xxiii. 24). With these passages should also be compared Zech. x. 2 (R. V.): "for the teraphim have spoken vanity, and the diviners have seen a lie; and they have told false dreams."

Function.

It will appear from the above quotations that the most important function of the teraphim, at any rate after the spread of the Yhwh cult over Israel, was that of divination. Evidently the images were used chiefly for oracular purposes, although nothing is known of the method of their consultation: it is probable, however, that they were used in connection with casting the sacred lot (comp. Zech. x. 2; Ezek. xxi. 26 [A. V. 21]). The mention of an ephod in connection with teraphim (Judges xvii. 5, xviii. 20) is a peculiar use of that word, which in these passages represents merely "a portable object employed or manipulated by the priest in consultation with the oracle" (comp. Moore, "Judges," p. 379, and see Judges viii. 27, which clearly describes an ephod as an object employed in divination). This use of the word seems to be quite distinct from that in the so-called P document (Ex. xxviii. 6 *et seq.*), where a high-priestly garment of the same name is referred to (see EPHOD).

Such oracles were probably consulted down to a quite late date (comp. Hos. iii. 4, Hebr.: "for the children of Israel shall abide many days without a king, and without a prince, and without a sacrifice [זבח], and without a pillar [מצבה], and without an ephod, and without teraphim"). The passage II Kings xxiii. 24, cited above, makes it evident that teraphim had survived in later Judah. The mention of teraphim in Zech. x. 2 may have been due to an archaizing tendency of the author of this section (see ZECHARIAH), and would not in itself be sufficient evidence to prove that the teraphim cult had continued into the Greek period; if, however, this passage is taken in conjunction with the statement of Josephus ("Ant." xviii. 9, § 5) that the custom of carrying house-gods on journeys into strange countries prevailed in his time in the Mesopotamian regions, it appears highly likely that the use of teraphim continued into the first Christian century and possibly even later.

As Household Gods.

It would seem, then, as remarked above, that teraphim, like the Roman Lares and Penates, originally represented house-gods, which were carried about by the primitive Semitic nomads as fetishes along with their family effects, and that these deities were in all probability worshiped at first as the most important divine objects known to the followers of this cult. Although nothing whatever is known about the origin of the teraphim cult, it may have been a survival of primitive ancestor worship; *i.e.*, the images may have originally represented the deified ancestors of the family which revered them, and may have become later a sort of Manes oracle. They were probably not astral personifications. The cult could not have been regarded as indigenous among the Israelites, because the deities are characterized as "gods of the stranger" (A. V. "strange gods") in Gen. xxxv. 4. In Ezek. xxi. 26 (A. V. 21) it is recorded that the King of Babylon consulted teraphim and "looked in the liver"; *i.e.*, he made use of magical incantations as well as of the astrological rites common in Babylonia. It is not at all unlikely that the Israelites obtained the teraphim cult from their Aramean kinsmen.

E. C. J. D. P.

——**In Rabbinical Literature:** The word "teraphim" is explained by the Rabbis as meaning "disgraceful things" (Yer. 'Ab. Zarah ii. 41b; Tan., Wayeẓe). It is rendered "ẓalmanaya" or "ẓilmanaya" (= "images") by the Targumim of Onkelos and pseudo-Jonathan to Gen. xxxi. 19, 34, and by the Targum of Jonathan in the other parts of the Bible, except in connection with the image of Micah (Judges xvii. 5; xviii. 14, 18, 20), where it is rendered "dema'in" (= "likenesses"). The nature of the teraphim is much discussed by ancient commentators. According to Targ. pseudo-Jonathan to Gen. xxxi. 19, the teraphim were made of the head of a man, a first-born, which, after the man had been slain, was shaved and then salted and spiced. After a golden plate on which magic words were engraved had been placed under the tongue, the mummified head was mounted on the wall, and it spoke to the people. This legend is more fully developed in Pirḳe R. El. xxxvi., where it is said that after the head had been displayed on the wall, lighted candles were placed round it; the people then prostrated themselves before it, and it talked to them.

Ibn Ezra (on Gen. *l.c.*) records two definitions of "teraphim"; namely, (1) a copper dial by means of which one might ascertain the exact time, and (2) an image made by astrologers at a certain time and under the influence of certain stars, which caused it to speak. Ibn Ezra himself favored the latter interpretation, it appearing from I Sam. xix. 13, 16 that the teraphim had the shape of a man. Naḥmanides (on Gen. *l.c.*), however, thinks that while the teraphim of Laban might have been idols, those of I Sam. *l.c.* were not, inasmuch as there could have been no idols in David's house. He thinks that in general teraphim were astrological tables by means of which one might learn future events (comp. Ḳimḥi on I Sam. *l.c.*). The "Sefer ha-Yashar" (section "Wayeẓe," pp. 46b–47a, Leghorn, 1870), after having repeated the description which Pirḳe R. Eliezer gives of the teraphim, declares that they were made of gold or silver, in the image of a man and at a certain moment, and that by the influence of the stars they revealed the future. It adds that the teraphim of Laban were of the latter description.

W. B. M. SEL.

TEREBINTH. See OAK AND TEREBINTH.

ṬEREFAH: Term signifying originally the flesh of a clean animal that had been torn or mortally wounded by beasts of prey, and had been rendered thereby unfit for food. In rabbinical literature the word came to be applied to the flesh of an animal that had received a fatal injury, or suffered any one of certain diseases, or was marked by some physical abnormality, but which otherwise would be "kasher" (fit and proper as food). "Ṭerefah" in a broader sense includes also a regularly but unskilfully killed animal, in contradistinction to NEBELAH, which refers to the carcass of a clean animal that has died an unnatural death or been killed irregularly (comp. Ḥul. iv. 2). Both flesh that is nebelah and flesh that is ṭerefah are forbidden as food by the Mosaic law (Lev. xxii. 8).

The Talmudic rule is that when an animal is so injured that it can not live, its flesh is ṭerefah; hence only such injury, disease, or abnormality is involved as must cause an untimely death and affect the health of the animal at the time it is slaughtered (Ḥul. iii. 1; 42a).

Symptoms of Ṭerefah.

According to 'Ulla, the Mosaic law recognizes eight principal ṭerefah signs, as follows: (1) "derusah" (violent attack by beast or bird of prey); (2) "neḳubah" (perforation of a vital organ); (3) "ḥasurah" (natural deficiency of an organ); (4) "neṭulah" (loss of an organ); (5) "ḳeru'ah" (a rent in the body); (6) "nefulah" (a fall that might cause internal injuries); (7) "pesuḳah" (severance or dislocation of a limb); (8) "sheburah" (fracture of a rib or other bone). In each of these classes there are a number of cases. The Mishnah gives a list of eighteen principal ones: (1) when the gullet ("wesheṭ") is punctured or perforated, the hole penetrating to the interior; (2) when the windpipe ("gargeret") is split or torn across its width; (3) when the membrane ("ḳerum") nearest to the brain is perforated; (4) when the heart is pierced as far as one of its ventricles; (5) when the spine is broken and the spinal cord is severed; (6) when the liver is entirely wanting; (7) when there is a perforation through the two membranes covering the lungs; (8) when the lungs lack any of their lobes; (9) when there is a hole in the maw, or (10) in the gall-bladder, or (11) in the intestines; (12) when there is a hole in the interior, or lower, stomach, or when (13) the greater part of the flesh covering the stomach is torn; (14) when there is a perforation of the omasum (המסס = "manyplies"), or (15) in the greater venter, or upper stomach, beyond the place where the two stomachs are joined; (16) when the animal has fallen off a roof; (17) when the majority of the ribs are fractured; (18) when the animal has been seized by a wolf with its forepaws or claws. A small bird is ṭerefah when a sparrowhawk has struck its talons into it; and a larger bird, as a fowl or goose, when it has been struck by a falcon, eagle, or other large bird of prey.

The Seventy Ṭerefot.

Maimonides enumerates seventy indications of ṭerefah ("Yad," Sheḥiṭah, x. 9), and says: "Seventy ṭerefot are the limit, and must not be increased or diminished, even though it should be found by scientific investigation that some of the injuries are not dangerous to the life of the animal, or that some unenumerated conditions are dangerous to its life. Only those indications of ṭerefah may be followed which have been accepted by the Rabbis and handed down by tradition" (*ib.* x. 12, 13). Questions of Jewish law can not be decided by the evidence of philosophers (R. Sheshet, responsum No. 447).

The Shulḥan 'Aruk arranges the symptoms according to the various parts of the animal, describing minutely every injury, disease, or abnormality, from the head to the hind legs, internally and externally, whether a perforation, fracture, amputation, or discoloration, which might make the flesh of the animal ṭerefah; stating also when such defects are harmless. The lungs are more liable to injury than any other organ: the number and position of the lobes, the bronchial tubes, the tubercles, and any adhesion to the flesh ("sirka") must be considered. The lungs are inflated to discover any perforation. When the lungs are shrunk it is a sign of fright, and if the fright has been caused by human agency, as when an animal sees a man killing another animal, the flesh is ṭerefah. But if the fright was caused by an act of God, as by thunder or lightning, or if the animal has seen one animal kill another, the flesh is kasher. A test is made by soaking the lungs in lukewarm water for twenty-four hours: in the first case the shrinkage remains; in the second case the shrinkage disappears. Double organs, such as two livers, in an animal or fowl render it ṭerefah, as the rule is that "a superfluity is to be treated like a deficiency." When the gall is wanting, the flesh is ṭerefah; but when a part of it remains, it is kasher. A test is made by cutting the liver across and touching the incision with the tongue; if there is no bitter taste, it proves the entire absence of the gall. Two gall-bladders render the animal ṭerefah; but when there is a connecting flow between them, though they appear double, it is kasher. Some species of fowl, as doves and pigeons, have no gall-bladders, and are kasher.

A cow or an ox has twenty-two large ribs, eleven on each side; if twelve or more are fractured, it is ṭerefah. The extraction of only one rib with its vertebra renders it ṭerefah. If the spine is broken, but the spinal cord is not severed, it is kasher.

Derusah.

The signs of ṭerefah in derusah are explained. The lion's attack is fatal to any animal; the wolf's is not fatal to large cattle, like oxen or calves, but it is fatal to small cattle, like sheep; that of a cat or marten ("nemiyyah"; Ḥul. 52b) and a fox is fatal only to kids, lambs, and fowls; that of a weasel is fatal only to fowls. The lion and the wolf are the most ferocious animals of their size; the attacks of other beasts of prey are not fatal to animals. The attacks of birds of prey are not fatal to cattle, except in the case of the hawk, which is fatal to kids and lambs when it pierces their bodies with its beak. The attacks of ordinary birds of prey are fatal only to birds of their own size, or smaller; that of the eagle is fatal to all other birds.

A fall of ten "ṭefaḥim" (handbreadths) renders the flesh of an animal ṭerefah. A shorter fall, if sudden, without a chance of adjustment on the part of the animal, might be fatal, as internal injuries are possible. Therefore special care must be taken when casting the animal for the sheḥiṭah.

In later rabbinical speech the term "ṭerefah" is applied to food rendered unfit by the mixture of meat and milk; or to things forbidden by the dietary laws; or to things to which the terms "pasul" and "asur," often interchanged, are applied. See BEDIḲAH; CARCASS; CLEAN AND UNCLEAN ANIMALS; DIETARY LAWS; KASHER; NEBELAH; PORGING; SHEḤIṬAH.

TERNI, DANIEL BEN MOSES DAVID:

TERNI, DANIEL BEN MOSES DAVID: Italian rabbi, poet, and Biblical commentator of the eighteenth and nineteenth centuries; a native of Ancona. After having taught for some time at Lugo, he was called to the rabbinate of Florence. He was the author of the following works: "Se'uddat Miẓwah" (Venice 1791), consisting of sermons for holy days and some responsa; "Simḥat Miẓwah" (Florence, 1793), a dramatic poem in two parts composed on the occasion of the inauguration of a new synagogue at Florence, and mentioned in his "'Iḳḳere Dinim"; "Mattenat Yad" (*ib.* 1795), a treatise on charity in the form of sermons; "'Iḳḳere Dinim," called also "'Iḳḳere ha-Dat" = "ha-Rab Daniel Terni" (*ib.*, 1803), a compendium of the laws contained in the Shulḥan 'Aruk (Oraḥ Ḥayyim and Yoreh De'ah), arranged according to ancient and later responsa; "Derek Siaḥ," casuistic sermons, and "En Ḳeẓ," a bibliographical work similar to Shabbethai Bass' "Sifte Yeshenim" (both of these works are still unpublished); and "Shem 'Olam," a commentary on the Pentateuch (a manuscript of this work was in Osias Schorr's library).

TERNI, MATTATHIAH NISSIM BEN JACOB ISRAEL: Italian rabbi and poet; flourished in the eighteenth and nineteenth centuries. He was rabbi at Florence, Urbino, Pesaro, and Sinigaglia. He wrote: "Sefat Emet," halakic decisions (Leghorn, 1797); "Midbar ba-'Arabah," on the marriage laws (Florence, 1807 [?]); "Midbar Mattanah," responsa, in four parts (*ib.* 1810; the appendix, in Italian, was published at Urbino). A volume of poems by him is entitled "No'am we-Ḥobelim we-Derek Emunah" (Geiger, "Zeit. Jüd. Theol." iii. 286, No. 44).

TERONGI, RAPHAEL BENITO: Martyr. He, his teacher Raphael Valls, and his sister Catalina Terongi were together publicly burned as "Judios impenitentes" at the auto da fé held in Palma, Majorca, May 6, 1691. As soon as the victims beheld the flames they tried with all their power to escape the fetters, in which effort Raphael Terongi finally succeeded, immediately flinging himself upon the pyre. Catalina implored pitifully to be saved from the flames, though she was not able to bring herself to utter the name of Jesus. According to a report of James Stanhope (who was an eye-witness of this and other autos da fé held in Palma) to his father in Madrid, the victims were, in most cases, wealthy and the owners of magnificent dwelling-houses.

S. M. K.

TERQUEM, OLRY: French mathematician; born at Metz June 16, 1782; died at Paris May 6, 1862. In 1801 he began his studies at the Ecole Polytechnique in Paris, where he became assistant professor in mathematics in 1803. In the following year, after obtaining his degree as "docteur ès sciences," he received a call as professor of higher mathematics to the Lyceum of Mayence, then still a French city. In 1811 he became professor at the artillery school at Mayence, and went in the same capacity to Grenoble in 1814. In 1815 he returned to Paris as librarian of the artillery central depot of St. Thomas d'Aquin, which position he retained until his death.

In 1842 he, together with Gerono, founded the "Nouvelles Annales de Mathématiques" (continued by Charles Brisse). He also edited, from 1855 to 1861, the "Bulletin de Bibliographie, d'Histoire et de Biographie de Mathématiques."

In 1852, when Napoleon III. visited the Musée d'Artillerie, Olry Terquem was created an officer of the Legion of Honor. His funeral, which was attended by General Lebœuf as representative of the emperor, and a dozen other generals, all his former pupils, was remarkable in that Terquem insisted on being buried according to the rites of Judaism, although no other member of his family remained true to his ancestral faith. Isidor, chief rabbi of France, officiated; but General de Bressolles as representative of the minister of war delivered the funeral oration.

Besides several handbooks on elementary mathematics and mechanics, a "Commentaire sur la Mécanique Céleste [of Laplace]," and a "Histoire d'Artillerie" (the latter two works remaining unfinished), Terquem wrote "Lettres Tsarphatiques" (nine pamphlets, Paris, 1831-37), which were first published in the "Journal de la Moselle." In these letters he pleaded for the introduction of reforms in Judaism, especially for a Sunday Sabbath.

Terquem contributed also several treatises to the French Bible translation by S. Cahen, and a great number of articles to the "Archives Israélites."

S.

TERRACINO: Italian rabbinical family, of which the following members are known:

David Mordecai Terracino: Rabbi at Asti in the nineteenth century.

Hezekiah Terracino: Italian scholar of the seventeenth century; flourished in Lugo, where he probably held the position of ab bet din; a contemporary of Nathanael Trabotti. In a responsum printed in Lampronti's "Paḥad Yiẓḥaḳ" (i. 112) Hezekiah pleads total blindness as an excuse for the incomplete answer given to a question addressed to him.

Moses ben Menahem Terracino: Rabbi at Ferrara in the seventeenth century. He was the author of a responsum on the controversy at Lodi between Manasseh ha-Kohen and the Pavia brothers; also of a responsum (in the collection "Palge Mayim," p. 36) in which he retracted a decision previously given.

Solomon Terracino: Mentioned in Shabbethai Bär's responsa collection (§ 51).

TERRITORIALISTS. See Zionism.

TERU'AH. See Shofar.

TERUEL (טירול): City of Aragon. In the Middle Ages it possessed a prominent Jewish community, which enjoyed several privileges, and which paid in the fourteenth century a yearly tax of 300 sueldos. Its members were engaged in commerce and industry, especially in wool-weaving. During the persecutions of 1391 many of them were killed, while others accepted Christianity in order to save their lives. The Jews of Teruel had a statute according to which a document was legal only if it had been drawn up by the communal secretary and bore his seal. Failure to comply with these regulations entailed a fine of 20 gold gulden (Isaac b. Sheshet, Responsa, No. 304). About 1385 a delator ("malsin") appeared at Teruel; and the community asked Isaac b. Sheshet how, under existing circumstances, he should be dealt with. Among the many wool-dealers of the city were Don Solomon ibn Yahya and Don Judah ibn Yahya. Other prominent Jews living in Teruel were the scholarly Judah ben David, whom Isaac b. Sheshet commended to the community, and his contemporaries Rabbi Moses Gabbai and Isaac Lappa.

S. M. K.

TERUMOT: Treatise in the Mishnah, Tosefta, and Palestinian Talmud. There were two kinds of heave-offerings or gifts to the priest: one was the

30

regular heave-offering, known also as the "great heave-offering" ("terumah gedolah"), which the Israelites were required to give to the priest from the fruits of their fields (comp. Num. xviii. 8 *et seq.*; Deut. xviii. 4); the other was the so-called "tithe heave-offering" ("terumat ma'aser"), *i.e.*, the tithe which the Levites put aside for the priests from the tithe due to them as Levites (comp. Num. xviii. 25 *et seq.*). The treatise gives a more precise definition of the rules governing both these heave-offerings, but the great heave-offering forms the chief subject of discussion. In most editions of the Mishnah this treatise is sixth in the order Zera'im. It is divided into eleven chapters, containing altogether one hundred and one paragraphs.

Ch. i.: Enumeration of five classes of persons who may not make the heave-offering (§§ 1-3). From what sacrifices the heave-offering may not be taken (§§ 4-5). Five other classes of persons who may not make the selection, though where they have done so in ignorance of the prohibition, their act is considered valid (§ 6). The selection is not to be made according to measure, weight, or number, but according to estimated value (§ 7). Different cases in which the heave-offering is considered valid, although the method by which it was selected is generally not permissible (§§ 8-10).

Contents.

Ch. ii.: Further enumeration of cases in which the heave-offering is valid, although the method of procedure followed in selecting it was not legitimate, such as in selecting clean grain for unclean as a heave-offering (§ 1). Cases in which the heave-offering obtained by an unallowable method of procedure is valid only if the wrong method was used unwittingly. In this connection various methods are enumerated which, although properly not allowed, are considered valid if they have been used unwittingly (§§ 2-3). The heave-offering may not be made from one kind for another kind, nor from imperfect fruits for perfect ones of the same kind, although perfect fruits may be given as a heave-offering for imperfect fruits of the same kind (§§ 4-6).

Ch. iii.: Circumstances under which the heave-offering must be given twice (§§ 1-2). A case in which each of two joint owners sets apart the heave-offering from the fruits belonging to them in common (§ 3). The owner may empower his servant to set apart the heave-offering (§ 4). How the heave-offering is determined (§ 5). In what order the different taxes, as the first-born tax, the heave-offering, and the tithe, are to be given (§§ 6-7). What shall be done when one makes a slip of the tongue while selecting the heave-offering, or during the consecration of the sacrifice or the taking of an oath (§ 8). Gifts and offerings of non-Jews (§ 9).

Ch. iv.: Selecting and measuring the great heave-offering. The great heave-offering should be about one-fortieth, one-fiftieth, or one-sixtieth of the whole from which it is taken, according to the generosity of the giver (§§ 1-5). The tithe heave-offering, like the tithe, is taken according to number, measure, or weight (§ 6). Concerning the mixing of heave-offerings with other fruits and the proportions of the various ingredients in regard to the question of "meduma'" (§§ 7-13).

Ch. v.: Further discussion concerning the mixing with other fruits of clean heave-offerings and of those which have become unclean.

Ch. vi.: Concerning the compensation that must be made by one who has eaten, or otherwise derived benefit from, a heave-offering (comp. Lev. xxii. 14).

Ch. vii.: Continuation of ch. vi.; cases in which only the value of what has been eaten need be paid, without the additional fifth part ("homesh"; §§ 1-4). Further regulations concerning the mixing of heave-offerings (§§ 5-7).

Ch. viii.: The same theme continued (§§ 1-3). Regarding wine, set apart for the heave-offering, which has stood uncovered; the danger of poisoning (§§ 4-7). Concerning the defilement of heave-offerings (§§ 8-11). Regarding women who are in danger of being outraged by heathen (§ 12).

Ch. ix.: What must be done in case, either wittingly or unwittingly, a heave-offering has been sown; regulations concerning the fruits from the sowing of a heave-offering.

Ch. x.: Cases in which the taste which certain foods have acquired from a heave-offering makes them unlawful; regulations regarding other cases in which lawful foods become unlawful through the taste which they have derived from unlawful foods.

Ch. xi.: Regulations concerning the use which may be made of clean heave-offerings, as well as of those which have become unclean.

Tosefta and Gemara.

The Tosefta is divided into ten chapters, and, besides additions to and amplifications of the Mishnah, contains some interesting utterances, as, for instance, the definition of the boundaries of the territory belonging to the land of Israel (ii. 12). The Palestinian Gemara to this treatise explains and discusses the halakot of the Mishnah and contains almost no haggadic sayings. There are only a few narratives in it; from these the following has been selected:

Diocletian, in his youth, was a swineherd in Tiberias, where the young pupils from the school of Judah II. used to beat him and make fun of him. When he became emperor he determined to revenge himself on the Jews and especially on the scholars. He went to Paneas, a place at some distance from Tiberias, and from there sent a summons to Judah (ha-Nasi) II., ordering him, with the other scholars, to appear before the emperor on Sabbath evening. He directed his messenger to deliver the summons to Judah on Friday evening so that the scholars, who would not travel on the Sabbath, would have no time to make the journey, and would therefore render themselves liable to punishment for disobedience. By a miracle, however, the scholars succeeded in appearing before the emperor on Sabbath evening; and they appeased his anger by saying that they scorned only the swineherd Diocletian, but obeyed and honored the emperor. Diocletian then remarked that they should be cautious, and never insult a Roman even of lowly condition, because he might mount in rank and take revenge (46b). The same story, with a few divergencies in detail, is found in Gen. R. lxiii. 12.

W. B. J. Z. L.

TESTAMENT. See Wills.

TESTAMENTS OF THE TWELVE PATRIARCHS: Title of twelve connected documents which purport to record the last words and exhortations of the twelve sons of Jacob. They also bear in several of the manuscripts subtitles indicating the virtues inculcated or the vices condemned by each of these patriarchs in turn. Thus Reuben discourses of evil motives and desires, especially as regards women; Simeon, of envy; Levi, of priesthood and pride; Judah, of courage, avarice, and fornication; Issachar, of simple-mindedness; Zebulun, of compassion and pity; Dan, of anger and falsehood; Naphtali, of natural goodness; Gad, of hatred; Asher, of the two characters of vice and virtue; Joseph, of temperance and chastity; Benjamin, of purity of heart.

Contents.

In each testament the patriarch first narrates his own life, dwelling on his virtues or his sins. Next he exhorts his descendants to emulate the one and to avoid the other. Lastly, he launches out into prophetic visions of their futures. In these apocalyptic passages the writings of Enoch are often appealed to and cited, though the citations are seldom found in the Ethiopic or Slavonic Enoch. In the biographies the writer follows the Old Testament, adding many details from Jewish tradition.

Many prophetic passages are apparently of Christian origin, and foretell the incarnation, the sanctification by water (*i.e.*, baptism), and the crucifixion of the Highest. In them Jesus is often identified with God. It is easy to detect and detach these Christian passages; and the manuscripts and versions assist one in doing so. Notably a eulogy of Paul (in which, however, his name is not mentioned), found in the Greek text of the Testament of Benjamin, is absent from the old Armenian version. Tertullian ("Adversus Marcionem," v. 1) seems to allude to this passage. If so, it was interpolated at least as early as the second century. However, Tertullian's allusion is not certain.

There is little external testimony regarding the Testaments. Besides the doubtful allusion of Tertullian (*c.* 200), a mention of them by name occurs in Origen ("Homilia XV. in Josuam," ch. vi.). There are doubtful references also in Jerome and Procopius, as well as specific mention in the "Synopsis Sacræ Scripturæ" wrongly ascribed to Athanasius, and in the "Stichometria" of Nicephorus. The Testaments are not again heard of until Matthew Paris relates in his chronicle (ed. London, 1571, p. 801), under the year 1242, that Robert Grosseteste, Bishop of Lincoln, translated them into Latin, a certain John of Basingstoke having brought them from Athens. This translation was rendered into most modern languages, as a weapon serviceable against the Jews. It was frequently printed before Grabe in 1698 edited the Greek text in his "Spicilegium."

Jewish Documents.

Apart from Christian interpolations, these Testaments are Jewish documents, originally written in Aramaic or Hebrew; and in the genizah of old Cairo, fragments of the original Semitic text have been discovered by M. Gaster, H. L. Pass, and A. Cowley. Dr. Gaster's Hebrew fragment ("Proc. Soc. Bibl. Arch." vol. xii.) answers to a part of Naphtali; but it is probably a late Jewish paraphrase of an older Aramaic text. The other fragments are Aramaic, and closer to the Greek text. They belong together and answer to parts of Levi. Pass, assisted by J. Arendzen, published his fragment in "J. Q. R." (iii. 651-661). Cowley's awaits publication. An old Syriac fragment (noticed by Sinker) in Brit. Mus. Codex Add. 17,193 (of the year 874) is nearly identical verbally with the Aramaic fragment.

These discoveries confirm the previous conjectures of such scholars as Grabe, Kayser, Schürer, and Schnapp, and explain the many Semitisms of the Greek text. They prove that the latter is a paraphrase of an old Aramaic midrash, interpolated by generations of Christians.

Editions.

The only critical edition is that of R. Sinker (Cambridge, 1869), who takes a tenth-century Cambridge manuscript as the basis of his text, adding a collation of four more. A collation of a twelfth-century manuscript in the Vatican (No. 1238) has been published by the present writer ("J. Q. R." v., viii.), as well as a collation of the old Armenian. An old Slavonic version also exists, and has been published by Tichonrawow. An old Georgian version also exists.

The Testaments of the Twelve Patriarchs are usually included in Armenian codices of the Bible; the Vatican codex mentioned above as containing them is a Septuagint, and entitles them "Lepté Genesis" or "Parva Genesis." A new critical edition, taking account of the recovered Semitic texts, of the Greek codices in Athos, Patmos, Paris, and Rome, and of the ancient Armenian and Slavonic versions, is being prepared by Professor R. H. Charles.

Bibliography: Besides the works mentioned above see the references given under Apocalypse and Apocrypha.

T. F. C. C.

The Hebrew Original and Its Haggadic Character.

Owing in part to its Christological interpolations, and in part to the similarity of many of its teachings and utterances to those of the New Testament, the Testaments of the Twelve Patriarchs was regarded as a Christian work until by critical analysis Grabe, in his "Spicilegium Patrum" (Oxford, 1714), arrived at the conclusion that the basis of the work is Jewish, though there are many Christological interpolations. Nevertheless, the old view prevailed, and the work was ascribed to a Judæo-Christian (see, *e.g.*, Sinker, in his edition of the Testaments, Cambridge, 1869). Schnapp, however, in his "Die Testamente der Zwölf Patriarchen Untersucht" (Halle, 1884), revived Grabe's view and elaborated it, proving the spurious character of the Christian passages and also distinguishing two different Jewish sources in the main work. Schnapp's results were approved by Schürer ("Gesch." 3d ed., iii. 252-262) as far as the Jewish origin of the book is concerned, while the Armenian version brought to light by Conybeare ("J. Q. R." v. 375-378; viii. 260-268, 471-485) shows the gradual growth of Christian interpolations. New light was thrown on the book by "The Pre-Talmudic Haggadah" of Kohler (*ib.* v. 400-414), who found direct allusions to the Testaments in Sifre, Num. 12; Soṭah 7b, and Yer. Soṭah

16d, where "early writings" ("ketubim rishonim") are mentioned containing haggadic matters concerning the relations of Reuben with Bilhah and of Judah and his relations with Tamar. In the same article it was shown that the king and priest with prophetic powers described in the Testament of Levi is none other than John Hyrcanus, and that the campaigns of the sons of Jacob recounted in the Testament of Judah correspond exactly with the Maccabean wars.

Composition.

The various spellings of the names in Test. Patr., Joseph, 1–9 and 10–18 led Sinker to postulate a double authorship for this section of the work, although two different tendencies are distinctly visible throughout the book, especially in the Testaments of Levi and Joseph, thus indicating two different writers, one Hasidæan and the other Maccabean. The monition to respect the priestly tribe of Levi is shown by closer investigation to be a mere addition to the main part of the book, which is ethical in character and may have been used in the Temple like one of the Hagiographa. The apocalyptic portion in Test. Patr., Levi, 14 seems to refer to the orgies of Alexander Jannæus (Josephus, "B. J." i. 4, § 6), but there are no allusions to Rome, thus disproving the hypothesis of Bousset, who dates the work in the time of Pompey. The original language of the Testaments of the Patriarchs was Hebrew, as is shown by the etymologies of the names (Test. Patr., Simeon, 2; Levi, 11; Judah, 1; *et passim*), by the Hebrew parallelism of poetry, and especially by many mistranslations of Hebrew words, such as "King Zur" and "King Tapuah" for "King of Hazor" and "King of Tappuah."

Contents of the Book.

Omitting the Christian interpolations altogether, the following summary may be given of the twelve sections in which each of the twelve sons of Jacob delivers a farewell address giving an account of such of his experiences as offer some lesson, either warning against sin that he had committed or exhorting to virtues that he had practised.

Testament of Reuben.

Reuben: Unchastity. Reuben relates (ch. i. 3–4) how, inflamed with passion at the sight of Bilhah, he had committed an incestuous crime in Edar near Beth-lehem (Gen. xxxv. 21–22). Stricken with sorrow and shame, he had suffered for seven months from disease of the loins, owing his recovery only to his father's prayer. He then became a life-long penitent. Seven months he fasted, abstaining from wine and meat and pleasant bread (comp. Dan. x. 3; and for Reuben's repentance see Pesiḳ. 159b; Gen. R. lxxxii. 12, lxxxiv. 18). He accordingly warns his children against looking on women with lustful eyes (comp. Matt. v. 28; Sifre, Num. 115; Ber. 12b, 14a; Ned. 20b; B. B. 57b; 'Ab. Zarah 20a, b), against being alone with a married woman (comp. Sanh. 21a) or meddling with the affairs of women (Ḳid. 70a, 80b; Ab. i. 5), and against every lustful thought (Ber. 12a; Yoma 29a), since it is the imagination, when man is filled with the spirit of Belial, which works iniquity. Ch. iv., on the seven evil spirits, seems a later interpolation. The fall of the angels in the legend of Enoch, on the other hand, is used (ch. v.–vi.a; comp. Enoch viii., xvi. 3; Jubilees vii. 21; 'Ab. Zarah 20b; Targ. Yer. to Gen. vi. 2; I Cor. xi. 10) to warn women against captivating men by their adornments of head and face. Even the longing for licentiousness ("zenut") is destructive (comp. Job xxxi. 1; Prov. vii. 26–27), to say nothing of licentious conduct. Joseph, however, was protected against lustful thought in the hour of temptation by his singleness of heart in the fear of God.

This section is followed, with no connecting-link except the word "ḳin'ah" (="jealousy") in ch. vi.a, by a warning against any jealousy of the tribe of Levi, who was the priest that gave instruction in the Law, and the judge that offered up the sacrifices for Israel, blessed the people whom he ruled with Judah, and gave his life for them in wars visible and invisible, thus reestablishing the kingdom for all time (comp. Targ. Yer. to Deut. xxxiii. 11 with reference to John Hyrcanus).

Testament of Simeon.

Simeon: Envy. In the first four chapters of his Testament, Simeon dwells on the spirit of jealousy with which Satan, the "sar ha-mastemah" of the Jubilees, had filled him so that he had hated his brother Joseph and had plotted his murder, being prevented only by Judah, who had sold Joseph as a slave while Simeon was absent. The lameness of his right hand for a week showed him God's punitive justice in view of his own five months' wrath, and for two years he had repented and fasted. In like manner, he looked upon his imprisonment in Egypt by Joseph as a punishment which he indeed deserved (comp. Targ. Yer. to Gen. xxxvii. 19, xlii. 24; Gen. R. xci. 6). He accordingly warns his children against jealousy, which destroys both him that is envied and him that envies, and he exhorts them (ch. iv.–v.) to emulate Joseph, who loved his brothers, though they had hated him; and who was good to look upon, since there was no wickedness in him, nor had the evil eye any power over him (comp. Targ. Yer. to Gen. xlix. 22; Soṭah 36b). "You also," he says in conclusion (ch. vi.), "will flourish after all envy has been removed from your hearts, and your holy ones will multiply, and their branches will spread afar, and the seed of Canaan, Amalek, Caphtor [Cappadocia], Kittim [Macedonia], and Ham [=Egypt] will be destroyed for the triumph of Shem and the establishment of the kingdom of the God of Israel, before whom all the spirits of deceit [idolatry] will vanish forever."

The Testament closes with a warning against a war of rebellion against the Maccabean dynasty represented by the priestly tribe of Levi and by the victorious royal leader from the midst of Judah. In the concluding words the bones of Simeon are described as placed in a coffin of incorruptible wood.

Levi: The Priesthood and Pride. The Testament of Levi, which is incomplete at the beginning and at the close, contains two different accounts of his election to the priesthood, the Hasidæan version being spiritual in character, and the Maccabean political. According to the former (ch. i.–iv.), Levi, when a youth of twenty, was filled with sorrow for the iniquity and corruption of men, whereupon God answered his prayer for salvation by

Hasidæan Testament of Levi.

sending him an angel who showed him the throne of the Most High in the third heaven. He was also told that he should stand in the presence of the Lord, and serve Him, and be His son; that he should be a light of knowledge and a sun to Israel; and that he should be given understanding and counsel to instruct his sons concerning God. In another vision (ch. viii.) the seven insignia of priesthood were conferred upon him by seven angels, who anointed him with pure oil and consecrated him, since his seed was to be divided into the three kingdoms of the priests, the judges and scribes, and the guardians of the sanctuary. Thereupon, in accordance with a vision, Levi's father, Jacob, made him priest over his house, while his grandfather, Isaac (comp. Jubilees xxxi. 9-32), instructed him in all the laws concerning priesthood, sacrifice, and purification. Levi is particularly warned against (Samaritan) pollution of his seed by marrying a foreign (Philistine) or Gentile (Amorite) wife; and he accordingly married his kinswoman Milkah, who bore him three sons, among whom Kehat, the ancestor of Aaron and Moses, stood forth in his vision as "one amid the haughty of the assembly." In ch. xiii. Levi admonishes his children to walk in the way of the Law in all simplicity of heart and in the fear of God, and warns them never to cease to study it, lest they should fail to give their children knowledge which should win them honor and friends. "Perform righteousness on earth that ye may find treasures in heaven [comp. Luke xii. 21]; sow good works in your souls that ye may reap them in life." This exhortation is followed by a eulogy of wisdom, and the address closes with the words: "If a man teach these things and do them, he shall sit upon a throne with the king, as did our brother Joseph."

Maccabean Testament of Levi.

According to the other version (comp. Jubilees xxx. 17-23), Levi's act of vengeance upon Shechem fitted him for the priesthood (ch. v.-vii. and part of ch. viii.), for Michael, "the angel who intercedeth for the race of Israel," bestowed upon him a shield and a sword with which he should wreak vengeance on Shechem for Dinah; and though the Shechemites were circumcised, he acted in accordance with the will of God, despite his father's curse (Gen. xlix. 7), and exterminated the city of "the foolish" (comp. נבלה = "folly;" Gen. xxxiv. 7; Ecclus. [Sirach] l. 26). The "three kingdoms" that were to spring from Levi were, accordingly, distinct from the three classes mentioned above, being Moses, who was "faithful" (Num. xii. 7), Aaron, and John Hyrcanus, the royal priest who, like Melchizedek (Ps. cx. 4), was to manifest his prophetic power (comp. Josephus, "B. J." i. 2, § 8; Tosef., Soṭah, xiii. 5). Ch. x. and xiv.-xvii., devoted to the fearful corruption and depravity of the priesthood under Alexander Jannæus, which is mentioned also in the Psalms of Solomon, disclose the last experiences of the Maccabean writer. The Messianic prophecy in ch. xviii. seems to belong to the older Hasidæan document, and its Messiah opens the gates of paradise to the saints while he overcomes Belial with his hosts. In the closing chapter Levi bids his children, who are themselves represented as speaking, to choose between the Lord and Belial, whereupon they swear allegiance to God.

Judah: Courage, Avarice, and Fornication. Judah narrates to his children (ch. i.-vii., ix.) the feats of strength which he, who was, like David, destined to be a king, had displayed in his youth. He also tells them of the swiftness, courage, and power which he had shown in his wondrous combats with all kinds of wild beasts that assailed his flock and with the Canaanitish kings of Hazor and Tappuah and their men, besides describing how he surpassed his brothers in the war with the Amorites and the sons of Esau (comp. Jubilees xxxiv. 1-9; Midr. Wayissa'u, ed. Jellinek, "B. H." iii. 1-5 and Introduction; Kohler, *l.c.*). A boast of immaculate youth which he made to Reuben caused him, like David (Sanh. 107a), to be ensnared by a woman (ch. viii. 10-14). At a feast given him by Barsua', the King of Adullam, he became drunk, and in that state he fell in love with the princess Bat Sua', who was presented to him decked with gold and pearls. He married her, but the children of the union were wicked (Gen. xxxviii. 3-10). Bat Sua' hated Tamar because she was related to Abraham, being the daughter of Shem, according to Gen. R. lxxxv. 11; Targ. Yer. to Gen. xxxviii. 6, and refused to allow her sons to marry her. Even when Tamar contrived to be united with Judah in a levirate marriage, he was again deceived by drunkenness, due to the feast he celebrated at the waters of Kezib (ch. xiii.-xvii.). Judah accordingly warns his children against excessive pride, covetousness, and licentiousness, but most of all against indulgence in wine, since it reveals all the secrets of God and leads to sin. Ch. xv. is an interpolated midrash on Gen. xxxviii. 18 (comp. Gen. R. lxxxv. 10). His monition concludes with the statement (ch. xx.) that Satan is the cause of sin, wherefore they must choose between the Lord, the Spirit of Truth, who sees each act of man written on his breast, and the Spirit of Error. The address closes (ch. xxii. 24-25) with a Messianic prophecy which emphasizes Judah's lasting claim to the resurrection of the saints, the triumph of the poor and the martyrs, and the burning of Belial and all his hosts. A denunciation of the royal custom of embalming, which was antagonistic to the doctrine of the resurrection, ends the Testament.

Testament of Judah.

In sharp contrast to this Judaic or Davidic prophecy stand the accentuation of the Levitic or Maccabean royalty (ch. xxi.) and the references to its hero (ch. xxv.). These are obviously interpolations by the Maccabean reviser, and ch. xxiii. is a still later insertion.

Issachar: Simplicity. Issachar, whose name is explained at length in accordance with Gen. xxx. 14-18, represents himself to his children as one who walked all his life in simplicity (ch. iii.). Being a husbandman, he never failed to give the priest the first-fruits of his lands, sharing the residue with his father and with the poor and afflicted, so that he was greatly blessed. He spoke ill of no one, nor did he meddle in the affairs of others; he harbored no lustful thoughts in his heart and was happy with his wife and his field. He accordingly admonishes his children (ch. iv.-vii.) to walk in simplicity, and to refrain from envy and all lustful thoughts, prying into no secrets, but loving God and man, and filled with compassion for the poor and feeble. He urges them, moreover, to find contentment in husbandry and to seek the divine blessing in the fruit of the soil, for abandonment of agricultural life would, in his view, lead them in the latter days to transgression and dispersion among the Gentiles. This denunciation of mercantile pursuits, which were the chief occupations of the Jews in the Diaspora, indicates the period at which the original Testaments were written. With a glance at the Epicurean life of the Sadducees, Issachar concludes with the words: "I am 120 years old, and have known no mortal sin. Except my wife, I have known no woman, nor have I gone a-whoring with the lifting up of mine eyes; I have drunk no wine to lead me astray, nor have I desired the desire of my neighbor. Craft hath not been in my heart, nor hath falsehood come through my lips. I sighed with every one that was troubled, and I gave my bread to the poor. I ate not alone; I broke no oath; I wrought piety and truth all my days. I have loved the Lord with all my might, and I have loved every man even as my children. Do ye these things, my children, and every spirit of Belial will flee from you, and no deed of evil men will have power over you; and ye shall subdue every wild beast, having with you the God of heaven, that walketh with men in simplicity of heart." In this picture of the ideal Ḥasid, who dies "at a good old age and with his strength unabated," the passage in ch. v., which emphasizes the supremacy of Levi and Judah as priest and ruler, contains no indication of late Maccabean influence (comp. Targ. Yer. to Gen. xlix. 14-15; Gen. R. xcix. 11).

Testament of Issachar.

Zebulun: Compassion and Pity. Unlike the rabbinical conception of Zebulun, which is that of the merchant who supports Issachar while he devotes his life to the study of the Torah (see Targ. Yer. to Deut. xxxiii. 18), Zebulun in the Testaments Ḥasidically typifies the fisherman who supplies the household with fish and gives of his store to the stranger, the sick, the aged, and the needy that he may be blessed by God for his compassion (ch. vi.). He tells his children, moreover, that it was his deep compassion for Joseph which restrained Simeon and Gad from bloodshed, for he had joined his youngest brother in an appeal to their sympathy and had adjured them with tears not to commit the crime, thus anticipating even Reuben, who made the proposal to cast Joseph into the pit to save the young lad's life. When the other brothers took the twenty pieces of silver for which they sold Joseph and used them to buy sandals (Pirḳe R. El. xxxviii.; Targ. Yer. to Gen. xxxvii. 28, based on Amos ii. 6), Zebulun, like Reuben, refused to share in the money. Whenever he saw a person unclad he used to cover him with garments of his own, and he was accordingly blessed by God, nor did any sickness befall his house, for "as man showeth compassion on his fellow beings, so doth God show compassion on him" (Sifre, Deut. 96; Shab. 151b).

Testament of Zebulun.

Zebulun therefore admonishes his children to show mercy to every man, and to bear neither grudge nor malice toward any, but to love one another, taking Joseph for their model. The address closes (ch. ix.) with a warning against dissensions in Israel, since they would lead to a division of the kingdom and to dispersion among the Gentiles, and with an expression of his longing for the Messianic period, when Belial and his hosts should be trodden under foot and God alone should reign in Jerusalem as the sun of righteousness with the healing of compassion on its wings. The closing chapter expresses the hope of resurrection as forming part of the final judgment in which Zebulun, one of the twelve judges, will appear as the ruler of his tribe. The name of Levi does not occur in this Testament.

Dan: Anger and Falsehood. Dan, the black sheep among the tribes of Israel (see Dan), tells his children (ch. i.) that, under the influence of Belial, he had been filled with anger against Joseph and that, "eager to devour him as a leopard devours a kid," he had planned to kill him that he might supplant him in the heart of his father. Dan accordingly warns his children (ch. ii.-v.a) against anger, since it heeds neither parent, nor brother, nor prophet, nor righteous man, nor friend. Ch. iii. and other interpolated passages add a warning against lying which is scarcely a genuine part of the Testament. Anger may be roused by words only, yet it leads to action. Therefore his children are exhorted to refrain from anger either at spoken words or at misfortunes, lest they should be overcome by Belial and the Lord should depart from them, the lesson of the Testament being that they should flee from wrath and love God and man in order that the Lord might dwell among them and Belial be driven from them. The last sentence of the Testament is obviously a Jewish interpolation.

Testament of Dan.

Naphtali: Natural Goodness. Naphtali, who died in perfect health at the age of 132, relates to his children that he resembled Joseph since he was born on Rachel's knees. The explanation of the names of Naphtali (comp. Gen. R. lxxxix. 22; Num. R. xiv. 23; Epstein, "Mi-Ḳadmoniyyot ha-Yehudim," p. 74), Bilhah, and Zilpah are curious haggadic remnants. Swift of foot as a deer (Gen. xlix. 21; comp. Pirḳe R. El. xxxix.; Soṭah 13a), Naphtali served his father, Jacob, as a messenger; and in the father's grief at the loss of Joseph he was comforted by Naphtali, who told him of two dreams in which the future greatness of Levi, Judah, and Joseph had been revealed to him (ch. v.-vi.). The text is extremely corrupt, and must be corrected on the basis of the Hebrew "Testament of Naphtali" discovered by Gaster in the "Chronicles of Jerahmeel" and reproduced in a German translation by Schnapp, in Kautzsch, "Apocryphen," ii. 489-492. According to this document, which is decidedly better preserved than the Greek version, Naphtali speaks of the pleasant land that fell to the lot of his tribe (Deut. xxxiii. 23) and then warns his children not to become overbearing in their prosperity. The monition to observe the law of God and to refrain from such corruptions as had been prac-

Testament of Naphtali.

tised by the men of Sodom, the idolatrous nations, and the fallen angels in the days of Enoch is preceded by the lesson that, in accordance with Deut. xxxii. 8-9 (comp. Targ. Yer. *ad loc.*), each of the seventy nations worships its own guardian angel as a deity, while Abraham chose on behalf of his descendants the only one God and Creator of the world as Guide and Protector, since Michael, the guardian angel of Israel, had taught him the Hebrew language, thus enabling him to learn the true order of things and the wisdom of creation. As sun, moon, and stars change not their order, so should the children of Naphtali not change the order of things. This section is followed by the apocalyptic part, in which Maccabean elements referring to the supremacy of Levi seem again to be mingled with Hasidæan tenets.

Testament of Gad.

Gad: Hatred. Gad tells his children that in his strength he had been accustomed to guard the flock at night, and to kill every wild beast that assailed it. Joseph, however, was too delicate to stay with the flock in the heat of the day and went home to his father, whom he informed that Gad and the other sons of the two concubines were eating lambs that had been torn by wild beasts and had not been slaughtered either by Judah or by Reuben according to the prescribed rule (comp. Targ. Yer. to Gen. xxxvii. 2; Pirḳe R. El. xxxviii.; Gen. R. lxxxiv. 7). This so provoked Gad that he hated Joseph, and, like Simeon, wished to kill him, being eager "to devour him as the calf devours the grass." His hatred finally brought upon him a disease of the heart which lasted for eleven months, the length of time that he entertained this feeling of enmity before he repented and his father's prayers saved him from death (ch. i.-ii. 5). He therefore warns his children against the spirit of hatred which fills the heart with poison, and allies itself with Satan and with every evil, leading to all manner of impiety and death, while love effects the salvation of man. "Love ye one another in act, and word, and thought. . . . If one sin against thee, tell him in peace, removing the poison of hate, and foster not guile in thy soul [comp. Lev. xix. 17; Matt. xviii. 15]. And if he confess and repent, forgive him [Yoma 87a; Luke xvii. 3] . . . and if he deny it, strive not with him lest he swear and thou sin doubly. . . . But give the vengeance unto God" (Deut. xxxii. 35; Rom. xii. 19). "Envy not the prosperous, for the poor man who is free from envy is rich" (ch. vi.-vii.). As its concluding words this Testament contains a totally irrelevant passage concerning Judah and Levi.

Testament of Asher.

Asher: The Two Characters of Vice and Virtue. It is possible that the Testament of Asher is defective, since the only reference to his own personal experience is found in ch. v., where he says that he observed life and sought out the commandments of God, only to find that the two ways of light and darkness, of good and evil, and of truth and error must ever be kept distinct, for doublefacedness serves not God but Belial (ch. iii.). The allusions in ch. ii. to unclean animals, such as swine, which appear half clean but in reality are unclean, and the reference in ch. iv. to clean animals, such as stags and hinds, which appear unclean in a wild state but are actually clean, are indicative of such concepts as are expressed in the Letter of Aristeas, §§ 153-169. The moral of the Testament may be summed up in the words: "Follow the truth with singleness of face and hate the spirits of error, . . . distinguishing the angels of the Lord and of Satan" (ch. vi.; comp. II Cor. xi. 14), and it closes with a brief apocalyptic passage predicting the exile and the restoration.

Testament of Joseph.

Joseph: Chastity. The Testament of Joseph presents Joseph in two different aspects. In the first part (ch. i.-x.a) he speaks as the same type of chastity in which he is presented by the rabbinic Haggadah (Targ. Yer. to Gen. xlix. 22; Soṭah 36b; Pirḳe R. El. xxxix.). In the second part (ch. x.b-xvii.) he appears as the model of brotherly love. In the former, Potiphar's wife is termed "the Egyptian"; in the latter "the Memphian." The first portion of the Testament is written in forcible poetic style; the latter, which chronologically is the earlier, is in simple prose, so that the whole is evidently the work of two different authors.

Joseph begins by declaring that his trust in God brought him rescue and exaltation through all the time that he was envied and hated, sold and slandered. It is, accordingly, the picture of a Ḥasid, the persecuted saint, that is exhibited in the first two chapters. During his stay of seven years with "the shameless woman," he proved another Daniel, even his fasting lending greater beauty to his face. He gave his food to the poor, and wept and prayed for the conversion of Potiphar's wife, even after his prayer had obtained for her, in her childless state, a son. He wished to instruct her in the way of righteousness, while she attempted to capture him by means of witchcraft (ch. iii.-vi.); and finally, when all her contrivances failed and he was cast into prison because of her slander, he sang songs of thanksgiving to God for his escape from the allurements of her shameless attitudes (ch. vii.-ix.; the last sentence is misplaced). "God loveth the chaste who endureth in his den of darkness. . . . If, therefore, ye follow after chastity and holiness in patience and humility of heart, the Lord will dwell among you, . . . and exalt you, and bless you with all good things even as He blessed me" (ch. ix.-x.).

In the second part (ch. x.b-xvii.) Joseph dwells on the fact that, lest he should put his brothers to shame, he never revealed his birthplace and his family either to the merchants, who had bought him as a slave, or to Potiphar, whose wife had fallen in love with the beautiful lad at sight of him, or to any of the eunuchs of Pharaoh, who stripped and beat him to wrest from him the confession that he was the son of a mighty man in Canaan (comp. Gen. xl. 15). "Therefore," said he to his children, "love one another, and with long-suffering hide each other's faults, for God delighteth in the unity of brethren" (ch. xvii.).

The apocalyptic passage, preserved in longer form in the Armenian version, but obviously curtailed and interpolated by Christian hands, describes the captivity and downfall of the kingdom of Joseph and the permanence of the kingdom of Judah. The reference to Levi is a Maccabean insertion.

Testament of Benjamin.

Benjamin: Purity of Heart. Benjamin, who is represented both by the Testament which bears his name and by rabbinic literature as the one who clings lovingly to his brother Joseph (see Gen. R. xciv. 7), typifies affectionate regard for the righteous. The hero himself, whose name is explained in ch. i. as "the child of old age," dwells on the nobility of Joseph, but since he would not impute an evil act to his brothers, he construed the story of the coat in their favor (ch. ii.), and besought his father to pray to God that He should not impute to them the evil they had devised against him (ch. iii.). Benjamin accordingly admonishes his children ever to direct their mind toward the good and pure, for the good man has no "evil eye," but sympathy for all, and mercy to the poor (ch. iv.), thus having a good influence even on the evil (ch. v.). The spirit of Belial will have no power over him, nor will he look with lust upon woman. Cain, the evil brother, had to suffer for seven hundred years, but Joseph could be defiled by sin no more than is the sun by shining over dung and mire. The whole monition (ch. ii.-viii.), however, is in great disorder. The apocalyptic portion (ch. ix.-xi.), based partly upon Gen. xlix. 27 and partly upon Deut. xxxiii. 12, is so interpolated by Christian writers that any analysis of it is extremely difficult.

In the New Testament.

Charles (*l.c.*) has already called attention to the frequent use of the Testaments of the Twelve Patriarchs by Paul and other writers of the New Testament. I Thess. ii. 16 is a quotation of Test. Patr., Levi, 6, 10; Rom. xii. 19 of Gad, 6, 10; Rom. xii. 21 of Benjamin, 6, 3; II Cor. vii. 10 of Gad, 5, 7; and Ephes. v. 6 of Naphtali, 3, 1. As has been indicated above, the New Testament teaching of forgiveness, of love even for enemies, of chastity in thought, and of similar matters is clearly presented in these far older Essene utterances of the patriarchs Gad, Issachar, Joseph, Benjamin, and others. The dualistic psychology and cosmology, as well as the eschatology, are the same in both, and the Testaments belong to the same class of literature and age as the DIDACHE and DIDASCALIA, being Jewish works appropriated and remodeled by the Church.

BIBLIOGRAPHY: Edition by Sinker, Cambridge, 1869; translated by the same scholar on the basis of this text in the *Anti-Nicene Library*, Edinburgh, 1890. For the literature see Schürer, *Gesch.* 3d ed., iii. 252-262, and Bousset in *Zeit. für Neutestamentliche Wissenschaft*, 1900, pp. 141-209; Charles, in *Hibbert Journal*, 1905, pp. 558-573.

T. K.

ṬET (ט): Ninth letter of the Hebrew alphabet. The signification of its name is uncertain. Its sound is that of an emphatic surd dental (palatal English "t"). It occurs only as a radical, never as a formative element. It sometimes interchanges with the dentals ד and ת and with the sibilant צ. As a numeral, "ṭet" (in the later period) has the value 9.

T. I. BR.

TETRAGRAMMATON: The quadriliteral name of God, יהוה, which is thus referred to in Josephus, in the Church Fathers, in the magic papyri, and in the Palestinian Talmud (Yoma 40a, below), whence it has passed into the modern languages. Other designations for this name, such as "Ha-Shem," "Shem ha-Meforash," and "Shem ha-Meyuḥad," have frequently been discussed by recent scholars (see bibliography in Blau, "Altjüdisches Zauberwesen," p. 128, note 1, and, on the terms, pp. 123-128). The term "Tetragrammaton" apparently arose in contradistinction to the divine names containing respectively twelve and forty-two letters and formed likewise from the letters Y, H, W, H (*ib.* pp. 137-146); for only thus is the designation intelligible, since ADONAI likewise has four letters in Hebrew.

Statistics of Occurrences.

The Tetragrammaton is the ancient Israelitish name for God. According to actual count, it occurs 5,410 times in the Bible, being divided among the books as follows: Genesis 153 times, Exodus 364, Leviticus 285, Numbers 387, Deuteronomy 230 (total in Torah 1,419); Joshua 170, Judges 158, Samuel 423, Kings 467, Isaiah 367, Jeremiah 555, Ezekiel 211, Minor Prophets 345 (total in Prophets 2,696); Psalms 645, Proverbs 87, Job 31, Ruth 16, Lamentations 32, Daniel 7, Ezra-Nehemiah 31, Chronicles 446 (total in Hagiographa 1,295).

In connection with אדני the Tetragrammaton is pointed with the vowels of "Elohim" (which beyond doubt was not pronounced in this combination); it occurs 310 times after אדני, and five times before it (Dalman, "Der Gottesname," etc., p. 91), 227 of these occurrences being in Ezekiel alone. The designation "YHWH Ẓeba'ot," translated "Lord of Hosts," occurs 260 times, and with the addition of "God" four times more. This designation is met with as follows: Isaiah 65 times, Jeremiah 77, Minor Prophets 103 (Zechariah 52; Malachi 24), Samuel 11, Kings 4; but it does not occur, on the other hand, in the Pentateuch, in Joshua, in Judges, or in the Hagiographa. Adding these 264 occurrences and the 315 just noted to the 5,410 instances of the simple Tetragrammaton, the word "YHWH" is found to occur 5,989 times in the Bible. There is no instance of it, however, in Canticles, Ecclesiastes, or Esther; and in Daniel it occurs 7 times (in ch. ix.)—a fact which in itself shows the late date of these books, whose authors lived at a period when the use of the Tetragrammaton was already avoided, its utterance having become restricted both in the reading of the Bible and still more in colloquial speech. For it was substituted ADONAI; and the fact that this name is found 315 times in combination with "YHWH" and 134 times alone shows that the custom of reading the Tetragrammaton as if written "Adonai" began at a time when the text of the Biblical books was not yet scrupulously protected from minor additions. This assumption explains most of the occurrences of "Adonai" before "YHWH"; *i.e.*, the former word indicated the pronunciation of the latter. At the time of the Chronicler this pronunciation was so generally accepted that he never wrote the name "Adonai." About 300 B.C., therefore, the word "YHWH" was not pronounced in its original form. For several reasons Jacob ("Im Namen Gottes," p. 167) assigns the "disuse of the word 'YHWH' and the substitution of 'Adonai' to the later decades of the Babylonian exile."

Reason for Disuse.

The avoidance of the original name of God both in speech and, to a certain extent, in the Bible was due, according to Geiger ("Urschrift," p. 262), to a reverence which shrank from the utterance of the Sublime Name; and it may well be that such a reluctance first arose in a foreign, and hence in an "unclean" land, very possibly, therefore, in Babylonia. According to Dalman (*l.c.* pp. 66 *et seq.*), the Rabbis forbade the utterance of the Tetragrammaton, to guard against desecration of the Sacred Name; but such an ordinance could not have been effectual unless it had met with popular approval. The reasons assigned by Lagarde ("Psalterium Hieronymi," p. 155) and Halévy ("Recherches Bibliques," i. 65 *et seq.*) are untenable, and are refuted by Jacob (*l.c.* pp. 172, 174), who believes that the Divine Name was not pronounced lest it should be desecrated by the heathen. The true name of God was uttered only during worship in the Temple, in which the people were alone; and in the course of the services on the Day of Atonement the high priest pronounced the Sacred Name ten times (Tosef., Yoma, ii. 2; Yoma 39b). This was done as late as the last years of the Temple (Yer. Yoma 40a, 67). If such was the purpose, the means were ineffectual, since the pronunciation of the Tetragrammaton was known not only in Jewish, but also in non-Jewish circles centuries after the destruction of the Temple, as is clear from the interdictions against uttering it (Sanh. x. 1; Tosef., Sanh. xii. 9; Sifre Zuṭa, in Yalḳ., Gen. 711; 'Ab. Zarah 18a; Midr. Teh. to Ps. xci., end). Raba, a Babylonian amora who flourished about 350, wished to make the pronunciation of the Tetragrammaton known publicly (Ḳid. 71b); and a contemporary Palestinian scholar states that the Samaritans uttered it in taking oaths (Yer. Sanh. 28b). The members of the Babylonian academy probably knew the pronunciation as late as 1000 C.E. (Blau, *l.c.* pp. 132 *et seq.*, 138 *et seq.*). The physicians, who were half magicians, made special efforts to learn this name, which was believed to possess marvelous powers (of healing, etc.; Yer. Yoma 40a, below). The cures, or the exorcisms, of demons in the name of Jesus which are mentioned in the New Testament and the Talmud (see EXORCISM) imply that Jesus was regarded as a god and that his name was considered as efficacious as the Tetragrammaton itself, for which it was even substituted.

Church Fathers and Magic Papyri.

It was in connection with magic that the Tetragrammaton was introduced into the magic papyri and, in all probability, into the writings of the Church Fathers, these two sources containing the following forms, written in Greek letters: (1) "Iaoouee," "Iaoue," "Iabe"; (2) "Iao," "Iaho," "Iae"; (3) "Aia"; (4) "Ia." It is evident that (1) represents יהוה, (2) יהו, (3) אהיה, and (4) יה. The three forms quoted under (1) are merely three ways of writing the same word, though "Iabe" is designated as the Samaritan pronunciation. There are external and internal grounds for this assumption; for the very agreement of the Jewish, Christian, heathen, and Gnostic statements proves that they undoubtedly give the actual pronunciation (Stade's "Zeitschrift," iii. 298; Dalman, *l.c.* p. 41; Deissmann, "Bibelstudien," pp. 1-20; Blau, *l.c.* p. 133). The "mystic quadriliteral name" (Clement, "Stromata," ed. Dindorf, iii. 25, 27) was well known to the Gnostics, as is shown by the fact that the third of the eight eons of one of their systems of creation was called "the unpronounced," the fourth "the invisible," and the seventh "the unnamed," terms which are merely designations of the Tetragrammaton (Blau, *l.c.* p. 127). Even the Palestinian Jews had inscribed the letters of the Name on amulets (Shab. 115b; Blau, *l.c.* pp. 93-96); and, in view of the frequency with which the appellations of foreign deities were employed in magic, it was but natural that heathen magicians should show an especial preference for this "great and holy name," knowing its pronunciation as they knew the names of their own deities.

Meaning and Etymology.

It thus becomes possible to determine with a fair degree of certainty the historical pronunciation of the Tetragrammaton, the results agreeing with the statement of Ex. iii. 14, in which YHWH terms Himself אהיה, "I will be," a phrase which is immediately preceded by the fuller term "I will be that I will be," or, as in the English versions, "I am" and "I am that I am." The name יהוה is accordingly derived from the root הוה (= היה), and is regarded as an imperfect. This passage is decisive for the pronunciation "Yahweh"; for the etymology was undoubtedly based on the known word. The oldest exegetes, such as Onḳelos, and the Targumim of Jerusalem and pseudo-Jonathan regard "Ehyeh" and "Ehyeh asher Ehyeh" as the name of the Divinity, and accept the etymology of "hayah" = "to be" (comp. Samuel b. Meïr, commentary on Ex. iii. 14). Modern critics, however, who, after the lapse of centuries, correct the Hebrew texts without regard to the entire change of point of view and mode of thought, are dissatisfied with this etymology; and their various hypotheses have resulted in offering the following definitions: (1) he who calls into being, or he who gives promises; (2) the creator of life; (3) he who makes events, or history; (4) the falling one, the feller, *i.e.*, the storm-god who hurls the lightning; (5) he who sends down the rain (W. R. Smith, "The Old Testament," p. 123); (6) the hurler; (7) the destroyer; (8) the breather, the weather-god (Wellhausen). All these meanings are obtained by doing violence to the Hebrew text (Herzog-Hauck, "Real-Encyc." viii. 536 *et seq.*).

Assyro-Babylonian Cuneiform Inscriptions.

Attempts have also been made to explain the Divine Name יהוה as Hittite, Persian, Egyptian, and even as Greek; but these assumptions are now absolutely set aside, since the name is at all events Semitic. The question remains, however, whether it is Israelitish or was borrowed. Friedrich Delitzsch, in discussing this question, asserts that the Semitic tribes from whom the family of Hammurabi came, and who entered Babylon 2500 B.C., knew and worshiped the god Ya've, Ya'u (*i.e.*, YHWH, Yahu; "Babel und Bibel," 5th ed., i. 78 *et seq.*); and Zimmern (in Schrader, "K. A. T." 3d ed., pp. 465-468) reaches the conclusion that "Yahu" or "YHWH" is found in Babylonian only as the name of a foreign deity, a view with which Delitzsch agrees in his third and final lecture on "Babel und Bibel" (pp. 39, 60, Stuttgart, 1905). Assyriologists are still divided on this point, however; and no definite conclusions have as yet been reached (comp. the voluminous literature on "Babel und Bibel").

Abbreviated Tetragrammaton.

"Yah," an abbreviated form of the Tetragrammaton, occurs 23 times: 18 times in the Psalms, twice in Exodus, and three times in Isaiah. This form is identical with the final syllable in the word "Hallelujah," which occurs 24 times in the last book of the Psalms (comp. also "be-Yah," Isa. xxvi. 4 and Ps. lxviii. 5). It is transcribed by the Greek "Ia," as "Ehyeh" is represented by "Aia," thus showing that "Yah" was the first syllable of יהוה. The form corresponding to the Greek "Iao" does not occur alone in Hebrew, but only as an element in such proper names as Jesaiah ("Yesha'yahu"), Zedekiah ("Ẓidḳiyahu"), and Jehonathan. According to Delitzsch ("Wo Lag das Paradies?" 1881), this form was the original one, and was expanded into יהוה; but since names of divinities are slow in disappearing, it would be strange if the primitive form had not been retained once in the Bible. The elder Delitzsch thought that "Yahu" was used independently as a name of God (Herzog-Plitt, "Real-Encyc." vi. 503); but, according to Kittel, "This could have been the case only in the vernacular, since no trace of it is found in the literary language" (Herzog-Hauck, "Real-Encyc." viii. 26, 533). All the critics have failed to perceive that the name "Yao" was derived from the same source as "Yaoue," namely, from Gnosticism and magic, in which Jews, Christians, and heathen met. "Yahu" was in fact used in magic, as is clear from the "Sefer Yeẓirah," which shows many traces of Gnosticism; in the cosmology of this work the permutation of the letters יהו furnishes the instruments of the Creation.

Other Names of God.

With the Tetragrammaton must be included the names of God formed of twelve, forty-two, and seventy-two letters respectively, which are important factors in Jewish mysticism (Ḳid. 71a *et passim*). They have, according to tradition, a magical effect; for mysticism and magic are everywhere allied. These great names are closely akin to the long series of vowels in the magic papyri, and are obtained by anagrammatic combinations of the effective elements of the Tetragrammaton. The simplest way of determining these three names is to form a magic triangle, whose base is a single Tetragrammaton, and its apex the Tetragrammaton repeated thrice. The four upper lines (12 + 11 + 10 + 9) give the names with forty-two letters; and the entire figure represents the Divine Name of seventy-two letters (Blau, *l.c.* pp. 144 *et seq.*). According to the book of Bahir (ed. Amsterdam, 1651, fol. 7a), the Sacred Name of twelve letters was a triple יהוה (Dalman, *l.c.* p. 39; Blau, *l.c.* p. 144).

In the earliest manuscripts of the Septuagint the Tetragrammaton was given in Hebrew letters, which in Greek circles were supposed to be Greek and were read *πιπι* (Field, "Origenis Hexaplorum Quæ Supersunt," i. 90, Oxford, 1875; Herzog-Hauck, *l.c.* viii. 530; Blau, *l.c.* p. 131). See also Aquila; Gnosticism; Jehovah; Names of God; Shem ha-Meforash.

T.

L. B.

TETRARCH (Greek, *τετράρχης*): A governor of a quarter of a province; the title of several feudal lords of Palestine and neighboring countries who were subject to Roman suzerainty. This title, which evidently implies a rank somewhat lower than that of Ethnarch, was held by the following Jewish princes: Herod the Great before he became king, and his brother Phasael, both of whom received the office from Antony (Josephus, "Ant." xiv. 13, § 1; *idem*, "B. J." i. 12, § 5); Pheroras, whom Augustus, at the request of Herod, appointed tetrarch of Perea (20 B.C.), a post which yielded him an income of 100 talents ("Ant." xv. 10, § 3; "B. J." i. 24, § 5); Herod Antipas, who was tetrarch of Galilee (Luke iii. 1); Philip, who governed Iturea and Trachonitis (*ib.*); and Lysanias, who ruled Abilene (*ib.*).

The district governed by a tetrarch was called a tetrarchy ("Ant." xx. 7, § 1); and this term was first used by Euripides, who applied it to Thessaly, attributing to it its original connotation of a quarter province, since Thessaly was divided into four districts. "Tetrarch" was employed in a similar sense with reference to Galatia; but in other countries, as well as among the Jews, it lost its primary meaning, and came to imply a ruler whose power was less than that of a king. Such tetrarchs were especially numerous in Syria (Pliny, "Historia Naturalis," v. 74), and one Sohemus of Lebanon is mentioned by Josephus ("Vita," § 11). Kings and tetrarchs furnished auxiliary troops to the army of Varus ("Ant." xvii. 10, § 9). The Herodian tetrarchs, either from error or from mere flattery, were addressed also as kings (comp. Matt. ii. 22, xiv. 9); and it was with but little justification that Agrippa II. styled himself "king," since, as a matter of fact, he was but a tetrarch.

TEWELES, HEINRICH: Austrian dramatist; born at Prague Nov. 13, 1856. He made his début in 1881 with a drama entitled "Die Schauspielerin." His other works are: "Kampf um die Sprache," 1884; "Die Armen," novel, 1885; "Presse und Staat," 1886; "Eherecht," a comedy, 1886; "Schule der Frauen," comedy, 1887; "Der Ring des Polykrates," comedy, 1888; "Gesellschafterin," comedy, 1889; "Der Hundertste Geburtstag," play, 1891; "Mein Papa," farce, 1893; "Johann Strauss," play, 1894; "Demetrius," a rewritten version of Hebbel's play, 1895; "Volksfreund," sketch, 1898;

and "Beitrag zur Goethefeier in Prag," 1899. He published also the "Prager Dichterbuch," 1893.

Teweles is dramaturgist of the German Landestheater in his native city.

S. E. Ms.

TEXAS: Largest state in the American Union; admitted in 1845; seceded Feb. 1, 1861; and readmitted in 1870. Previous to its admission to the Union, Texas was an independent republic (1836-45).

Early Settlement and Mexican War.

Samuel Isaacs removed from the United States to Texas in 1821, with Austin's first colonists. For serving in the army of the Republic of Texas he was given 320 acres of land. When Abraham Cohen Labatt visited Texas in 1831, he found at Velasco Jacob Henry and Jacob Lyons, of England and Charleston, S. C., respectively, engaged in mercantile pursuits. Jacob Henry's will provided for the building of a hospital at Velasco. Nacogdoches seems to have been the center of immigration. Prominent settlers (1832-40) were Adolphus Sterne, who participated in the Fredonian war, subsequently acting as alcalde and official interpreter; Dr. Joseph Hertz and his brother Hyman, Simon Schloss, Albert Emanuel, Sam. Maas (who married a sister of Offenbach, the composer), and Simon Weiss. They were pioneers in mercantile enterprises, and served the government in civil and military capacities. Simon and Jacob Mussina settled in Galveston (1836), the former editing a paper and practising law. Edward J. Johnson, from Cincinnati, Ohio, was killed while fighting under Fannin at Goliad (1836), where three other Jews also fought—Benjamin H. Mordecai (killed by Indians in 1840), M. K. Moses, and Herman Ehrenberg. Notable services were rendered to Texas by Levi Charles Harby (sometimes known as Levi Myers Harby), Isadore Dyer, and Leon Dyer. Michael Seeligson settled in Galveston in 1836; he was alderman of the city in 1840 and 1848, mayor in 1853, and worked untiringly for the annexation of the Republic of Texas to the United States. Henry Seeligson, his son, went to Galveston from Michigan in 1839, held several military appointments, and fought in three wars, in one of which he was highly complimented by Gen. Zachary Taylor. Prominent in the early wars, from San Jacinto (1835) to the war with Mexico (1846), were: Eugene Joseph Chimène, Kohn (Texas spy-company), Henry Wiener, Moses Albert Levy (surgeon-general in Sam. Houston's army in the Texas-Mexican war; was present at the storming of the Alamo, Dec. 5, 1835), A. Wolf (killed in the Alamo, 1836; his name is inscribed on the Alamo monument at Austin), Dr. Isaac Lyons of Charleston (surgeon-general, 1836), and D. I. Kokernot. Michael de Young, a French Jew, settled in San Augustine in 1840, and furnished the necessary equipment to volunteers during the war with Mexico. Three years earlier Edward S. Solomon settled in the same town. Many acres of land in Texas, now under cultivation, were originally allotted to David Moses and Michael de Young for services rendered to the republic.

Jacob de Cordova.

Jacob de Cordova (b. Spanish Town, Jamaica, 1808; d. Texas, 1868) removed to Galveston from New Orleans in 1837, and became an expert in real estate; "De Cordova's Land Agency" was known throughout the states. Upon a visit to Jamaica in 1833 he founded the "Daily Gleaner." In 1856 he published at Austin "The Texas Emigrant's and Traveler's Guide-Book," and later "Texas, Her Resources and Her Public Men" (Philadelphia, 1858). De Cordova introduced the Order of Odd Fellows into Texas. In 1847 he represented Harris county in the Texas legislature, and in 1849 he laid out the city of Waco. During 1856-58 he lectured on the resources of Texas in the large cities of the United States and in England. In 1848 his brother Phinehas (b. Philadelphia, 1819; d. 1903) joined him in the establishment of the "Texas Herald," a fortnightly. Phinehas subsequently edited in Austin the "South-Western American," a weekly (1849-52), which successfully advocated the loaning of the school-fund and the donating of a portion of the public lands to aid the building of railroads.

Emigration to Texas found an active advocate in Henry Castro (b. France, 1786; d. Mexico, 1861). In 1842 Castro entered into a contract with Sam. Houston, President of the Republic of Texas, to settle a colony west of the Medina, and Houston appointed him consul-general in France for Texas. Between 1843 and 1846 Castro sent to Texas 5,000 emigrants from the Rhenish provinces—the first organized emigration to Texas from a foreign country; considering the unsettled state of the country, it was a masterly undertaking. These emigrants settled in the towns of Castroville and Quihi (1845), Vandenburg (1846), and D'Hanis (1847). Castro county, in northwest Texas, was named in honor of this intrepid Jew, who sank $150,000 of his personal estate in the venture. Castro published pamphlets and maps in French and German to facilitate his emigration scheme.

The Jewish settlers in each district began communal life by establishing first a cemetery and then a synagogue. A cemetery was established in Houston in 1844, and a synagogue in 1854; in Galveston, 1852 and 1868 respectively; in San Antonio, 1854 and 1872; in Austin, 1866 and 1876; in Waco, 1869 and 1881; in Dallas, 1872 and 1874.

Synagogues.

German immigration from the fifties to the seventies was followed by Russian immigration from the eighties to the present time (1905); during the latter period Orthodox synagogues have been erected in all the foregoing cities. Synagogues, cemeteries, and communally active congregations exist in the following towns: Beaumont (synagogue erected 1895), Brenham (1895), Corsicana (1898), El Paso (1898), Fort Worth (Orthodox, 1892; Reform, 1904), Gainesville (1882), Hempstead (1897), Marshall (1886), Palestine (1900), Texarkana (1900), Tyler (1889), Victoria (1894). There are cemeteries in Bonham, Brownsville, Bryan, Calvert, Cleburne, Columbus, Corpus Christi, Denison, Ennis, Greenville, Hallettsville, Henderson, Jefferson, Laredo, Lufkin, Luling, Marlin, Mexia, Mineola, Nacogdoches, Navasota, Orange, Wharton. In these towns services are held on Rosh ha-Shanah and Yom Kippur, and religious schools have been organized in most of them, largely through the influence of Jeannette Miriam Goldberg. Hebrew benevolent associations, ladies' auxiliary and general social societies, and branches of national and international Jewish organizations are widespread; a few Zionists are found in the larger cities.

The following towns in addition to those which have been mentioned have from two to ten Jewish families each: Abilene, Alto, Alvarado, Amarillo, Aquilla, Beeville, Bellville, Bremond, Caldwell, Clarksville, Columbia, Crockett, Decatur, Del Rio, Denton, Eagle Lake, Eagle Pass, Elgin, Farmersville, Giddings, Gonzales, Groesbeck, Hearne, Hillsboro, Honey Grove, Jacksonville, Kaufman, Kennedy, Kyle, Lagrange, Llano, Lockhart, Longview, McDade, McKinney, Mount Pleasant, Mount Vernon, Paris, Pittsburg, Richmond, Rio Grande City, Rockdale, Rusk, San Angelo, San Diego, Schulenburg, Sealy, Seguin, Sherman, Skidmore, Sulphur Springs, Taylor, Temple, Terrell, Uvalde, Waelder, Waxahachie, Weatherford, Weimar, Wichita Falls, Willis, Wills' Point, and Yoakum.

In the early days, before there was any Jewish communal life, intermarriage between Jews and non-Jews was not uncommon; but to-day throughout the state, although Jew and Gentile mingle freely, intermarriage does not obtain to any appreciable degree.

Texas Jews in Army and Navy.

During the Civil war 103 Texas Jews served in the contending armies (Simon Wolf, "The Jew as Patriot, Soldier, and Citizen," p. 424), and the defense of Galveston is inseparably connected with the name of Capt. L. C. Harby (*ib.* pp. 72 *et seq.*, 116). The number of Texas Jews serving with the American forces in the Spanish-American war (1898) was: regular officers and enlisted men, 67 (state volunteers); non-commissioned officers and privates, 25. Benjamin Frenkel was surgeon on the U. S. S. "Hornet," and subsequently served at the naval station at San Juan, Porto Rico. Adjutant-General Openheimer, Texas State Militia, served as colonel of the Second Volunteer Infantry and major-general of the Texas Volunteer Guard ("Am. Jewish Year Book," 1900-1, pp. 535 *et seq.*). Colonel Openheimer is a member of the National Board for the Promotion of Rifle Practise, appointed by the secretary of war March 11, 1893.

Jews are found in both houses of the Texas legislature; Jewish physicians and lawyers are to be met with in all the larger towns; and the state's second assistant attorney-general, Isaac Lovenberg, is a Jew, as was Leo N. Levi (b. Victoria, Texas, 1856; d. New York city, 1904).

In C. W. Raines's "A Bibliography of Texas" (Austin, 1896) mention is made of the following publications of interest to Jews: George M. Walton, "The Jews, Their Origin, History, and Final Destiny" (Austin, 1895); J. E. McAshen, "The Jews," in the "Texas Quarterly"; Major B. Rush Plumley, "Poems for Rosh Hashono" (Galveston, 1876-78). Mrs. Leah Cohen Harby is the author of the "Flag-Song of Texas."

A considerable number of local and national Jewish and non-sectarian institutions have been the beneficiaries of Texas Jews; in this way the names of Rosanna Osterman, Isadore Dyer, Mrs. Tennie H. Northman, Moritz Kopperl, and Isabella Kopperl have become well known.

Texas has a total population of 3,048,710, of whom about 17,500 are Jews. The Jewish population is increasing as a consequence of direct immigration from Europe through the port of Galveston. See America; Dallas; Galveston; Houston; San Antonio.

THEBEN, KOPPEL (JACOB BEN ABRAHAM MANDL): President of the Jewish community in Presburg; died at Prague Aug. 26, 1799. As "sheṭadlan" of the Hungarian Jews he gained distinction; and under Joseph II., Leopold II., and Francis I. he labored indefatigably in behalf of his coreligionists, striving to protect them from harsh regulations. On March 31, 1783, Joseph II. issued the proclamation which was the foundation of the culture of the Hungarian Jews and the beginning of a happier era. One of its provisions, however, was that the Jews should not wear beards; but Theben obtained the revocation of this clause. When Joseph II. compelled the Hungarian Jews to perform military service, Theben sought, though unsuccessfully, to have this ordinance also revoked. In these undertakings his associate was Naphtali ben Isaac Judah Rosenthal, a wealthy citizen of Moor, and in his youth a friend of Moses Mendelssohn.

In 1791, when Leopold II. was crowned at Presburg, the Hungarian Jews, led by Theben, arranged an enthusiastic celebration, during which Theben urged the king not to require the Jews to serve any longer as soldiers. On this occasion the king presented Theben with a gold medal. In the same year Theben strove to free certain Jews who had been imprisoned and tortured in Per on account of a blood accusation. Indeed, there was scarcely any important matter connected with the Jews in which the Theben community did not take an active part.

"Theben" (Hungarian, "Dévény") is the name of a place near Presburg, whence Theben's ancestors probably came.

THEBES: Ancient and famous city of Greece; capital of Bœotia. Although there is no documentary evidence of the presence of Jews at Thebes in antiquity, it may be assumed that they resided there, since their coreligionists had lived from a very early period throughout Greece, including the neighboring cities of Athens and Corinth, while in the letter of Agrippa to the emperor Caius, Bœotia is described as inhabited by Jews (Philo, "Legatio ad Caium," § 36). At the time of the First Crusade a certain Tobias of Thebes is described as bringing Messianic prophecies from Salonica to Cairo ("J. Q. R." x. 148), and in Al-Ḥarizi's "Taḥkemoni" (ed. Lagarde, p. 92) mention is made of one Michael ben Caleb of Thebes. Abraham Zuṭra (or Zuṭa) of Thebes, moreover, was the author of a commentary on the Sifra (Zunz, in Asher's ed. of Benjamin of Tudela's "Itinerary," ii. 36; Michael, "Or ha-Ḥayyim," No. 86); for the study of the Midrashim was cultivated in Thebes as well as elsewhere in the Byzantine empire.

These scanty data are insufficient to determine the size of the Jewish community in Thebes, the earliest specific information in relation to which is derived from Benjamin of Tudela (ed. Grünhut, i. 15), who describes the city as a large one with more than 2,000 Jewish families, including the most skilful manufacturers of silk and purple in all Greece. Among them were many students of the Mishnah and of the Talmud; and they belonged to the foremost scholars of their age. At the head of the community stood R. Aaron Kuti, his brother R. Moses, R. Elijah Tortono, and R. Joktan; and their equals were not to be found in any of the Greek dominions except Constantinople. Of the large and prominent community of Thebes no further data exist.

THEFT (גנבה) AND STOLEN GOODS.—

The Moral Aspect: To steal is to break one of the Ten Commandments, "Thou shalt not steal"; and it is immaterial whether one steals from an Israelite or from an idolatrous Gentile, from an adult or from a child. The value of a peruṭah was regarded as the minimum value the theft of which constituted a complete transgression. But it is forbidden to steal anything, even as a joke, or with the intention of returning it or of paying for it; for by acting thus a person learns to steal in earnest (B. M. 61b; Sanh. 57a).

Receiver Worse than Thief.

It is forbidden to buy a stolen article; indeed, it is a great sin; for thereby the hand of transgressors is strengthened, and the thief is led to steal more. If there were none to buy, there would be none to steal; whence the Scripture, "Whoso is partner with a thief hateth his own soul" (Prov. xxix. 24).

And one should not buy from men whose employment indicates that the articles offered by them belong to their employers. In the Talmud this law is applied mainly to herdsmen. Wool or kids should not be bought from them; milk and cheese only in the wilderness, not in the settled country. However, one may buy four sheep or four fleeces from the shepherd of a small flock, and five from the shepherd of a large one, there being no presumption against these being his own. Nor should grain or fruits or wood be bought from those charged with watching such articles, unless the sellers offer their wares in public, with the baskets and scales before them; and garden stuff should be purchased only at the front gate of the garden, not at the back gate. It is, however, allowable to buy produce from a tenant on shares. Goods should not be bought from housewives, from servants, or from children, except those articles which such persons are in the habit of selling with the knowledge of the owner. Nor should remnants be bought from an artisan working up for his customers materials which by the custom of the country do not belong to him; and in all cases it is forbidden to buy from a person who says "Hide it" (B. Ḳ. 118b).

Criminal and Civil Liability: There is this distinction between theft and robbery: the thief takes the property of another secretly and without his knowledge, while he who takes openly by force is not a thief, but a robber. One is not punished as a thief for stealing either slaves, or documents having no intrinsic value. On the principle that where the Torah prescribes another penalty for a forbidden act stripes are not inflicted, the only punishment for theft is double restoration, and for stealing an ox or sheep, and selling or slaughtering it, fourfold and fivefold compensation (Ex. xxi. 37, xxii. 3); and on the strength of the words (*ib.* xxii. 8) "he shall pay double to his neighbor" it is held that he who steals either from a Gentile or from the Sanctuary is held only for single compensation: in other words, he is not punished at all. No compensation may be recovered from infants—not even simple restitution if the stolen article has been consumed — nor from a slave, as he has no property; but should the latter be manumitted, he is then liable for double compensation. It is, however, the duty of the court, when a boy is caught stealing, to cause a moderate whipping to be administered to him, and to a slave a sound whipping, so as to check the stealing habit. The master is not liable for what his slave steals any more than for damage arising from the latter's negligence.

Punishment Double Restitution.

The verse quoted above refers to the depositary who steals deposited goods. It orders double compensation only from him whom the judges condemn. Hence this penalty can not be imposed where the thief confesses; and opinions in the Talmud go so far as to relieve him, if he confesses to the court, of all but simple restitution, even though witnesses appear against him immediately thereafter. Nor can he in any case be sold for a Hebrew servant in satisfaction of more than simple restitution (Ḳid. 18a, expounding Ex. xxii. 2). He who steals a thing from a thief before the owner has given up the hope of recovery, and before the thing has been changed in substance, is not liable to the penalty, either to the first thief or to the owner. To make him liable for double compensation there must be such a taking of possession by the thief as would in a sale give "ḳinyan" (see Alienation and Acquisition); hence pulling the article or beast as long as it is within the owner's premises, even with delivery to a third person, is not sufficient; but lifting it, which always gives ḳinyan, completes the theft (B. Ḳ. vii. 6).

The fourfold restitution for an ox which the thief has sold or slaughtered and the fivefold restitution for a sheep or goat so disposed of are thus treated in the Mishnah (*ib.* vii. 2):

Fourfold and Fivefold Restitution.

> "He who has stolen, as proved by two witnesses, and has slaughtered, as proved by these or by two others, must pay fourfold or fivefold; he who has stolen and sold on the Sabbath, stolen and sold for idol-worship, stolen and slaughtered on the Day of Atonement, stolen his father's beast and slaughtered or sold and whose father then dies, or stolen and slaughtered and has then consecrated, pays fourfold and fivefold: he who has stolen and slaughtered for use as a medicine or as food for dogs, or has slaughtered and the carcass proves to be unsound ["ṭerefah"], or has slaughtered common food within the Temple yard, pays fourfold or fivefold."

The validity of the last two provisions is disputed. After another section dealing with the liability of plotting witnesses (see Alibi) who have testified against the supposed thief (*ib.* vii. 4), the Mishnah proceeds:

> "He who, according to two witnesses, has stolen and, according to one witness or his own admission, has slaughtered or sold pays twofold restitution. but not fourfold or fivefold; he who has stolen or slaughtered on the Sabbath, or for the purposes of idol-worship, or has stolen from his father and, his father having died, has sold and slaughtered thereafter, or has sold and consecrated and thereafter sold or slaughtered, pays double, but not fourfold or fivefold [with a disputed distinction, *ib.* vii. 5]. He who has sold all but a one-hundredth part thereof [which refers to other than horns or fleece] or has sold an article in which he himself has a joint interest, or has slaughtered in an unlawful manner, pays twofold, but not fourfold or fivefold. He who has stolen within the domain of the owner, but has sold or slaughtered outside thereof, pays fourfold or fivefold; but if he has stolen and sold or slaughtered all within the owner's dominion he is free."

The depositary who, when he has converted goods to his own use, claims that they are lost, is deemed a thief (Ex. xxii. 8); and if the deposit is an ox or a lamb, which he has sold or slaughtered, he is liable to fourfold or fivefold restitution (B. Ḳ. 106a).

In the baraita under these sections there are a number of other distinctions, especially as to the conditions and value of a stolen beast at the time of the theft and the time of the trial. The restitution, beyond the simple return of the stolen thing, is in all cases to be made in money, not in kind.

It happens sometimes that, in order to avoid disgrace, a thief voluntarily restores a stolen article without acquainting the owner of the restitution. In such a case, if he puts it back in its place and it is lost or stolen before the owner who has missed it has knowledge of its return, the repentant thief is liable for the loss (*ib.* 118a, where some nice distinctions will be found).

Sale in Market Overt.

The Stolen Article; Title: As a general principle, when the stolen thing is given, bartered, or sold to a third person, or when, upon the death of the thief, its possession passes to his sons, the title remains in the former owner; and his rights are more fully enforced as regards goods stolen than those taken by robbery and force. However, the Talmud speaks of an "institution of the market" (*ib.* 115a), according to which, when the seller of the stolen goods is not a notorious thief, the owner should repay to the buyer the price—generally much less than the value of the goods—which the latter has paid the thief, should take the stolen thing, and should then go to law with the thief regarding the sum paid. This institution calls to mind the sale in market overt under the common law of England. But, to bring the institution into play, the thief must have sold for money: it does not apply where he has paid a debt with the stolen thing; but it does apply where he has pawned the thing for an advance of money.

It would seem that the circumstances mentioned above, under which it is forbidden to buy goods because they are presumably stolen, would affect not only the conscience but also the title of the buyer; but the codes do not say so explicitly, referring only to purchase from a notorious thief. Certainly the words "Hide it" are an indication of theft.

If the stolen thing has been sold after the owner has lost all hope of recovery (see Robbery) or after it has lost its shape and name, the title passes to the buyer. It is remarked that where the stolen articles are (Hebrew) books, the presumption will hardly ever arise that the owner has lost all hope of recovery, inasmuch as the thief can not sell them to Gentiles, but only to Israelites.

When implements, books, or other articles in a house are not kept for sale, and some are stolen, and the owner finds them and recognizes them as his; or when goods are kept for sale, but the owner, after a theft, recognizes articles that were kept to be hired out, then the owner should prove by witnesses that they are his, and the buyer should swear in solemn form what he has paid for them. On repaying this amount the owner should recover his goods, but not otherwise; for, as the Mishnah (*ib.* x. 3) says, he might have sold them to a third person, from whom they were bought. This passage in the Mishnah is a basis for the "institution of the market" found, as above cited, in the Talmud.

W. B. L. N. D.

THEOCRACY (Greek, Θεοκρατία): System of state organization and government in which God is recognized as the ruler in whose name authority is exercised by His chosen agents, the Priests or the Prophets. The word in its technical meaning seems to have been first used by Josephus, to describe the peculiar nature of the Jewish government as devised under divine direction by Moses: "Our legislator . . . ordained our government to be what, by a strained expression, may be termed a theocracy, by ascribing the authority and the power to God" ("Contra Ap." ii., § 17).

Derived from Josephus.

The term expresses most succinctly the conception of the Old Testament historiographers, and more especially that of the books which are written from a priestly-Levitical point of view (*e.g.*, Chronicles, the Levitical code P). Basic to the notion is the relation of Israel to God as His peculiar people (comp. Ex. xix. 5), which therefore is to constitute "a kingdom of priests and an holy nation" (*ib.* xix. 6). By redeeming Israel from Egyptian bondage God has acquired this people for Himself (*ib.* xv. 16). The wonderful manifestations of divine power at the Red Sea proclaim God the Ruler forever (*ib.* xv. 18). Moses is only God's man, bringing the people's concerns before Yhwh (*ib.* xviii. 19), and communicating to the people God's will. Gideon rejects the proffered crown on the plea that God alone should rule over Israel (Judges viii. 22 *et seq.*).

The desire of the people for a king is regarded as equivalent to the rejection of Yhwh (I Sam. viii. 7). Even after the kingdom is established God is said to go before the king (II Sam. v. 24). Therefore, down to their least details all legal, political, and social provisions are essentially religious, as the direct outflow of God's regal and supreme will; and the Torah as God's word is the ultimate revelation of the divine King's commands, and the basic law of the nation. Even the retribution meted out to criminals and their detection are the immediate concern of God (Lev. xx. 3, 5–6, xxiv. 12; xx. 20; Num. v. 12 *et seq.*; Josh. vii. 16).

Relation Between Heavenly and Earthly Ruler.

The visible king—originally not known and recognized in Israel—is seated on God's throne (I Chron. xxix. 23; comp. *ib.* xxviii. 5). His authority is derived from that of the real ruler, God: hence the prophet's prerogative to dethrone even the king (comp. Samuel; see I Sam. xv. 26, xvi. 1 *et seq.*; I Kings xi. 29, xiv. 10, xvi. 1 *et seq.*, xxi. 21). The king represents before the people the reflected majesty of God (Ps. xlv. 7). The king's enemies are God's enemies (Ps. ii. 1 *et seq.*, xxi. 10): hence the Messianic visions are organically interwoven with the restoration of the kingdom in the dynasty of David (see Messiah). But the rerise of this theocratic kingdom in Israel will coincide with the acknowledgment of God as the ruler over the whole earth (see 'Alenu; Rosh ha-Shanah; Shofar).

It is certain that in antiquity every people felt itself to be under the direct tutelage and government of its ancestral god: all government in ancient days was theocratic; and the conception that Israel is bound to be loyal to Yhwh is not exceptional. In the stories relating to the rise and fall of Saul's family and the choice of David, later antipathies and sympathies of the prophetic party come to light (see Samuel; Saul). The theocratic idea, in the sense that it postulates the supreme authority of the Torah with the effect of making Israel a holy nation, is the final development of the Levitical-sacerdotal program culminating in P, and carried out under Ezra and Nehemiah, leading at the same time to the recasting of antecedent history along the lines of this sacerdotal program (see Chronicles).

An original theocratic republicanism of Israel can not be admitted. The tribal organization of Israel was none other than that obtaining among its cognates. The restrictions placed upon royal authority (Deut. xvii. 14–20) by the Deuteronomist reflect on the practises prevailing at court, as the strictures placed on the lips of Samuel (I Sam. viii. 6 *et seq.*) describe actual conditions that prevailed in pre-Deuteronomic times and that were, of course, condemned by the Prophets. The hereditary kingdom was probably an adopted foreign (Canaanitish) institution; the Israelitish tribes, jealous of their independence, being ruled by elders (sheiks) or judges, possibly by elective monarchs. But even these sheiks were only in so far agents of theocracy as the "oracles" of the tribal deity were consulted and obeyed. The dominance of the Law is as clearly recognized in Islam as it ever was in post-exilic Judaism. In fact, Islam is even to-day a theocracy (comp. Juynboll, "Handleiding der Mohammedaansch Wetenschap," Leyden, 1903).

THEODOR, JULIUS (JUDAH): German rabbi; born Dec. 28, 1849, at Schmalleningken, East Prussia. He studied philosophy and Orientalia at the University of Breslau and rabbinica at the Jewish theological seminary in the same city. After receiving from Breslau his diploma as rabbi and his Ph.D. from the University of Königsberg (1876), he became second rabbi and teacher at the religious school at Bromberg. In 1885 he was called as rabbi to Berent; and since 1888 he has occupied the rabbinate of Bojanowo, Posen. In 1890 he visited London, Oxford, and Paris for the purpose of examining the midrashic manuscripts in the libraries of those cities.

Theodor is the author of: "Zur Composition der Agadischen Homilien," in "Monatsschrift," 1879–80; "Die Midraschim zum Pentateuch und der Dreijährige Palästinische Cyclus," *ib.* 1885–87; "Der Midrasch Bereschit Rabba," *ib.* 1893–95; and "Bereschit Rabba mit Kritischem Apparate und Kommentare," parts i. and ii., Berlin, 1903, 1904.

S. F. T. H.

THEODORA: Queen of Bulgaria from 1335 to 1355; born at Tirnova la Grande, capital of the ancient kingdom of Bulgaria, of a family of Byzantine Jews, from whom she received the Greek name of Theodora, although she was called also Sarah and was termed "the beautiful Jewess." She was chosen on one occasion to present a petition to Ivan Alexander, Czar of Bulgaria, and that monarch, though he had had two wives and was the father of three children, became infatuated with her and married her after she had accepted Christianity of her own accord. He became by her the parent of three children: two sons, named Assen and Ivan Chichman, and a daughter, called Tamar or Mara (but see Jew. Encyc. iii. 426a, *s.v.* Bulgaria).

According to Christo J. Poppof, an ecclesiastical historian of Bulgaria, the Jews of Tirnova, taking advantage of the fact that one of their number sat on the throne, and presuming on the queen's favor, set no limits to their insolence, profaning the icons, the churches, even the eucharist itself, and blaspheming all that is most sacred to Christianity; so that their evil deeds encouraged heretics and fomented popular disturbances.

By the advice of the patriarch Theodore, Ivan Alexander called a national council in 1352, which was attended by all the prelates of the country; and in the presence of the czar himself and of Queen Theodora and her children a solemn anathema was pronounced against all heretics and Jews, and their expulsion from the country was decreed. Owing to the entreaties of Theodora, however, three Jews who had been condemned to death for blasphemy were reprieved, their sentences being commuted to other punishments; but in accordance with the decree of the council, the community of Tirnova, which had long inhabited a ghetto at the foot of the citadel of Trapesitza, was dispersed, and Jews never settled again in that city. According to another account (see Jew. Encyc. *l.c.* p. 426b), they emigrated to Nicopolis on the death of Ivan Chichman.

Theodora brought her influence to bear on her husband and secured the throne for Ivan Chichman, her own son by him, leaving for her two stepsons only the provinces of Widdin and Dobrudja, and thus exposing herself to the charge of the Bulgarian historians that in her maternal blindness she weakened the kingdom. Ivan Chichman was defeated by Sultan Murad I. about 1360; and Theodora died some years later.

Bibliography: Poppof, *Etvimii, Dernier Patriarche de Tirnova et de Trapesitza*, Philippopolis, 1901; *Revue des Ecoles de l'Alliance Israélite Universelle*, July, 1901. A portrait of Theodora and her children appears in *Svornik Narodni Umutvorenia*, Sofia, 1892.

S. M. Fr.

THEODORE OF MOPSUESTIA: Christian bishop and Church father; born and educated at Antioch; died at Mopsuestia about 429; teacher of Nestorius and Theodoret, and the foremost exegete of the school of Antioch, which was represented also by Lucian, Diodorus, and several others. In that school the historical interpretation of the Old Testament, which was at variance with the allegorical hermeneutics of Origen, had become the rule; and in this, the only rational and adequate exegesis, no one in antiquity was greater than Theodore, who, therefore, is in perfect harmony with modern methods of interpretation.

Commentary on the Psalms.

The early maturity of his friend Chrysostom impressed Theodore to such an extent that he, after a crisis in his life, early devoted himself to the study of the Bible, and at the age of twenty published his commentary on the Psalms, his most important work from a Jewish and an exegetical point of view. As a priest in Antioch Theodore sided with Diodorus and with Flavian, likewise a famous exegete; and he waged an active warfare against Arians, Apollinarians, and other heretics (Theodoret, "Historia Ecclesiastica," v. 39), although there is no mention of Jews in the long list of those whom he opposed. The fame which he acquired secured for him the bishopric of Mopsuestia, which he retained for the remainder of his life. After his death his works, like those of Diodorus, were declared heretical by the Fifth Ecumenical Council on the ground that he had interpreted the Psalms "in Jewish fashion."

None of the Church Fathers equaled Theodore either in accurate grammatical and historical hermeneutics or in originality of view. His commentaries are free from rhetoric and homiletics; but this very fact gives them value in the eyes of modern exegetes. He is, moreover, rigid in his interpretations, since he systematically avoids symbolisms and allegories. He is the chief authority, the "interpreter" par excellence, for the Syrian Nestorians. The boldness of his hermeneutics is astonishing; and in his criticism he is centuries ahead of his time.

Theodore was the author of numerous works, the titles of forty-one volumes by him being mentioned by Assemani; and to these works must be added several written in Syriac (Assemani, "Bibliotheca Orientalis Clementino-Vaticana," ii. 478). His chief works of Jewish interest are his commentaries on the Psalms, on Job, on Canticles, and on the Twelve Minor Prophets, as well as his five books against the allegorists; the latter work, now lost, probably contained his principles of exegesis.

Works.

Although Theodore made the mistake, which Jerome alone avoided, of interpreting the Septuagint instead of the Hebrew, he knew that the text of the former was sometimes corrupt; and he therefore examined it critically, having recourse to the Syriac version, to Aquila, to Theodotion, and, above all, to Symmachus (Stade's "Zeitschrift," vi. 265). Diestel alleges that Theodore knew neither Syriac nor Hebrew, and consequently lacked the fundamental knowledge necessary for exegesis, but Baethgen has proved that his commentaries show a certain knowledge of Hebrew, and that he was familiar with the curt lapidary Hebrew style which becomes incomprehensible when imitated in Greek. It must be confessed, nevertheless, that his knowledge of Hebrew was faulty, and that he relied far too much on the text of the Septuagint. His brother Polychronius, who was an adherent of the same school, was far superior to him in knowledge of Hebrew; but Theodore was the more important exegete.

Views on Prophecy.

Theodore interpreted most of the Psalms historically, holding, however, that David's prophetic gifts enabled him to foretell future events and to identify himself with them. He carried the idea of prophecy too far, however; for in his opinion it consisted merely in the ability to foretell events, embracing the immediate as well as the far distant future. But, though he refers much (in the Psalms) to the future, he confines his references to Jewish history, alluding but seldom to Jesus, which is the more remarkable since his was the period of the wildest allegorical and typological interpretation. He considers that Jesus is referred to in only three of the Psalms, namely, viii., xlv., and cx., to which may possibly be added, on the basis of other indications, lxxxix. and cxviii.; but not in xxii. nor in lxxii., which at most, he thought, might be interpreted typically in so far as Solomon, like Jesus, was a prince of peace. For seventeen psalms he offers no historical explanation, while he holds that references to David and his time occur in nineteen, to Jeremiah in one, to the Assyrian in twenty-five, to the Chaldean in sixty-seven, and to the Maccabean period in seventeen. This feature of his commentary is of especial importance as showing the keenness and soundness of his criticism. Not less noteworthy is the courage with which he rejects the authenticity of the superscriptions to the Psalms, which, he declares, were added by ignorant scribblers who could not be too severely censured.

He absolutely denied, moreover, that the Old Testament contained any references to the Son of God or to the Trinity, while any interpretation of Zech. ix. 9, 10 as applicable to Jesus was, in his view, evidence of extreme ignorance, since this passage, like Amos ix. 10, 11 and Micah v. 2, referred rather to Zerubbabel. The Song of Solomon he regarded as a secular epithalamium; and the Book of Job he considered a mixture of fact and fiction. It was a cardinal maxim of Theodore's that the authors of the Old and New Testaments were equally endowed with the mysterious gift of the Holy Spirit (commentary on Neh. i. 1).

Views on Inspiration.

Three degrees of inspiration were recognized by Theodore, although he gave no clear definition of them, asserting, for example, that David had the gift of the spirit (on Ps. lxxxi. 3, *τῇ τοῦ πνεύματος χάριτι*), yet regarding him in all other respects as a prophet. According to Theodore, Solomon had the gift of wisdom only, not that of prophecy; this view shows the influence of Jewish tradition, which accepted a similar gradation as existing in the three groups of the canonical Scriptures.

Although Baethgen has advanced the hypothesis that Theodore's works contain other traces of Talmudic tradition, such as the view advocated by him in his commentary on Ps. lv. that the son of Simon, and not the son of Onias III., built the temple at Leontopolis, no deductions can be drawn from such meager data. In his theories concerning the superscriptions in the Psalter and the Maccabean portions of that book, Theodore showed himself a decided opponent of tradition. The orthodox Church, however, could not endure the candor of his exegesis; and consequently only fragments of his commentaries have survived, namely, of that on the Psalms (part of which exists in a Syriac version), of that on the Twelve Minor Prophets, and of those on various books of the New Testament (see Baethgen's "Studies" in Stade's "Zeitschrift," v.-vii.)

THEODOSIA. See Kaffa.

THEODOTION: One of the Greek translators of the Old Testament (see Jew. Encyc. iii. 187, *s.v.* Bible Translations). He is the supposed author of one of the two extant Greek versions of the Book of Daniel and the apocryphal additions thereto, to a discussion of which the present article is confined. The other version is that of the Septuagint. In Church use the latter has been replaced by the former so effectively that only one manuscript of the Greek Old Testament contains the Septuagint text, viz., the Codex Chisianus, known as Codex 87 (Holmes and Parsons MS. 88), though the translation of the Seventy underlies the Syriac Hexaplar (see Swete, "The Old Testament in Greek," iii., pp. vi., xii.; he publishes both texts).

Used in Daniel for Septuagint.

"The relation of the two extant Greek versions of Daniel is a perplexing problem" (Swete, "Introduction to the Old Testament in Greek," p. 46). The preference for Theodotion goes back to a very early period. Origen gave the Septuagint a place in his Hexapla, but an examination of his quotations proves that in his writings he almost invariably cites according to Theodotion. Jerome (in his preface to Daniel) records the fact of the rejection of the Septuagint version in Church usage, assigning as the reason therefor that that translation is very faulty. Earlier Church fathers, Clement of Alexandria, for instance, had set the precedent; and in Hermas and in Justin clear indications are found of the extensive popularity of Theodotion's version (Swete, "Introduction," p. 47; Gwynn, in "Dictionary of Christian Biography," *s.v.* "Theodotion," iv. 97 *et seq.*).

Still it is plain that Theodotion did not translate Daniel directly from the Hebrew-Aramaic (Masoretic). For the apocryphal additions no Aramaic (or Hebrew) original may be assumed. Gaster (in "The Unknown Aramaic Original of Theodotion's Additions to Daniel," in "Proc. Soc. Bibl. Arch." 1894, xvi.) proves that the Aramaic text is itself an adaptation from the Greek of Theodotion, not its original (see, also, Schürer in Herzog-Hauck, "Real-Encyc." i. 639). Nor are other Aramaic-Hebrew accounts of the Dragon or of Susanna (Neubauer, "The Book of Tobit," 1878, p. xci.; Jellinek, "B. H." vi. 126-128) entitled to be considered as originals. The original language of the additions was Greek. Theodotion's version is an elaboration of this Greek original; and his translation of the text of Daniel also is manifestly a working over of a previous Greek rendering.

Relation to Chigi Manuscript of Septuagint.

But whether this Greek version which underlies Theodotion's text is the Septuagint as contained in the Chigi manuscript or another, independent, translation, is still in doubt. Schürer (*l.c.*) inclines to the opinion that Theodotion used the Septuagint and corrected it and supplied its deficiencies by comparison with the Masoretic text, while in the additions he recast the Septuagint with a free hand. Gwynn, whose treatise on Theodotion in the "Dictionary of Christian Biography" presents an elaborate investigation of the matter, argues for the view that two pre-Christian versions of Daniel, both passing as Septuagint texts, were current, one of which is that preserved in the Codex Chisianus, while the other furnished the basis for Theodotion's revision, the reviser consulting where possible the standard Hebrew text.

In order to illustrate the character of Theodotion's work, a comparison of his version of the additions to Daniel with that of the Chigi manuscript is very helpful. In The Song of the Three Holy Children he and the Septuagint agree in the main. The prayer of Azarias is placed after Dan. iii. 23. In the Septuagint the text of the preceding Biblical passages is somewhat changed in order to establish a better connection for the insertion. Theodotion omits verse 22b, while in verse 23 the simple statement is made that Shadrach, Meshach, and Abednego (Septuagint has Azarias) had fallen bound into the heated furnace. Verse 24 in the Septuagint reads: "In the following manner did Ananias, Azarias, and Mizael pray and praise the Lord when the king had commanded that they should be cast into the furnace." Theodotion's rendering is as follows (verse 24): "And they went about in the midst of the flames, praising God and blessing the Lord. Then [verse 25] Azarias stepped forth and prayed; he opened his mouth in the midst of the flames and spake."

Variants from Septuagint.

Other variants consist in transpositions of verses (*e.g.*, verses 54 and 55 occur in the reverse order in Theodotion), the omission of conjunctions, the substitution of the singular for the plural, and of the definite for the indefinite article, and the dropping of parts of verses. Analysis of these discrepancies confirms the view that Theodotion's text presents a recast of an anterior Greek version which, if not identical with, must have been similar to the one now extant in the Septuagint.

The history of Susanna presents wider divergencies, the Septuagint being briefer, and Theodotion's text exhibiting the character of an elaboration. The fact is clear that they are based on a common traditional story, while it is perhaps doubtful whether Theodotion's amplifications presuppose his use of the extant Septuagint text. The possibility that the two are parallel developments of an antecedent written account is, theoretically, certainly admissible. A few passages may illustrate the foregoing observations. Verses 12 *et seq.* read in the Septuagint:

> "But when the morning had dawned, they set out and hurried clandestinely, each hiding before the other, who should meet her and speak to her. And behold she was walking about as was her wont. But as soon as one of the elders had arrived, the other also made his appearance, and one asked the other: 'Why art thou gone forth so early without bidding me go along?' And they confessed to each other their pains of love."

Theodotion's version is as follows:

> "Yet they watched jealously from day to day to see her. And the one said to the other, 'Let us now go home; for it is dinner-time.' So when they were gone out, they parted one from the other, and, turning back again, they came to the same place. After they had asked one another the cause, they acknowledged their lust, and then appointed a time both together when they might find her alone."

The account of how they met Susanna is very elaborate in Theodotion (verses 15-28), while the Septuagint sums up the proposal and answer in two terse sentences. It must be noted that the play on the names of the respective trees occurs in both versions (verses 55 and 59).

In Bel and the Dragon Theodotion affects greater historical accuracy, giving details concerning names and dates that are not found in the Septuagint, where general statements, such as the "King of Babylon," predominate. Theodotion's Daniel is more profuse in his profession of faith, *e.g.*, verse 25, "Thy Lord, my God, will I worship; for He is a living God," which the Septuagint omits. These traits again suggest that Theodotion's method was that of an elaborator.

T. E. G. H.

THEOLOGY: The science that treats of God and of His relation to the world in general and to man in particular; in a less restricted sense, the didactic representation of the contents and essence of a religion. Jewish theology, therefore, denotes the doctrinal representation of the contents and essence of Jewish religion, the principles on which it rests, and the fundamental truths it endeavors to express and to realize.

Judaism a Revealed Religion.

Orthodox, or conservative, Judaism, from the standpoint of which this article is written, regards the Jewish religion as a revealed religion, the teachings of which were made known by God to man by supernatural means. These supernatural, divine communications of religious truths and doctrines took place, however, only at certain times in the past; and they were made only to chosen people (the Prophets, among whom Moses was preeminent). With the cessation of prophecy they were discontinued altogether. Through these supernatural manifestations God revealed to human beings all the religious truths essential to their guidance through life and to their spiritual welfare. These religious truths it is not necessary for man to supplement with human doctrines; nor may any of them be annulled. They are mainly contained in the Holy Scriptures, written by men who were inspired by God; and in part they are among the teachings and manifestations revealed by God to Moses which were not written down, but were preserved to the nation by oral tradition. Although the source of all religious truths within Judaism is to be found in revelation, Jewish theology is not solely revealed theology: natural theology has received recognition also. It is considered a fundamental maxim among almost all Jewish theologians and religious philosophers that the teachings and religious truths contained in the Scriptures as emanating from God can not be in direct contradiction to human intellect, which is itself of divine origin. The truths, understood and accepted by the human mind, which constitute the sum of natural theology are therefore taken into consideration in the determination of revealed religious truths. And, besides, the human mind has been allotted a general right to judge of the value and importance of the divine teachings; this it could do only by using as a standard the fundamental truths recognized by itself.

Connection with Natural Theology.

The theological system binding on every Orthodox, conservative Jew, and containing his confession of faith, is therefore a composition of natural and revealed theology. Revealed theology, however, is the preponderating element; for even such teachings and principles as might have been set up by human intelligence are considered, when embodied in the Holy Scriptures, as revealed by God. This theological system is not, however, simply a system of abstract truths and articles of faith in which the Jew is merely required to believe; for it contains the fundamental theological teachings and religious principles on which is based the Jewish conception of the world and of life; and it requires not only a belief in and approval of these principles, but also, as a necessary adjunct to such approval, the doing of deeds which are in keeping therewith. It imposes upon the believing Jew duties by which his life must be regulated. It must be admitted that Judaism—that is, the

Connection with Jewish National Customs.

sum total of the rules and laws, ideas and sentiments, manners and customs, which regulate the actions, feelings, and thoughts of the Jews—is more than a mere theological system, inasmuch as many of its rules and customs are of national character. It is not easy, however, to differentiate strictly between the national and the theological elements in Judaism. Several national customs are also divine precepts, whose observance is recommended in the Scriptures. And, besides, there exists between the Jewish religion and its supporters, the Jewish nation, a connection so intimate that Jewish nationalism and Jewish theology also are closely allied. National customs have become formulas expressing certain theological ideas and doctrines, while, on the other hand, theological rules have come to be considered characteristics of the nation, because they have become habitual to the people. Thus, for example, the customs and habits observed in commemoration of the most important national event—the delivery from Egypt—at the same time convey an idea of God's providence and of His influence upon the history of the nation which found such glorious expression in the Exodus. On the other hand, the theological system, with its precepts and requirements, has become a national bond which keeps the Jews together as one people. Without denying the partly national character of Judaism, it may therefore be said that Judaism is a peculiar theological system which, among other purely theological doctrines and religious principles, also sets up as articles of faith the belief in the imperishability of the Jews as a nation and the hope of a revivification of their independence. It imposes also the duty of preserving the nationality of Israel by observing the prescribed customs.

The Dogmas of Judaism.

The present article gives a representation of this theological system: the individual religious truths and fundamental teachings—the dogmas of the Jewish faith—will be cited and explained; and their importance for the practical religious life, as well as the moral and religious duties deduced from them, will be referred to. This imposition of moral and religious duties is characteristic of the dogmas of the Jewish religion, which, however, are not dogmas in the sense that belief in them alone insures the salvation of the soul; for mere belief in them, without action in accordance with such belief, is, according to the Jewish theological conception, of no value. The dogmas of the Jewish faith must not only be believed and acknowledged, but they also demand that one act in accordance with their logical requirements. In this sense the dogmas of the Jewish religion are not only those truths and fundamental doctrines with the denial of which Judaism would cease to be a religion, but also such teachings and articles of faith as are obligatory upon each individual. With these doctrines and articles of faith the most enlightened spirits and the most prominent thinkers of the Jewish nation have at all times occupied themselves. This being the case, it is not to be wondered at that differences of opinion have arisen with regard to details of individual points, one scholar having interpreted a particular sentence at variance with another. In all such cases where the most enlightened men of the nation have disagreed in the interpretation of a doctrine or an article of faith, the authoritative opinion of the majority is used as a basis in the following discussion (see Authority). Such views and teachings as were at all times considered obligatory on adherents of the Jewish religion are the fundamental doctrines of Judaism. Any interpretation of an article of faith which was at any time advocated by only one or a few persons is to be regarded merely as his or their individual opinion; it is not obligatory upon all followers of Judaism and will therefore not be considered here.

The fundamental dogma of the Jewish religion, without which such faith would be inconceivable, is the belief in the existence of God. This is also the fundamental principle of all other religions; but the conception of God taught by the Jewish faith is in essential points different from the conceptions voiced by other creeds. This peculiarly Jewish conception of God regards Him as the Creator of the world and of all creatures; and it bestows upon Him, therefore, the name "Ha-Bore yitbarak shemo" (The Creator whose name is glorified).

God as Creator.

The conception of God as the Creator of the universe, which is taught in the history of the Creation (Gen. i.), finds expression in the Decalogue also (Ex. xx. 11), and is often repeated in the prophetic books. "I have made the earth, and created man upon it: I, even my hands, have stretched out the heavens, and all their host have I commanded," says God through the mouth of the prophet (Isa. xlv. 12). Nehemiah says: "Thou, even thou, art Lord alone; thou hast made heaven, the heaven of heavens, with all their host, the earth, and all things that are therein, the seas, and all that is therein, and thou preservest them all" (Neh. ix. 6); and the Psalmist calls God the Creator "which made heaven, and earth, the sea, and all that therein is" (Ps. cxlvi. 6). The creation of the world by God, as the Jewish religion teaches, was a "creatio ex nihilo," since God, the Creator, merely through His will, or His word, called into existence the world out of absolute nothingness (Maimonides, "Yad," Teshubah, iii.; "Moreh Nebukim," ii. 27; Albo, "'Iḳḳarim," i. 12). God, as the Creator of the world, is its preserver also; and the creation is not a completed act, but a continuous activity. The laws which, with great regularity, rule the world have been instituted by God, and remain valid only through the will of God, who in this way "repeats every day the work of creation through His goodness." But "whatsoever the Lord pleased, that did he in heaven, and in earth, in the seas, and all deep places" (Ps. cxxxv. 6); and He is able to abolish the laws which govern nature. At certain times in the world's history, when it was necessary for higher purposes, He has done this, and caused events and phenomena to happen which were contrary to the usual laws of nature (see Miracle). All the miracles recorded by the Scriptures happened in this manner. The natural laws are nevertheless to be regarded as valid forever; for they were introduced by God in His wisdom as permanent rules for the order of nature, and He never has cause to change the plans once made by Him, nor to change the arrangements made according to these plans. Even the miracles, although taking place during a temporary suspension of natural laws, were not due to changes in the divine plans; for they were embodied in the original plan. For from the very creation of the world and the establishment of natural laws, God, in His prescience, realized that at certain times a deviation from this order would be necessary for the welfare of humanity, in order to show it that the laws of nature had no independent power, but were subject to a higher being, their Creator. It was therefore prearranged that these deviations should take place at the times decided upon. In the personificative language of the Midrash this teaching is expressed as follows: "When God ordered Moses to cleave the sea, the latter wondered, and said, 'Thou, O Lord, hast said it Thyself, and hast instituted it as a natural law, that the sea should never become dry.' Whereupon the Lord said, 'From the beginning, at the time of creation, when I decided the laws for the sea, I have stipulated that it should divide itself before Israel, and leave a dry path through its midst for that nation'" (Ex. R. xxi. 6). What has here been said concerning the phenomenal division of the water refers also to every other phenomenon which is a deviation from the natural order of things.

God in History.

Even as God is recognized as the Creator and Upholder of the world, so is He regarded as its Ruler. God's rulership over the world is secured through His creatorship (Ps. xxiv. 1-2). The doctrine of recognizing in God not only the Creator of the world, but also the Arbiter of its destiny, was revealed by God Himself upon Mt. Sinai when He declared to the Israelites that it was He who had freed them from Egyptian bondage and made them an independent nation (Ex. xx. 2). Nehemiah, after having recognized God as the Creator and Upholder of the world, enumerates His marvelous deeds, thereby acknowledging Him also as the Arbiter of its destiny (Neh. ix. 7-13). In Ps. cxxxvi. God is praised and acknowledged both as the Creator of the world and as the Author of all events. The direct result upon man of this belief in God as the Creator and Upholder of the world and as the Arbiter of its destiny, is to make him dependent upon and responsible to God who created him. According to Gen. i., God's creation of the world culminated when He created man in His own image. This resemblance of man to God refers to his spiritual qualities, which raise him above the animals, and enable him to rule the world. It also enables man to commune with God, to acknowledge Him, and to act according to His will. It therefore becomes the duty of man to exercise his God-given rulership of the world only in accordance with divine precepts. He may not follow his own inclination, but must in all things do according to the will of God. And in order to make it possible for man to do according to the divine will, God has, through a revelation, communicated His will to man (see Revelation).

God Incorporeal.

The belief in God as the sole Creator of the world and of all living creatures necessitates also a belief in the eternity of God. He is the Cause which has called all things into existence. But He needed no outer cause for His own existence, He Himself being the cause thereof. From this it follows that no limit can be placed upon His existence, that He has existed from all eternity, and that He will continue to exist forever. "I am the first, and I am the last," says the Lord through the mouth of the prophet (Isa. xliv. 6). He is called, therefore, "the eternal God" ("Elohe ḳedem"; Deut. xxxiii.), and the Psalmist calls Him the God who "from everlasting to everlasting is God" (Ps. xc. 2). This God, teaches the Jewish religion, is no carnal being; no carnal attributes may be assigned to Him, nor do earthly conditions apply to Him; and there exists, moreover, no other being that resembles Him. This doctrine is especially emphasized by Jewish theologians, because several Biblical expressions apparently favor a conception of God as a carnal being, and many teachers take these expressions literally. It is the nature of a carnal body that it is limited and defined by space. God, as a non-corporeal being, is not limited by space; and Solomon says, therefore, "behold, the heaven and heaven of heavens can not contain thee" (I Kings viii. 27). The sages expressed this conception thus: "God arranges the whole universe and sets its limits: but the universe has not sufficient room for Him; it can not contain Him" (Midr. Teh. to Ps. xc. 1 [ed. Buber, 195b-196a]). God is thus omnipresent. When expressions occur in the Holy Scriptures mentioning God as dwelling at a certain place, or when a house of God is spoken of, it is not to be understood that God is subject to limitations of space. For the heavens and the entire universe can not contain Him; how much less can a temple built by human hands? All such expressions are only means to convey the idea that certain places are fitted to bring human beings into such a frame of mind that they may approach God and find Him. In like manner do the Holy Scriptures warn against the attribution to God of any definite shape, and the conception of Him in any given likeness. "Ye heard the voice of the words, but saw no similitude. . . . Take ye therefore good heed unto yourselves; for ye saw no manner of similitude on the day that the Lord spake unto you in Horeb" (Deut. iv. 12, 15). All the Biblical expressions which mention God in anthropomorphic terms are to be understood figuratively. God's "hand" signifies His power; His "eye" and His "ear," His omniscience, through which He sees and hears everything. His "joy" signifies His satisfaction; His "anger," His disapprobation of human acts done against His will. All these expressions are merely metaphorical, and were selected in order to make the power of God comprehensible to human beings, who are accustomed to see every action done through a human agency. When the Bible wishes to explain anything that has taken place on earth through divine intervention, it uses the same expressions as are employed in the case of human acts. But in reality there is no comparison whatever possible between God, the absolute, spiritual being, and man, or between God's acts and man's. "To whom then will ye liken God? or what likeness will ye compare unto him? . . . To whom then will ye liken me, or shall I be equal? saith the Holy One" (Isa. xl. 18, 25). "For my thoughts are not your thoughts, neither are your ways my ways, saith the Lord" (*ib.* lv. 8; comp. Maimonides, "Moreh," i.48; Albo, *l.c.* ii. 14–17).

God Unique.

A further article of faith teaches the acknowledgment of God as the only God, and the belief in no gods besides Him. "I am the Lord thy God, which have brought thee out of the land of Egypt, out of the house of bondage. Thou shalt have no other gods before me," says God to Israel on Mt. Sinai (Ex. xx. 2-3). Even prior to the revelation on Sinai monotheism (the belief in one God) was an inheritance of the Jewish nation. The patriarch Jacob, in his dying hour, is filled with unrest because he doubts whether his children will preserve the faith which Abraham transmitted to him. His children, who are gathered about him, declare, however, that even as he believes in one God only, so also will they believe in the only God; and they pronounce the monotheistic article of faith: "Hear, O Israel: The Lord our God is one Lord" (Deut. vi. 4; Gen. R. xcviii. 4). This confession of faith the Jew pronounces thrice daily, and even in his dying hour he breathes it (see Shema'). With this confession on their lips, thousands of Jews have suffered martyrdom because they would not deny the unity of God. Many later religions have derived the monotheistic belief from Judaism, without, however, preserving it in the same degree of strict purity. The Jewish religion not only teaches its adherents to believe in no other god besides the One, but it also forbids the ascription to God of any attributes which, directly or indirectly, conflict with the strict belief in His unity. To ascribe to God any positive attributes is forbidden because it might lead to a personification of the divine qualities, which would interfere with the purity of the monotheistic faith. Many of the attributes ascribed to God are explained as negative characteristics. Thus, when it is said that God has a will, it implies only that He is not constrained in His actions; it must never be understood in the sense that His will is anything apart from Himself. Nor may it be taken to mean that His will is a part of His essence, for the unity of God is absolute and indivisible. Most of the attributes ascribed to God in Holy Writ and in the prayers are to be understood not as inherent qualities, but as ways and means by which He rules the world (see Middot, Shelosh-'Esreh). The emphatic mention of these divine attributes occurs so often in the Bible and in the prayers, because they exercise a great influence upon the religious and moral life of man. And for the same reason, and that its adherents may realize that they can rely only on God, does the Jewish religion impress upon them the fact that God is omnipotent. In their belief in God's omnipotence they can say with the Psalmist: "The Lord is on my side; I will not fear: what can man do unto me?" (Ps. cxviii. 6). God, in His omnipotence, can frustrate any plans made against them; and the fear of man need therefore never lead them astray from the path of their religion. They can proudly refuse to commit any immoral act, although demanded of them by the mightiest of the earth, even as Hananiah, Mishael, and Azariah refused the order of Nebuchadnezzar with the words: "If it be so, our God whom we serve, He is almighty, and He can deliver us and protect us" (Dan. iii. 17, Hebr.). To the many occasions on which this confidence in the omnipotence of God has protected the Jews from denying their faith, every page of their history bears witness.

God's Omniscience.

God is omniscient. This is the basis of the belief in the divine providence, of which the following is a circumstantial treatment. The belief in God's omniscience exercises great influence also on the moral and religious thoughts and acts of human beings. "Can any hide himself in secret places that I shall not see him?" says the Lord through the mouth of His prophet (Jer. xxiii. 24). All human acts are seen by God; and though they may be hidden from the eyes of human justice, they can not be hidden from Him. Therefore, no evil deed may be committed even in secret. Also the inmost emotions of the human mind are known to God, for He "knoweth the thoughts of man" (Ps. xciv. 11). Man may entertain no wicked feelings in his heart; for God "seest the reins and the heart" (Jer. xx. 12).

God is omniscient and all-kind. This faith is the foundation of Jewish Optimism. The world is the best possible world that could be created (Gen. R. ix. 2), for "God saw everything that he had made, and, behold, it was very good" (Gen. i. 31). Also in His government of the world does God exercise His loving-kindness, and "all that God does is done for the good" (Ber. 60b), even when it does not so appear to human beings. This faith, together with the belief in God's justice and never-ending love, gives man courage and strength to follow the straight path to his perfection unhindered by the adversities of life, and to endure with equanimity and with faith in God all the hardships of life. "It must not be believed of God that He would pass an unjust judgment upon man" (Ber. 5b). When, therefore, man is visited by affliction, he should first submit his entire conduct and all his actions to a severe test, to see if he has not called down his sufferings upon himself through his own misconduct. But even if, after a strict examination of his life, he can find nothing which could have been the cause of his suffering, he should despair neither of himself nor of divine justice; he should regard his afflictions as the "sufferings of love" ("yissurin shel ahabah") which God, out of His loving-kindness, has visited upon him (Ber. 5a). "For whom the Lord loveth he correcteth" (Prov. iii. 12), and He inflicts sufferings upon him in order to lead him to his salvation.

God Immutable.

The Jewish faith in the absolute unity of God necessarily implies His immutability, the unchangeableness of His resolutions, and the constancy of His will. This doctrine of God's immutability is often emphasized in the Scriptures: "For I am the Lord, I change not" (Mal. iii. 6); "God is not a man, that he should lie; neither the son of man, that he should repent" (Num. xxiii. 19); "And also the Strength of Israel will not lie nor repent: for he is not a man, that he should repent" (I Sam. xv. 29). It is also said with reference to His ordinances that they are everlasting and unchangeable: "He hath also stablished them for ever and ever: He hath made a decree which shall not pass" (Ps. cxlviii. 6; comp. Maimonides, "Moreh," iii. 20; Albo, *l.c.* ii. 19).

Re-pentance.

This doctrine of the immutability of God and the constancy of His will is in apparent conflict with two other important teachings of Judaism; namely, the doctrines of the power of repentance and the efficacy of prayer. These doctrines will therefore be briefly treated here; and it will be shown how Jewish theologians view this apparent contradiction. Almost all the prophets speak of the power of Repentance to avert from man the evil which threatens him, and to procure for him the divine grace. "Let the wicked forsake his way, and the unrighteous man his thoughts: and let him return unto the Lord, and he will have mercy upon him; and to our God, for he will abundantly pardon," says the prophet Isaiah (lv. 7); and in the same spirit speak Hosea (xiv. 2), Joel (ii. 12–14), Amos (iv. 6–11), Jonah (iii. 8–10), Zephaniah (ii. 1–3), Jeremiah (iii. 22, iv. 1–2), and Ezekiel (xviii. 21–32). And in like manner speak the sages of the Mishnah and the Talmud, comparing repentance to a shield which protects man from the punishment decreed upon him (Ab. iv. 13), or to a mediator who speaks to God in man's defense and obtains for him divine grace (Shab. 32a), or to a medium which brings salvation to the world (Yoma 86a). The question arises: How can God, on account of man's repentance, change His resolve, and avert the unfavorable judgment passed upon him; and does not such action conflict with the doctrine of the immutability of His plans? The answer to this question is that God never changes His will; and when man is able, through conversion, to escape the unhappy fate which would otherwise have been his, such escape is due to the fact that it was included in God's original plan. "Have I any pleasure at all that the wicked should die? saith the Lord God: and not that he should return from his ways, and live?" (Ezek. xviii. 23, 32). Sufferings and misfortunes were preordained for man on account of his sins; but it was also preordained that they should afflict him only as long as he persisted in his ungodly life and evil ways—the cause of his sufferings. And it is preordained, also, that when man through repentance removes the original cause of his sufferings, these and his misfortunes shall leave him (comp. Albo, *l.c.* iv. 18). The sages of the Talmud expressed this as follows: "Even before the world was created repentance ["teshubah"] was called into existence" (Pes. 54a); which means that before God created the world and human beings, before He decreed any fate for man, and before He made any resolutions, He had "teshubah" in mind; ordaining that through penance, which changes man's attitude toward God, God's attitude toward man should also become more favorable. Man's repentance, therefore, causes no change in God's will or decisions.

Power of Prayer.

What has been said above in regard to the power of penance applies likewise to prayer. The belief in the power of prayer to obtain God's help and grace finds expression in the Bible, where it is said of the Patriarchs and the Prophets that they prayed; and the Biblical examples of prayers that have been answered are numerous (see Prayer). The most conspicuous examples are the prayers of Hannah (I Sam. i. 10 *et seq.*) and Jonah (Jonah ii. 2 *et seq.*). But the efficacy of prayer does not necessitate a change in the divine plans. The only way in which to pray so that the prayer may be heard and answered is for man to turn to God with all his heart and with all his soul (comp. I Kings viii. 48–50), to repent all his sins, and to resolve henceforth to live in such a way as will be pleasing to God, from whom he solicits aid and grace. A prayer uttered in such a frame of mind and with such intention is not only a desire spoken to God, but it is an expression of the inner transformation which has taken place in the one who prays. His thoughts and his intentions have become entirely changed, and pleasing to God; and he deserves, therefore, the divine grace which has previously been withheld from him only because he lacked the sentiments to which his prayer has given expression (comp. Albo, *l.c.* iv. 18). The Talmudists express this teaching as follows: "How can a prayer help any one who is sick? If it be the divine intention that he die from his disease, no prayer can help him, since the divine resolution is unchangeable. But if it be the intention of God that he recover, why then should he pray?" The answer is: "Prayer can help man, even if the divine decree be not in his favor" (R. H. 16a). The unfavorable decree has been rendered conditionally and is to be fulfilled only if the man remains in his original frame of mind. But if he repents, and through prayer expresses the change that has taken place in him, then the decree is annulled; for thus was it preordained by God.

Besides the belief in the efficacy of prayer, the Jewish religion teaches also another sentence regarding prayer which distinguishes it from other creeds. This doctrine is that prayer may be directed only to God; and that, besides Him, there is no other being worthy of prayer (Maimonides' commentary on Sanh. xi. 1). This doctrine is, of course, only a consequent result of the doctrine of God's omnipotence, and that He alone is the Creator and the Ruler of the world, so that He alone can grant men their desires. But in this inhibition against praying to other beings, the Jewish religion includes also the invocation of angels or aught else as mediators between God and man. The Jew needs no agent whatever when he prays to his God: "When men will approach God," says the Talmud (Yer. Ber. ix. 13a), "they need seek out no mediator, nor need they announce their arrival through a doorkeeper. God says to them, 'When ye are in need, call upon none of the angels, neither Michael nor Gabriel, but call upon Me, and I will hear ye at once, as it is written (Joel iii. 5 [A. V. ii. 32]): "Whosoever shall call on the name of the Lord shall be delivered.'' '" Every man can reach his God through prayer, without any mediation; for even though God is elevated high above the world, when a man enters a house of God and utters a prayer, even in a whisper, He hears it immediately (Yer. Ber. *l.c.*). "The Lord is nigh unto all them that call upon him, to all that call upon him in truth" (Ps. cxlv. 18). He is equally near to all: to the highest as well as to the lowliest. If a prayer be uttered in the right frame of mind and with right intentions, it is efficacious whether pronounced by a Moses or by the lowliest one in Israel (comp. Ex. R. xxi. 3).

Holy Scripture mentions several instances where a prophet or a pious man prays for another; as, for example, Abraham for Abimelech, Moses for Pharaoh, etc. These prayers, although not expressive of the improved condition of those for whom they are uttered, are nevertheless heard by God, in order to show that He is the Ruler of the world and that those who believe in Him do not call upon Him in vain. "He is a prophet, and he shall pray for thee, and thou shalt live," says God to Abimelech (Gen. xx. 7). God inflicts sufferings upon unbelievers, with the intention of recalling them through the prayer of a pious one, thereby to show the unbelievers that He, the Ruler of the world, is accessible to the prayers of those that believe in Him.

As has been said above, the circumstance that man was created in the image of God imposes upon him the duty of ordering his life entirely according to the will of God; and only by doing so can he attain the highest perfection and fulfil his destiny. In order to act according to the will of God it is necessary that man should know what God wills of him. Through his God-given intellect man is enabled, in many cases, to recognize the will of God; but, in order to understand it fully, he needs a direct communication from God; that is, a divine revelation. Such a manifestation of the divine will was made even to the first human being, Adam, as well as to Noah and to the patriarchs Abraham, Isaac, and Jacob. Moses assured Israel that God would raise after him other prophets, who would make known to the people the divine will (Deut. xviii. 15-18); and he indicated to them the signs by which they might distinguish a true prophet from a false one (*ib.* xiii. 2-6, xviii. 20-22). The purpose of the true Prophets was only to enlighten the people as to the will of God, thereby bringing them to a clearer understanding of their duty: to live according to that will (Albo, *l.c.* iii. 12).

Divine Revelation.

The seers that arose in Israel and in Judah, and whose prophecies have been preserved in the books of the Old Testament, proved themselves true prophets through their personal characters as well as through the nature of their prophecies. The Jewish religion has, therefore, established as an important doctrine the recognition, as inspired by God, of all the prophetic utterances that have been handed down (Maimonides' commentary on Sanh. xi. 1). The times and places at which God bestows on a man the distinction of revealing Him to the people depends entirely upon His own will; but prophets must possess certain virtues and characteristics that make them worthy of receiving the divine communications (see Prophets and Prophecy). Those whom God found worthy of receiving such direct information regarding His will were, in a manner which seemed inexplicable and supernatural to the laity, possessed of the firm impression and the unshakable conviction that God spoke to them and apprised them of His will. They were convinced also that this impression was not a mere feeling of their souls, but that it came to them from without: from God, who revealed Himself unto them, making them His instruments through which He communicated His will to their fellow beings (see Revelation). But in order to inspire the laity with faith in the Prophets, God considered it necessary on Mt. Sinai to let the whole Jewish people hear that He spoke to Moses, that they might believe him forever (Ex. xix. 9); and when God then revealed Himself to the entire nation He convinced them "that He could commune with a human being" (comp. Deut. v. 24). They thereupon renounced all desire to receive commands and teachings from God direct. They were convinced that Moses repeated God's words to them faithfully; and they declared themselves willing to hear all that he spoke in God's name, and to act accordingly (Deut. v. 24). God thereupon revealed to Moses all the commandments and all the statutes and judgments, which Moses communicated to the people (*ib.* 31)

The Torah.

This revelation on Mt. Sinai is therefore the chief foundation of the Jewish faith, and guarantees the divine origin of the Law as contained in the Pentateuch. Before his death Moses wrote down the five books named after him (the Pentateuch), and gave them to the people (*ib.* xxxi. 24-26); and he commanded them to observe everything therein written, and to transmit it to their children as the teaching of God. However much the succeeding generations of Israel, after the death of Moses, fell off from God and became idolaters, there has been in each generation a group of pious men who have guarded faithfully the holy inheritance and transmitted it to their children. And through this careful transmission the teachings of Moses have been preserved unchanged through all ages. It is therefore set up as one of the fundamental dogmas of the Jewish religion that the Torah contained in the Pentateuch is identical with that which was revealed by God to Moses on Mt. Sinai (Maimonides' commentary on Sanh. xi. 1). No changes have been made therein except with regard to the characters in which it was written (Sanh. 21b).

The Torah contains rules and regulations which should govern the life of man and lead him to moral and religious perfection. Every rule is expressive of a fundamental ethical, moral, or religious idea. Those regulations in which human intelligence is unable to discern the fundamental idea are, through belief in their divine origin, vouchsafed the same high religious importance; and the ethical value of submission to the will of God where its purpose is not understood is even greater. In observing the Law man's good intention is the chief point (see Nomism).

These written laws are supplemented through oral teachings; and the interpretation of the written doctrines is entrusted to the sages and scholars, who expound them according to prescribed rules. They add to or deduct from the individual regulations; and in many instances, when it is for the good of the Law, they may annul an entire clause. In such cases, however, the whole body of scholars, or at least a majority, must agree as to the necessity and correctness of the measure (see AUTHORITY; ORAL LAW). Aside from such minor changes and occasional annulments, which are made in the spirit of the Law, and are intended to sustain the entire Torah ("Biṭṭulah shel torah zehu yissudah"; Men. 99b), the Law is to be regarded, in whole or in parts, as unchangeable and irrevocable. It is a firm article of faith in the Jewish religion that this Law will never be changed, and that no other doctrines will be given by God to man (Maimonides, *l.c.*).

Permanence and Sufficiency of the Torah.

Of many clauses of the Law it is expressly stated that they are meant to be eternal rules ("ḥuḳḳot 'olam"), or that they are obligatory on all generations ("le-dorot 'olam"); and there is not a single indication in the Holy Scriptures that the Law is ever to be replaced by other revealed doctrines. The new covenant of which Jeremiah speaks (xxxi. 31-33) is not to be made on the basis of a new revealed law, but on the basis of the old law, which shall take firmer root in the hearts of the believers. It was even promised to the Israelites that new prophets should arise, and they were commanded to harken to the words of these prophets (Deut. xviii. 15-18). But the new prophets can reveal no new law, and a prophet who sets up a law which conflicts with the old doctrines is a false prophet (*ib.* xiii. 1-4). And also a prophet who declares the old law to be valid for a certain period only, is a false prophet, for his statement conflicts with the teachings of Moses, the greatest of all prophets, who plainly says in many passages (Ex. xii. 14, 17 *et seq.*) that the regulations shall be obligatory forever (Maimonides, "Yad," Yesode ha-Torah, ix.; *idem*, "Moreh," ii. 39; Saadia, "Emunot we-De'ot," iii. 7-10). The words "It [the commandment] is not in heaven" (Deut. xxx. 12) are explained in the Talmud (B. M. 59b) as meaning that there is nothing left in heaven that has yet to be revealed in order to elucidate the Law. A decision or a legal question based only on such a heavenly revelation is not recognized (Maimonides, "Yad," *l.c.*). The doctrine of the unchangeableness of the Law is further emphasized by another fundamental dogma of Judaism, which declares the prophecy of Moses to surpass that of any of his predecessors or successors (Maimonides, *l.c.*). That the prophecy of Moses is different from and superior to that of any other prophet is explicitly stated in Num. xii. 8. Whether this difference was one of quality, as Maimonides thinks ("Yad," *l.c.* vii. 6; "Moreh," ii. 35), or one of degree only, as Albo (*l.c.* iii. 17) supposes, is immaterial. The fact is sufficient that the prophecy of Moses was superior to that of any other prophet. The Torah was given through Moses, of whose superior gift God Himself convinced the Israelites on Mt. Sinai. Should another prophet arise and declare the Law given by God through Moses to be invalid, then he would have to be a greater prophet than Moses; this, however, is inconceivable according to the fundamental doctrine which declares Moses to be the greatest prophet of all time. Those prophets are not to be believed who declared the old covenant to be dissolved, and that they were sent by God to make a new one; for one can not be as firmly convinced of their divine authority as of that of the old covenant, which they themselves do not deny (Abraham ibn Daud, in "Emunah Ramah," ii.; comp. also Albo, *l.c.* iii. 19).

Freedom of the Will.

The fact that the Law was given to man, and that he was requested to observe its precepts, implies that it depends on man alone whether or not he will do so. The freedom of the human will is explicitly announced in the Bible also: "I call heaven and earth to record this day against you, that I have set before you life and death, blessing and cursing: therefore choose life, that both thou and thy seed may live: That thou mayest love the Lord thy God, and that thou mayest obey his voice, and that thou mayest cleave unto him: for he is thy life, and the length of thy days" (Deut. xxx. 19-20). The Mishnah teaches: "Everything has been foreseen by God, and yet He has given to man freedom of will" (Ab. iii. 15). Also the Talmud plainly teaches of the freedom of will: "Everything is in the hand of God, with the exception of the fear of God, and piety: these alone are dependent upon the will of man" (Ber. 33b). "When any one would keep his life clean and virtuous, he is aided; but if he chooses to keep it unclean and wicked, he is not hindered," says Simeon ben Laḳish (Shab. 104a). The teachers of post-Talmudic times all regarded the liberty of the human will as a fundamental doctrine of Judaism. Although it is difficult to reconcile this doctrine with the knowledge or prescience of God, various attempts have been made to effect such a reconciliation, in order that it might not become necessary to deny either of them (comp. Saadia, "Emunot we-De'ot," ii. 9; "Cuzari," v. 20; Maimonides, "Moreh," iii. 20; Crescas, "Or Adonai," II. i. 4; Albo, *l.c.* iv. 5). The liberty and responsibility of man justify some retribution for his acts: rewards for the observance of divine precepts and commandments, and punishment for their transgression. A just retribution presupposes God's providence and His omniscience. The belief in God's omniscience—that is, the belief that He sees and knows everything, even the secret thoughts of man, and that nothing can take place in the world otherwise than by His will—is one of the fundamental dogmas of Judaism. Moses warns Israel not to forget that all events proceed from God: "And thou say in thine heart, My power and the might of mine hand hath gotten me this wealth. But thou shalt remember the Lord thy God: for it is he that giveth thee power to get wealth" (Deut. viii. 17, 18). Isaiah promises that punishment shall be meted out to the Assyrian king because he flattered himself with the belief that he owed his glory to his own power and to his own wisdom, and did not realize that he was only God's instrument (Isa.

God's Providence.

x. 12-16). Only the ungodly say, "The Lord shall not see, neither shall the God of Jacob regard it" (Ps. xciv. 7). The Psalmist reproves them, and says to them that God sees and hears everything, and that He knows the very thoughts of men, even when they are vain (*ib.* verses 8-11). And in another passage he thanks God for regarding even the lowliest and most insignificant of men and for caring for them (Ps. viii. 5, cxliv. 4). The words "Fear thy God" are, according to the Rabbis, added to commandments which depend upon the intentions of man; as if to say to him: "Fear God who knows thy thoughts" (Ḳid. 32b). That nothing takes place in the world without divine ordination is expressed by the Rabbis in the maxim that no man hurts his finger here on earth unless Heaven willed it so (Ḥul. 7b). Also the theologians and religious philosophers of the Middle Ages recognized the belief in divine providence as a fundamental doctrine of Judaism (comp. Maimonides, "Moreh," iii. 17-18; Albo, *l.c.* iv. 7-11; see also Providence).

In close relation with the doctrine of divine providence stands the doctrine of retribution: that God rewards those who keep His commandments, and punishes those who transgress them. **Divine Retribution.** The doctrine of retribution is one of the fundamental teachings of Judaism, and was revealed to the Jews on Mt. Sinai when God said to them that He would visit the sins of the fathers upon the children, and show mercy to those who loved Him and kept His commandments (Ex. xx. 5-6). In many commandments the reward given for their observance is indicated (Ex. xx. 12; Deut. xxii. 6-7). This doctrine, however, contains also a difficulty; for if nothing can take place in the world without God's will, and since He rewards the pious and punishes the transgressors, how does it come to pass that so many pious suffer while the ungodly prosper? This problem, which engaged the prophets Jeremiah (xii. 1) and Habakkuk (i. 13, ii. 4), the author of Job, and the psalmist Asaph (Ps. lxxiii. 2 *et seq.*), has also in post-Biblical times held the attention of the most prominent spirits of each generation; and in Talmudic, as also in post-Talmudic, times several attempts were made to solve and explain it (comp. Ber. 7a; Albo, *l.c.* iv. 7, 12-15). Most of the solutions and explanations have been based on the following two ideas: (1) Man, with his limited intellect, is not able to determine who is in reality a pious man ("ẓaddiḳ gamur") or who is in reality a sinner ("rasha' gamur"). Man can mistake a pious one for a transgressor, and vice versa. Nor can man correctly determine actual good and actual evil. Much which appears evil to man proves to be productive of good; while, on the other hand, many things which are seemingly good have evil results for human beings. Short-sighted man, therefore, able to judge from appearances only, may not pretend to judge the acts of God. (2) The other idea which endeavors to reconcile the doctrine of divine retaliation with the fact that pious men suffer while transgressors prosper, is the idea of the immortality of the soul. When man dies his soul does not die with him, but returns to God who gave it to man (Eccl. xii. 7). The soul is immortal, and after the death of man, separated from the body, it continues its existence in another world; and in this other world does complete retaliation take place. The doctrine of the immortality of the soul and of a future life is not definitely stated in the Holy Scriptures; but it is implied in many passages, especially in the Psalms (comp. "Cuzari," i. 115; Albo, *l.c.* iv. 39-40; Wohlgemuth, "Die Unsterblichkeitslehre in der Bibel," in "Jahresbericht des Rabbinerseminars in Berlin," 1899). **Immortality of the Soul.** The doctrine of the soul's immortality, and of a future life in which retribution shall take place, is set forth plainly and emphatically in post-Biblical Jewish literature—in the Mishnah and in the Talmud. "Let not thy imagination persuade thee that the grave is to be a place of refuge for thee," says the Mishnah (Ab. iv. 22); "Thou wert born against thy will, and against thy will livest thou. Against thy will shalt thou die and be compelled to account for thy life before the King of Kings, the Holy One, praised be He." In Deut. vii. 11 it is said with reference to the commandments: "which I command thee this day, to do them," and these words are explained by the Rabbis as meaning: "Today—that is, in this world—shall man observe the commandments; but he should not expect his reward in this world, but in another" ('Ab. Zarah 3a). "Reward for good deeds should not be expected in this world" (Ḳid. 39b). By the promise of a long life for those who honor their parents (Ex. xx. 12) is meant eternal life in the hereafter. The reward and punishment for good and evil deeds respectively to be meted out in the other world, can be of a spiritual nature only, since they apply entirely to the soul. "In the future world are to be found no material pleasures; but the pious ones, with their crowns of glory, enjoy the splendor of God," says the Talmud (Ber. 17a). As the object of doctrines and commandments is to lead man to the highest degree of perfection, so also is the reward for his observance of the Law an eternal enjoyment of the presence of God and true knowledge of Him. The punishment of the transgressor consists in his being excluded from all the divine splendor. This causes the soul to experience the greatest agony and remorse for its ungodly life. Although the belief in divine retribution is a fundamental doctrine of the Jewish religion, the latter teaches at the same time that neither the expectation of a reward nor the fear of punishment should influence the mind of man in his observance of the divine precepts. Judaism sets it up as an ideal that the commandments be kept through love of God (Soṭah 31a; 'Ab. Zarah 19a; see Immortality; Nomism).

The belief in the resurrection of the dead is closely connected with the doctrine of the immortality of the soul and of retribution in the hereafter. This belief in resurrection is conceived in various manners by Jewish theologians. **Resurrection of the Dead.** Some hold that, since retribution in the world to come can fall upon the soul only, bodies will, upon the day of resurrection, rejoin their souls so that both may be rewarded or punished together for the deeds done in common (comp. Albo, *l.c.* iv. 35).

This conception is expressed also in the parable of the lame and the blind (Sanh. 91a, b). Maimonides, on the other hand, understands resurrection figuratively only, and believes it refers to the immortality of the soul, which, after death, awakens to a new life without incarnation ("Ma'amar Teḥiyyat ha-Metim," *passim*).

But no matter how differently the theologians view the doctrine of resurrection, they all firmly believe that God can quicken the dead, and that He will do it when He so chooses (Maimonides' commentary on Sanh. xi. 1). As to when, in what manner, and for what purpose resurrection will take place; who will participate therein, whether the Jewish nation alone, or even only a part thereof; and whether the resurrected dead will thenceforth live forever or die anew—all these questions can not be answered. Explanations bearing on them have been made by various teachers (Saadia, "Emunot we-De'ot," vii.), but they are all mere conjectures (comp. Albo, *l.c.* iv. 35).

The Chosen People.

The doctrine of resurrection is expressed by Daniel (xii. 2): "And many of them that sleep in the dust of the earth shall awake, some to everlasting life, and some to shame and everlasting contempt." The sages of the Talmud hold that resurrection is alluded to also in various passages of the Pentateuch (comp. Sanh. 90b), one of which is as follows: "I kill, and I make alive" (Deut. xxxii. 39). The Mishnah sets up this doctrine as an important article of faith, and holds that those who do not believe therein, or who do not believe that it is embodied in the divine teachings of Judaism, and indicated in the Law, can have no share in the world to come (Sanh. xi. 1). By the Talmud, and by the theologians and religious philosophers of medieval times also, the doctrine of resurrection was recognized as an important article of faith (comp. "Albo," *l.c.*). The supporter of the Jewish religion and of all the ethical and moral ideals therewith connected is the Jewish nation, which God chose from among all peoples (Deut. vii. 6). The selection of the Jewish nation is evidenced in the fact that God found it worthy of a direct manifestation on Mt. Sinai, that He revealed to it religious truths, and that He bestowed upon it the peculiar grace of causing prophets, who should explain these truths, to arise from its midst.

This choice of the Jewish nation was not, however, made arbitrarily by God; it was based upon special merit which the Jews possessed above other ancient peoples. Abraham, the progenitor of the Jewish nation, possessed a true knowledge of God; and he commanded his children and descendants to "keep the way of the Lord, to do justice and judgment" (Gen. xviii. 19). But of all the descendants of Abraham, the Jewish people is the only one which has kept the legacy of its progenitor (comp. "Cuzari," ii. 6).

This knowledge of God which the Jews inherited from Abraham made them more religiously inclined than other nations; it made them fit to receive revelation, and to acknowledge the value of the laws and accept them. R. Johanan expresses this as follows: "God offered the Torah to all the nations, but none could or would accept it, until He offered it to the Israelites, who were both willing and qualified to receive it" ('Ab. Zarah 2b). Israel, however, may not keep these teachings for itself alone; they were not given it for its own exclusive property. The doctrines were given to Israel only because it was the only one among the nations which was qualified to accept them and to live according to them. And through Israel's example the other nations will be led to a true knowledge of God, and to the acceptance of His teachings. In this way will be fulfilled the promise which was given to Abraham (Gen. xxii. 18), that "in thy seed shall all the nations of the earth be blessed." With the exception of such laws and precepts as are based on national events, the whole Law is intended for all of humanity, which, through observance of the divine doctrines, may acquire a true knowledge of God and of His will.

The Messiah.

With reference to Lev. xviii. 5, the sages say that by the statutes of the Law are designated not the law for the priests or the Levites or the Israelites, but the statutes of the Law which man has to observe, and according to the regulations of which he must live (Sifra, Aḥare Mot, xiii. [ed. Weiss, p. 86b]). Israel has acted according to this principle, and has not withheld the laws of God from the nations. Most civilized nations owe their knowledge of God to these teachings. But the nations have not yet attained to a correct understanding of these doctrines, and neither in their political nor in their social lives have they reached the ideals of justice and brotherly love. The Jews, in possession of the revealed doctrines, and peculiarly gifted to comprehend the same and to realize their ideals, have been called upon, as they once taught the nations the knowledge of God, so in future to teach them other religious ideals. But this they can not do as long as they live in exile, dependent and persecuted and despised, and regarded as the reprobate sons of God. They can do this when they again attain political independence, settling in the land of their fathers, where they, in their political and social life, can realize the ideals of justice and love taught by the Jewish religion. The belief that this will some time happen constitutes an article of faith in Judaism which reads as follows: "A redeemer shall arise for the Jewish nation, who shall gather the scattered Jews in the land of their fathers. There they shall form an independent Jewish state and reawaken to independent national life. Then all nations shall go often to Palestine to study the institutions of a state founded on love and justice. From Zion the peoples shall be taught how they, in their own state institutions, may realize the ideals of justice and brotherly love; and the highest religious doctrines shall go forth from Jerusalem" (comp. Isa. ii. 2–4; Mic. iv. 1–4). The mission of salvation to be accomplished through the redemption of Israel is, however, only an indirect and remote aim. The direct and first aim is to compensate the Jewish nation for all the sufferings it has endured through its years of exile. God's relations to a nation are similar to those toward an individual.

The Restoration of Israel.

The Jewish nation lost its political independence on account of its sins and failings, and was sent into exile for that reason. This punishment, however, is not calculated to annihilate the Jewish people; for as God does not wish the death of the individual transgressor, but rather his conversion, neither does He wish the destruction of a nation which has sinned. God has promised the Jews that He will not cast them away even while they are in the lands of their enemies; neither will He break His covenant with them (comp. Lev. xxvi. 44).

God has promised to redeem them when they repent of all the sins which caused the loss of their national independence. "And it shall come to pass, when all these things are come upon thee, the blessing and the curse, which I have set before thee, and thou shalt call them to mind among all the nations, whither the Lord thy God hath driven thee, And shalt return unto the Lord thy God, and shalt obey his voice according to all that I command thee this day, thou and thy children, with all thine heart, and with all thy soul; That then the Lord thy God will turn thy captivity, and have compassion upon thee, and will return and gather thee from all the nations, whither the Lord thy God hath scattered thee. If any of thine be driven out unto the utmost parts of heaven, from thence will the Lord thy God gather thee, and from thence will he fetch thee: And the Lord thy God will bring thee into the land which thy fathers possessed, and thou shalt possess it; and he will do thee good, and multiply thee above thy fathers" (Deut. xxx. 1-5). When and in which manner this redemption will take place is not explained by any reliable tradition; and the many descriptions given by various teachers are only personal conjectures. When will the redemption take place? That is a question which can not be answered. And all calculations regarding the time of the advent of the redeemer are only conjectures. But it is a traditional belief among the Jews that it may take place at any time when the people are properly prepared to receive him (Sanh. 98a). The natural consequence of this belief is the demand for good acts. The nation must uphold its national and religious endowments, and not, through ill conduct, irreligious actions, and antinational endeavors, frustrate or make difficult its redemption. When the Jewish people believe in their redemption, when they desire it with all their hearts, and when with all their actions they strive to deserve it—then the redeemer may at any time arise from among them (*ib.*).

THEOPHANY: Manifestation of a god to man; the sensible sign by which the presence of a divinity is revealed. If the word is taken in this sense, and the passages which merely mention the fact of a revelation without describing it are separated from those which speak of the "angel of God," only four theophanies will be found in the Bible. Kautzsch (in Herzog-Plitt, "Real-Encyc." xv. 538) interprets the term in a broader sense, and divides theophanies into three classes, as follows: (1) those related as historical facts; (2) those which are the subjects of prophetic vision or annunciation; and (3) those which consist in purely poetic fancy. This classification may be applied to the four theophanies. The Sinaitic revelation is historical; the passages relating the divine inspiration of Isaiah (Isa. vi.) and of Ezekiel (Ezek. i.) represent subjects of prophetic vision; and Ps. xviii. 4-16 is poetic description.

The Sinaitic Theophany.

The Sinaitic revelation is related in calm, simple language in Ex. xix. 16-25. The manifestation is accompanied by thunder and lightning; there is a fiery flame, reaching to the sky; the loud notes of a trumpet are heard; and the whole mountain smokes and quakes. Out of the midst of the flame and the cloud a voice reveals the Ten Commandments. The account in Deut. iv. 11, 12, 33, 36 and v. 4, 19 is practically the same; and in its guarded language it strongly emphasizes the incorporeality of God. Moses in his blessing (Deut. xxxiii. 2) points to this revelation as to the source of the special election of Israel, but with this difference: with him the point of departure for the theophany is Mount Sinai and not heaven. God appears on Sinai like a shining sun and comes "accompanied by holy myriads" (comp. Sifre, Deut. 243). Likewise in the song of Deborah the manifestation is described as a storm: the earth quakes; Sinai trembles; and the clouds drop water. It is poetically elaborated in the prayer of Habakkuk (Hab. iii.); here past and future are confused. As in Deut. xxxiii. 2 and Judges v. 4, God appears from Teman and Paran. His majesty is described as a glory of light and brightness; pestilence precedes Him. The mountains tremble violently; the earth quakes; the people are sore afraid. God rides in a chariot of war, with horses—a conception found also in Isa. xix. 1, where God appears on a cloud, and in Ps. xviii. 11, where He appears on a cherub.

In Isaiah and Ezekiel.

Isaiah and Ezekiel receive their commissions as prophets amid glorious manifestations of God. Isaiah supposedly sees God on a high and lofty throne. In reality, however, he sees not Him but only His glorious robe, the hem and train of which fill the whole temple of heaven. Before the throne stand the seraphim, the six-winged angels. With two wings they cover their faces so as not to gaze on God; with two they cover their feet, through modesty; and with the remaining two they fly. Their occupation is the everlasting praise of God, which at the time of the revelation took the form of the thrice-repeated cry "Holy!" (Isa. vi.).

Ezekiel in his description is not so reserved as Isaiah. The divine throne appears to him as a wonderful chariot. Storm, a great cloud, ceaseless fire, and on all sides a wonderful brightness accompany the manifestation. Out of the fire four creatures become visible. They have the faces of men; each one has four wings; and the shape of their feet enables them to go to all four quarters of the earth with equal rapidity and without having to turn. These living creatures are recognized by the prophet as cherubim (Ezek. x. 20). The heavenly fire, the coals of which burn like torches, moves between them. The movement of the creatures is harmonious: wherever the spirit of God leads them they go. Beneath the living creatures are wheels ("ofannim") full of eyes. On their heads rests a firmament upon which is the throne of God. When the divine chariot moves, their wings rustle with a noise like thunder. On the throne the prophet sees the Divine Being, having the likeness of a man. His body from the loins upward is shining ("ḥashmal"); downward it is fire (in Ezek. viii. 2 the reverse is stated). In the Sinaitic revelation God descends and appears upon earth; in the prophetic vision, on the other hand, He appears in heaven, which is in keeping with the nature of the case, because the Sinaitic revelation was meant for a whole people, on the part of which an ecstatic condition can not be thought of.

In the Psalms.

Very different is the theophany of the Psalmist (Ps. xviii. 8-16). He is in great need; and at his earnest solicitation God appears to save him. Before Him the earth trembles and fire glows. He rides on a cherub on the wings of the wind. He is surrounded with clouds which are outshone by His brightness. With thunder and lightning He destroys the enemies of the singer and rescues him.

As may be seen from the descriptions of the various theophanies, the deep monotheistic spirit of the Israelites hesitates to describe the Divine Being, and confines itself generally to describing the influence of the revelation upon the minds and characters of those beholding it. See REVELATION.

K. M. RI.

THEOPHILUS: High priest; son of Anan, and brother of JONATHAN, who was deposed by Vitellius in 37 C.E. in favor of Theophilus (Josephus, "Ant." xviii. 5, § 3). He officiated for about three years, when he was succeeded by Simon Cantheras. This Theophilus is probably identical with the father of the high priest Matthias, and, according to Büchler, he is likewise the same as Hananeel the Egyptian (Parah iii. 5). The name of Theophilus figures in the Seder 'Olam (Neubauer, "M. J. C." i. 167).

THEOSOPHY. See CABALA.

THERAPEUTÆ (Greek, *Θεραπευταί* = "Worshipers of God"): A community of Jewish ascetics settled on Lake Mareotis in the vicinity of Alexandria at the time of Philo, who alone, in his work "De Vita Contemplativa," has preserved a record of their existence. The fact that the Therapeutæ are mentioned by no other writer of the time, and that they are declared by Eusebius (3d cent.) in his "Historia Ecclesiastica" (II., ch. xvi.-xvii.) to have been Christian monks, has induced Lucius, in a special work entitled "Die Therapeuten und Ihre Stellung in der Geschichte der Askese" (1879), to attempt to prove the Christian origin and character of the Philonean work and of the "monks and nuns" described therein, after Grätz ("Gesch." 4th ed., iii. 799) had declared it to be spurious. Lucius found many followers, among whom was Schürer ("Gesch." 3d ed., iii. 535-538). His arguments, however, have been refuted by the leading authorities on Philo, viz., Massebieau ("Revue de l'Histoire des Religions," 1887, pp. 170-198, 284-319), Wendland ("Die Therapeuten," 1896), and most thoroughly and effectively by Conybeare ("Philo About the Contemplative Life," Oxford, 1895; see also Bousset, "Religion des Judenthums im Neutestamentlichen Zeitalter," 1903, pp. 443-446). Although the life of the Therapeutæ as depicted by Philo appears rather singular and strange, its Jewish character may as little be questioned as the authenticity of the Philonic work itself. The influx of many currents of thought and religious practise produced in the Jewish diaspora many forms of religious life scarcely known to the historian: several of these helped in the shaping of the Christian Church. The name "Therapeutæ" (*Θεραπευταί*; *Ἱκεταί* is another name for these ascetics) is often used by Philo for Jewish believers or worshipers of God; and it was the official title of certain religious gilds found in inscriptions, as was also the Latin name "Cultores" = "Worshipers" (see Conybeare, *l.c.* p. 293, and METUENTES). It corresponds with the Aramean "Pulḥane di-Elaha." The members of the sect seem to have branched off from the Essene brotherhood; hence also the meaning "Physicians" given to the name "Therapeutæ" (Philo, *l.c.* § 1), just as the title "Asaiai" (= "Healers") was given to the Esaioi (see ESSENES). The Therapeutæ differed, however, from the Essenes in that they lived each in a separate cell, called "monasterium," in which they spent their time in mystic devotion and ascetic practises, and particularly in the study of the Torah ("the Law and the Prophets") and in reciting the Psalms as well as hymns composed by them. While remaining in retirement they indulged in neither meat nor drink nor any other enjoyment of the flesh.

Depicted by Philo.

Mode of Life.

Like the Essenes, they offered every morning at sunrise a prayer of thanksgiving to God for the light of day as well as for the light of the Torah, and again at sunset for the withdrawal of the sunlight and for the truth hidden within the soul. In studying the Scriptures they followed the allegorical system of interpretation, for which they used also works of their own sect. They took their meals only after sunset and attended to all their bodily necessities at night, holding that the light of day was given for study solely. Some ate only twice a week; others fasted from Sabbath to Sabbath.

Sabbath.

On the Sabbath they left their cells and assembled in a large hall for the common study of the Law as well as for their holy communion meal. The oldest member of the community began with a benediction over the Torah and then expounded the Law while all listened in silence; the others followed in turn.

After this they sat down to a common meal, which was very simple, consisting of bread and salt and herbs (hyssop); and water from a spring was their drink in place of wine. The Therapeutæ, differing in this respect from the Essenes, included women members. These, though advanced in years, were regarded as pure virgins on account of their lives of abstinence and chastity; and they seem to have been helpful in nursing and educating waifs and non-Jewish children that took refuge in such Essene communities (Philo, *l.c.* § 8). For these female members a partition was made in the assembly hall, separating them from the men by a wall three to four cubits in height, so that they might listen to the discourses on the Law without infringing the rules of modesty becoming to women (comp. the "tikkun gadol" in the Temple gatherings at Sukkot; Suk. v. 2); also at meals the women sat at separate tables remote from the men. Young men, but no slaves, waited at table; and probably young women at the tables of the women. They all wore white raiments like the Essenes. After the repast, passages of Scripture were explained by the presiding officer and other speakers, with special reference to the mysteries of the Law; and each of these interpretations was followed by the singing of hymns in chorus, in which both men and women invariably joined.

Pentecost.

Of all the festivals of the year they celebrated with especial solemnity "the night of the seventh Sabbath" (Pentecost), when they ate unleavened bread in place of the two loaves of leavened bread from the new wheat offered on Pentecost in the Temple. After this they spent the whole night until sunrise in offering up praises and in songs of thanksgiving sung in chorus by men and women; the song of Moses and Miriam at the Red Sea was thus sung. The singing itself was rendered according to the laws of musical art, which seems to have been borrowed from Egyptian temples, and was then transmitted to the Christian Church (see Conybeare, *l.c.* p. 313).

Whether these nocturnal celebrations took place every seventh week or only at Passover and Pentecost (and the Feast of Sukkot), as Conybeare thinks, is not made clear in Philo's description. The probability is that the Passover night gave the first impulse to such celebration (see Wisdom xviii. 9); and the custom of rendering the song of the Red Sea chorally appears to have prompted its recitation every morning in the synagogal liturgy in a manner betraying an Essene tradition. How far back the celebration of the night preceding Shabu'ot by study and song until daybreak goes may be learned from the Zohar (Emor, iii. 93), where reference is made to the custom of "the ancient Ḥasidim who spend the whole night in the study of the Law and thus adorn Israel as a bride to be joined anew to God, her bridegroom."

In no way, however, does the Philonic description bear any trace of the Christian character attributed to it by Grätz and Lucius. See also JEW. ENCYC. x. 8b, *s.v.* PHILO JUDÆUS. K.

THESSALONICA. See SALONICA.

THESSALY: Province of northern Greece, on the Ægean Sea. It numbered Jews among its inhabitants at a very early date, although those that now (1905) live there speak Spanish and claim to be descendants of refugees who emigrated from Spain. There are Jewish communities at Larissa, Trikala, and Volo. None of them has a rabbi; and Hebrew studies there are in a state of decay. At Larissa and Trikala religious instruction is given in Jewish public schools established under the provincial law relating to such schools; they are supported by the government. The community of Trikala, by reason of numbering (according to the census) "not more than 1,000 members," has no special school. The Jewish students finish their education in the government higher schools; and some even enter the University of Athens.

The congregations have synagogues similar to those of every community in Turkey: one story, with colored windows, and with columns in the middle which support the dukan and candlesticks. The most beautiful of these synagogues is that at Larissa, which is very large and is situated in the center of a court in which there are several "batte midrashim"; one of these serves as a library and yeshibah, where religious studies are daily pursued. The congregation of Larissa is proud of its past grandeur. Its members speak of the famous "Yeshibat Rabbanim," which was a seat of learning at which twenty to twenty-five chief rabbis studied the Talmud and wrote religious works. Of the latter some manuscripts still exist in the old library.

Larissa, which formerly possessed a great number of rich Jews, was called "The Tree of Gold." About fifty-five years ago a riot took place, the poor Jews rising up against the rich. It became so serious that many of the wealthy Israelites emigrated, which wrecked the city's prosperity. To-day its rich Jews may be counted on the fingers; and the numerous poor ones are cared for by a charitable institution. Among the philanthropic members of the congregation should be mentioned the Matalon brothers. The Greco-Turkish war of 1897 gave the finishing stroke to this already impoverished community: besides the misfortune which the Jews shared in common with the other inhabitants in having their homes destroyed and their property stolen, they were accused by slanderers of having taken part in the plundering.

The community of **Trikala,** which is younger than that of Larissa, is more prosperous, not having suffered from the ruinous consequences of the war. This community numbers among its members the richest Greek Jew, Elia Cohn, whose fortune is estimated at from five to ten million francs.

Volo possesses the youngest Jewish community in Thessaly. It was organized toward the close of the nineteenth century by Spaniards of the province, and by other Jews who came from Janina, Chalcis, and Salonica. Since its annexation to Greece the city has become the first port in Thessaly. Most of the Jews of Volo are in easy circumstances; there are hardly any poor among them. The community is the most progressive in Greece. The Jewish youth speak Greek even in their social intercourse; and they have organized a club, called "The Future," in connection with which instructive lectures are delivered; and work is undertaken having for its aim the building up of the community. This club is presided over by Solomon Daffas, formerly director of a school of the Alliance Israélite Universelle. The Jews of Volo have organized also a Philharmonic Society.

S. M. C.

THEUDAS: 1. Pseudo-Messiah, who appeared during the consulate of Cuspius Fadus and succeeded in winning a large number of adherents. In proof of his Messianic mission he is said to have promised to lead his followers across the Jordan after dividing its waters simply by his word. Regarding this as indicative of open rebellion against Rome, Cuspius sent a division of cavalry against Theudas and his followers, who were almost entirely annihilated (comp. Acts v. 36). Theudas was decapitated, and his head was carried to Jerusalem as a trophy of victory.

BIBLIOGRAPHY: Josephus, *Ant.* xx. 5, § 1; Eusebius, *Hist. Eccl.* II. ii.; Schmidt, in Herzog-Plitt, *Real-Encyc.* xv. 553-557; Klein, in Schenkel, *Bibel-Lexikon*, v. 510-513; Schürer, *Gesch.* i. 566, and note 6.

2. Expounder of the Law; flourished in Rome during the Hadrianic persecutions. He aided with generous gifts of money the teachers of the Law who had suffered from these persecutions, and arranged with the Roman communities that the taxes formerly paid to the Temple in Jerusalem should be used for the schools, which otherwise would have been without any source of support (Yer. M. Ḳ. 81a).

Theudas introduced into Rome the practise of eating on the eve of Passover a lamb prepared in accordance with the custom observed in Jerusalem with regard to the sacrificial lamb (Pes. 53a, b; Ber. 19a; Beẓah 23a). According to tradition, this so enraged the Palestinian codifiers that they sent him the following message: "If you were not Theudas we would excommunicate you." In his capacity as archisynagogue it was Theudas' duty to deliver a sermon in the synagogue each Saturday. One of these sermons has been preserved, in which he emphatically asserts that it is the duty of a Jew to suffer martyrdom rather than abandon his faith (Pes. 53b; Midr. Teh. to Ps. xxviii.).

In the Talmud, Theudas is once erroneously mentioned in connection with Simeon ben Sheṭaḥ—a mistake which has been pointed out by Bacher. The oldest Mishnah teacher to mention Theudas is R. Jose.

THOMAS, EMILE (EMIL TOBIAS): German actor; born at Berlin Nov. 24, 1836. Thomas has had a most varied career. He made his début in 1852 with the company of Pitterlin, which traversed the Erzgebirge, Saxony. The plays were ultrasensational—"Der Wahnsinnige," "Die Giftmischerin," and "Die Grabesbraut." Thomas received no monetary compensation, being paid in food; and the arrangement lasted for three years. He then obtained engagements in Görlitz, Leipsic, Cologne, Danzig, and Breslau. In the last-named city, Dreichmann, director of the Friedrich-Wilhelmstädtische Theater, Berlin, saw the young actor and engaged him for his house. Thomas made his début there Dec. 3, 1861, as the *Baker's Boy* in "Hermann und Dorothea." So great was his success that he was made stage-manager. In this capacity he produced Offenbach's "Die Schöne Helene" (himself playing *Kalchas*) and Salingré's "Pechschulze." In 1866 Chéri Maurice engaged him for the Thalia Theater, Hamburg, where he remained until 1875, when he became manager of the Woltersdorfftheater, Berlin. Two years later he resigned and went on a starring tour which lasted a year; he then joined the Ringtheater, Vienna. After the destruction of this house in 1881, Thomas appeared at the Wallnertheater, Berlin. In 1886 he went with his wife, Betty Thomas-Damhofer, to the United States, scoring financial and artistic successes.

On his return to Germany in 1887, Thomas assumed the management of the Centraltheater, Berlin, which he renamed the "Thomas-Theater"; but his direction was most unsuccessful, and he was forced to relinquish it. Since then he has played in the principal theaters of Germany and Austria. Since 1902 he has acted at the Metropoltheater, Hamburg. His best rôles are: *Striese* in "Der Raub der Sabinerinnen"; *Kälbchen* in "1733 Thaler, 22½ Silbergroschen"; and *Geier* in "Der Flotte Bursche."

THOMAS, FATHER. See DAMASCUS AFFAIR.

THOMASHEFSKI, BORIS: Judæo-German actor; born at Kiev May 30, 1866. He went to New York to seek work in 1881 and soon organized a Jewish troop which played in Turn Hall, Fourth street. Three years later he removed to Chicago, where he became a theatrical manager. In 1893 he settled in New York, and became one of the leading Yiddish actors. At present (1905) he is lessee and manager of the People's Theater in that city.

Thomashefski plays the chief character in almost all the pieces produced at his theater, most of which are written by Latteiner. He has himself written some Judæo-German plays and published a collection of witty sayings (in "Theatre Journal," 1903-1905, i., ii.).

A. M. SEL.

THORN: Town of West Prussia, founded in 1233 by the Knights of the Teutonic Order. Jews were not permitted to dwell in Thorn while the knights held sway; and after the Polish government took possession of the town, in 1453, they were admitted only occasionally. Several Jews were living there about the middle of the seventeenth century; and in 1749 they were allowed to open a school. In 1766 all the Jews except six were expelled; but they seem to have returned in the following years. In 1774 and 1779 the Jews were again driven out; returning, they were once more ordered to leave in 1793, when Prussia took possession of the town; and, though they succeeded in obtaining a respite, they were expelled in 1797. Many Jews settled gradually in the town when it became part of the duchy of Warsaw, after the Peace of Tilsit; according to the town records, they stole in during the French occupation. In 1823 the community numbered 52 families, comprising 248 individuals.

The first rabbi was Samuel Heilmann Leyser of Lissa, who seems to have settled in the town toward the end of the eighteenth century; he officiated without remuneration down to 1847. His successors were: Dr. Krakauer (1847–57); Dr. Engelbert (1857–62); Dr. Rahmer (1862–67); Dr. Oppenheim (1869–91); and Dr. I. Rosenberg, the present incumbent, who has held office since 1892. The following scholars have lived at Thorn: Ẓebi Hirsch Kalischer (d. 1875), author of "Derishat Ẓiyyon," "Emunah Ramah," and "Sefer ha-Berit 'al ha-Torah"; his son Louis Kalischer, author of "Ḳol Yehudah"; and Isaac Miesses, author of "Ẓofnat Pa'neaḥ" and other works.

The community possesses a synagogue, built in 1847; a home for the aged, organized in 1892; a religious school, a loan society, a ḥebra ḳaddisha, and a literary society. In 1903 the Jews of Thorn numbered 1,200 in a total population of 30,000. The Jewish inhabitants of the suburbs of Podgorz and Mocker, and of several neighboring villages, are members of the Thorn congregation.

S. I. R.

THORNS AND THISTLES: The desert flora of Palestine is unusually rich in thorns and thistles, containing a whole series of acanthaceous shrubs and various thistles, including Acanthus, Carduus (thistle), Centaurea Calcitrapa (star-thistle), Cirsium acarna, Linn. (horse-thistle), Cnicus benedictus, Linn. (blessed thistle), Cynara Syriaca, Linn. (cardoon), Echinops (globe-thistle), Eryngium nitraria, Noea, Notobasis Syriaca, Linn. (Syrian thistle), Ononis antiquorum, Linn. (tall rest-harrow; var. leiosperma, Post), Onopordon (down-thistle), Phæopappus scoparius, Sieb., Silybum Marianum, Linn. (milk-thistle), Tribulus terrestris, Linn. (land-caltrops), and others, some of them in many subspecies. All these plants were very troublesome to the farmer (Prov. xxiv. 31), who frequently set fire to his fields to get rid of them (Isa. x. 17), while the Prophets threatened the people with a plague of briers and thistles (Isa. v. 6; Jer. xii. 13). The tyrant is compared to the useless bramble (Judges ix. 14); and King Amaziah is likened to the thistle (II Kings xiv. 9). Instead of fruit the earth is to bring forth "thorns and thistles" (Gen. iii. 18), which must, therefore, be edible, and which are considered by the Midrash to be artichokes.

Many names for these plants are found in the Bible as well as in post-Biblical literature. Acanthaceous trees and shrubs, some of them admitting of classification, constitute the first group, which includes: אטד, Bible and Mishnah (also Assyrian, Phenician, and Aramaic) = Lycium Europæum, Linn. (not Rhamnus), box-thorn; סנה, Bible, Mishnah, and Aramaic = Rubus sanctus, Schreb., blackberry; שטה = Acacia; עוזרד, Mishnah, and טולשי, Talmud = Cratægus Azarolus, Linn., hawthorn; רימין, Mishnah, and כנרא, Talmud = Zizyphus lotus, Lam., jujube, and Zizyphus spina-Christi, Linn., Christ's-thorn; שיזפין, Mishnah, and שיסקי, Talmud = Zizyphus vulgaris, Lam., common jujube.

The second group comprises acanthaceous or prickly herbs, shrubs, and nettles: נעצוץ (?), Bible, היגה, Mishnah, and היגתא, Talmud (Assyrian, "egu" [?]) = Alhagi Maurorum, DC., alhagi; חריע and קוץ, Mishnah, מוריקא and מוריקא, Talmud = Carthamus tinctorius, Linn., safflower; דרדר, Bible, and חיורא, Talmud = Centaurea Calcitrapa, Linn., star-thistle; חוח (?), Bible, היזמא, Mishnah and Talmud = Echinops spinosus, Linn., or Echinops viscosus, DC., echinops (?); חרחבינה = Eryngium Creticum, Lam., button-snakeroot; קינרס, כנגר = Cynara Scolymus, Linn., artichoke; עכבית = Cynara Syriaca, Boiss., and Cynara Cardunculus, Linn., cardoon (the heads of which are well described by Rashi in his commentary on Ps. lxxxiii. 14); שמיר = Paliurus aculeatus, Linck., garland-thorn; ברקנים (?), Bible = Phæopappus scoparius, Sieb., phæopappus; חדק = Solanum coagulans, Forsk., nightshade; סרפד, קמש (?), Bible, and קרצובא, Talmud = Urtica urens, Linn., nettle.

General terms, some of them applied also to thorns, are חוח, סיר, צנים, קוץ, שכים, and שית in the Bible, and הובאי, חוח, יערא, כובא, עצבנית, and קוץ in the Mishnah and Talmud.

THRASHING-FLOOR. See Agriculture.

THREE. See Numbers and Numerals.

THRESHOLD: In early times the threshold had a special sanctity; and that of the Temple was a marked spot, indicating specific taboos (see I Sam. v. 4 *et seq.*; comp. Zeph. i. 9). There were special keepers (A. V. "porters") of the threshold (II. Kings xxii. 4; I Chron. ix. 22; II Chron. xxiii. 4; Jer. xxxv. 4). There is a wide-spread custom of making family sacrifices at the threshold in addition to those at the hearth. Herodotus reports this of the Egyptians (ii. 48). Trumbull suggests that there is a specific reference to the threshold in Ex. xii. 22 (LXX.), in connection with the institution of the Passover. Even to the present day it is considered unlucky to tread on the threshold. He suggests also that the word "pesaḥ," or "passover," means a "leaping over" the threshold, after it has been sanctified with the blood of the threshold-covenant. The threshold of Dagon's temple was evidently sacred in this way; and it has been suggested by Cheyne that I Kings xviii. 20–21 should be rendered "How long will ye leap over both thresholds?" (that is, worship both Baal and Yhwh).

Bibliography: H. Clay Trumbull, *Threshold Covenant*, Philadelphia, 1896.

J.

THRONE: 1. A royal seat, or chair of state. The king sits "upon the throne of his kingdom" (Deut. xvii. 18). Pharaoh delegated full power to

Joseph to rule over Egypt; "only in the throne will I be greater than thou" (Gen. xli. 40). The royal throne is sometimes designated as "the throne of the kings" (Jer. lii. 32). The most magnificent throne was that of SOLOMON (see JEW. ENCYC. xi. 441 *et seq.*; J. S. Kolbo made a model of Solomon's throne and exhibited it in New York city in 1888). The throne, like the crown, was a symbol of sovereign power and dignity. It was also the tribunal, the "throne of judgment" (Prov. xx. 8), where the king decided matters of law and disputes among his subjects. Thus "throne" is synonymous with "justice."

2. The Throne, the abode of God, known as "Kisse ha-Kabod" (the Throne of Glory), from which God manifests His majesty and glory. Micaiah "saw the Lord sitting on his throne, and all the hosts of heaven standing by him on his right hand and on his left" (I Kings xxii. 19; compare the vision of Isaiah [vi. 1] with that of Ezekiel [x. 1]). The throne of God is Heaven (Isa. lxvi. 1); in future it will be Jerusalem (Jer. iii. 17), and even the Sanctuary (Jer. xvii. 12). Thus the idea of the majestic manifestation of God gradually crystallized in the cabalistic expression "koaḥ ha-ẓimẓum" (the power of concentration). God's Throne is the symbol of righteousness; "justice and judgment are the habitation of thy throne" (Ps. lxxxix. 15 [A. V. 14]).

The Throne of Glory is an important feature in the Cabala. It is placed at the highest point of the universe (Ḥag. 12b); and is of the same color as the sky—purple-blue, like the "sapphire stone" which Ezekiel saw and which had previously been perceived by the Israelites (Ex. xxiv. 10; Soṭah 17a). Like the Torah, it was created before the world (Pes. 54a). R. Eliezer said that the souls of the righteous are concealed under the Throne (Shab. 152b). When Moses ascended to heaven to receive the Torah the angels objected, whereupon God told him to hold on to the Throne and defend his action (Shab. 88b). It is asserted that the likeness of Jacob is engraved on the Throne of Glory (Zohar, Wayiggash, p. 211a). For the throne of Elijah see ELIJAH'S CHAIR.

J. J. D. E.

THUNDER: The sound that follows lightning. The proper Hebrew term for it is רעם (Ps. lxxvii. 19 *et passim*; Job xxvi. 14; Isa. xxix. 6), but it is often rendered in the Bible by קול, plural קולות (= "voice," "voices"), the singular being always followed by יהוה (= "the voice of YHWH"; Ps. xxx. 3; Isa. xxx. 30). In the plural, with the exception of Ex. ix. 28, where it is followed by אלהים, the word "God" is omitted but understood (*ib.* ix. 23 and elsewhere).

Thunder is one of the phenomena in which the presence of YHWH is manifested; and it is also one of His instruments in chastising His enemies. According to Ps. lxxvii. 18–19, it was a thunder-cloud that came between the Israelites and the Egyptians when the former were about to cross the Red Sea (comp. Ex. xiv. 20). The hail in the seventh plague of Pharaoh was accompanied by thunder (*ib.* ix. 23 *et passim*). The Law was given to the Israelites from Sinai amid thunder and lightning (*ib.* xix. 16). In the battle between the Israelites and the Philistines in the time of Samuel, a thunder-storm decided the issue in favor of the Israelites (I Sam. vii. 10; Ecclus. [Sirach] xlvi. 17). Later, when the Israelites asked Samuel for a king he prayed to God for a thunder-storm that the petitioners might be overawed (I Sam. xii. 18). The declaration of Jeremiah (Jer. x. 13): "When he uttereth a voice there is a multitude of waters," probably refers to thunder. The most poetical description of a thunder-storm occurs in Ps. xxix. 3 *et seq.* Thunder following lightning is spoken of in Job xxxvii. 3–4; and in two other passages they are mentioned together (*ib.* xxviii. 26, xxxviii. 25). The separation of the water from the dry land at the time of the Creation (comp. Gen. i. 9) is said in Ps. civ. 7 to have been accomplished by the voice of God, which probably refers to thunder. The clattering noise of battle is likened to thunder (Job xxxix. 25). Thunder is metaphorically used to denote the power of God (*ib.* xxvi. 14). The goods of the unjust disappear in a noise like thunder (Ecclus. [Sirach] xl. 13). In the ritual is included a special benediction to be recited on hearing thunder (see LIGHTNING, BENEDICTION ON).

TIBBON. See IBN TIBBON.

Founded by Herod Antipas.

TIBERIAS: City founded by Herod Antipas in the year 26 C.E., and named in honor of the emperor Tiberius; situated on the western shore of Lake Gennesaret, near certain hot springs, in the most beautiful region of Galilee. The population of the city was very heterogeneous, thus giving rise to various stories. For example, one legend was to the effect that after the building of the city had been begun human bones were found, whence the conclusion was drawn that the site must once have been a burial-place; so that the whole city was declared unclean. The pious were accordingly forbidden to dwell there, since the merest contact with graves made one unclean for seven days (Num. xix. 16; Oh. xvii., xviii.). Herod, being determined to people the city at all hazards, was, therefore, obliged to induce beggars, adventurers, and foreigners to come there; and in some cases he had even to use violence to carry out his will. The majority of the inhabitants, nevertheless, were Jews.

Government.

The city had its own government, with a council (βουλή) of 500 members at the head, the archon (ἄρχων) being the presiding officer. From this council was chosen a board of ten members called "the ten elders" (δέκα πρῶτοι), their chief function being the punctual levying of the taxes, for which their own means were security. There were also hyparchs and an "agronomos" at the head (comp. Pauly-Wissowa, "Real-Encyc." *s.v.*). Since Tiberias was the capital of Galilee, it was ruled by Herod until he was exiled to Lyons (France) in 39. It then came under Agrippa I., in whose possession it remained until his death in 44, after which it was subject directly to Rome. It was the capital of Galilee until 61, when Nero gave it to Agrippa II., and thus detached it from Galilee, since that province did not belong to him.

When, in 66, the great revolution raged through the whole of Palestine, the inhabitants were divided into three factions: (1) the party on the side of Agrippa and the Romans; (2) the great mass of the poor, who were partizans of the rebellion; and (3) the neutrals, including the historian Justus of Tiberias, who were neither friendly to Rome nor eager for the revolution. The revolutionists, headed by Jesus ben Zappha or Zopha, archon of the city, soon gained control; but the Roman faction would not give way. When, therefore, John of Giscala lodged a complaint in the Sanhedrin at Jerusalem against Josephus, who was then at Tiberias, the council sent to the city an embassy of four men with 2,500 troops. Josephus at first sought to annul the decision of the Sanhedrin; but his efforts proved unsuccessful, and, compelling the embassy to return to Jerusalem, he subdued the revolutionary party, whereupon the Roman sympathizers appealed to Agrippa for aid, which he refused to grant. After Vespasian had conquered the greater part of Galilee, however, Tiberias voluntarily opened its gates to him, and favor was shown the inhabitants for Agrippa's sake.

Jewish School-Children at Tiberias.

(From a photograph by E. N. Adler.)

Buildings.

Of the famous buildings in Tiberias the most prominent were the royal palace (which was stormed and destroyed in the Jewish war on account of its pictures), the stadium, a synagogue (*προσευχή*), and a great assembly hall (*μέγιστον οἴκημα*), while after the close of the war pagan temples, including the Adrianeum (*'Αδριανεῖον*), were built there as well as in other cities. The baths of Tiberias, called "demosin" or "demosin de-Ṭebarya" (*δημόσια*), were famous as early as the third century (Yer. Ber. ii. 5, 3; iii. 6, 3). The synagogues of the city were the Kifra (Yer. Meg. i. 1) and the Kenishta 'Attiḳta de-Serongin (Yer. Kil. ix. 5), while the "castle of Tiberias," mentioned in Yer. 'Ab. Zarah iii. 1, appears to have been the building which Josephus fortified to defend the city. A saying of Raba or of Abaye, "I know this or that halakah as well as Ben 'Azzai [a tanna of the early part of the second century] knows the streets of Tiberias" ('Er. 29a; Ḳid. 20a; Soṭah 45a; 'Ar. 30b), shows that Jewish scholars lived in the city, at least temporarily, very soon after its foundation, although there is no mention of a definite Jewish settlement there until the second half of the second century.

After Simeon ben Yoḥai had fled from the persecutions of the Romans, and had lived in hiding for many years, thus injuring his health, he bathed in the springs of Tiberias and recovered. He seems, in his gratitude, to have declared either a part or the whole of Tiberias to be clean (Yer. Sheb. ix. 38d; Gen. R. lxxix.; Eccl. R. on x. 8; Esther R. i. 9; Shab. 35b; 'Ab. Zarah 10a; Grätz, "Gesch." iv. 208, 473). Judah ha-Nasi also resided there (R. H. 31b; comp. Rashi, *s.v.* "Bet She'arim"); and from the time when Johanan b. Nappaḥa settled in Tiberias (Yer. Sheb. ix. 1; Beẓah i. 1) the city became the center of scholarship, so that other academies could not compare with it. Even R. Abbahu sent his son from Cæsarea to Tiberias to study (Yer. Pes. iii. 7). It was, moreover, the last city in which a Sanhedrin held sittings (R. H. 31b; Yer. Pes. iv. 2).

During Persecutions.

During the persecutions in the reigns of the emperors Constantius and Gallus the Tiberian scholars decided to intercalate a month in the calendar for the year 353; but fear of the Romans led to the substitution of "Rakkath" (Josh. xix. 35) for "Tiberias" in the letter which conveyed the information to Raba at Maḥuza (Sanh. 12a). The sessions of the scholars were held in a grotto near Tiberias, and only by the flickering of torches was it possible to distinguish between night and day (Gen. R. xxxi.). In several places in the Talmud, *e.g.*, in Meg. 6a, the identity of Tiberias with Rakkath is established.

Even in the sixth century Tiberias was still the seat of religious learning; so that Bishop Simeon of Bet-Arsham urged the Christians of Palestine to seize the leaders of Judaism in Tiberias, to put them to the rack, and to compel them to command the Jewish king, Dhu Nuwas, to desist from persecuting the Christians in Najran (Assemani, "Bibliotheca Orientalis Clementino-Vaticana," i. 379).

In 614 a monk of Mt. Sinai went to Tiberias to become a Jew. He received the name of Abraham, and married a Jewess of that city (Antiochius, "Homilia Octoginta-Quarta," in Migne, "Patrologia Græca," xii. 265). In the ninth century the grammarians and Masorites Moses and Aaron ben Asher lived at Tiberias, which was then called Mu'izziyyah, in honor of the Fatimite calif Mu'izz. The system of Hebrew punctuation still in use originated in Tiberias and is accordingly called the Tiberian system (comp. Grätz, *l.c.* 3d ed., v., note 23, ii., and the remarks of Halberstam).

At the beginning of the twelfth century the Jewish community in Tiberias numbered about fifty families; and at that time the best manuscripts of the Torah were said to be found there. According to some sources the grave of Moses Maimonides is at Tiberias; but this statement is of very doubtful accuracy (see Conforte, "Ḳore ha-Dorot," p. 13a; "Sefer Yuḥasin," ed. Filipowski, p. 131b).

In the sixteenth century Joseph ben Ardut, aided by the riches of Doña Gracia and by the daily remittances of 60 aspers sent him by order of Sultan Sulaiman, undertook to rebuild the city of Tiberias, and to allow only Jews to reside there. The old superstition was revived, however, that the Jewish religion would conquer all others when Tiberias was rebuilt, whereupon the workmen refused to work and had to be forced to do so. After a year the city was completed, and Joseph wished to introduce the breeding of silkworms and the manufacture of wool (Charière, "Négociation," ii. 736; Gratiani, "De Bello Cypro," p. 492, note). The first Jewish immigrants to the new city went thither from the Pontifical States, as a result of a papal bull; and they were aided by Joseph Nasi. Their numbers and fortunes are alike unknown.

Don Joseph Nasi.

In 1837 an earthquake destroyed most of the city, while in 1865 and 1866 the ravages of the cholera forced the leaders of the community to apply to Europe for aid, appeals being printed in nearly all the Jewish weekly periodicals. Conditions have much improved, however; and since the year 1889 the community has had its own physician. The cemetery is situated on the ruins of the old city. The Jews of Tiberias number about 2,000 in a total population of 3,600.

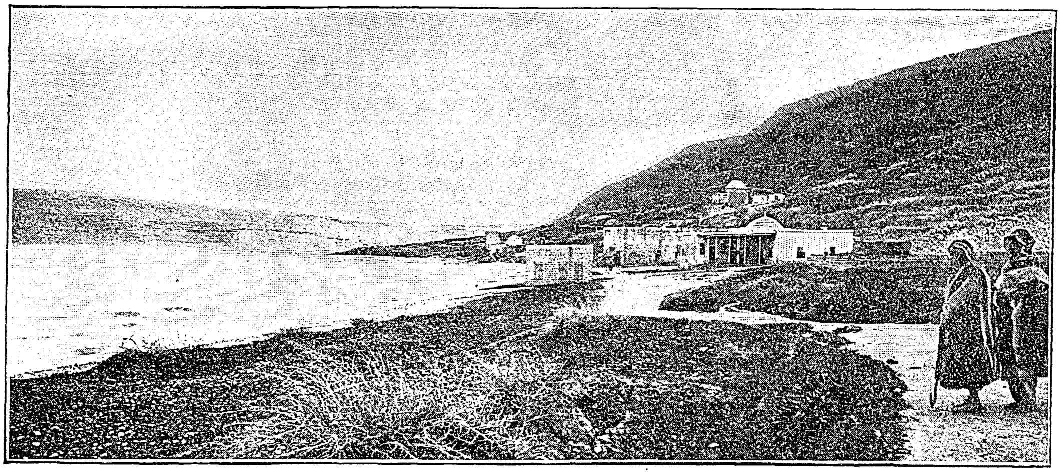
TIBERIAS, LAKE. See Chinnereth.

TIBERIUS JULIUS ALEXANDER. See Alexander, Tiberius Julius.

TIBNI: One of the rulers of the kingdom of Israel during the interregnum between Zimri and Omri; son of Ginath. When Zimri, after a reign of seven days, had ended his life, the people of Israel were divided into two factions, one siding with Omri, and the other with Tibni. Omri's followers gained the upper hand; and, finally, Tibni having died, Omri was declared king (I Kings xvi. 21-22). From a comparison of verses 15 and 23 of the chapter just cited, it appears that Tibni was regent over half the kingdom of Israel for a period of four years. According to the Septuagint (*ad loc.*), Tibni had a brother named Joram, who seconded him in the dispute over the throne and who died at the same time as himself, probably at the hands of Omri's party.

J. M. Sel.



View of Tiberias Showing the Tomb of Rabbi Meïr.
(From a photograph by the American Colony at Jerusalem.)

TIEN-TSIN: Commercial city of China. Its Jewish inhabitants number about 150, most of whom are Russian and Polish. They have not organized as a community and hold divine services only during the penitential season, when private halls are used and Sefer Torahs are brought from Shanghai. In 1902 J. Dietrich purchased a piece of land and presented it to the Jewish inhabitants for burial purposes. In 1904 a branch of the Anglo-Jewish Association was formed, of which Dr. M. Linscer is president. The Tien-Tsin Jews are mainly merchants and hotel-keepers.

J. N. E. B. E.

TIETZ, HERMANN: German rabbi; born at Birnbaum, Posen, Germany, Sept. 3, 1834, and educated at the University of Berlin (Ph.D. Halle). He was rabbi in Schrimm, and since 1888 he has been a "Stiftrabbiner" and teacher in the bet ha-midrash at Inowrazlaw. He has published "Das Hohe Lied," translated in verse, and with notes according to the Midrash (Berlin, 1878), and "Megillat Eka," with a metrical translation and a Hebrew commentary, under the title "Zikron Yehudah" (Schrimm, 1881).

TIFLIS. See CAUCASUS.

TIGLATH-PILESER (Hebrew, תגלת־פלאסר, and a corrupt form, תלגת־פלנסר, in I Chron. v. 6, 26; II Chron. xxviii. 20; Assyrian, "Tukulti-apil-e-šar-ra" = "my help is the son of Ešarra"): King of Assyria from 747 to 727 B.C.; designated by modern Oriental historians as Tiglath-pileser III. He first appears under the name "Pul" (II Kings xv. 19; comp. I Chron. v. 26), the proper form of which is "Pulu," as is seen in the list of Babylonian kings. When he assumed the crown over Assyria he seems to have called himself Tukulti-pal-Ešar-ra after the great ruler of the same name in the twelfth century.

Tiglath-pileser left several important inscriptions of his reign; but these were badly broken when discovered. Upon his accession he inaugurated a new policy for the government and administration of Assyria. Former kings had maintained by military force the union of the so-called empire; the new policy established a method of organization which more closely united the central and provincial sections of the government: systems of transportation and transplantation of strong but rebellious subjects minimized dangers that had wrecked other governments. This was the method pursued by Sargon at Samaria, by Sennacherib, and by other rulers down into Persian times.

Tiglath-pileser's first campaign into the west country took place in 743-742, when he entered northern Syria. While here he received tribute from Rezin of Damascus and Hiram of Tyre. A two-year siege was necessary to reduce to complete submission the plucky little city of Arpad, in 740 (comp. Isa. x. 9; II Kings xix. 13). The very next year he seems to have clashed with the interests of Azariah (Uzziah), King of Judah, far in the north (comp. II Kings xiv. 28) and to have established Assyrian sovereignty there. Either in this or in the following year Menahem (II Kings xv. 19, 20), king of northern Israel, purchased his throne of the Assyrian ruler.

Not until 734 was Tiglath-pileser's presence again required in the west. Pekah, who had secured by strategy and tragedy the throne of northern Israel, formed a league with Rezin of Damascus to withstand any further assumption of sovereignty over Israel and Syria by the power centered on the Tigris. Together they besieged Ahaz at Jerusalem, either to force him to join the anti-Assyrian coalition or to put a man of their own choice on the throne. Ahaz in desperation appealed to Tiglath-pileser for help. The Assyrian king made a dash for Damascus and laid siege to it. In the meantime he ravaged northern Israel (comp. II Kings xv. 29) and other territory all the way to Philistia. In 732 Damascus fell (comp. Isa. viii. 4; II Kings xvi. 9). At this time apparently Ahaz, among a number of petty kings, appeared within Damascus before the throne of the great conqueror and paid the price of submission. Soon after this event, probably, Tiglath-pileser incited or encouraged Hoshea to slay Pekah, the unyielding king of northern Israel. Hoshea was rewarded by being put in authority over this Assyrian province; and Tiglath-pileser retired to the east. In 728 he became master of Babylon, and died the following year.

J. I. M. P.

TIGRIS (Hebrew, חדקל; Aramaic and Talmudic, דגלת; the modern **Dijlah**): One of the four streams mentioned in Gen. ii. 14 as watering the Garden of Eden, and described, from the standpoint of Palestine, as flowing "in front of Assyria" (R. V.). The Tigris has its source in several springs in Mount Ararat, not far from the head-waters of the Euphrates. Near one of these springs the figures of Sardanapalus and Tiglath-pileser III. are found carved in the rock. After flowing a short distance the river receives the waters of several mountain brooks from the east; and at Diarbekr it is already a fairly large stream. South of Mosul it is navigable for rafts, and at Bagdad it carries boats; while at Korna it unites with the Euphrates to form the Shaṭṭ al-'Arab, which empties into the Persian Gulf. Its chief period of rise occurs, opposite Mosul, at the time of the melting of the snow (Ecclus. [Sirach] xxiv. 25), when it devastates the surrounding country. Hence, even in antiquity it was necessary to dig transverse canals in various places to carry off the superfluous water, which is whitish in color and is famed for its potability among those who live in the vicinity and who are accustomed to it. The river contains great numbers of fish. The Tigris is referred to in only one other place in the Bible, namely, Dan. x. 4, where in the English version the name is transliterated simply "Hiddekel."

The Targum and the Talmud term it the Diglat, the earlier form of the name. In answer to the question why this river was called also Hiddekel, R. Ashi replied that it was on account of its sharpness and swiftness, the word חדקל being etymologized as a compound of חד ("sharp," "swift") and קל ("light," "quick"; Ber. 59a). Neubauer proposed to separate the name into חד or חץ and דקל ("the swiftly running Diklah"). In the Talmud the water of the river is considered to be both quickening for the mind and healthful for the body on account of its lightness (*ib.*). It was also held to be one of the oldest rivers; and when a Jew saw its waters from the bridge Bostane he was enjoined to recite the blessing "Blessed be He who hath made the work of Creation" (*ib.*; Yeb. 121a).

From Bagdad to Apameia the river formed the boundary of Babylon (Ḳid. 71b).

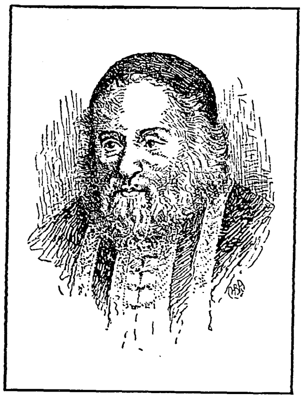
S. S. O.

TIKTIN: A Silesian family of rabbis originating from Tiktin, a town in Poland.

Abraham ben Gedaliah Tiktin: German rabbi; born at Schwersenz, Posen; died at Breslau Dec. 27, 1820. In 1811 he was appointed rabbi at Glogau, and five years later, by a royal rescript of Sept. 5, he became chief district rabbi at Breslau, where he officiated until his death. He was the author of several works, although only one appeared in print, namely, "Petaḥ ha-Bayit" (Dyhernfurth, 1820), novellæ on the fourth part of the Shulḥan 'Aruk. At Tiktin's funeral Rabbis Jacob of Lissa, Moses Kronik, and Solomon Plessner delivered sermons, all of which were published.



Abraham Tiktin.
(From an old print.)

S. S. O.

Gedaliah Tiktin: German rabbi; born about 1808; died at Breslau Aug. 8, 1886. Like his father, Solomon Tiktin, whom he succeeded in the rabbinate of Breslau in 1843, Gedaliah was the champion of Orthodox Judaism. The war which had been carried on for years between the Orthodox and Reform parties, headed respectively by Solomon Tiktin and Abraham Geiger, was continued after the former's death. The Reform party endeavored to influence the German government to recognize Geiger as rabbi of Breslau; but, owing to Tiktin's personal merit, King Frederick William IV. confirmed him in office, and, later, even conferred on him the title of "Königlicher Landesrabbiner." It was not until after Geiger's death that Tiktin and Joël, Geiger's successor, came to an understanding in order to maintain peace in the Jewish community of Breslau. Even after his confirmation by the king, Tiktin had not exercised his power with regard to the slaughterers ("shoḥaṭim"), but had contented himself with abstaining for several years from eating meat.

Tiktin was known also for his charitable activity during the forty-three years of his rabbinate; and there was hardly any charitable institution of which he was not a member. In 1870 he received the decoration of the Order of the Red Eagle in recognition of services rendered by him to the sick and wounded during the Franco-German war of 1870–71. Special courtesies were paid to him by the German government on account of his weekly visits to the Jewish prisoners.

Tiktin was the author of a pamphlet entitled "Beitrag zur Bearbeitung der von Seiten der Behörde . . . Gerichteten, den Jüdischen Kultus Betreffenden Fragen" (Breslau, 1843).

Solomon Tiktin: German rabbi; born at Glogau; died in Breslau March 20, 1843; son of Abraham Tiktin. He was a prominent champion of Orthodox Judaism; and some idea of his anti-Reform activity may be gathered from the writings of his opponent, A. Geiger. Tiktin became rabbi at Breslau in 1824. In 1836 he prohibited the printing in Breslau of Moses Brück's "Die Reform des Judenthums." But the real war between Tiktin and the Reform party began when Geiger presented himself as a candidate for the position of second rabbi ("Rabbinatsassessor" or "dayyan") of Breslau. Geiger was invited to preach in Breslau on July 21, 1838; but Tiktin is said to have applied to the police to prevent Geiger from doing so. In 1842 Tiktin published his two pamphlets, "Darlegung des Sachverhältnisses in Seiner Hiesigen Rabbinats-Angelegenheit" and "Entgegnung auf den Bericht des Ober-Vorsteher-Collegiums der Hiesigen Israeliten-Gemeinde an die Mitglieder," in which he accused Geiger of having deliberately planned the destruction of the foundations of Judaism. Tiktin insisted that Geiger should not be present either at a divorce or at a ḥaliẓah ceremony, thus denying him recognition as a rabbinical authority.

TIKTINER, JUDAH LÖB BEN SIMḤAH: Russian rabbi of the eighteenth century. He officiated as ab bet din in Zagora, and later was a resident of Wilna. Tiktiner was the author of "Shalme Simḥah" (2 vols., Wilna, 1806), containing novellæ on the halakot of Asher ben Jehiel, preceded by a presentation of various basal principles of the Talmud, as well as of various casuistic writings. The work is, however, incomplete, extending only as far as the treatise Ta'anit.

TIKTINER, REBECCA BAT MEÏR: Austrian authoress of the sixteenth century; flourished at Prague, where she died, apparently in 1550. She wrote two works: (1) "Meneḳet Ribḳah" (Prague, 1609; Cracow, 1618), divided into seven "gates," treating of a housewife's duties, and containing various Talmudic and Midrashic anecdotes; (2) "Simḥat Torah Lied" (Prague, n.d.), a poem for the Simḥat Torah festival.

TIKTINSKI, ḤAYYIM JUDAH LÖB B. SAMUEL: Lithuanian Talmudist; born in Mir Oct. 13, 1823; died in Warsaw March 30, 1899. He was the second son of Samuel Tiktinski, founder of the yeshibah in Mir, who died in 1835, leaving his eleven-year-old son without any material means. Despite his very unfavorable circumstances, young Tiktinski succeeded by diligent application in passing a rabbinical examination before he was twenty, at which age he officiated as substitute for Rabbi Elihu Shik in Deretschin when the latter went on a long journey. In 1850 he was invited by Rabbi

Moses Abraham ben David of Mir to deliver lectures before the local yeshibah. By his brilliant delivery and his rejection of the pilpul he attracted many scholars; and when, in 1867, Moses Abraham died, Tiktinski was entrusted with the entire control of the yeshibah. Among his many pupils were Meïr, rabbi of Draderkewin, and Mordecai Elihu, author of "Ner le-Ma'or."

In 1876 Tiktinski's son **Samuel** delivered some of the lectures at the yeshibah; and in 1883, when Samuel died, his younger brother, **Abraham,** took his place. When, in the summer of 1898, the yeshibah was destroyed by fire for the second time, Tiktinski, in spite of illness, procured the necessary funds to rebuild it. He left no works, his contributions to the explanation of the Talmud having been destroyed in the above-mentioned fire.

TIMBREL or **TABRET**: Musical instrument. In the Hebrew music of Old Testament times, as indeed in Oriental music to-day, rhythm was of much greater importance, in comparison with the melody, than it is in modern Occidental music. Accordingly instruments like the drum and tambourine, which serve principally to accentuate the rhythm, played the greatest part. The most ancient means of marking rhythm was the clapping of hands, a method which is still employed. Among the instruments of percussion, the timbrel or hand-drum ("tof") is the oldest and most popular. It is very simple, consisting of a broad or narrow hoop of wood or metal over which the skin of an animal is stretched. Sometimes small, thin pieces of metal are hung upon the rim, which jingle when the timbrel is shaken, as in the modern tambourine. The instrument is held high in one hand, while the performer beats on the drumhead with the fingers and the back of the other hand. The form of the instrument is similar to that of the modern tambourine, as is also the manner of playing on it.

The Egyptians and the Assyrians possessed this instrument. The pictures of the former show it only in the hands of women; among the Assyrians it was played by men also. Among the Hebrews it was usually played by women, as an accompaniment to joyful dancing (Judges xi. 34; I Sam. xviii. 6; Jer. xxxi. 4) and to songs (Gen. xxxi. 27; Ex. xv. 20; I Sam. xviii. 6). The timbrel is an instrument which in its whole character is inappropriate for mournful occasions, being in keeping only with cheerful songs and games, such as accompany weddings (I Macc. ix. 39), popular rejoicings (*e.g.*, the reception of a victorious general; I Sam. xviii. 6 *et seq.*), banquets (Isa. v. 12), and religious festivals of a joyful and popular character (Ex. xv. 20; Ps. lxxxi. 2). It is more rarely found in the hands of men. All the prophets who speak at length of music refer to the hand-drum (I Sam. x. 5).

The tambourine apparently had no place in the Temple service, however; at least in the enumeration of the instruments of the Temple orchestra (II Chron. v. 12 *et seq.*) only the cymbals are mentioned among the instruments of percussion.
E. C. I. BE.

TIMNATH-SERAH (in Judges ii. 9, **Timnath-heres**): Town in Mount Ephraim, situated on the northern slope of the hill of Gaash (Josh. xxiv. 30). It was given to Joshua as an inheritance, was fortified by him (*ib.* xix. 50), and served as his place of burial (*ib.* xxiv. 30). According to the "Onomasticon" of Eusebius, Timnath was an important city in the district of Diospolis (Lydda); and the grave of Joshua was shown there. On the site of the city is situated the modern town of Tibna, about ten miles north of Beth-el on the Roman road from Cæsarea to Jerusalem. Among its ruins and tombs is a grave of remarkable size and construction, which is probably the one identified in the days of Eusebius as that of Joshua. Another tradition, however, of Samaritan origin, locates the tomb farther to the northeast, in the small village of Kafr Ḥaris, which is therefore frequently regarded as the site of Timnath. The city seems to have been identical with the Thamnatha of I Macc. ix. 50, which, according to Josephus ("Ant." xiv. 11, § 2; "B. J." iv. 8, § 1), was the capital of a Jewish toparchy.

TIRADO, JACOB: Convert to Judaism in Amsterdam in the sixteenth century; died in Jerusalem. With several Maranos he sailed from Portugal in a vessel which was driven out of its course to Emden in East Friesland. Following the advice of Rabbi Moses Uri ha-Levi, he continued his travels with his companions to Amsterdam. After his arrival there he confessed the Jewish faith openly, and afterward, though advanced in years, underwent the rite of circumcision.

Together with Jacob Israel Belmonte and Samuel Palache, Tirado founded the Spanish-Portuguese community of Amsterdam, being its first president. Having acquired a house on the Houtgracht, he transformed it into a synagogue, which was called after him "Bet Ya'aḳob," or "Casa de Jacob," and was consecrated at the New-Year's festival, 5358 (= Sept., 1597). Annually on Yom Kippur a special prayer in his behalf is recited as an acknowledgment of his important services to the community. In his old age Tirado traveled to Jerusalem, where he died. See MOSES URI B. JOSEPH HA-LEVI.

TIRHAKAH (תרהקה): King of Ethiopia (*i.e.*, Nubia). When Sennacherib and his general (Rabshakeh) were besieging Lachish, Libnah, and Jerusalem, it was reported that Tirhakah was approaching with an army to assist the Palestinians against the Assyrian forces (II Kings xix. 9; Isa. xxxvii. 9).

This king, the Tarakos of Manetho (comp. "Tharaca," LXX. and Vulgate), the Tearkos of Strabo, the Tharsikes of Josephus, and the Tarḳu of the Assyrian inscriptions (written "Ta-h-ru-ḳ" in hieroglyphics with strange vocalization; the consonants suggest as emendation a transposition of the second and third consonants in the Hebrew form), was the third Pharaoh of the twenty-fifth or Ethiopian dynasty of Egypt. He was a usurper who tried later to legalize his usurpation by marriage with the widow of his predecessor, Shabataka (the Sebichos of Manetho). Assyrian reports assign his death to 668–667 B.C.; and Egyptian inscriptions state that he reigned twenty-six years (twenty or eighteen according to Manetho). Thus his ascension to the throne would fall in 694–693 B.C. (according to others, his coronation occurred in 691 and his death in 665).

Tirhakah has left in Egypt many monuments, extending from Tanis to Napata, his capital in Nubia. No line of his inscriptions speaks of the great wars which he had to wage, at least from 676. The Assyrians, accusing him of having aided their rebellious vassal, King Baal of Tyre, invaded Egypt in that year, but their army was finally annihilated. In 671, however, King Esarhaddon undertook another expedition, invaded Egypt by way of Magdali (perhaps the Biblical Migdol), defeated an army at Iskhupri, and by two further victories drove Tirhakah out of Egypt. The twenty petty rulers (nomarchs) among whom this country was distributed by the Assyrians followed a treacherous course, wavering between the Assyrians and Tirhakah, who invaded Egypt again in 669 and occupied the land. A third Assyrian army, however, was victorious at Karbanit (in the northwest of the Delta), destroyed the rebellious Saïs, Mendes, and Tanis, and pursued Tirhakah as far back as Thebes, which closed its doors to the fugitive king. The energetic Ethiopian rallied his troops for another campaign, and had already forced Thebes to surrender, when he died. His stepson and successor, Tandamani (thus the Assyrian; Tinwat-Amon in hieroglyphics; Tementhes in Polyænus, "Strategica," vii. 3), made only one more futile attempt to regain Egypt.

It will be seen from the above chronology that the monumental data can not easily be harmonized with the seemingly conflicting chronology of the Bible, which mentions Tirhakah in 701 both as king and as at war with the Assyrians. It is at present not possible to explain this discrepancy; the latest attempt at an explanation is that of Prašek ("Mitteilungen der Vorderasiatischen Gesellschaft," 1903, viii. 148), who holds that the Biblical passage concerning Tirhakah referred originally to an expedition in 691 or later, the report being misplaced in the present text.

TIRZAH: 1. Ancient Canaanitish capital (Josh. xii. 24), which, from the context, seems to have been situated in the northern part of the country. Possibly, therefore, it should be distinguished from the Israelitish capital of the same name (I Kings xiv. 17; xv. 21, 33), which was made a royal city by Jeroboam I. (*ib.* xiv. 17), and which remained the residence of the kings of Israel until Omri. Subsequently Tirzah is mentioned only as the center of the revolution of Menahem (II Kings xv. 14, 16); and even in this passage "Tirzah," on the basis of the Septuagint text, should perhaps be read "Tharseila" and be identified with the village of that name, which, according to the "Onomasticon" of Eusebius, was a Samaritan town in Bashan, corresponding to the modern Tsil.

The only information possessed concerning the royal city of Tirzah, which is praised for its beauty in Cant. vi. 4, is that it was situated in the district of Zelophehad in the tribe of Manasseh (Num. xxvi. 33, xxvii. 1, xxxvi. 11; Josh. xvii. 3); but, since neither Josephus nor the "Onomasticon" gives any details regarding it, all identifications are uncertain. Robinson considered it to be the site of the modern Ṭalluza, the Ṭarlusa of the Talmud, a town about seven kilometers northeast of Nablus (Neubauer, "G. T." p. 268), while Conder, on the other hand, identified it with Tayasir, an ancient site with caverns, tombs, and other remains, nineteen kilometers northeast of Nablus. The translation of "Tirzah" by "Tir'an" in the Targum to Cant. vi. 4 has led other scholars to identify the place with the modern Al-Ṭirah, which lies south of Nablus, although this Tir'an may perhaps be represented rather by Ṭur'an, northeast of Nazareth.

2. The youngest of the five daughters of Zelophehad (Num. xxvi. 33).

TISHBI, ELIJAH. See LEVITA, ELIJAH.

TISHBI, JUDAH BEN ELIJAH: Karaite scholar and liturgical poet; flourished at Belgrade in the first half of the sixteenth century; grandson of Abraham ben Judah. He copied and completed the exegetical work of his grandfather, entitled "Yesod Miḳra," and was the author of liturgical poems, several of which have been inserted in the Karaite prayer-book ("Siddur ha-Ḳera'im," ii. 215; iii. 171, 172, 174). Judah was the copyist of the "Yehi Me'orot," on the precepts attributed to Tobiah ben Moses.

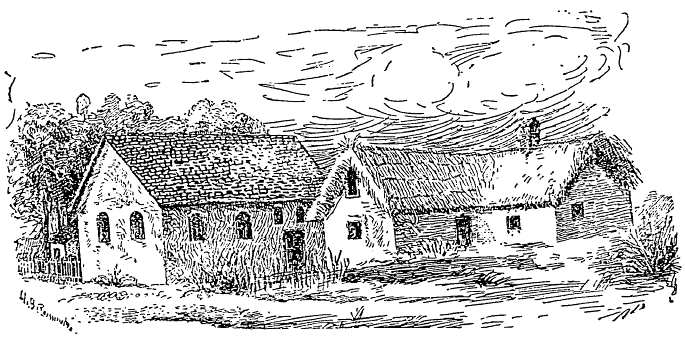
TISZA-ESZLAR AFFAIR: Accusation of ritual murder brought against the Jews of Tisza-Eszlar, a Hungarian town situated on the Theiss. On April 1, 1882, Esther Solymosi, a Christian peasant girl fourteen years old, servant in the home of Andreas Huri at Tisza-Eszlar, was sent on an errand from which she did not return. The search for her being fruitless, a rumor was circulated that the girl had become a victim of religious fanaticism. The agitations of the anti-Semites, whose leaders, Onody of Tisza-Eszlar and Victor von Istóczi, had in the House of Deputies proposed the expulsion of the Jews, exercised a most pernicious influence upon the country population. In the general excitement which they stirred up and which led to bloody excesses in many parts of Hungary, the suspicion that the Jews had foully dealt with the girl, in order to use her blood at the approaching Passover (April 4), found ready credence; and

Origin of the Accusation.

on May 4 the alarmed mother accused the Jews before the local judge of having killed her daughter, and urged him to hold an investigation.

"Confessions" of the Scharf Children.

On May 19 the county court of Nyireghyhaza sent the notary Bary to act as examining judge at Tisza-Eszlar. After having placed the suspected Jews under the surveillance of the police, Bary began his inquiry with Samuel, the five-year-old son of the synagogue sexton Josef Scharf. The babble of this child, from whom by means of money presents and pieces of sugar some women and girls had elicited the statement that his father had called Esther into his house and pinioned her, and that the slaughterer ("shoḥeṭ") had cut off her head, was the point at issue in all the proceedings. Before Bary the boy stated that in the presence of his father and other men the slaughterer had made an incision in the girl's neck, while he himself and his brother Moriz had received the blood in a plate. The father, as well as Moriz, who was nearly fourteen years old, and the other suspected persons, denied any knowledge of the disappearance of the girl and of her conjectured murder. On May 19 Scharf and his wife were arrested; Moriz repeated his statement, and said in addition that he had never known anything about the missing girl, not even from hearsay. On the evening of that day Moriz was given in charge of Recszy, the commissary of safety, who took him to his country house in Nagy-Falu, where the court clerk, Peczely, received orders to watch over the boy's safety. Peczely, a brutish man who had served twelve years in jail for murder, connived with Recszy to make Moriz the instrument of a blood accusation. Intimidated by cruelty and threats, the boy confessed in the night that after Sabbath morning service his father had called Esther to his house under the pretext of requiring her to remove some candlesticks (an act forbidden to Jews on Saturday); that a Jewish beggar, Hermann Wollner, who lodged with them, had led the girl to the vestibule of the synagogue and felled her; and that, after having undressed her, two slaughterers, Abraham Buxbaum and Leopold Braun, had held her while another slaughterer, Solomon Schwarz, incised her neck with a large knife and emptied the blood into a pot. These three men, applicants for the vacant position of precentor and shoḥeṭ, had come to Tisza-Eszlar to officiate on that particular Sabbath, and had, as the boy said, remained in the synagogue after morning service. All this, according to his confession, Moriz had observed through the keyhole of the synagogue door. During forty-five minutes that he thus stood on watch, he saw also that after the operation a rag was tied around the neck of the girl and her body dressed again, in the presence of Samuel Lustig, Abraham Braun, Lazar Weissstein, and Adolf Jünger. The two conspirators Recszy and Peczely immediately sent for the examining judge Bary, before whom the same night Moriz repeated his account, adding that, after the perpetrators had left the scene of their crime he had locked the synagogue, and that neither the corpse nor any blood marks were to be found. With feverish zeal Bary continued his investigations in the synagogue and houses and among the graves; but nowhere could any traces of the living or dead girl be discovered. Twelve Jews were arrested on suspicion; and Moriz Scharf was given in charge of the jailer.



Synagogue at Tisza-Eszlar, with Home of Joseph Scharf.
(From a photograph.)

On June 18 there was drawn out of the River Theiss near Dada a body which the district physician declared to be that of a fourteen-year-old girl, and which many recognized as that of Esther Solymosi. Her mother, however, emphatically denied that it was Esther's corpse, although she afterward recognized the clothes in which the body was found as those of her daughter. A committee of experts, two physicians and one surgeon, declared that the corpse was that of a girl eighteen to twenty years of age, who had met with her death but eight or ten days before. It was then buried in the Catholic cemetery of Tisza-Eszlar. The anti-Semites, among whom was the Catholic priest of the town, insinuated that the body had been smuggled in by the Jews and clothed in the garments of Esther Solymosi in order to conceal the crime of ritual murder. Several of the raftsmen who had found the body were induced by promises, threats, and cruel treatment to revoke their former testimony and to declare that they had brought the body to the river and that an unknown Jewess had furnished them with the clothes in which they had dressed it. New arrests were made; and the affair, which had now become a cause célèbre, was considerably protracted.

Formal Accusations Made.

On July 29 formal accusations were made against fifteen persons, as follows: Solomon Schwarz, Abraham Buxbaum, Leopold Braun, and Hermann Wollner, of murder; Josef Scharf, Adolf Jünger, Abraham Braun, Samuel Lustig, Lazar Weissstein, and Emanuel Taub, of voluntary assistance in the crime; Anselm Vogel, Jankel Smilovics, David Hersko, Martin Gross, and Ignaz Klein, of abetting the crime and smuggling the body. The delay in the case was caused mainly by the illegal and arbitrary acts of Bary, who conducted his examinations without the aid of the state attorney, wrote without witnesses the minutes of the proceedings, and tortured the accused and suspected. By order of the government, Moriz Scharf was given in charge of the district bailiff, who placed him in the custody of the warden Henter; thus removed from contact with his coreligionists, he was entirely under the influence of their adversaries, and received instructions as to the testimony to be given by him at the trial.

The accused were defended by Karl Eötvös, journalist and member of the House of Deputies, with whom were associated the advocates B. Friedmann, Alexander Funtak, Max Szekely of Budapest, and Ignaz Heumann of Nyireghyhaza, the seat of the county court before which the case was tried. In a petition to Minister of Justice Pauler, Eötvös protested against the system of torture practised by Bary, Recszy, and Peczely; but this protest had little effect upon that official. The affair was so long drawn out that State Attorney Kozma of Budapest went to Nyireghyhaza in September to hasten the examination.

Protest by Louis Kossuth.

This dragging on of the proceedings attracted general attention. The country was greatly agitated. A number of pamphlets appealed to the passions of the people, and attempted to establish the guilt of the accused. Louis Kossuth, then living in exile at Turin, raised his powerful voice to castigate the action of the authorities and to deprecate this stirring up of medieval prejudices. The suspicion of ritual murder, he considered, was a disgrace to Hungary; to represent as a racial crime or as a ritual crime a murder which at the worst was an individual one was, he said, unworthy of modern civilization. This cry of indignation from the veteran patriot was strangely in contrast with the fury of persecution and prejudice which raged throughout the country and which was echoed in the House of Deputies. An interpellation addressed to the minister of justice by the deputy Ernest Mezei in Nov., 1882, called forth exciting scenes. The attorney-general Havas was then sent to Nyireghyhaza, and he found that, despite the official declaration of the examining judge, the accused had not had a single hearing. He released some prisoners; but, realizing that he was hampered by powerful influences in his endeavor to accelerate the affair, he offered his resignation, which was readily accepted.

Esther's Corpse Exhumed.

In the middle of November the wife of Josef Scharf was set free, her husband and the other prisoners being still detained. At the request of the defending lawyers the body found in the Theiss was exhumed (Dec. 7) and reexamined by three professors of medicine at the University of Budapest—Schenthauer, Belky, and Mihalkovics. They found that the opinion of the members of the former committee of examination had no scientific basis, and later, before the court, they taxed them with gross ignorance: the body was too much decayed to allow a positive judgment. The fact that the corpse was not claimed by any one, left no doubt in their opinion, however, that it was that of Esther Solymosi; and as the neck was not cut, no ritual murder could have been committed.

On June 17, 1883, the last act in this shameful affair began before the court of Nyireghyhaza. Judge Francis Korniss presided, Eduard Szeyffert acting as state attorney. Although the testimony of Moriz Scharf was the only basis of the accusation, the court held thirty sessions to examine the case in all its details; and many witnesses were heard. The glaring contradictions of the boy despite the careful training he had received, and the falsity of his accusation as exposed by a local inspection of the alleged scene of the murder made by the court in Tisza-Eszlar on July 16, resulted, as was inevitable, in the unanimous acquittal of the accused (Aug. 3). Szalay, the attorney for the widow Solymosi, in a speech full of bitter invectives, appealed against the decision; but the supreme court rejected his appeal and confirmed the verdict of the county court.

The youthful accuser whom the maneuvers of the anti-Semites had alienated from his faith and his coreligionists, and whose filial feelings they had suppressed, returned to his parents, who gladly received him. Moriz fully redeemed his past: he supported his father until the death of the latter (1905).

Acquittal of the Accused.

The verdict of acquittal and the deliverance of the prisoners, most of whom had languished fifteen months in prison, were the signal for uprisings in Presburg, Budapest, and other parts of Hungary. The spectators who thronged the court-house during the sessions, and among whom Onody, the representative of Tisza-Eszlar in the House of Deputies, was most conspicuous, conducted themselves scandalously during the proceedings: they insulted the prisoners, threatened the witnesses and lawyers for the defense, and exhibited intense passion, prejudice, and hatred.

TITHE (מעשר): The tenth part of anything, appropriated as tax or sacrifice.—**Biblical Data:** Tithing one's possessions was a very ancient custom, existing as early as the time of the Patriarchs. Abraham gave Melchizedek "tithes of all" (Gen. xiv. 20); and Jacob made a vow that if he should return to his father's house in safety he would acknowledge Yhwh as his Lord and would give Him a tenth of everything he possessed (*ib.* xxviii. 20–22). Later the Mosaic law made the tithe obligatory upon the Israelites. The tithe, whether of the seed of the land or of the fruit of the tree, belonged to Yhwh and consequently was holy. It was redeemable by "adding thereto the fifth part thereof." The tithe of cattle, however, was not redeemable; and if one beast was exchanged for another both became holy unto the Lord. The method of levying the tithe of cattle is indicated: they were counted singly; and every tenth one that passed under the rod became the tithe animal (Lev. xxvii. 30–33).

There is apparently a discrepancy between the Book of Numbers and that of Deuteronomy with regard to the tithe. In Num. xviii. 21–26 it is stated that "all the tenth in Israel" is given to the Levites "for an inheritance"; as they had no part in the land, the tithe was to be their principal source of sustenance. On the other hand, the Levites themselves were required to give the priests a tenth of all the tithes received by them. Deut. xiv. 22-29, however, enjoins the annual tithing of the increase of the field only; this was to be eaten before the Lord, that is to say, in the city in which the Temple was built. But if the distance to such city was so great as to render the transportation of all the tithes impracticable, the people might convert the tithe into money and spend the sum in the city on eatables, etc. ("whatsoever thy soul desireth"; *ib.* verse 26). Every third year the tithes were not to be carried to the city of the Temple, but were to be stored at home ("within thy gates"), and "the Levite, the stranger, and the fatherless, and the widow" were to "eat and be satisfied" (*ib.* verse 29). It is to be concluded that, the seventh year being a Sabbatical year and no tithing being permissible therein, the tithe of the first, second, fourth, and fifth years of every cycle of seven years had to be brought to the Temple and eaten by the landowner and his family, while the tithe of the third and sixth years was to be left at home for the poor.

The third year was called the year of tithing; and after the distribution of the tithe among the Levites and others, the landowners were required to announce solemnly before the Lord that they had observed all the laws connected therewith, concluding such declaration with a prayer for God's blessing (*ib.* xxvi. 12-15). A mourner was not allowed to eat the tithe, nor might one employ it for any unclean use, nor give it for the dead.

Samuel informed the Israelites that they would have to give a tenth of everything to the king (I Sam. viii. 15, 17). When the Israelites afterward fell into idolatry, they continued to bring their tithes to the temple of their idols; but they seem to have adopted another system of offering them (comp. Amos iv. 4, Hebr. and R. V.). King Hezekiah again imposed the tithe on his subjects; and the people of Judah brought it in abundance, apparently for the use of the Levites. Indeed, the quantity was so great that the king ordered special chambers in the Temple to be prepared for its reception (II Chron. xxxi. 6-12). The same arrangement was made later by Nehemiah (Neh. x. 39, xiii. 12).

J. M. Sel.

——**In Rabbinical Literature:** According to the Rabbis, the Books of Numbers and Deuteronomy are complementary to each other (comp. Tithe, Biblical Data); consequently there can be no contradiction between them. Thus there were three kinds of tithes: (1) that given to the Levites as stated in Num. xviii. 21 *et seq.*, and termed "the first tithe" ("ma'aser rishon"); (2) the tithe which was to be taken to Jerusalem and there consumed by the landowner and his family, and which was termed "the second tithe" ("ma'aser sheni"), it being taken from what remained after the first tithe had been appropriated; and (3) that given to the poor ("ma'aser 'ani"). Therefore two tithes were to be taken every year except in the seventh year: Nos. 1 and 2 in the first, second, fourth, and fifth years; Nos. 1 and 3 in the third and sixth years.

The Tithing Year.

The Rabbis inferred from Deut. xiv. 22 that each tithe was to be taken of every year's produce separately, whether of crops, of cattle, or of anything else subject to tithing (Sifre, Deut. 105; Ter. i. 5; R. H. 8a, 12b). Also they fixed a particular day to mark the beginning of the year for tithing. The first of Elul according to R. Meïr, or the first of Tishri according to R. Eleazar and R. Simeon, is the new year for the tithing of cattle; the first of Tishri, for the produce of the land; the first of Shebaṭ according to the school of Shammai, or the fifteenth of Shebaṭ according to the school of Hillel, for the fruit of the trees (R. H. i. 1). The removal of the tithes and the recitation of the confession (comp. Deut. xxvi. 12 *et seq.*) must take place on the eve of the Passover festival of the fourth and seventh years of every cycle of seven years. Although the removal is mentioned only with regard to the tithe of the poor, the Rabbis concluded that the other two tithes must also be cleared away at the same time (Sifre, Deut. 109). The Rabbis fixed the following rules by which one might distinguish tithable produce: it must be eatable, the property of an individual, and the product of the soil. Fruit must be ripe enough to be eaten; when one eats untithed fruit in an immature state, he is not guilty of having transgressed the Law (Ma'as. i. 1 *et seq.*). As appears from the Bible, the law of tithing was originally to be applied in Palestine only; the Prophets, however, ordained that tithing should be observed in Babylonia also, it being near Palestine. The earlier rabbis applied the law of tithing to Egypt and to the lands of Ammon and Moab (Yad. iv. 3); and the scribes seem to have instituted tithes in Syria (Dem. vi. 11; comp. Shulḥan 'Aruk, Yoreh De'ah, 331, 1 *et seq.*).

Merit of the Tithe.

The Rabbis emphasize in more than one instance the importance of tithes. Tithing is one of the three things through the merit of which the world was created (Gen. R. i. 6), and by virtue of which the Israelites obtain from God their desire (Pesiḳ. xi. 96b; Tan., Re'eh). Through the merit of tithes, also, the Israelites after death escape the punishment which the wicked suffer for twelve months in hell (Pesiḳ. xi. 97b-98a; Midr. Mishle xxxi.). The Patriarchs observed the law of tithing, concerning which statement there are two different accounts: (1) Abraham offered the first tithe, Isaac brought the heave-offering for the priests ("terumah gedolah"), and Jacob brought the second tithe (Pesiḳ. R. 25 [ed. Friedmann, p. 127b]); (2) Abraham presented the heave-offering, Isaac offered the second tithe, and Jacob brought the first one (Pesiḳ. xi. 98a; comp. Gen. R. lxiv. 6; Num. R. xii. 13; Pirḳe R. El. xxvii., xxxiii.). He who partakes of fruit that has not been tithed is like one who eats carrion; and Judah ha-Nasi's opinion is that one who eats fruit of which the tithe for the poor has not been appropriated is deserving of death (Pesiḳ. xi. 99a, b). One of the interpretations of Prov. xxx. 4 is that he who fulfils the duty of tithing causes rain to fall, and that he who fails therein causes drought (Yalḳ., Prov. 962). Non-fulfilment of the law of tithing brings hurricanes (Midr. Teh. to Ps. xviii.).

The tithe for the poor gave rise to the tithing of one's earnings, with the object of distributing among the needy the sum so appropriated. This is inferred in Sifre (quoted in Tos. to Ta'an. 9a) from Deut. xiv. 22, and is therefore considered as an obligation imposed by the Mosaic law ("Ṭure Zahab" to Shulḥan 'Aruk, Yoreh De'ah, 249, 1; comp. Isaiah Horwitz, "Shene Luḥot ha-Berit," and Joseph Hahn, "Yosef Omeẓ," p. 176, Frankfort-on-the-Main, 1723). Joel Sirkes in his "Bayit Ḥadash" (to Shulḥan 'Aruk, *l.c.*), however, thinks that tithing one's earnings is simply a custom and is not obligatory either under the Mosaic or under the rabbinical law. The whole of the tithe must be given to the poor; and no part of it may be appropriated to any other religious purpose (Shulḥan 'Aruk, *l.c.*, Isserles' gloss).

W. B. M. Sel.

——**Critical View:** There are evidently two conflicting sources with regard to tithes. D mentions only the tithes of corn, wine, and olive-oil, which were to be levied every year and to be eaten by the landowner in the Holy City in the first, second, fourth, and fifth years of every Sabbatical cycle, while in the third and sixth years they were to be distributed among the Levites, strangers, orphans, and widows (Deut. xii. 16, xiv. 22 *et seq.*). P, on the other hand, destines this tithe for the Levites (Num. xviii. 21 *et seq.*); and, in a probably late addition (Lev. xxvii. 30–33), tithing is extended to the fruit of the trees and to cattle also. It is true that in D the Levites, too, have a share in the tithe (Deut. xii. 18; comp. xiv. 27); but the owner's invitation to the Levite to partake thereof seems to have been voluntary. It may be noticed that in the priestly part of the Book of Ezekiel (xliv. 15 *et seq.*) there is no mention whatever of a tithe appointed for the Levites. Nehemiah instituted such a tithe; and he directed that the Levites should give a tithe of their portions to the priests (see Tithe, Biblical Data). Hence it may be concluded that the passages in Numbers and Leviticus regarding tithes were written under the influence of the Book of Nehemiah.

Title-Page of Tractate Menaḥot, Printed by Daniel Bomberg, Venice, 1522.
(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

That the tithe spoken of in D, and which is termed by the Rabbis "the second tithe" (see Tithe in Rabbinical Literature), is more ancient has been concluded by W. R. Smith ("Rel. of Sem." 2d ed., pp. 245 *et seq.*), who, moreover, thinks that in earlier times the tribute was not a fixed amount, but that it took the form of first-fruits, and that at a later period a tithe was fixed to provide the public banquets at sacred festivals. Subsequently the tithe became the prerogative of the king (I Sam. viii. 15, 17); but from the Book of Amos (iv. 4) it appears that in the time of that prophet the Israelites paid tithes for the use of their sanctuaries in the Northern Kingdom, as, similarly, in the Persian period the tithes were converted to the use of the Temple of Yhwh (Mal. iii. 8–10). Those instituted by Nehemiah for payment to the Levites were a development of the heave-offering ("terumah") given to the priests. Not only do the terms "terumah" and "ma'aser" often occur together in the Old Testament, but it is stated in Neh. x. 37 *et seq.* that the Levites were required to collect their tithes under the supervision of a priest. R. Eleazar b. Azariah held that the first tithe might also be paid to the priest (Yeb. 86b).

Comparing verse 30 with verse 32 of Lev. xxvii., it may be concluded that the tithe of cattle was to go to the priests or the Levites. This was the opinion of Philo ("De Prœmiis Sacerdotum," § 2 [ed. Mangey, ii. 234]); but the Rabbis refer the whole passage to the second tithe (Sifre, Deut. 63; Ḥag. i. 4; Men. vii. 5).

TITLE-PAGE: Hebrew incunabula, like manuscripts, were mostly provided with colophons, which served as title-pages. The title of the Soncino edition of Berakot, 1483, is given in the printer's colophon. The title-page of Ibn Gabirol's (or Jedaiah Bedersi's ?) "Mibḥar ha-Peninim" (Soncino, 1484) is preceded by a short preface. In Naḥmanides' commentary on the Pentateuch (Lisbon, 1489) the title, "Ḥiddushe Torah," precedes the preface. In

TITLE-PAGE OF "SEFER NIẒẒAḤON," ALTDORF, 1644.
(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

"Seder ha-Taḥanunim Asher Nahagu Bene Roma" (= The Order of Devotions According to the Custom of Rome) the title is given in the colophon (Soncino, 1487). In David Ḳimḥi's "Sefer ha-Shorashim" (Naples, 1491) the title, on the first page, is surrounded by a wood-engraving.

Decorations.

In the early sixteenth century the colophon still predominated. The title of the "Sefer Minhag Abot," the condensed liturgical code of Zedekiah b. Abraham's "Shibbole ha-Leḳeṭ," appears in the colophon (Mantua, 1514). About this period the titles of books began to appear on the first page, next to the cover. In the first complete Babylonian Talmud, which was printed by Bomberg in Venice, 1520–23, the title on the first page occupies a narrow space of five lines, a little above the center, and, translated, reads: "Massekt Niddah, with Commentaries of Rashi, Tosafot, Extracts of Decisions in Tosafot, Commentary on the Mishnah by Maimonides, Commentary and Decisions by Asheri. Printed by Daniel Bomberg, in the year 5280, in Venice." Soon, however, the titles began to occupy the entire page, some being bordered with ornamental wood- or metal-engravings of flowers, or of Moses, Aaron, David, and Solomon, or of angels, deer, and lions. The original engravings were sometimes used by non-Jewish artists, which accounts for the non-Jewish character of some of the title-pages. The borders included the printer's device and marks. The printers at Prague in the sixteenth century decorated their title-pages in the style of an illuminated manuscript. As a popular title-page design, the entrance to the Temple, above which was inscribed "This gate of the Lord, into which the righteous shall enter" (Ps. cxviii. 20), with the pillars of Jachin and Boaz, occupied high rank. The Amsterdam, 1666, "Tiḳḳun," for night reading, has an engraved title-page with a representation of Shabbethai Ẓebi and his disciples. Isaac Aboab's "Menorat ha-Ma'or" (Amsterdam, 1722) has a very elaborately engraved title-page. Maimonides' "Sefer ha-Miẓwot" (with Judæo-German translation by J. Landau, Prague, 1798) has the entire first title-page, including the title and inscription of the book, engraved, and contains the figures of David and Solomon, the Levites' musical instruments, the Ark, and the candlestick.

Title-Page of "Shefa' Ṭal," Hanau, 1612.

(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

Frequently two title-pages were used, the first being ornamented and giving the name and contents of the book in general terms, the second giving a fuller description in plain type. The Amsterdam, 1679, edition of the Bible, which has a Judæo-German translation, has a second engraved title-page. Often the title-page was artistically very attractive; the largest types were used for the title. The Talmud published by Schapira in Slobuta (1817–22) gives the titles of the treatises and the special commentaries (not printed in former editions) and the name of Slobuta in red. In the second Slobuta edition, 1834–36 (only Berakot, Shabbat, and 'Erubin being published), there were two title-pages, some lines being in red and some in black; the Wilna-Grodno edition (1832–52) followed this style. The matter on the title-page is sometimes spaced and sometimes crowded. The Venice Abudarham of 1566 has the author's preface of eighteen lines on the title-page. Joshua Falk Cohen's "Abne Yehoshua'," the first rabbinical work published in America (New York, 1860), has the description of the contents, on the title-page, set in the form of a triangle. A number of modern books use vowel-points on the title-page.

Some title-pages misrepresent the contents of the book. The title-page of the Bomberg Pentateuch,

TITLE-PAGE OF BIBLE, AMSTERDAM, 1679.
(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

Venice, 1524, calls for Ibn Ezra's commentary on the Five Rolls, which, however, is not in the book. The same thing occurred in the case of Isaac Abravanel's commentary on the Megillot (Venice, 1573). Judah ha-Levi's "Cuzari," with translation and commentary by David Cassel (Leipsic, 1853), has a second title-page, dated 1841, which states that part of the commentary was written conjointly by H. Jolowicz and D. Cassel. Moses Ḥayyim Luzzatto's "Migdal 'Oz" (*ib.* 1854) mentions "F. Delitzschii prolegomena" in the title-page, but the latter is not included in the book.

Some old works were supplied with new title-pages. Elijah Levita's "Sefer ha-Tishbi" (Isny, 1541) was given a new title-page and preface at Basel in 1557. The title-page bearing the imprint of Frankfort-on-the-Oder, 1595, covers the edition of Wittenberg, 1587, by Crots. The "Yosippon," with the title-page of Leipsic, 1710, is the old edition of Gotha, 1707. The commentary of Abravanel on the Early Prophets with the title-page of Frankfort-on-the-Main, 1736, is the Leipsic edition of 1686. This device of changing the title-page was probably due to the bookseller's desire to mislead the purchaser; or perhaps the old title-pages were missing and were replaced by a second printer. Still it is difficult to explain why one edition of a certain date and place should have various title-pages, as in the case of Ibn Shu'aib's "Kol Bokim," a commentary on Lamentations (Venice, 1589), and Ḥayyim Abraham Ostrosa's "Sefer Ben le-Abraham" (Salonica, 1826), some copies of which read "Sefer Ben Abraham," omitting the "le"; perhaps the printer dropped that letter from the form before he had finished the edition.

Errors in Names and Titles.

Some of the errors in the title-pages affect the name of the author. In Moses b. Elijah Galina's "Ḥokmat ha-Parẓuf" (Amsterdam, 1658) the name reads "Elijah ben Moses." In Elijah Alfandari's "Seder Eliyahu Rabbah," responsa (Constantinople, 1719), the name "Shabbethai" on the title-page is an error. Mistakes in dates of publication, especially in acrostics, are numerous. Sometimes the date on the title-page is different from that in the colophon, or the two title-pages disagree. For example, the Amsterdam, 1705, edition of the Bible has a second title-page dated 1700-3. Elijah b. Joseph Trillinger's "Mishnat R. Eli'ezer" (Frankfort-on-the-Oder, 1707) gives the correct date in the colophon, but on the title-page of the first volume the date 1655 is given in acrostic. On some title-pages the dates are incorrectly given, as in the Ṭur Ḥoshen Mishpaṭ of Venice, 1567, in which the date given is 5027, instead of 5327. A similar mistake occurred in Joseph b. Ḥayyim Jabez's commentary on the Psalms (Salonica, 1571), in which the words "Shelosh Me'ot" (= "three hundred") are omitted.

TITLES OF HEBREW BOOKS: In Hebrew literature, books, with few exceptions, are recognized by their titles independently of their authors' names. Citations from and references to the "Pene Yehoshua'," or "Sha'agat Aryeh," are often made by students who neither know nor care to know the name of the author. Hence the bibliographer's first aim is the listing of Hebrew books by their titles rather than by the names of their authors.

The titles of the Biblical books are said to have been decided by the Great Assembly, headed by Ezra. "Torah," "Nebi'im," and "Ketubim" (Pentateuch,

TITLE-PAGE FROM BIBLE, WILNA, 1865.

(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

Prophets, and Hagiographa) were the titles given to the principal divisions. The Torah was subdivided into five "fifths," entitled "Ḥamishshah Ḥumshe Torah" (Ḥag. 14a). The Book of Exodus was called "Ḥomesh Sheni" (Second Fifth), and Numbers, "Ḥomesh ha-Peḳudim" (Fifth of the Numbered; Soṭah 36b). The Minor Prophets were known as the "Shenem 'Asar" (The Twelve), and Chronicles as "Dibre ha-Yamim" (The Events of the Days; B. B. 14a).

Biblical Titles.

In a later period the five "books of Moses" received respectively the titles "Bereshit," "Shemot," "Wayiḳra," "Bemidbar," and "Debarim," these being merely the first important words in the five books; while the separate sections of the Talmud and the different midrashic works became known by titles indicating either their contents or the general nature of their relation to the Law. The Mishnah and Gemara together form the Talmud, *i.e.*, the "Study," "Teaching."

In the geonic period, besides the collections of responsa and codes called "Halakot Pesuḳot," or "Halakot Gedolot" (halakic decisions credited to Judah Gaon), there were Saadia Gaon's "Sefer ha-Emunot we-ha-De'ot" (Book of Creeds and Opinions), Hai Gaon's "Miḳḳaḥ u-Mimkar" (Buying and Selling), and Amram Gaon's "Seder," or "Siddur." The title "Reumah" is curious for a work on "sheḥiṭah" by Nahshon Gaon; but this is explained by Reifmann to be a misprint, the proper title being "Re'u Mah" (See What), the two words beginning the text.

Cabalistic Books.

Immediately after the geonic period the works of legal authorities were known by their authors' names—Alfasi, RaMBaM (Maimonides), Mordecai, Asheri. The commentators Rashi, Ibn Ezra, RaSHBaM, Abravanel, and others gave no other title than "Perush" (exposition, commentary) to their works. Later, the titles of the books again took the place of the authors' names, and references were made to the "Ba'al ha-Ṭurim," the "Ba'al ha-Lebushim," the "Bet Yosef," and the "Shulḥan 'Aruk"; among the few exceptions in later times were the works of Wilna Gaon and R. Akiba Eger. Cabalistic books bear fanciful and highly poetical titles: "Zohar" (Brightness), formerly known as the "Midrash of R. Simeon b. Yoḥai"; "Bahir" (Shining); "Ra'ya Mehemna" (True Shepherd); "Sifra di-Ẓeni'uta" (Book of Secrets); "Libnat ha-Sappir" (Sapphire Paving); "Ginnat Bitan" (Garden of the Palace); "Bat Melek" (Daughter of the King); "'Eẓ Ḥayyim" (Tree of Life). General titles were given to certain classes of literature, such as "Tosafot" (additions or glosses to the Talmud, chiefly by French rabbis), "Posḳim" (decisions), "Ḥiddushim" (novellæ on halakic subjects), and "Derushim" (notes on haggadic expositions). The "She'elot u-Teshubot" (responsa) bear sometimes the name of the author, sometimes a special title. In modern times "Bi'ur" (explanation) has replaced the title "Perush."

Special Expedients.

Most Hebrew titles are catchwords or familiar Biblical phrases; some have reference to the name of the author; for example, "Zera' Abraham" or "Zera' Yiẓḥaḳ" (Seed of Abraham, or Isaac). "Helel ben Shaḥar" ("Lucifer, son of the morning"; Isa. xiv. 12) is appropriated by an author whose first name is Hillel. "Derek Oniyyah" ("the way of a ship"; Prov. xxx. 19) is due to the surname of the author being "Schiff" (ship). One author by the name of Cohen made the titles of all his works refer to that name, all beginning with a "waw": "We-Shab ha-Kohen" ("And the priest shall come again"; Lev. xiv. 39); "We-He'erik Oto ha-Kohen" ("and the priest shall value him"; Lev. xxvii. 8); "We-Hishshab-Lo ha-Kohen" ("And the priest shall reckon unto him"; Lev. xxvii. 18, Hebr.). Samuel Jaffe chose as titles for his works Biblical phrases beginning with his name; thus, "Yefeh 'Enayim" (Beautiful Eyes), "Yefeh Ḳol" (Beautiful Voice), etc. "Elef ha-Magen" ("a thousand bucklers"; Cant. iv. 4) is the title of a work by Moses Galante containing a thousand responsa. The title of one of Azulai's books is "Debash le-Fi" (Honey to My Mouth), "DeBaSh" being the abbreviation of "David ben Sarah." Lipschütz's "Tif'eret Yisrael" contains references to his own name and to the numerical values of the names of his father, children, and grandchildren (see his introduction to Ṭohorot). Most of the Biblical phrases used as titles have no relation to the names of the authors of the works, as in the case of "Ba-Urim Kabbedu YHWH" ("Glorify ye the Lord in the fires"; Isa. xxiv. 15), the title of a commentary on Rashi on the Pentateuch.

Some authors found titles in the nomenclature of the Tabernacle—its accessories, the vestments of the priests, the various ingredients of the incense—and the names of flowers, fruits, wines, and oils. Mordecai Jaffe is the author of the "Lebushim" (Garments), divided into "Lebush Tekelet" (Blue Apparel), "Ḥur" (White), "Buẓ we-Argaman" (Linen and Purple), "'Aṭeret Zahab" (Crown of Gold), "'Ir Shushan" ("the city of Shushan"; based on Esth. viii. 15). It made little difference whether the title had or had not any bearing on the contents of the book so long as it appealed to the fancy of the author. Abraham Jacob Paperna, in criticizing this method, said that if the custom of choosing Biblical phrases at random were continued, it would soon be possible to read the whole Bible by collecting and arranging Hebrew book-titles. According to a popular belief, the Messiah will appear when that has been done ("Ḳanḳan Ḥadash Male Yashan," p. 24, Wilna, 1867). Authors borrowed also Talmudical phrases, such as the one just quoted, which means "A New Vessel Full of Old [Wine]" (Ab. iv. 20), and "Emat Mafgia' 'al Ari" (The Lion's Fear of the Gnat; see Shab. 77b), the title of a counter-criticism by Benamozegh of Leon of Modena's "Ari Nohem" (The Howling Lion), an attack upon the Zohar.

Self-Flattery in Titles.

The relation of a commentary to a text is sometimes indicated by a similarity in titles: Maimonides' "Mishneh Torah" was followed by Caro's commentary "Kesef Mishneh" (Double Money), De Boton's "Leḥem Mishneh" (Double Bread), and Judah Rosanes' "Mishneh le-Melek" (Vice-King). Caro's Shulḥan 'Aruk (Table Prepared) is covered by Isserles' "Mappah" (Table-

(From Günzburg's "Ornamentation des Anciens Manuscrits," St. Petersburg, 1904.)

Eulogistic Titles.

cloth), annotations. Caro himself annotated his "Bet Yosef" (House of Joseph) in his "Bedeḳ ha-Bayit" (Breach in the House). In his eagerness to embellish his work with a beautiful Biblical phrase an author rarely hesitated, on the score of modesty, to select such a title as "Zeh Yenaḥamenu" (He [This] Shall Comfort Us) or "Matoḳ mi-Debash" (Sweeter than Honey). Highly extravagant titles, especially when referring to nobles or kings, sometimes aroused the suspicion of a government. This was so in the case of Yom-Ṭob Lipmann Heller's commentaries on Asheri which he entitled "Ma'adanne Melek" (Royal Dainties) and "Leḥem Ḥamudot" (Pleasant Bread [from the King's Table]; see Dan. x. 3; the Prague, 1628, edition), the author being accused of treasonable pretensions. Consequently the publishers of the edition of Fürth, 1745, were compelled to change the titles to "Ma'adanne Yom-Ṭob" (Dainties of Yom-Ṭob) and "Dibre Ḥamudot" (Pleasant Words).

On the other hand, some authors took pains to select titles that would indicate the nature of the contents of their books, as in the works "Agur" (Gatherer); "Kol Bo" (All in It), collections of liturgical minhagim; "Keneset ha-Gedolah" (Great Assembly), a digest of all the responsa in the order of the Ṭurim; "Torat ha-Kena'ot" (Law of Jealousies), rules for polemics; and "Shebeṭ le-Gew Kesilim" (Rod for the Fool's Back), the last-named being a severely censorious work. Perhaps the most appropriate titles are those used in memorial and eulogistic works. The Talmudical treatise "Ebel Rabbati" (Great Mourning) later received the euphemistic title "Semaḥot" (Joys). The modern manual for mourners is similarly called "Sefer ha-Ḥayyim" (Book of the Living). The book of recitations and prayers in commemoration of Simeon b. Yoḥai is called "Hillula Rabbah" (Grand Celebration). Others have such titles as "Allon Bakut" (Gen. xxxv. 8), "Ebel Kabed" (Grievous Mourning), "Ebel Mosheh" (Mourning for Moses), "Misped Mar" (Bitter Wailing), "Ḳol Nehi" (Voice of Lamentation), "Ḳol Bokim" (Voice of Crying), "'Emeḳ ha-Baka" (Valley of Baca; see Ps. lxxxiv. 6). Some books have two Hebrew titles, and others have one in Hebrew and one in another language, references being made to either.

The repetition of the same title by various authors is a source of annoyance and confusion to the bibliographer. Benjacob, in his "Oẓar ha-Sefarim" (up to 1863), records no less than 27 books entitled "'Eẓ Ḥayyim"; 20 entitled "Shir Yedidut"; 16 entitled "Ẓofnat Pa'aneaḥ"; 15 entitled "Leshon Limmudim"; 14 each entitled "Keter Torah," "Leḳaḥ Ṭob," "Ma'amar Mordekai," "Meḳor Ḥayyim," "Sefat Emet"; 13 each called "Ḥesheḳ Shelomoh," "Safah Berurah"; 12 each entitled "Eben Boḥan," "Dereḳ Ḥayyim," "Miḳweh Yisrael"; and there are twenty other titles each of which is used for from 8 to 12 books.

J. J. D. E.

TITLES OF HONOR: Words and phrases applied to persons to distinguish their noble birth, or their official or social rank and station, or as marks of acknowledgment of their learning and piety.

Origin.

——**Biblical Data:** The title "adon" = "lord" was given to the owner of property and slaves; also to the person to whom homage was paid as a guest of honor (Gen. xviii. 3) or who has done an act of kindness (*ib.* xix. 18). Abraham was entitled "lord" and "nesi elohim" = "mighty prince" (*ib.* xxiii. 6), also "prophet" (*ib.* xx. 7). The representative of the people was a "melek" = "leader," or in some cases "king." Next in rank was the "aluf" = "duke" or "chieftain." Each of the dukes of Esau was the ruler of a family or clan (*ib.* xxxvi. 15), and was probably subject to the head of the whole tribe. The king appointed a viceroy termed "mishneh" = "second." Joseph was mishneh to Pharaoh, with the title "abrek" = "bow the knees" (*ib.* xli. 43), denoting the reverence due to his dignity; though according to the Talmud "ab-rek" (אב רך) is a compound word whose two elements signify respectively "father" (in wisdom) and "young" (in years), the whole denoting "young father" in the sense of "Jupiter" = "Ju" + "pater" (Levinsohn, "Shorashe Lebanon," *s.v.* אברך). Pharaoh renamed Joseph "Zaphnath-paaneah" = "the revealer of secrets."

Moses as a spiritual leader was recognized by the titles "ish ha-Elohim" = "the man of God" (Deut. xxxiii. 1) and "'ebed YHWH" = "the servant of the Lord" (*ib.* xxxiv. 5). These titles were applied to other prophets also (I Sam. ii. 27; Isa. xlii. 19).

The civil administration was conducted by judges who had the title of "prince," "ruler" ("sar," "sarim") over certain divisions of the people, comprising thousands, hundreds, fifties, and tens (Ex. xviii. 21). In a later period the judges ("shofeṭim") became the real rulers of the Israelites, till, like the Gentiles, the latter adopted a king. In Moses' time these were called also the "zeḳenim" = "elders" and the "nesi'im" = "rulers" (Lev. iv. 22) of the congregation.

Titles of Birth and Nobility.

The title of birth, "bekor," assigned to the first-born son in every family, carried with it special privileges of inheritance. The title "kohanim" = "priests," applied to all descendants of Aaron, and that of "Lewiyim" = "Levites," to the rest of the tribe of Levi, carried with them privileges with regard to tithes and certain duties in connection with the administration of religious services in the Temple; thus the senior priest was called "kohen mashiaḥ" = "the anointed priest" or "kohen gadol" = "the high priest." The prophet ("nabi") bore also the titles "ro'eh" and "ḥozeh" = "seer" (I Sam. ix. 9; II Kings xvii. 13).

Titles of nobility not connected with the tribe of Levi, but recognized by the people or conferred by the king as distinctions of ancient and noble stock, high descent, and gentility, were the following: "aẓil," "ḥor" = "freeman"; and "nasik," "rozen," or "razon" (Prov. xiv. 28) = "prince." Titles of civil officers chosen by the people were: "aluf," "nasi," "nagid," "ḳaẓin," and "rosh" = "chief." Titles of officers connected with the royal palace were: "abi ha-melek" (the father of the king, *i.e.*, prime minister); "saris" (eunuch, chamberlain, the king's friend; I Kings iv. 57); "rab ha-ṭabbaḥim" (executioner); "yoresh 'eẓer" (crown prince); "mishneh" (viceroy); "shalish" (third in rank, chief of staff); "niẓẓab" or "neẓib" (tribal governor; I Kings iv. 7); "peḥah," "sagan" (lieutenant and deputy; Jer. li. 23); "abir," "addir" (knight and hero); "kereti" and "peleti" (royal couriers and headsmen forming the body-guard of David); "seren" (satrap of the Philistines); "ṭifsar" (a military prefect); "partam," "'aḥashdarpan" (satrap under the Persian government); "sarek" (overseer; Dan. vi. 3); "rab," "rabreban" (chief, chieftain); "mazkir" (recorder). During the Exile the Persian king gave his courtiers titles: thus Daniel was renamed "Belteshazzar" (*ib.* i. 7), and Nehemiah "Tirshatha" (Neh. viii. 9). For later titles see Exilarch, Gabbai, Gaon, Nasi, Parnas, Rabbi, etc.

J. · J. D. E.

Aristocracy.

——**In Rabbinical Literature:** The Rabbis lay stress on the distinction due to "yiḥus" and "zekut abot" (see Patriarchs). A descendant of a noble family is a "yaḥsan" (well-born; comp. "gentle" in "gentleman"). The destruction of Jerusalem is ascribed to the lack of distinction between the nobles and the common people: "As with the people, so with the priest; as with the servant, so with the master" (Isa. xxiv. 2; Shab. 119b). With the exception of Simeon ha-Ẓaddiḳ (= "the just") the members of the Great Assembly and of the Sanhedrin were not referred to by any title (Ab. i. 2). The Biblical title "nasi" for the president of the community and "ab bet din" (father of the court of law) for the chief justice existed at an early period in the Palestinian academies. The title "rabban" (general master of the community) was given to Johanan b. Zakkai and to Gamaliel the Elder. The title "rabbi," designating an individual master, was only less honorable than "rabban." In the Babylonian schools "rab" was used instead. The title "rabbi" without the proper name was used to designate Judah ha-Nasi I. The scholars mentioned in the Mishnah, known as Tannaim, except those of the early period, have the title "rabbi" prefixed to their names, as have also the Palestinian amoraim, the Babylonian amoraim bearing that of "rab" (see Amoraim). The later Talmudists bear the title Mar (master). Ḥaber ("colleague") and Ḥakam were titles used in Palestine. Abba was used in Babylon, as was the title "resh galuta" (Exilarch), or "rosh ha-keneset" (head of the synagogue). Resh Kallah denoted the president of the students who assembled in the months of Adar and Elul. Parnas was the title of the administrator of the community; Gabbai, that of the public almoner, the collector and distributer of charities (Ned. 65b). The Ḥazzan in the mishnaic period was the sexton of the synagogue; in later times he was the reader of prayers; while the sexton or beadle was known as the "shammash." A teacher was called "melammed," and his assistant "resh dukana" (B. B. 21a). The latter taught the class of younger children stationed on a platform; hence the name Dukan.

Communal and Religious Titles.

Honorific phrases used as epithets were assigned to the great rabbis in the Talmudic period by their disciples and admirers. R. Johanan b. Zakkai was called "the light of Israel, the right pillar, the mighty hammer" (Ber. 28b). Jose the priest, a disciple of Johanan b. Zakkai, was styled "ḥasid" = "pious" (Ab. ii. 11); there was also a R. Simeon Ḥasida (Suk. 52b). R. Eleazar called R. Asi "mofet ha-dor" = "the wonder of the generation" (Ḥul. 103b). Metaphorical terms were similarly used: R. Eleazar b. Simeon was "a lion the son of a lion" (B. M. 84b); R. Ḥiyya b. Abin was exalted as "the lion of society" (Shab. 111); Samuel was known as "the lion of Babylon" (*ib.* 53a); R. Akiba, as "oẓar balum" = "a treasure of knowledge" (Giṭ. 67a); R. Meïr (whose real name was Me'ashah) was so called because he enlightened the eyes of the wise in the Halakah ('Er. 13b); R. Menahem b. Simeon, "the son of the holy" ('Ab. Zarah 50a); R. Eleazar, "the best scholar" (Ker. 13b); R. Joseph, a "sharp knife" (Yeb. 122a), meaning that he was keen and logical in reasoning. The last-mentioned title was given also to Raba, Joseph's son (Ḥul. 77a). R. Joseph was styled "Sinai," and Rabbah "'oḳer harim" = "mountain-razer" (Hor. 14a). The former title describes the traditional and logical scholar; the latter, the pilpulist who depends on technical argumentation.

Titles in the Middle Ages.

In the geonic period the title Gaon replaced "nasi" as referring to the president of the community. The principal of the academies of Sura and Pumbedita were known as "rosh yeshibah" or "resh metibta." The principal teachers were the "resh sidra" and the "resh kallah." The title "nagid" was conferred on R. Samuel (1027-55), the author of "Mebo ha-Talmud," and later replaced the title "gaon" in Egypt (see Egypt). The title "dayyan" (judge) appears to have been first used in the eleventh century, in Spain (see Baḥya, Joseph ibn Paḳuda). In France and Germany the title "parnas" was revived, "manhig" (leader) being applied to the same official. The title Gabbai for the receiver of the taxes and contributions of the congregation was revived among the Sephardim; he ranked next to the parnas. The title "rabbenu" (our master) was given to Gershom, Tam, Hananeel, and Nissim.

The title Morenu ("our teacher") as a rabbinical degree introduced by R. Meïr ha-Levi of Vienna, was first conferred on R. Shalom and R. Jacob Mölln at the end of the fourteenth century. The titles "darshan" and Maggid were given to preachers.

Among the titles conferred on eminent Jews by governments in various countries were the following: In England during the twelfth and thirteenth centuries Bishop of the Jews, or "episcopus Judæorum," and Presbyter Judæorum, equivalent to the title "rabbi" or "ab bet din." In Germany the rabbi was sometimes called Hochmeister, "Judenmeister," or "Judenbischoff"; the learned Jew, "gelehrte Jude." "Court Jew" ("Hofjude") was equivalent to Shetadlan (שתדלן), the title of the attorney and representative of the Jews in their relations with the government in Poland and later in Russia.

Government Titles.

King Matthias of Hungary created the offices of "princeps Judæorum," "supremus Judæorum," and "præfectus Judæorum," held by members of the Mendel family (1482–1539), who were responsible for the Jewish taxes and were clothed with special jurisdiction over the Jews. Other government officials were "doctor Judæorum" and "magister Judæorum," whom the emperor appointed to settle all disputes between the Jews (Jost, "Gesch. der Israeliten," vi. 54, Berlin, 1826). Rabbi Leon of Mantua in the fifteenth century received the title of Messer ("maestre"), usually given to physicians. The Turkish government confers the title "ḥakam bashi" on the chief rabbi of the Sephardim; it thus also occurs in Egypt.

In the sixteenth century the title "maran" (our lord) was applied to Joseph Caro of Safed, author of the Shulḥan 'Aruk; and for a long time thereafter it was not given to any other person. The title "gaon" was revived in honor of Elijah b. Solomon of Wilna (1720–97); and since it has been misapplied to ordinary rabbis, the gaon of Wilna is described also as "gaon amitti" = "the genuine gaon." The title "ḥarif," from the Talmudic title "sakkina ḥarifa" (sharp knife), was revived in the eighteenth century. The title Baḥur dates back perhaps to the fourteenth century. It was used later in combination with an adjective, as "baḥur heḥashub" (the honored or worthy youth); and "yeshibah baḥur" designated the student in the yeshibah. The title "'illuy" (par excellence) described the young Talmudic genius.

The Ḥasidim came into existence in the time of Elijah Wilna. Their rabbis are variously styled "ẓaddiḳ" (righteous), "ba'al mofet" (wonder-master), "ba'al shem" (renowned master), and in Judæo-German "Rebbe" or "guter Yid."

Modern Titles.

In modern times the principal rabbi is known as "rab ha-galil" (district rabbi) and "rab ha-kolel" (equivalent to "chief rabbi" and "grand rabbin"); also as "rabbi" and "dayyan," with "ab bet din" connoting the president of the religious and civil court. A new title, "zeḳan ha-rabbanim" (elder rabbi), was conferred by the United Orthodox Rabbis of America, at their convention in Philadelphia in 1903, on R. Jacob David Ridbaz.

The German titles are "Rabbiner," "Rabbinats Assessor" (dayyan), and "Rabbinats Verweser." The title "reverend," conferred by the chief rabbi of England upon a Hebrew teacher, was criticized on the ground that "it ranks among the most mischievous and un-Jewish innovations peculiar to latter-day Anglo-Judaism" ("Jew. Chron." Jan. 3, 1902).

Abuse of Titles.

During the nineteenth century all Jewish titles were used in great profusion and indiscriminately. The title "gaon" was applied to nearly every rabbi, and some were addressed as "ha-ga'on ha-gadol" (the great gaon), "ha-ga'on ha-mefursam" (the well-known gaon), and, as if to out-Herod Herod, "ga'on ha-Ge'onim" (the gaon of the Geonim); also as "ha-ma'or ha-gadol" (the greater light), "me'or ha-Golah" (the light of the Exile), and "rabban shel kol bene ha-Golah" (the master of all the members of the Exile). The titles "ḥarif," "baḳi" (familiar with the Law), and "muflag" (extraordinary) were common ones for the ordinary learned layman. The abuse of titles has been the subject of biting criticism, sarcasm, and even ridicule by the Maskilim, especially by Isaac Erter and Leon Gordon.

As to the moral right to address one by an unmerited title, R. Samuel di Medina (1505–89) rules against it, though he permits such titles as are customary (Rashdam, "Eben ha-'Ezer," No. 65). Ḥayyim Hezekiah Medini, in his "Sedeh Ḥemed" (i., letter ח, § 140; ק, § 157, Warsaw, 1896), reviews the decisions in the responsa collections on this question, and comes to the conclusion that since the title "gaon" has become a common rabbinical one it would be a breach of etiquette to omit it in addressing a rabbi of some authority and repute.

Some authors in compiling their responsa are careful to remove personal titles from their correspondence. R. Akiba Eger in his testament ordered his executors to erase before publication all titles except "rabbi" in the numerous letters addressed to him on matters of casuistry.

Joel Höschel ("'Ateret Yeshu'ah," Wilna, 1799) and Jehiel Heilprin ("'Erke ha-Kinnuyim," Dyhernfurth, 1806) give lists of epithets of Biblical personages. Certain Hebrew letter-writers also contain various forms of titles; in particular that of Joseph Rakower, "Leshon Naḳi" (Prague, 1704, and often reprinted), should be mentioned. The only special work known on the subject of this article is one in manuscript by Jehiel Mendelssohn (d. 1904).

J. J. D. E.

TITUS (full name, **Titus Flavius Sabinus Vespasianus**): Emperor of Rome from 79 to 81; born in 39 or 41; died Sept. 13, 81; son of Vespasian, the conqueror of Jerusalem. He was educated at the courts of Claudius and Nero. Titus served first in Germany and later in Britain under his father, whom he subsequently assisted greatly in Judea by suppressing the rebellion of the Jews.

In Judea.

While Vespasian was operating in Galilee, the news of the death of Nero (June 9, 68) was received; and Titus, accompanied by Agrippa II., was sent to Rome to swear allegiance to Nero's successor. Galba was murdered in the meantime, however; and Titus hastened back to Judea, where the Egyptian and Syrian troops proclaimed Vespasian emperor, an occurrence which Josephus declares he had predicted in the presence of Titus himself (Josephus, "B. J." iii. 8, § 9; comp. Suidas, *s.v.* Ἰώσηπος; in Dion Cassius, lxvi. 1, Titus is not mentioned). It was Titus, moreover, who, under the leadership of his father, reduced the cities of Jotapata, Taricheæ, and Giscala, where he displayed, on the one hand, great courage and contempt of death, and, on the other, bitter cruelty toward the conquered; when, therefore, Vespasian went to Rome as emperor, Titus was left to prosecute the Jewish war.

With a considerable force he left Cæsarea and reached the walls of Jerusalem a few days before the Passover festival of the year 70. Omitting the details of this memorable war, only those events which concern Titus personally need be mentioned here. Together with 600 horsemen he rode ahead of his main army to reconnoiter the surrounding country, and had ventured so far in advance that only his valor saved him from capture in a Jewish attack ("B. J." v. 2, § 2). He endeavored at first to persuade the Jews to submit by making promises to them (Dion Cassius, lxvi. 4); and Josephus was sent to them several times with messages to that effect. They refused all overtures, however; and battering-rams were then set in action, and the beleaguerment of Jerusalem began. The Jews often destroyed these siege-works, and during one of their sorties Titus himself was so severely wounded in the left shoulder by a stone that his hand remained weak ever afterward (Dion Cassius, *l.c.* § 5; Josephus in "B. J." v. 6, § 2 relates a similar occurrence, although he does not mention the wounding of Titus). According to Dion Cassius, the Romans refused to attack the Temple on account of their respect for its sanctity; and Titus had to force them to do so. Josephus, on the other hand, differs on this point also, stating instead that Titus first held a council of war with his commanding officers, among them Tiberius Julius Alexander, and that certain generals advised the destruction of the Temple. He himself, however, wished to spare it ("B. J." vi. 4, § 3), and gave orders to extinguish the fire which had begun to consume the cloisters, apparently displaying this mildness either on account of Berenice or to show his friendship for Agrippa. Against this stands the narrative of the monk Sulpicius, who is said to have drawn his information from Tacitus; and, following this authority, Jacob Bernays ("Programm des Jüdisch-Theologischen Seminars in Breslau," 1861, p. 48) charges Josephus with untruthfulness; Grätz, however ("Gesch." iii. 539), is inclined to believe in the veracity of Josephus' statement.

(After Madden, "History of Jewish Coinage.")

On the following day (the tenth of Ab, 70) the Jews made a desperate sortie, and one of the Roman soldiers, weary of fighting, threw a burning piece of wood into the Temple. In vain did Titus give orders to extinguish the flames; his voice was drowned in the uproar. Titus himself, impelled by curiosity, entered the Sanctuary, but the smoke forced him to withdraw; and thus the destruction of the Temple of Jerusalem became associated with his name. On the ruins of the Sanctuary Titus was proclaimed emperor by his soldiers ("B. J." vi. 6, § 1; Dion Cassius, *l.c.* § 7; Suetonius, "Titus," v.), although both he and his father refused the epithet "Judaicus," because the word might suggest an inclination toward the Jewish religion (see, however, Joël, "Blicke in die Religionsgeschichte," ii. 46).

Burning of the Temple.

Even Josephus was able to point to only scanty traces of mildness in the life of Titus, while, on the other hand, cruelties are recorded which must be attributed to personal hatred on his part, and not to the unavoidable harshness of war. In Cæsarea in Palestine, in Cæsarea Philippi, and in Berytus he forced the captive Jews to fight against wild animals and also against one another; and many thousands more were slain to please the revengeful Syrians and Greeks. It was in Rome, however, that he celebrated his triumphs, together with his father and his brother Domitian; there 700 Jews of splendid physique and the leaders of the Zealots, John of Giscala and Simon bar Giora, helped to grace his procession. Two triumphal arches were erected in his honor. Of these, one no longer exists, and is remembered only on account of the inscription which it bore ("C. I. L." vi. 444), but the other, a beautiful structure, still stands in Rome, and on it may be seen representations of the captured vessels of the Temple. See Titus, Arch of.

Arches of Titus.

The Jews hated Titus on account of his share in the destruction of the Temple; and the Rabbis accordingly termed him "Titus the miscreant," thus contrasting sharply with the statements of the classical writers, who regarded him as an ornament of the human race. It may be proved, however, that he was anything but upright while he was crown prince; indeed, he was cruel, licentious, and ambitious, and was even suspected of having sought to poison his father. Only during the latter part of his reign did he display praiseworthy qualities. A significant saying of frequent recurrence in rabbinic sources is to the effect that he was honored in Rome as the conqueror of the barbarians (νικητής βαρβάρων; Gen. R. x.; Lev. R. xxii. 3; Lam. R., Introduction, No. 23, etc.), thus showing that the Jews were regarded as an inferior and barbarous nation. All the other accounts of Titus in rabbinical literature are purely legendary, and their utter unreliability is shown by the fact that he is called the nephew instead of the son of Vespasian, a view which was repeated

Rabbinical Legends.

in medieval chronicles (Neubauer, "M. J. C." i. 50, 70). In the Holy of Holies, moreover, he was said to have pierced the veil of the Ark, to have had intercourse with two courtezans (a reminiscence of his relations with Berenice), and to have defiled the Torah (*ib.*; Giṭ. 56b); in short, to have blasphemed God. That he packed the sacred vessels in a basket and took them on board his ship was also stated in rabbinical tradition. As he stepped from his bath—so runs a legend—a drink was handed to him, when suddenly a gnat (יתוש) stung him in the nose, and thus caused his death (Ab. R. N., Recension B, vii.; it is noteworthy that this form of retribution also figures in Arabic legends, which often confuse Titus with Nebuchadnezzar, who likewise destroyed the Temple; "R. E. J." lxix. 212). This has been interpreted as implying that Titus became melancholy and insane in his declining years (Hamburger, "R. B. T." *s.v.*); but such an explanation seems inadmissible. Despite the Jewish hatred of Titus, many Jews as well as Christians have borne his name (in the New Testament, Titus i. 4; Gal. ii. 3; II Cor. ii. 13, and elsewhere; for the Jews, see Krauss, "Lehnwörter," ii. 262); and in later times four prominent Jewish families of Italy have traced their descent from prisoners taken by him (see Rome).

The medieval Jews invented numerous legends concerning Titus; thus, according to "Yosippon" and Benjamin of Tudela, the Roman consuls (*i.e.*, senators) blamed him for taking three years instead of two to conquer Jerusalem. Benjamin claims also to have seen the supposed palace of Titus at Rome; and, according to Abraham ibn Daud ("Sefer ha-Ḳabbalah," ed. Prague, 1795, p. 40b), Titus put to death the high priest Ishmael b. Elisha and R. Simeon b. Gamaliel, although only the latter was actually executed. The names of hosts of other patriots and martyrs who lost their lives through Titus are unknown.

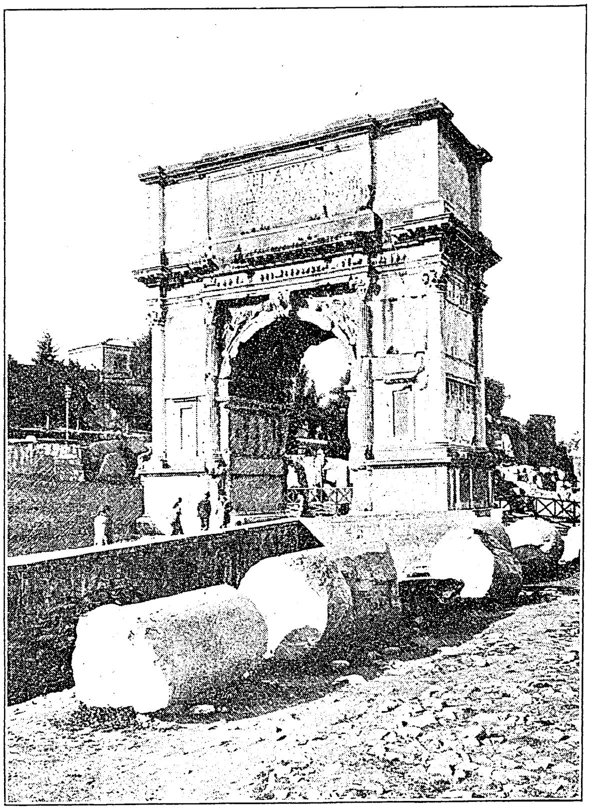
TITUS, ARCH OF:

TITUS, ARCH OF: A triumphal arch erected at Rome in honor of the emperor Titus and in celebration of his victory over the Jews. It rises on the prominent part of the Via Sacra, about 20 yards above the Tiber. One of its faces fronts the Colosseum; the other, the Forum. Under the pontificate of Pius VII. the arch was restored in its lateral portions, which had become injured by time. The structure consists of a single arcade adorned with sculptured crowns and tympans. On the right and on the left are two united columns of a composite order with rich entablature, and an elevated attic. Three bas-reliefs adorn the passage of the arcade. One, on the Colosseum side, shows Titus, crowned by Victory, standing upright in a car drawn by four horses and conducted by a female personifying the city of Rome. The second represents Roman soldiers without weapons, crowned with laurels, and carrying the spoils of the Temple of Jerusalem. These spoils are: two tablets fastened on staffs, the seven-branched candlestick, and the golden table upon which are leaning the sacred trumpets. The third bas-relief, under the vault, exhibits Titus sitting on an eagle, as he appears on the medals struck to consecrate his apotheosis.



Arch of Titus at Rome.
(From a photograph.)

A tradition, which still prevails in Rome, says that formerly no Jew ever passed under this arch, and that, in order to go from the Colosseum to the Capitol, the inhabitants of the ghetto opened a way between the arch and the Palatine.

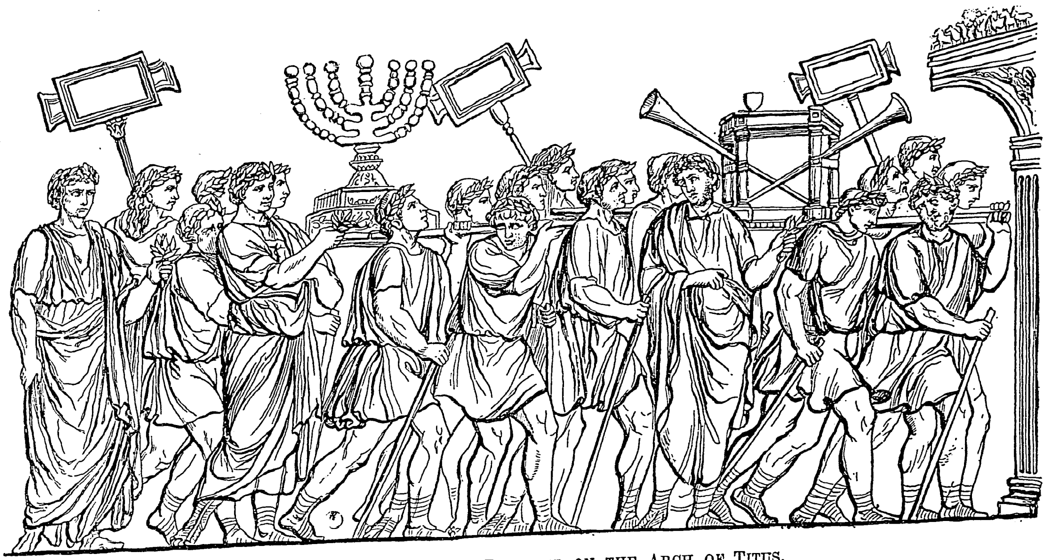
ṬOB 'ELEM, JOSEPH. See Bonfils, Joseph b. Samuel.

ṬOB LE-HODOT. See Mizmor Shir le-Yom ha-Shabbat.

TOBACCO (טאבאקו, טוטון): The use of tobacco for smoking and in the form of snuff is common among Jews, who in some countries control to a large extent the manufacture and sale of the product. It is asserted that a Jew named Luis de Terres, who accompanied Columbus on his expedition in 1492, settled in Cuba, learned the use of tobacco, and introduced it into Europe. From this time Jews have been connected with the trade in tobacco, one of the most important in early American history (M. J. Kohler, in "Publ. Am. Jew. Hist. Soc." x. 52). The introduction of tobacco into Europe encountered the resolute opposition of the clergy, who characterized tobacco-smoking as "offering incense to Satan." The Rabbis, however, discussed the use of tobacco not from a moral, but from a legal standpoint—concerning its prohibition on Sabbaths, holy days, and fast-days, and as to whether smoking requires a special benediction. As a subject of controversy it appears first in the "Keneset ha-Gedolah" of R. Ḥayyim Benveniste (1603-73) and the "Magen Abraham" of Abraham Gombiner (1635-83), which fact tends to show that during the seventeenth century the practise of tobacco-smoking spread rapidly among the Jews of all nations.



Spoils of the Temple, Pictured on the Arch of Titus.
(After Bartoli's "Admiranda.")

In Jewish Law.

Gombiner describes the "drinking of tabak through a pipe by drawing the smoke into the mouth and discharging it." The rabbi is in doubt whether or not one must pronounce a benediction before inhaling the smoke, since it is a means of refreshment. As an argument against pronouncing a blessing he observes that there is no "substance" in the benefit derived ("Magen Abraham," to Shulḥan 'Aruk, Oraḥ Ḥayyim, 210, 9). He prohibits smoking tobacco "through the mouth" on Passover, as he was informed that the tobacco was soaked in beer, which is "ḥameẓ" (*ib.* 343). Benveniste expresses himself very forcibly against smoking "ṭuṭun" (tobacco) on the Ninth of Ab; and he even excommunicated one who smoked on that day ("Keneset ha-Gedolah," to Oraḥ Ḥayyim, 551, 21). He points out the inconsistency of those authorities who permit smoking on holy days because it is a "necessity," a "means of sustaining life," and who allow it on fast-days because smoke has no "substance" like food. In Benveniste's opinion smoking should be prohibited on holy days; he quotes the venerable R. Joseph Escapa as coinciding in this view, though he thought it unwise to enforce a generally accepted law.

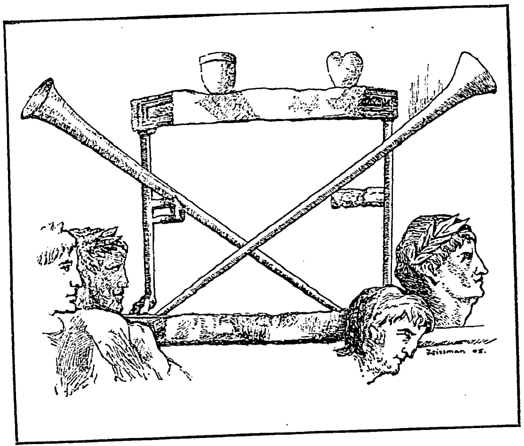


Table of Showbread, Pictured on the Arch of Titus.
(After Reland, "De Spoliis Templi," 1716.)

The Jews of Turkey at that time must have been very much addicted to the habit, for Benveniste pictures them as inveterate smokers, impatient for the close of Sabbath, when they might resume smoking, and as watching for the appearance of the three stars which indicate the end of the day; some began smoking even before "Habdalah." "They lingered

Tobacco-Lovers.

in the streets and public houses, every man with a censer in his hand, inhaling the smoke and discharging it in fantastic diffusion," until "a thick cloud of incense went up" (comp. Ezek. viii. 11). He declares that the Name of God is desecrated when the Gentiles observe Jews smoking on their fast-days, while Mohammedans refrain from smoking on theirs ("Keneset ha-Gedolah," *ib.* 567 [ed. Constantinople, 1729, pp. 101 *et seq.*]). Some Jews, unable to abstain from tobacco even for one day, filled a hooka with smoke on Friday and inhaled it on the Sabbath. Others would visit Mohammedan neighbors for the sake of the tobacco smoke in their houses. This practise was eventually prohibited on the ground that it would make Judaism ridiculous in the eyes of the Gentiles (Alkalai, "Zekor le-Abraham," i. 142-143, Salonica, 1798).

The Turkish narghile, in which the smoke passes through water, early became popular; Benveniste rules that the "tumbak" (cake of tobacco, over which a burning coal is placed at the other end of the narghile) extinguishes the fire, which is forbidden even on holy days. Gombiner prohibits tumbak because it is like "mugmar" (spice for burning), mentioned in the Talmud, which likewise is prohibited. This, however, is disputed by R. Mordecai ha-Levi in his "Darke No'am" (No. 9, Venice, 1698), who permits the use of the narghile on holy days (see "Be'er Heṭeb," to Shulḥan 'Aruk, Oraḥ Ḥayyim, 514, 1). The controversy finally ended in a victory for those rabbis who permitted the use of tobacco on holy days and fast-days, except of course on Yom Kippur, which is like Sabbath; still, some Jews still abstain from smoking on the Ninth of Ab.

Snuff.

In spite of some objections, snuff-taking was permitted at any time—Sabbaths, holy days, fast-days, and Yom Kippur ("Leḳeṭ ha-Ḳemaḥ," p. 51b, Amsterdam, 1707). Jacob Ḥaziz (1620–74) quotes a responsum of Isaiah Pinto permitting the use of snuff on Sabbaths, even though it cures catarrh; for everybody, even healthy people, snuff, and it can not therefore be considered a drug ("Halakot Ḳeṭannot," No. 101).

It appears that women used tobacco almost as much as men (see Elijah of Lublin, "Yad Eliyahu," responsum No. 65, Amsterdam, 1712). Jewish women in the Orient mostly used the narghile, while in Russia old women used snuff; others smoked cigarettes, like men. So prevalent was the habit of smoking that it was practised even in the bet ha-midrash. A strong effort, however, was made to prohibit smoking and snuffing in places of worship ("Paḥad Yiẓḥaḳ," ט, p. 62a). In some batte midrashot prohibitory notices were posted in front of the doors ("Ha-Maggid," 1859, vol. iii., No. 16).

In countries where the government had a monopoly of the tobacco trade, manufacturing and trading privileges were assigned to Jewish merchants at a fixed price per annum for a number of years. The question was raised whether the contractor had a prior right to the next contract as against the claims of a new competitor. Lampronti decided that contracts were open to competition, inasmuch as the matter depended on the laws and regulations of the government ("Paḥad Yiẓḥaḳ," א, p. 90a). Russian Jews have invented some practical cigarette-making machines for which they have obtained patents.

A remarkable book is Raphael Kohen's "Ḥuṭ ha-Meshullash" (Odessa, 1874), which deals with the question of cigar-smoking on Sabbaths, and which finally reaches the conclusion that it is permissible on the ground that it affords "'oneg shabbat" (delight and enjoyment). Not daring to publish his name, the author issued his book under a pseudonym. His discussion was not considered a serious one; nevertheless it is of a kind unusual in Hebrew literature.

There are several Hebrew poems for and against smoking. Solomon Wilder of Amsterdam composed one in acceptance of a tobacco-pipe as a birthday present ("Ha-Karmel," 1862, vol. ii., No. 20). Another poem characterizes the cigar and cigarette as "the two tails of these smoking firebrands" (Isa. vii. 4; see "Ha-Boḳer Or," i. 123).

J. J. D. E.

TOBIA BEN MOSES HA-ABEL (surnamed also **Ha-'Obed** = "the worshiper," **Ha-Baḳi** = "the erudite," **Ha-Maskil** = "the teacher," and **Ha-Ma'tiḳ** = "the translator"): Karaite scholar, Biblical commentator, liturgical poet, and translator; flourished at Constantinople in the eleventh and twelfth centuries. Fürst ("Gesch. des Karäert." ii. 198 *et seq.*) conjectures Tobia's dates to have been about 1070 to 1140; but it will be seen later that he was born earlier (see also Steinschneider, "Hebr. Uebers." p. 457). Tobia's last three surnames indicate the range of his erudition and literary activity; indeed, his works themselves show his thorough knowledge of rabbinics, philosophy, and theology.

Epoch and Attainments.

He moreover went to Jerusalem, where he studied for some time under Jeshua b. Judah, and where he became acquainted with the Arabic writings of the latter as well as with those of Joseph b. Abraham ha-Ro'eh, afterward translating into Hebrew many of the works of both. In one of his books, entitled "Yehi Me'orot," Tobia declares that he was a propagandist of Karaism, owing to which he suffered many persecutions from his own family as well as from his opponents. But, he says, when one is fully convinced of the truth he must regard neither family nor his own life. It would thus appear that Tobia was of a Rabbinite family and that through studying Karaite works he became an adherent of Karaism, in consequence of which his family turned against him. Possibly the writings of no other scholar were the subject of so much dispute as those of Tobia ben Moses. The following is a list of them as may be gathered from various sources:

(1) "Yehi Me'orot," a work on the commandments, so called after the opening sentence; it is called also "Sefer ha-Mizwot." Firkovich ascribed it to Judah Hadassi; but Aaron b. Joseph in

his "Mibḥar" (on Emor) and Elijah Bashyaẓi in his "Adderet Eliyahu" clearly show Tobia to have been its author. The earliest Rabbinite authority quoted therein is Hai b. David, whose anti-Karaite work with regard to the Rabbinite calendar is repeated; then comes Saadia, many of whose anti-Karaite passages are repeated and refuted; and of Saadia's successors may be mentioned Tobiah b. Eliezer ("Leḳaḥ Ṭob"). It may be concluded from the latter's work that Tobia wrote the "Yehi Me'orot" not earlier than 1100.

Works.

(2) "Zot ha-Torah," commentary on the Pentateuch, a manuscript of which was found in the library of Eupatoria (Kozlov), but was lost during the Crimean war of 1853–56.

Another important work by Tobia was (3) "Oẓar Neḥmad," described by Simḥah Luzki ("Oraḥ Ẓaddiḳim," p. 22b) as in two parts, the first treating of lawful and forbidden foods, and the second of the laws regarding cleanness and uncleanness. In reality this work deals with all the laws contained in Leviticus, as appears from Bashyaẓi (*l.c.* pp. 41d, 43b). The author quotes all the Karaite Biblical commentators; and he particularly refutes the doctrines of Meshwi al-'Ukbari, or Moses of Baalbek, whom he declares to have embraced Christianity toward the end of his life. The main authority upon whom the work is based is David b. Boaz ha-Nasi. Besides Simḥah Luzki (*l.c.*), who asserts that the "Oẓar Neḥmad" was the work of Tobia, Delmedigo ("Nobelot Ḥokmah," p. 56a, Basel, 1631) and Aaron b. Joseph (in his "Sefer ha-Miẓwot," quoted by Mordecai b. Nissan in his "Dod Mordekai") ascribe it to him. Pinsker ("Liḳḳuṭe Ḳadmoniyyot," Appendix, pp. 93–94), however, thinks that the work belongs to Jeshua b. Judah, as is indicated by Bashyaẓi (*l.c.*), and that as Tobia translated this work from Arabic into Hebrew, Luzki mistook him for its author. It must be said, however, that Luzki distinguishes between the "Oẓar Neḥmad" of Tobia and Jeshua's work which bears the same title and which was actually translated by Tobia.

Other works by Tobia were: (4) "Teshubat ha-'Iḳḳar" (Eupatoria, 1834), which, according to Fürst (*l.c.*), is a compendium of Jeshua's "Kitab al-'Arayot" (but see Steinschneider, *l.c.* p. 943). In the introduction the author speaks of the four kinds of intellect ("da'at"), termed in Hebrew "sekel," "ḥokmah," "tushiyyah," and "binah"; he then gives the rules for exegesis, the thirteen hermeneutic rules ("middot") of R. Ishmael, and the twelve of the Greeks. (5) Religio-philosophical questions ("she'elot") addressed to his teacher Jeshua b. Judah in Jerusalem (see Judah Hadassi, "Eshkol ha-Kofer," p. 76a). (6) Addition ("tosafah") to Joseph ha-Ro'eh's "Kitab al-Manṣuri," which he translated into Hebrew under the title "Maḥkimat Peti."

Translations.

Tobia's surname "Ha-Ma'tiḳ" shows his great activity in translating. Steinschneider (*l.c.* p. 457) supposes that this activity began about the middle of the eleventh century; Tobia would then be the first known translator from Arabic into Hebrew. Fürst enumerates the following thirteen works of Joseph ha-Ro'eh and five of Jeshua b. Judah which were translated by Tobia: (1) "Kitab al-Ṣiḥḥah"; (2) "Kitab al-Shira'"; (3) "Kitab al-'Arayot"; (4) "Kitab al-Tauḥid," which Steinschneider supposes to be a mistake for "al-Tamyiz"; (5) "Kitab al-Siraj" under the Hebrew title "Sefer ha-Ma'or" or "Sefer ha-Me'orot" or "Sefer ha-Urim"; (6) a work on "Abib" written against Saadia; (7) one on feasts under the Hebrew title "Sefer ha-Mo'adim"; (8) "Kitab al-Manṣuri" under the Hebrew title "Maḥkimat Peti" (see above); (9) "Kitab al-Rudd 'Ala Abi Ghalib Thabit"; (10) "Aḥwal al-Fa'il"; (11) "Ẓidduḳ ha-Din"; (12) "Al-Muḥtawi," in Hebrew "Sefer ha-Ne'imot" or "Zikron ha-Datot"; (13) "Masa'il wa-Jawa'ib," in Hebrew "She'elot u-Teshubot." Jeshua's works translated by Tobia were: (1) the first part of his religious philosophy, under the Hebrew title "Marpe la-'Eẓem"; (2) "Meshibat Nefesh"; (3) "Oẓar Neḥmad"; (4) a work on speculation under the Hebrew title "Sefer ha-Ra'yon"; (5) Jeshua's completion of Joseph's "Al-Muḥtawi." Fürst, however, omits mention of (6) Jeshua's commentary on the Decalogue translated by Tobia under the title "Pitron 'Aseret ha-Debarim" (see P. Frankl in "Monatsschrift," xxix. 472).

The "Ḥazanya" (old Karaite ritual) contains two piyyuṭim by Tobia: one beginning "Elohenu mi-kol ummah ahabtanu," arranged in alphabetical order, and signed "Tobia b. Moses Ḥazaḳ"; the other beginning "Esh'alah me-El," and being an acrostic on "Ṭobia b. Moses ha-'Obed." The "Siddur ha-Ḳara'im" (iv. 88) also contains a piyyuṭ by Tobia. It may be added that Firkovich, in a note to Gottlober's "Biḳḳoret le-Toledot ha-Ḳara'im" (p. 169), distinguishes between Tobia ha-Baḳi, the author of "Zot ha-Torah" and of a metrical piyyuṭ beginning "Ṭahor 'en sefatai tiftaḥ," and Tobia ha-'Obed, the former having lived about a century earlier than the latter. Firkovich thinks that Tobia ha-'Obed was a descendant of Tobia ha-Baḳi and was the author of "Zot ha-Ḥayyah," a work on clean and unclean animals. Still, Firkovich, in a letter to Pinsker ("Liḳḳuṭe Ḳadmoniyyot," Appendix, p. 94, note 1), contradicts himself in this matter.

E. C. M. Sel.

TOBIADS: Jewish party in the Maccabean period. A combination of the statements of Josephus ("Ant." xii. 4, §§ 1–11) and of II Macc. iii. 11 yields an interesting family history, which, however, requires critical examination.

During the reign of the Egyptian king Ptolemy and his wife Cleopatra, the high priest Onias, who was feeble-minded and extremely miserly, refused to pay the Jewish tribute of twenty talents which his father, Simon the Just, had always given from his own means. In his anger the king sent Athenion as a special envoy to Jerusalem, threatening to seize the land of the Jews and to hold it by force of arms if the money was not forthcoming. Although the high priest disregarded this threat, the people were greatly excited, whereupon Onias' nephew Joseph, a son of Tobias and a man greatly beloved and respected for his wisdom and piety, reproached his uncle for bringing disaster upon the people, declaring, moreover, that Onias ruled the Jews and held the high-priestly office solely for the sake of gain. He told him, furthermore, that he ought at all events to go to the king and petition him to remit the tribute-money, or at least a part of it. Onias, on the other hand, replied that he did not wish to rule, and expressed himself as willing to resign the high-priesthood, although he refused to petition the king. He permitted Joseph, however, to go to Ptolemy, and also to speak to the people. Joseph quieted the Jews, and received the envoy hospitably in his own house, besides giving him costly presents, so that, when Athenion returned to Alexandria, he informed the king of the coming of Joseph, whom he styled the ruler (προστάτης) of the people. Shortly afterward Joseph started on his journey, having first raised a loan of about 20,000 drachmæ in Samaria, although he was obliged to submit to the jeers of prominent men of Syria and Phenicia, who were visiting Alexandria in order to farm the taxes, and who derided him on account of his insignificant appearance.

Relations with Alexandria.

Not finding Ptolemy at Alexandria, Joseph went to meet him at Memphis, where the king graciously granted him a seat in his own chariot, together with the queen and Athenion. His cleverness won for him the monarch's friendship; and by his offer of 16,000 talents against the 8,000 bid by his opponents he secured the contract for farming the taxes, the king and queen becoming his sureties, since he did not have sufficient ready money. He left Alexandria with 500 talents and 2,000 soldiers, and by punishing all who opposed him in Ashkelon and Scythopolis and confiscating their estates, he made himself feared through all the cities of Syria and Phenicia, while the great fortune which his extortions won was held secure by his continual presents to the king, queen, and courtiers, so that he retained his office of tax-farmer until his death, twenty-two years later. By his first wife Joseph had seven sons. At Alexandria he became infatuated with a dancer, for whom his brother Solymius, who lived in the city, substituted his own daughter, the child of this union being Hyrcanus, who was his father's favorite son and consequently the object of his brothers' enmity.

On the birth of a prince, Joseph feeling too old to visit Alexandria and his other sons likewise declining to go, sent Hyrcanus to bear his congratulations to the court. Arion, Joseph's representative in Alexandria, however, refused to allow Hyrcanus money, and the latter accordingly put him in chains, not only escaping punishment from the king, but even winning both his favor and that of the courtiers, whose aid his brothers had secretly invoked against him. Although the king sent letters recommending him warmly to his father, his brothers, and the officials of Cœle-Syria, the other sons of Joseph met him with armed resistance. He defeated them, however, and killed two of them; but, being unable to remain in Jerusalem, he crossed the Jordan, and in the vicinity of Heshbon built the castle of Tyre, carrying on war with the Arabs, and ruling the district east of the Jordan during the entire seven years of Seleucus IV. The following statement is made by Josephus ("Ant." xii. 4, § 10): "And Hyrcanus' father, Joseph, died. He was a good man, and of great magnanimity, and brought the Jews out of a state of poverty and meanness to one that was more splendid. He retained the farming of the taxes of Syria, and Phenicia, and Samaria twenty-two years. His uncle, Onias, also died, and left the high-priesthood to his son Simon." This statement of Josephus is followed by the correspondence between Onias and King Areus of Sparta, and by an account of the Jewish disturbances due to feuds after the death of Joseph, when the Tobiads became involved in a civil war. The majority of the people, as well as Simeon the high priest, however, sided with the elder brother, and Hyrcanus did not return to Jerusalem, but continued his warfare against the Arabs. Both for his own comfort, and also as a safeguard against attacks by his brothers, he built the castle of Tyre and various other strongholds, ruling there until the death of Seleucus IV. Ptolemy Epiphanes also died, leaving two young sons; but when Hyrcanus saw that Antiochus Epiphanes, the new king of Syria, possessed great power, and when he realized that he would be unable to vindicate himself for his murderous attacks upon the Arabs, he committed suicide, and his property was seized by Antiochus.

The Two Accounts.

It is clear, therefore, that there are here two accounts, both legendary, the hero of the one being Joseph, and of the other, Hyrcanus. The history of the earlier years of the father closely resembles that of the son; in both cases the ambitious youth is opposed by the miserly parent, and in both cases the youth succeeds in putting his competitors to shame before the royal court. The narrative is suspicious in many respects. Onias angers the king, but Joseph travels to the court both to assuage the king's anger and to farm the taxes, while the sanguinary battle between Hyrcanus and his brothers is also obscure. The most serious difficulty, however, is the chronology. An old interpolator of Josephus advanced the opinion that the king mentioned in the story was Ptolemy III.; but this monarch was not the consort of Cleopatra, nor was his immediate successor Seleucus IV. The only ruler to whom the narrative can properly refer is Ptolemy V., Epiphanes (205–182), who in 193 married Cleopatra, the daughter of Antiochus III. In that case, however, Joseph could not have farmed the Egyptian taxes, since Cœle-Syria was then under Syrian, and not under Egyptian, suzerainty, while the assertion that the two powers had divided the revenues of the country is merely an attempt on the part of Josephus to evade the difficulty. Nor was the period between Ptolemy V.'s marriage (193) and his death (182) sufficiently long to agree with the statement concerning the length of time during which Joseph farmed the taxes (twenty-two years), and still less could Hyrcanus have reached manhood in so short a space. Büchler, therefore, finds himself compelled to place Joseph's term of office between 219 and 199, although this stultifies the statement of Josephus regarding a division of the taxes.

Modern Views.

Wellhausen accordingly denies both the historicity and the value of the narrative, although he thinks that the portion dealing with the period of Seleucus IV. and Antiochus IV. may be trustworthy, and he regards the suicide of Hyrcanus as probable, since the latter supported the Ptolemies against the new régime of the Syrians, and might consequently fear the revenge of Antiochus IV. II Macc. iii. 11 mentions money deposited by Hyrcanus, the son of Tobias, "a man of great dignity," taking it for granted that a friendship existed between Onias and Hyrcanus, a supposition which is very reasonable, since only the other Tobiads, the brothers of Hyrcanus, were involved in quarrels with the legitimate high priest. That Hyrcanus is called the son of Tobias, and not of Joseph, is due, Wellhausen holds, to mere abbreviation, and does not imply any divergency in the two accounts.

Willreich distinguishes a threefold tradition concerning the Tobiads, the first being that of the pseudo-Hecatæus (according to Willreich's interpretation), which represents Onias as a worthy man, and attributes to the Tobiads all the misfortunes which befell the Jews. The account of Josephus, on the other hand, which represents Onias as a weakling and the Tobiads as the promoters of Israel's welfare, is drawn from Samaritan sources. With this theory Büchler also agrees, thus explaining why Joseph sought aid in Samaria, and why the account fails to express disapproval of the non-Jewish conduct of Joseph, who ate at the court of an Egyptian king and had dealings with Gentiles. Willreich likewise brings the Tobiads into association both with Tobiah, the servant mentioned by Nehemiah as an Ammonite (ii. 19), who consequently came from the east-Jordanic district, and with the Tubieni (II Macc. xii. 17), who were the enemies of the Jews (comp. I Macc. v. 13). Although Willreich does not absolutely deny the historicity of the narrative, since the castle of Hyrcanus has been discovered in modern times (Schürer, "Gesch." 3d ed., ii. 49), he incorrectly regards Joseph and Hyrcanus as mere names, representing in part Jason and Menelaus, although such a view is quite untenable. The third form of the tradition is that of Jason of Cyrene, on which the second Book of the Maccabees is based; and Schlatter is even of the opinion that Josephus himself drew his account of the Tobiads from this same source.

Büchler's researches have probably established the historicity of the account of the Tobiads, thus furnishing a valuable contribution to the history of the period preceding the Maccabean revolt. The author of the first Book of the Maccabees makes no mention of these events because they added little credit to the fame of the Jews. The quarrels were factional ones, the issue being whether the old and popular government of the Ptolemies should continue, or whether the Jews should deliver themselves over to the Syrian kings and their Hellenization. When Jason and Menelaus struggled for the dominant power in Jerusalem, which was, according to Büchler, political office (the *προστασία* mentioned in the account of the Tobiads), and no longer the high-priesthood, the sons of Tobias (*οἱ Τωβίου παῖδες*) took sides with Menelaus (Josephus, "Ant." xii. 5, § 1; "B. J." i. 1, § 1); and Büchler justly regards the struggle between the Tobiads and the Oniads as a contest between Ptolemæan and Seleucid supremacy in Jerusalem. According to the same scholar, moreover, Menelaus and Jason themselves were Tobiads, although this is denied by Schürer. All scholars are agreed that many points of the Tobiad problem still await solution; and it is also a moot point whether a number of passages in Ecclesiasticus (Sirach) and one in the Assumptio Mosis (v. 3–6) refer to the Tobiads.

J. S. KR.

TOBIAH BEN ELIEZER: Talmudist and poet of the eleventh century; author of the "Leḳaḥ Ṭob" or "Pesiḳta Zuṭarta," a midrashic commentary on the Pentateuch and the Five Megillot. Zunz ("G. V." pp. 293 *et seq.*) inferred from Tobiah's reference to his father as "the great" and from his mention of the massacre in Mayence in 1096, that he was a native of Mayence and a son of ELIEZER B. ISAAC HA-GADOL, who is thought by Conforte ("Ḳore ha-Dorot," p. 8b) to have been one of Rashi's teachers. But as in the course of his work Tobiah often attacks the Karaites and, besides, manifests a thorough knowledge of Mohammedan customs, Rapoport, in his biography of Ḳalir, note 33 (in "Bikkure ha-'Ittim," x. 122–123), concluded that toward the end of his life Tobiah settled in Palestine. As to Tobiah's birthplace, it has been proved by Solomon Buber that he was a native of Castoria in Bulgaria, as is testified to by Tobiah's countryman Judah Leon Mosconi in his supercommentary on Ibn Ezra's commentary on the Pentateuch. According to him, the author of the commentary on the Pentateuch mentioned by Ibn Ezra in the preface to his own work was a certain Meïr of Castoria, a pupil of Tobiah b. Eliezer. On the other hand, in his commentary on Ecclesiastes, Tobiah mentions a R. Samson as his teacher; and Buber supposes that he may be identical with the Samson quoted by Rashi in his commentary on Isa. lviii. 14 and Amos vi. 3. It is also to be concluded from various dates given by Tobiah in the course of his work that he wrote it in 1097 and revised it in 1107 or 1108.

A Bulgarian.

Tobiah himself entitled his work "Leḳaḥ Ṭob" in allusion to his name Tobiah; and it is so cited by the earlier rabbis, *e.g.*, IBN EZRA (*l.c.*), Asheri in "Hilkot Tefillin," Zedekiah b. Abraham in "Shibbole ha-Leḳeṭ" (§ 118), and many others. Since the middle of the sixteenth century, however, it has been most often referred to as "Pesiḳta Zuṭarta" (= "the Lesser Pesiḳta") in distinction to the "Pesiḳta Rabbati" (= "the Greater Pesiḳta"). This second title was due to the fact that the editors of the part relating to Leviticus, Numbers, and Deuteronomy (Venice, 1546), found no title in the manuscript, but noted that every verse was headed 'פס (= "pisḳa"), and took it for granted that it was entitled "Pesiḳta." Consequently the rimed title which, Zunz (*l.c.*) thinks, was composed by the press-corrector Johanan Treves begins פסיקתא זוטרתא או רבתא (="Pesiḳta, be it small or great"). In the colophon the editors call it "Pesiḳta Zuṭarta." It was owing to the latter title that the "Leḳaḥ Ṭob" was confused with the Pesiḳta Rabbati by Gedaliah ibn Yaḥya ("Shalshelet ha-Ḳabbalah," p. 24b, Amsterdam, 1697), by Heilprin ("Seder ha-Dorot," i.), by Azariah dei Rossi ("Me'or 'Enayim," ch. xix.), and by others. The "Leḳaḥ Ṭob" is in reality half commentary and half haggadah, covering the whole Pentateuch and the Five Megillot. Every weekly lesson is introduced by a Biblical verse containing the word "ṭob." Moreover, in the text he very often says, "I, Tobiah b. Eliezer" or "Tobiah said." It is true that in the Jerusalem manuscript there occurs very often the expression "our teacher Tobiah b. Eliezer," from which it might be assumed that the "Leḳaḥ Ṭob" was written by Tobiah's pupils; but from a closer examination of the text, and to judge from the Florence manuscript, it is evident that the expression in question is merely a copyist's mistake.

The "Leḳaḥ Ṭob."

As has been said above, the "Leḳaḥ Ṭob" is both a simple commentary ("peshaṭ"), giving the grammatical meaning of the words, and very often a haggadic commentary also. But in many instances Tobiah declares that the standard interpretation is the simple one. Even in his haggadic interpretation, which he derives from the Talmud and from the pre-Talmudic and post-Talmudic literatures, Tobiah manifests his love of good style. He endeavors to arrange the various midrashim in perfect order and to edit them in few words and clear language. He therefore shortens the midrashic passages, and, instead of the Aramaic in which those passages were written, renders them into good Hebrew, omitting also the foreign words which occur in the midrashim. In the parts of the Pentateuch which deal with the commandments he inserts many halakot, apparently taken from various halakic collections, particularly from Aḥai Gaon's "She'eltot." The Talmudic passages which he cites in connection with the halakot he often interprets according to his own judgment and differently from Rashi.

Characteristics and Sources.

Throughout the whole commentary Tobiah shows his thorough knowledge of Hebrew grammar and his acquaintance with the works of the earlier grammarians. Incidentally it may be remarked that he seems to have held the opinion that the Hebrew roots are not necessarily triliteral. In certain places he interprets a Biblical word as though it were a mishnaic or Talmudic one. He considers there is not a letter too many or too few in the whole Pentateuch; and he bases many of his haggadic interpretations on the "ḳeri" and "ketib." One of the main features of his commentary is the allegorical interpretation of all the Biblical passages which speak of God as a corporeal being. He likewise considers that the expressions in R. Ishmael's "Hekalot" must be taken figuratively (see "Leḳaḥ Ṭob" on Deut. iv. 12). In many places he refutes assertions of the Karaites, though he does not expressly name their authors. Like many other Biblical commentators, he translates certain words into the language of the country ("la'az") in which he is living, namely, Greek.

Tobiah seldom mentions the sources for his commentary; but they are found to be as follows: Targum of Onḳelos; Baraita of R. Ishmael; Baraita of R. Eliezer ben Jose ha-Gelili; Sifra; Sifre; Mekilta; Seder 'Olam; "Sefer Yeẓirah"; both Talmudim; Genesis Rabbah; a midrash on the blessing of Jacob (Jellinek, "B. H." iii. 73 *et seq.*); Leviticus Rabbah; midrash on the Five Megillot; Tanḥuma; Yelammedenu; Pirḳe de-Rabbi Eli'ezer; Baraita di-Meleket ha-Mishkan; Agadat Mashiaḥ; "Hekalot" of R. Ishmael; "Sefer ha-Yashar"; Midrash Abkir; Midrash Hashkem; and many other midrashim. It seems that he utilized the "She'eltot" of R. Aḥai, the "Halakot Gedolot," and the "Yosippon." He quotes also Eleazar ha-Ḳalir, Saadia, Hai Gaon, Shabbethai Donnolo, Ben Asher, Ben Naphtali, and his teacher R. Samson, while he cites passages from Menahem b. Saruḳ and Moses ha-Darshan without mentioning their names. Tobiah is in turn quoted by those of Rashi's pupils who redacted the "Liḳḳuṭe ha-Pardes," and by the following: Menahem b. Solomon in his "Sekel Ṭob"; Jacob Tam in his "Sefer ha-Yashar"; RaSHBaM in his commentary on the Pentateuch; Ibn Ezra (see above); Tobiah b. Moses the Karaite in his "Yehi Me'orot"; Isaac b. Abba Mari in his "Sefer ha-'Iṭṭur"; Isaac b. Moses in his "Or Zarua'"; Zedekiah b. Abraham (see above); Judah b. Eliezer in his "Minḥat Yehudah"; Eliezer b. Nathan in his piyyuṭ "Lel Shimmurim"; and numerous later Biblical commentators, halakists, and casuists. It will thus be seen that the "Leḳaḥ Ṭob" was considered as an authority by the German, French, and Italian, but not by the earlier Spanish, scholars. Of the latter Ibn Ezra alone mentions it, disparagingly. But later Spanish authorities who, after the expulsion, settled in the East considered the "Leḳaḥ Ṭob" as the chief source for their works.

As has been said above, only that part of Tobiah's work covering Leviticus, Numbers, and Deuteronomy was edited in Venice, 1546. The same part was afterward reedited with a Latin translation under the title "Pesiḳta" by Ugolino in his "Thesaurus Antiquitatum Sacrarum" (xv.-xvi.); and was subsequently republished by Aaron Moses Padua under the title "Midrash Leḳaḥ Ṭob" (Wilna, 1880), with a short commentary or "bi'ur." Four years later the part comprising Genesis and Exodus was published, also under the title "Midrash Leḳaḥ Ṭob," by Solomon Buber (Wilna, 1884), who added a long introduction and copious notes. The part covering the Five Megillot is not yet printed; but extracts were published by Jellinek in 1855. The commentary on Lamentations was edited by Nacht ("Tobiah b. Eliezer's Commentar zu Threni," Frankfort-on-the-Main, 1895), and that on Ruth by Bamberger (Mayence, 1887).

Tobiah is known as a Hebrew poet through four poems of his which are still extant. One is an introduction to his commentary on Genesis, another is an epilogue to the same, both being acrostics on "Tobiah bar Eliezer Ḥazaḳ"; a third is a short acrostic on "Tobiah," forming an epilogue to Leviticus; and the remaining one is a "seliḥah" beginning "Ehyeh asher Ehyeh," the verses being arranged in alphabetical order, and signed "Tobiah b. Eliezer Ḥazaḳ." The last-cited poem has been published by Buber at the end of his introduction to the "Leḳaḥ Ṭob."

S. M. SEL.

TOBIAH BEN ELIJAH OF VIENNE (BURGUNDY) (called also **Tobias of Burgundy** or simply **R. Tobias**): French tosafist of the thirteenth century. He was a younger contemporary, and perhaps also a pupil, of Isaac ben Abraham of Dampierre, at whose funeral he was present in 1210. Authors of the thirteenth and fourteenth centuries speak of Tobiah as a very prominent teacher of the Law; and he is known also as a Bible commentator and liturgical poet. It seems that he wrote a highly important casuistic work, from which the many decisions quoted in his name were taken. His pupil Abraham ben Ephraim often refers, in his "Sefer ha-Miẓwot," to Tobiah as an authority.

Tobiah is quoted in the Tosafot (B. Ḳ. 69b), several times in "Mordekai," in the "Shibbole ha-Leḳeṭ," and in "Tashbez." His religious poetry, inspired by the persecutions of his coreligionists, consists of "seliḥot," included in a Burgundian Maḥzor. They are impressive in style, and show mastery of form. It appears from a passage in a Cambridge manuscript that Jehiel of Paris visited Tobiah on his journey to Palestine in 1260.

TOBIAS, EMIL. See THOMAS, EMILE.

TOBIT, BOOK OF: A late Jewish work, never received into the Jewish canon, and included in the Apocrypha by Protestants, although it was pronounced canonical by the Council of Carthage (397) and the Council of Trent (1546). It takes its name from the central figure, called Τωβείτ (Τωβίτ, Τωβείθ) in Greek, and Ṭobi (טובי) in a late Hebrew manuscript.

Outline of the Story.

The story of the book is as follows: Tobit, a pious man of the tribe of Naphtali, who remained faithful to Jerusalem when his tribe fell away to Jeroboam's cult of the bull, was carried captive to Nineveh in the time of Enemessar (Shalmaneser), King of Assyria. There, together with his wife, Anna, and his son Tobias, he gave alms to the needy, and buried the outcast bodies of the slain, keeping himself pure, moreover, from the food of the Gentiles. He was in favor with the king, however, and so prosperous that he was able to deposit ten talents of silver in trust with a friend in Media. With the accession of Sennacherib (the successor of Enemessar) the situation changed. Accused of burying the dead slain by the king, he had to flee, and his property was confiscated; but when Sarchedonus (Esarhaddon) came to the throne Tobit was allowed to return to Nineveh at the intercession of his nephew Achiacharus (AHIḲAR), the king's chancellor. Here he continued his works of mercy; but, accidentally losing his eyesight, he fell into great poverty, so that in his dire distress he prayed that he might die. On that same day a similar prayer was offered by Sarah, the daughter of Raguel of Ecbatana (in Media), in despair because she had been married to seven husbands who had each been slain by a demon on the wedding night. The same day Tobit, remembering his deposit of money in Media, determined to send his son for it. A companion and guide (who turns out to be the angel Raphael) being found for him, the two proceeded on their journey. At the river Tigris, Tobit caught a fish and was instructed by his companion to preserve its heart, liver, and gall. Conducted to Raguel's house, he asked Sarah's hand in marriage, drove away the demon by burning the heart and liver of the fish in the bridal chamber, sent Raphael (whose assumed name was Azarias) for the money, and returned, with him and Sarah, to Nineveh, where Tobit's eyesight was restored by smearing his eyes with the fish's gall. Father, mother, and son reached a good old age (Tobias living to rejoice over the destruction of Nineveh), and died in peace. This brief outline does not do justice to the artistic construction of the story, or to the fine touches in its descriptions of family life, social customs, and individual experiences. It may be reckoned among the most delightful of short stories.

Text and Original Language.

The text exists in Greek, Latin, Syriac, and Judæo-Aramaic, besides two late Hebrew translations. Of the Greek there are three versions: one given in the Vatican and Alexandrian manuscripts of the Septuagint; one in the Sinaitic; and one in Codices 44, 106, 107 of Holmes and Parsons. Of the Latin there are two recensions: the Old Latin, which agrees substantially with the Sinaitic Septuagint; and the Vulgate, made by Jerome from an Aramaic text, which often agrees with it, although it presents many divergencies. The Syriac follows the Vatican in general, although it is by no means literal, while Codices 44, 106, 107 agree sometimes with this text, sometimes with that of the Sinaitic. The Aramaic text (published by Neubauer) also represents the Sinaitic recension in a general way, but is late, and can scarcely be considered the descendant of Jerome's original. The Hebrew copies are late and of no authority. The two chief Greek recensions are the earliest sources for the text of Tobit, though suggestions may be gained from the Latin and the Syriac. Of the Greek forms the Vatican is the shortest (except in ch. iv.); its style is rough and often incorrect, and it has many errors, frequently clerical in nature. The Sinaitic text is diffuse, but frequently gives the better readings. Both of them may depend on an earlier form which has been corrupted in the Vatican and expanded in the Sinaitic, although the question is a difficult one. Equally problematical is the determination of the original language of the book. The forms of the proper names, and such an expression as χάριν καὶ μορφήν (i. 13), which suggests חן וחסד

(Esth. ii. 17), may be held to point to Hebrew, as may also the type of piety portrayed, although it must be noted that there is no mention in early times of a Hebrew text, which Jerome would doubtless have used had he known of its existence. The Sinaitic forms "Ather" for "Asur" (xiv. 4) and "Athoureias" for "Asureias" (xiv. 15), on the other hand, are Aramaic. The excellent Greek style of the Sinaitic may suggest a Greek original. In view of the conflicting character of the data, it is best to reserve opinion as to the original language; the text appears to have suffered a number of revisions and misreadings.

Time and Place.

The picture of religious life given in Tobit (especially the devotion to ritual details) indicates a post-Ezran date for the book. The special significance attached to almsgiving (iv. 10; xii. 8, 9) is identical with the idea in Ecclus. (Sirach) iii. 30 (comp. also Prov. x. 2), and the injunction in iv. 17, "Pour out thy bread on the burial of the just, but give nothing to the wicked," is repeated in import in Ecclus. (Sirach) xii. 4–5. The prediction in xiv. 5 implies a period after the building of the Second Temple, and, apparently, before the commencement of Herod's Temple. The prominence given to the duty of burying the outcast slain (the survival of a very ancient conception) seems to point to a time when the Jews were slaughtered by foreign enemies, as, for example, by Antiochus or by Hadrian. The necessity of marrying within the kin was recognized during a long period and does not define the date precisely. Polycarp's saying ("Ad Phil." x.), "Almsgiving delivers from death," does not prove that he was acquainted with Tobit, since Prov. x. 2 may have been so understood by him. There is no Messianic hope expressed in the book. The more probable view is that it was composed between 200 and 50 B.C. If the original language was Hebrew, the place was Palestine; if Greek, it was Egypt; but this point, too, must be left undecided.

The reference in xiv. 10 to Achiacharus introduces new perplexities into the question of the origin of the book (see Ahiḳar). Here it need only be remarked that the reference is merely an illustration, showing acquaintance with an Ahiḳar story; the allusion is scarcely organically connected with the story of Tobit.

The original form of the book may have told simply how a pious man, doing his duty, came safe out of trouble. The episode of Sarah and Asmodeus appears to be a separate story, here skilfully combined with the other. The advisory discourses in iv. (much shortened in the Sinaitic text) and xii. look like the insertions of an editor. For the ethical tone see especially iv. 15, 16, and for the religious ideas, xii. 8. The book is to be compared with Proverbs, Ecclesiasticus (Sirach), Daniel, and Ecclesiastes.

T.

TOCKELS, MORDECAI BEN ABRAHAM (called also **Mordecai Lisser**): German Talmudist; born at Lissa; died in Berlin June 12, 1743. As a poor young man he went to Berlin, where he was adopted by a Frau Tockels, whose name he adopted in gratitude for her kindness. Tockels' first wife was the daughter of the chief of the Vienna exiles, Abraham ben Model Ries; his second, a daughter of the equally prominent Wolf ben Meshullam Salman. In 1723 Tockels was appointed dayyan; and in 1726 he was made assistant rabbi ("rosh bet din") under Chief Rabbi Michael Ḥasid. In 1729 he was chosen director of the ḥebra ḳaddisha, which office he held until his death.

Tockels was the author of "Torat Ḥayyim we-Ahabat Ḥesed," which was edited by his brother-in-law Abraham ben Meïr (Berlin, 1750, 1829).

TODESCO, HERMANN: Austrian financier and philanthropist; born at Presburg 1792; died there Nov. 23, 1844. At first engaging in the silk trade, he later won fame and wealth in the cotton business; and he established in Marienthal, near Vienna, one of the first cotton-mills worked by machinery. In 1835 he bought the state domain of Legnaro, near Padua, where he established a cotton-mill which became one of the most important of its kind in Europe.

Todesco's main activity, however, lay in philanthropy. At an expense of 25,000 gulden he established a primary and infant school in his native town in 1843, and its inaugural ceremonies, on May 7 of the following year, were attended by the archduchess Maria Dorothea. Todesco was also one of the principal founders of the Jewish hospital at Baden, near Vienna.

After his death his son **Eduard** became the head of the banking firm of Hermann Todesco's Sons, and was raised to the Austrian nobility in 1869. Among his philanthropies special mention may be made of his gift of 100,000 gulden in 1854, of which three-fifths went to the Erzherzog Albrecht Vorschussfund für Unbemittelte K. K. Offiziere, and the remainder was devoted to the establishment of a Speise-Anstalt für Arme Israelitische Studenten. His daughter was married in 1864 to Baron Henry de Worms (later Lord Pirbright).

Hermann's other son, **Moritz Ritter von Todesco,** who was an associate of the firm, died July 17, 1873, at the age of fifty-seven. Eduard's son **Hermann** (born 1850) died at Baszon, Veszprim, Hungary, June, 1876.

S.

TODROS OF BEAUCAIRE: 1 (called **Ha-Ḳazin**). One of the chief poets of the second half of the thirteenth century; resided in Montpellier. In 1277 he was one of the five representatives of the

Jewish community to which James II. of Aragon granted a synagogue for a long term of years in consideration of the payment of five Melgorian sous annually by the Jews of the city. Abraham Bedersi, who esteemed Todros highly, and considered him, together with Kalonymus ben Meïr of Arles and Kalonymus ben Todros of Narbonne, as one of the greatest men of his period, complained to him in bitter terms of the evil days in which they lived and of the low opinion held of poetry. Abraham also replied in verse to a poem which Todros addressed to him and which when read from left to right has an entirely different sense from that which it has when read from right to left.

Bibliography: Renan-Neubauer, *Les Rabbins Français*, pp. 712, 716; *R. E. J.* xix. 265, 273.

2. Rabbinical scholar of Montpellier at the beginning of the fourteenth century. He was one of the most devoted adherents of Abba Mari of Lunel during the period of religious polemics between 1303 and 1306, bitterly opposing all who studied science or philosophy. Despite the presence of Don Crescas Vidal of Perpignan, who was at Montpellier at the time, the fanaticism of Todros drove him to protest violently against the author (probably Moses ibn Tibbon) of a commentary on the Pentateuch which explained as allegories events recorded in the first five books of the Bible. Like Abba Mari, he did not hesitate to disregard the opposition of Jacob ben Machir, and to read publicly in the synagogue of Montpellier the letter addressed by fifteen rabbis of Barcelona, headed by Solomon ben Adret, to the Jewish community, in which the sentence of excommunication was pronounced against all who should devote themselves to the study of philosophy under the age of thirty. This rabbi is identified by Zunz and Gross with Todros ha-Ḳaẓin of Beaucaire.

Bibliography: Gross, *Gallia Judaica*, p. 329; Abba Mari, *Minḥat Ḳena'ot*, ed. Presburg, pp. 48, 61, 63; Renan-Neubauer, *Les Rabbins Français*, pp. 659, 663; Zunz, *Z. G.* p. 476.

S. S. K.

TODROS (or **TAUROS) OF CAVAILLON:** French physician of the latter part of the fourteenth century, who flourished, according to Carmoly, about 1375. He was the author of a treatise entitled "Sha'are ha-Harkabot" (MSS. Paris, No. 1191, 1; Cat. p. 219), a sort of pharmacopœia, written partly in Hebrew and partly in Latin. Carmoly states that Todros was appointed rabbi of Cavaillon by the "elders of the community," but gives no proof of his assertion. Todros is probably identical with the Maestro Toros de Cavaillon who was one of the five "baylons" or directors of the Jewish community of Avignon in 1440. See also Todros ben Moses Yom-Ṭob.

Bibliography: Carmoly, *Histoire des Médecins*, p. 108; Brüll, *Jahrb.* ix. 83; Gross, *Gallia Judaica*, p. 539; Renan-Neubauer, *Les Ecrivains Juifs Français*, p. 379; *R. E. J.* i. 273; Steinschneider, *Hebr. Uebers.* p. 783.

S. S. K.

TODROS BEN ISAAC: Talmudist; lived in Italy or in southern France in the latter part of the thirteenth century and the early part of the fourteenth. He was the author of novellæ on the Talmud treatise Nazir, which are still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 447). Todros concludes his work by saying that he composed it in 1322, a year in which the Jews were undergoing many persecutions. After the massacre of the lepers (see Jew. Encyc. v. 462 *et seq.*), followed by the outbreak of the Pastoureaux, the Talmud was burned, and the Roman emperor projected still other persecutions. According to Grätz, this Roman emperor was Frederick, the rival of Louis of Bavaria and an enemy of the Jews; and he also advances the theory that an allusion to the persecution mentioned by Todros is contained in an elegy which a certain Joab wrote on the burning of the Talmud and which is found in an Oxford manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1061; comp. idem in "Monatsschrift," 1872, p. 376).

Bibliography: Grätz, in *Monatsschrift*, 1886, p. 8; *idem*, in *J. Q. R.* ii. 104.

E. C. I. Br.

TODROS BEN KALONYMUS: French scholar and liturgical poet; lived at Narbonne in the first half of the twelfth century; son of Kalonymus the Great, who flourished at Narbonne in the eleventh century, and reached the age of eighty years, being renowned for his learning and the services which he rendered to his coreligionists. A war of succession between the city of Narbonne and the Count of Toulouse, which lasted nearly ten years, entailed much suffering on the Jews, then numbering about two thousand; and Todros gave his family in bondage for the special taxes which were imposed upon the Jews to meet the expenses of the war. He was the author of "Azharot," or liturgical poems. He had a son, **Kalonymus Nasi,** as well as a nephew, **Todros ben Moses,** who flourished at Narbonne about the middle of the twelfth century, and is probably identical with the Todros b. Moses who, together with other rabbis of Narbonne, signed a responsum written about 1150.

Bibliography: Gross, *Gallia Judaica*, pp. 406-407.

D. S. Man.

TODROS BEN MESHULLAM BEN DAVID (called also **Todros Todrosi**): Provençal translator; born at Arles in the early part of the fourteenth century. Of his life no details are known except that in 1337 he lived at Trinquetaille, where he completed his translation of Aristotle's "Rhetoric." Many hypotheses have been put forth to explain why Todros, in signing this translation, added to his name the words "mi-zera' ha-Yehudim" (= "of the seed of the Jews"), and affixed to the date "ḥeshbon ha-Yisra'elim" (= "chronology of the Israelites"), although it is possible that he feared that he might be confused with a relative of the same name who had embraced Christianity.

Todros made himself known by his Hebrew translations of Arabic philosophical works, these versions being as follows: (1) "'En Mishpaṭ ha-Derushim," a selection of philosophical aphorisms by Alfarabi (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1339, 2; also in many other libraries), which Todros translated when he was only twenty years of age; (2) "Haẓẓalat ha-Nefesh," a rendering of the physical and metaphysical sections of Avicenna's "Kitab al-Najah" (Cod. Paris, 1023, 4); (3) "Bi'ur," the Middle Commentary of Averroes on Aristotle's "Rhetoric" (*ib.* 932, 4; 933, 3; also in many other libraries); (4) "Bi'ur Sefer ha-Shir," the Middle Commentary of Averroes on Aristotle's "Poetics" (in many libraries); (5) the following three treatises of Averroes: refutation of Avicenna's system, which divided all things into the two categories of those whose existence is only possible of themselves while necessary as a result of the causes from which they proceed, and those whose existence is necessary of themselves; an essay on this system; and "Ma'amar be-Da'at ha-Ḳiddum," a treatise on the problem whether God knows the details concerning His creatures before they are created, and whether His creatures exist potentially before they are actually formed (in many libraries); (6) "Ma'amar be-Sekel ha-Hayulani," a fragment of the treatise of Averroes on the hylic intellect (Cod. Paris, 989, 2; 1023, 5).

Bibliography: Carmoly, *Biographie des Israélites de France*, p. 91; Gross, in *Monatsschrift*, 1880, p. 61; Steinschneider, *Hebr. Uebers.* pp. 62, 182, 197, 285, 294; idem, *Cat. Bodl.* cols. 2680–2683; Renan, *Averroes et Averroisme*, pp. 69–70.

J. I. Br.

TODROS BEN MOSES YOM-ṬOB (or **BONDIA**): French physician; flourished at Cavaillon in the second half of the fourteenth century; identified by Steinschneider with Todros of Cavaillon. In 1394 he prepared a Hebrew translation of a Latin treatise on fever by Johanan ibn Masuyah with a commentary by Peter of Spain. He likewise translated other works, the most important being the treatise of Arnold of Villeneuve on digestive and purgative medicines.

Bibliography: Renan-Neubauer, *Les Ecrivains Juifs Français*, p. 726; Steinschneider, *Hebr. Uebers.* p. 791.

S. S. K.

ṬOHOROT ("Purifications"): **1.** Name of the sixth and last order in the Mishnah and the Tosefta. "Ṭohorot" is a euphemism for uncleanness, all the treatises of this order dealing with the laws governing impurity. The order comprises twelve treatises, which, arranged according to the number of their chapters, are as follows: Kelim (30 chapters), Ohalot (18), Nega'im (14), Parah (12), Ṭohorot (10), Miḳwa'ot (10), Niddah (10), Makshirin (6), Zabim (5), Ṭebul Yom (4), Yadayim (4), 'Uḳẓin (3).

2. Treatise in the Mishnah and in the Tosefta, treating especially of the lesser degrees of uncleanness the effects of which last until sunset only. In most editions of the Mishnah it is the fifth treatise in the order Ṭohorot. It is divided into ten chapters, comprising ninety-six paragraphs in all. The contents may be summarized as follows:

Ch. i.: The thirteen regulations concerning the Nebelah of a bird, *i.e.*, a fowl not ritually slaughtered; what quantity of such fowl causes uncleanness as nebelah, and what quantity uncleanness merely as other unclean foods; which parts are not included to make up the minimum required quantity; from which moment a head of cattle not ritually slaughtered acquires a lesser degree of uncleanness, *i.e.*, that of ordinary foods, and when the higher degree of impurity, that of the nebelah; which parts are included in order to make up the minimum quantity for the lesser degree, but not for the higher degree (§§ 1–4); the mixing of different unclean foods to make up the required quantity—the size of an egg; cases in which, when the parts possess different degrees of impurity, the entire quantity becomes unclean either in the lesser or in the higher degree (§§ 5–6); parts of a mass of dough or a loaf of bread connected with or touching each other; how the uncleanness of one part affects the others (§§ 7–9).

Contents: Ch. i.-iv.

Ch. ii.: How foods become impure when touched by an unclean person (§ 1); how a person becomes unclean through partaking of impure food (§ 2); difference between foods not sanctified, those constituting "terumah" (see Heave-Offering), and other sanctified foods, as regards their becoming unclean in the various degrees (§§ 3–8).

Ch. iii.: Impurity of beverages when in a liquid state, and when they have solidified; which drinks acquire the same degree of uncleanness in the liquid as in the solid state (§§ 1–3); how unclean foods become clean by a change of the prescribed quantity (§ 4); the degree of uncleanness of a thing is judged from the condition in which it is found (§ 5); doubtful cases of uncleanness, when it is not known whether the unclean parts have been touched by the person in question; the difference between reasoning and unreasoning beings in such cases; cases in which it is doubtful whether an animal has transferred impurity from unclean drinks to foods (§§ 6–8).

Ch. iv.: Doubtful cases of impurity (§§ 1–4); six cases in which terumah is burned because of suspected impurity (§§ 5–6); doubtful cases of impurity in which the sages declared the object to be clean; other doubtful cases in which the sages declared the object to be permissible (§§ 7–12).

Ch. v.: Regulations concerning various cases of doubtful impurity.

Ch. vi.: Difference between private domain ("reshut ha-yaḥid") and public domain ("reshut ha-rabbim") with reference to cases of doubtful impurity: in the former in all doubtful cases objects are to be declared unclean; in the latter, clean (§§ 1–5); different localities which are considered private domain with reference to the Sabbath, but public domain with regard to cases of doubtful impurity (§§ 6–10).

Ch. v.-x.

Ch. vii.: Various cases in which a thing is rendered unclean by being touched by a person ignorant of the law ("'am ha-areẓ"): as such a person does not observe the laws of cleanliness, his touch is necessarily unclean. Cases in which one must suspect an 'am ha-areẓ of having touched foods and drinks, although he, personally, may have had nothing to do with them. If, for example, the wife of an 'am ha-areẓ is seen to attend to the fire in a stove on which a pot containing terumah is standing, it must be assumed that she, although attending to the fire only, has touched the food also; women being generally curious to find out what their neighbors are cooking, she would most likely remove the cover of the pot in order to discover the contents.

Ch. viii.: Further regulations concerning precautions to be taken by one conversant with the Law ("ḥaber") in order to protect himself against uncleanness caused by the touch of an 'am ha-areẓ

(§§ 1-5); what is to be considered fit for human food, thus forming a basis for the regulations concerning the impurity of foods (§ 6); further regulations concerning the impurity of beverages (§§ 7-9).

Ch. ix.-x.: Concerning olives and the pressing of oil; how they can be rendered unclean. Other regulations concerning cleanness and uncleanness, with special reference to wine-presses.

The Tosefta to this treatise is divided into eleven chapters, and contains many passages elucidating the mishnaic treatise.

W. B. J. Z. L.

TOKAḤAH ("admonition," "malediction"): The term used to connote the prediction by Moses of due punishment in case of disobedience of the divine law on the part of the children of Israel. It was first pronounced in Lev. xxvi., and repeated in Deut. xxviii., the blessings for obedience to the Law being cited first in both passages. According to the Midrash (Deut. R. i. 4), R. Aḥa b. Ḥanina declared that the tokaḥah should, strictly speaking, have been pronounced by Balaam and the blessings by Moses, but this order had been reversed that the Gentiles might learn the blessings through their prophet Balaam, and that the children of Israel might not question the motive of the tokaḥah when given by their friend Moses. The Mishnah terms the tokaḥah "ḳelalot" (= "curses"), in contradistinction to "berakot" (= "blessings"), both being read together on public fast-days, and the whole chapter being assigned to one person (Meg. iii. 6). R. Ḥiyya b. Gammada quoted the verse "Despise not the chastening of the Lord; neither be weary of his correction" (Prov. iii. 11) as a reason for insisting that the reading be continuous and not in sections, while R. Jose b. Abin interpreted it as implying that the portions read in public must be so arranged that each passage should begin and end with a cheerful verse (Yer. *ib.*).

Later custom, however, forbade any subdivision of either version of the tokaḥah (Shulḥan 'Aruk, Oraḥ Ḥayyim, 428, 6). The order of reading the sidra "Beḥuḳḳotai" for the third person called up to the Law is Lev. xxvi. 10-46, and that of "Ki Tabo," for the sixth, is Deut. xxviii. 7-69, both these sections beginning and ending with "good" verses, with the tokaḥah between them. The Ashkenazim do not call up by name the person to whom the tokaḥah is assigned at the public reading in the synagogue; the Sephardim do, although they permit him to read the tokaḥah by himself instead of through the "ba'al ḳore," or public reader. In some congregations the passage was assigned to an "'am ha-areẓ," who did not understand the meaning of the text; hence the reading of the tokaḥah became a sort of reproach, so that many declined to read it when called up to do so. To remedy this disrespect for a portion of the Torah, the ḥakam or rabbi then volunteered to read the passage. In Yiddish parlance, "to lay the tokaḥah on him" means to curse one with all the contents of the tokaḥah.

W. B. J. D. E.

TOLA: **1.** A son of Issachar who had journeyed to Egypt with Jacob (Gen. xlvi. 13). In the census of the people made by Moses and the high priest Eleazar after the plague the Tolaites appear as a tribe (Num. xxvi. 23), and during the reign of David they could put 22,600 warriors in the field (I Chron. vii. 2).

2. The son of Puah. He became judge in Israel after the death of Abimelech. He dwelt in Shamir in the plateau of Ephraim, apparently residing in the extreme northern portion near the borders of Issachar. He was judge for twenty-three years, and was buried in his native city of Shamir (Judges x. 1-2).

E. G. H. S. O.

TOLEDANO (or **DE TOLEDO**): A family taking its name from Toledo, the city in which it originated, and including printers, Talmudic scholars, rabbis, and diplomats in Turkey, Africa, Holland, and England, being still represented in Salonica, Jerusalem, Tiberias, and elsewhere. Its most important members are as follows:

Aaron de Toledo: Author of religious lectures which appeared at Salonica in 1795 under the title "Dibre Ḥefeẓ."

BIBLIOGRAPHY: Conforte, *Ḳore ha-Dorot*, p. 46a; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 759.

Abraham Toledano: Rabbi in Salonica about 1640; a contemporary of Shabbethai Jonah, with whom he corresponded.

Abraham de Toledo: Author of "Coplas de Joseph ha-Ẓaddiḳ. This work was written in Judæo-Spanish and published at Constantinople in 1732.

Daniel Toledano: Born at Miquenes; a friend of R. Jacob Sasportas. He was thoroughly versed in the Talmud, possessed a considerable knowledge of statesmanship, and acted as councilor to Sultan Muley Ismail.

BIBLIOGRAPHY: Grätz, *Gesch.* x. 259.

Eliezer Toledano: A scholar who went from Toledo to Lisbon, where he established a printing-house from which he issued the following works between 1489 and 1492: an edition of the Pentateuch with the commentary of Naḥmanides, David Abudarham's work on the ritual, Isaiah and Jeremiah with the commentary of Ḳimḥi, Proverbs with the commentary "Kab we-Naḳi," and the "Halikot 'Olam," but neither the "Ṭur Oraḥ Ḥayyim" nor any treatise on the Talmud was issued from his press, despite statements to the contrary. Don Judah Gedaliah (not Yaḥya), who was employed in Eliezer Toledano's printing-office, later established a press at Salonica (not Constantinople) with type brought from Lisbon.

BIBLIOGRAPHY: Ersch and Gruber, *Encyc.* section ii., part 28, p. 37; Kayserling, *Gesch. der Juden in Portugal*, p. 89; Nehama, *Miktebe Dodim*, p. 162; see also JEW. ENCYC. viii. 107.

Eliezer de Toledo: Rabbi at Costa, where he died in 1848. He was the author of the collection of responsa entitled "Mishnat R. Eli'ezer" (2 vols., Salonica, 1853).

BIBLIOGRAPHY: Jellinek, *Ḳonṭres ha-Maspid*, p. 7.

Ḥabib Toledano: Son of Eliezer, and brother of Abraham and Jonah Toledano; born at Miquenes, where he suffered great hardships throughout his life. He was the author of the "Derek Emunah," a commentary on the Passover Haggadah, which was published, together with the commentaries of Rashi, Samuel ben Meïr, and Yom-Ṭob Ishbili, under the title "Peh Yesharim" (Leghorn, 1838), while his apologetic work, "Terumat ha-Ḳodesh" (*ib.* 1866), is chiefly devoted to a criticism of REGGIO.

BIBLIOGRAPHY: Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 112, 114, which also contains Habib Toledano's genealogical tree of his family; Steinschneider, *Hebr. Bibl.* xiii. 54.

Ḥayyim Toledano: Brother of Joseph Toledano. About 1700 he was appointed ambassador to Holland and England by Sultan Muley Ismail of Morocco.

BIBLIOGRAPHY: Grätz, *Gesch.* x. 260.

Ḥayyim de Toledo: Lived at Salonica, where he published his "Ḥayyim Medabber," a collection of commentaries on legal codes and rulings (Salonica, 1818).

Isaac Toledano: A contemporary of Elijah Mizraḥi and Tam Yaḥya; lived at Brusa about 1530.

BIBLIOGRAPHY: Zunz, *Z. G.* p. 440.

Isaac Toledano: Rabbi at Salonica; died there in Nov., 1683. He was the teacher of R. Joseph David, who delivered a funeral oration in his honor.

Isaac ben Joseph Toledano: Rabbi in Salonica; died Aug., 1713.

Jacob Toledano: Correspondent of Elijah Mizraḥi; lived at Salonica about 1510. Another **Jacob Toledano**—possibly the one that sent to Azulai the manuscript treatises which the latter printed at Leghorn in 1805—was dayyan, together with his brother Ḥayyim, at Miquenes in 1748.

BIBLIOGRAPHY: Zunz, *Z. G.* p. 441; Steinschneider, *Verzeichnis der Hebräischen Handschriften der Königlichen Bibliothek in Berlin*, Nos. 56, 66; the latter work also mentions other members of the Toledano family, chiefly those living at Miquenes.

Joseph Toledano: Son of Daniel, and brother of the ambassador Ḥayyim Toledano. Muley Ismail, the Sultan of Morocco, who had received valuable assistance from Joseph on his accession to the throne of Muley Mohammed, sent him to The Hague to conclude treaties of reciprocity regarding peace, navigation, and commerce.

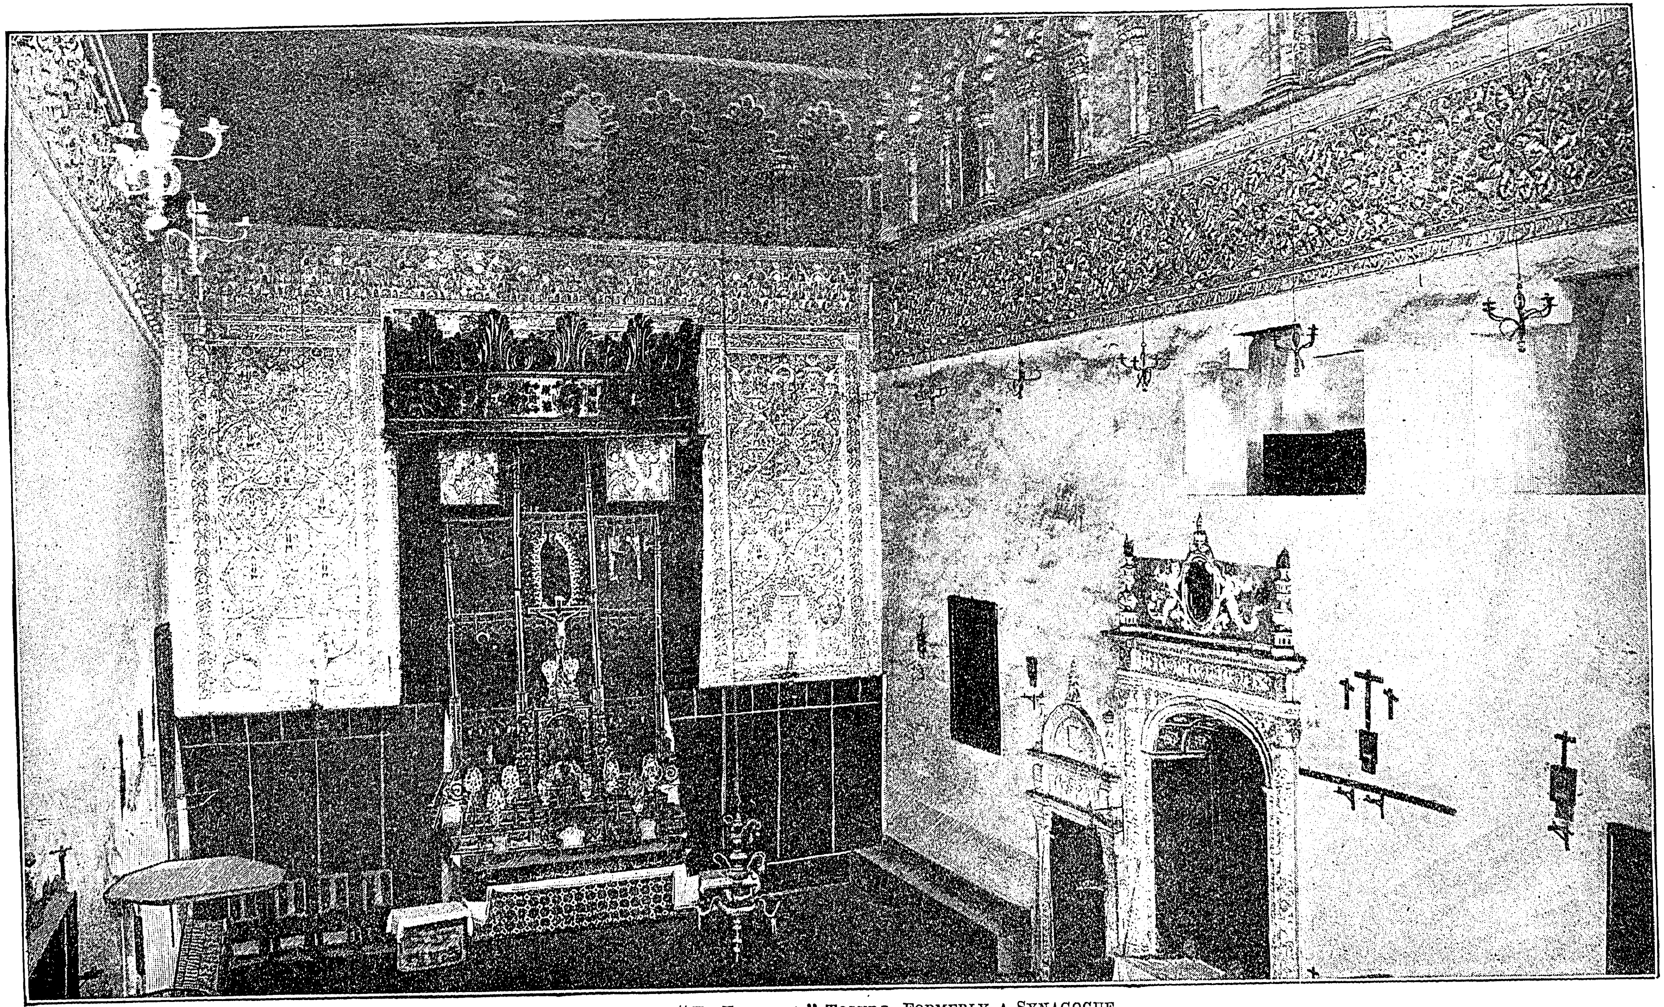
Moses ben Daniel Toledano: A native of Miquenes; author of "Meleket ha-Ḳodesh," a commentary on Rashi, published by Jacob Toledano (Leghorn, 1803).

Solomon Toledano: Son of Isaac Toledano; died of the plague at Salonica in April, 1697.

BIBLIOGRAPHY: Jellinek, *Ḳontres ha-Maspid*, pp. 26, 41.

J. M. K.

TOLEDO: Metropolitan city of Gothic and Moorish Spain, and capital of Old Castile. Jews must have been established there as early as the sixth century; for the third Toledo Council (589) inserted in its canon provisions against the intermarriage of Jews and Christians, and against Jews holding public office or possessing Christian servants. The eighth Toledo Council (652) confirmed the anti-Jewish legislation of the laws of King Sisenand (Scherer, "Rechtsverhältnisse der Juden," pp. 22–25), while the ninth council (654) ordered baptized Jews to observe Christian as well as Jewish feasts (Aguirre, "Collectio Maxima Conciliorum Hispaniæ," ii. 567). Similarly in 681 the twelfth Toledo Council confirmed the Erwicz decrees against Jewish converts to Christianity (Aguirre, *l.c.* pp. 682–686), and in 693 the sixteenth Toledo Council confirmed the other anti-Jewish laws. It is not surprising, therefore, that the Jews are reported to have assisted the Arabs in the conquest of Toledo (715). During the Arabic period of the city's history little is known of the position of its Jews. Probably it was very advantageous, and the Jews doubtless thoroughly as-



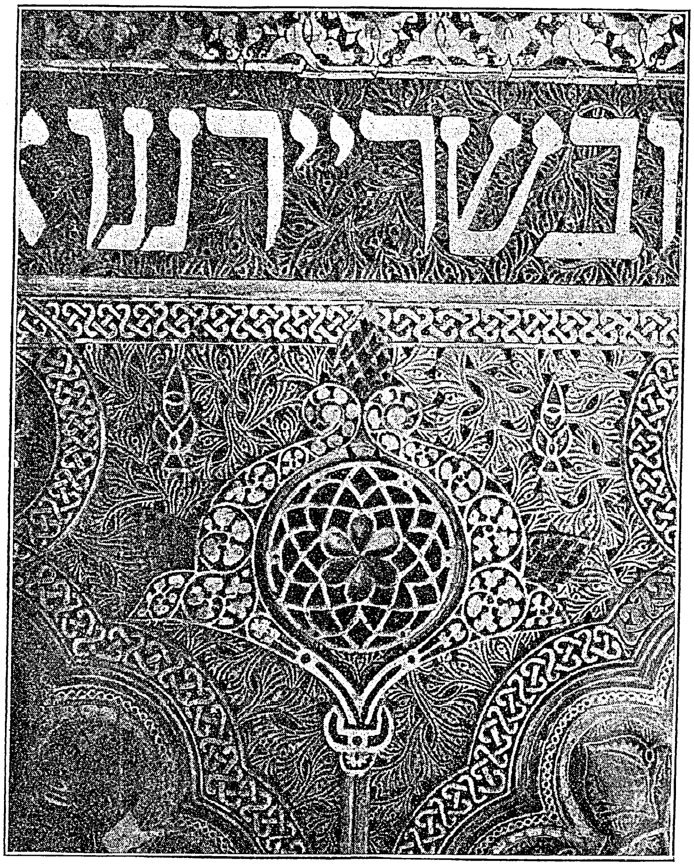
Interior of "El Transito," Toledo, Formerly a Synagogue.

(From a photograph.)

similated themselves with the general population in language and customs, inasmuch as the minutes of the congregation were kept in Arabic down to the end of the thirteenth century (Asher b. Jehiel, Responsa, No. 56; Solomon ben Adret, Responsa, iii. 427).

Several Jewish authors who wrote in Arabic were born and probably educated at Toledo, even after its conquest by the Christians, not to speak of Judah ha-Levi and Abraham ibn Ezra, who were born in Toledo but educated at Cordova. Other Jewish writers in Arabic were: Abraham ibn al-Fakhkhar the poet (b. in Toledo; d. there 1231 or 1239); Israel of Toledo (Zunz, "Z. G." pp. 427–428); Israel Israeli ben Joseph, who as late as the second half of the fourteenth century wrote on the ritual (*idem*, "Ritus," p. 30). It is not surprising, therefore, that Toledo should have been the center of European activity in translation from Arabic into Hebrew, Latin, and Castilian, as will be seen later.

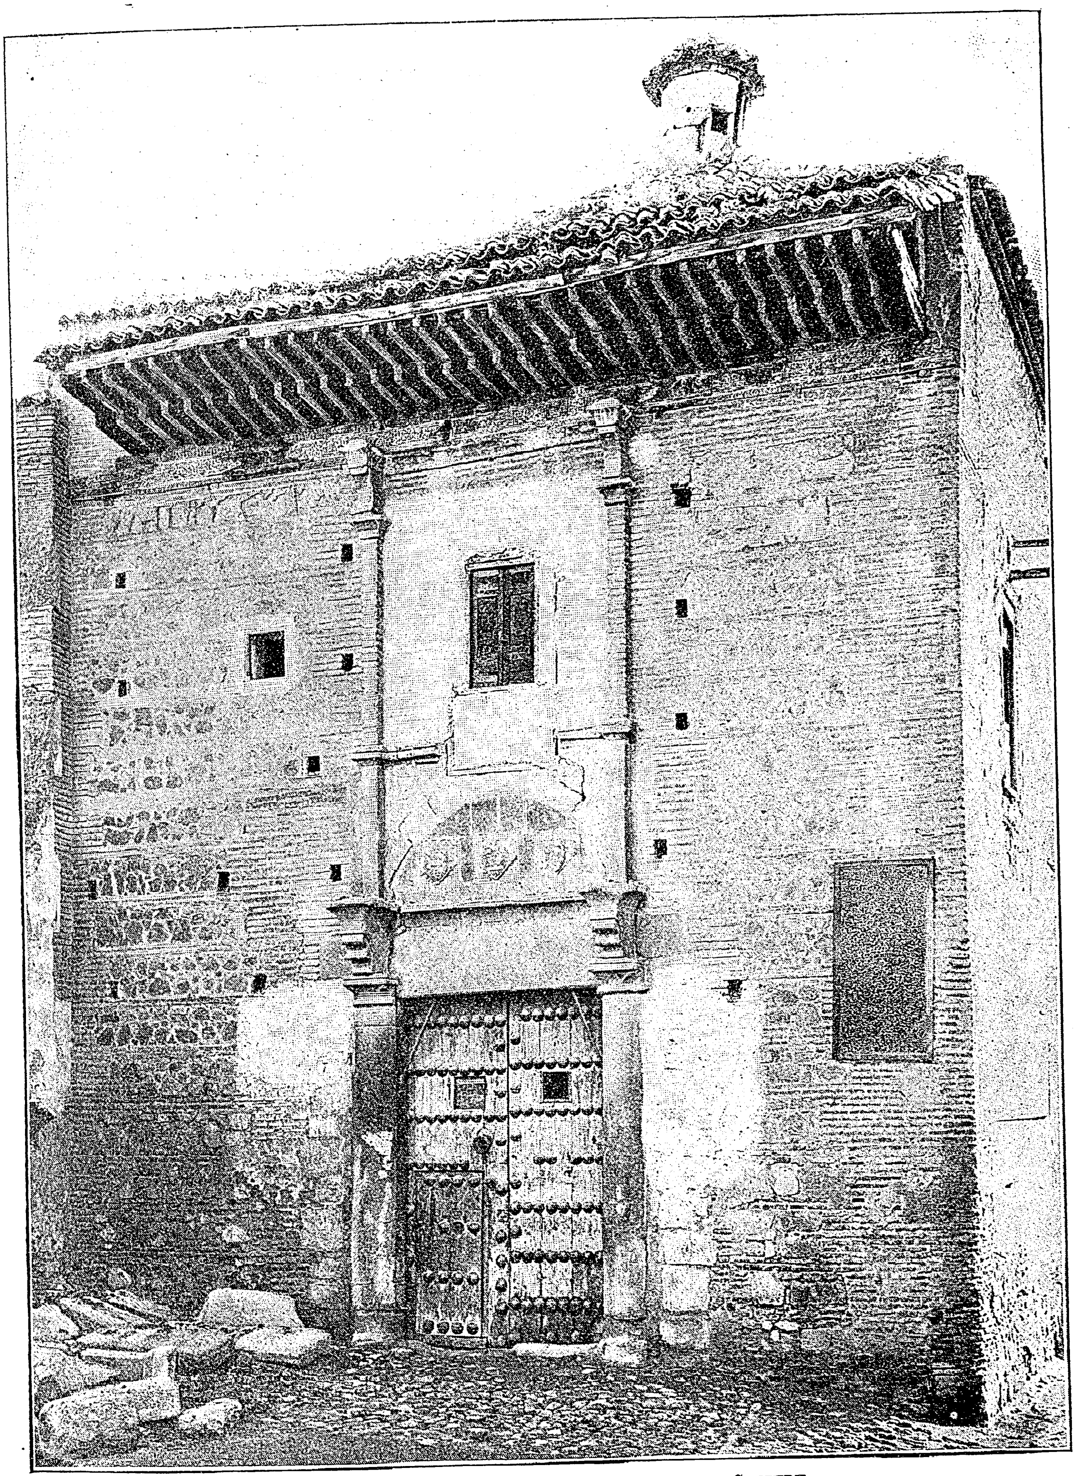
When Alfonso X. took Toledo from the Arabs he recognized the position of the Jews by granting them full equality with the Christians; but friction soon arose between the members of the two faiths. Alfasi refers to persecutions in Toledo in 1090 (responsum No. 217); and there was a massacre of the Jews in 1108, in which Solomon ibn Farissol was murdered (Rios, "Hist." i. 189, 297). The equality of the Jews with the Christians was short-lived; for in 1118 a local decree was passed prohibiting any Jew, or any convert, from exercising jurisdiction over a Christian. It would appear that the "nasi," or chief justice, of the Toledo Jews, who is mentioned about this time, had previously had the right to hale Christians before his court. In 1147 Judah b. Joseph ibn Ezra, probably a relative of the poet and exegete, was nasi at Toledo, and at the same time court chamberlain. In the same year many Jewish exiles, driven out of Arabic Spain by the persecution of the Almohades, took refuge in Toledo. The Jews held important positions at court there, possibly owing to the influence of Fermosa, the Jewish mistress of Alfonso VIII. Thus Ḥayyuj Alfata became the royal physician. This favoritism appears to have led to a riot in Toledo in 1178, in which Fermosa was killed (Lindo, "History of the Jews of Spain and Portugal," p. 71). It is possible that at the same time Judah and Samuel Alnaqua suffered martyrdom (Zunz, "Z. G." p. 434).



Details of Interior Ornamentation on Wall of "El Transito," Toledo.
(From a photograph.)

At the beginning of the thirteenth century the Shushans, the Al-Fakhkhars, and the Alnaquas were among the chief Jewish families of Toledo, Samuel ibn Shushan being nasi about 1204. His son Joseph built a synagogue which attracted the attention of Abraham ben Nathan of Lunel ("Ha-Manhig," § 22), who settled in Toledo before 1205. During the troubles brought upon Castile by the men of "Ultrapuertos" in 1211–12 Toledo suffered a riot (Rios, *l.c.* pp. 347–349); and this appears to have brought the position of the Jews more closely to the attention of the authorities. In 1219 the Jewish inhabitants became more strictly subject to the jurisdiction of the Archbishop of Toledo, who imposed upon every Jew over twenty years old an annual poll-tax of one-sixth of a gold mark; and any dispute about age was to be settled by a jury of six elders (Jacobs, "Sources," No. 1265), who were probably supervised by the nasi, at that time Solomon ben Joseph ibn Shushan. In the same year papal authority also interfered with the affairs of the Toledo Jews, ordering them to pay tithes on houses bought by them from Christians, as otherwise the Church would be a considerable loser (Jacobs, *l.c.* No. 1273).

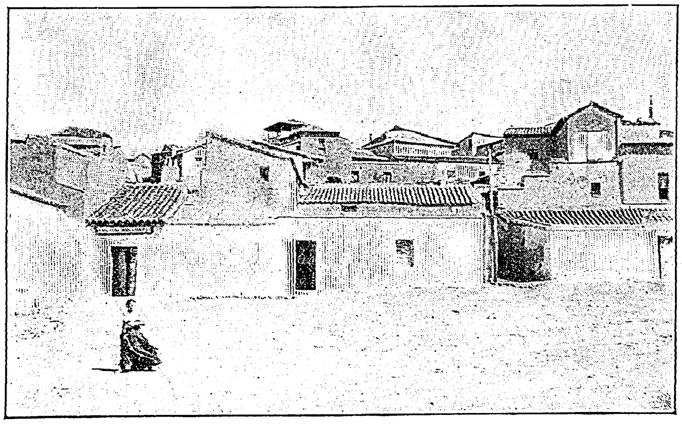
Under Alfonso X., the Wise, Toledo rose in importance as a center of Jewish activity in translation from



House of Samuel ha-Levi at Toledo, Fourteenth Century.
(From a photograph.)

School of Translators Under Alfonso X.

the Arabic into Hebrew, and less often into Latin and Spanish. Similar activity had occurred previously; but the Jewish translators either were not born in Toledo (as Johannes Hispanensis, who only settled there, and Samuel ibn Tibbon) or flourished mainly elsewhere (as Judah ben Solomon ha-Kohen ibn Matḳah, who was born in Toledo, but passed the greater part of his life in Italy). However this may be, the number of Jewish translators increased under the patronage of the king. Don Zag ibn Sid was the chief compiler of the ALFONSINE TABLES; and Judah Moses Cohen also translated works on astronomy from Arabic into Spanish, as did Abraham of Toledo and Samuel ha-Levi Abulafia. In medicine Abraham Alfaquin was active, as were also Ḥayyim Israel and Judah Cohen. Todros ha-Levi was another translator of the same period and the same place. It is probable also that the Spanish translation of "Kalilah wa-Dimnah" was executed at Toledo about this time. It was likewise at this period (1260) that the Jews of Toledo obtained permission from Alfonso to build the largest and most beautiful synagogue in Spain, though a bull of Innocent IV. expressly forbade the erection of any new synagogue, especially any building higher than or in any way superior to the surrounding churches or houses. After the expulsion this synagogue became the Church of St. Maria la Blanca; and it still (1905) survives as a national monument. Its numerous pillars and arches render it one of the most characteristic buildings of the Moorish type in Spain; and during the nineteenth century its ornamentation formed the model for numerous synagogues in other countries (see SYNAGOGUE ARCHITECTURE).



Old Juderia of Toledo, from the Plaza de Barrio Narevo.
(From a photograph by Dr. William Popper.)

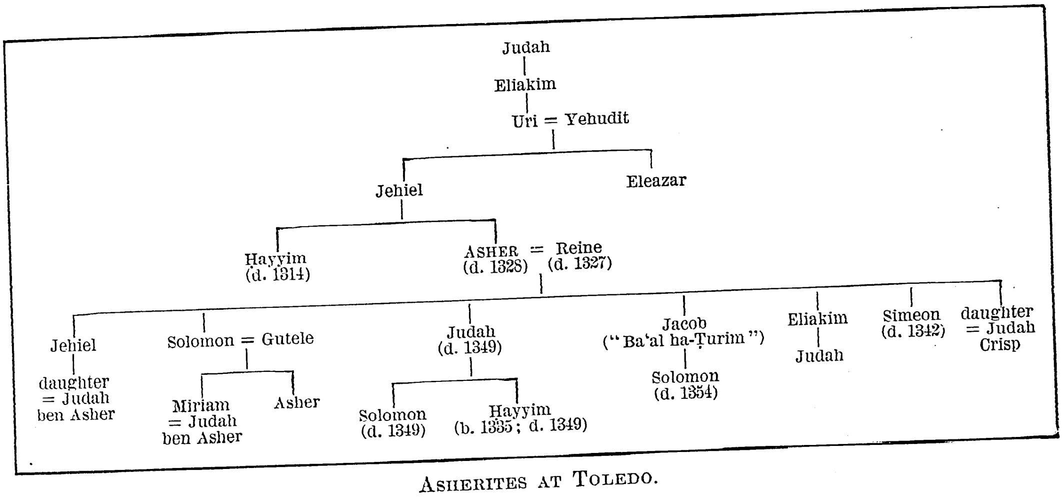
The favorable condition of the Jews of Toledo during Alfonso's reign is indicated by the large proportion of the poll-tax for Castile paid by them in 1290—namely, 1,062,902 maravedis out of the total of 2,594,014, the amount of their "servicio" not being given for that year. In addition to this payment, they had to pay tribute to the archbishop in the following year (1291; Jacobs, *l.c.* No. 1282); and there are occasional indications of friction between the royal officers and the episcopal dignitaries as to the exact limitation of their taxation rights over the Jews.

Asherites.

It was toward the beginning of the fourteenth century (probably about 1305) that the Jews of Toledo, on the recommendation of Solomon ben Adret, chose as their spiritual leader Asher ben Jehiel (d. 1328), perhaps the greatest halakist of his time in Germany. His influence, like that of his two sons (Jacob, author of the "Ṭur," and Judah, who succeeded his father in 1328), was directed against the more rationalistic and philosophical tendencies of Jewish Spain; and the family of the Asherites, of which the pedigree given by Zunz ("Z. G." p. 422) is here reproduced, thenceforth ruled spiritual matters in Toledo. In the great controversy between the Maimonists and anti-Maimonists, the Jews of Toledo—*e.g.*, Meïr ben Abraham, Jacob Crisp, Jonathan Ashkenazi, Samson b. Meïr, Meïr b. Joseph, and Solomon b. Moses Abudarham—supported the traditional side (Perles, "R. Salomo b. Abraham b. Adereth," 1863, pp. 10, 45, 48).

In the middle of the fourteenth century there rose into prominence in Toledo, Samuel ha-Levi Abulafia, who appears to have acted as a kind of treasurer and general adviser to Pedro the Cruel. It was on his advice that the king established Maria de Padilla, his mistress, at Toledo; and in the struggles between Pedro and his brother Henry de Trastamara this fact was cited by the adherents of the latter as an explanation of their opposition to Samuel Abulafia. On May 7, 1355, an attack was made on the "alcana," or smaller Jewry, of Toledo by Henry de Trastamara, in which no fewer than 1,200 Jews were killed or wounded (Rios, *l.c.* ii. 224). Notwithstanding this, Samuel Abulafia's influence and riches grew apace; and, in addition to a magnificent private mansion, he obtained permission to build another synagogue, inscriptions in which still recall his munificence. After the expulsion the synagogue was turned into a church and became known as "El Transito"; but in the year 1888 it was converted into a national monument, and the interior decorations, which are in the finest Moorish style, were cleansed and restored. While not presenting so striking an interior as St. Maria la Blanca, the friezes on the walls and the interior lighting by narrow windows near the roof make it remarkable, and have led to imitation in many modern synagogues (see SYNAGOGUE ARCHITECTURE). In the very year (1360) in which the synagogue was built Samuel Abulafia lost his influence with Pedro and was seized and forced to leave Toledo.

Notwithstanding the influence of the Asherites, the increasing stringency of the Castilian laws against the Jews and the great inducements held out to them to accept baptism led to a large number of conversions, either forced or voluntary, at Toledo. The converts ("conversos") were freed from the anti-Jewish legislation of the Cortes, and had at the same time relations with and support from their former brethren in faith; and their political and social influence was increased. This condition of things was strongly opposed by the ecclesiastics of Toledo; and the complaints and bickerings between the two parties led to a violent outbreak against the conversos, lasting three weeks (July 19 to Aug. 9, 1367), during which no fewer than 1,600 houses were burned and a considerable number of conversos lost their lives (Rios, *l.c.* iii. 149; for the details see Jew. Encyc. viii. 319, *s.v.* Maranos). Notwithstanding, or perhaps in consequence of, this, a tribute of no less than 20,000 doubloons was extorted from the Jews of Toledo by the king (June 6, 1369). Friction continued to exist between the ecclesiastical authorities and the Jews. Thus a quarrel arose between the monastery of St. Ursula and the Toledo aljama with regard to certain rights connected with the Jewish abattoirs (Jacobs, *l.c.* No. 1291). Nevertheless, Archbishop Pedro, on May 17, 1388, appointed his own physician, Ḥayyim, as judge of the Jews throughout the whole archbishopric during the absence of Rabbi Don Zulema al-Fakhkhar (Rios, *l.c.* p. 257). The king, however, claimed the right of confirmation for this office (Jacobs, *l.c.* No. 1294).



Asherites at Toledo.

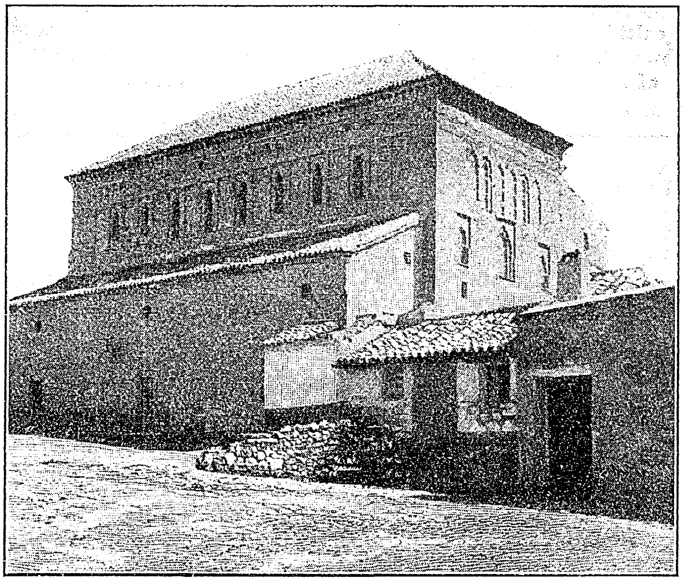
In the terrible massacres of 1391, induced by the violent exhortations of Vicente Ferrer, the city was the scene of one of the most appalling outbreaks. Hitherto the nobles of Toledo had on the whole done their part in protecting the Jews; but when the agitation reached that city (Aug. 5) they were found among the most violent in the onslaught on the larger Jewry. This had resisted the attacks of Henry II.; but it was now entered by the rioters at different gates, almost all the Jews being put to death, and their houses and synagogues sacked. Many of the latter edifices were torn down. Among the victims of the riots were Chief Rabbi Judah b. Asher and Israel b. Joseph Alnaqua. Four years later, inhabitants of the neighboring villages of Carlo and Santa were summoned before the Archbishop of Toledo to account for their action on the day of the riots (*ib.* No. 1317).

This was practically the ruin of the Toledo Jewry. Only a few years later Henry III. threatened the Jews with slavery if they did not pay all their taxes (*ib.* No. 1300); and the next year John II. withdrew civil jurisdiction from them and entrusted it to the alcaldes. Ferrer visited the city for a fortnight in May, 1411, with the result that, as stated above, the synagogue was turned into the Church of St. Maria la Blanca. In truth, the majority of the survivors of the massacre of 1391 had saved their lives by becoming converted; so that very few true believers still remained in the city, and the history for the following century deals mainly with the conversos. These were deprived in 1419 of all opportunity to hold public office (*ib.* No. 1264); and on June 15, 1449, thirteen of them were turned out of office as "suspects in faith," among them being members of the Lunez, Lopez, Gonzalez, Herrera, and Cota families, afterward distinguished among the Maranos, whose very name is supposed to have originated in Toledo at this time (Rios, *l.c.* iii. 123). The conversos did not yield their positions without a struggle. There was even another riot in 1467, in which they appear to have got the better of their oppressors; for in the same year they were forbidden to bear arms thenceforth, and in the following year their exclusion from public office was confirmed by Ferdinand IV. (Jacobs, *l.c.* No. 1322).

The few writers whose birth or activity connects them with Toledo after 1391 are mainly converts, as Martin of Toledo, the mathematician; Juan de España and Rodrigo Cota, the poets; and Alfonso de Spina, the controversialist, who was the first to suggest the expulsion of the Jews. A further indication of the low condition to which the Jews of Toledo had fallen is the fact that they were able to pay only 2,600 maravedis for their servicio to the archbishop (1474). Though freed from taxes upon inheritance throughout Castile, at Toledo the Jews had to pay on succeeding to the property of their fathers.

Introduction of the Inquisition.

Though the Inquisition was first introduced at Seville, in Jan. 6, 1481, the largest number of autos da fé in Spain during the existence of the Jews there were held at Toledo. In 1484 many Jews were reconciled by the Inquisition (*ib.* No. 1260). An auto da fé was held on Dec. 10, 1486, at which no fewer than 1,640 were absolved or reconciled, and others on Jan. 15, March 15, and May 7 in the following year, when 822 were reconciled. In 1488 two autos were held, on May 24 and July 30, respectively, at the former of which 21, and at the latter 16, Jews were burned, 400 others being punished later. The tragedy of La Guardia was immediately connected with the Jewry of Toledo; and a representation of the punishment of the victims is still extant in one of the cloisters of the cathedral. The affair is said to have had a determining influence in connection with the expulsion which took place two years later.



"El Transito," Formerly a Synagogue.
(From a photograph by Dr. William Popper.)

Rabbis and Scholars.

Toledo was practically the center of the Spanish Jewry in Christian Spain. Besides the writers already mentioned, both Judah ha-Levi and Abraham ibn Ezra were born at Toledo, though both left it early for Cordova; Abraham ibn Daud was a Toledan; Judah al-Ḥarizi was born and passed most of his life in the city. Among the payyeṭanim of Toledo may be mentioned Joseph b. Israel, Jacob b. Eleazar, and Mar Isaac b. Jacob. Of secular poets may be mentioned Judah ibn Shabbethai and Jehiel b. Asher. Besides, the astronomer Israel Israeli the Younger deserves notice, as well as Joseph Naḥmias and Abraham ibn Ẓarẓal, though the last-named was more of an astrologer, Toledo being a center for the magic arts generally. It is said that Michael Scott learned his magic from a Toledo Jew named Andreas, who translated works on magic from the Arabic. Judah ibn Balaam the grammarian, Judah ben Shabbethai the satirist, and the cabalists Shem-Ṭob ben Jacob, Joseph ibn Waḳḳar, and Joseph ben Judah lived there; and Jonah Gerondi, Todros Abulafia, Moses Narboni, Solomon Ẓarfati, and Azariah ben Joseph (Bonafos Astruc) were among the visitors to the city. After the arrival of Asher b. Jehiel, Toledo was distinguished as a center of Talmudic study also. Jeroham b. Meshullam lived there, as did Aaron ben Joseph ha-Levi Toledo (for a short time about 1291); Menahem b. Aaron was an authority on the ritual there about 1374; Samuel Sevillo and Joshua Levi b. Joseph learned the Talmud at Toledo; Meïr Cohen, the casuist, lived there, and Isaac, the father of Joseph Caro, was born there; while the name of the first printer in Portugal, Eleazar Toledo, indicates his connection with the Spanish city.

At one time the whole of the southwest portion of the city was inhabited by Jews, and there were two Jewish quarters—the Alcana, or smaller Jewry, and the Juderia itself, in which both the still extant synagogues were located. The Jewish quarters were surrounded by a wall after the Catholic monarchs at the Cortes of Toledo in 1480 had ordered that all Jews should be separated into special "barrios."

Tombstones of the old Toledo Jewry are still in existence; and the inscriptions on them have been published by Luzzatto under the title "Abne Zikkaron."

TOMASHOV, JACOB B. SIMEON: Polish rabbi of the seventeenth century. His father is styled "ha-Ḳadosh," a term generally given to a martyr, so that Simeon may have been martyred during the massacres instigated by Chmielnicki. Jacob was probably rabbi at Nemirov, where his wife and three sons were murdered in 1648. He then resolved to emigrate to Palestine, but seems to have remained for several years in Venice, where he published his "Ohel Ya'aḳob" (1667), a homily on that part of the Pentateuch which deals with the 'Aḳedah. He left a work, as yet unpublished, entitled "Toledot Ya'aḳob," which contains homilies on the Pentateuch, the preceding work probably being a part of it.

TOMBS: From the earliest times the Hebrews practised burial of the dead (קבר, whence "ḳeber" = "tomb"), so that cremation, which was customary among the Moabites and Edomites, was regarded by the Jewish prophets as sinful and inhuman (Amos ii. 1), and was used only as an additional punishment in the case of criminals (Josh. vii. 25; but see I Sam. xxxi. 12). The most primitive mode of burial seems to have been either to throw the corpse into a pit or to pile stones over it wherever it happened to be at the time of death, an analogy being found in the Mosaic law that the blood of animals which had been killed must be covered with dust on the place where it had been poured out (Lev. xvii. 13). According to Josh. vii. 26, the remains of Achan were buried under a heap of stones in the valley of Achor, and the corpse of a conquered king was similarly interred (*ib.* viii. 29), while Absalom's body was thrown into a pit in the forest, and covered with stones (II Sam. xviii. 17). Adam and Eve are said to have been taught interment by seeing a raven bury its young in the sand (Pirḳe R. El. xxi.), and even Moses interred an Egyptian in the very place where he had killed him (Ex. ii. 12).

(From Amador de los Rios, "Monumentos.")

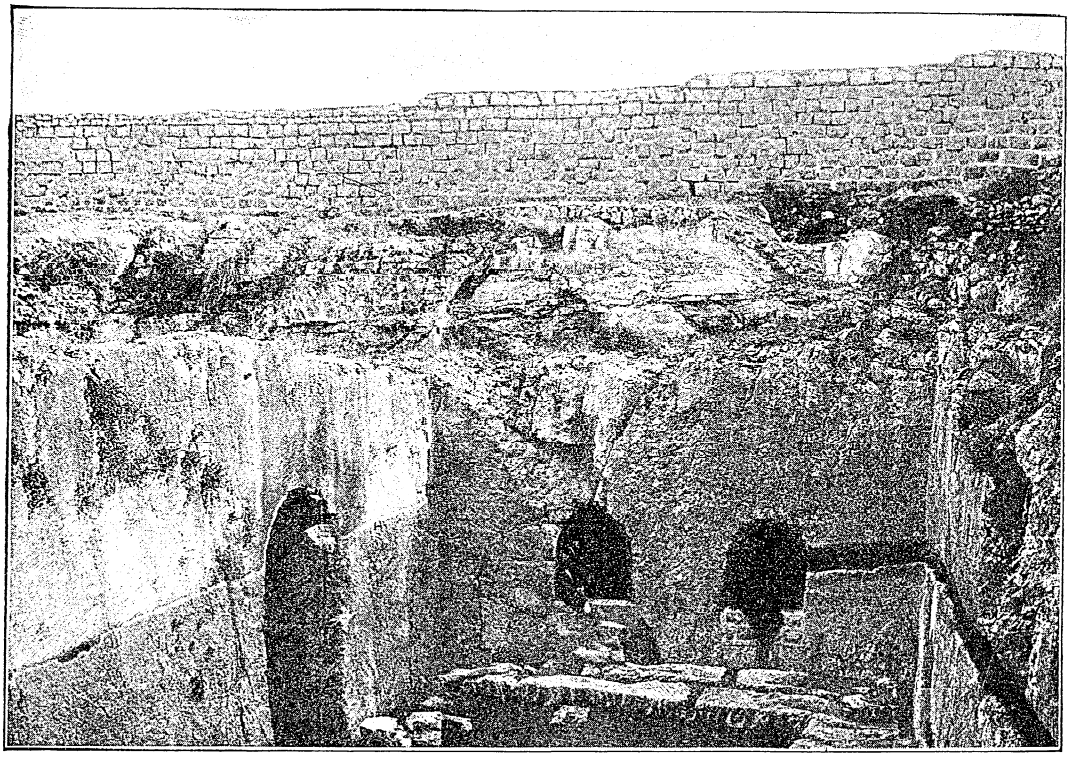
Single Tombs.

Single burial was customary in ancient times, as is still the case among many peoples and in many lands. The most natural method was to bury one's dead near the house on one's own land, as is clear from I Sam. xxv. 1 and I Kings ii. 34, while the latter passage, which refers to Joab, shows that this custom was not restricted to the burial of kings and prophets, as Winer ("B. R." i. 444) has supposed. The custom of interring Jewish kings in their castles, close to the Temple wall, is severely condemned by the prophet (Ezek. xliii. 7-9), this criticism showing that graves were considered unclean, and were therefore not to be made near human habitations (Num. xix. 16). Graves were, accordingly, outside the cities (Luke vii. 12; John xi. 30), or, according to rabbinical precepts, fifty ells from the town (B. B. ii. 9). A special field thus came to be set apart for the dead, but the simple methods of burial observed by the Jews prevented any development of a necropolis resembling the Greek or the modern Italian type. Special care was taken to keep lepers separated from others in death as well as in life, and the body of a leprous king was accordingly buried in the open field (II Chron. xxvi. 23). The graves of the common people were likewise kept separate from those of the wealthy and prominent (II Kings xxiii. 6; Jer. xxvi. 23).

The tomb is to the dead what the house is to the living, so that the grave is termed a "house" (Isa. xiv. 18), or the "long home" (Eccl. xii. 5), while in Job xxx. 23 it is called "the house appointed for all living." The terrors associated with it are expressed by the terms "pit" (Isa. xiv. 19, xxxviii. 18), or "pit of destruction" (Ps. lv. 24), while the appropriate metaphor "silence" (*ib.* xciv. 17, cxv. 17) is still in current use among the Jews. The powers of death are implied by the words "hell" ("sheol") and "destruction" ("abaddon"; Prov. xv. 11; Job xxvi. 6). The later Jewish terms, on the other hand, contain no allusion to the horror of death, the cemetery being called simply the "house of graves" (בית הקברות), or the "house of eternity" (בית עלמין; see Eccl. xii. 5), or even, in a euphemistic sense, the "house of life" (בית החיים).

Family Sepulchers.

The wealthy and prominent followed the custom of the neighboring country of Egypt, and prepared their tombs in their own lifetime, often on an elaborate scale, as is evident from the allusions to Jacob (Gen. xlix. 29, 30; l. 5, 13), Asa (II Chron. xvi. 14), Shebna (Isa. xxii. 16), and Joseph of Arimathea (Matt. xxvii. 60), the reference in all these instances being to family sepulchers, which were the rule. This is confirmed by such phrases, frequently used in mentioning the Patriarchs and David, as "gathered unto his fathers," "slept with his fathers," or "gathered unto his people." Not only was this true of kings and men of prominence (II Kings ix. 28; II Chron. xxxii. 33, xxxv. 24; I Macc. ii. 70, ix. 19, xiii. 25), but the custom was a general one (Gen. xxiii. 20; Judges viii. 32; II Sam. ii. 32; I Kings xiii. 22; Tobit xiv. 10), and it was the natural desire of those who died away from home to be buried in the family grave (Gen. xlvii. 29; II Sam. xix. 38; I Kings xiii. 22, 31; Neh. ii. 3). One who could not hope to be interred thus was at least eager to rest in his native country (II Macc. v. 10) and in holy ground (Josephus, "Ant." x. 4, § 3). From the Talmudic period to the present time it has been the desire of all pious Jews to be buried in the sacred soil of Palestine; and the Talmud itself enumerates instances of prominent men who were interred there. This custom has increased in the course of time to such an extent that many Jews make a point of spending their last days in Palestine so as to be buried there.



Traditional Tombs of the Kings, near Jerusalem.
(From a photograph by Bonfils.)

Desecration and Consecration.

Desecration of a tomb was regarded as a grievous sin, and in ancient times the sanctity of the grave was evidenced by the fact that it was chosen as a place of worship, thus explaining the circumstance that a sacred stone ("mazzebah") was set on Rachel's grave, and that sacred trees or stones always stood near the tombs of the righteous. The ancient Bedouin custom of placing the graves of their ancestors and of men of superior sanctity on high mountain peaks was imitated by the Israelites, who located the tomb of Aaron on Mount Hor. The mountain summit thus became a place of worship of the divinity, and may, by a slight extension of the term, be designated as taboo, since it was partly holy and partly unclean. Traces of such places of worship can still be found in Palestine, and the Mohammedans in like manner use high places as burial-grounds. "In this respect the usage corresponds precisely to what we find to-day. The 'maḳam' is the place of the saint. It is preferably on a hilltop, but may simply be a tomb of a saint in a rude enclosure under the open heavens, or the tomb may be in a little building, usually with a dome, called a 'ḳubbah'" (Curtiss, "Primitive Semitic Religion To-Day," p. 143, London, 1902; see illustration annexed to p. 178: "Grave of Holy Man near Medeba").

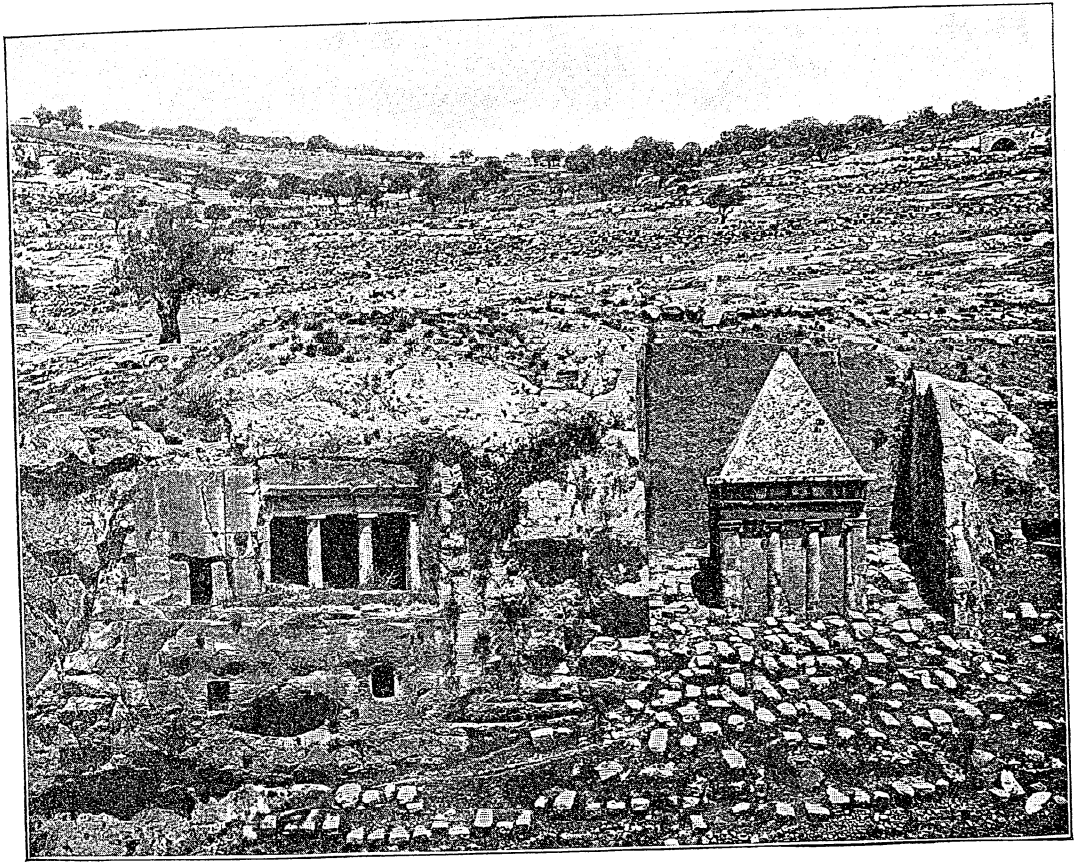
No stranger might be interred in a family sepulcher (Matt. xxvii. 60); and the Nabatæan inscriptions contain curses against those who desecrate the family tombs (Neubauer, in "Studia Biblica," i. 212), a similar inscription being found on the sarcophagus of Eshmunazar, King of Sidon. Freedmen, however, were buried in the family tombs of their former masters. Violation of the tomb was punishable by fines (Schürer, "Gesch." 3d ed., iii. 54).

The preference for family sepulchers resulted in the development of a monumental style of tomb in Palestine as elsewhere. Although such structures afforded ample opportunity for a display of pomp and for the employment of sculpture and painting, as is shown by Egypt, the Jews did not bend their energies in that direction. Despite their insignificant appearance, however, these tombs are the very ones which testify to the activity of the former inhabitants of the country, since the graves, hewn into the solid rock, have shown themselves proof against decay. Few of these tombs reflected any architectural credit on the Jews, since they were mere feeble imitations of the work of the Phenicians and developed no originality of their own.

Rock-Tombs.

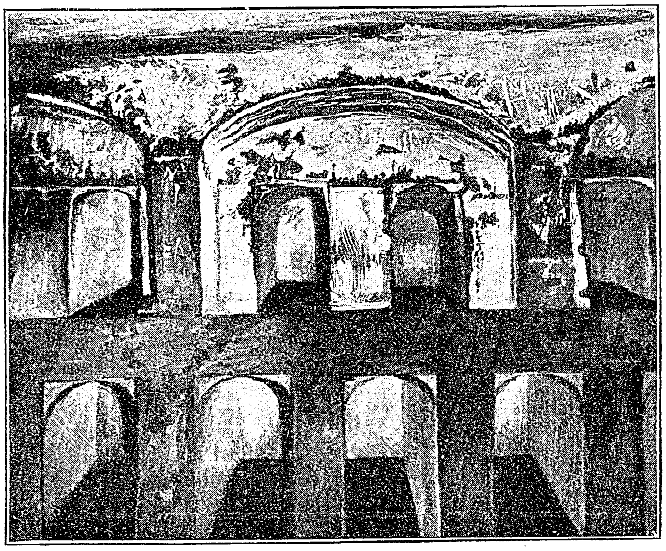
Interment in the rocks of the hills was suggested to the Phenicians by the natural conformation of the country, which contained caves everywhere that required artificial agencies only for the final touch. These cave-tombs were often situated at heights which seemed almost inaccessible; and where no natural caverns were formed in the walls of the rock, rectangular and roomy caves were artificially made by hewing excavations into the stone from above, while occasionally subterranean chambers were cut with lofty walls in which the graves were made. According to a Palestinian explorer, "the Phenician sepulchral chambers at Sidon and at Tyre consist for the most part of quadrangular vaults with three half-arched niches, one facing the entrance, and the other two on the sides. The Jewish tombs, on the other hand, are low, oblong chambers with many rows of partitions, so that the corpses are separated only by a small stone ridge. The Phenician structures apparently contained sarcophagi, while the plan of the Jewish tombs shows that they were intended for corpses wrapped in cloth" (Van de Velde, "Reise Durch Syrien und Palästina," German transl. by K. Göbel, i. 235, Leipsic, 1855).

According to the results thus far obtained, three different types of Palestinian tombs may be distin-



Ancient Tombs Outside the City Walls of Jerusalem.
(From a photograph by Bonfils.)

guished: (I.) Tombs hewn in the rock, which are the most numerous, since the soft limestone of the Palestinian hills favored their construction. A characteristic feature of these tombs is the preference for entire walls instead of pillars (Renan, "Mission de Phénicie," p. 822). These Jewish sepulchers are simple, having nothing in common with the Egyptian pyramids. They are entirely unadorned with paintings; and only those of a comparatively recent period contain inscriptions. Of this type of tombs three varieties may be distinguished: (1) Single chambers without doors or other means of closing them and with but one grave, hewn vertically into the ground. (2) Single chambers with several graves, which might be either (*a*) shelf-graves, in which the corpses were laid on stone shelves which ran along the sides of the rock and which were often hewn breadthwise into it, so that a sort of overhanging vault ("arcosolia") was formed; or (*b*) thrust-graves, quadrangular galleries, which were cut lengthwise into the cliff, and into which the bodies were thrust horizontally. These galleries, or niches, which were called "kok" (plural, "kokim") by the Rabbis, had a length of about 1.8 meter, a width of 0.45 meter, and a height of 0.45 meter, and may be regarded as the specifically Jewish type of grave. (3) Tombs of large size with connecting chambers, which, if not located in a natural cave about the level of the ground, were reached by small stairways hewn into the rock. Tombs entered by vertical shafts, like those constructed by the Egyptians, have not thus far been discovered in Palestine.



Interior View of the Traditional Tombs of the Judges, Showing Arrangement of Vaults.
(From the "Journal of Biblical Literature.")

(II.) Artificial tombs, which are of later date and occur less frequently. They may be compared with the modern Egyptian graves, which consist of "an oblong vault, having an arched roof, . . . made large enough to contain four or more bodies. Over the vault is constructed an oblong monument (called 'tarkeebeh') of stone or brick, with a stela or upright stone ('shahid') at the head and foot" (Lane, "Manners and Customs of the Modern Egyptians," ii. 302, London, 1846; 5th ed. ii. 265).

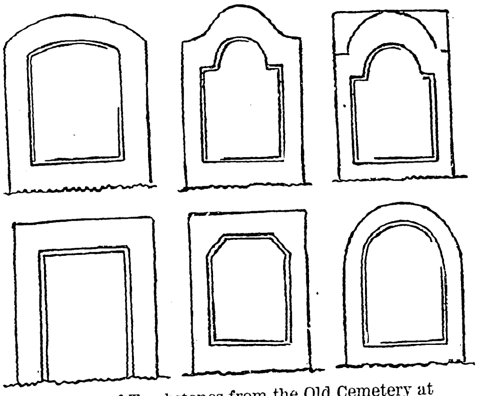
(III.) Sarcophagi, which were anthropoid in shape among the Phenicians, but which consisted in their Hebrew type simply of troughs, cut to the length of the body and hewn vertically in the walls. They were, therefore, virtually shelf-graves, although they also bore a certain resemblance to the vertical tombs.

The two types chiefly known to the Rabbis were thrust-graves ("kokim") and vertical graves ("ḳebarot"), neither of which might be constructed on a festival, although it was permitted to dedicate the former if the communal interests required it (M. Ḳ. i. 6). A tannaitic and an amoraic saying state that kokim were dug, while ḳebarot were built. Thrust-graves were so little known among the Jews of the later period that Maimonides did not mention them in his codification of the passages bearing on the subject, alluding only to the earth-grave ("ḳeber"). A section of the Mishnah, however, clearly explains the construction of a family tomb (B. B. vi. 8).

In case one sold a place of burial to an associate, or obtained one from him, he might make the inner room four ells broad and six ells long, the height of the cave being given in Tosef., B. B. vi. 22 as four ells. In this room, moreover, he might construct eight cavities, three in either side wall, and two in the narrow wall facing the entrance. Each cavity was four ells in length, seven in height, and six in width (the Tosef., however, made the height seven "ṭefaḥim," or handbreadths, an extra ṭefaḥ being added for the arched cover of the sarcophagus).

According to R. Simeon, "the inner room of the cave is six ells broad and eight ells long, and it contains thirteen cavities, four on the right, four on the left, three opposite the entrance, and one on each side of it." The owner of the ground on which the tomb was situated was required to grant a frontage of six ells square, so as to admit the bier and its bearers. The purchaser of the vault might from its interior open an additional one to the right and one to the left of the original tomb. In the opinion of R. Simeon, however, the purchaser might open an additional vault on each of the four sides, while R. Simeon b. Gamaliel regarded this as dependent on the formation of the rock (see Samuel b. Meïr's commentary *ad loc.*, and the plan given in all editions of the Talmud).

As the honor of the dead was carefully guarded, the Talmud entered into a discussion of R. Simeon's scheme of construction, which allowed two graves at the entrance since visitors to the tomb would necessarily have to step on them. To the suggestion that they might project from the wall like bolts from a door, the retort was given that not even an ass (or, according to Yer., not even a dog) would be buried in such a fashion. They could, therefore, be located only in the corners of the cave opposite the entrance, and must have been sunk deep in the wall, otherwise they would have touched each other (B. B. 101b). The Palestinian source, however, presupposes a special construction of the cave itself, and considers it allowable to have two cavities, one above the other, provided the cave was protected against trampling (Yer. B. B. 15c).



Forms of Tombstones from the Old Cemetery at Frankfort-on-the-Main.
(From Horovitz, "Inschriften.")

Laws About Tombs.

A field in which such graves were located was subject to special laws. Trees might not be planted upon it, nor might seed be sown in it. In Oh. xviii. 4 the corrupt form שרה בוכין appears, which was erroneously derived in M. Ḳ. 5b from "baka," since it was the scene of wailing and lamentation over the dead. Tosef., Oh. xvii. 1, however, has the better reading שדה כוכים, with the correct interpretation: "A kokim field is one in which the earth has been dug up and cavities excavated at the sides." Such niches were known to all ancient Semitic races; the Nabatæans called them "goḥ," and the Palmyrenes "gamchin" (Krauss, "Lehnwörter," ii. 282; I. Löw, *ib.*). The pious will rise from the dead by means of these niches (Targ. Cant. viii. 5), which in other passages are described as cavities ("meḥilot"; Ket. 111a).

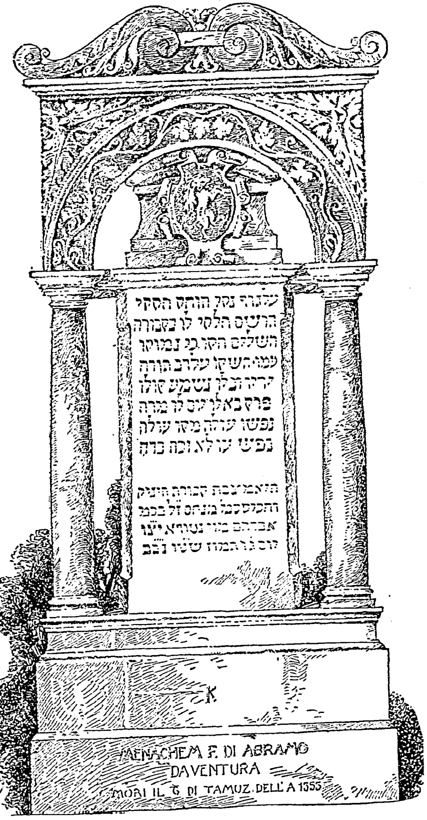
Outside of Palestine the custom of interring bodies in galleries was continued in the CATACOMBS; but among the Jews the single grave became more common, as was also the case in Babylonia, where the soil was sandy. Later information concerning the subject is found in a responsum by Naṭronai, gaon of Sura, who was asked whether the face of a corpse laid in a cavity should remain exposed, or whether it should be covered with earth (Kohut, "Aruch Completum," iv. 210). The Jewish graves in Carthage have the exact measurements of the rabbinical kokim.

Many natural graves have been preserved in Palestine. Van de Velde (*l.c.* i. 136) saw at the ancient Canaanitish town of Hazor a vault, called "ḳabur," or grave-cellar, which he declared must have a very large subterranean chamber, though the entrance was filled up.

Famous Graves.

Among the famous graves which have been partly preserved, and more or less accurately identified, may be mentioned the tombs of David, John Hyrcanus, Alexander Jannæus, Herod, and most of the tombs of the kings; also the tomb-chambers of Helena of Adiabene, and the tomb of St. James with the very ancient inscription "Bene Ḥezir." All of these graves, which are of the kokim type, are at Jerusalem.

No less renowned are the tombs of the patriarchs at Hebron, Joshua's tomb at Thamna, the tomb of the Maccabees at Modein, and the grave of Archelaus at Bethlehem, while Jewish legends know also numerous other graves of prophets and rabbis in Palestine and Babylonia (see Luncz, "Jerusalem," i. 71 *et seq.*, where about 300 are mentioned), which still receive great honor, even from Mohammedans. That so few tombs have been preserved is due, according to the Jewish traveler Benjamin of Tudela, to the fact that "the graves of the Jews are situated about three miles from Jerusalem. In ancient times the dead were buried in caves, and each grave was marked with the year of death ["ta'rikh," which, however, can hold good only of the medieval

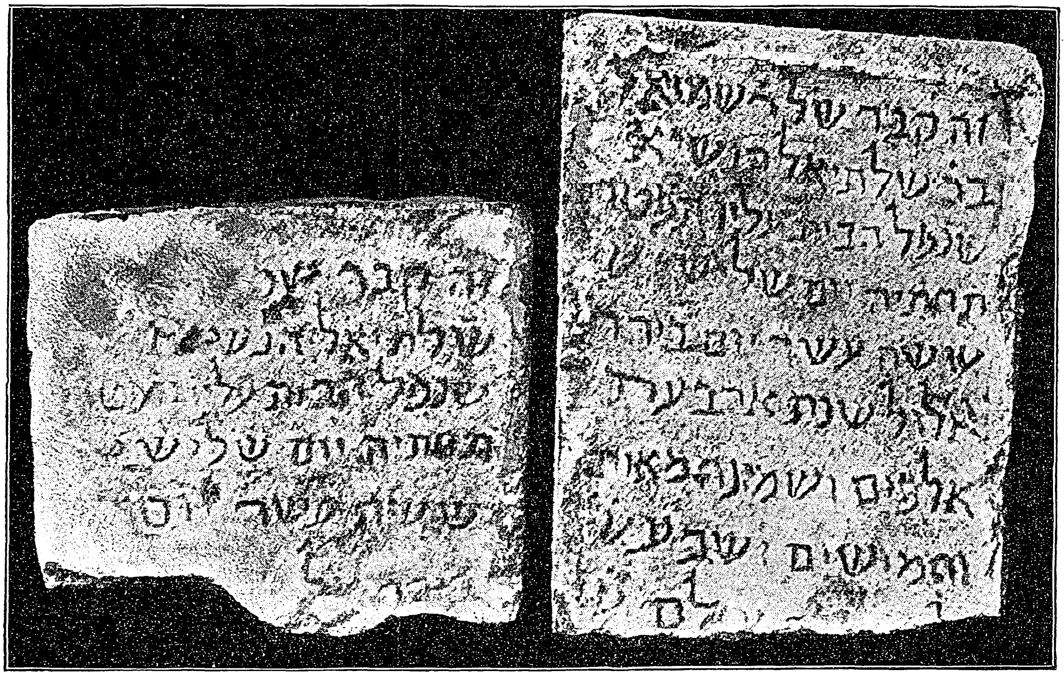


Tombstone of the Sixteenth Century.
(In the Museo Civico, Bologna, Italy.)

period], but the Christians destroyed the graves, and used the stones for building-material" ("J. Q. R." vii. 128). It is clear, therefore, that the same fate was then befalling the Jewish monuments which is still annihilating them, like all other antiquities of the Holy Land.

Protection of Graves.

In ancient times the graves had but one enemy, the ravenous jackal (Pliny, "Hist. Nat." viii. 44), and the tombs were, therefore, closed by means of doors, or by large stones (Matt. xxvii. 60, xxviii. 2; John xi. 38), which in the Talmud is often expressed by the phrase סתם הגולל ("he closed the top-stone"; see Kohut, "Aruch Completum," ii. 281; Jastrow, "Dict." p. 222), "golel" being frequently used in combination with "dofeḳ" (Jastrow, *l.c.* p. 287), which signifies a low estrade of stone enveloping the grave on all sides, and probably used to support the stone cover. In addition to closing the grave with a stone, it was occasionally sealed (Krauss, "Leben Jesu," p. 262, Berlin, 1902).



Inscription on the Tombstone of Samuel ben Shealtiel, Dated Monzon, Palencia, 4857 (1096).
(From the "Boletin de la Real Academia de la Historia," Madrid.)

These stone covers, however, must not be confounded with the tombstones erected on graves in honor of the dead. The Sephardic Jews lay these tombstones flat on the graves; but since these monuments are erected to be seen, the upright position, preferred by the German Jews, is the more normal one. In Biblical Hebrew the tombstones are called ציון (II Kings xxiii. 17; Jer. xxxi. 21; Ezek. xxxix. 15), while the Rabbis termed them נפש. The gravestone was erected at the expense of the estate of the deceased (Sheḳ. ii. 5), although it was not necessary to set up a monument in memory of the righteous, since their own deeds (their teachings) were a memorial of them (Yer. Sheḳ. 47a; Gen. R. lxxxii.).

The mishnaic saying (M. Ḳ. i. 1), "The graves should be marked [מציינין] at the festival," probably referred originally to the tombstones, since the Talmud itself bases the passage on the Biblical ציון (M. Ḳ. 5a). It is generally regarded, however, as an allusion to the whitening of the graves after the rainy season (Ma'as. Sh. v. 1; B. Ḳ. 69a, where the reason is given "that the bones are white"), which was done to protect against defilement the numerous pilgrims who traversed the roads at the Passover festival (see Josephus, "Ant." xviii. 2, § 3; Matt. xxiii. 27). R. Bannaah was especially praised for thus marking caves (tombs), including that of Abraham (B. B. 58a), while Simeon ben Lakish is likewise said to have marked the burial-place of R. Ḥiyya (B. M. 85b), and to have cast himself in prayer, for the propitiation of the great, on the graves of the pious (*ib.*), of the Shammaites (Ḥag. 22b), of the justified (*ib.* 16b), and of the wronged (Yoma 87a). In the Middle Ages Jonah Gerondi wished to offer an apology on the grave of Maimonides (Grätz, "Gesch." 3d ed., vii. 98).

Pilgrimages.

The custom of making pilgrimages to famous tombs, and of praying at the graves of parents and ancestors, is still maintained among all classes of Jews. Even in the Biblical period the belief was current that interment beside a great man might work miracles (II Kings xiii. 21). See Pilgrimages.

Judicial procedure required two forms of burial, one for criminals who had been beheaded or hanged, and the other for those who had been stoned or burned (Sanh. 46a), while interment among convicts was the utmost disgrace (Yeb. 32b). The tombs of Gentiles were entirely different from those of Jews

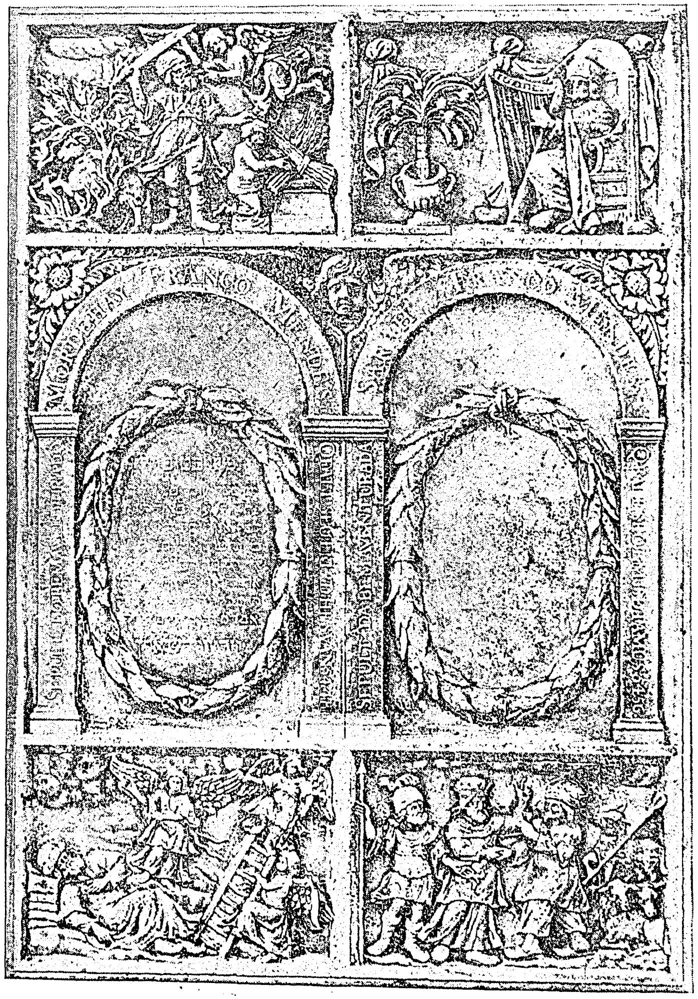
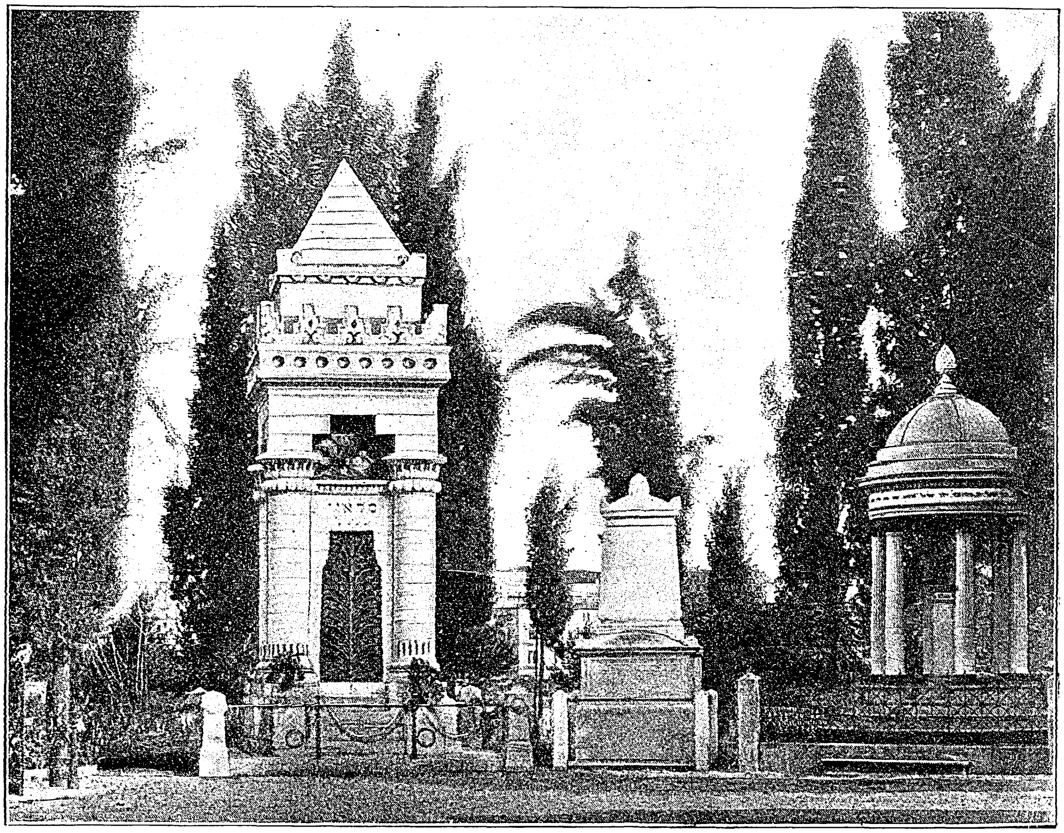
ORNAMENTAL TOMBSTONES FROM THE CEMETERY AT AMSTERDAM.
(From Castro, "Keur van Grafsteenen,")



FRANCO MENDES

DOUBLE TOMBSTONE FROM THE CEMETERY AT AMSTERDAM, DEPICTING BIBLICAL INCIDENTS.
(From Castro, "Keur van Grafsteenen.")

(*ib.* 61a). Special caves were used for the interment of the pious ("ḥasidim") and of the members of the Sanhedrin ("dayyanim"; M. Ḳ. 17a), as well as for still-born children ("nefalim"; Ket. 20b). In the ancient cemetery of Prague the Nefel-Platz is still to be seen: different legends are, however, attached to it, and its origin can not, therefore, be determined. Even at the present time all Jewish communities invariably bury suicides in a separate part of the cemetery. Abba Saul was buried at his father's feet (Sem. xii.), thus reviving in a certain measure the use of family tombs.



Cemetery at Rome.
(From a photograph.)

Every one who beholds a Jewish grave is required to repeat the following prayer: "Blessed be He who begat thee in righteousness, who nurtured thee in righteousness, who letteth thee rest in righteousness, and who will resurrect thee in righteousness. . . . Blessed be He who giveth life to the dead" (Ber. 58b). For other expressions of the religious sentiments of the Jews as displayed in their tombs, see Burial; Burial Society; Cremation; Funeral Rites; Mourning.

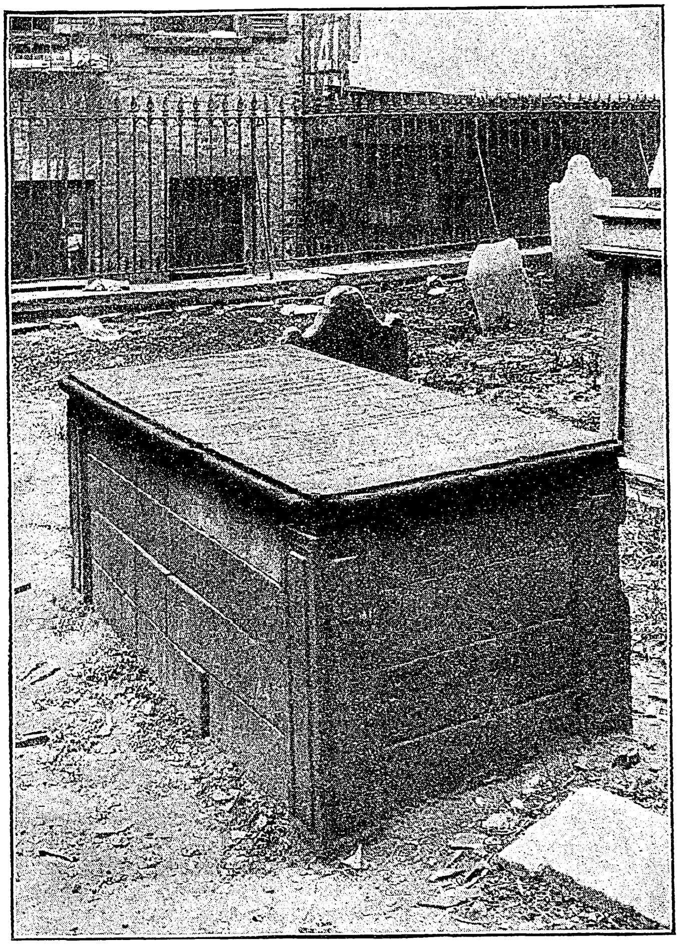
J. S. Kr.

TOMBSTONES (Hebr. מצבה, pl. מצבות): The custom of marking a grave by a stone which bore an inscription describing the qualities of the deceased and giving his age and the date of his death was foreign to the ancient Hebrews. Stones were indeed used to mark the sites of graves, such as the pillar ("maẓẓebah") placed by Jacob on the tomb of Rachel (Gen. xxxv. 20), and the sign ("ẓiyyun") set up according to Ezekiel (xxxix. 16); but they were not intended as monuments and bore no inscriptions. Even in the geonic period the custom seems to have been unknown to the Jews of the East, and it can not, therefore, have been current in Talmudic times. The stone termed "golel" in the Mishnah (Oh. ii. 1), which, according to Hai Gaon, was laid up on the side-walls (dofeḳin), served only to protect the grave from jackals, while that called "ẓiyyun" was merely a mark to warn passers-by against Levitical impurity. Graves in Palestine were not devoid of monumental ornamentations, however, for "nefashot," or stone buildings in the shape of houses or cupolas, were erected, in Phenician fashion, over them ('Er. v. 1; Sheḳ. ii. 5). On the tomb of his father and brothers at Modin, Simon Maccabeus erected a monument consisting of seven pyramids on which were carved armor and

None in Palestine in Biblical or Talmudic Times.

ships (I Macc. xiii. 27-29). Such monuments became the fashion in the first centuries of the common era, while the rivalries which arose between families, and the love of ostentation, led to the spending of great sums for the adornment of graves. To put an end to this extravagance Simeon ben Gamaliel declared that the pious were remembered by their words, and that it was an insult to their memory to put monuments on their graves as though they would have been forgotten without them (Yer. Sheḳ. ii. 7, 47a). It was only outside Palestine that some Jews, adopting the custom of the Greeks and the Romans, began to use tombstones with inscriptions commemorating the status of the deceased. These epitaphs were written in Greek or Latin in the first centuries of the common era, and began with the name of the deceased or with the introductory phrase 'Ενθάδε καῖται (κεῖται) or "Hic jacet" (= "Here lies"), while eulogies recalling Biblical verses and idioms were used as final formulas, as, for instance, Isa. lvii. 2 or Ps. iv. 9. The stones were adorned with a variety of symbols in addition to the epitaphs themselves, the most common being a seven-branched candlestick (in allusion to Prov. xx. 27, "The spirit of man is the candle of the Lord"), a fruit from which sprang an ear of grain (probably an allusion to the resurrection of the dead), an oil-vessel, a palm-branch, or a curved horn representing the Shofar which will be blown by the Messiah to announce the resurrection of the dead. Except for the presence of these symbols, the Jewish tombstones of the first centuries of the common era could not be distinguished from those of the Christians. Later gravestones, however, bore, in addition to the Greek or Latin inscription, the Hebrew formula שלום על ישראל, as does the tombstone of Narbonne of 688; or else they had a Hebrew translation of the Greek or Latin inscription, as does that of Tortosa.



Section of the Old Chatham Square Cemetery, New York.

(From a photograph.)

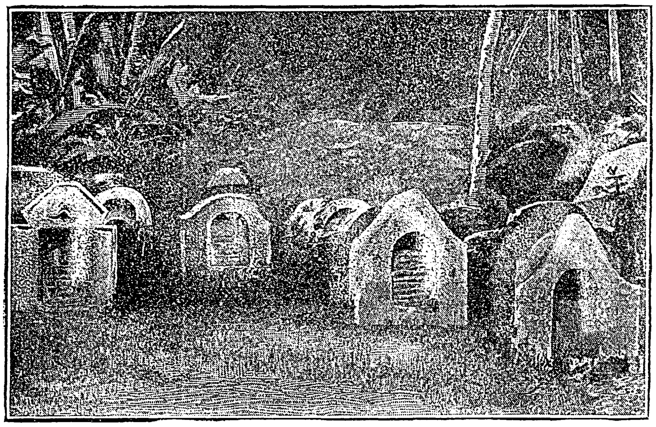
Earliest in Europe.

It can not be determined with certainty when the custom of inscribing Hebrew epitaphs on tombstones first became general among the Jews in Europe. The oldest example known is a gravestone of Brindisi dated 832. It is true that Jacob Mölln (MaHaRIL) asserts that in his lifetime a gravestone was discovered in the cemetery of Mayence bearing a Hebrew epitaph which was eleven hundred years old, but as he does not state that he himself deciphered the inscription, no credence can be given to his assertion ("Liḳḳuṭe Maharil," ed. Warsaw, p. 86b). A characteristic feature of the epitaphs of the early Middle Ages was the simplicity of their style. They usually began with the words הציון הזה, האבן הזאת, or המצבה הזאת, and closed with one of the usual eulogies (see Invocation).

In the later medieval period epitaphs became more detailed and bombastic, and in some German cemeteries various emblems representing the profession of the deceased were added to the inscriptions. Thus, for instance, a tailor had a pair of shears on his tombstone; a musician, a violin or a harp; a goldsmith, a crown and two chains; a physician, a lion holding a sword; and an apothecary, a mortar. In some places in Germany the tombstones bore the emblems of the houses in which the deceased had lived, thus showing figures of dragons, bears, lions, or stars. The tombs of kohanim are distinguished by two open hands as placed during the priestly benediction, while a Levite's gravestone often bears a ewer. Names, especially those derived from plants or from animal life, are frequently represented pictorially; and reliefs of the whole human body are found.

The form of the tombstone was generally very simple; and the material varied considerably in different countries. In Frankfort-on-the-Main gravestones were generally made of red sandstone, rarely of white sandstone or granite. The Ashkenazim usually placed the tombstones upright, while the Sephardim laid them horizontally on the graves.

Inscriptions.



Cemetery of the White Jews of Cochin.

(From a photograph.)

The custom of carving Hebrew inscriptions on gravestones seems to have developed much later in the East than in Europe, since there is no mention of it in geonic literature. Although Benjamin of Tudela attributes the dearth of very ancient tombstones in Palestine to the fact that the Christians destroyed the Jewish graves and used the stones for building-material, this is a mere supposition, and there is no proof whatever that the use of tombstones with Hebrew inscriptions became general in Palestine much earlier than the twelfth century. It is true, on the other hand, that both in the lifetime of Benjamin of Tudela and for several centuries afterward Jewish graves were often destroyed and the stones were used for building purposes in Christian and Mohammedan countries alike. Thus, when the Jews were banished from Fürth, the gravestones of the community were used to erect walls around the city; and David ibn Abi Zimra (sixteenth century) relates that in his lifetime the Egyptian Mohammedans used to steal Jewish tombstones and resell them to Jews after having obliterated the inscriptions. To put an end to this traffic, the local rabbis allowed their congregations to use only newly quarried stones for monuments to the dead (Radbaz, i. 741, quoted by Abrahams, "Jewish Life in the Middle Ages," p. 78). Although tombstones became customary, they were not obligatory (Shulḥan 'Aruk, Yoreh De'ah, 364), and every Jewish cemetery contains some graves without them. The stone was seldom set up before the expiration of a year after the date of death, since the departed soul required that lapse of time before it could be purified. Inscriptions are generally dated according to the era of creation; and the year is preceded by the day of the month, or the Sabbatical section, or both. In some cases the numerical value of a Scriptural phrase is used to mark the date, and there are also instances in which the Christian date is given side by side with the year of creation.

The following are specimens of Hebrew inscriptions found on the tombstones of prominent men. The gravestone of Elijah Levita reads: הלא אבן מקיר תזעק || ותהמה לכל עובר || עלי זאת הקבורה || עלי רבן אשר נלקח || ועלה בשמים || אליהו בסערה || הלא הוא זה אשר האיר || בדקדוק אפלתו || ושם אותו לאורה שנת ש"ט שבט עלה בסופו || ונפשו צרורה בצרור החיים.

"The stone crieth from the wall, and mourneth before every passer-by over the grave—over our rabbi who hath departed and ascended into heaven. Elijah is gone to the Lord in a whirlwind [comp. II Kings ii. 11]—he who shed light on the darkness of grammar and turned it into light. He ascended Shebaṭ toward the end, in the year 309 [= 1549], and his soul is bound up in the bundle of life."

The following epitaph is found on the tombstone of Leon of Modena: ארבע אמות קרקע בחצר זה אגב קנין סודר מימות עולם הקנו ממעל ליהודה אריה ממודינה בזה נסתר ונעלם.

"Four yards of ground in this graveyard, 'by purchase by kerchief,' were from eternity transferred from above to Judah Aryeh of Modena. In these he hid himself and disappeared."

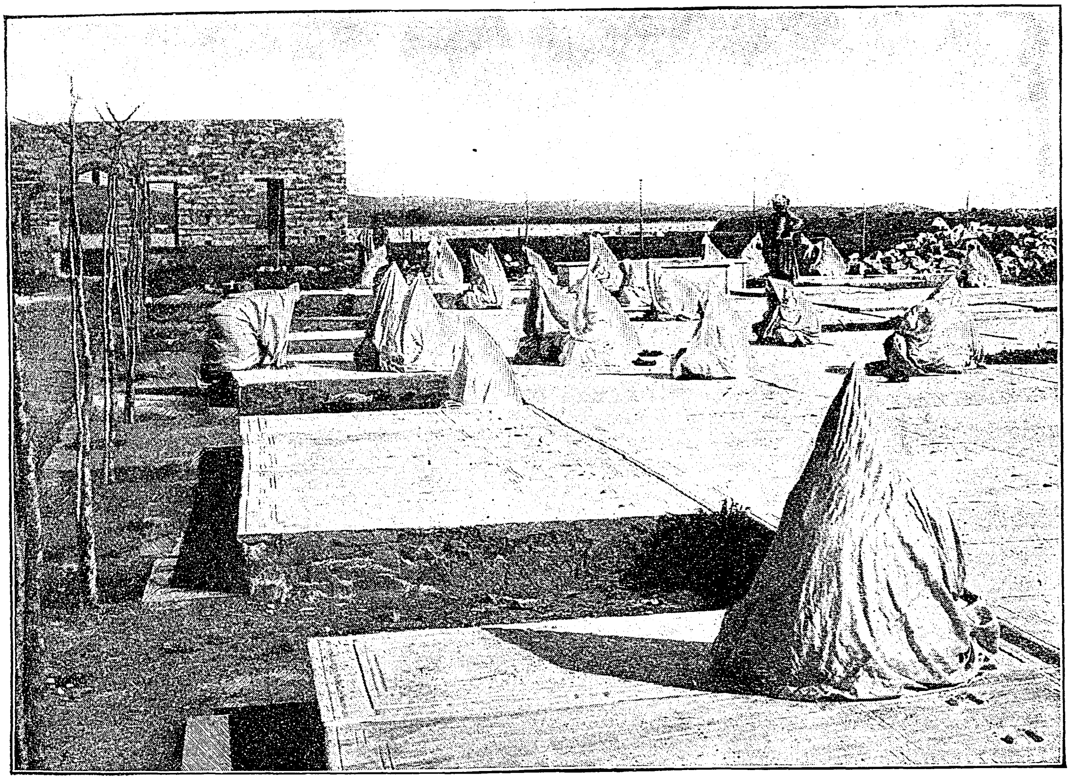
Manasseh ben Israel's tombstone bears the words: לא מת הרב עוד לא כבה נרו || הנה עודנו חי במרומי ערץ || ובעד עטו גם עדן מדברו || נצח יהיה זכרו כימי הארץ.

Examples of Inscription.

"The rabbi did not die; his light is not yet extinguished; he liveth still in the heights of the Terrible. By his pen and the sweetness of his speech his remembrance will be eternal like the days of the earth."

On the tombstone of Joseph Delmedigo is found the following inscription: שאו בכי יללה וקינה וספדו באבילות ובאניה ומרורים שאו כלענה || כי נפל שר וגדול במחנה אשר היה עטרה לחכמי מורשה ותכונה || נאבדה החכמה ונסתרה התבונה הנמצא כזה בכל עבר ופינה || ימה וקדמה נגבה וצפונה אשר רוח אלהים בקרבו נתנה || חכמתו בחוץ תרונה נשמתו תחת כנפי השכינה היא גנוזה וטמונה || מהרו וספדו אוי והוי על גבר על גאון ישראל אשר בין הגזירה עבר || כי הוא זה יוסף המשביר בר אשר שמעו הולך בכל עבר מפרק הרים וסלעים שבר || ולא נעלם ממנו כל דבר בלשון מדברת גדולות ספרים חבר || ספר נובלות החכמה נכבדות בהם מדבר || בתכונה כפשוטה ועיבור || לעשות ספרים הרבה גמר וסבר ובכל שבע חכמות היה כגובר גבר לא הניח דבר קטן וגדול הכל אסף וצבר.

"Take up weeping, wailing, and lamenting, howl in mourning and desolation, suffer bitterness like wormwood, for a chief and a great man is fallen in the camp, one who was the crown of the inherited [sciences, *i.e.*, Jewish learning] and astronomy. Wisdom was lost [with him] and understanding disappeared. Is there one like him in clime or country—west, east, south, north—to whom the spirit of God hath been given? His wisdom singeth in the streets, while his soul, under the wings of the Shekinah, is hidden and preserved. Hasten, break out in lamentations and howlings over the man, the pride of Israel who hath passed away [the phrase בין הגזירה is merely a rhetorical figure in imitation of Gen. xv. 17]. For he is the Joseph who sold corn [*i.e.*, propagated learning; comp. Gen. xlii. 6], whose reputation spread everywhere, who tore up mountains and broke rocks. Nothing was hidden from him. In a tongue that speaketh proud things he composed works. In the 'Noblot Ḥokmah' he creditably speaketh of astronomy and ''ibbur.' To compose many works was his intention and desire. In all the seven sciences he was very efficient. He omitted nothing, small or great; he collected and thesaurized everything."



THE CEMETERY AT TUNIS.

(From a photograph in the possession of Dr. Maurice Fishberg, New York.)

The tombstone of Moses Ḥagiz bears the epitaph: עובר פנה אלי קרא נאוה || תחתי אנוש הכין מעון ביתו || אתמול בהוד זרח מאור פניו || יורה גדולתו ומלכותו || גושי אדמה כתרו היום הדרת גויתו ותפארתו || אילו [read: אין לו] דמות הגוף ואינו גוף לא נערוך אליו || לך רק פקח עין ודע כי עוד תפול תמונתו [תמונתך ?] כמו נפל במכמרתו || יום אחרון שור כי חכם לב יביט לסוף דבר בקדמותו.

"Passer-by, turn toward me, read something beseeming: Underneath me a man prepared his dwelling-place. Yesterday the light of his face shone majestically, showing his greatness and sovereignty; to-day clods of earth encompass the beauty of his body and its brilliancy. It hath neither bodily form nor substance; we can compare naught unto it. It behooveth thee only to keep thine eyes open; know that, like him, as a stillborn child thou wilt fall in its [death's] trap. Beware of the last day, for the wise man foreseeth the end from the beginning."

Some prominent men composed for themselves the epitaphs which they wished to be put on their tombstones, such as the one found on the gravestone of Jonathan Eybeschütz, which reads as follows: יראו כל עובר החרות על הלוחות || האיש אשר עמד לנס והיה כשושן פורחת || ושב אל עפר ומראהו מאיש נשחת || נא שימו על לב לשוב בתשובה ניצחת || תפלה תרבו בעדו לאלקי הרוחות || נפשו אליו יאסוף ובל תהיה נדחת || זכות מעשיכם יגונו כי נפשות ישראל אחת || למדו מוסר לשנוא כבוד ומגדולה תהי נפשיכם בורחת.

"Every passer-by should see what is engraved on these tables. The man who stood as a model, who flourished like a lily, returned to dust, and his visage became marred more than any man's. Pray, take it to heart to repent sincerely and to offer for him many prayers to the Lord of spirits that He should gather to Him his soul, and not cast it away. The merit of your deeds will be a protection, for all the souls of Israel are one. Learn to despise honors and to flee from greatness."

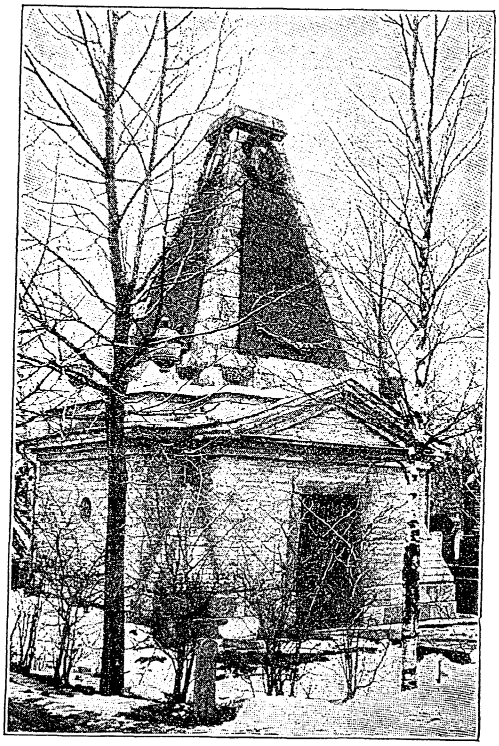
J. I. BR.

The shape of Jewish tombstones varies, as a rule, according to the country in which they are found,

Sarcophagus Model.

though occasionally the Jews carry with them to other countries the practise of their native land. No very careful examination of the development of Jewish tombstones has hitherto been made; but it appears probable that in the earlier instances the grave of an important personage was covered by a stone in the shape of a sarcophagus, at the end of which a description of the person interred beneath it was incised. This is clearly shown in the collection of tombstones in the old Sarajevo cemetery (see Jew. Encyc. xi. 60) and in the tomb of Isaac ben Sheshet (*ib.* vi. 632). A further development of this method is found in the tomb of Joseph Delmedigo at Prague (*ib.* iv. 509), with which may be compared the tombs of Judah Löw ben Bezaleel (*ib.* vii. 354) and Mordecai Meisel (*ib.* viii. 442). All these have ornamental and decorated panels of stone, corresponding, as it were, to the head and foot of an old-fashioned bedstead. From this type the shape of tombstones appears to have developed in two different directions, adopted by the Sephardim and Ashkenazim respectively: The Sephardim, who, at Amsterdam, for example (*ib.* i. 544, iii. 435), used the sarcophagus form without end-pieces, gradually lowered the sarcophagus till it was almost level with the ground, as can be seen in the Beth Holim burial-ground at London (*ib.* viii. 158); the top was rounded, and on this the inscription was engraved. In Amsterdam this rounding was found inconvenient for the somewhat elaborate coats of arms carved upon tombstones, and the top was made perfectly flat, and practically rested on the ground, so that as the graveyard became filled up it was almost entirely paved with tombstones, as at Altona (*ib.* i. 475) and at Tunis. In Cochin occur sarcophagus tombstones on which the inscriptions still retain their original position at the end (see illustration on p. 192). In Italy the sarcophagus form appears to have been retained only as regards the lid, which formed the whole of the tombstone (*ib.* x. 61).



Vault of Friedlander Family at Saint Petersburg, Russia.
(From a photograph.)

With the Ashkenazim, on the other hand, the foot-piece, possibly for economy's sake, was detached from the sarcophagus, and the inscription was incised upon it, apparently on the outside of the grave, as in the case of the Brody cemetery (*ib.* iii. 640), where obviously the inscriptions which abut on the path must be at the ends of the graves, since the latter would otherwise be under the path. Afterward the inscription was cut on the interior of the upright stone, *i.e.*, the portion facing the tomb itself.

The earliest form seems to have been a plain, square, somewhat thick stone, as at Mayence, with which may be compared the Seville tombstone illustrated in Jew. Encyc. xi. 208. This square form is found also in the old cemetery at Worms (see page 562). At Erlangen each grave was marked by a perfectly square block of stone, as can be seen in the article Burial (*ib.* iii. 434). The first attempt at ornament seems to have been to make the top of the stone come to a point, as is seen in many of the tombstones in the old Prague cemetery (*ib.* x. 165). The headstone was shaped at the top, and the inscription was inserted over the head of the corpse and facing the grave itself. A further process was to make a kind of margin for the inscription, which took various forms according to the outline of the stone itself (see illustration on p. 187). Excellent examples of all these types can be seen in the illustration of the Endingen cemetery (*ib.* iii. 639). In the later forms of the sarcophagus tombs of Prague these borders and outlines became very elaborate, as can be seen from the tombstone of Judah Löw (*ib.* vii. 354). Florence uses round pillars instead of the sarcophagus model.

Modern Forms.

In western Europe and America, Jewish tombstones have become exactly similar to those of the surrounding population. Thus, in the United States the stone put over Moses Seixas is a plain square slab of the old-fashioned type (*ib.* xi. 161); that over Judah Touro is a short obelisk (*ib.* ix. 295), while the monument over the grave of Uriah Levy is in its way quite a work of art, and has distinct reference to his naval career (*ib.* viii. 65). In the richer Jewish families the gravestone has already been replaced by a family vault of a somewhat elaborate character. Reference to the following illustrations in The Jewish Encyclopedia (volume and page are given) will show the variety in the shape of tombstones:

TOPAZ. See GEMS.

TOPEKA. See KANSAS.

TOPHET (תפת; תפתה, Isa. xxx. 33): Old Testament term used chiefly by Jeremiah (vii. 31, 32; xix. 6, 11, 12, 13, 14) and once in II Kings (xxiii. 10) to designate a place in one of the valleys just outside the walls of Jerusalem. The meaning of the word is much in dispute. W. Robertson Smith ("Rel. of Sem." p. 227, note) connects it with an Aramaic loan-word which means "fireplaces." The formation of the word is similar to that of "Molech" and "Ashtoreth." The passage in Kings locates the place in the valley of the son of Hinnom. Now there are three valleys in Jerusalem which converge just below the pool of Siloam: Kidron from the east side of the city; Wady al-Rababi from the southwest; and the Tyropœon extending from the Jaffa gate to Siloam. There is no consensus of opinion as to which of these valleys represents the ancient Tophet. There is, however, agreement that the convergence of the three valleys marks a part of Tophet. It is also very generally agreed that Tophet did not extend up the valley of the Kidron on the east side of Jerusalem. It is to be connected, then, either with the Tyropœon depression or, preferably, with the great valley marking the southwest border of the city.

Tophet as described especially in Jer. vii. 31, 32 was dedicated to the horrible rites of human sacrifice, of the immolation of children to Baal and other abominable idols. Josiah takes especial pains (II Kings xxiii. 10) to defile this despicable spot and thus to put a stop to the atrocious sacrifices of human life which had been made by at least two kings of Judah. Jeremiah's references to Tophet characterize it and at the same time specify that the punishment which threatens rebellious Judah shall so revolutionize and reverse current wrongs as to fill this valley with the corpses of those who shall be slain in the impending calamities. Tophet shall henceforth be called "the valley of slaughter" (Jer. vii. 32). After the overthrow of Jerusalem in 586 B.C., and down to New Testament times, incidental references to Tophet or Gehenna (גיא בן הנם) indicate that it was a kind of perpetually burning rubbish-heap, where the refuse of Jerusalem was consumed.

E. G. H. I. M. P.

TORAH (Hebrew, תורה; Aramaic, אורייתא; Greek, Νόμος): Name applied to the five books of Moses, Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. The contents of the Torah as a whole are discussed, from the point of view of modern Biblical criticism, under Pentateuch, where a table gives the various sources; while its importance as a center of crystallization for the Hebrew canon is treated under Bible Canon. The present article, therefore, is limited to the history of the Pentateuch in post-Biblical Judaism.

The Torah receives its title from its contents, the name itself connoting "doctrine." The Hellenistic Jews, however, translated it by νόμος = "law" (*e.g.*, LXX., prologue to Ecclus. [Sirach], Philo, Josephus, and the New Testament), whence came the term "law-book"; this gave rise to the erroneous impression that the Jewish religion is purely nomistic, so that it is still frequently designated as the religion of law. In reality, however, the Torah contains teachings as well as laws, even the latter being given in ethical form and contained in historical narratives of an ethical character.

Name.

In the books of the Bible the following names of the Pentateuch occur: ספר תורת יהוה in II Chron. xvii. 9, Neh. ix. 3, and, with the added epithet ביד משה, II Chron. xxxiv. 14; while תורת יהוה alone, without ספר, is found in II Kings x. 31, I Chron. xxii. 11, and II Chron. xii. 1, xxxi. 3, 4, and xxxv. 26. Sometimes אלהים, or a word of similar meaning, is added, as ספר תורת אלהים, Josh. xxiv. 26, Neh. viii. 18 (without ספר, *ib.* x. 29). Another designation is ספר תורת משה, Josh. viii. 31, xxiii. 6; II Kings xiv. 6; Neh. viii. 1; or תורת משה, I Kings ii. 3; II Kings xxiii. 25; Mal. iii. 22 (A. V. iv. 4), with the addition of עבדי; Ezra iii. 2 (with the addition of איש האלהים), vii. 6; ספר משה, II Chron. xxv. 4 (preceded by בתורה), xxxv. 12. The oldest name doubtless is ספר התורה (Deut. i. 5; xxxi. 9, 11, 24; xxxii. 46; Neh. viii. 2), sometimes shortened to התורה (Deut. i. 5; xxxi. 9, 11, 24; xxxii. 46; Neh. viii. 2), or to הספר (Neh. viii. 5), or to תורה (Deut. xxxiii. 4). The last two names occur with great frequency in Jewish tradition, where the Torah becomes a living creature. The expression "the five books," which is the origin of the term "Pentateuch," occurs only in Jewish tradition, which has also been the source for "Genesis," etc., as the names of the books of the Pentateuch (see Blau, "Zur Einleitung in die Heilige Schrift," pp. 40-43).

Quinary Division of the Torah.

Division into Sections.

According to all critics, regardless of the schools to which they belong, the Torah forms a single work, which is represented, even at the present day, by the synagogal Scroll of the Law; nor does history know of any other Torah scroll. The fivefold division of the Pentateuch was due to purely external causes, and not to a diversity of content; for in volume the Torah forms more than a fourth of all the books of the Bible, and contains, in round numbers, 300,000 letters of the 1,100,000 in the entire Bible. A work of such compass far exceeded the normal size of an individual scroll among the Jews; and the Torah accordingly became a Pentateuch, thus being analogous to the Homeric poems, which originally formed a single epic, but which were later split into twenty-four parts each. Like them, moreover, the Pentateuch was divided according to the sense and with an admirable knowledge of the subject (Blau, "Althebräisches Buchwesen," pp. 47-49), while subdivisions were also made into the so-called open and closed "parashiyyot," whose exact interrelation is not yet clear. There are in all 669 sections, 290 open and 379 closed. Another class of parashiyyot divides the weekly lessons, now called "sidrot," into seven parts. The Torah also falls, on the basis of the lessons for the Sabbath, into 54 sidrot according to the annual cycle, and into 155 according to the triennial cycle. The former division, which is now used almost universally, is the Babylonian; and the latter, which has recently been introduced into some Reform congregations, is the Palestinian. The latter class of sidrot, however, has no external marks of division in the scrolls of the synagogue; while the divisions in the former, like the parashiyyot, are indicated by blank spaces of varying length (see Sidra). This probably implies a greater antiquity for the sections which are thus designated, although the divisions into 5,845 verses, which seem to be still older, have no outward marks. The system of chapters was introduced into the editions of the Hebrew Bible, and hence into the Torah, from the Vulgate. This mode of division is not known to the Masorah, though it was incorporated in the final Masoretic notes, for individual books of the Pentateuch. It is given in modern editions of the Hebrew Bible simply on the basis of the stereotyped editions of the English Bible Society, which followed earlier examples.

The external form of the Torah is discussed in such articles as Manuscripts, Scroll of the Law, and Mantle of the Law; but so numerous are the assertions of tradition concerning its contents and its value that the repetition of even a very small part of them would far exceed the limits of this article. Every page of the Talmud and Midrash is filled with citations from the Pentateuch and with the most fulsome praise of it, united with superhuman love and divine respect therefor. In the five volumes of Bacher's work on the Haggadah, the Torah and its study form a special rubric in the

Jewish Tradition and the Torah.

account of each "sofer," or scholar of the Law. In all probability there never was another people, except possibly the Brahmans, that surrounded its holy writings with such respect, transmitted them through the centuries with such self-sacrifice, and preserved them with so little change for more than 2,000 years. The very letters of the Torah were believed to have come from God Himself (B. B. 15a), and were counted carefully, the word "soferim" denoting, according to the Talmud (Ḳid. 30a), "the counters of the letters." A special class of scholars devoted all their lives to the careful preservation of the text ("Masorah"), the only analogy in the literature of the world being found in India, where the Vedas were accurately preserved by similar means.

Preexistence of the Torah.

The Torah is older than the world, for it existed either 947 generations (Zeb. 116a, and parallels) or 2,000 years (Gen. R. viii., and parallels; Weber, "Jüdische Theologie," p. 15) before the Creation. The original Pentateuch, therefore, like everything celestial, consisted of fire, being written in black letters of flame upon a white ground of fire (Yer. Sheḳ. 49a, and parallels; Blau, "Althebräisches Buchwesen," p. 156). God held counsel with it at the creation of the world, since it was wisdom itself (Tan., Bereshit, *passim*), and it was God's first revelation, in which He Himself took part. It was given in completeness for all time and for all mankind, so that no further revelation can be expected. It was given in the languages of all peoples; for the voice of the divine revelation was seventyfold (Weber, *l.c.* pp. 16–20; Blau, "Zur Einleitung in die Heilige Schrift," pp. 84–100). It shines forever, and was transcribed by the scribes of the seventy peoples (Bacher, "Ag. Tan." ii. 203, 416), while everything found in the Prophets and the Hagiographa was already contained in the Torah (Ta'an. 9a), so that, if the Israelites had not sinned, only the five books of Moses would have been given them (Ned. 22b). As a matter of fact, the Prophets and the Hagiographa will be abrogated; but the Torah will remain forever (Yer. Meg. 70d). Every letter of it is a living creature. When Solomon took many wives, Deuteronomy threw himself before God and complained that Solomon wished to remove from the Pentateuch the yod of the word ירבה (Deut. xvii. 17), with which the prohibition of polygamy was spoken; and God replied: "Solomon and a thousand like him shall perish, but not one letter of the Torah shall be destroyed" (Lev. R. xix.; Yer. Sanh. 20c; Cant. R. 5, 11; comp. Bacher, *l.c.* ii. 123, note 5). The single letters were hypostatized, and were active even at the creation of the world (Bacher, *l.c.* i. 347), an idea which is probably derived from Gnostic speculation. The whole world is said to be only $\frac{1}{3200}$ of the Torah ('Er. 21a).

Israel received this treasure only through suffering (Ber. 5a, and parallels), for the book and the sword came together from heaven, and Israel was obliged to choose between them (Sifre, Deut. 40, end; Bacher, *l.c.* ii. 402, note 5); and whosoever denies the heavenly origin of the Torah will lose the future life (Sanh. x. 1). This high esteem finds its expression in the rule that a copy of the Pentateuch is unlimited in value, and in the ordinance that the inhabitants of a city might oblige one another to procure scrolls of the Law (Tosef., B. M. iii. 24, xi. 23). The pious bequeathed a copy of the Torah to the synagogue (*ib.* B. Ḳ. ii. 3); and it was the duty of each one to make one for himself, while the honor paid the Bible greatly influenced the distribution of copies and led to the foundation of libraries (Blau, "Althebräisches Buchwesen," pp. 84–97).

Study of the Torah.

The highest ideal of young and old and of small and great was the study of the Law, thus forming a basis for that indomitable eagerness of the Jewish people for education and that unquenchable thirst for knowledge which still characterize them. "As the child must satisfy its hunger day by day, so must the grown man busy himself with the Torah each hour" (Yer. Ber. ch. ix.). The mishnah (Pe'ah i.) incorporated in the daily prayer declares that the study of the Law transcends all things, being greater than the rescue of human life, than the building of the Temple, and than the honor of father and mother (Meg. 16b). It is of more value than the offering of daily sacrifice ('Er. 63b); a single day devoted to the Torah outweighs 1,000 sacrifices (Shab. 30a; comp. Men. 100a); while the fable of the Fish and the Fox, in which the latter seeks to entice the former to dry land, declares Israel can live only in the Law as fish can live only in the ocean. Whoever separates himself from the Torah dies forthwith ('Ab. Zarah 3b); for fire consumes him, and he falls into hell (B. B. 79a); while God weeps over one who might have occupied himself with it but neglected to do so (Ḥag. 5b). The study must be unselfish: "One should study the Torah with self-denial, even at the sacrifice of one's life; and in the very hour before death one should devote himself to this duty" (Soṭah 21b; Ber. 63b; Shab. 83b). "Whoever uses the crown of the Torah shall be destroyed" (Ned. 62a). All, even the lepers and the unclean, were required to study the Law (Ber. 22a), while it was the duty of every one to read the entire weekly lesson twice (Ber. 8a); and the oldest benediction was the one spoken over the Torah (*ib.* 11b). Prophylactic power also is ascribed to it: it gives protection against suffering (*ib.* 5a), against sickness ('Er. 54b), and against oppression in the Messianic time (Sanh. 98b); so that it may be said that "the Torah protects all the world" (Sanh. 99b; comp. Ber. 31a). The following sayings may be cited as particularly instructive in this respect: "A Gentile who studies the Torah is as great as the high priest" (B. Ḳ. 38a). "The practise of all the laws of the Pentateuch is worth less than the study of the scriptures of it" (Yer. Pe'ah i.), a conclusive refutation of the current view of the Nomism of the Jewish faith. After these citations it becomes readily intelligible that, according to the Talmudic view, "God Himself sits and studies the Torah" ('Ab. Zarah 3b).

The spirit of criticism naturally developed from this devotion to the Pentateuch, in spite of faith and reverence. The very existence of the doctrine that the Law was of heavenly origin, and that whosoever

Criticism of the Torah Among Jews.

denied this dogma had no share in the life to come (Sanh. x.), shows that there was a school which assumed a critical attitude toward the Torah. There is much evidence in proof of this; but here only the history of criticism within the orthodox synagogue will be discussed. It was a moot point whether the Law was given all at once or in smaller rolls at different times (Giṭ. 60a); and the further question was discussed, whether Moses or Joshua wrote the last eight verses of the Pentateuch (B. B. 14b–15a). It was definitely affirmed, on the other hand (*ib.*), that Moses composed the sections concerning Balaam (Num. xxii.-xxiv.), thus closing all discussions on that score. Many tacit doubts are scattered through the Talmud and Midrash, in addition to those which Einstein has collected. In the post-Talmudic period, in like manner, there was no lack of critics, some of them recognized as such again only in recent times, although Abraham ibn Ezra, who was joined by Spinoza, has long been recognized as belonging to this class.

Composition.

The composition of the Torah should be discussed on the basis of the old Semitic concepts, which planned a work of literature practically rather than systematically. Repetitions, therefore, should not be eliminated, since things which are good and noble may and should be brought to remembrance many times. From the point of view of effective emphasis, moreover, a change of context may develop a new and independent application of a given doctrine, especially if it be repeated in other words. Thus tradition (The Thirty-two Rules of Eliezer b. Jose ha-Gelili) took "the repeated doctrine" as its rule of interpretation, and left large numbers of repetitions (parallel passages) in its collections of oral teachings. The framework of the Pentateuch is historical narrative bound together by the thread of chronology. There is no rigid adherence to the latter principle, however; and the Talmud itself accordingly postulates the rule: "There is no earlier and no later in the Torah" (Pes. 6b *et passim*). From a Masoretic point of view, the Mosaic code contains the history of a period of about 2,300 years. As has already been noted in regard to the names of the individual books, the Talmud and the Masorah divided the Torah into smaller units according to its contents, so that Genesis includes the story of Creation and of the Patriarchs, Exodus the account of the departure from Egypt, the revelation, and so on.

Style.

The style of the Pentateuch, in keeping with its content, differs widely from the diction of the Prophets and the Psalms. It is less lofty, although it is not lacking in dramatic force, and it is concrete rather than abstract. Most of the laws are formulated in the second person as a direct address, the Decalogue being the best example. In certain cases, however, the nature of the subject requires the third person; but the Torah reverts as quickly as possible to the second as being the more effective form of address (comp., for example, Deut. xix. 11–21). In the Pentateuch, temporal depiction is the usual method. The process of creation, rather than the universe as a whole, is described; and the account brings the world visibly into being in six main parts. In the creation of man, of plants, and of paradise God is seen at work, and the same process of coming into being may be traced in the ark of Noah and similar descriptions. A remarkable example of word-painting is the account of the consecration of Aaron and his sons to the high-priesthood (Lev. viii.). Here the reader watches while Moses washes the candidates, dresses them, etc. ("Magyar-Zsidó Szemle," ix. 565 *et seq.*). Naïve simplicity is a characteristic trait of Pentateuchal style, which understands also the art of silence. Thus, as in all great products of world-literature, feminine beauty is not described in detail; for Sarah, Rachel, and other heroines are merely said to be beautiful, while the completion of the picture is left to the imagination of the reader.

Laws of the Torah.

The contents of the Torah fall into two main parts: historical and legal. The latter commences with Ex. xii.; so that the Tannaim maintained that the Law actually began there, proceeding on the correct principle that the word "Torah" could be applied only to teachings which regulated the life of man, either leading him to perform certain acts (commands = מצות עשה) or restraining him from them (prohibitions = מצות לא תעשה). The Talmud enumerates a total of 613 rules, 248 being commands and 365 prohibitions (see JEW. ENCYC. iv. 181, *s.v.* COMMANDMENTS, THE 613). In the post-Talmudic period many works were written on these 613 "miẓwot," some even by Maimonides. The legal parts of the Pentateuch include all the relations of human life, although these are discussed with greater detail in the Talmud (see TALMUDIC LAWS). The Torah recognizes no subdivisions of the commandments; for all alike are the ordinances of God, and a distinction may be drawn only according to modern ideas, as when Driver (in Hastings, "Dict. Bible," iii. 66) proposes a triple division, into juridical, ceremonial, and moral "torot."

Penal Law.

Montefiore was correct when, in laying emphasis on the ethical aspect of the Biblical concept of God, he declared that even the law of the Bible was permeated with morality, propounding his view in the following words ("Hibbert Lectures," p. 64): "Most original and characteristic was the moral influence of Jahveh in the domain of law. Jahveh, to the Israelite, was emphatically the God of the right. . . . From the earliest times onward, Jahveh's sanctuary was the depository of law, and the priest was His spokesman." The most prominent characteristic of the Pentateuchal law, as compared with the laws of ancient peoples and of medieval Europe, is mildness, a feature which is still further developed in the Talmud. The Torah is justly regarded as the source of humane law. Although such phrases occur as "that soul shall be cut off from his people" or "so shalt thou put the evil away from the midst of thee," it would be incorrect to take them literally, or to deduce from them certain theories of penal law, as Förster has recently done. On the contrary, these expressions prove that the Mosaic law was not a legal code in the strict sense of the term, but an ethical work. Although the Talmudists made it a penal code, instinctively reading that character into it, the penal law of the Torah is something theoretical which was never put into practise. This view is supported by the fact that a commandment is stated sometimes without the threat of any penalty whatever for its violation, and sometimes with the assignment even of death as a punishment for its transgression. In like manner, tradition frequently substitutes such a phrase as "he forfeited his life" for "transgression worthy of death."

Civil Law.

On the other hand, the civil law of the Torah, which is more developed and bears a practical character, probably accords more closely with ancient Jewish legal procedure. It reflects the conditions of an agricultural state, since most of the laws relate to farming and cognate matters. There was no Hebrew word for "store," although "just measure" was mentioned. It must be borne in mind, however, that to satisfy the more advanced conditions of later times, the Talmudists both supplemented the Mosaic law and by means of analogy and similar expedients interpolated into the Torah much which it did not contain originally.

From the earliest times the Synagogue has proclaimed the divine origin of the Pentateuch, and has held that Moses wrote it down from dictation, while the religions based on Judaism have until very recently held the same view. Biblical criticism, however, denies the Mosaic authorship and ascribes only a portion of varying extent to so ancient an origin. A history of criticism in regard to this point is given by Winer ("B. R." ii. 419 *et seq.*) and by Driver (in Hastings, "Dict. Bible," iii. 66), while Montefiore expresses himself as follows (*l.c.*):

> "The Torah—or teaching—of the priests, half judicial, half pædagogic, was a deep moral influence; and there was no element in the religion which was at once more genuinely Hebrew and more closely identified with the national God. There is good reason to believe that this priestly Torah is the one religious institution which can be correctly attributed to Moses. . . . Though Moses was not the author of the written law, he was unquestionably the founder of that oral teaching, or Torah, which preceded and became the basis of the codes of the Pentateuch."

The legal parts of the Torah are found in Ex. xx.-xxiii., xxv.-xxxi., xxxiv.-xxxv.; Lev. i.-viii., xi.-xxv., xxvii.; Num. v.-x., xviii., xix., xxvii.-xxx., these laws being repeated in Deut. iv. *et seq.*

TORAT KOHANIM (THE SIFRA). See MIDRASH HAGGADAH.

TORDESILLAS: Spanish city near Valladolid, with a Jewish community, which was visited by Vicente Ferrer toward the end of 1411 for propagandic purposes. He advised the Jews of the city to change their abode for the narrow ghetto of Valladolid, but his counsel was disregarded. In 1474 the number of Jews in Tordesillas was still so great that they paid 900 maravedis in taxes. Tordesillas was the birthplace of Moses ha-Kohen de TORDESILLAS.

TORDESILLAS, MOSES HA-KOHEN DE: Spanish controversialist, who was called upon to suffer for his faith, an attempt being made to convert him to Christianity by force. Despite cruel persecution, he remained true to his convictions, although he was robbed of all his possessions and reduced to poverty. Before long he was chosen rabbi by the community of Avila, where he was compelled to carry on a religious debate, about 1372, with the convert JOHN OF VALLADOLID in the presence of Christians and Mohammedans. It was an easy task for Moses ha-Kohen, who was acquainted with the Christian sources, to refute in four debates the arguments of his opponent, who tried to prove the Christian dogmas from the Scriptures. Soon afterward he was obliged to enter upon a new contest with a disciple of the convert ABNER OF BURGOS, with whose writings, especially with his "Mostrador de Jeosticia," Moses was thoroughly acquainted. In 1374, at the desire of the members of his community, he wrote, in the form of a dialogue between a Jew and a Christian, the main substance of his debates, which treated of the Trinity, of the virginity of Mary, of sacrifice, of the alleged new teachings of Jesus and of the New Testament, of the seven weeks of Daniel, and of similar matters. His book, which is divided into seventeen chapters, dealing with 125 passages emphasized by Christian controversialists, is entitled "'Ezer ha-Emunah" (The Support of Faith). It was sent by its author to David ibn Ya'ish at Toledo, and manuscripts of it are found at Oxford, Berlin, Parma, Breslau, and elsewhere.

TORONTO: Canadian city; capital of the province of Ontario. Toronto possesses four regularly organized Jewish congregations, the oldest being the Holy Blossom congregation, which had its beginnings in 1845, though it was not formally organized until 1852. Its first synagogue was in Richmond street, the building being dedicated in 1857; later the congregation moved to its present home in Bond street. Attached to it is a large and well-organized Sabbath-school. The Goel Tsedek congregation, founded in 1880, has a synagogue in Elm street; the Shomerei Shabbas, an Austrian congregation organized in 1891, worships in Chestnut street; and the Chevra Tillim congregation, organized in 1895, is at Richmond and York streets. In addition to these there are a number of minor congregations, formed in recent years, but acquiring a large membership and steadily growing in importance.

The Jewish communal institutions of Toronto include organizations of a philanthropic, educational, religious, and literary character. Among these are the Jewish Benevolent Society, the Ladies' Montefiore Aid Society, the Ḥebra Ḳaddisha, the Toronto Hebrew Ladies' Aid Society, the Ḥebra Linous Hatsedek, the Austrian Hebrew Ladies' Aid Society, a branch of the Anglo-Jewish Association, the Toronto branch of the Council of Jewish Women, the Young Men's Hebrew Association, the Jewish Literary Society, the Talmud Torah, the Toronto Hebrew Benevolent Society, the Jewish Shelter Society, the Judean Club, several lodges, and four Zionist organizations—the Agudath Zion, Toronto Daughters of Zion, B'nai Zion Association, and Ahavath Zion Society.

Toronto has a population of 207,971, of whom about 7,000 are Jews.

TORQUEMADA, TOMAS DE. See Auto da Fé; Inquisition.

TORRE, LELIO (HILLEL) DELLA: Italian rabbi and educator; born in Cuneo, Piedmont, Jan. 11, 1805; died in Padua July 9, 1871. His father, Solomon Jehiel Raphael ha-Kohen, died in 1807; and Lelio was brought up by his uncle Sabbatai Elhanan Treves, a rabbi in Piedmont. From 1823 to 1829 he acted as tutor in Hebrew and in Biblical exegesis in the Collegio Colonna e Finzi founded in Turin by the Jewish community; and in 1827 he was appointed assistant rabbi. When the rabbinical college was founded in Padua in 1829, Della Torre was appointed professor of Talmud, homiletics, and pastoral theology, which position he held until his death; in 1869 he occupied for several months, during a vacancy, the rabbinical chair of Padua. Cuneo, his native town, honored him by engraving his name on a bronze tablet among those of the most illustrious citizens of Italy.

Besides his thorough familiarity with all branches of Hebrew literature and Jewish history, Della Torre was master of several ancient and modern languages, writing Hebrew, Italian, and French with equal facility. He wrote numerous Hebrew poems, most of which were included in his collection "Ṭal Yaldut," which, together with a supplement of later compositions entitled "Egle Ṭal," appeared in Padua in 1868. He was the author also of various articles in Hebrew periodicals, treating mostly of subjects relating to the science of Judaism and written in pure classical Hebrew. They may be found in "Kerem Ḥemed" (iv. 9), in the new "Bikkure ha-'Ittim," in "Oẓar Neḥmad" (i.), and in various volumes of "Kokebe Yiẓḥaḳ." Of his published works the following may be mentioned: "Cinque Discorsi," Padua, 1834; "Della Condizione Degli Ebrei Sotto l'Impero Germanico nel Medio Evo," *ib.* 1842; "I Salmi Volgarizzati sul Testo Massoretico ed Illustrati con Argomenti e Note. Parte Prima, Testo, Traduzione ed Argomenti," Vienna, 1845; "Preghiere degl' Israeliti. Traduzione dall' Ebraico," *ib.* 1846; "Orazioni per Ordinazioni Rabbiniche," Venice, 1852; "Poésies Hébraïques," Padua, 1869; "Iscrizioni Sepolcrali," *ib.* 1870; and "Pensieri sulle Lezioni Sabbatiche del Pentateucho," *ib.* 1872. His "Orazioni Postume" (Padua, 1879, pp. 189-202) contains an autobiographical sketch and a complete list of his works.

Bibliography: *Oẓar ha-Sifrut*, iii. 91-92; S. Jona, in *Corriere Israelitico*, 1872.

S. P. Wi.

TORT (Hebrew, נזיקין: Latin, "delictum"): Any wrongful act, neglect, or default whereby legal damage is caused to the person, property, or reputation of another. Liability arises either from contract or from tort. Direct and wilful tort is Trespass. Trespass on the person is Assault and Battery. Other torts arise from lack of skill or care (see Accident; Bailments [sometimes deemed liabilities from contract]; Fault; Fraud and Mistake; Goring Ox). Among the torts not elsewhere treated are:

Mesne Profits: The income derived from land unlawfully held by the possessor, for which he is answerable to the true owner when the latter recovers the land from him by the judgment of a court. The Talmud speaks of the possessor of land without right as the "robber of the land" (in English law, "disseizor"); and he, or even a third person who takes fruits or branches from land thus withheld from the true owner, is considered as morally guilty of robbery (see the prohibition of an Israelite using, in the ritual thyrsus on the Feast of Booths, a palm-branch or citron taken from land held by a disseizor [Suk. iv. 1, 2]). The liability to pay mesne profits is implied and rather distantly indicated in the Mishnah (Giṭ. v. 2). Assuming that he who sells land with warranty is liable not only for the price of the land which he receives, but also for the mesne profits which the purchaser will have to pay after eviction to the true owner, it is here taught that from motives of public policy the warranty inserted in the deed of sale, though in the nature of a bond, is to be levied, as far as it secures the purchaser against this liability, only upon "free property," not on "subjected property," *i.e.*, on lands which in the meanwhile have been given away, sold, or encumbered (for the distinction see Deed). The Gemara (B. M. 14a, b) discusses this matter fully in the light of the warranty, the liability of the unlawful possessor being taken for granted (see Maimonides, "Yad," Gezelah, ch. xiv.).

In the Mishnah and Talmud.

Depasturing: A liability for full damages is imposed by Ex. xxii. 4 (Hebr.). "If a man pastures on field or vineyard and sends his cattle to pasture in the field of another, he shall make it good with the best of his field and the best of his vineyard." When he pastures thus purposely, it is really a trespass; but the liability for "foot or tooth" is often as full when beasts go of themselves into the domain of another. Accidental injuries of this kind have been referred to under Accident. But when a beast eats the neighbor's produce, is the owner liable for the harm done, or only for his profit by its eating? In the case put in Scripture he is of course bound for the former. Other cases are thus put by

Maimonides ("Yad," Nizḳe Mamon, iii. 6-12), who draws from B. Ḳ. 14-27 *passim*:

Wilful and Accidental.

When, from necessity, a beast eats something not its usual food, *e.g.*, when an ass eats vetches or fish, the owner pays full damage, if the occurrence took place on the grounds of the injured party; but if on the highway, he pays only the amount which he has profited. Where a beast of prey enters the grounds of the injured party and tears or devours a domestic animal, the owner of the beast is liable for full damage, because it is its nature to act in the manner as it did: but if a dog should trespass and eat lambs or a cat eat grown hens, only half damage is due; for this is unusual. When an ass, finding bread in a basket, eats the bread and breaks the basket, the owner pays full damage for both. Where a beast, whether walking or standing, eats grass from the middle of a square, the owner pays what he profits: where it eats from the side he pays full damage. For what it eats out of the door of a shop, its owner is required to pay the equivalent of what he has profited thereby; from the interior of the shop, full damage. If, walking along the road, a beast eats off the back of another beast, only the saving in fodder is paid for; if it jumps out of its place, full damage is due. If one's beast glides or stumbles into another's garden and eats, etc., the owner owes only for what he profits, even if the beast goes from bed to bed, or stays in the garden all day; but if it walks into the garden in the regular way, there is liability for full damage. So, also, if it is pushed into the garden by a companion; for the owner should lead his herd in single file.

Unintentional Injury: Though "a man is always forewarned," that is, liable for his actions, asleep or awake, intentional or unintentional (see Assault and Battery, and authorities there cited), there is a broad exception to the rule; viz., when the mischief is done on the ground of the injuring party. For what a man does within his own domain, he is liable in damages only if it was done wilfully; but he is not liable if done either unconsciously or under compulsion. Where a man climbs a ladder, and a rung falls out under him and strikes another, he is liable if the rung was not strong enough or not well set; but if it was strong and well set, the harm done is regarded as providential, and he goes clear, even if it happened within the domain of the injured party; while on his own ground he would go clear in either case ("Yad," Ḥobel, iv. 3, 4, based on B. Ḳ. 28).

Betrayal: The man of violence ("annas," generally denoting an arbitrary or cruel official of the Gentile kingdom) is often mentioned in the Talmud and the codes. The most odious among torts was that of betraying the person or property of a fellow Israelite into the hands of the annas (see B. Ḳ. 5a, 114a; "Yad," Ḥobel, viii.; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 328). In the 'Aruk it is put thus: "He who [by informing] delivers up property into the hands of an annas, whether Gentile or Jew, is bound to make good, from the best part of his estate, whatever the annas has taken, though he has not handled the thing at all, but has only shown the way; and if he dies, the damage done is levied from his estate in the hands of his heirs." The informer is excused if he has given information under bodily duress; but if he has handled the property himself, he is liable even then; for a man has no right to save himself at the cost of another. Further on, a religious sanction is given to this civil liability: "He who delivers up an Israelite, either in his body or in his property, to the Gentile has no share in the world to come." And on the strength of a case reported in B. B. 116a it is also said that it is not only permissible but meritorious to kill an informer in order to put a stop to his villainous trade.

Informers.

Elder "Put to Shame."

Slander and Insult: It has been shown under Assault and Battery that the insult or humiliation incidental to an assault is to be paid for separately; but in the case of an insult when there is no assault, even when one spits at another and does not reach his body but only his garment, there is no ground for recovery (B. Ḳ. 91a). And in the same connection a Palestinian amora is quoted: "The tradition goes [זאת אומרת], 'He who shames another by words is free from everything.'" But the Jerusalem Talmud (B. Ḳ. 6c) makes an exception in favor of the "elder," meaning a rabbi. Thus: "He who puts an elder to shame pays him the price of his shame. One Meshullam affronted R. Judah ben Ḥanina: the matter came before R. Simeon ben Laḳish; and he fined Meshullam a litra of gold." This precedent was carried into the Halakah; and all the Geonim followed it. They applied it to every scholar (תלמיד חכם), and thus the rule appears in the code of Maimonides ("Yad," Ḥobel, iii. 5), where the penalty is put at 35 denarii of gold (the weight of 8¾ shekels of gold); but he adds that in Spain many of the scholars waive their privilege. While others than scholars have no civil remedy for insult or slander, the act of "blanching a man's face in public" or that of "attaching a nickname to one's neighbor" is, as has been seen in Ona'ah, among the unpardonable sins punished in the future world. It is also found (Ket. 46a) that the sin of "bringing out an evil report" (slander) is fully recognized, on the strength of the text "Thou shalt not go up and down as a tale-bearer among the people" (Lev. xix. 16); but there is no civil remedy for the wrong done.

TORTOISE: Rendering in the Authorized Version of the Hebrew word "ẓab" (Lev. xi. 29; see Lizard). Some commentators assume "gallim" in Hos. xii. 12 to mean "tortoises," a view which has the support of the Septuagint, the Peshiṭta, and old Arabic versions. Two species of land tortoise, *Testudo græca* and *Testudo leithii*, and several of the aquatic tortoises have been found in Palestine. Of the latter the *Emys caspica* is the most numerous.

The Talmud uses "ẓab" and also "zabuni" to denote the toad (Ṭoh. v. i). In Ber. 33a it is said that the water-snake is the issue of the toad and the snake. The tortoise is assumed to be intended in כילתא and כילי in Nid. 17a and Gen. R. lvii. 2.

TORTOSA: City in Catalonia where Jews lived and owned land as early as the Roman period. This Jewish community was one of the richest in the country in the thirteenth and fourteenth centuries, and had certain ancient privileges which were confirmed from time to time until 1328. In 1262 the "bayle" of Tortosa and farmer of the royal taxes was Astruc Jacob Xixen or Xuxen (Shushan). The Jews of the city owed him 9,000 sueldos, and on their refusal to pay, the king, with whom he stood in special favor, and who had granted him privileges for life, gave him the right of distrainer.

The Jews of Tortosa were always ready, however, to make sacrifices if it was for the good of the country. When James II. was in need of money for conquering the county of Urgel, which also contained Jewish communities, the Jews of Tortosa, together with those of Barcelona, Gerona, Valencia, and Lerida, furnished him with 115,000 livres; and when Alfonso, the son and successor of James, was fitting out a fleet in 1323 for the conquest of Cerdeña, the Jewish community of Tortosa contributed and manned two ships, being exempted from all taxes for several years in recognition of their services.

The chief occupations of the Jews of this city were farming, viniculture, commerce, and manufacturing. In 1220 the brothers Astruc of Tortosa possessed lands upon the island of Majorca. They owned large establishments for dyeing linen and cotton, and sold their wares in a special marketplace. They were allowed to take an annual interest of four dinars per livre, but were subject to heavy special taxes, since they were obliged to pay the state 4,000 sueldos in 1284 alone, as table-moneys ("cenas"), in addition to the municipal assessments on their houses and lands. On its own responsibility the Jewish community in Tortosa ordained that, to be valid, all marriages must be performed before authorized persons of the community and in the presence of ten grown men, and that any woman of Tortosa could contract a new marriage without a previous ritualistic divorce, unless married in this fashion. The year of terror, 1391, was eventful for the Jews in Tortosa as well as in other cities. The community, previously so wealthy, could no longer pay its taxes, and there, as elsewhere, many accepted baptism; many Maranos fell victims to the Inquisition in Tortosa.

Tortosa was either the birthplace or the residence of several Jewish scholars. Menahem ben Saruḳ, the earliest Hebrew lexicographer; Shem-Ṭob ben Isaac and his son Abraham, both Hebrew translators; and the physician and philosopher Jacob Mantino were born there; there, too, lived Isaac Maimon and Abraham b. Alfual, who carried on a correspondence with Isaac ben Sheshet; and also the modern Hebrew satiric poet Solomon ben Reuben Bonfed, rabbi and delegate of the community at the disputation of Tortosa.

Meaning of Name.

TOSAFOT ("additions"): Critical and explanatory glosses on the Talmud, printed, in almost all editions, on the outer margin and opposite Rashi's notes. The authors of the Tosafot are known as **Tosafists** ("ba'ale ha-tosafot"). For what reason these glosses are called "tosafot" is a matter of dispute among modern scholars. Many of them, including Graetz, think the glosses are so called as additions to Rashi's commentary on the Talmud. In fact, the period of the Tosafot began immediately after Rashi had written his commentary; the first tosafists were Rashi's sons-in-law and grandsons, and the Tosafot consist mainly of strictures on Rashi's commentary. Others, especially Weiss, object that many tosafot, particularly those of Isaiah di Trani, have no reference to Rashi. Weiss, followed by other scholars, asserts that "tosafot" means "additions" to the Talmud, that is to say, they are an extension and development of the Talmud. For just as the Gemara is a critical and analytical commentary on the Mishnah, so are the Tosafot critical and analytical glosses on those two parts of the Talmud. Further, the term "tosafot" was not applied for the first time to the glosses of Rashi's continuators, but to the Tosefta, the additions to the Mishnah compiled by Judah ha-Nasi I. "Tosefta" is a Babylonian term, which in Palestinian writings is replaced by "tosafot" (see Yer. Pe'ah ii. 17a; Lev. R. xxx. 2; Cant. R. vi. 9; Eccl. R. v. 8). The Tosafot resemble the Gemara in other respects also, for just as the latter is the work of different schools carried on through a long period, so the former were written at different times and by different schools, and gathered later into one body.

Character.

Up to and including Rashi, the Talmudic commentators occupied themselves only with the plain meaning ("peshaṭ") of the text; but after the beginning of the twelfth century the spirit of criticism took possession of the teachers of the Talmud. Thus some of Rashi's continuators, as his sons-in-law and his grandson Samuel ben Meïr (RaSHBaM), while they wrote commentaries on the Talmud after the manner of Rashi's, wrote also glosses on it in a style peculiar to themselves. The chief characteristic of the Tosafot is that they evidence no recognition of any authority, so that, in spite of the great respect in which Rashi was held by the Tosafists, the latter freely corrected him. Besides, the Tosafot do not constitute a continuous commentary, but, like the "Dissensiones" to the Roman code of the first quarter of the twelfth century, deal only with the difficult passages of the Talmudic text. Single sentences are explained by quotations which are taken from other Talmudic treatises and which seem at first glance to have no connection with the sentences in question. On the other hand, sentences which seem to be related and interdependent are separated and embodied in different treatises. It must be added that the Tosafot can be understood only by those who are well advanced in the study of the Talmud, for the most entangled discussions are treated as though they were simple. Glosses explaining the meaning of a word or containing a grammatical observation are very rare.

The Tosafot may be considered from the point of view of a methodology of the Talmud. The rules are certainly not gathered together in one series, as they are, for instance, in Maimonides' introduction to the Mishnah; they are scattered in various parts, and their number is quite considerable. Neither are they stated in fixed terms; a generally accepted rule is followed by "This is the way of the Talmud" or "The Talmud usually declares." Sometimes the negative expression is found, "This is not the way of the Talmud." A frequently recurring rule is indicated by some such formula as "We find many like this." It must be borne in mind that what has been said hitherto concerns the general features of the Tosafot, and does not conflict with the fact that the writings of different tosafists differ in style and method. With regard to method, it should be said that the Tosafot of Touques (see below) concern particularly the casuistic interpretation of the traditional law, but do not touch halakic decisions.

Mostly of French Origin.

The chief home of tosafot literature was incontestably France, for it began with Rashi's pupils, and was continued mainly by the heads of the French schools. It is true that, practically, tosafot began to be written in Germany at the same time as in France, but the French tosafists always predominated numerically. The first tosafot recorded are those written by Rashi's two sons-in-law, Meïr b. Samuel of Ramerupt (RaM) and Judah ben Nathan (RIBaN), and by a certain R. Joseph (Jacob Tam, "Sefer ha-Yashar," No. 252; "Haggahot Mordekai," Sanh., No. 696; see below). But their tosafot not being otherwise known, the actual father of the tosafot in France was undoubtedly Jacob b. Meïr Tam, whose style was adopted by his successors. He wrote a great number of tosafot, many of which are to be found in his "Sefer ha-Yashar"; but not all, as many passages that are cited in the edited tosafot are not found in the work just mentioned. In Germany, at the same time, there flourished Isaac ben Asher ha-Levi (RIBA), leader of the German tosafists, who wrote numerous tosafot, which are mentioned by Abraham b. David ("Temim De'im," Nos. 158, 207–209), and which are very often cited in the edited tosafot (*e.g.*, to Soṭah 17b). But Isaac ben Asher's tosafot were revised by his pupils, who, according to Jacob Tam ("Sefer ha-Yashar," No. 282), sometimes ascribed to their teacher opinions which were not his. Zedekiah b. Abraham ("Shibbole ha-Leḳeṭ," i., No. 225), however, refutes Jacob Tam's assertion.

The most prominent tosafist immediately after Jacob Tam was his pupil and relative Isaac ben Samuel ha-Zaken (RI) of Dampierre, whose tosafot form a part of the **Tosafot Yeshanim** (see below). Isaac was succeeded by his pupil Samson ben Abraham of Sens (d. about 1235), who, besides enriching the literature with his own compositions, revised those of his predecessors, especially his teacher's, and compiled them into the group known as the **Tosafot of Sens** (תוספות שאנץ). Samson's fellow pupil Judah b. Isaac of Paris (Sir Leon) was also very active; he wrote tosafot to several Talmudic treatises, of which those to Berakot were published at Warsaw (1863); some of those to 'Abodah Zarah are extant in manuscript. Among the many French tosafists deserving special mention was Samuel b. Solomon of Falaise (Sir Morel), who, owing to the destruction of the Talmud in France in his time, relied for the text entirely upon his memory (Meïr of Rothenburg, Responsa, No. 250).

The edited tosafot owe their existence particularly to Samson of Sens and to the following French tosafists of the thirteenth century: (1) Moses of Evreux, (2) Eliezer of Touques, and (3) Perez ben Elijah of Corbeil.

Schools of Tosafists.

(1) Moses of Evreux, one of the most prolific tosafists, furnished glosses to the whole Talmud; they form a distinct group known as the **Tosafot of Evreux** (תוספות איבורא or תוספות אוירא). It may be presumed that the "Tosafot of R. Moses" mentioned by Mordecai b. Hillel ("Mordekai," on Sanh., No. 937) are identical with the tosafot just mentioned. According to Joseph Colon (Responsa, No. 52) and Elijah Mizraḥi ("Mayim 'Amuḳḳim," i., No. 37), Moses wrote his glosses on the margin of Isaac Alfasi's "Halakot," probably at the time of the burning of the Talmud.

(2) Eliezer of Touques, of the second half of the thirteenth century, made a compendium of the Tosafot of Sens and of Evreux; this compendium is called the **Tosafot of Touques** (תוספות טוך), and forms the basis of the edited tosafot. Eliezer's own glosses, written on the margin, are known as the **Tosafot Gillayon** or **Gilyon Tosafot.** It must be premised, however, that the Tosafot of Touques did not remain untouched; they were revised afterward and supplemented by the glosses of later tosafists. Gershon Soncino, who printed these tosafot, declares that his ancestor Moses of Fürth, who lived in the middle of the fifteenth century, was a descendant in the fifth generation of Moses of Speyer, who is mentioned in the Tosafot of Touques. It is supposed that the last redactor of these tosafot was a pupil of Samson of Chinon.

(3) Perez ben Elijah of Corbeil was one of the most active of the later tosafists. Besides supplying tosafot to several treatises, which are quoted by many old authorities and are included among the edited tosafot (and many of which were seen in manuscript by Azulai), he revised those of his predecessors. His pupils were not less active; their additions are known as the **Tosafot of Perez b. Elijah's Pupils.**

It has been said that the first German tosafist, Isaac b. Asher ha-Levi, was the head of a school, and that his pupils, besides composing tosafot of their own, revised his. In the thirteenth century the German schools were represented by Baruch ben Isaac, in Regensburg, and later by Meïr of Rothenburg; the Italian school was represented by Isaiah di Trani. If the tosafot of Asher b. Jehiel (d. 1328) are to be included, the tosafistic period extended through more than two centuries. When the fanaticism of the French monasteries and the bigotry of Louis IX. brought about the destruction of the Talmud, the writing of tosafot in France soon ceased.

Other bodies of tosafot are:

French Tosafot: Mentioned in the novellæ on Tamid ascribed to Abraham b. David. Zunz ("Z.

G." p. 57) thinks that the Tosafot of Sens may be referred to under this title; but the fact that Abraham b. David was much earlier than Samson of Sens leads to the supposition that the glosses indicated are those of previous tosafists, as Jacob Tam, Isaac b. Asher ha-Levi, and Isaac b. Samuel ha-Zaḳen and his son.

Pisḳe Tosafot ("Decisions of the Tosafot"): Collection of halakic decisions gathered from the edited tosafot to thirty-six treatises—Nazir and Me'ilah being excepted—and generally printed in the margin of the Tosafot; in the later editions of the Talmud, after the text. These decisions number 5,931; of these 2,009 belong to the treatise Berakot and the order Mo'ed; 1,398 to Niddah and the order Nashim; 1,503 to Neziḳin; and 1,021 to Ḳodashim. The decisions contained in the tosafot to Shabbat, Pesaḥim, Giṭṭin, Ketubot, Baba Ḳamma, Baba Meẓi'a, Baba Batra, and Ḥullin number fully one-half of those recognized as authoritative. The compiler of these decisions can not be identified with certainty; Asher b. Jehiel, his son Jacob b. Asher, and Ezekiel, uncle of Eliezer of Touques, are given by different authorities. Jacob Nordhausen, also, is known to have compiled tosafot decisions; in fact, references to two groups of "Pisḳe Tosafot" are found in the works of the later casuists.

Spanish Tosafot: This term is used by Joseph Colon (Responsa, No. 72) and by Jacob Baruch Landau ("Agur," § 327), and may apply to Talmudic novellæ by Spanish authors. Jeshuah b. Joseph ha-Levi, for instance ("Halikot 'Olam," § 327), applies the term "tosafot" to the novellæ of Isaac ben Sheshet.

The Edited Tosafot (called also **Our Tosafot**): The tosafot which have been published with the text of the Talmud ever since its earliest edition (see Talmud, Editions of). They extend to thirty-eight treatises of the Babylonian Talmud. Most of the treatises are covered by the Tosafot of Touques, some by the Tosafot of Sens; many are provided with the tosafot of various authors, revised by Perez b. Elijah's school. The authorship of the tosafot to seventeen treatises only can be established with certainty: Berakot, Moses of Evreux; Shabbat, 'Erubin, and Menaḥot, the Tosafot of Sens; Beẓah, Nedarim, Nazir, Sanhedrin, Makkot, and Me'ilah, Perez b. Elijah's school (many written by Perez himself); Yoma, Meïr of Rothenburg; Giṭṭin, Baba Ḳamma, and Ḥullin, the Tosafot of Touques; Soṭah, Samuel of Evreux; 'Abodah Zarah, Samuel of Falaise; Zebaḥim, Baruch b. Isaac of Worms. The tosafot to Mo'ed Ḳaṭon were written by a pupil of a certain R. Isaac; the author of the tosafot to Ḥagigah wrote tosafot to other treatises also. Those to Ta'anit belong to the post-tosafot period, and differ in style from those to other treatises.

Tosafot Alfasi: Quoted by Joseph Colon (Responsa, Nos. 5, 31) and Judah Minz (Responsa, No. 10). The term may designate either the tosafot of Samuel b. Meïr and Moses of Evreux, or glosses to Alfasi's "Halakot."

Tosafot of Gornish (גורנים, גורנייץ, גורניש): Mentioned by Joseph Solomon Delmedigo ("Nobelot Ḥokmah," Preface) and Solomon Algazi ("Gufe Halakot," No. 195), the latter quoting these tosafot to Baba Ḳamma. But as the same quotation is made by Bezaleel Ashkenazi ("Shiṭṭah Meḳubbeẓet," to Baba Ḳamma) and ascribed to a pupil of Perez ben Elijah, Azulai ("Shem ha-Gedolim," ii.) concludes that these tosafot originated in Perez b. Elijah's school. Still, Mordecai b. Hillel ("Mordekai," B. B. on No. 886) mentions a R. Judah of Gornish, and Abraham ibn Akra ("Meharere Nemerim," Venice, 1599) reproduces Talmudic novellæ by "M. of Gornish" (Embden gives "Meïr of Gornish" in the Latin translation of the catalogue of the Oppenheim Library, No. 667). Manuscript No. 7 of the Günzburg collection bears the superscription "Tosafot of Gornish to Yebamot," and in these tosafot French and German rabbis are quoted. Manuscript No. 603 of the same collection contains also the Tosafot of Gornish and novellæ by Judah Minz, and fragments of Gornish tosafot are found in manuscripts in other libraries.

Different theories have been advanced with regard to the name "Gornish." According to Schechter ("Jew. Chron." May 4, 1888), it is a corruption of "Mayence," while H. Adler thinks it a corruption of נוראיץ (the English "Norwich"; see Neubauer in "R. E. J." xvii. 156, and Gross, "Gallia Judaica," pp. 136 *et seq.*). Gross (*l.c.*) thinks that Gornish may be identical with Gournay, in France, and that "M. of Gornish," apparently the author of the Tosafot of Gornish, may be Moses of Gornish and identical with the Moses of גריינץ mentioned in the Tosafot of Sens (to Pesaḥim). It may be added that in the supplement to Zacuto's "Yuḥasin" (p. 164a, Cracow, 1581) a David of "Durnish" occurs.

Tosafot Ḥiẓoniyyot ("Exterior" or "Uncanonical Tosafot"): Tosafot which are neither of Sens nor of Touques. They are so called by Bezaleel Ashkenazi; he included many fragments of them in his "Shiṭṭah Meḳubbeẓet," to Baba Meẓi'a, Nazir, etc.

Tosafot Shiṭṭah (or **Shiṭṭah**): Name sometimes applied to the recensions of Perez b. Elijah or to the tosafot of Jehiel of Paris (Bezaleel Ashkenazi, *l.c.*; notes to "Sha'are Dura," § 57; and many other authorities).

Tosafot Yeshanim ("Old Tosafot"): This group comprises four smaller ones: (1) the general tosafot of Sens, including those appearing among the edited tosafot; (2) the earlier unedited tosafot (for example, those to Ḳiddushin by Isaac b. Samuel ha-Zaḳen of Dampierre, and those to 'Abodah Zarah by his son Elhanan b. Isaac); (3) a collection of old tosafot published by Joseph Jessel b. Wolf ha-Levi in "Sugyot ha-Shas" (Berlin, 1736); (4) various tosafot found in ancient manuscripts, as the tosafot to Ḥullin written in 1360, the manuscript of which is in the Munich Library (No. 236). In the collection published by Joseph Jessel b. Wolf ha-Levi (No. 3), besides the old tosafot to Yoma by Moses of Coucy (comp., however, Israel Isserlein, "Terumat ha-Deshen," No. 94, who declares they belong to the Tosafot of Sens), there are single tosafot to sixteen treatises—Shabbat, Rosh ha-Shanah, Megillah, Giṭṭin, Baba Meẓi'a, Menaḥot, Bekorot, 'Erubin, Beẓah, Ketubot, Ḳiddushin, Nazir, Baba Batra, Horayot, Keritot, and Niddah. In the recent Wilna

Talmud edited by Romm the old tosafot to several treatises are printed.

The Tosafot quote principally Rashi (very often under the designation "ḳontres" [= "commentarius"?]), most of the tosafists, many of the ancient authorities (as Kalonymus of Lucca, Nathan b. Jehiel, and R. Hananeel), some contemporary scholars (as Abraham b. David of Posquières, Maimonides, Abraham ibn Ezra, and others), and about 130 German and French Talmudists of the twelfth and thirteenth centuries. Many of the last-named are known as authors of general Talmudic works, as, for instance, Eliezer b. Nathan of Mayence, Judah of Corbeil, and Jacob of Coucy; but many of them are known only through their being quoted in the Tosafot, as in the case of an Eliezer of Sens, a Jacob of Orleans, and many Abrahams and Isaacs. Some are even mentioned but once, as Eliezer of פלירא (Tos. B. B. 79b), Ephraim b. David (supposed contemporary of Judah Sir Leon; Tos. 'Ab. Zarah 39a), and one Hezekiah (Tos. B. B. 44b). A commentary on the Pentateuch entitled "Da'at Zeḳenim" (Leghorn, 1783) is attributed to the Tosafists. In form this commentary follows the style of the Tosafot; Rashi is often discussed, and sometimes corrected.

Of the great number of tosafists only forty-four are known by name. The following is an alphabetical list of them; many, however, are known only through citations:

A(HaRA): Quoted in the edited tosafot to M. Ḳ. 14b, 19a, 20b, 21a *et seq.*

Abigdor b. Elijah ha-Kohen: Flourished in the middle of the thirteenth century; his tosafot are mentioned in the edited tosafot to Ket. 63b.

Asher b. Jehiel: His tosafot, entitled "Tosefot ha-Rosh" or "Tosefe Tosafot," appeared in various epochs and works. Many of them were inserted by Bezaleel Ashkenazi in his "Shiṭṭah Meḳubbeẓet"; those to Yebamot and Ketubot appeared separately at Leghorn, 1776; to Soṭah, partly at Prague, 1725, and partly in Jacob Faitusi's "Mar'eh ha-Ofannim" (Leghorn, 1810); to Megillah and Shebu'ot, in Elijah Borgel's "Migdanot Natan" (*ib.* 1785); and to Ḳiddushin, in the "Ma'aseh Roḳem" (Pisa, 1806). They are included in Romm's recent edition of the Talmud.

Baruch b. Isaac (see above and Jew. Encyc. ii. 559).

Eleazar b. Judah of Worms: Author of tosafot to Baba Ḳamma, extracts from which are found in Bezaleel Ashkenazi's "Shiṭṭah Meḳubbeẓet."

Elhanan b. Isaac: Flourished at the end of the twelfth century; his tosafot are mentioned by Abraham b. David in his "Temim De'im" and in the edited tosafot to B. M. 11b and Sheb. 28a. His tosafot to Nedarim are referred to by Joseph Colon (Responsa, No. 52); those to Megillah, in Isaiah di Trani's "Ha-Makria'" (No. 31, p. 19d); those to 'Abodah Zarah, in "Mordekai" (No. 1364).

Eliezer b. Joel ha-Levi (ראבי"ה): Flourished in the beginning of the thirteenth century; author of tosafot to several treatises (comp. Michael, "Or ha-Ḥayyim," No. 427).

Eliezer ben Samuel of Metz (Re'EM): Author of tosafot to several treatises, of which those to Ḥullin were seen by Azulai.

Eliezer of Toul: French tosafist of the beginning of the thirteenth century, whose tosafot are mentioned by Zedekiah Anaw in his "Shibbole ha-Leḳeṭ."

Eliezer of Touques (see above and Jew. Encyc. v. 120).

Elijah ben Menahem: His tosafot are mentioned in "Haggahot Maimuniyyot," Ḳinnim, No. 20.

I (RI, probably R. Isaac, but not to be confused with Isaac b. Samuel ha-Zaḳen, who occurs most often as RI): His tosafot, in which the older RI is quoted, are mentioned by Samson b. Zadok ("Tashbeẓ," § 336).

Isaac ben Abraham (RIBA or **RIẒBA),** surnamed **ha-Baḥur** ("the younger," in distinction from his teacher Isaac b. Samuel ha-Zaḳen): Brother of Samson ben Abraham of Sens. Like his brother, Isaac lived as a youth at Troyes, where he attended the lectures of Jacob Tam ("Temim De'im," No. 87), and afterward at Sens (*ib.*; "Haggahot Maimuniyyot," Ishut, No. 6). After the death of Isaac ben Samuel, Isaac ben Abraham succeeded him as head of the school of Dampierre, after which place he is often called ("Or Zarua'," i. 225a). Isaac ben Abraham was one of the French rabbis to whom Meïr ben Todros Abulafia addressed his letter against Maimonides' theory of resurrection. He died at Dampierre prior to 1210, not long before his brother Samson emigrated to Palestine ("Semaḳ," No. 31; "Mordekai" on Ketubot, No. 357). As he is mentioned often in the edited tosafot (Shab. 3a, *passim*; Yoma 20a; *et al.*) and by many other authorities ("Or Zarua'," i. 26b; "Shibbole ha-Leḳeṭ," i., No. 231), it may be concluded that he wrote tosafot to several Talmudic treatises. Those to Bekorot were in the possession of Ḥayyim Michael of Hamburg. Isaac ben Abraham is frequently mentioned as a Biblical commentator ("Da'at Zeḳenim," 3a, 48b, 49b, Leghorn, 1783; "Minḥat Yehudah," 3a, 13a), and his ritual decisions and responsa are often quoted ("Or Zarua'," i. 13b *et passim*; Meïr of Rothenburg, Responsa, No. 176; *et al.*).

Isaac ben Abraham ha-Baḥur may be identical with the liturgical poet Isaac b. Abraham who wrote a hymn beginning "Yeshabbeḥuneka be-kol miflal," for Simḥat Torah or for the Sabbath after it, and a seliḥah for Yom Kippur beginning "Hen yom ba la-Adonai" (comp. Zunz, "Literaturgesch." p. 335).

Isaac b. Asher ha-Levi (see above and Jew. Encyc. vi. 620).

Isaac ben Jacob ha-Laban: Pupil of Jacob Tam and one of the earlier tosafists ("ba'ale tosafot yeshanim"). He was the author of a commentary on Ketubot quoted by Isaac Or Zarua' (see Judah Minz, Responsa, No. 10). He is quoted very often in the edited tosafot (Yeb. 5b; B. Ḳ. 72a; *et al.*).

Isaac ben Meïr (RIBaM) of Ramerupt: Grandson of Rashi, and brother of Samuel b. Meïr (RaSHBaM) and Jacob Tam; died before his father, leaving four children (Jacob Tam, "Sefer ha-Yashar," No. 616, p. 72b, Vienna, 1811). Although he died young, Isaac wrote tosafot, mentioned by Eliezer b. Joel ha-Levi ("Abi ha-'Ezri," § 417), to several treatises of the Talmud. Isaac himself is often quoted in the edited tosafot (Shab. 138a; Ket. 29b *et passim*).

Isaac ben Mordecai of Regensburg (RIBaM): Flourished in the twelfth century; pupil of Isaac b. Asher ha-Levi. He corresponded with Jacob Tam and was a fellow pupil of Moses b. Joel and Ephraim b. Isaac. His tosafot are quoted by Eliezer b. Joel ha-Levi (*l.c.* § 420) and Meïr of Rothenburg ("Semaḥot," § 73; "Haggahot Maimuniyyot," Abelot, p. 294a). He is often quoted also in the edited tosafot (Ket. 55a; B. Ḳ. 22b *et passim*).

Isaac ben Reuben: His tosafot are mentioned in the "Shiṭṭah Meḳubbeẓet," Ketubot, 43a. He may be identical with the Isaac b. Reuben who made a comment on Rashi to B. Ḳ. 32d.

Isaac b. Samuel ha-Zaḳen (see above and Jew. Encyc. vi. 631).

Isaiah di Trani (RID): Italian tosafist of the first half of the thirteenth century. The greater part of his tosafot were published under the title "Tosefot R. Yesha'yahu" (Lemberg, 1861-69); and many were inserted by Bezaleel Ashkenazi in his "Shiṭṭah Meḳubbeẓet."

Israel of Bamberg: Lived in the middle of the thirteenth century; mentioned as an author of tosafot in "Mordekai" (to 'Ab. Zarah, Nos. 1244, 1279, 1295, 1356) and "Haggahot Mordekai" (to Shab. xiv.). Extracts from the tosafot of Israel's pupils were reproduced by Bezaleel Ashkenazi (*l.c.*).

J. Cohen: Supposedly a contemporary of Meïr b. Baruch of Rothenburg, and perhaps identical with Judah ha-Kohen, Meïr's relative. In the extracts from his tosafot to Baba Ḳamma, inserted in the "Shiṭṭah Meḳubbeẓet," he quotes, among many other authorities, his still living teacher, the Kohen whom Zunz ("Z. G." p. 42) supposes to be identical with Abigdor b. Elijah ha-Kohen. From the "Shiṭṭah Meḳubbeẓet" to Baba Meẓi'a it is seen that J. Cohen wrote tosafot to the same treatise.

Jacob of Chinon: Lived in the thirteenth century; pupil of Isaac ben Abraham, author of a "Shiṭṭah" ("Mordekai," on Sanh., No. 928). He himself is quoted in the edited tosafot (Ber. 12a; Nazir 53a; *et al.*).

Jacob ben Isaac ha-Levi (Jabez): Flourished at Speyer about 1130; a pupil of Kalonymus b. Isaac the Elder (Eliezer b. Nathan, "Eben ha-'Ezer," p. 13c, Prague, 1610). He was the author of tosafot ("Haggahot Maimuniyyot," Ḳinnim, No. 16) and of decisions ("pesaḳim"; "Mordekai," Ḥul., No. 1183). He is quoted also in the edited tosafot (to Ḳin. 23a).

Jacob ben Meïr Tam (see above and Jew. Encyc. vii. 36).

Jehiel ben Joseph of Paris (d. 1286): His tosafot are quoted as authoritative by Perez b. Elijah (glosses to "'Ammude Golah," p. 50a, Cremona, 1556), in "Kol Bo" (No. 114), and in "Mordekai" (Ḥul., No. 924). He is frequently quoted also in the edited tosafot.

Joseph (or **Yehosef**): Flourished, according to Zunz ("Z. G." p. 33), about 1150. Zunz identifies this Joseph with the pupil of Samuel b. Meïr whose glosses are quoted in the edited tosafot (to Ket. 70a), and thinks he may be identical with the Joseph of Orleans often cited in the edited tosafot (Shab. 12a *et passim*). If so, he must be identified, according to Gross ("Gallia Judaica," p. 34), with Joseph ben Isaac Bekor Shor. Weiss, however, suggests that this Joseph might have been either Joseph Bonfils, Jacob Tam's teacher, or Joseph b. Isaac of Troyes, one of Rashi's pupils. Thus it seems that in any case the tosafist mentioned in the "Sefer ha-Yashar" must be distinguished from the one mentioned in Tos. Ket. 70a, as the latter was a pupil of R. Samuel.

Joseph Porat: Many fragments of his tosafot to Shabbat are included in the edited tosafot.

Judah b. Isaac of Paris (see above and Jew. Encyc. vii. 344).

Judah ben Nathan (RIBaN): Son-in-law and pupil of Rashi, and to a great extent his continuator. It was Judah who completed Rashi's commentary on Makkot (from 19b to the end) and who wrote the commentary on Nazir which is erroneously attributed to Rashi. He wrote, besides, independent commentaries on 'Erubin, Shabbat, Yebamot (Eliezer b. Joel ha-Levi, "Abi ha-'Ezri," §§ 183, 385, 397, 408), and Pesaḥim ("Semag," prohibition No. 79). Finally, Halberstam manuscript No. 323 contains a fragment of Judah's commentary on Nedarim. It is generally considered that Judah b. Nathan wrote tosafot to several treatises of the Talmud, and he is mentioned as a tosafist in "Haggahot Mordekai" (Sanh., No. 696). He is often quoted in the edited tosafot.

Levi: His tosafot are quoted in the "Mordekai" (B. M. iv., end).

Meïr b. Baruch of Rothenburg (see above and Jew. Encyc. viii. 437).

Meïr b. Samuel of Ramerupt: His tosafot are mentioned by his son Jacob Tam ("Sefer ha-Yashar," No. 252) and often in the edited tosafot.

Moses b. Jacob of Coucy: Author of Old Tosafot to Yoma and of some published in the collection "Sugyot ha-Shas" (Berlin, 1736).

Moses b. Meïr of Ferrara: Flourished in the thirteenth century; probably a pupil of Judah b. Isaac of Paris. His tosafot were used by the compiler of the "Haggahot Maimuniyyot" (see Jew. Encyc. ix. 86).

Moses b. Yom-Ṭob of Evreux (see above and Jew. Encyc. ix. 65).

Perez ben Elijah of Corbeil (see above and Jew. Encyc. ix. 600).

Samson b. Abraham of Sens (see above and Jew. Encyc. xi. 2).

Samson b. Isaac of Chinon: Flourished in the thirteenth and fourteenth centuries; author of the "Sefer Keritut." In this work (i. 7, § 1; v. 3, §§ 120, 148) Samson refers to his glosses on 'Erubin and 'Abodah Zarah; he appears to have written glosses on other Talmudic treatises also.

Samuel of Evreux: Author of tosafot to several treatises; those to Soṭah are among the edited tosafot (see Jew. Encyc. xi. 16).

Samuel ben Meïr (RaSHBaM): Author of tosafot to Alfasi; under his supervision his pupils prepared tosafot to several treatises ("Sefer ha-Yashar," p. 85d).

Samuel b. Naṭronai (RaShBaṬ): German Talmudist of the end of the twelfth century; author of tosafot to 'Abodah Zarah (see "Kerem Ḥemed," vii. 50).

Samuel b. Solomon of Falaise (see above and Jew. Encyc. xi. 28).

Simḥah b. Samuel of Speyer: Flourished in the thirteenth century; his tosafot are mentioned by Meïr of Rothenburg (Responsa, iv., No. 154).

TOSEFTA (lit. "extensions"; "additions"): Name of a collection of baraitot which treat in a more complete form than does the Mishnah the subject of traditional law. In tannaitic literature old halakot are often amplified by explanatory notes and additions. Such additions were made by R. Akiba ('Eduy. ii. 1, viii. 1; Kil. i. 3; 'Orlah iii. 7), R. Eliezer ben Zadok (Tosef., Men. x. 23), R. Simeon (Sifra, Wayiḳra, Ḥobah, vii. [ed. Weiss, p. 21b]), R. Judah (Shab. 75b; 'Ab. Zarah 43a), R. Jose (Tosef., Kelim, B. Ḳ. vii. 4), and other tannaim. The explanatory notes are introduced with the word "Hosif" ("He has added" or "He has extended"). A sentence thus elucidated and completed was called a tosefta, this term being used not for the additional notes only, but for the entire aphorism in its completed form. This meaning is plainly seen in Yer. Shab. viii. 11a (comp. also Pesiḳ. R. 14; Eccl. R. viii. 1), where it is stated that R. Abbahu was greatly pleased over the discovery of an ancient tosefta, which, as a matter of fact, was an old tannaitic maxim with added explanatory matter.

Contents.

The work known by the name "Tosefta" consists of a collection of such elucidated maxims, giving the traditional sayings in a remarkably complete form, whereas the Mishnah gives them in a condensed form only. The title of this collection, תוספתא, is really a plural word, and ought to be pronounced "Tosefata," as is apparent from the Hebrew form (תוספות, which is used for the Aramaic תוספתא; Eccl. R. v. 8). Erroneously, however, the singular form "Tosefta" has been adopted. A compilation entitled "Tosefta" is often mentioned in Talmudic-midrashic literature; and most authoritative critics regard it as identical with the extant Tosefta, of which this article treats. From R. Johanan's allusions to the Tosefta (Sanh. 86b) nothing can be adduced against the theory of the identity of the extant Tosefta with the work to which he refers; and his words in no way indicate, as Brüll has interpreted them, that R. Nehemiah was the author of the Tosefta (see below). Moreover, the Babylonian Talmud refers to a Tosefta which is certainly identical with the work here treated. Thus Yoma 70a correctly cites a saying by R. Akiba as being contained in the Tosefta (Tosef., Yoma, iii. 19, textus receptus).

Attributed to Ḥiyya bar Abba.

Scholastic tradition regards the tanna Ḥiyya bar Abba as the author of the Tosefta, this belief being based on the circumstance that the schools of the Amoraim regarded as authoritative only those tannaitic traditions which had their origin in the collections of R. Ḥiyya or R. Hoshaiah; and inasmuch as only one Tosefta from the period of the Amoraim had been preserved, there was justification for the belief that only the authentic (and therefore the most commonly used) collection had been saved in the vicissitudes of the ages. On a closer view of the matter, however, this circumstance can not be accepted as proof of Ḥiyya's authorship; for since the collection of Hoshaiah was also considered authoritative, there are equal grounds for supposing either that the latter was the sole author of the Tosefta, or that he and Ḥiyya edited the work in collaboration. Inasmuch, however, as Ḥiyya himself is mentioned in the Tosefta (Neg. viii. 6), the final redaction of the work must be attributed to a later hand.

Relation to Talmudic Baraitot.

To define the purpose of the work presents as many difficulties as does its authorship. Formerly the Tosefta was generally regarded as a sort of commentary on the Mishnah, this belief being fostered by a false interpretation of its title as "supplements." But even disregarding the fact that the correct definition of the word "Tosefta" as given above stamps the work as independent of the Mishnah, a cursory examination of its contents will show that it can not be regarded as a commentary. It does not discuss the passages in the Mishnah in a commentarial manner, and, to judge by its contents, it might be regarded either as a continuation of the Mishnah or as a work of equal rank therewith; for it cites the mishnaic passages in almost the same terms as the Mishnah itself. The latter circumstance, also, precludes the possibility of regarding the Tosefta as a commentary, inasmuch as it contains additions and supplements to the Mishnah; for in a mere supplement there would be no room for almost verbatim repetitions of sentences contained in the Mishnah itself. To this succeeds the question of the relation of the Tosefta to the baraitot cited in Talmudic discussions; for several such baraitot are contained literally in the Tosefta, while others are paraphrased, although the redaction of the parallel passages differs in respect to important points.

The question which thus presents itself is whether the Talmudic baraitot are mere citations from the Tosefta, or whether they originally constituted an independent collection. In the first case it would be difficult to explain the reason for the redactorial differences in the parallel passages. In the second, on the other hand, it would be necessary to take for granted not only the existence of an earlier Tosefta, but also that this, and not the one now extant, was the authentic one. For, as stated above, the Amoraim made use of authentic sources only; and those baraitot that are cited in the Talmud but are not contained in the extant Tosefta must necessarily have been taken from an earlier work. This would disprove the identity of the existing Tosefta with the work mentioned in Talmudic literature. All these questions show how difficult it is to determine the origin, the nature, and the importance of the Tosefta. The solution of the problem has been attempted by various scholars at various periods; and of these attempts those made by Sherira, Maimonides, Me'iri, and Frankel were the most important because they alone rest on critical investigations of historical sources. But even these investigators failed to solve the problem in a manner wholly satisfactory. Frankel's theory, although deficient in so far as it leaves some points unexplained and others not accurately defined, comes nearer the truth than any other. When these deficiencies are supplied and some points modified, a correct conception of the origin and nature of the Tosefta may be formed.

Any investigation to determine the status of the Tosefta must be directed to the following points: the origin and scope of the work; its redaction; its relation to the Mishnah; and its relation to the baraitot cited in the Talmud. Information bearing on the first point is derived from a literary-historical notice by R. Johanan (Sanh. 86a), which, after eliminating material unnecessary for this question, runs as follows: "Those mishnaic sentences that are cited without mention of the author's name (סתם) belong to R. Meïr; the sentences in the Tosefta cited without the name of the author are R. Nehemiah's; all, however, are given in the spirit and according to the method of R. Akiba." This utterance of R. Johanan's implies, therefore, that as the Mishnah had three successive redactors (Akiba, Meïr, and Judah ha-Nasi I.), so must also the redactors of the Tosefta be supposed to have been three in number, namely, Akiba, Nehemiah, and a third, unknown redactor. The origin of the Tosefta can therefore be traced back to Akiba, who laid the foundation of this work as well as of the Mishnah, in both of which he used a peculiar redactorial system of his own. Thus in the Mishnah he gave only the fundamental principles in condensed form, in order to furnish a handbook of traditions as an aid to the memory. In the Tosefta, however, he gave the traditional sentences in their complete form, supplementing them with explanatory notes; he gave also various cases, which in the Mishnah were represented by a single statement. These two collections, compiled according to different methods, were intended to supplement each other; and it was Akiba's aim through them to preserve the traditional teachings in their entirety and in a systematic way, as well as to promote a knowledge of them. Meïr and Nehemiah, both pupils of Akiba, endeavored to accomplish the object had in view by their master; but each restricted himself to one of Akiba's methods. Meïr chose the method of condensation, and compiled a work in which he included much of the material from Akiba's Tosefta, and which combined many of the more important features in both of Akiba's collections. Nehemiah followed the same plan of combining both of Akiba's collections in one work; but in doing so he chose the casuistic method. In this way originated two collective works—Meïr's Mishnah, edited according to the system used by Akiba in his edition of that work, and Nehemiah's Tosefta, edited according to the method followed by Akiba in his Tosefta edition.

Critical Problems.

Relations to Mishnah of R. Meïr.

The relation of Meïr's Mishnah to Nehemiah's Tosefta was not, however, the same as that which existed between Akiba's collections of the same names. The former were not two collections mutually dependent on and supplementing each other: they were rather two independent works, both of which aimed at the preservation and proper arrangement of traditional maxims. The difference between them consisted only in the different methods employed in their compilation. Meïr's Mishnah contained the traditional maxims in condensed form, while Nehemiah's Tosefta cited them in their complete form and provided them with explanatory and supplementary notes. The methods evolved by Akiba and used by Meïr and Nehemiah were adopted also by later compilers in their endeavors to preserve and transmit traditional doctrines. Judah ha-Nasi I., whose Mishnah compilation was based on that of Meïr, followed the latter's method of redaction; while the redactor of the Tosefta now extant followed the method used by Nehemiah, whose Tosefta constituted the basis for his work. The relation between the Mishnah of Judah ha-Nasi and the Tosefta which has been preserved corresponds with that which existed between Meïr's Mishnah and Nehemiah's Tosefta. They are independent works which seek to accomplish by different means a similar purpose. There is, of course, a certain homogeneity between the two works, inasmuch as the Tosefta treats and elucidates the corresponding passages in the Mishnah; but the purpose of the redactor of the Tosefta was to produce an independent collection, and not merely additions to and explanations of another compilation.

Who was the redactor of the extant Tosefta? As has already been proved, the scholastic tradition attributing its authorship to R. Ḥiyya is unreliable, since the circumstance that Ḥiyya himself is mentioned in the Tosefta eliminates the possibility of his being its author; and that Ḥiyya and Hoshaiah edited the work in collaboration is most unlikely. The Jerusalem Talmud often refers to dissensions between these two amoraim; and if the Tosefta should be considered the product of their combined efforts, it would be natural to ask whose authority was accepted as decisive in cases where the redactors disagreed. How, indeed, could a decision have been possible in a case where the difference of opinion related to a halakic tradition? To regard Hoshaiah as sole redactor of the Tosefta is not possible either; for in many questions on which, according to the Jerusalem Talmud, he and Ḥiyya disagreed, the opinion of the latter has been given general validity (comp. Frankel, "Mebo," p. 25a). Only one surmise is possible; namely, that Ḥiyya and Hoshaiah, independently of each other and perhaps with quite different objects in view, were engaged in the compilation of baraitot, as were also their contemporaries Levi, Bar Ḳappara, and Samuel. The collections of Ḥiyya and Hoshaiah differed from the others in that these two compilers took Nehemiah's Tosefta as a basis for their collections. Each of them thus compiled an extended Tosefta enriched with new elements; and these two Toseftot differed in various important respects. A later redactor, whose name has not been ascertained, combined

Authorship.

these two Toseftot into one work, to which he added some maxims taken from the collections of Levi, Bar Ḳappara, and Samuel; and in this manner originated the Tosefta in the form in which it is now extant. This final redactor considered Ḥiyya's opinions authoritative; and in all points where Hoshaiah's Tosefta differed from Ḥiyya's the latter's opinions alone were given validity.

The preference thus given to Ḥiyya's work, however, must not be ascribed to any views held by the schools of the Amoraim, but to the personal convictions of the final redactor. In the schools both Toseftot were considered authoritative, and baraitot cited from either were regarded as authentic. This view also explains the relation of the existing Tosefta to the Talmudic baraitot, which latter could have been taken only from one of these authentic Toseftot. Such baraitot as are given verbatim in the existing Tosefta are either citations from Ḥiyya's work or baraitot which were given alike in both Toseftot; while those baraitot which, either essentially or verbally, differ from the parallel passages in the present Tosefta were taken from the Tosefta of Hoshaiah, the reason for the divergence being that the final redactor of the existing Tosefta preferred the opinion of Ḥiyya.

Division.

Like the Mishnah, the Tosefta is divided into six orders ("sedarim"), the names of which correspond to those of the mishnaic orders; namely, (1) Zera'im, (2) Mo'ed, (3) Nashim, (4) Neziḳin or Yeshu'ot, (5) Ḳodashim, and (6) Ṭohorot. The orders are subdivided into treatises, which, with a few exceptions, bear the same names as those of the Mishnah. Four treatises are missing from the Tosefta, namely, Abot in the order Neziḳin, and Ḳinnim, Middot, and Tamid in the order Ḳodashim. The number of treatises in the Tosefta is thus fifty-nine; but the treatise Kelim in this work is divided into three parts, namely, Baba Ḳamma, Baba Meẓi'a, and Baba Batra. If these three "babot" were regarded as three different treatises the total number would be sixty-one. The treatises are divided into chapters ("peraḳim"), which again are divided into paragraphs; but the division into chapters is not the same in the different manuscripts. According to the Erfurt manuscript, the total number of chapters is 428; according to the Vienna manuscript and the older Tosefta editions, 421.

Texts and Commentaries.

The Tosefta appeared first as an addendum to Isaac Alfasi's "Halakot" (Venice, 1521), and has since been appended to all editions of that work. The best edition of the Tosefta is that published by M. S. Zuckermandl (Pasewalk, 1880), who made use of the Erfurt manuscript. Zuckermandl published also a supplement (Treves, 1882) containing a summary of the work, an index, and a glossary. A Latin translation of thirty-one Tosefta treatises was published by Ugolino in his "Thesaurus Antiquitatum Sacrarum" (vols. xvii.-xx., Venice, 1755-57).

The Tosefta has been the subject of many commentaries. The Wilna edition of the Talmud, for example, which contains the Tosefta in addition to Alfasi's "Halakot," reprints the following two commentaries: (1) "Tana Tosefa'ah," by Samuel Abigdor b. Abraham, a work in two parts, part i., entitled "Minḥat Bikkurim," being the main commentary, while part ii., entitled "Miẓpeh Shemu'el," contains an index to the Tosefta passages cited in the Talmud and in the Midrashim. (2) "Ḥasde Dawid," explanatory notes by David Pardo. In addition to these two commentaries, which cover the entire Tosefta, the same Talmud edition contains the following commentaries on single treatises: "Magen Abraham," by Abraham Abali of Kalisz, on the order Neziḳin; a commentary by Elijah Gaon of Wilna on the order Ṭohorot; and Jacob Kahana of Wilna's "Mare de-Matnita," on the treatise 'Erubin. M. Friedmann wrote a commentary on the order Mo'ed, which he published under the title "Tekelet Mordekai," appending it to his edition of the Tosefta (part i., containing the treatises Shabbat and 'Erubin, Paks, 1898; part ii., Pesaḥim, Sheḳalim, Yoma, and Sukkah, *ib.* 1900). Medieval authors mention two Toseftot to Berakot (see Brüll in "Ha-Maggid," xiii. 127), but it is not clear to which works they applied the name "Toseftot."

TÖTBRIEF: Term applied in Germany to the edicts issued by the kings and emperors, to the papal bulls, and to the edicts of various ecclesiastical authorities, by which the Christians were exempted from paying their debts to Jews. The Tötbrief might deprive the creditor either of the interest due on the money loaned or of both principal and interest. The first Tötbrief known was that of Louis VII. of France, who, at the instigation of Peter Venerabilis, Abbot of Cluny, issued in 1146 a decree exempting all Crusaders from payment of their debts to the Jews, in accordance with the papal enactment of Eugenius III. in the preceding year. Later, in 1180, Philip Augustus relieved all Christians from their liabilities to their Jewish creditors on condition of their paying to him the fifth part of their debts. Louis VIII. annulled, in 1223, all debts due to Jews by Christians that had been outstanding for five years or more, and canceled the interest on debts less than five years old.

In Germany, in the fourteenth century, such cancelations were common. The first case in which Jews were deprived of the interest due to them was in 1299, when King Albert diverted such interest payments to the Monastery of Eberbach. After the time of Henry VII. and Louis the Bavarian cancelations of the whole debt, principal and interest, were very frequent. The former exempted (1312) Conrad of Weinsberg from the payment of such debts; while the latter relieved (1315) the city of Esslingen from its debts to the Jews of Ueberlingen as well as to other Jews who had settled in cities hostile to him. In 1316 Louis issued a similar edict in favor of the inhabitants of Heilbronn; in 1323, in favor of the Abbey of Fulda; in 1326, in favor of a number of noblemen who owed money to Jews of Alsace; in 1332, in favor of the Abbey of Bamberg. These exemptions were even more numerous in the third and fourth decades of the fourteenth century, when, during the persecutions, the emperors canceled the claims of Jews both living and dead.

All these were single instances of the cancelation of debts due to Jews; only under King Wenzel, toward the end of the fourteenth century, did the Tötbrief assume seriously comprehensive proportions. On June 12, 1385, the king concluded a treaty with the representatives of all the Swabian towns, who agreed that their municipalities should pay the king 40,000 gulden in return for a "privilege," consisting of eight articles, by which their debts to Jews were either entirely or partially canceled, and through which the Jews finally lost all their claims. For, while many Jews who had the means recovered part of the money due to them by paying a certain sum to the city authorities, King Wenceslaus, in order to check this, issued a second edict (1390), commanding the Jews to abandon all claim to debts due from Christians. It must be said, however, that the Tötbrief of 1390 did not apply throughout the whole German empire, but only to its southwestern part, as Bavaria, Würzburg, and other provinces. In Spain the same sort of edict was called a "moratoria" (see Jacobs, "Sources," pp. xxiv., xxv., Nos. 97, 100–103; p. xliii., No. xlv.).

TOTEMISM: A primitive social system in which members of a clan reckoned kinship through their mothers, and worshiped some animal or plant which they regarded as their ancestor and the image of which they bore tattooed on their persons. It was suggested by J. S. Maclennan (in "The Fortnightly Review," 1870, i. 207) that this system existed among the early Hebrews; and his view was taken up by Robertson Smith (in "The Journal of Philology," 1880), who based his theories upon the researches of J. G. Frazer on totemism. Robertson Smith later connected this view with his theory of sacrifice, which he regarded as originally a method of restoring the blood covenant between the members of a clan and its totem. The following are the chief arguments in favor of the existence of totem clans among the ancient Israelites:

I. Animal and Plant Names: A considerable number of persons and places in the Old Testament have names derived from animals or plants. Jacobs ("Studies in Biblical Archæology," pp. 94–103) has given a list of over 160 such names, including Oreb (the raven) and Zeeb (the wolf), princes of the Midianites; Caleb (the dog), Tola (the worm), Shual (the fox), Zimri (the chamois), Jonah (the dove), Huldah (the weasel), Jael (the ibex), Nahash (the serpent), Kezia (the cassia), Shaphan (the rock-badger), Ajalon (the great stag), and Zeboim (the hyena). Many of these, however, are personal names; but among the Israelitish tribes mentioned in Num. xxvi. are the Shualites, or fox clan of Asher; the Shuphamites, or serpent clan of Benjamin; the Bachrites, or camel clan; and the Arelites, or lion clan of Gad. Other tribes having similar names are the Zimrites, or hornet clan, and the Calebites, or dog tribe. In the genealogy of the Horites (Gen. xxxvi.) several animal names occur, such as Shobal (the young lion), Zibeon (the hyena), Anah (the wild ass), Dishan (the gazel), Akan (the roe), Aiah (the kite), Aran (the ass), and Cheran (the lamb). The occurrence of such a large number of animal names in one set of clan names suggests the possibility that the Horites, who were nomads, were organized on the totem-clan system.

Arguments in Favor of Totemism.

II. Exogamy is the system under which any member of a clan may not marry within his own clan, but must marry a member of a kindred clan. Smith deduces the existence of such clans among the Horites from the mention of Anah clans and Dishan clans in the list. He also draws attention to Shimeis among the Levites, Reubenites, and Benjamites. Female descent is the only means of tracing kinship in exogamous clans; and Smith sees a survival of this in the case of the marriage of Abraham and Sarah, who were not of the same mother, while Abimelech appealed to his mother's clan as being of his flesh (Judges viii. 19), and Naomi told Ruth to return to her mother's house (Ruth i. 8).

III. Ancestor and Animal Worship: Smith attributes the friendship between David and Nahash, King of the Ammonites, to the fact that they were both members of a serpent clan spread throughout Canaan. That animals were worshiped among the Hebrews is well known, as is shown by the legends of the golden calf and the brazen serpent. The second commandment prohibits this. Smith draws attention to the case of animal worship in Ezek. viii. 7–11, where Ezekiel sees "every form of creeping things, and abominable beasts, and all the idols of the house of Israel, portrayed upon the wall round about," and in the midst of them stood Jaazaniah ben Shaphan (the rock-badger), "with every man his censer in his hand, and a thick cloud of incense went up." Here there is animal worship connected with the name of a person who appears to be connected with an unclean beast, the "shaphan." See also Ancestor Worship.

IV. Forbidden Food: Members of a totem clan did not eat the totem animal. As such totems gradually spread throughout the nation, a list of forbidden animals would arise which might be analogous to the list of forbidden animals given in Lev. xi. and Deut. xv. Jacobs, however, has shown that in the list of animal names given by him forty-three are clean as against forty-two unclean.

V. Tattooing and Clan Crests: A totem is tattooed on the skin of the totem worshiper; and there is evidence in Lev. xix. 28 that the Israelites were forbidden to make tattoo-marks, while an allusion to this practise may be contained in Isa. xliv. 5 and in Ezek. ix. 4. The mark of Cain may perhaps have been a tattoo-mark. In none of these instances, however, are there indications that the tattoo-marks were in an animal form or connected with animal worship. The tribes of Israel when on the march

Absence of Historic Connection.

had standards (Num. i. 52, ii. 2 *et seq.*); and rabbinic literature gives details of the crests (see FLAG), which were derived from the blessings of Jacob (Gen. xlix.) and Moses (Deut. xxxiii.). In these most of the tribes are compared to an animal: Judah to a lion; Issachar to an ass; Dan to a serpent; etc. In Moses' blessing, however, Dan is compared to a lion's whelp, which seems to show that the tribes were not arranged on a totemic system.

VI. Blood Feud: The practical side of the totem system insured the existence of relatives scattered throughout a tribe, who would guarantee the taking up of the blood feud in case one of the members of the totem clan was injured or killed. The existence of the blood feud can be recognized in Israel (see GO'EL), but there is no evidence of a connection with totemism. Altogether, while traces and survivals are found of institutions similar to those of the totem clan, there is not sufficient evidence to show that it existed in Israel during historic times, though it is possible that some such system was found among the Edomites.

TOUL (Hebr. טול, טולא; "Or Zarua'," i. 131b; "Mordekai" on B. Ḳ. x., No. 193): Capital of an arrondissement in the department of Meurthe-et-Moselle, France, with a Jewish population dating from the thirteenth century. Among the scholars who were once residents of this city may be mentioned R. Eliezer of Toul, the author of tosafot; and his brother Abraham, a pupil of Rabbi Isaac the Elder of Dampierre and identical, according to Gross, with Abraham of טוך (read טול), one of the scholars to whom Meïr ben Todros Abulafia of Toledo addressed his epistle assailing the doctrine of the resurrection as set forth by Maimonides.

In 1708 the Bishop of Toul petitioned the French government to expel from Nancy the Jewish bankers Samuel and Solomon Levy, Jacob Schwob, Isaiah Lambert, and Moses Alcan, but his efforts were unsuccessful. In 1721, 180 Jewish families, many of them residents of Toul, were permitted by Duke Leopold to remain on his estates without molestation in their religion and commerce. Leon Cohen, one of the leading members of the community of this city, took part in the General Assembly convoked at Paris by Napoleon in 1806. The community of Toul is governed by the Jewish consistory of Nancy, and at present (1905) contains forty or fifty Jewish families.

S. S. K.

TOULON (Hebr. טולון): Capital of an arrondissement in the department of the Var, France. Like most of the principal cities of Provence, Toulon contained a Jewish community in medieval times; and under the counts of Provence the Jews of the city fared like those of many other communities, being sometimes oppressed and sometimes treated with kindness. When the Black Death raged throughout France in 1348, the Jews of Toulon were accused of having poisoned the neighboring springs and wells, and forty were killed in a single night. Noteworthy among the scholars of the city were: Berechiah ben Azariah of טולון or מולן (Rabbinovicz, "Diḳduḳe Soferim," xi. 17), to whom belonged the Codex Vat. 120, dating from the fourteenth century and containing a number of treatises of the Talmud; and Astruc of Toulon, one of the publishers of the first edition of Jehiel ben Jekuthiel's "Bet Middot."

At the present time (1905) the Jewish community of the city forms a part of the consistorial circumscription of Marseilles, and numbers about thirty families.

S. S. K.

TOULOUSE (Hebr. טולושה, טולוזה): Capital of the department of Haute-Garonne, France, where a large number of Jews lived as early as the beginning of the eighth century. In conformity with an old custom, and in punishment for some fancied crime, one of their number, generally the most respected old man of the community, was obliged to appear every Good Friday at the door of the cathedral to have his ears boxed in public. They vainly addressed a petition to King Charles the Bald in 850 to have this custom abolished; but it continued until the beginning of the twelfth century, when it was replaced by an annual tax payable to the monks of St. Sernin between All Saints' Day and the feast of St. Sernin, and by a yearly contribution of 44 pounds of wax, to be delivered on Good Friday at the Cathedral of St. Stephen.

In the thirteenth century the counts of Toulouse were favorably disposed toward the Jews on all occasions, and granted them the right of acquiring real estate without paying rent. Many estates were held by two prominent Jewish families, one represented by Espagnol and his sons Solomon and Provençal, and the other by Alacer (Eliezer) and his sons Abraham and Belid. In 1242 Raymond VII. granted the Jews the right of freely disposing of their property, and of selling, mortgaging, or leasing their farms, estates, and seigniories on condition of paying a tax of 12 Toulouse deniers on each pound of the sale price and 6 deniers on each pound of the rent; but in 1290 King Philip the Fair took action against those Jews who had surreptitiously obtained letters of exemption from the taxes imposed upon them. In the district of the seneschal of Carcassonne a special judge was appointed to take charge of the cases in which Jews were interested; but in Toulouse the Jews were tried before the same judges as the Christians. Philip the Fair confirmed this arrangement in 1304 by decreeing that the regular judges should handle all Jewish cases, whether civil or criminal. Several Jews who were arrested in 1306 accepted baptism rather than leave the city, but Solomon ibn Verga goes too far when he says that the whole community was converted.

The total amount confiscated by the king in the seneschalate of Toulouse was 75,264 pounds Tours currency.

Returning to Toulouse in 1315, the Jews were soon subjected to a tax of 2,000 pounds. In 1321 the PASTOUREAUX massacred many Jews, and forced the remainder to accept baptism, thus annihilating the community.

As early as the eleventh century the Jews of Toulouse possessed a synagogue, which was under the direction of R. Judah b. Moses ha-Darshan, who later went to Narbonne. He is called דשא דונזילה in "R. E. J." x. 102, which, according to a happy conjecture of Gross ("Gallia Judaica," p. 215), must be read דרשן דטולוזה. This synagogue was situated on the present Place des Carmes, but it was confiscated by Philip the Fair in 1306, and sold in 1310.

From the time of the massacre by the Pastoureaux there was no Jewish community at Toulouse until the beginning of the nineteenth century. At the present time (1905) it contains between fifty and sixty families, who are subject to the Jewish consistory of Bayonne.

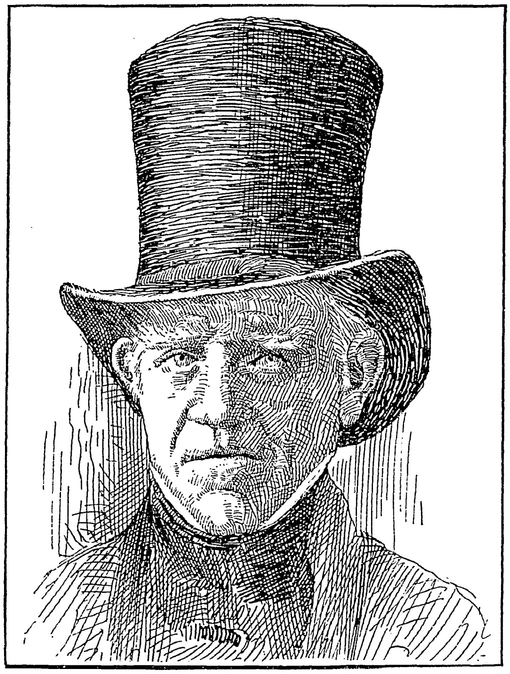
TOURO, JUDAH: American philanthropist; born at Newport, R. I., June 16, 1775; died at New Orleans, La., Jan. 13, 1854; son of Rev. Isaac Touro and Reyna Hays. His father was of Portuguese origin and had settled in Jamaica, but went to Newport about 1760 to serve as minister of the Jewish congregation there. During his residence in the town he became a close friend of Ezra Stiles.



Judah Touro.

Shortly after the outbreak of the American Revolution, Newport was taken by the British, and the Jewish patriot citizens consequently left. The synagogue was closed, and its members scattered throughout the other colonies. The father of Judah went to Kingston, Jamaica, where he died Dec. 8, 1783; thereupon the mother returned to the United States with her children, making her home with her brother, Moses Michael Hays, who had become an eminent merchant of Boston. She died in 1787; and young Touro was reared and educated by his uncle, in whose counting-house he was later employed. At the age of twenty-two he was sent as supercargo with a valuable shipment to the Mediterranean; and the results of the trip showed his remarkable business ability.

Settles in New Orleans.

A few years later (1802) he went to the French territory of Louisiana, settling at New Orleans, then a small town of about 10,000 inhabitants. There he opened a store, and soon built up a thriving trade in New England products. Later he became the owner of many ships and of valuable real estate, until he was numbered among the most prominent merchants of the place. After the territory had become part of the United States, Touro repeatedly exhibited his public spirit. During the defense of New Orleans by Andrew Jackson he entered the ranks as a common soldier, and was severely wounded on Jan. 1, 1815, being given up for dead; but he was saved by the bravery and care of his friend Rezin Davis Shepherd, a young Virginian merchant, who had settled in the same city. Their friendship continued throughout their lives; and both of them amassed great fortunes.

Touro's name will always be numbered among the foremost in the annals of American philanthropy. His charities knew neither race nor creed, and his public spirit was no less noteworthy.

To Amos Lawrence and Judah Touro belongs the credit of supplying the funds for completing the Bunker Hill Monument, each subscribing $10,000 for the purpose. In 1843 the completion of the monument was celebrated by a banquet in Faneuil Hall, Boston, at which the generosity of the two donors was publicly acknowledged. A resolution was also adopted by the directors to the effect that John Quincy Adams, Daniel Webster, Joseph Story, Edward Everett, and Franklin Dexter be appointed a committee to prepare an inscription for a tablet which was to be placed on the monument and which was partly to record the liberality of Lawrence and Touro.

Benefactions to Newport.

Another object of his generosity was his native city of Newport. In 1842 he improved the enclosures of the old Jewish cemetery immortalized by Longfellow; and it was his money which purchased the Old Stone Mill supposed to have been built by the Norsemen, Touro's desire being that the historic landmark and the surrounding grounds might be saved for the town.

The grounds in which the mill is situated are still known as Touro Park.

In him the poor of New Orleans had a constant friend and benefactor, and many incidents of his charity are recorded. A noteworthy case was that of a Universalist congregation whose church was sold at auction under foreclosure of a mortgage and was bought by Touro, who returned it to the worshipers. Its minister, the Rev. Theodore Clapp, became Touro's friend; and in his memoirs he gives a most appreciative account of the benefactor of his church.

Touro's Will.

Though he gave liberally to charitable objects during his entire life, the provisions of the will of Touro, who died unmarried, disposed of over half a million dollars in charity, an enormous sum in those days. These provisions were published throughout the United States and even in the journals and periodicals of many European countries. Among the larger bequests were $80,000 for founding the New Orleans Almshouse, liberal endowments for nearly all the Jewish congregations of the country, bequests to the Massachusetts Female Hospital, the Female Asylum, and the Boys' Asylum of Boston, and one for the preservation of the old cemetery at Newport, and for the payment of the salary of the minister of the old synagogue in that city. A large sum was also left in trust to Sir Moses Montefiore for almshouses in Jerusalem. In addition to these, there were private bequests, including one to the Rev. Theodore Clapp already mentioned; while the entire residuary estate was left by Touro to his friend Shepherd. His body was taken to Newport, and lies in the old Jewish cemetery. The funeral is stated "not to have been equaled since the reinterment of Commodore Perry in 1826." At a later date a public meeting was held at Boston to express regret at his death. On his tombstone, which may still be seen, are inscribed the appropriate words: "The last of his name, he inscribed it in the Book of Philanthropy to be remembered forever."

A few years after his death a public movement was inaugurated by the citizens of New Orleans to erect a monument to his memory; but opposition to this tribute came from a number of Jewish rabbis throughout the country, who claimed that Judaism forbade the erection of any graven image, and that a statue came within the scope of prohibition. This led to an interesting theological controversy, much of which has been preserved in Benjamin's "Drei Jahre in Amerika"; but the outbreak of the Civil war put a sudden end to the matter. The story of Touro's life has been woven into Wassermann's German novel "Judah Touro" (Leipsic, 1871).

J. L. Hü.

TOURS (Hebr. טורש, "Mordekai" on M. Ḳ. No. 921; or תורש, "Yosippon," ed. Venice, p. 6b): Capital of the department of Indre-et-Loire, France. Since the first half of the sixth century Jews have lived either in the city or in its environs, especially in Civray. About the year 580 a Jewish tax-gatherer of Tours named Amantius, together with his three attendants, one Jew and two Christians, was attacked by a certain Injuriosus, stripped, murdered, and thrown into a well. At the close of the eleventh century Philip I. of France made over to his wife, Bertrade, half the revenues from the Jews of Tours, while in 1119 and 1143 Louis VI. and his son, Louis VII., presented this income as an offering to the Abbey of Saint Martin. In 1141 the Jews were obliged to give the king at Easter the sum of thirty sous, together with half a pound of pepper and other gifts in kind; and at Christmas they were forced to give half a pound of pepper, two loaves of bread, a pitcher of wine, and a certain quantity of meat. At the end of the twelfth century they were compelled to pay 30 sous annually to Richard, King of England and Count of Tours, and to the Abbey of Saint Martin. After the year 1202 the kings of France collected the revenues of the Jews, which amounted to 120 livres in 1234, but which increased to 1,024 livres and 5 denarii in 1298, and reached the sum of 2,077 livres, 9 denarii in the following year. In 1306 the Jews were expelled from Tours; but they returned in 1315, and were molested four years later by a band of rogues who pretended to have a commission from the king to extort money from them. Then came the charge of poisoning the wells; and in 1321 they were again driven from Tours, Amboise, Loches, and Chinon.

The Jews of Tours had their own ghetto, which was called "la Juiverie" and was situated in the parish of Saint-Pierre du Boile in the Rue des Maures, called the Rue des Morts or de la Juiverie in the eighteenth century. In 1306 Philip the Fair presented the Jewish quarter to the archbishop and his clergy.

The cemetery was in the parish of Saint Vincent, in front of the "old garden"; it extended from the vineyards of Saint Vincent to the Rue de la Chèvre, and from the vineyards of the vestry of Saint Julian to the street which ran in front of the "old garden." In the thirteenth century certain disputes arose between the Jews of Tours and the archbishop, Pierre de Lamballe, but in 1255 the latter guaranteed them perpetual possession of their cemetery and of a house and the vineyards attached, reserving for himself only the right of jurisdiction and a rent of five gold oboles of the value of 25 sous, payable annually at Christmas. In case of non-payment the Jews were liable to a fine of 7½ sous, and they were forbidden to till the ground until they should have discharged their debt. In return, the archbishop, in guaranteeing the peaceable possession of the cemetery, granted also the right to inter therein the bodies of their coreligionists without regard to the place of death, while in the house attached to the graveyard they were permitted to place a guardian exempt from service to the archbishop and from the payment of any rental. This agreement was ratified in 1305 by Archbishop Renaud, the successor of Pierre de Lamballe; but in the following year the cemetery was confiscated, together with the other property of the Jews, and it disappeared completely in 1359-60.

The most noteworthy scholars of the city were: Solomon of Tours, the correspondent of Rashi, who called him his "dear friend"; David of Tours; and Joseph ben Elijah, brother of Perez of Corbeil (Zunz, "Z. G." p. 41). At present (1905) there are about twenty Jewish families in the city.

S. S. K.

TOWER (Hebr. מגדל): A building of strength or magnificence (Isa. ii. 15; Cant. iv. 4, vii. 4), and, with a more limited connotation, a watch-tower in a garden or vineyard or in a fortification. It was customary to erect watch-towers in the vineyards for the guards (Isa. v. 2), and such round and tapering structures may still be seen in the vineyards of Judea. Similar towers were built for the protection of the flocks by the shepherd, in the enclosures in which the animals were placed for the night (comp. the term "tower of the flock," Gen. xxxv. 21; Micah iv. 8), and it is expressly stated that Uzziah built such structures in the desert for his enormous herds (II Chron. xxvi. 10). Around these towers dwellings for shepherds and peasants doubtless developed gradually, thus often forming the nuclei of permanent settlements.

Towers for defense were erected chiefly on the walls of fortified cities, the walls themselves being strengthened by bastions (Neh. iii. 1), and the angles and gates being likewise protected by strong towers (II Kings ix. 17). Thus the walls of the city of Jerusalem were abundantly provided with towers in antiquity, and the ancient tower of Phasael (the so-called "tower of David") in the modern citadel is an excellent specimen of this mode of defense, its substructure being of massive rubblework, and the ancient portion of the tower erected upon it being built of immense square stones (for illustration see JEW. ENCYC. vii. 142). The citadel forming the center of a fortified city was also termed "migdol" (Judges viii. 9, ix. 46). It was usually erected at the highest point of the city, and formed the last place of refuge in case the town was besieged and its walls stormed (Judges ix. 46).

E. G. H. I. BE.

TOY, CRAWFORD HOWELL: American Christian Orientalist; born at Norfolk, Va., March 23, 1836. He was educated at the University of Virginia, and studied Orientalia at the University of Berlin (1866-68). On his return from Europe he was appointed professor of Hebrew at the Southern Baptist Theological Seminary, Greenville, S. C., and in 1880 became Hancock professor of Hebrew and Oriental languages at Harvard University. He is the author of "The Religion of Israel" (1882), and "Judaism and Christianity" (Boston, 1890), a careful and sympathetic study of the relation between the two religions. He edited the Hebrew text and the English translation of Ezekiel for the Polychrome Bible in 1899, and published a commentary on Proverbs in the "International Critical Series" in the same year. Toy has been editor of the Hellenistic department of THE JEWISH ENCYCLOPEDIA since its inception.

J.

TRABOT (TRABOTTI): Family of Italian scholars of the fifteenth, sixteenth, and seventeenth centuries, which immigrated to Italy from France, so that several of its members bore the additional name "Ẓarfati." The most important representatives of the family are as follows:

Azriel Trabot: **1.** Scholar of the sixteenth century; probably a member of the rabbinical college in Rome. Nothing is known of his literary activity. **2.** Rabbi at Florence and Ascoli in the sixteenth century; son of Jehiel Trabot (1). A responsum by him, dated 1567, is extant in manuscript. **3.** Rabbi of Ascoli at the beginning of the seventeenth century; son of Jehiel Trabot (2). He was the author of some responsa, extant in manuscript, and of a list of rabbis (reprinted in "R. E. J." iv. 208-225) from Rabina and R. Ashi to R. Nissim the Younger.

Jehiel Trabot: **1.** Rabbi at Pesaro during the earlier part of the sixteenth century; son of Azriel Trabot (1). On the maternal side Jehiel was a grandson of Joseph Colon, whose name he bore in addition to his own. He is mentioned in Jacob Alpron's collection of responsa entitled "Naḥalat Ya'aḳob," and responsa signed by him in 1519 and 1520 are extant in manuscript. **2.** Rabbi of Ferrara and Pesaro; died after 1590; son of Azriel Trabot (2). He was the author of certain responsa divided according to the ritual codes; they have been preserved in manuscript.

Levi Trabot: One of the earliest members of the family. He flourished in the first half of the fifteenth century, and emigrated from France to Italy, whence he went to Jerusalem, so that his son Nathaniel called him איש ירושלם. Like several other members of the family, he bore the name "Ẓarfati." Codex Turin No. 65 contains two poems by another Levi Trabot, written in honor of the presentation of scrolls of the Law to the synagogue in Mantua, one being composed in 1581, and the other in 1596.

Menahem ben Perez Trabot: Rabbi at Ferrara in the latter part of the fifteenth and the beginning of the sixteenth century. Responsa by him are still extant in manuscript.

Nethaneel ben Benjamin ben Azriel Trabot: Rabbi of Modena; born about 1576; died Dec. 22, 1653; uncle of Solomon Graciano. He was one of the greatest and most respected of Italian rabbis. Of his works the following have been preserved: a ritual decision at the beginning of the collection of responsa entitled "Kenaf Renanim"; a responsum in the "Paḥad Yiẓḥaḳ" of Lampronti (i. 111b-112a); and a responsum in the "Debar Shemu'el" of Samuel Aboab (No. 19). His great learning is mentioned in the collection entitled "Be'er 'Eseḳ" (No. 53); and his so-called "Testament" has been reprinted by Mortara in Berliner's "Magazin" (xiv. 11-22). Mention should also be made of a responsum treating of the reformation of synagogal music, addressed to Samuel Norzi, and reprinted in the "Monatsschrift," xxxix. 350–357. Four elegies on his death were reprinted in "R. E. J." xxxv. 256–263.

Nethaneel ben Levi ha-Naḳdan Trabot: Calligrapher and punctuator; flourished in the sixteenth century. A copy of the Masorah entitled "Patshegen" (Codex de Rossi No. 7), and a manuscript of the Pentateuch (Codex Ambrosianus No. 35) are still preserved as specimens of his work. He was also known as a liturgical poet, being the author of two Habdalot (Codex de Rossi No. 1050). He likewise composed an elegy in twenty-six stanzas.

E. C. S. O.

Perez Trabot: Hebrew lexicographer; lived in Italy at the close of the fourteenth and the beginning of the fifteenth century. He calls himself either "Ẓarfati" or "Katelani," thus showing that he had emigrated, probably after the expulsion of the Jews from France in 1395, to Catalonia, and thence to Italy. He was the author of a work entitled "Maḳre Dardeḳe," containing a Hebrew-French or a Hebrew-Catalan vocabulary (Naples, 1488), and in his introduction to this work he speaks of the banishment of the Jews from France.

E. C. I. BR.

Perez Jehiel ben Nethaneel Trabot: Liturgical poet of the sixteenth century. He was the author of three elegies beginning (1) אבן מקיר תזעק; (2) איכה ישבה; and (3) אני ישן.

The following members of the Trabot family are also mentioned: **Abraham Trabot,** who wrote Codex Turin No. 17 as far as Numbers, and dated the colophon on the 2d of Ḥeshwan (Nov.), 1664; **Beraḥiel ben Hezekiah Trabot,** author of a small maḥzor completed at Florence on the 7th of Nisan (March 9), 1490 (Codex Modena No. 6); **Ḥayyim ben Raphael Trabot,** whose signature appears in a Florentine codex (Plut. I., No. 30) of 1462; **Jacob ben Aaron Trabot,** the author of marginal glosses in Codex Turin A. xiii. 3; **Judah Trabot of Nizza,** the author of a commentary on the "Tempio" of Rieti (Codex Turin A. v. 27); **Menahem ben Nethaneel Raphael Trabot,** who purchased Codex Turin A. vii. 18 on July 22, 1472; **Perez ben Menahem Trabot,** rabbi at Ferrara in the sixteenth century (Lampronti, "Paḥad Yiẓḥaḳ," iv. 22); **Phinehas ben R. Menahem Trabot,** rabbi of Ferrara in the sixteenth century (*ib.*, s.v. חליצה); **Raphael Trabot,** who sent Abraham of Perugia an account of a journey to Jerusalem, dated the 28th of Ab (Aug. 21), 1523 (Cod. Florent., Plut. II., No. 35); **Solomon Trabot,** said to have been the father of Joseph Colon (Codex Parma No. 1420; Codex No. 2 of the Foa collection); and **Solomon (da Trevoux) Trabot,** rabbi of Savigliano in the fifteenth century (Steinschneider, "Hebr. Bibl." xii. 117).

E. C. S. O.

TRACHTENBERG, HERMAN: Russian jurist; born in Jitomir 1839; died there 1895. He studied law at the University of St. Petersburg, and at the end of his course entered the government service. For meritorious work he was granted the Order of Stanislaus of the third degree and that of Vladimir of the fourth degree, thus gaining the rights and privileges of a hereditary citizen. He was noted for his compilations of briefs on criminal cases. At the end of the seventies he was accorded the rare honor of being elected honorary justice of the peace for the district of St. Petersburg.

Trachtenberg always took an active interest in the affairs of the Jewish community of St. Petersburg, and in 1891 devoted much time and energy to the case of the Starodub Jews, who were victims of the anti-Jewish riots.

TRADE. See COMMERCE.

TRADE-UNIONISM.—In England: Excepting in Holland, the creation of a Jewish proletariat has everywhere followed immigration from the east-European centers, where the massing of population gradually led to the formation of a Jewish laboring class. The first union in which mainly Jews were interested, the tailors' union, was founded in 1872. Prior to that date, and for some years after, the Jews had no specific reason for being interested in labor organization. Excepting two, such crafts as the earlier settlers followed called for individual rather than organized effort. These two exceptions were the various branches of the diamond and cigar trades, both of Dutch origin. Diamond-polishing was early subdivided into four branches; and the introduction of steam fostered the natural tendency in this trade toward factory methods. But few men were engaged in the trade at the time of the discovery of the South-African diamond-fields, and the labor system in vogue among them maintained a certain form of mastership for one in every three of the mill-hands.

In Diamond and Cigar Trades.

The cigar industry, owing to heavy duties and licenses, was at an early date forced to follow the factory system, although there was little if any machinery employed in the work, and the subdivision of labor was of the simplest kind. This trade, however, was one of the first to adopt the trade-union principle, and the Jews entered this organization, still one of the strongest in existence, in large numbers; only recently, owing to the combination in some cases of cigar- and cigarette-making, and to the use of Yiddish, have Jews found it necessary to form a specific Jewish union in that trade.

The formation of a Jewish artisan class, particularly in East London, after 1881, together with the introduction of machinery, created possibilities of Jewish labor combination, and the history of some of the strongest organizations begins with 1882. The immigrants introduced into England the manu-

In the Clothing Industries.

facture of cheap clothing (displacing the historic Jewish trade in old clothes), mantle-making, and ladies' tailoring, and developed the fur and rubber trades, both of which are practically in Jewish hands. The evidence presented to the Royal Commission on Alien Immigration, 1902-3, before which the founders of various trades appeared, contains much interesting information on these points. There were at all times certain rough divisions in the various branches of the "needle industries," but the introduction of the steam-driven sewing-, cutting-, and braiding-machines changed the form of the industry from what had been largely home work to factory labor of a highly specialized kind. The Jews were directly responsible for this. One of their advocates before the Royal Commission on Alien Immigration said that "they utilized the sewing-machine as a scientific instrument of production." This subdivision presented the possibility of the middleman turning "sweater," and forcing down the price of labor by introducing the "greener," the craftless immigrant who could learn one or another branch of the trade, according to the degree of skill required, in from six weeks to eighteen months. The same principles applied to the leather and cabinet-making trades; but owing to the existence of the factory form of labor prior to the introduction of specialized machinery the general trade-unions in both cases proved sufficiently powerful to be able to absorb the special Jewish unions soon after their formation. Jewish unions or Jewish unionists, as such, are not nowadays found engaging in strikes. The needle industries, however, became more strongly Jewish, and in 1889 the masters confronted the organizations of their employees by forming their own union, the Jewish Masters' Society. Jewish labor combination followed logically upon the sweater, the greener, and the demand for cheap clothing. Indeed, the creative cause and the condition of Jewish labor are well told in the following demands made in the 1889 strike, in which fully 10,000 Jews participated:

(1) That the hours of work shall be reduced to twelve, with one hour for dinner and a half-hour for tea.

(2) That meals shall be taken outside the factory premises.

(3) That government contractors shall pay wages at trade-union rates.

(4) That government contractors and sweaters shall not give out work to be done at home at night after working hours.

The First Strike.

This strike lasted six weeks, and it seems to have been to the ultimate disadvantage of the Jewish working classes. The history of the movement from that day represents a series of attempts to organize or reorganize, the effort being unquestionably hampered by the fact that the union is estranged from the general trade-unions by the use of Yiddish in all meetings and by the existence of marked socialistic and anarchistic tendencies among the leaders. Of late, however, these have exhibited a well-defined Zionist attitude. In the nineties there were a number of strikes; and in several cases these resulted in shorter hours and better wages. The strikers also made a considerable point of their desire to observe the Sabbath and the Jewish holy days; and in this way they gained the support of the rabbinate. It can not, however, be said that at any time a serious attempt was made to enforce this observance, and it would appear that the pleas of the strikers were more political than religious in purpose.

With the growth of immigration there came an increase in the number of the trades in which the Jews were interested, and a corresponding growth in the strength of the trade-union organizations formed. The movement spread to Birmingham, Leeds, Manchester, and other manufacturing cities. Inter-Jewish conferences were held, an attempt was made to bring the Jewish labor movement as a whole under one organization, and the representatives of the Jewish unions were recognized and took part in the general trade-union conferences held from time to time. Of all these unions only one has so far become conspicuous—that of the Jewish bakers, who have not only fought their masters for sanitary bakehouses, better wages, and shorter hours, but have aided their masters in the fight against the general trade-union of bakers, which endeavored to compel the Jews to obey a law several hundred years old prohibiting the baking of bread in London on Sundays, a restriction that was apparently ignored when Parliament enacted the Sunday exemption clauses for Jews in the Factory Acts.

Weakness of the Movement.

The strength of the movement has differed at various times; to-day (1905) it is weaker than it was ten years ago. It has had its organs and its recognized leaders; but it is contended that a Jew does not make a good unionist, "because one ruling passion never leaves him—his desire to rise from his low position and be a master." Lewis Lyons, who has been particularly active in the creation of the specifically Jewish unions, told the above-mentioned commission that the "Jewish trade-unions fluctuate in consequence of excessive immigration, and that the labor leaders have from time to time the utmost difficulty in maintaining a solid and disciplined organization." On the other hand, statistics show that in the tailoring trade proportionately more Jews than non-Jews are united.

There are no accurate statistics as to the number of Jews in the various Jewish and general unions in England; and the following is merely a list of the number of organizations existing in London between 1882 and 1902: tailors, 31 unions; butchers, 1; bakers, 1; cigar-makers, 1; iron and tin-plate workers, 1; compositors, 1; brush-makers, 1; house-painters, 1; card-box makers, 1. Of these 39 unions, 6 were dissolved and 3 were merged in other organizations. A furriers' and a costermongers' union have been founded since 1902, bringing the present total up to 32. There are, in addition, Jewish tailors' unions in Birmingham (1), Leeds (2, with 1,300 members), Manchester (3), and Sheffield (1). Tailors' organizations probably exist also in Bradford, Bristol, Glasgow, Hull, and Reading.

The chief organs of the Jewish trade-union movement have been: "Der Polischer Jüdel" (1882), "Die Zukunft" (1884), "Die Neue Welt" (1900-1). News items are also given in "Reynolds's Newspaper."

—**In the United States:** It is only in the United States and in England that Jews find the opportunity to enter non-Jewish trade-unions in large numbers. In these countries Jewish workers, like others, enter the unions of their various crafts. From their ranks have risen such trade-union leaders as Samuel Gompers (for more than twenty years president of the American Federation of Labor), Joseph Barondess, and Henry White. Jews have shown a special preference for the clothing trades. According to official reports, three-fourths of the workmen in these trades in New York are Jews. In these industries, therefore, the unions are practically Jewish organizations.

The Beginnings.

The first attempts at organization among Jewish workmen antedate the main influx of Jewish immigration into England and America. The first union of Jewish tailors in New York was organized in 1877. It had an ephemeral existence. When, in the eighties, Jews began to arrive in large numbers, the need of organization was soon realized. Several unions came into existence, and strikes were declared which met with varying degrees of success. About the time of the eleventh census (1890) New York city had become the center for the manufacture of women's ready-made clothing. The year 1890 witnessed the first great strike of Jewish workmen: the cloakmakers struck in all factories and sweat-shops, and after enduring great suffering for eight weeks they won the strike. Wages were raised to such an extent that the workers were able to earn during the busy season from $25 to $30 a week.

The first success cemented the union. In the winter of 1892 another general strike was declared with the object of maintaining the advantages which had been gained by the previous movement; and although this time the employers formed an association and firmly withstood for a while the demands of the strikers, they at length gave way. The union then demanded from the employers the payment of an indemnity for the losses incurred through the strike. The employers regarded this demand as extortion; they paid, but instituted a criminal prosecution against the secretary of the union, Joseph Barondess. He was indicted, found guilty, and sentenced by the trial court. The Supreme Court of the State of New York reversed the sentence, holding that in the absence of intent to appropriate the money to his own use the defendant, who merely acted as the representative of his union, was not guilty of extortion. The decision of the Supreme Court was reversed by the New York Court of Appeals, which affirmed the sentence of the trial court. The defendant, however, was soon pardoned by the governor.

Varying Fortune.

Litigation had exhausted the resources of the union, and when the general depression of business began the union was soon broken up. With the restoration of business prosperity in 1897 it was revived, and has since had a continuous existence, its paying membership reaching at one time 15,000; but at other times its membership has sunk very close to the zero point.

The history of other Jewish unions is similar to that of the Cloak-Makers' Union, which under normal conditions has the largest membership. The weakness of all Jewish unions in the tailoring trades is the fluctuating character of their membership. Prof. John R. Commons, in his report on "Immigration and Its Economic Effects," prepared for the Industrial Commission, speaks as follows regarding the character of Jewish trade-unions in the United States:

> "The Jew's conception of a labor organization is that of a tradesman rather than that of a workman. In the clothing manufacture, whenever any real abuse arises among the Jewish workmen, they all come together and form a giant union and at once engage in a strike. They bring in 95 per cent of the trade. They are energetic and determined. They demand the entire and complete elimination of the abuse. The demand is almost always unanimous, and is made with enthusiasm and bitterness. They stay out a long time, even under the greatest of suffering. During a strike large numbers of them are to be found with almost nothing to live upon and their families suffering, still insisting, on the streets and in their halls, that their great cause must be won. But when once the strike is settled, either in favor of or against the cause, they are contented, and that usually ends the union, since they do not see any practical use for a union when there is no cause to fight for. Consequently the membership of a Jewish union is wholly uncertain. The secretary's books will show 60,000 members in one month and not 5,000 within three months later. If perchance a local branch has a steady thousand members from year to year, and if they are indeed paying members, it is likely that they are not the same members as in the year before."

Sweating.

The instability of the Jewish unions has been ascribed to the character of the Jew, who has an inborn desire to be "his own boss"; the ambition of the Jewish worker is to rise above the working class, rather than to improve his own condition simultaneously with that of his class; hence the sweating system, with its numerous contractors and subcontractors. The clothing trade in its beginnings requiring little capital, the development of the clothing industry in New York within recent years has been marked, in contrast with the general trend of the time, by a tendency toward small-scale production. The scattering of employees in numerous small shops is unfavorable to organization. Another cause which has interfered with the progress of organization in trades followed largely by Jews is the influence of Socialist agitation among Jewish workers. More than one Jewish trade-union has been wrecked by dissensions between divergent schools of Socialism.

One of the oldest and strongest Jewish trade-unions is the organization of compositors of Jewish newspapers and printing-offices, the Hebrew-American Typographical Union, which is affiliated with the International Typographical Union. The Jewish unions of New York are combined in a central body, known as The United Hebrew Trades. This federation comprises the unions of those working in the clothing trades, of compositors, of employees of the

Jewish theaters, and a few minor unions. Some of these unions are affiliated with the American Federation of Labor.

TRADITIONELLE JUDENTHUM, DAS. See Periodicals.

TRADITIONS: Doctrines and sayings transmitted from father to son by word of mouth, and thus preserved among the people. Such traditions constitute a large part of Jewish oral teachings (see Oral Law); and many halakic doctrines seek to trace their descent from Moses on Mount Sinai (see Sinaitic Commandments). There are other traditions, however, which refer to national and historical events, rather than to halakic problems. Of these haggadot, scattered through Talmudic and midrashic literature, the following two may be cited as examples: (1) Soṭah 10b: "We have received the tradition from our fathers that Amoz, the father of the prophet Isaiah, and Amaziah, the king of Judah, were brothers"; and (2) Yer. B. B. 15c: "It is a haggadic tradition that the space occupied by the Holy of Holies in the Temple was not included in the stipulated measurement of the latter."

The Hebrew designations for tradition are "Masoret" (מסורת) and "Ḳabbalah" (קבלה), while halakic tradition is designated also as "Halakah" (הלכה).

s. J. Z. L.

TRAJAN: Roman emperor from 98 to 117. Like Vespasian, Titus, and Hadrian, he is frequently mentioned by Jewish writers; and he exercised a profound influence upon the history of the Jews throughout the Babylonia, Palestine, and Hellenistic Diaspora. His ambition led him to the farthest eastern boundaries of the Roman empire, where he warred against the Parthians, although in the meantime the Jews arose in Egypt and in Cyrene "as though carried away by some wild and riotous spirit" Eusebius, "Hist. Eccl." iv. 2). The insurrection at Alexandria is mentioned in a papyrus fragment in the Louvre, which refers to a suit brought before the emperor by an Alexandrian and a Jew, although the ruler there designated may be Hadrian, Trajan's successor (see T. Reinach in "R. E. J." xxxvii. 218).

The task of subduing the Jews in Egypt and Cyrene was entrusted by Trajan to Marcius Turbo, with whom the emperor is confused in rabbinical sources, which frequently write the name Trajan "Tarkinos" (Krauss, in "R. E. J." xxx. 206, xxxi. 47; *idem*, "Lehnwörter," ii. 273). Cyprus also was the scene of a violent Jewish uprising, which seems likewise to have been quelled by Turbo. In the same year (116), or possibly a year later, when Trajan thought the Parthians subdued, the Jews of Mesopotamia, mindful of the treatment which their Palestinian brethren had received at the hands of the Romans, and of their own sufferings, especially at Nisibis and Adiabene, during the four years of Trajan's campaign, arose in rebellion, determined to expel the Romans from their country. Trajan thereupon ordered the Mauritanian prince Lusius Quietus to proceed against the Jews, and gave him strict orders to purge the provinces of them, his rigid obedience to this order winning for the legate the governorship of Palestine (Eusebius, "Hist. Eccl." iv. 2; *idem*, "Chronikon," ed. Schoene, ii. 164; Orosius, vii. 12; Dion Cassius, lxviii. 32).

In the meantime, however, rebellion had again broken out in Judea; and it is highly probable that the Palestinian Jews also rendered assistance to their oppressed brethren elsewhere, especially in Egypt, this fact possibly furnishing an explanation of Trajan's expedition to Egypt (Esther R. proem, § 3). The rabbinical legend gives the following reason for the revolution: The emperor's wife (the governor's wife is probably meant) bore a child on the 9th of Ab, when the Jews were lamenting, and it died on the Feast of Ḥanukkah, when the Jews illuminated their houses; and in revenge for these fancied insults the wife urged her husband to punish the Jews (*ib.*). No such legend, however, is needed to explain the Jewish rebellion against the Roman government, for during the reign of Trajan the Christian descendants of David, who were relatives of Jesus, were persecuted; and Schlatter rightly infers that the patriarchal family likewise died for its faith, since it was supposed to be Davidic. The Palestinian revolt appears to have been organized by two brothers, Pappus and Luliani, and rabbinical sources expressly allude to Trajan's proceedings against the pair (Sifra, Emor, viii. 9, and parallels; see also Kohut, "Aruch Completum," iv. 74), whom he is said to have sentenced to death in Laodicea, although he afterward ordered them taken to Rome, where they were executed. Here again the rabbinical sources confuse Trajan with his governor, Lusius Quietus, who was later deposed and executed by Hadrian. The marvelous escape of Pappus and Luliani was celebrated by a semifestival called "Trajan's Day," which fell, according to the Meg. Ta'an., on the 12th of Adar (see Ratner in Sokolow, "Sefer ha-Yobel," p. 507), although it is more probable that this day really commemorated the success of the Jewish forces against the Roman army. Denarii of Trajan are mentioned in the Talmud ('Ab. Zarah 52b); and it is also noteworthy that, according to the inscriptions of this emperor, he constructed a road from the Syrian border to the Red Sea. The unrest which marked the end of his reign was not allayed until his successor Hadrian became emperor.

s. S. Kr.

TRANI: Family of scholars, members of which were prominent in Spain and the Levant.

Aaron di Trani: Spanish tosafist; born in Castile; descendant of a family which produced several eminent Talmudists. He received his education under the direction of R. Joseph Alfasi. At an early age he removed to Italy, whence he went, in 1502, to Adrianople. There he made the acquaintance of Joseph Caro, who had gone thither to publish his "Bet Yosef." As a Talmudist, Trani was very highly esteemed by his contemporaries. He ranks among the representatives of pilpul, not only on account of his preference for the Tosafists, but also by virtue of the fact that his nephew and pupil Moses di TRANI, in conjunction with the son of Joseph Caro, introduced pilpul into the schools of Palestine. It may, however, be assumed that Aaron Trani's pilpul did not go to extremes, else Joseph Caro would not have spoken of him so highly. The few notes concerning him which may be found in the works of others were collected by Michael in his "Or ha-Ḥayyim."

J. SR. L. G.

Isaiah (ben Elijah) di Trani (the Younger): See JEW. ENCYC. vi. 644.

Isaiah (ben Mali) di Trani (the Elder; RID): See JEW. ENCYC. vi. 644.

Joseph di Trani: Scholar of the fifteenth and sixteenth centuries; uncle of Moses di Trani. Expelled, with his brother, from the city of his birth in 1502, he settled in Salonica.

Joseph di Trani (the Elder): Talmudist of the latter part of the sixteenth century; lived in Greece. By contemporary scholars he was called מהרימ"ט, and regarded as one of the foremost Talmudists of his time. He was the author of "She'elot u-Teshubot," a work in three parts: part i. comprises 152 responsa, together with a general index (Constantinople, 1641); part ii. consists of 111 responsa in the order of the first three parts of the ritual codex (Venice, 1645); part iii. contains responsa to the fourth part of the ritual codex, together with novellæ to the treatise Ḳiddushin, and supercommentaries on RaN's and Alfasi's commentaries on the treatises Ketubot and Ḳiddushin (*ib.* 1645). The entire work appeared in Fürth in 1764. Joseph also published novellæ to the treatises Shabbat, Ketubot, and Ḳiddushin (Sudzilkov, 1802), and the responsa which were embodied in Alfandari's "Maggid me-Reshit" (Constantinople, 1710). He left several commentaries in manuscript—on Alfasi, on Maimonides' "Yad," and on R. Nathan's "'Aruk."

Joseph (ben Moses ben Joseph) di Trani (the Younger): Talmudist; born at Safed 1573; died at Constantinople 1644. He early showed a marked predilection for Talmudic studies, and upon the death of his father (1585) he was sent to Egypt, where he continued them under his uncle Solomon di Trani. When the latter, in 1587, fell a victim to the plague, Joseph returned to Safed, where he became a pupil of Solomon Sagi. There he remained until 1609, when he received a call to a rabbinate in Constantinople, where he officiated until his death. He is reported to have founded several benevolent institutions in Constantinople. Of his works the only one known is "Ẓofenat Pa'neaḥ" (Venice, 1653; Frankfort-on-the-Oder, 1694), a collection of sermons on the weekly lessons and the festivals.

Moses ben Joseph di Trani (the Elder; called **המבי"ט):** Talmudist; born at Salonica 1505; died in Jerusalem 1585. His father had fled to Salonica from Apulia three years prior to his birth. While still a boy Moses was sent to Adrianople to pursue the study of the Talmud under the supervision of his uncle Aaron. At the age of sixteen he went to Safed and completed his studies under Jacob Berab. In 1525 he was appointed rabbi at Safed; he held this office until 1535, when he removed to Jerusalem.

Moses di Trani was the author of: "Ḳiryat Sefer" (Venice, 1551), commentary on the Bible, the Talmud, and difficult passages in the commentaries of Maimonides; "Sefer ha-Teḥiyyah weha-Pedut" (Mantua, 1556; Wilna, 1799; Sudzilkov, 1834; Warsaw, 1841), commentary and notes on ch. vii. and viii. of Saadia Gaon's "Emunot we-De'ot"; "Bet Elohim" (Venice, 1576), a moral and philosophical work on prayer, atonement, and the fundamental principles of faith; "She'elot u-Teshubot" (vol. i., *ib.* 1629; vol. ii., *ib.* 1630), a collection of 841 responsa, with an index.

Moses ben Joseph di Trani (the Younger): Flourished during the first half of the seventeenth century. He published the commentaries of his father, and wrote some sermons, which appeared in the "Ẓofenat Pa'neaḥ" (Venice, 1653).

Solomon di Trani: Son of Moses ben Joseph the Elder, and brother of Joseph di Trani the Elder; flourished in Egypt, where he died from the plague in 1587. He wrote a preface to the works of his father, in which is contained much information bearing on the Trani family. He is also the reputed author of "Marbiẓ Torah be-Yisrael," a collection of sermons, still extant in manuscript.

TRANSFER. See ALIENATION AND ACQUISITION.

TRANSLATIONS.—Into Hebrew: After the early victories of the Mohammedans and the consequent spread of Arabic civilization, the Jews of the Eastern countries became familiar with and adopted to a large extent the Arabic language; so much so that rabbis and scholars, if they desired to be understood by the masses, were compelled to write their works in that language. After the center of Jewish learning shifted from the Orient to Spain and southern France, some of these works, especially those dealing with the Halakah and Hebrew grammar, were translated from Arabic into Hebrew. In the lists of translations in this article the title of the translation is, as a rule, given in parentheses, with the date and place of publication of the first edition.

From Arabic.

The oldest Hebrew translations from Arabic date from the eleventh century. In 1078 Isaac ben Reuben Albargeloni rendered into Hebrew, under the title "Ha-Miḳḳaḥ weha-Mimkar," Hai Gaon's treatise on purchase (Venice, 1602), also Ibn Janaḥ's lexicon "Kitab al-Uṣul" ("Sefer ha-Shorashim"). About the same time, perhaps a little earlier, some Karaite writings were translated into Hebrew by Moses ben Tobia. At the beginning of the twelfth century Moses ben Samuel ha-Kohen ibn Gikatilla translated the two principal works of Ḥayyuj, the treatises on "Verbs Containing Weak Letters" and "Verbs Containing Double Letters" (edited with an English translation by John W. Nutt, London and

Berlin, 1870). From the first half of the twelfth century there are a translation, or rather a paraphrase, of Saadia's "Emunot we-De'ot," and a translation of his commentary on the "Sefer Yeẓirah," both by Moses ben Joseph of Lucena. Toward the middle of the same century Ibn Ezra translated Ḥayyuj's grammatical works, two works on the astrology of Mashallah ("She'elot" and "Kadrut"), and a treatise on geomancy ("Sefer ha-Goralot"). About the same time Judah ben Isaac ibn Ghayyat translated a casuistical dissertation on a part of Shebu'ot.

All these translations are said by Judah ibn Tibbon, in the introduction to the "Ḥobot ha-Lebabot," to be defective in character, their imperfections being due either to a less than thorough knowledge of Arabic or Hebrew on the part of the translators, or to the fact that the latter give their own opinions instead of those of the authors. A similar view is expressed by Judah ben Barzillai, in his commentary on the "Sefer Yeẓirah," with regard to Moses ben Joseph's translation of Saadia's commentary on that work, the Hebrew of which he declares to be unintelligible.

The Ibn Tibbons.

A new era in regard to methods of translation began with Judah ibn Tibbon, "the father of translators." At the request of Meshullam ben Jacob and his son Asher, Judah translated, in 1161, the first treatise of Baḥya ben Joseph ibn Paḳuda's ethical work "Kitab al-Hidayah ila Fara'iḍ al-Ḳulub." After its completion Joseph Ḳimḥi translated the remaining nine treatises and then the first one also. However, at the request of Abraham ben David of Posquières, Judah completed, under the title "Ḥobot ha-Lebabot" (Naples, 1489), the translation of the whole work, his version gradually superseding that by Ḳimḥi, of which only a small fragment has been preserved (published by Jellinek in Benjacob's edition of the "Ḥobot ha-Lebabot," Leipsic, 1846). The translation of Baḥya's work was followed by translations of Ibn Gabirol's "Kitab Iṣlaḥ al-Akhlaḳ" ("Tiḳḳun Middot ha-Nefesh," Constantinople, 1550), Judah ha-Levi's "Kitab al-Ḥujjah" ("Sefer ha-Kuzari," Fano, 1506), Ibn Janaḥ's "Kitab al-Luma'" ("Sefer ha-Riḳmah," ed. B. Goldberg, Frankfort-on-the-Main, 1856) and "Kitab al-Uṣul" ("Sefer ha-Shorashim," ed. W. Bacher, Berlin, 1896), and Saadia's "Kitab al-Amanat wal-I'tiḳadat" ("Sefer ha-Emunot weha-De'ot," Constantinople, 1562). To Judah ibn Tibbon is attributed also, although on very slight grounds, the translation of the collection of maxims "Mibḥar ha-Peninim," usually ascribed to Ibn Gabirol, and of Aristotle's "Posterior Analytics." In all these translations Judah endeavored to render faithfully the very words of the authors—by no means an easy task, considering the richness of the Arabic vocabulary and the poverty of the Hebrew.

Literal Method of Translation.

In order to reproduce the abstract ideas found in the philosophical writings new word-forms and technical terms had to be established. These word-forms and technical terms were naturally modeled after those of the Arabic, which, in their turn, were literal translations from the Greek. It is not surprising, therefore, that in the Hebrew versions of the philosophical writings there are many expressions which are unintelligible to those unacquainted with the Arabic terminology; but this can not be imputed as a fault to the translator, who could not find in Hebrew words adequate to the expression of abstract ideas, Hebrew being essentially the language of a people of concrete ideas. Judah's work is nevertheless far from being above criticism; it contains many faults which are due either to the translator's limited knowledge of Hebrew or to his misunderstanding of the original. Desiring to be faithful to the latter, Judah, like all the translators who took him as their guide, invariably rendered each Arabic word into an equivalent in Hebrew, without considering that a literal translation is not always possible and that some sentences must necessarily be recast in order to make them intelligible to a reader who is a stranger to Arabic constructions.

Another grave defect in Judah's method of translation, and one which gave rise to many errors and misunderstandings, was that he always used the same Hebrew word as an equivalent for a given Arabic word, regardless of the variations of meaning attached to the latter. Thus, for instance, he always uses the Hebrew verb עמד ("to stand") for the Arabic וקף, although, according to the preposition by which the latter is followed, it may also mean "to read," "to study," etc. Yet, notwithstanding numerous faults, Judah's translations were recognized as standards and accepted as models by all the Hebrew translators of Arabic in the Middle Ages. Thus his version of the "Cuzari" superseded that made a little later by Judah ibn Cardinal, as his rendering of the "Kitab al-Uṣul" superseded those made by Isaac ha-Levi and Isaac ben Judah Albargeloni.

Translation of Maimonides.

The thirteenth century was especially rich in Hebrew translations from the Arabic, and those of Samuel ibn Tibbon, the son of Judah, were prominent among them. An enthusiastic admirer of Maimonides, Samuel began by translating several of his works, the most important among which was the "Dalalat al-Ḥa'irin," which he finished in 1190 under the title "Moreh Nebukim." Samuel clung more tenaciously than his father to the letter of the Arabic text; he even introduced Arabic words into his translations, and, by analogy with the Arabic, gave to certain Hebrew words meanings different from the accepted ones. This system of translation could but impair the intelligibility of a text difficult in itself; and thus the "Moreh" abounds in passages which are enigmatic to those who do not possess a profound knowledge of Arabic. Samuel's translation was, indeed, approved by Maimonides himself, to whom it had been sent for revision; but in such a case Maimonides was the person least qualified to judge, since, as the author of the original and an expert in Arabic, he naturally had no difficulty in reading the Hebrew version. This at least must have been the opinion of the poet Judah al-Ḥarizi, who, at the beginning of the thirteenth century, made a new translation of Maimonides' work and accused Samuel ibn Tibbon of having intentionally obscured the text. Al-Ḥarizi was not successful in his attempt to supersede Samuel's translation with his own, for the former was found by some critics to be more faithful to the original. Thus Shem-Ṭob ibn Falaquera, passing judgment upon both translations, says: "In Ibn Tibbon's translation the errors are few, and if the learned translator had had time he certainly would have corrected them; but in Al-Ḥarizi's, mistakes are numerous and words are often given wrong meanings."

In addition to the "Moreh," Samuel translated the following works of Maimonides: a treatise on resurrection ("Iggeret," or "Ma'amar Teḥiyyat ha-Metim"); the Mishnah commentary on Pirḳe Abot, with the psychological introduction ("Shemonah Peraḳim"); the "Thirteen Articles of Faith" ("Shelosh 'Esreh 'Iḳḳarim"); a letter addressed to Joseph ibn 'Aknin. Samuel did not confine his activity to Jewish writings, but translated works written by Arabs and bearing on philosophy and medicine. Among these were: Yaḥya ibn Baṭriḳ's Arabic translation of Aristotle's "Meteora" ("Otot ha-Shamayim," or "Otot 'Elyonot"), three small treatises of Averroes ("Sheloshah Ma'amarim"), and Ali ibn Riḍwan's commentary on the "Ars Parva" of Galen.

Judah al-Ḥarizi.

No less prominent in the field of translation was the above-mentioned poet Judah al-Ḥarizi. In addition to the "Dalalat al-Ḥa'irin," he translated Maimonides' treatise on resurrection (already rendered into Hebrew by Samuel ibn Tibbon) and his Mishnah commentary on Zera'im, Ḥariri of Busrah's "Maḳamat" ("Maḥberot Itiel"), Ali ibn Riḍwan's ethical epistle, Galen's essay against hasty interment, a treatise on the soul ("Sefer ha-Nefesh") also attributed to Galen, an originally Greek work on the "Dicta of the Philosophers" ("Mussare ha-Filosofim"), and an anonymous treatise on geomancy ("Sefer ha-Goralot").

A prolific translator, whose style, although less poetic, was more clear than that of his contemporary Al-Ḥarizi, was Abraham ben Samuel Ḥasdai. Among his translations are the following: the pseudo-Aristotelian "Kitab al-Tuffaḥah" ("Sefer ha-Tappuaḥ," Venice, 1519; frequently reprinted); Ghazali's ethical work "Mizan al-'Amal" ("Mozene Ẓedeḳ," in which the translator replaced the quotations from the Koran and the Sunnah with their equivalents from Bible and Talmud; ed. Goldenthal, Leipsic, 1839); Isaac Israeli's "Kitab al-Istiḳṣat" ("Sefer ha-Yesodot"); Maimonides' "Sefer ha-Miẓwot," with his letter to the Yemenite Jews ("Iggeret Teman"); and a romance presenting incidents in the life of Buddha ("Ben ha-Melek weha-Nazir," Constantinople, 1518). About the same time as the last-named work a famous book of fables was translated, under the title "Sefer Kalilah wa-Dimnah," by the grammarian Jacob ben Eleazar.

From about 1230 to 1300 the most important Arabic works on philosophy, medicine, astronomy, mathematics, and other branches of learning were translated. The leading translators of that period were Jacob Anatolio (son-in-law of Samuel ibn Tibbon), Moses ibn Tibbon, Jacob ben Machir ibn Tibbon, the Italian physician Nathan ha-Me'ati, and Zerahiah ben Isaac ben Shealtiel Gracian. Anatolio translated the "Almagest" of Ptolemy ("Ḥibbur ha-Gadol ha-Niḳra al-Majesti"), the "Elements of Astronomy" by Al-Fargani, a treatise on syllogisms by Al-Farabi ("Sefer Heḳḳesh ha-Ḳaẓer"), and the first five books of Averroes' Middle Commentary on Aristotle's "Logic," consisting of the Introduction of Porphyry and the four books of Aristotle on the "Categories," "Interpretation," "Syllogisms," and "Demonstration."

Arabic Philosophy and Science.

Moses ibn Tibbon, like his father, began his career as a translator with several works of Maimonides, including the treatise on hygiene ("Miktab," or "Ma'amar be-Hanhagat ha-Beri'ut"), a mishnaic commentary (probably on Zera'im), the "Book of Precepts" ("Sefer ha-Miẓwot," Constantinople, *c.* 1516), the treatise on logic ("Millot ha-Higgayon," Venice, 1552), the treatise on poisons ("Ha-Ma'amar ha-Nikbad," or "Ha-Ma'amar be-Ṭeri'ak"), and the commentary on Hippocrates' "Aphorisms." Moses' other translations are: Averroes' commentaries on Aristotle's "Physica Auscultatio" ("Ḳiẓẓure ibn Roshd 'al Shema' Ṭib'i," Riva di Trento, 1559); "De Cœlo et Mundo" ("Kelale ha-Shamayim weha-'Olam"); "De Generatione et Corruptione" ("Sefer ha-Hawayah weha-Hefsed"); "Meteora" ("Sefer Otot ha-'Elyonot"); "De Anima" ("Kelale Sefer ha-Nefesh"); the Middle Commentary on the last-named work ("Bi'ur Sefer ha-Nefesh"); "Parva Naturalia" ("Ha-Ḥush weha-Muḥash"); "Metaphysica" ("Mah she-Aḥar ha-Ṭeba'"); a commentary on Avicenna's "Arjuzah" ("Bi'ur Arguza"); Avicenna's "Small Canon" ("Ha-Seder ha-Ḳaṭan"); Batalyusi's "Al-Ḥada'iḳ" ("Ha-'Agullot ha-Ra'yoniyyot," ed. Kaufmann, Leipsic, 1880); Al-Ḥaṣṣar's treatise on arithmetic ("Sefer ha-Ḥeshbon"); Euclid's "Elements" ("Shorashim," or "Yesodot"); Al-Farabi's "Book of the Principles" ("Hatḥalot ha-Nimẓa'ot ha-Ṭib'iyyim," ed. Filipowski, Leipsic, 1849); Geminus' introduction to the "Almagest" ("Ḥokmat ha-Kokabim," or "Ḥokmat ha-Tekunah"); Ibn al-Yazzar's "Viaticum" ("Ẓedat ha-Derakim"); Ḥunain's introduction to medical science ("Mabo el-Meleket ha-Refu'ah"); Razi's works on the division of maladies ("Ha-Hilluḳ weha-Ḥilluf") and on the antidotes; Ḥunain's translation of Themistius' commentary on the treatise "Lamda" ("Perush Ma'amar ha-Nirsham be-Ot Lamed") and of the Aristotelian physical questions ("She'elot Ṭib'iyyot"); Kosta ben Luka's translation of the "Sphærica" of Theodosius Tripolitanus ("Sefer Teodosiyus be-Kadur"); and Ibn Aflaḥ's astronomical work "Kitab Ilahiyah."

Jacob ben Machir ibn Tibbon translated: the "Elements" of Euclid; the treatise of Kosta ben Luka on the armillary sphere; the "Data" of Euclid ("Sefer ha-Mattanot") according to the Arabic translation of Isḥaḳ ben Ḥunain; the treatise of Autolycus on the sphere in movement ("Ma'amar Ṭalḳus"); three treatises on the sphere by Menelaus of Alexandria; Abu 'Ali ibn Ḥasan ibn al-Ḥaitham's astronomical work ("Ma'amar bi-Tekunah," or "Sefer 'al Tekunah"); Abu al-Ḳasim Aḥmad ibn al-Ṣaffar's treatise on the use of the astrolabe; Abu

Mohammed Jabar ibn Aflaḥ's compendium of the "Almagest"; Abu Isḥaḳ ben al-Zarḳalah's astronomical work ("Iggeret ha-Ma'aseh be-Luaḥ ha-Niḳra Sofiḥah"); the preface to Abraham bar Ḥiyya's astronomical work; an extract from the "Almagest" on the arc of a circle; Averroes' compendium of the "Organon" ("Ḳiẓẓur mi-Kol Meleket Higgayon," Riva di Trento, 1559); Averroes' paraphrase of books xi.–xix. of Aristotle's history of animals; Ghazali's "Mizan al-'Uyun," in which are refuted the philosophical ideas antagonistic to religion ("Mozene ha-'Iyyunim").

Thirteenth-Century Activity.

Nathan ha-Me'ati, called the "Prince of Translators" and the "Italian Tibbonide," translated the following medical works: 'Ammar ben 'Ali al-Mauṣuli's "Al-Muntaḥib fi 'Ilaj al-'Ain," on the treatment of the eye; the "Canon" of Avicenna; the aphorisms of Hippocrates, with Galen's commentary; the aphorisms of Maimonides, and a selection from various authors, chiefly from Galen ("Pirḳe Mosheh," Lemberg, 1804). Many anonymous translations are attributed to Nathan ha-Me'ati: Razi's treatise on bleeding ("Ma'amar be-Haḳḳazah"); Zahrawi's "Kitab al-Taṣrif" (Hebrew title, "Ẓeruf"); Ibn Zuhr's "Kitab al-Aghdhiyah" ("Sefer ha-Mezonot"); an anonymous work on the causes of eclipses ("Ma'amar 'al Libbot Liḳḳut ha-Me'orot"). A translation of Galen's commentary on Hippocrates' work "On Airs, Waters, and Places," begun by Nathan, was completed in 1299 by his son Solomon, whose son Samuel in turn concluded the translation of an extract from Galen's commentary on Hippocrates' work "On Regimen in Acute Diseases," and the translation of a medical work by Ibn Zuhr.

Zerahiah ben Isaac ben Shealtiel Gracian translated: Aristotle's "Physics" ("Sefer ha-Ṭeba'"), "Metaphysics" ("Mah she-Aḥar ha-Ṭeba'"), "De Cœlo et Mundo" ("Ha-Shamayim weha-'Olam"), "De Anima" ("Sefer ha-Nefesh"), and "De Causis" ("Ha-Bi'ur ha-Ṭob ha-Gamur"); Averroes' Middle Commentaries on Aristotle's "Physics," "Metaphysics," and "De Cœlo et Mundo," with the commentary of Themistius on the last-named work; the first two books of Avicenna's "Canon"; Al-Farabi's "Risalah fi Mahiyyat al-Nafs" ("Ma'amar be-Mahut ha-Nefesh"); a medical work of Galen from the Arabic of Ḥunain ibn Isḥaḳ ("Sefer ha-Ḥola'im weha-Miḳrim"); three chapters of Galen's Καταγενή, with the same title in Hebrew characters; Maimonides' treatise on sexual intercourse; the "Aphorisms" of Maimonides.

The other translations of the second half of the thirteenth century were by:

Albalag, Isaac: Ghazali's "Maḳaṣid al-Falasifah": Elijah Cohen's "Maḳamah" (similar to the "Assemblies" of Ḥariri), under the title "Megillat ha-'Ofer."

Almoli, Nethaneel: Maimonides' commentary on Ḳodashim.

Ḥayyim ibn Vives: Farewell letter of Ibn Ṣa'igh to 'Ali ben 'Abd al-'Aziz ibn al-Imam of Granada.

Jacob ben Moses ibn 'Abbasi: Maimonides' commentary on Nashim.

Joseph al-Fawwal: Maimonides' Mishnah commentary on Mo'ed.

Ma'arabi, Nahum: Maimonides' "Iggeret Teman" ("Petaḥ Tiḳwah"); Isaac Israeli's, or Jacob ben Nissim's, commentary on the "Sefer Yeẓirah"; Joseph ibn Ẓaddiḳ's "Microcosmos" ("Ha-'Olam ha-Ḳaṭan"); Saadia's commentary on the thirteen hermeneutic rules of R. Ishmael ("Shelosh-'Esreh Middot").

Shem-Ṭob ibn Falaquera: Ibn Gabirol's "Meḳor Ḥayyim."

Shem-Ṭob ben Isaac: Averroes' Middle Commentary on "De Anima"; Razi's "Al-Manṣuri"; Zahrawi's "Al-Taṣrif."

Solomon ibn Ayyub: Averroes' "De Cœlo et Mundo"; Avicenna's "Arjuza"; Ibn Janaḥ's "Kitab al-Taswiyah"; Maimonides' "Kitab al-Fara'iḍ."

Solomon ibn Ya'aḳub: Maimonides' commentary on Neziḳin.

A great number of Arabic works on mathematics, medicine, astronomy, and philosophy, especially by Averroes, were translated during the fourteenth century. The leading translator in the first twenty years of that century was KALONYMUS BEN KALONYMUS BEN MEÏR (Maestro Calo), who rendered the following Arabic works into Hebrew:

Al-Farabi's treatise on the intellect ("Ma'amar be-Sekel weha-Muskal").

Al-Farabi's division of the sciences ("Ma'amar be-Mispar ha-Ḥokmot").

Al-Farabi's treatise on the method of studying philosophy ("Iggeret be-Siddur Ḳeri'at ha-Ḥokmot").

Al-Kindi's treatises on nativities ("Iggeret be-Ḳiẓẓur ha-Ma'amar be-Moladot") and on the influence of the heavenly bodies on rain ("Iggeret be 'Illot").

Al-Kindi's treatise on humidity and rain ("Iggeret be-Laḥit ube-Maṭar").

'Ali Ibn Riḍwan's "Kitab al-'Imad fi Uṣul al-Ṭibb" ("Ha-'Ammad be-Shoroshe ha-Refu'ah").

Archimedes' treatise on the sphere and the cylinder, from the version of Kosta ben Luka.

Averroes' commentaries on the "Topics" ("Bi'ur Sefer Ṭobiḳi") and on "Sophisms" ("Bi'ur Sufisṭiḳa").

Averroes' Great Commentary on the "Second Analytics" ("Bi'ur Sefer ha-Mofet").

Translations of Averroes.

Averroes' Middle Commentaries on "Physics"; on "De Generatione et Corruptione" ("Sefer ha-Hawayah weha-Hefsed"); on "Meteora" ("Otot ha-Shamayim").

Averroes' Middle Commentary on the "Metaphysics" ("Sefer Mah she-Aḥar ha-Ṭeba'").

Averroes' dissertations on the first book of the "First Analytics."

Commentary on the Καρπός of Ptolemy, from the Arabic version of Abu Ja'far Aḥmad ben Yusuf ben Ibrahim ("Sefer ha-Peri ha-Niḳra Me'ah Dibburim").

Galen's treatise on clysters and colic, from the version of Ḥunain ibn Isḥaḳ ("Sefer Galyanus be-Ḥaḳna ube-Kulga").

Galen's essay on bleeding ("Sefer Galyanus be-Haḳḳazah").

Nichomæus of Gerasa's treatise on arithmetic, with a commentary of Abu Sulaiman Rabiya ibn Yaḥya.

Ptolemy's treatise on the planets ("Be-'Inyane ha-Kokabim ha-Nebukim").

Thabet ibn Kurrah's work on geometry, "Fi al-Shakl al-Ḳuṭṭa" ("Sefer ha-Temunah ha-Ḥittukit").

Treatise on the triangle by Abu Sa'adan.

Treatise on mathematical propositions ("Sefer Meshalim be-Tishboret").

Treatise on Euclid's five geometrical bodies in relation to the theory of Apollonius, and the commentary of Simplicius.

Treatise on cylinders and cones ("Ma'amar be-Iẓṭawwonot ube-Ḥiddudim").

Treatise on plants, attributed to Aristotle, with Averroes' commentary ("Sefer ha-Ẓemaḥim").

Treatise on animals ("Iggeret Ba'ale Ḥayyim"), from the twenty-first treatise of the encyclopedia of the Brethren of Sincerity (Mantua, 1557).

Another important translator from the Arabic, and of the same period, was Samuel ben Judah (Bonjudas) Males. His translations include:

Abu Abdallah Mohammed ibn Mu'ad of Seville on the eclipse of the sun, July 3, 1097, and on the dawn ("Iggeret be-'Ammud ha-Shaḥar").

Abu Isḥaḳ al-Zarḳalah on the movement of the fixed stars ("Ma'amar be-Tenu'at ha-Kokabim ha-Ḳayyamim").

Abu Mohammed Jabbar ibn Aflaḥ's compendium of the "Almagest."

Alexander of Aphrodisias on the intellect ("Ma'amar Aleksander al-Firduzi").

Averroes' Middle Commentary on Aristotle's "Nichomachean Ethics."

Averroes' commentary on Plato's "Republic."

Averroes' Short Commentary on the "Organon"; on geometrical bodies (books xxx. and xxxi. of Euclid), a supplement to the translation of Kalonymus ben Kalonymus; commentary on the "Almagest," i.-iii.

Dissertations on some obscure passages of Averroes' commentary on the "Organon," by Abu al-Ḳasim ibn Idris, Abu al-Ḥajjaj ibn Ṭalmus, Abu al-'Abbas Aḥmad ben Ḳasim, and 'Abd al-Raḥman ben Tahir.

Other Arabic works were translated in the fourteenth century by:

Ibn Vives al-Lorqui: Various books of the "Short Canon" of Avicenna.

Isaac ben Joseph ibn Pulgar: Ghazali's "Maḳaṣid al-Falasifah" ("Kawwanot ha-Filosufim").

Isaac ben Nathan of Cordova: Maimonides' "Maḳalah fi al-Tauḥid" ("Ma'amar ha-Yiḥud"), Tabrizi's commentary on Maimonides' twenty-five premises, and probably Joseph ibn 'Aknin's metaphysical essay.

Joseph ben Abraham ibn Waḳḳar: A medical work ("Sefer Refu'ot") and Zahrawi's "Kitab al-Taṣrif."

Moses ben Samuel ben Asher: Averroes' commentary on "Logic."

Moses ben Solomon of Beaucaire: Averroes' Great Commentary on the "Metaphysics."

Nathan Judah ben Solomon: Ibn Abi Ṣalt Umayya's medical work ("Kelal Ḳaẓer weha-Sammim ha-Nifradim") and Ghazali's "Maḳaṣid" ("Kawwanot ha-Filosufim").

Nethaneel ben Meshullam (or Menahem ben Nethaneel): Judah ibn Balaam's treatise on the Hebrew accents ("Horayyat ha-Ḳore").

Samuel Motot: Abraham ibn Daud's "Al-'Aḳidah al-Rafi'ah" ("Emunah Ramah"; the same work was translated, under the title "Emunah Nisa'ah," by Solomon Labi). Samuel Motot translated also passages from pseudo-Ibn Ezra ("Sefer ha-'Aẓamim").

Shem-Ṭob Ardotial: Isaac Israeli's ritual work ("Miẓwot Zemaniyyot").

Samson ben Solomon: The compendium of Galen's writings by the Alexandrians ("Ha-Ḳibbuẓim le-Aleksandriyim").

Solomon Dapiera: Moses ben Tobi's commentary on the didactic poem "Al-Saba'niyyah" ("Batte ha-Nefesh").

Solomon ibn Patir: Ibn Haitham's astronomical work "Ḳaul fi Ḥi'at al-'Alam."

Aristotelian Commentaries.

Todros Todrosi: Averroes' Middle Commentaries on the "Poetics" and "Rhetoric," the three essays against Avicenna, the treatise on the intellect, Avicenna's "Naja," and Al-Farabi's philosophical questions, "'Uyun al Masa'il" ("'En Mishpaṭ ha-Derushim").

———Averroes' treatise against Ghazali's "Tahafut al-Falasifah" ("Happalat ha-Happalah").

———Ghazali's answers to philosophical questions ("Ma'amar bi-Teshubot She'elot Nish'al Mehem").

———Pseudo-Ibn Ezra's "Sefer ha-'Aẓamim," and Joseph ibn Waḳḳar's and Solomon ibn Ya'ish's supercommentaries on Ibn Ezra's commentary on the Pentateuch.

With the fourteenth century the era of translations from the Arabic was practically closed, only a few works being translated during the fifteenth and sixteenth centuries. These were:

Ḥayyim ibn Musa: A medical work of Al-Jazzar.

Isaac ben Joseph Alfasi: Ghazali's "Mishkat al-Anwar" ("Mashkit ha-Orot we-Pardes ha-Niẓanim").

Maẓliaḥ of Galilee and Solomon Ma'arabi: Isaac Alfasi's rules relating to the treatise Ketubot.

Moses Galina: An astronomical treatise of Omar ibn Mohammed Meṣuman ("Sefer Mezuḳḳaḳ"). Moses Galina translated also a work on astrology ("Mishpaṭ ha-Mabbaṭim") and one on geomancy ("Sefer ha-Goralot").

Moses ben Joseph Aruvas: The pseudepigraphic work known as the Aristotelian "Theology."

Saadia ben David al-Adeni: Ghazali's "Zakat al-Nufus." (Saadia declared this to be his own work.)

Tanḥum Moses of Beaucaire: Hippocrates' "Prognostics" ("Panim le-Panim").

Zerahiah ha-Levi Saladin: Ghazali's "Tahafut al-Falasifah" ("Mappalat ha-Pilusufim").

Several translations from the Arabic were made in the second half of the nineteenth century: Reckendorf translated the Koran (Leipsic, 1857); Joseph Derenbourg translated Maimonides' commentary on Seder Ṭohorot (Berlin, 1887–89); fragments of Saadia's commentaries on Proverbs, Isaiah, and Job were translated by Derenbourg, Meyer Lambert, and Wilhelm Bacher; Isaac Broydé translated Baḥya's "Ma'ani al-Nafs" ("Torot ha-Nefesh," Paris, 1896).

The following are among the numerous works translated anonymously by Jewish authors:

Anonymous Translations.

Sahl ibn Bishr, astrological work, under the title "Kelalim": four works attributed to Isaac Israeli: (1) "Kitab al-Adwiyat al-Mufridah wal-Aghdhiyah," on diet ("Sefer Meḥubbar mi-Ma'amar ha-Rishonim be-Ṭeba' ha-Mezonot we-Koḥatam"); (2) "Kitab al-Bul" ("Sefer Meḥubbar mi-Ma'amar ha-Rishonim be-Yedi'at ha-Sheten"); (3) "Kitab al-Ḥummayat"; (4) "Aphorisms" ("Musar ha-Rofe'im"): Saadia's "Emunot"; Hai Gaon's treatise on oaths ("Mishpeṭe Shebu'ot"); Responsa of the Geonim (Naṭronai, Saadia, Sherira, Hai); Japheth ben Ali's commentary on the Pentateuch; Joshua's "Teshubot ha-'Iḳḳarim" and Bereshit Rabbah; Judah ibn Baalam's works on homonyms ("Kitab al-Tajnis"), on the particle ("Otot ha-'Inyanim"), and on "Verba Denominativa," "Al-Af'al al-Mushtaḳḳah min al-Asma" ("Ha-Po'alim Shehem me-Gizrot ha-Shemot"); Moses ibn Ezra's "Kitab al-Ḥada'iḳ fi Ma'ani al-Mujaz wal-Ḥaḳiḳah" ("'Arugat ha-Bosem"); Joseph ibn Ẓaddiḳ's "Microcosm" ("'Olam Ḳaṭan"); Maimonides' treatises on the calendar ("Sefer ha-'Ibbur"), on happiness, "Maḳalah fi al-Sa'adah" ("Pirḳe ha-Hazlaḥah"), and on forced conversions ("Iggeret ha-Shemad"), responsa on hemorrhoids. "Fi al-Bawasir" ("Ha-Ma'amar be-Refu'at ha-Ṭeḥarim"), on sexual intercourse, "Fi al-Jama'ah" ("Ma'amar ha-Mishgal"), and on poisons, "Al-Sumum wal-Mutaḥarriz min al-Adwiyah al-Ḳitalah," and the commentary on Hippocrates' "Aphorisms"; Joseph ibn 'Aḳnin's "Maḳalah fi Ṭibb al-Nafs" ("Marpe le-Nefesh"); Abraham Maimonides' "Kifayah"; Moses Abulafia's theological work "Ma'amar Elohi"; Joseph ibn Naḥmias' astronomical work "Nur al-'Alam" ("Or 'Olam"); Joseph ibn Waḳḳar's work on the Sefirot.

The oldest known Hebrew translation from the Latin belongs to the thirteenth century. About 1250 Solomon ben Moses Melgueiri translated the treatise known as "De Somno et Vigilia" and attributed to Aristotle ("Ha-Shanah weha-Yeḳiẓah"); Averroes' commentary on the third book of Aristotle's "Metaphysics"; Avicenna's "De Cœlo et Mundo"; and Matthæus Platearius' "De Simplici Medicina." About the same time Berechiah ben Naṭronai Krespia ha-Naḳdan gave a Hebrew version of Adelard of Bath's "Quæstiones Naturales," and of a "Lapidary" containing a description of sixty-three kinds of stones. Toward the end of the same century Samuel ben Jacob of Capua rendered into Hebrew, under the general title "Meha-'Eẓah weha-Ṭeba'im," the Latin version "De Medicamentarum Purgationum Delectio," or "Castigatione," of a work of Mesue the Elder. About the same time Hillel ben Samuel translated the Latin version of Hippocrates' "Aphorisms" by Constantinus Africanus, and "Chirurgia Burni."

From the Latin.

The fourteenth century, an age of translations from the Arabic, was equally fertile in translations from the Latin. About 1305 Estori Farḥi translated, under the title "Targum Sefer Refu'ot," Armengaud Blaise's "De Remediis," and, under the title "Sefer ha-Kibbusim," an anonymous work on purgatives that had been rendered into Latin from the Arabic by Elijah ben Judah. In 1320 Hezekiah ben Ḥalafta gave a Hebrew version of Petrus Hispanus' treatise on logic ("Higgayon"). About the same time Samuel ben Benveniste translated, under the title "Menaḥem Meshib Nafshi," Boethius' "De Consolatione Philosophiæ." In 1327 Israel Caslari translated, under the title "Ma'amar be-Hanhagat ha-Beri'ut," Arnaud de Villeneuve's "Regimen Sanitatis."

More important than the above translations from the Latin were those made by Leone Romano, who, toward the middle of the same century, rendered into Hebrew the following works: Ægidius, "De Esse et Essentia" ("Ma'amar ha-Nimẓa weha-Meẓi'ut"); his treatises on the faculties of the soul ("Ma'amar Hebdale Koḥot ha-Nefesh we-Ḥilluḳehem"), and on syllogisms ("Ma'amar ha-Hawayah ha-Heḳḳeshiyyah"); his commentary on the third book of Aristotle's "De Anima"; and extracts from the commentary on Aristotle's "De Demonstratione"; Albertus Magnus' commentary on the third book of Aristotle's "De Anima," and various extracts from Albertus Magnus' works; Alexander the Minarite's glosses to Aristotle's "Metaphysics"; extracts from Angelo de Camerino's works; the "Liber de Causis" ascribed to Aristotle; Thomas Aquinas' "Treatise on Ideas," and extracts from his "Contra Gentiles" ("Neged ha-Ummot"); Averroes' "De Substantia Orbis" ("'Eẓem ha-Shamayim"); Boethius' "De Unitate et Uno" ("Ma'amar ha-Eḥad weha-Aḥadut"). Other translations from the Latin were as follows: Johannes Paulinus' treatise on the medical virtues of the skin of the serpent ("Ma'amar bi-Segullot 'Or ha-Naḥash"), by David ibn Bilia; Francesco dei Cenneli's, Gentile da Foligno's, and John of Burgundy's "Consilia" ("'Eẓah"), by Joshua of Bologna; Arnaud de Villeneuve's treatise "De Vinis" ("Ha-Dibbur be-Yenot"), and Bernard of Gordon's and Gilbert's treatises on fevers, both translated by Judah Nathan ("En Bongodas" and "Bonjues"); Bernard de Gordon's "Lilium Medicinæ" ("Peraḥ ha-Refu'ot"), by Moses ben Samuel of Roccambra (John of Avignon) and by Jekuthiel ben Solomon of Narbonne ("Shoshan ha-Refu'ah"); Leon's "Historia de Prœliis" ("Toledot Aleksander"), by Immanuel ben Jacob Bonfils; Bernard Alberti's "Materia Medica" ("Mebo ha-Melek"), Arnaud de Villeneuve's "Medicationis Parabolæ" and his work on digestion and purgatives, the commentary of Gerard de Solo on the ninth book of Razi's "Al-Manẓuri," and Petrus Hispanus' treatise on logic, all by Abraham Abigdor (Bonet) ben Meshullam ben Solomon; Gerard de Solo's commentary on the ninth book ("Pathology") of Razi and his manual of medicine ("Meyashsher ha-Mathḥilim"), a chapter on the relation between astronomy and medicine attributed to Hippocrates, and Bernard de Gordon's "Lilium Medicinæ" and "Prognostic," all by Leon Joseph of Carcassonne; Arnold de Villeneuve's "Digestiva," by Todros ben Moses Yom-Ṭob; Arnold de Villeneuve's "De Judiciis Astronomiæ" ("Panim la-Mishpaṭ") and Sacrobosco's "Sphæra Mundi" ("Moreh ha-Ofannim"), by Solomon ben Abraham Abigdor (the first work was translated by him at the age of fifteen); Arnold de Villeneuve's "Tabula Super Vita Brevis," by Bonenfante of Milhaud; Ibn Rijal's astronomical work from the Latin version of Ægidius or of Petro de Regio ("Mishpaṭe ha-Kokabim"), by Solomon ben David Davin.

The fifteenth century was for the Hebrew translations from the Latin what the fourteenth was for those from the Arabic; it was the richer in literary productions, but with it the era of translations closed. The most important of the translated works in that century were:

Abraham ben Joseph ben Naḥmias: Thomas Aquinas' commentary on Aristotle's "Metaphysics."

Abraham Solomon Catalan: Albertus Magnus' "Philosophica Pauperum" ("Ḳiẓẓur ha-Filosofia ha-Ṭib'it"), and Marsilius' "Questions" on the "Isagoge" of Porphyry, on the "Categories," and on hermeneutics.

Abu al-Khair: Albubather's "Liber de Nativitatibus" ("Sefer ha-Moladot") and Rajil's astronomical work "Completus."

Asher ben Moses Valabrega: Guy de Chauliac's "Chirurgia Parva."

Medieval Science and Philosophy.

Azariah ben Joseph ben Abba Mari: Boethius' "De Consolatione Philosophiæ," the twenty-eighth book of Zahrawi's "Liber Practicæ" (after the Latin of Simon of Genoa), the second book of the "Simplicia" of Dioscorides, and Gerard de Sabbionetta's astronomical work "Theorica."

Baruch ben Isaac ibn Ya'ish: Aristotle's "Metaphysics" and the tales, "Gesta Romanorum" ("Sefer Ḥanok"), of Petrus Alfonsis.

Benjamin ben Isaac of Carcassonne: Juan de Burgundia's treatise on the spread of the plague ("Be-'Ippush ha-Awwir weha-Deber," or "'Ezer Eloah").

David ben Jacob Meïr: John of Gmünd's astronomical work.

David ibn Shoshan ben Samuel of Avignon: Thomas Bicot's "Textus Abbreviatus Aristotelis, Super VIII. Libros Physicæ et Tota Naturalis Philosophia" ("Toledot Adam").

Elijah ben Joseph Ḥabillo: Thomas Aquinas' "Quæstiones Disputatæ," "Quæstio de Anima," "De Anima Facultatibus" ("Ma'amar be-Koḥot ha-Nefesh," published by Jellinek in "Philosophie und Kabbalah," Leipsic, 1854), and "De Universalibus"; Questions on Thomas Aquinas' treatise on "Being and Quality" ("She'elot Ma'amar be-Nimẓa ube-Mahut"); Occam's "Summa Totius Logices" and "Quæstiones Philosophicæ"; Aristotle's "De Causa"; and Vincenz de Beauvais's "De Universalibus."

Ephraim Mizraḥi: Georg Purbach's astronomical work "Theorica" ("Ṭe'oriḳa ha-Niḳra Mahalak ha-Kokabim").

Isaac Cabret (or Cabrit): John Sancto Amanelo's "Expositio in Antidotarium Nicolai."

Joseph ben Benveniste: Joshua ben Joseph ibn Vives al-Lorqui's treatise on the effects of nourishment, and on the simple and compound medicaments ("Gerem ha-Ma'alot").

Judah Shalom (Astruc) ben Samuel: Petrus Hispanus' "Parva Logica" and his commentary on Hippocrates' "Aphorisms."

Meïr Alguadez: Aristotle's "Ethics" and "Economics."

Mordecai Finzi: The Alfonsine Tables.

Moses ben Abraham of Nîmes: The Alfonsine Tables.

Moses ben Maẓliaḥ: Serapion's "Simplicia," from the Latin of Gerard de Cremona.

Phinehas ben Ẓebi ben Nethaneel: Raimundus Lullus' "Ars Brevis."

Solomon ben Moses Shalom: Antonius Guainerius' "De Febribis" ("Kelal meha-Ḳaddaḥut") and Bartolomeo Montagnana's "Consilium" ("Meha-'Eẓah").

Thaddeus: Treatise on fevers ("Kelal Ḳaẓer 'al Minhag ha-Ḳaddaḥut").

After the sixteenth century Hebrew translations from the Latin became very scarce. The few works translated included: a treatise on eclipses of the sun and moon ("Ma'amar Nikbad be-Liḳḳuyot Shamshiyyot we-Yeraḥiyyot"), by Moses ben Abraham Sahlun; Albertus' (Magnus ?) "Questions and Answers on the Six Natural Things Required by the Body According to the Science of Medicine," by Moses ibn Ḥabib; an ethical work ("Ẓemaḥ Ẓaddiḳ," Venice, 1600), by Leon de Modena; Thomas Aquinas' "Summa Theologiæ Contra Gentiles," by Joseph Ẓahalon; the letters of Seneca, by Judah Leon ben Eliezer Brieli (published in "Kerem Ḥemed," ii. 119 *et seq.*); Spinoza's "Ethics," by Solomon Rubin ("Ḥeḳer Eloah"); the thirteenth chapter of Tacitus' history, by Solomon Mandelkern.

During the sixteenth and seventeenth centuries very few works of any kind were translated into Hebrew; but with the Haskalah movement in Russia and Galicia the works of prominent European writers began to be rendered into that language. The following is a list of them, given under the heading of the language from which the translations were made:

Modern Times.

English. Aguilar, Grace: “Vale of Cedars” (“ ‘Emeḳ ha-Arazim,” by Abraham Shalom Friedberg, Warsaw, 1875).

Bunyan: “Pilgrim's Progress” (transl. by S. Hoga, London, 1845).

Byron: “Hebrew Melodies” (“Shire Yeshurun,” by Solomon Mandelkern, Leipsic, 1890).

Cumberland, Richard: “The Jew” (“Ish Yehudi,” by Joseph Brill, Wilna, 1878).

Defoe, Daniel: “Robinson Crusoe” (“Kur ‘Oni,” by Isaac Moses Rumseh, Wilna, 1861).

Disraeli, Benjamin: “David Alroy” (“Ḥoṭer mi-Geẓa‘ Yishai,” by Abraham Abel Rekowski, Warsaw, 1880); “Tancred” (“Nes la-Goyim,” by Judah Löb Levin, *ib.* 1883).

Eliot, George: “Daniel Deronda” (transl. by David Frischman, Warsaw, 1894).

Longfellow: “Excelsior” (transl. by Henry Gersoni, New York, 1871).

Milton: “Paradise Lost” (“Wa-Yegaresh ha-Adam,” by Isaac Edward Salkinson; also under the title “Toledot Adam we-Ḥawwah,” by Samuel Raffalowich, Jerusalem, 1892).

Mocatta, F. D.: “The Jews in Spain” (“Ha-Yehudim bi-Sefarad,” by Israel Be'er Franklin, Jerusalem, 1876); “The Jews in Spain and Portugal, and the Inquisition” (transl. by Isaac Hirsch Barth, Cracow, 1888).

Shakespeare: “Othello” and “Romeo and Juliet” (“Itiel” and “Rom we-Ya‘el,” by Isaac Edward Salkinson, Vienna, 1874 and 1878).

Spencer, Herbert: “Education, Intellectual, Moral, and Physical” (“Sefer ha-Ḥinnuk,” by Judah Löb Davidovich, Warsaw, 1894).

Zangwill, Israel: “Ghetto Tragedies” (“Maḥazot ha-Geṭṭo,” by S. L. Gordon, Warsaw, 1896).

French. Bernardin de Saint Pierre: “Harmonie de la Nature” (“Sulam ha-Ṭeba‘,” by Joseph Herzberg, Wilna, 1850).

Carnot, Hippolyte: “Histoire de la Révolution Française” (“Ha-Mahpekah ha-Ẓarfatit,” by Ludvipol, Warsaw, 1898).

Daudet, Alphonse: A short novel transl. by Abraham Shalom Friedberg, in “Me-Sifrut ha-‘Ammim.”

Florian, Jean Pierre Claris de: “Numa Pompilius” (“Eli‘ezer we-Naftali” [?], by Aaron Margolis, Warsaw, 1864; also by Isaac Troller, Wilna, 1867).

Halévy, Ludovic: A short novel transl. by Abraham Shalom Friedberg, in “Me-Sifrut ha-‘Ammim.”

Hugo, Victor: “L'Ane” (“Ha-Ḥamor weha-Filosof,” by Wolfgang Gronich, Vienna, 1881); “La Guerre Civile” (“Milḥemet ben Aḥim,” by J. Lewner, Warsaw, 1896); “Le Dernier Jour de la Vie d'un Condamne” (transl. by Safran, *ib.* 1898).

Kahn, Zadoc: “L'Esclavage Selon la Bible et le Talmud.”

Maspero: “Histoire des Anciens Peuples de l'Orient” (transl. by Ludvipol and Joseph Halévy, Warsaw, 1898).

Massé, Victor: “Histoire d'une Miette” (“Toledot Pas Leḥem,” by Abraham Jacob Tiktin, Warsaw, 1882); “Une Episode de la Révolution Française” (transl. by Moses Weissberg, *ib.* 1884).

Maupassant, Guy de: “Selections” (“Ketabim Nibḥarim,” 7 vols., Warsaw, 1904–5, by N. Slouschz).

Mickiewicz, Adam: “Le Livre de la Nation Polonaise et les Pelerins Polonais” (“Sefer ‘Am Polonim we-Gere Polonim,” by Moses Ezekiel Ascarelli, Paris, 1881).

Racine: “Esther” (transl. by Joseph Haltren and Solomon J. Rapoport) and “Athalie” (transl. by Meïr ha-Levi Letteris, Prague, 1843).

Scribe: “La Juive” (“Raḥel ha-Yehudiyyah,” by Süsmann Marik, Warsaw, 1886).

Sue, Eugène: “Les Mystères de Paris” (“Mistere Pariz,” by Kalman Schulman, Wilna, 1857–76); “Le Juif Errant” (“Ha-Ẓofeh be-Ereẓ Nod,” by Simḥah Posner, Warsaw, 1856–1873); “Les Sept Péchés Capitana” (“Sheba‘ Ḥaṭṭa'ot She'ol,” by Lasar Schapira, in “Meged Yeraḥim”).

Verne, Jules: “Vingt Mille Lieues sous les Mers” (“Be-Meẓulot Yam,” by Isaac Wolf Sperling); “Voyage au Centre de la Terre” (“Be-Beṭen ha-Adamah,” *idem*).

Zola: Three short stories translated by S. Sluschtsch. Warsaw, 1898.

Z——ski, L.: Novel, published by the “Archives Israélites,” depicting Jewish life in Russia (“Ḥatan Damim,” by Abraham Jacob Bruck, Lemberg, 1878).

German. Andersen: “Märchen und Erzählungen” (transl. by D. Frischmann, Warsaw, 1897).

Bernstein: “Aus dem Reiche der Natur” (“Yedi‘at ha-Ṭeba‘,” by D. Frischmann, *ib.* 1882–85); “Brahmanische Weisheit” (“Mishle Brakman,” by Schorr, Lemberg, 1867).

Börne, Ludwig: “Briefe aus Paris” (transl. by S. J. E. Triwasch, Warsaw, 1897).

Campe: “Theophron” (“Musar Haskel,” by Baruch Schönfeld, Prague, 1831; transl. also by Arnopolsky, Odessa, 1863); on sea-voyages (“Massa‘ot ha-Yam,” by Elias Levi, Zolkiev, 1818); “Sittenbüchlein” (transl. by David Zamoscz, Breslau, 1818); “Die Entdeckung Amerika's” (“Meẓi'at Ameriḳa,” by Moses Mendelsohn, Altona, 1807; transl also by David Zamoscz, Breslau, 1824); “Robinson der Jüngere” (transl. by David Zamoscz, *ib.* 1824).

Cassel, David: “Geschichte und Literatur der Juden” (transl. by D. Radner, Warsaw, 1880).

Eckhard: German transl. of Philo's “Legatio ad Caium” (“Malakut Filon ha-Yehudi,” by Marcus Aaron Günzburg, Warsaw, 1837).

Ellenberger, Henri: “Die Leiden und Verfolgungen der Juden” (“Ẓal we-Or,” by Hermann Horowitz, Presburg, 1882).

Francolm: “Die Juden und die Kreuzfahrer” (“Ha-Yehudim be-Angliya,” by Miriam Mosessohn).

Goethe: “Faust” (“Ben Abuyah,” by Meïr ha-Levi Letteris, Vienna, 1860); “Hermann und Dorothea” (“Ha-Ẓedeḳ,” by Marcus Rothenburg, Warsaw, 1857).

Grätz, Heinrich: “Geschichte der Juden” (“Dibre ha-Yamim li-Bene Yisrael,” by S. P. Rabbinowitz, Warsaw, 1890).

Güdemann: “Geschichte des Erziehungswesens” (“Ha-Torah weha-Ḥayyim ba-Araẓot ha-Ma‘arab li-Yeme ha-Benayim,” by Abraham Shalom Friedberg, *ib.* 1893–95).

Gustavsohn: “Sammlung von Jugenderzählungen” (transl. by N. Pius, Warsaw, 1896–98); “Die Drei Brüder” (“Shelashot Aḥim”); “Der Hirt und die Königstochter” (“Ha-Ro‘eh we-Bat ha-Melek”); “Der Schlaflose König” (the last three transl. by J. Lewner, Warsaw, 1896–98).

Heine, Heinrich: “Judah ha-Levi,” a poem (transl. by Solomon Luria, Warsaw, 1886).

Heise, Paul: “Sulamit” (transl. by S. Gordon, *ib.* 1896).

Herzberg, Frankel: “Die Vergeltung” (“Ha-Gemul,” by P. Slonimsky, Odessa, 1867).

Herzl, Theodor: “Der Judenstaat” (“Medinat ha-Yehudim,” by Michel Berkovitz, Warsaw, 1896); “Das Neue Ghetto” (“Ha-Geṭṭo he-Ḥadash,” by Reuben Brainin, *ib.* 1898).

Hoffmann, Fr.: “Königssohn” (“Ben ha-Melek,” by Moses Samuel Sperling, Warsaw, 1876); “Unredliches Gut” (“Naḥalah Mebohelet,” by Manus Manassewitz, Wilna, 1887).

Honigmann: “Die Erbschaft” (“Ha-Yerushshah,” by Samuel Joseph Fuenn, Wilna, 1884).

Jellinek, A.: “Der Jüdische Stamm in Nichtjüdischen Sprüchwörtern” (transl. by Elimelech Wechsler, in “Ha-Asif,” vol. iii.).

Josephus: “Jüdische Alterthümer” (“Ḳadmoniyyot ha-Yehudim,” by Kalman Schulman, Wilna, 1864); “Kriege” (“Milḥamot ha-Yehudim,” *idem*, ib. 1884).

Kayserling: “Biographische Skizze des Menasseh ben Israel” (“Toledot Manasseh ben Yisrael,” by Joseph Lasar Epstein, in “Ha-Karmel,” iii.).

Klopstock, G.: “Der Tod Adams” (“Mot Adam,” by Menahem M. Litinsky, Prague, 1817).

Kohn, S.: “Der Retter” (“Podeh we-Maẓẓil,” by Lasar Isaac Schapira, Warsaw, 1866).

Kompert, L.: “Zwei Trümmer” (“Shete Ḥarabot,” by Süsmann Marik, St. Petersburg, 1880; transl. also by Wolf Jawetz, Warsaw, 1887).

Kotzebue: “Der Schatz” (“Ha-Oẓer,” by David Rosenhand, Warsaw, 1845); “Der Arme Poet” (“Ha-Meshorer ha-‘Ani,” by Isidor Brüstiger, Lemberg, 1884).

Lazarus, M.: “Der Prophet Jeremiah” (transl. by Reuben Brainin, Warsaw, 1896).

Lehmann, M.: “Der Graf und Jude” (transl. by Joseph Löb Petuchowsky, in “Ha-Lebanon,” 1872; also by Samuel Joseph Fuenn, under the title “Ha-Ḥilluf,” Wilna, 1873); “Das Licht der Diaspora” (“Ma'or ha-Golah,” by Joseph Löb Petuchowsky, *ib.* 1890); “Bostanai” (transl. by Samuel Joseph Fuenn, *ib.* 1872).

Lessing, Gotthold Ephraim: “Nathan der Weise” (“Nathan he-Ḥakam,” by S. Bacher, Vienna, 1866; transl. also by A. B. Gottlober, who rendered the Hebrew in the same meter as the original, *ib.* 1874); “Philotas” (“Abinadab,” by J. Falkovich, Odessa, 1868); “Die Juden” (“Ha-Yehdim,” by Jacob Kohn, Warsaw, 1875; also in verse by Hirsh Teller, Vienna, 1881); “Der Freigeist” (“Ḥonen we-Noten,” by D. Kohn); “Miss

Sara Sampson” (“Sarah Bat Shimshon,” by Israel Frenkel, Warsaw, 1887); “Fabeln (“Lessing we-Sippuraw,” by Moses Reicherson, New York, 1902).

Lippert, Julius: “Kulturgeschichte” (“Toledot Hashlamat ha-Adam,” by David Frischmann, Warsaw, 1894–1901).

Maier: “Die Zerstörung von Betar” (“Harisut Beter,” by Kalman Schulman, Wilna, 1858); “Elisha ben Abuyah” (in “Safah Berurah,” *idem*, ib. 1847).

Manes: “Gesammelte Schriften” (transl. by Joseph Kuttner, Vienna, 1865).

Meisel: “Die Meiselgasse” (transl. by J. Lewner, Warsaw, 1897).

Mendelssohn, Moses: “Jerusalem” (transl. by A. B. Gottlober, Jitomir, 1867; also by Vladimir Federow, Vienna, 1876); “Die Sache Gottes” (“Ma’amar ‘al ha-Hashgaḥah,” by Samuel Joseph Fuenn, Wilna, 1872); “Phädon” (transl. by Isaiah Beer-Bing, Berlin, 1786).

Mosenthal: “Deborah” (transl. by David Radner, Warsaw, 1880).

Philippson, Ludwig: “Israelitische Religionslehre” (“Yesod ha-Dat ha-Yisraelit,” by Isaac Beer Epstein, Königsberg, 1849); “Miriam die Hasmonäerin” (“Miryam ha-Ḥashmonit,” by Joseph Lasar Epstein, Wilna, 1863); “Spanien und Jerusalem” (“Sefarad we-Yerushalayim,” by Phöbus Dicker, in “Ha-Asif,” vol. iii.); “Die Marranen” (“Nidḥe Yisrael,” by Abraham Abel Rakowsky, Warsaw, 1875); “Jacob Tirado” (“Ya‘aḳob Ṭirado,” by Samuel Joseph Fuenn, Wilna, 1874); “Der Flüchtling aus Jerusalem” (“Ha-Paliṭ,” by Miriam Mosessohn); “‘Ezra ha-Sofer” (epic poem, transl. by Solomon Mandelkern, Vienna, 1886); “Das Martyrerthum” (“Ḳiddush ha-Shem,” by Zupnik, Brody, 1867; “Jojachin” (transl. by S. Bacher, Vienna, 1859).

Reckendorf: “Geheimnisse der Juden” (“Zikronot le-Bet Dawid,” by A. S. Friedberg, Warsaw, 1893–95; under the title “Mistere ha-Yehudim,” the first volume was translated by Abraham Kaplan).

Reclam: “Gesundheitschlüssel” (“Netib Ḥayyim,” by A. Schapira, Warsaw, 1887).

Samter: “Rabbi von Liegnitz” (“Rab le-Hoshia‘,” by Abraham Shalom Friedberg, Warsaw, 1886).

Samuely: “Aus dem Finsteren” (transl. by A. Mirsky, in “Keneset Yisrael,” vol. iii.).

Schiller: “Spaziergang Unter den Linden” (transl. by Kalman Schulman, in “Safah Berurah,” Wilna, 1847); “Philosophische Briefe” (transl. by Solomon Rubin, Lemberg, 1851); “Die Zerstörung Troja’s” (“Harisat Ṭroya,” in verse, by Micah Lebensohn, Wilna, 1851); “Die Sendung Moses” (“Dibre Emet,” by Elias Levin, *ib.* 1866); “Die Braut von Messina” (“Medanim ben Aḥim,” by Jacob Levin, Brody, 1868); “Die Räuber” (“Ha-Shodedim,” by Moses Schulbaum, Lemberg, 1871); “Wilhelm Tell” (transl. by David Radner, Wilna, 1878); “Don Carlos” (by the same, *ib.* 1879); “Marie Stuart” (transl. by Solomon Kovner, *ib.* 1879); “Turandot” (“Tirẓah,” by Osias Atlas, Przemysl, 1879); “Fiesco” (“Ḳesher Fiesko,” by Samuel Apfel, Drohobicz, 1889); “Resignation” (“Amarti Yesh Tiḳwah,” by Neumanowitz, Warsaw, 1888). Meïr ha-Levi Letteris translated a number of pieces in “Ayyelet ha-Shaḥar,” Vienna, 1860.

Schleiden, M.: “Die Bedeutung der Juden” (“Mif‘alot ha-Yehudim,” by Arie Geronim Gordon, Wilna, 1882).

Schumacher, P.: “Berenika” (transl. by David Frischmann, Warsaw, 1895).

Steinschneider, Moritz: “Die Jüdische Literatur” (“Sifrut Yisrael,” by Malter, Warsaw, 1899).

Tugendhold, W.: “Der Denunciat” (“Ha-Moser,” or “Aḥarit Resha‘,” Breslau, 1847).

Weisel, L.: “Die Goldene Strasse” (“Reḥob ha-Zahab,” by J. Lewner, Warsaw, 1897); “Die Falsche Beschuldigung” (“‘Alilot Shaw,” by Moses Samuel Sperling, Warsaw, 1878).

Wertheimer, Ritter von: “Jüdische Lehre und Jüdisches Leben” (“Emet we-Mishpaṭ,” by Zupnik, Drohobicz, 1883).

Zschokke: “Das Abenteuer der Neujahrsnacht” (“Lel Shimmurim,” by Isidor Margolis, Wilna, 1878).

Italian. Dante: “Divina Commedia” (“Mar’ot Elohim,” by Saul Farmiggini, Triest, 1869).

Luzzatto, Simeon: “Discorso Circa il Stato Degli Hebrei, ch. xiii.” (transl. by Isaac Reggio, in “Iggeret Yashar,” vol. i.).

Marfei: “Merope,” a tragedy (transl. by Samuel Aaron Romanelli, Rome, 1903).

Metastasio: “Isacco” (“‘Aḳedat Yiẓḥaḳ,” by Elijah Bardach, Vienna, 1833); a poem (“Teshu‘at Yisrael bi-Yede Yehudit,” by Franco-Mendez, Rödelheim, 1804).

Polish. Kozlowski: “Estherka,” a drama (“Ma‘aseh Ester,” by Israel Frankel, Warsaw, 1889).

Orzhesko: “Okanski” and “Mirtala” (transl. by Abraham Abel Rakowsky, Warsaw, 1886 and 1888).

Paulicki: On popular medicine (“Marpe le-‘Am,” by Bezaleel Judah Eliasberg, Wilna, 1834, 1842; Jitomir, 1886).

Rinaldo Rinaldini: novel (“Lahaḳat Shodedim,” by Ḥayyim Goldstein, Warsaw, 1859).

Russian. Bogron: “Poimannik” (“Ha-Nilkad be-Sheḥitot Anshe Resha‘,” by Isaac Andres, Warsaw, 1877).

Frug: Poems (“Kol Shire Frug,” by Jacob Kaplan, Warsaw, 1898).

Harkavy: “Judah ha-Levi” (transl. by Abraham Shalom Friedberg, in “Keneset Yisrael,” vol. ii., 1886).

Hufeland: “Enchiridion Medicon” (“Darke ha-Refu’ot,” by Jacob Frohnberg, Jitomir, 1869).

Krilov: Fables (“Tiḳḳun Meshalim,” by Moses Reicherson, Wilna, 1860).

Lewanda: “Genev i Milost Magnata” (“‘Ir u-Behalot,” by Samuel Löw Citron, in “Keneset Yisrael,” 1886); “Abraham Yosefovich” (“Abraham ben Yosef,” *idem*).

Rabbinovich, Osip: “Shtrafnoi” (“Ben ‘Onesh,” by Kanelsky, Odessa, 1865).

Turgenef: Short story transl. by Abraham Shalom Friedberg, in “Me-Sifrut ha-‘Ammim.”

Spanish. Cervantes: “Don Quixote” (“Abino‘am ha-Gelili,” by I. Fraenkel, Lemberg, 1871).

Crescas, Ḥasdai: “Tratado” (“Biṭṭul ‘Iḳre Dat ha-Noẓarim,” by Joseph ibn Shem-Ṭob, published by Ephraim Deinard, Kearny, N. J., 1894).

Escudero, Lorenzo (Abraham Peregrino): “Fortalezza del Judaismo y Confusion del Estraño” (“Ẓeriaḥ Bet El,” by Marco Luzzatto of Triest [in manuscript]).

Morteira, Saul: “Tractado de la Verdad de la Ley” (“Torat Mosheh,” by Isaac Gomez de Gosa [in manuscript]).

Into Arabic.

——**From the Hebrew:** Aside from the Arabic versions of the Bible, the Talmud, and the prayers (with which this article is not concerned), only three Arabic translations from the Hebrew are extant: the travels of Eldad ha-Dani, by an anonymous translator; the Yosippon (“Yusuf ibn Karyun”), by Zechariah ibn Sa‘id; and Isaac ibn Crispin’s “Sefer ha-Musar” (“Maḥasin al-Adab”), by Joseph ibn Ḥasan, which is supposed by Steinschneider to have been itself an adaptation from the Arabic. Through the Hebrew versions of the Arabic scientific works the treasures of the East and of ancient Greece were opened to the West. Indeed, with the exception of a small number of Latin translations made directly from the Arabic, mostly with the assistance of Jewish interpreters, all the works from which the Latin world learned mathematics, astronomy, medicine, philosophy, and other sciences were translated from the Hebrew versions made from the Arabic. Although it is possible that some among the Latin translations of the twelfth century were made from the Hebrew, the oldest known dates only from the thirteenth century. About 1260 John of Capua translated, under the title “Directorium Vitæ Humanæ” (published by J. Derenbourg, Paris, 1887), Joel’s Hebrew version of the “Kalilah wa-Dimnah.” He translated also Maimonides’ work on the dietary laws and Ibn Zuhr’s medical work “Al-Taisir.” Toward the end of the same century Armengaud Blasius translated Jacob ben Machir ibn Tibbon’s treatise on the quadrant invented by the latter, under the title “Quadrans Novus” or “Quadrans Judaicus.”

During the fourteenth century only a few works were translated from the Hebrew into Latin. Among these were the anonymous “Sefer ha-Ḥinnuk,” on the precepts, and Abner of Burgos’ “Iggeret ha-Gezerah.” During the fifteenth century Latin literature was enriched with many valuable works from the Hebrew. About 1486 Elijah Delmedigo made the following translations: “Quæstiones Tres: i. De

Into Latin.

Primo Motore; ii. De Mundi Efficientia; iii. De Esse Essentia et Uno" (Venice, 1501); "Averrois Quæstio in Libro Priorum" ("Analytics," Venice, 1497); Averroes' commentary on Plato's "Republic" ("De Regimine Civitatis"); "Averrois Commentatio [Summa] in Meteora Aristotelis," with fragments from Averroes' Middle Commentary (*ib.* 1488); "Averrois Commentatio [Media] in Metaph. Aristotelis," i.-vii. (*ib.* 1560); Averroes' proem to the Large Commentary on Aristotle's "Metaphysics," xii.; Averroes' "De Substantia Orbis"; "Sperma." Delmedigo's protector, Pico de Mirandola, translated at the same time the commentary of Menahem Recanati on the Pentateuch, the "Ḥokmat ha-Nefesh" ("Scientia Animæ") of Eleazar of Worms, and the "Sefer ha-Ma'alot" of Shem-Ṭob Falaquera. The teacher of Pico de Mirandola, Flavius Mithridates, translated thirty-eight fragments of various cabalistic works, Maimonides' epistle on resurrection, Levi ben Gershon's commentary on Canticles, and Judah's "Ma'amar ha-Hawwayah ha-Heḳḳeshiyyah" ("Sermo de Generatione Syllogismorum Simplicium et Compositorum in Omni Figura").

Very important contributions to Latin literature from the Jewish mystical writings were made at the end of the fifteenth century and at the beginning of the sixteenth by Cardinal Ægidius de Viterbo, who translated the Zohar, "Ginnat Egoz," "Sefer Razi'el," "Ma'areket Elahut," "'Eser Sefirot," and other cabalistic works. Among the translations of purely scientific works made in the sixteenth century, the most noteworthy are those of Abraham de Balmes, Kalonymus ben Judah (Maestro Calo), Jacob Mantino, and Moses Alatino. Abraham de Balmes translated Ibn Haitham's astronomical work ("Liber de Mundo") from the Hebrew version of Jacob ben Machir ibn Tibbon, and the "farewell letter" of the Arabic philosopher Ibn Baga or Avempace ("Epistolæ Expeditionis"). Kalonymus ben Judah translated Zeraḥiah ha-Levi's Hebrew version of Ghazali's "Tahafut al-Falasifah" ("Destructio," Venice, 1527), Samuel ibn Tibbon's Hebrew version of Averroes' treatise on the intellect ("De Conversione Intellectus," *ib.*), and Moses ibn Tibbon's Hebrew version of Alpetragius' treatise on astronomy (Venice, 1531). The translations of Jacob Mantino were: "Paraphrasis Averrois de Partibus et Generatione Animalium," with the commentary of Levi ben Gershon; Averroes' compendium of Aristotle's "Metaphysics"; the Middle Commentary on Aristotle's "Isagoge"; books i.-iv. of "Topics" and "Poetics" (Venice, 1550); a commentary on Plato's "Republic"; proem to the Large Commentary on the third book of Aristotle's treatise on the soul; proem to book xii. of Aristotle's "Metaphysics"; the Middle Commentary on Aristotle's "Physics"; Averroes' medical work "Colliget"; the first book of Avicenna's "Canon"; Maimonides' "Shemonah Peraḳim." Moses Alatino translated Moses ibn Tibbon's Hebrew version of Themistius' paraphrase of the four books of Aristotle's "De Cœlo" (Venice, 1574); Avicenna's "Canon"; Nathan ha-Me'ati's Hebrew version of Galen's commentary on a work of Hippocrates ("De Aëre, Aquis et Locis"). Among other works translated into Latin in the sixteenth century were: Ezobi's "Ḳa'arat Kesef" (by Reuchlin, Tübingen, 1512-14, and Jean Mercier, Paris, 1561); Levita's "Tishbi" (by Paul Fagius, 1541, who translated also the "Alfabeta de Ben Sira" and the "Sefer Amanah"); Benjamin of Tudela's travels (by Arias Montanas); the travels of Eldad ha-Dani (by G. Genebrard, Paris, 1584); Levita's grammatical works and Maimonides' treatise on logic (by Sebastian Münster, Basel, 1524 *et seq.*, who translated also the Yosippon, 1529-41); and a list of the 613 commandments from "SeMaG" (1533).

Christian Translators into Latin.

With the close of the sixteenth century the era of Latin translations, from the Hebrew, of Arabic scientific works ended, and the Jews ceased to serve as intermediaries between the civilizations of the East and the West. The work dropped by them was taken up by Christians, who had acquired from Jews their knowledge of Hebrew and other Oriental languages, and who made Latin translations of many Jewish writings of the Middle Ages. Foremost among these translators, in the first half of the seventeenth century, were the Buxtorfs; the elder Buxtorf translated the Biblical concordance, "Me'ir Netib," of Isaac Nathan ben Kalonymus and the "Iggeret Shelomim" ("Institutio Epistolaris Hebraica, sive de Conscribendis Epistolis Liber, cum Epistolarum Hebraicarum Centuria," Basel, 1610); the younger Buxtorf, Johannes, translated Maimonides' "Moreh Nebukim" ("Doctor Perplexorum," Basel, 1629) and Judah ha-Levi's "Cuzari" ("Liber Cosri," *ib.* 1660). Among the other Jewish works translated in the same century the most noteworthy were: Lipman-Mühlhausen's "Sefer ha-Niẓẓaḥon" (by John Heinrich Blendinger, Altdorf, 1645); the disputations of R. Jehiel and of Naḥmanides; Isaac Troki's "Ḥizzuḳ Emunah"; the "Toledot Yeshu"; the "travels" of R. Pethahiah and the "Megillat Wenz" (by Wagenseil); Cordovero's "Pardes Rimmonim" ("De Sanctissima Trinitate Contra Judæos," by Joseph Ciantes, Rome, 1664); Leon de Modena's dialogue on the subject of gambling (by August Pfeifer, Wittenberg, 1665; also by Thomas Hyde, Oxford, 1698, who translated Farissol's "Iggeret Orḥot 'Olam," under the title "Tractatus Itinerum Mundi," *ib.* 1691); the commentaries of Abravanel and others on Joshua; Moses Ḳimḥi's "Introductio ad Scientiam"; Joseph Yaḥya's commentary on Daniel; "Itinerarum Benjaminis of Tudela" (by Constantin l'Empereur); the "Alphabet of Ben Sira," "Megillat Antiochus," "Otiot de Rabbi 'Aḳiba," a part of Eldad ha-Dani's mythical travels, and Azariah dei Rossi's "Me'or 'Enayim" (all by Bartolocci in his "Bibliotheca Magna Rabbinica"); Abravanel's commentary on Daniel (by Höttinger); the "Idra Rabbah," the "Idra Zuṭa," the "Sifra de-Ẓeni'uta," the cabalistic essays of Naphtali Herz and Jacob Elhanan, the "Sha'ar ha-Shamayim" of Abraham Cohen de Herrera, and several of the writings of Isaac Luria (by Knorr von Rosenroth in his "Kabbala Denudata," Sulzbach, 1677-78); Maimonides' hilkot "'Abodat Yom ha-Kippurim," "Ḥameẓ u-Maẓẓah," "Ḳiddush ha-Ḥodesh," "Ta'aniyot," "Seder ha-'Abodah," and "Seder ha-Ḳorbonot" (by Ludwig

Compiegne de Weil, who translated also Abraham Yagel's catechism, "Leḳaḥ Ṭob"); the first part of Gans's "Ẓemaḥ Ṭob" (by Wilhelm Varot and also by Voisin); Zacuto's "Sefer ha-Yuḥasin," various parts of Maimonides' "Mishneh Torah," and part of the account of the travels of the Karaite Samuel ben David; Maimonides' "Yad," Talmud Torah and Teshubah (by Robertus Claverius).

Among the Latin translations of the eighteenth century the most noteworthy are: part of Maimonides' "Mishneh Torah" and extracts from the rabbinical commentaries on Psalms (by Heinrich Jacob Bashuysen, Hanover, 1705; Hanau, 1712); the "Sefer ha-Tappuaḥ" ("Biga Dissertationum," Giessen, 1706); Rashi's commentary on the Bible and the "Yosippon" (by John Frederick Breithaupt, Gotha, 1707, 1710); the Karaite Mordecai ben Nissim's "Dod Mordekai" ("Notitia Karæorum ex Tractate Mardochai," by Wolf, who translated also various fragments of Jewish writings in his "Bibliotheca Hebræa"); selections from the commentaries of Rashi, Abravanel, Ibn Ezra, and Isaiah di Trani on Joshua, and Moses Naḳdan's "Sha'ar ha-Neginot" ("Porta Accentuum," by John Georg Abicht); a part of Elijah Levita's "Shibre Luḥot" (by Nagel, Altdorf, 1758–71); portions of the "Taḥkemoni" (by Ure); Jedaiah Bedersi's "Beḥinat 'Olam" (by Uchtmann); the "Seder 'Olam Rabbah" (by Eduard Maier).

The following is a list of the works which have been translated from Hebrew into modern languages:

English. Aristotle, Pseudo-: "Sefer ha-Tappuaḥ," on the immortality of the soul (by Isidor Kalisch, Detroit, 1882).

Bedersi: "Beḥinat ha-'Olam" (by Tobias Goodman).

Benjamin of Tudela: "Massa'ot" (by Asher, London, 1840).

Ḥayyuj, Judah: "Two Treatises on Verbs Containing Treble and Double Letters," and the "Treatise on Punctuation" (by John W. Nutt, London and Berlin, 1870).

Joseph ha-Kohen: "Dibre ha-Yamim" (by Bialloblotzky, London, 1834–36).

Judah al-Ḥarizi: Portions of the "Taḥkemoni" (by F. de Sola Mendes, in "Jew. Chron." London, 1873).

Judah ha-Levi: Poems (by M. Breslau, in "Ginze Oxford," London, 1851; Edward G. King, in "Jew. Quart. Rev." vii. 464; Joseph Jacobs, in "Jewish Ideals"; Emma Lazarus, "Songs of a Semite," New York, 1882; Lady Magnus, "Jewish Portraits," London, 1897; A. Lucas, in "Jewish Year Book," London, 1898; Nina Davis, "Songs of an Exile," Philadelphia, 1901).

Levinsohn: "Efes Damim" (by Loewe, London, 1840).

Levita, Elijah: "Massoret ha-Massorah" (by Ch. D. Ginsburg, London, 1887).

Maimonides: "Moreh Nebukim" (by Michael Friedländer, London); parts of the "Mishneh Torah" (by H. Bernard and E. Solowcyczik, *ib.* 1863).

Mapu, Abraham: "Ahabat Ẓiyyon" (by Frank-Jaffe, London, 1887).

Nieto, David: "Maṭṭeh Dan" (by Loewe, London, 1842).

Pethahiah of Regensburg: "Massa'ot" (by Benisch, London, 1856).

Romanelli: "Massa' ba-Arab" (by Schiller-Szinessy, Cambridge, 1887).

Schwarz: "Dibre Yosef," geography of Palestine (by Isaac Leeser, Philadelphia, 1850).

Troki, Abraham: "Ḥizzuḳ Emunah" ("Faith Strengthened," by M. Mocatta, London, 1851).

"Yashar, Sefer ha-" (by Mordecai Noah, New York, 1840).

"Yeẓirah, Sefer" (by Isidor Kalisch, 1877).

Yosippon: Parts (by Gaster, in "Jerahmeel," London, 1899).

French. Abraham ibn Ezra: "Ma'adanne Melek" ("Délices Royales, ou le Jeu des Echecs," by Hollaenderski, Paris, 1864).

Alfonsi, Petrus: "Sefer Ḥanok," tales (by Picques).

Bedersi, Jedaiah ben Abraham: "Beḥinat ha-'Olam" (by Philippe Aquinas and Michel Beer).

Benjamin of Tudela: "Massa'ot" (by Jean Philippe Boratier, Paris, 1734).

Bilia, David ben Yom-Ṭob ibn: "Yesodot ha-Maskil" (by S. Klein, Metz, 1849).

Caro, Joseph: Shulḥan 'Aruk (extracts from the first and second parts under the title "Rituel du Judaïsme," by Pavly and Neviasky, Orleans, 1896–1901).

Eldad ha-Dani (transl. by Carmoly, Brussels, 1834).

Joseph ha-Kohen: "'Emeḳ ha-Baka" ("Vallée des Pleurs," by Julian Sée, Paris, 1881).

Judah al-Ḥarizi: "Taḥkemoni" (by Carmoly, Brussels, 1843–1844; parts were translated by Sylvestre de Sacy).

Maimonides: Treatise on poisons ("Traité de Poisons," by I. M. Rabbinowicz, Paris, 1865); "Moreh Nebukim" ("Guide des Égarés," by S. Munk, Paris, 1856).

Modena, Leon of: Dialogue on the subject of gambling ("Le Joueur Converti," by Carmoly).

Pethahiah of Regensburg: "Sibbub Rab Petaḥyah" (by Carmoly, who translated also, under the title "Itinéraires de la Terre Sainte," accounts, by various writers, of travels in Palestine).

German. Aboab, Isaac: "Menorat ha-Ma'or" (by Jacob Raphael Fürstenthal, Breslau, 1844).

Abraham ibn Daud: "Emunah Ramah" (by S. Weil, Frankfort-on-the-Main, 1882).

Abraham ibn Ezra: "Yesod Mora" (by Michael Creizenach, Mayence, 1840).

Albo, Joseph: "Sefer ha-'Iḳḳarim" (by W. Schlessinger, Frankfort-on-the-Main, 1844).

Aristotle, Pseudo-: "Sefer ha-Tappuaḥ" (by J. Musen, Lemberg, 1873).

Baḥya ben Joseph: "Ḥobot ha-Lebabot" (by Fürstenthal, Breslau, 1835, and by Baumgarten and Stern, Vienna, 1854).

Bedersi, Jedaiah: "Baḳḳashat ha-Memim" (by Benjamin Wolf Prerau, Brünn, 1799); "Beḥinat 'Olam" (by Isaac Auerbach, Hirsh ben Meïr, Joel ben Joseph Faust, Simson Hamburger, Auerbach, J. Levy, Joseph Hirshfeld, Stern [in verse], and Judah Kron).

Benjamin of Tudela: "Massa'ot" (by Mordecai Drucker, Amsterdam, 1691).

Carmoly: "Maimonides und Seine Zeitgenossen" (Frankfort-on-the-Main, 1840).

Caro, Joseph: Shulḥan 'Aruk (by H. Löwe, Vienna, 1896, and by Fr. Lederer, 1897–1901).

Crescas, Ḥasdai: The fifth chapter of the "Or Adonai" (by Philip Bloch, 1879).

Duran, Profiat: "Al Tehi ka-Aboteka" (by Geiger, in "Wiss. Zeit. Jüd. Theol." iv.).

Eldad ha-Dani (Dessau, 1700; Jessnitz, 1723; and in Eisenmenger's "Entdecktes Judenthum," ii. 527).

Ephraim of Bonn: The persecutions by the Crusaders (by S. Baer, Berlin, 1892).

Francis, Immanuel: "Meteḳ Sefatayim" ("Die Hebräische Verskunst," by Martin Hartmann, Berlin, 1894).

Ḥasdai, Abraham: "Ben ha-Melek weha-Nazir" ("Prinz und Dervisch," by Wolf Alois Meisel, Stettin, 1847).

Isaac Israeli: "Sefer ha-Yesodot" (by S. Fried, Frankfort-on-the-Main, 1900).

Joseph ha-Kohen: "'Emeḳ ha-Baka" (by Wiener, Leipsic, 1858).

Judah al-Ḥarizi: "Taḥkemoni" (by Kämpf, Berlin, 1845); "Mussare ha-Filosufim" (by J. Löwenthal).

Judah ha-Levi: "Cuzari" (by D. Cassel and Jelowicz, Leipsic, 1841); poems (by Zunz, Geiger, Kämpf, Sachs, Steinschneider, Heller, and Sulzbach).

Kalonymus ben Kalonymus: "Eben Boḥan" (by Moses Eisenstadt, or, according to Zedner, by Katzenellenbogen, Sulzbach, 1705; in condensed prose by W. Meisel, Budapest, 1878).

Lebensohn, Micah Joseph: "Shire Bat Ẓiyyon" ("Gesänge Zion's," by Joshua Steinberg, Wilna, 1869).

Levinsohn: "Efes Damim" (by Albert Katz, Berlin, 1884).

Levita, Elijah: "Massoret ha-Massorah" (by Mayer Gottlieb, 1772).

Maimonides: "Moreh Nebukim" (the first part by Fürstenthal, Krotoschin, 1839; the second, by M. Stein, Vienna, 1864; the third, by Scheyer, Frankfort-on-the-Main, 1838); "Millat ha-Higgayon" (by M. S. Neumann, Vienna, 1822; by Heilberg, Breslau, 1828); Introduction to the Mishnah ("Das Jüdische Traditionswesen" (by Fürstenthal, Breslau, 1844); treatise on poisons ("Gifte und Ihre Heilungen," by M. Steinschneider, Berlin, 1873); essays on hygiene (by D. Winternitz, 1843).

Mapu, Abraham: "Ahabat Ẓiyyon" ("Tamar," by S. Mandelkern, Leipsic, 1885).

Mendelssohn, Moses: "Sefer ha-Nefesh" (by David Friedländer, Berlin, 1887).

Modena, Leon of: Dialogue on gambling (by Friedrich Albert Christiani, 1638); the abridged commentary on the Passover Haggadah of Isaac Abravanel, entitled "Ẓeli Esh" (Fürth, 1804).

Rashi: Commentary on the Pentateuch (Prague, 1833-38).

Rosenfeld: "Tenubot Sadeh," poems and epigrams (by Fürstenthal, Breslau, 1842).

Saadia: "Emunot we-De'ot" (by Julius Fürst, Leipsic, 1845; the introduction and first chapter, by Philip Bloch, 1879).

Schweitzer: "Mazkeret Ahabah" (metrically translated by Fürstenthal, Breslau, 1841).

Verga, Solomon: "Shebeṭ Yehudah" (by Wiener, Hanover, 1856).

Wiener: "Gezerat Ostraik" (by Jehiel Michael Moroweyczyk, Cracow, 1852).

Italian. Baḥya: "Tokaḥah" (by Deborah Ascarelli, Venice, 1601).

Bedersi, Jedaiah: "Beḥinat 'Olam" (in "Antologia Israelitica," 1880).

Judah al-Ḥarizi: "Mishle Ḥakamim" ("Motti di Diversi Saggi," by Simon Massarani).

Judah ha-Levi: "Canzoniere Sacra di Giuda Levita" (by S. de Benedetti, Pisa, 1871).

Luzzatto, S. D.: "Derek Ereẓ" ("Il Falso Progresso," by Pontremoli, Padua, 1879).

Maimonides: "Moreh Nebukim" (by Jedidiah Moses of Recanati, 1580, and by D. J. Maroni, 1870).

Mizraḥi, Elijah: Part of the "Sefer ha-Mispar" (by M. Steinschneider, Rome, 1866).

Modèna, Leon of: The abridged commentary of Abravanel on the Passover Haggadah, entitled "Ẓeli Esh."

Moses: "Vita e Morte de Mose" (by Benedetti de Salvatore).

Rieti, Moses: The second part of the "Miḳdash Me'aṭ," entitled "Me'on ha-Sho'alim" (by Deborah Ascarelli, Venice, 1601).

Solomon: "Clavis Solomonis" (by Abraham Colorni).

Russian. Abramovich: "Ha-Abot weha-Banim" ("Otzy i Dyeti," by Leo Bienstok, St. Petersburg, 1867).

Brandstädter: "Mordekai Kizwiz" (in "Yevreiskaya Biblioteka").

Eichhorn: "Ha-Ḳerab" (by Osip Rabbinovich, 1847).

Joshua ben David of Samoscz: "Ẓuḳ ha-'Ittim" ("Byedstoiya Vremion," by Moses Berlin).

Nathan Nata of Hanover: "Yewen Meẓulah" (by S. Mandelkern, St. Petersburg, 1878).

Rosensohn: "Shelom Aḥim," on the catholicity of the Mosaic religion (transl. Wilna, 1876).

Spanish. Abner of Burgos: "Moreh Ẓedeḳ" ("El Mostador de Justicia"); "Milḥamot Adonai" ("Las Batallas de Dios").

Alguadez, Meïr: Prescriptions for various diseases (by Joseph ha-Kohen).

Baḥya ben Joseph ibn Paḳuda: "Ḥobot ha-Lebabot" (by Joseph Pardo, Amsterdam, 1610).

Elijah de Vidas: Several sections of the "Reshit Ḥokmah" (by David Cohen Lara, under the title "Tratado del Temur Divino," Amsterdam, 1633).

"Ḥinnuḳ, Sefer ha-": Anonymous work on the precepts, of the thirteenth century.

Jonah Gerondi: Ethical work (by Joseph Shalom Gallego, or Galigo, under the title "Sendroe [Sendero] de Vidas," Amsterdam, 1640).

Judah ha-Levi: "Cuzari" (by Jacob Abendana).

Maimonides: ("Tratado de los Articulos de la Ley Divina," by David Cohen de Lara, Amsterdam, 1652); commentary on the Mishnah (by Jacob Abendana).

For other translations from and into the Hebrew see Bible Translations; Maḥzor; Talmud.

J. I. Br.

TRANSLITERATION.—Into Hebrew: The Greek and Latin words which entered into the language of the Hebrews are transcribed in the Talmud, Midrash, and Targum according to purely phonetic principles, their etymologies being entirely disregarded. Besides the lack in Hebrew of that rich system of vocalization which characterizes the Latin, and especially the Greek, the alphabets of these languages include characters which are not represented in the Hebrew, and therefore their transliteration is attended with many complications; sometimes it is even very difficult to detect the root of the transcribed word. The Hebrew consonants represent the following Greek and Latin equivalents: ב = β or "b," π or "p," φ or "f"; ג = γ or "g" and sometimes also κ; ד = δ or "d"; ו = the Latin "v" and sometimes also β or "b"; ז = ζ or "z" and sometimes also σ; ח = χ; ט = θ and also τ or "t"; י = the Latin "j"; כ = χ and sometimes also κ; ל = λ or "l"; מ = μ or "m"; נ = ν or "n"; ע has no equivalent either in Greek or in Latin; פ = π or "p" and φ or "f"; צ = σ; ק = κ or "k" and the Latin "q"; ר = ρ or "r"; ש = σ; ת = θ. The Greek double letters ξ and ψ are respectively represented by קס or כס, and by פס. The nasal sounds γγ, γκ, γχ are reproduced in a manner analogous to the Latin, Syriac, Arabic, etc., as, for instance, אנגלא for *ἄγγελος*, אנגקי for *ἀνάγκη*, קונכי for *κόγχη*. The Latin and Greek vowels are transcribed as follows: α by א, sometimes by ע or ה: ε or "e" by א, sometimes by ע or י; ι by א, אי, or י; ο by א, או, or ו; η by אי or י, less frequently by ה; ω by או or ו; αι (Latin "æ") by אי or י; ει by י; οι by א or י; αυ by או, אי, or אב; ευ by או, אוי, or אי; ου (Latin "u") by או or ו. The hiatus is always neglected, while both the spiritus asper and the spiritus lenis are scrupulously represented, the former by ה and the latter by א. The aspirated ῥ is indicated by רה or הר; even internal aspiration occurs, as, for instance, סנהדרין for *συνέδριον*. However, the vowels are not always kept intact, but are often interchanged contrary to the rule. Syllables are frequently elided by apocope, apheresis, and especially syncope.

With the adoption of the Arabic language by the Jews residing in Moslem countries, the Jewish writers treating of subjects pertaining to religion and Judaism were forced in some degree to conform to the culture of the people for whom they wrote, the great mass of whom, though speaking Arabic as their mother tongue, were not able to read it. Jewish authors, or at least those among them whose works were destined for the common people, were therefore compelled to transliterate their Arabic into Hebrew characters. The system of transliteration generally adopted by them was as follows: For each Arabic letter the corresponding Hebrew was given. The letters, ث خ ذ ض ظ غ, which have no equivalents in Hebrew, were represented by ת̇כ̇ד̇צ̇ט̇ג̇, with dots above or below the letters except in the case of the ג, which, when dotted, corresponds to ج and not to غ. In some writings both ض and ظ are rendered by a dotted צ̇. In vocalized texts the vowel-points are reproduced either by the same signs as are used in the Arabic or by the vowel letters אוי; the "hamza," the "waslah," and the "tashdid" are always rendered by the same signs as in the Arabic. Indeed, the transliteration into Hebrew from the Arabic is the most simple and the easiest, since, with the exception of the six letters mentioned, which are always transcribed in the same way, the pronunciation of each Arabic letter finds an exact equivalent in Hebrew. Far more complicated is the system of transliteration from the Persian, which includes four additional characters that have no equivalents either in Arabic or in Hebrew; even the purely Arabic characters have not always the same sound in both languages, and their transcription in Hebrew is variable. Thus in the older Judæo-Persian literary productions the system of transliteration is different from that used in more recent writings in Bokhara. In the former ב is frequently written with dagesh when it designates "b" and without dagesh when it stands for "w"; ג with or without dagesh corresponds to the Persian گ; ג̄ corresponds to غ ج چ; and also to ژ; ד represents the ذ, and sometimes also the ڊ; כ with or without dagesh represents ك and خ; ס = ص, פ with rafeh = ف, without it پ. In the vocalized texts the long "ā" is indicated by the vowel letter א or by ḳameẓ; short "ă" or "ĕ" is designated either by shewa or by א; short "ŭ" is designated by the vowel letter ו; short "ĭ" by the vowel letter י. In the modern writings four forms of ג are used: (1) גּ for ج; (2) ג for the غ; (3) ג̈ for ژ; and (4) ג̄ for چ.

The use of Hebrew characters for foreign words or sentences was introduced into France in the tenth century. Some Biblical or Talmudical commentators, in order to convey to the reader the exact meaning of a word or sentence not easily explained in Hebrew, accompanied the Hebrew word or sentence with an equivalent in the vernacular. With the exception of the following letters, the method of transliteration adopted by these commentators is the same as that used in the Talmud for the Latin consonants: "c" before "a," "o," "u," or in combination with "h" is represented by ק, and before "e," "i," "y," or when it is provided with a cedilla ("ç"), by צ; "g" before "a," "o," "u" is reproduced by ג, and before "e," "i," "y," by ז; double "s" is represented by צ; "j" by a single or double י, and sometimes also by ג, as, for instance, גיטיר (= "jeter"); "gn" is rendered by a single or double י, and also by נ; "n" is often eliminated in the transliteration, as, for instance, אפנט (= "enfant"), and מ is often rendered by נ, as, for instance, נון (= "nom"); "h" is rendered by א or י; "x" and "z" by ש or צ; "v" is rendered by ב or ו. The system of transliteration of the simple vowels "a," "e," "i," "o," "u," "y" is the same as that used in the Talmud for the Latin, their pronunciation being identical in both languages: "a" = א; "o" and "u" = ו; and "e," "i," "y" = י. The accentuated "e" is sometimes rendered by a double י, and the mute "e" at the end of a word by א or ה or by both. As to the diphthongs, "ai," "ei," "ie" are represented by a single or double י, with or without א; *e.g.*, אליינא (= "haleine"), ביין (= "bien"); "oi," "aui," "aeu," and "eui" are reproduced by a single or double י preceded by ו, as, for instance, פויילא (= "feuille"), אוייברא (= "œuvre"); "au" and "eau" are rendered by א or ו or by both; "eu" and "ou" almost always by ו.

With the single exception of "a," which is sometimes rendered by ה instead of א, the simple vowels are transliterated in Judæo-Spanish, or Ladino, in the same way as in French. The Spanish diphthongs, being very limited in number, and each of the vowels being pronounced, present no difficulty; thus "ei," "ey," and "ie" are always rendered by a double י, while "io," "ya," and "yo" are reproduced by either a double or a single י; "ia" is reproduced by a single י, followed by א or ה or both. Great confusion reigns in the transliteration of the consonants, many of which are indifferently reproduced by various Hebrew letters, while the same Hebrew letter may represent many Spanish. Thus the soft "c" is indifferently represented by ז, ס, צ, and ש; "f" and "g" are rendered by ח, *e.g.*, חואי (= "fue"), חינירא (= "genero"); "h" by נ (especially before "æ"), פ, and א, and when occurring at the beginning or in the middle of a word it is frequently omitted; "j" by ג, ח, ז, ש, and sometimes also by י; "ll" and "ñ" by double י; "m" and "n" often interchange in the transliteration, as, for instance, קאנפי (= "campe"), מוס (= "nos"). Metathesis of "d" before "r" takes place in the transliteration, as, for instance, וידרי (= "verde"), אקודראר (= "accordar"); or of "r" before "e," as, for instance, טאדרה (= "tarde"); "q" preceding "i" is rendered by קי; "s" = ס, ש, and ז; "x" = ש; "z" = ס or ז. The other consonants are represented by the same Hebrew letters as their equivalents in Latin or French. The following first two verses of the Bible in Ladino and in Spanish may serve as an illustration of the method of transliteration: אין פרינסיפיו קריאו איל דיו לוש סיילוש אי לה טיירה אי לה טיירה אירה ואגואה אי וואזיאה אי אישקורידד שוברי פאסיש די אבישמו אי וינטו דיאיל דיו אישמובייגשי שוברא פאסיש די לאש אגואש = "En principio crio el Dios los cielos y la tierra. Y la tierra era vagua y vacia y escuridad sobre façes del abysmo, y viento del Dio esmoniense sobre façes de las aguas."

The transliteration of Italian into Hebrew differed but little from that of French and Spanish. The soft "c" was represented by ז, ס, צ, while the hard "c," "ch," and "cch" were rendered by ק; "g" before "e," "i," "l," or "n," and "gg" were rendered by a single or double י, as, for instance, יודיצי (= "giudice"), יורנו (= "giorno"), פרמייו (= "formaggio"); "gu" and "qu" were generally reproduced by גו; "s," "ss," and "sc" were rendered by ז, ס, and ש; when the "c" following the "s" was a hard one they were rendered by סק or שק. In some cases the "t" was rendered by צ, as, for instance, סטולטיציאה (= "stoltitia"); "z" and "zz" were reproduced by ז, צ, and ש, and in some cases also by ט. The vowels were rendered in the same way as in French, with the exception of the "o," which in Italian was represented by א or או instead of ו. The diphthong "ia" was rendered by a single or double י followed by אה or by א alone; "ie" was represented by a single or double י; "au" and "ao" by או; "ae" by a double י; the vowels which are not pronounced were left out altogether, as, for instance, צוטיל (= "ciottolo"). As an illustration of the Italian method of transliteration the following verse of the "Me'on ha-Sho'alim" of Moses Rieti may serve, which was translated into Italian by Deborah Ascarelli, and incorporated in Hebrew characters in the Roman Maḥzor: או טימפיו דאראטורי ויליא אינפיניטה די קי צירקא פייטא גראצייא אי פאוורי טוא פונטי בינידיטו ספאנדו ויטה = "O tempio dóratori, voglia infinita, di chi cerco pieta grazia e favore, tuo fonte benedetto spanda vita."

Judging from the Anglo-Jewish contracts of the thirteenth century published by the Anglo-Jewish Historical Exhibition, the method of transliteration into Hebrew from the English differed from the French or Italian only in those consonants and vowels which have a special pronunciation. The soft "c" was represented by צ or ש; "ch" by ק or צ; "j" and the soft "g" by a single or double י; "s" or "ss" by ש, צ, or ז; "th" by ז, זט, or טה, followed by ש or צ; "v" by וו or בו. כ sometimes stands for ק; ת for ט; ב (rafeh) for ו; and נ for מ. The simple vowels were transcribed in the same way as the French; as to the diphthongs, "ai" and "ay" were rendered by double י; "au" and "ou" by ו, וא, or א; "ea" and "ee" by a single י; "ei" by a single or double ו; "ia," "ie," and "ey" by a double or single י followed by א or ה or both; "oi" and "oy" by וי; "ew" by יו or by ו. In the transliteration of the numerous English words which entered the Judæo-German in the English-speaking countries, the pronunciation was faithfully preserved. The hard "c," "ch," and "q" are represented by ק, while the soft "c" is rendered by צ; the "f" and "p" are both rendered by פ, with the only difference that for the former the פ is rafeh, while for the latter it is with a dagesh; the soft "g" is represented by דש; the "j" by דזש; "s" or "ss" by ס; "t" by ט, and before "ion" by ש; "th" by דה; "v" by ב (rafeh) or ו; "w" by וו or או. According to the English pronunciation, the "a" is represented by א or יי; the "e" by ע or י; the "i" by י or איי; the "o" by ו; the "u" by ו or א. In the transliteration of the diphthongs the vowels that are not pronounced are left out altogether.

Up to the beginning of the nineteenth century the transliteration of the German words which form the bulk of the jargon called Judæo-German differed little from that current in the other Western dialects; the only deviation in the transcription of the vowels was the use of the א to represent both "a" and "o," whereas the latter was rendered in Spanish and French by ו. At the beginning of the nineteenth century the transliteration of the German underwent many changes. א became silent at the end of words after vowels, and at the beginning before ו and י. "E" was represented by ע instead of by י; "aj" and "ej" by יי; "ö" and "ü" by וי; "ä," "au," "eu" by ייו; "ei" by יי or איי; "au" by וי or אוי. Of the consonants the following may be mentioned: "ch" was represented by כ (rafeh), but when followed by "s," by ק; "sch" and "ss" by ש; soft "s" by ז; "s" before "t" or "p" by ש; "f" and "v" by ב (rafeh) and ו. In modern times "v" is rendered by ו and not by ב, and "w" by וו, so that only one letter occurs with rafeh, namely, פ for "f." In printed books פּ stands generally for "p," while פֿ is "f."

——**From Hebrew:** From the time of Origen (*c.* 185–254), who in his Hexapla transliterated the text of the Pentateuch into Greek characters, to the middle of the nineteenth century no attempt was made to elaborate a scientific system of transcription of Hebrew in foreign characters, and every one followed his own caprice. In 1854 Bargès published the Book of Ruth with a French transliteration of the text. In his system, which was followed by nearly all the French Orientalists, the letters בגדכפת, according as they have or have not dagesh, are represented by their equivalent French letters with or without "h." Thus בּ = "b," ב = "bh," גּ = "g," ג = "gh," דּ = "d," ד = "dh," כּ = "k," כ = "kh," פּ = "p," פ = "ph." Both ה and ח are represented by "h," the former pronounced with a slight aspiration, and the latter with a hard one. ע is represented by a capital "H"; צ by "ts" or "s"; ק by "q"; ש by "sch." The following may serve as an illustration of Bargès' method of transliterating both the Hebrew consonants and vowels: "Va-iehi b-îmé schephot hasch-schôphetim va-iehi ra Habh bâ'ârets. Va-ielekh isch mib-bet Lehem ie-houdhah la-ghour bi-sedhé Mo'ab hou ve-ischt-o ou-schene bhanâ-v," which reads in Hebrew: וַיְהִי בִּימֵי שְׁפוֹט הַשֹּׁפְטִים וַיְהִי רָעָב בָּאָרֶץ וַיֵּלֶךְ אִישׁ מִבֵּית לֶחֶם יְהוּדָה לָגוּר בִּשְׂדֵי מוֹאָב הוּא וְאִשְׁתּוֹ וּשְׁנֵי בָנָיו.

A more rational system of transliteration was suggested by the Royal Asiatic Society for Great Britain and Ireland, which transcribes the Hebrew alphabet as follows: א = "'"; ב = "b̬"; בּ = "b"; ג = "g̬"; גּ = "g"; ד = "d̬"; דּ = "d"; ה = "h"; הּ = "h̬" or "hh"; ו = "v"; ז = "z"; ח = "ḥ"; ט = "ṭ"; י = "y"; כ = "k̬"; כּ = "k"; ל = "l"; מ = "m"; נ = "n"; ס = "s"; ע = "'"; פּ = "p"; פ = "f"; צ = "ṣ"; ק = "q"; ר = "r"; שׁ = "s̬"; שׂ = "ṣ"; ת = "t̬"; תּ = "t." The long vowels are represented by "ā," "ē," "ī," "ō," "ū"; the short by "a," "e," "i," "o," "u"; the three vowels with the ḥaṭaf by "a̮," "e̮," "o̮"; the dagesh forte by doubling the letter. As an illustration of the latest system of transliteration adopted by German scholars the following passage of Jeremiah published by Wilhelm Erbt (Göttingen, 1902) may serve: "Pittitani, Jahvé, wa'eppat ḫa-zaqtani wattukal, hajiti lisḫóq kol-hajjom kulló lo'eg-li ki-middé 'adabbèr 'ez'aq: ḫamàs wašod 'eqrá'. Ki-hajâ debar-jahwe li leḫerpa ul-qelés Kol-hajjom. We 'amarti: lo-'ezkerennu, we lo 'adabber 'od bišmó, we-haja belibbi ke'eš bo'eret 'aṣur be'aṣmotái, wenil'éti kalkél, welo 'ukal." = פִּתִּיתַנִי יְהוָֹה וָאֶפָּת חֲזַקְתַּנִי וַתּוּכָל הָיִיתִי לִשְׂחוֹק כָּל־הַיּוֹם כֻּלֹּה לֹעֵג לִי׃ כִּי־מִדֵּי אֲדַבֵּר אֶזְעָק חָמָס וָשֹׁד אֶקְרָא כִּי־הָיָה דְבַר־יְהוָֹה לִי לְחֶרְפָּה וּלְקֶלֶס כָּל־הַיּוֹם׃ וְאָמַרְתִּי לֹא־אֶזְכְּרֶנּוּ וְלֹא־אֲדַבֵּר עוֹד בִּשְׁמוֹ וְהָיָה בְלִבִּי כְּאֵשׁ בֹּעֶרֶת עָצֻר בְּעַצְמֹתָי וְנִלְאֵיתִי כַּלְכֵל וְלֹא אוּכָל.

In regard to the system of transliteration followed in THE JEWISH ENCYCLOPEDIA, see p. vii. of this volume.

S. I. BR.

TRANSMIGRATION OF SOULS (termed also **Metempsychosis**): The passing of souls into successive bodily forms, either human or animal. According to Pythagoras, who probably learned the doctrine in Egypt, the rational mind (φρήν), after having been freed from the chains of the body, assumes an ethereal vehicle, and passes into the region of the dead, where it remains till it is sent back to this world to inhabit some other body, human or animal. After undergoing successive purgations, and when it is sufficiently purified, it is received among the gods, and returns to the eternal source from which it first proceeded. This doctrine was foreign to Judaism until about the eighth century,

Doctrine Refuted by Saadia.

when, under the influence of the Mohammedan mystics, it was adopted by the Karaites and other Jewish dissenters. It is first mentioned in Jewish literature by Saadia, who protested against this belief, which at his time was shared by the Yudghanites, or whomsoever he contemptuously designated as "so-called Jews" (ממיש נקראים יהודים ; see Schmiedl, "Studien," p. 166; *idem*, in "Monatsschrift," x. 177; Rapoport, in "Bikkure ha-'Ittim," ix. 23; *idem*, introduction to Abraham bar Ḥiyya's "Hegyon ha-Nefesh," p. lii.; Jellinek, in "Orient, Lit." 1851, p. 410; Fürst, "Gesch. des Karäert." i. 81). According to Saadia, the reasons given by the adherents of metempsychosis for their belief are partly intellectual and partly Scriptural. The former are as follows: (1) Observation shows that many men possess attributes of animals, as, for instance, the gentleness of a lamb, the rage of a wild beast, the gluttony of a dog, the lightness of a bird, etc. These peculiarities, they assert, prove that their possessors have in part the souls of the respective animals. (2) It would be contrary to the justice of God to inflict pain upon children in punishment for sins committed by their souls in a previous state. The Scriptural reasons are conclusions drawn from certain Biblical verses, such as: "Neither with you only do I make this covenant and this oath; but with him that standeth here with us this day before the Lord our God, and also with him that is not here with us this day" (Deut. xxix. 14, 15); "Blessed be the man that walketh not in the counsel of the ungodly," etc. (Ps. i. 1). Both sets of reasons are refuted by Saadia, who says that he would not consider it worth while to show the foolishness and the low-mindedness of the believers in metempsychosis, were he not afraid lest they might exercise a pernicious influence upon others ("Emunot we-De'ot," vi.).

Influence of Cabala.

The doctrine counted so few adherents among the Jews that, with the exception of Abraham ibn Daud ("Emunah Ramah," i. 7), no Jewish philosopher until Ḥasdai Crescas even deemed it necessary to refute it. Only with the spread of the Cabala did it begin to take root in Judaism, and then it gained believers even among men who were little inclined toward mysticism. Thus one sees a man like Judah ben Asher (Asheri) discussing the doctrine in a letter to his father, and endeavoring to place it upon a philosophical basis ("Ṭa'am Zeḳenim," vii.). The cabalists eagerly adopted the doctrine on account of the vast field it offered to mystic speculations. Moreover, it was almost a necessary corollary of their psychological system. The absolute condition of the soul is, according to them, its return, after developing all those perfections the germs of which are eternally implanted in it, to the Infinite Source from which it emanated. Another term of life must therefore be vouchsafed to those souls which have not fulfilled their destiny here below and have not been sufficiently purified for the state of reunion with the Primordial Cause. Hence if the soul, on its first assumption of a human body and sojourn on earth, fails to acquire that experience for which it descended from heaven, and becomes contaminated by that which is polluting, it must reinhabit a body till it is able to ascend in a purified state through repeated trials. This is the theory of the Zohar, which says: "All souls are subject to transmigration; and men do not know the ways of the Holy One, blessed be He! They do not know that they are brought before the tribunal both before they enter into this world and after they leave it; they are ignorant of the many transmigrations and secret probations which they have to undergo, and of the number of souls and spirits which enter into this world and which do not return to the palace of the Heavenly King. Men do not know how the souls revolve like a stone which is thrown from a sling. But the time is at hand when these mysteries will be disclosed" (Zohar, ii. 99b). Like Origen and other Church Fathers, the cabalists used as their main argument in favor of the doctrine of metempsychosis the justice of God. But for the belief in metempsychosis, they maintained, the question why God often permits the wicked to lead a happy life while many righteous are miserable, would be unanswerable. Then, too, the infliction of pain upon children would be an act of cruelty unless it is imposed in punishment for sin committed by the soul in a previous state.

Opposition to the View.

Although raised by the Cabala to the rank of a dogma, the doctrine of metempsychosis still found great opposition among the leaders of Judaism in the fourteenth and fifteenth centuries. In his "Iggeret Hitnaẓẓelut," addressed to Solomon ben Adret in defense of philosophy, Jedaiah Bedersi praises the philosophers for having opposed the belief in metempsychosis. Ḥasdai Crescas ("Or Adonai," iv. 7), and after him his pupil Joseph Albo ("'Iḳḳarim," iv. 29), attacked this belief on philosophical grounds, considering it to be a heathen superstition, opposed to the spirit of Judaism. The opposition, however, gradually ceased; and the belief began to be shared even by men who were imbued with Aristotelian philosophy. Thus Isaac Abravanel sees in the commandment of the levirate a proof of the doctrine of metempsychosis, for which he gives the following reasons: (1) God in His mercy willed that another trial should be given to the soul which, having yielded to the sanguine temperament of the body, had committed a capital sin, such as murder, adultery, etc.; (2) it is only just that when a man dies young a chance should be given to his soul to execute in another body the good deeds which it had not time to perform in the first body; (3) the soul of the wicked sometimes passes into another body in order to receive its deserved punishment here below instead of in the other world, where it would be much more severe (commentary on Deut. xxv. 5). These arguments were wittily refuted by the skeptical Leon of Modena in his pamphlet against metempsychosis, entitled "Ben David." He says: "It is not God, but the planets, that determine the temperament of the body; why then subject the soul to the risk of entering into a body with a temperament as bad as, if not worse than, that of the one it has left? Would it not be more in keeping with God's mercy to take into consideration the weakness of the body and to pardon the soul at once? To send the soul of a man who died young into another body would be to make it run the risk of losing the advantages it had acquired in its former body. Why send the soul of the wicked to another body in order to punish it here below? Was there anything to prevent God from punishing it while it was in its first body?"

The School of Luria.

Upon the doctrine of metempsychosis was based the psychological system of the practical Cabala, inaugurated by the cabalists of the school of Luria. According to them, all the souls destined for the human race were created together with the various organs of Adam. As there are superior and inferior organs, so there are superior and inferior souls, according to the organs with which they are respectively coupled. Thus there are souls of the brain, of the eye, of the head, etc. Each human soul is a spark ("niẓaẓ") from Adam. The first sin of the first man caused confusion among the various classes of souls; so that even the purest soul received an admixture of evil. This state of confusion, which gives a continual impulse toward evil, will cease with the arrival of the Messiah, who will establish the moral system of the world on a new basis. Until that time man's soul, because of its deficiencies, can not return to its source, and has to wander not only through the bodies of men, but even through inanimate things. If a man's good deeds outweigh his evil ones, his soul passes into a human body; otherwise, into that of an animal. Incest causes the soul to pass into the body of an unclean animal; adultery, into that of an ass; pride in a leader of a community, into that of a bee; forgery of amulets, into that of a cat; cruelty toward the poor, into that of a crow; denunciation, into that of a barking cur; causing a Jew to eat unclean flesh, into a leaf of a tree which endures great suffering when shaken by the wind; neglect to wash the hands before meals, into a river.

The main difference between the passing of the soul into a human body and its transmigration into an animal or an inanimate object consists in the fact that in the former case the soul ignores its transmigration, while in the latter it is fully aware of its degradation, and suffers cruelly therefrom. With regard to the transmigration of the soul into a crow Moses Galante, rabbi at Safed, relates that once he accompanied Isaac Luria to 'Ain Zaitun to pray at the tomb of Judah ben Ilai. On approaching the place he noticed on an olive-tree which grew near the tomb a crow which croaked incessantly. "Were you acquainted," asked Luria, "with Shabbethai, the tax-farmer of Safed?" "I knew him," answered Galante: "he was a very bad man and displayed great cruelty toward the poor, who were not able to pay the taxes." "This crow," said Luria, "contains his soul" ("Shibḥe ha-Ari," p. 29).

Impregnation of Souls.

A quite new development of the doctrine of metempsychosis was the theory of the impregnation of souls, propounded by the cabalists of the Luria school. According to this theory, a purified soul that has neglected some religious duties on earth must return to the earthly life and unite with the soul of a living man, in order to make good such neglect. Further, the soul of a man freed from sin appears again on earth to support a weak soul unequal to its task. Thus, for instance, the soul of Samuel was supported by those of Moses and Aaron; the soul of Phinehas, by those of Nadab and Abihu. However, this union, which may extend to three souls at one time, can take place only between souls of a homogeneous character, that is, between those which are sparks from the same Adamite organs. As the impregnated soul comes either to make good a neglect or to support a weak soul, it enters into the body only after the man has completed his thirteenth year, when he reaches the age of religious duty and responsibility.

The dispersion of Israel has for its purpose the salvation of man; and the purified souls of Israelites unite with the souls of other races in order to free them from demoniacal influences. Each man, according to the practical Cabala, bears on his forehead a mark by which one may recognize the nature of the soul: to which degree and class it belongs; the relation existing between it and the superior world; the transmigrations it has already accomplished; the means by which it may contribute to the establishment of the new moral system of the world; how it may be freed from demoniacal influences; and to which soul it should be united in order to become purified. He who wishes to ascertain to which of the four worlds his soul belongs must close his eyes and fix his thought on the four letters of the Ineffable Name. If the color he then beholds is a very bright, sparkling white, his soul has proceeded from the world of emanation (עולם האצילות); if an ordinary white, from that of creative ideas (עולם הבריאה); if red, from that of creative formation (עולם היצירה); and if green, from that of creative matter (עולם העשיה).

Special Instances.

The cabalists of the Luria school pretended to know the origins and transmigrations of all the souls of the human race since Adam; and in their works accounts are given concerning Biblical personages and the great teachers of Judaism. Thus, for instance, the soul of Aaron is said to have been derived from the good part of that of Cain. It entered into the body of the high priest Eli, who, in expiation of the sin committed by Aaron in making the golden calf—a sin punishable with lapidation—broke his neck in falling from his seat. From Eli it transmigrated into the body of Ezra; and it then became purified. The name "Adam" contains the initials of David and Messiah, into whose bodies the soul of the first man successively entered. The name "Laban" contains the initials of Balaam and Nabal, who successively received Laban's soul. Jacob's soul passed into Mordecai; and because the former had sinned in prostrating himself before Esau, Mordecai obstinately refused to prostrate himself before Haman, even at the risk of endangering the safety of the Persian Jews. Interesting is the account given in the "Sefer ha-Gilgulim" of the souls of some contemporaries of Isaac Luria. The soul of Isaac de Lattes is said there to have been a spark from that of a pious man of the olden times (צדיק קדמון); that of Joseph Vital, one from the soul of Ezra; that of Moses Minz, one from the soul of Seth, the son of Adam. To the soul of Moses Alshech was united that of the amora Samuel ben Naḥmani; hence the former's talent for preaching. Both Moses Cordovero and Elijah de Vidas partook of the soul of Zechariah ben Jehoiada; hence the great friendship that existed between them. Because of some sin his soul had committed in a previous state Moses Vital was unable to acquire a perfect knowledge of the Cabala. The soul of Joseph Delpino entered into a black dog. Ḥayyim Vital possessed, according to Isaac Luria, a soul which had not been soiled by Adam's sin. Luria himself possessed the soul of Moses, which had previously been in the bodies of Simeon ben Yoḥai and Hamnuna Saba.

Generally the souls of men transmigrate into the bodies of men, and those of women into the bodies of women; but there are exceptions. The soul of Judah, the son of Jacob, was in part that of a woman; while Tamar had the soul of a man. Tamar's soul passed into Ruth; and therefore the latter could not bear children until God had imparted to her sparks from a female soul. The transmigration of a man's soul into the body of a woman is considered by some cabalists to be a punishment for the commission of heinous sins, as when a man refuses to give alms or to communicate his wisdom to others.

Gilgul.

The theory of impregnation gave birth to the superstitious belief in "dibbuḳ" or "gilgul," which prevailed, and still prevails, among the Oriental Jews and those of eastern Europe. This belief assumes that there are souls which are condemned to wander for a time in this world, where they are tormented by evil spirits which watch and accompany them everywhere. To escape their tormentors such souls sometimes take refuge in the bodies of living pious men and women, over whom the evil spirits have no power. The person to whom such a soul clings endures great suffering and loses his own individuality; he acts as though he were quite another man, and loses all moral sense. He can be cured only by a miracle-working rabbi ("ba'al shem") who is able to cast out the soul from his body by exorcisms and amulets. The usual exorcism in such cases consisted in the rabbi's reciting, in the presence of ten men (see Minyan), the 91st Psalm, and adjuring the soul in the name of God to leave the body of the afflicted one. In case of refusal on the part of the soul to yield to this simple injunction, the ban and the blowing of the shofar are resorted to. In order that it may cause the least possible amount of damage to the body, the soul is always directed to pass out through the small toe.

The belief that migrant souls seek refuge in the bodies of living persons became more and more deeply rooted; and regular methods for expelling them are given in the cabalistic works of the seventeenth century. This superstition is still widely spread, especially in Ḥasidic circles. Curtiss relates ("Primitive Semitic Religions of To-Day," p. 152) that a few years ago a woman was exorcised in Palestine, and that the spirit when questioned replied that it was the soul of a Jew who had been murdered in Nablus twelve years before. The migrant soul was generally believed to belong to a wicked or murdered person; but it may happen that that of a righteous man is condemned, for a slight offense committed by it, to wander for a while in this world. Such a soul is, however, free from demoniacal influences, and it enters the body of a living person not to avoid evil spirits (who have no power over it), but to atone for the fault it has committed. As soon as this has been accomplished it leaves the body of its own free will. Ḥayyim Vital records that while sojourning at Damascus in 1699 he was called upon to entertain himself with the soul of a pious man which had entered the body of the daughter of Raphael Anaw. The soul informed him that it was exiled from heaven for having slighted the virtue of repentance. For a time it dwelt in a fish, but this fish was caught and sold to Raphael for the Sabbath meal; the soul then entered the body of the daughter of the house. In proclaiming before Vital the great importance of repentance it became free to return to its heavenly abode ("Shibḥe Ḥayyim Wiṭal," ed. Lemberg, p. 11). Narratives of this sort abound in the cabalistic writings of the seventeenth and eighteenth centuries, and many of them are reproduced in the "Nishmat Ḥayyim" of Manasseh ben Israel, who showed himself a firm believer in all kinds of gilgulim and dibbuḳim. He even went so far as to endeavor to demonstrate that references to them are to be found in the Bible. It is noteworthy that most of the cases of exorcism occurred at Safed or in its neighborhood; that is, in localities where mysticism was flourishing. A curious case is cited by Moses Prager in his "Zera' Ḳodesh": it is interesting from the fact that David Oppenheim, the collector of Hebrew books and manuscripts, who was the rabbi of Nikolsburg, Moravia, was one of the signatories of the narrative. See Dibbuḳim.

TRANSVAAL. See South Africa.

TRANSYLVANIA (Hungarian, **Erdély**; German, **Siebenbürgen**): A district which has formed a part of Hungary since 1867. According to one tradition, the first Jewish settlers of this region were subjects of the Persian king Xerxes, who fled thither after the battle of Salamis; while another tradition states that they were colonized there by the Dacian king Decebulus. It is certain, at all events, that Jews lived in Transylvania soon after the country had become a part of Dacia during the Roman period. The earliest mention of them in historical sources, however, is in 1578, when it was decreed in Art. xxii. of the regulations passed by the national assembly at Kolozsvar that "Greeks and likewise Jews might not engage in trade, except in places especially assigned them for residence." This "locus depositionis" in which Jews were allowed to live was Gyulafehérvár (Karlsburg, formerly called Weissenburg, Alba Julia, and Alba Carolina), a frontier town, where the Turkish trade passed through Jewish hands. In 1623 the grand duke Gabriel Bethlen granted the Jews the privilege of settling in fortified cities, of carrying on commerce throughout the country, and of unrestricted observance of religion. This privilege, although made a law by the national assembly in 1627, was of short duration. The ordinances passed by the national assembly in 1650 provided that the Jews should be restricted commercially, and should be forced, like the Greeks, to wear distinctive articles of clothing and badges; and the intolerant grand duke George Rakoczy II. deprived them of the right of residence in fortified towns. These provisions, however, were never carried out. While the emperor Joseph II., in his patent of 1781, appointed Gyulafehérvár as a residence for the Jews, and while the same provision was made by the government as late as 1845, the Jews have always lived in various parts of the country, although their numbers may have been small. The religious congregation and the only community officially recognized, however, were at Gyulafehérvár, where there was a bet din as early as 1591. The first rabbi whose name is known was Joseph Reisz Auerbach (1742-50), who was succeeded by Solomon Selig b. Saul ha-Kohen (1754-58), Johanan b. Isaac of Belgrade (until 1760), Benjamin Zeeb Wolf of Cracow (until 1777), Moses b. Samuel ha-Levi Margolioth (1778-1817), Menahem b. Joshua Mendel (1818-23), Ezekiel b. Joseph Panet (1823-45), and Abraham Friedmann (1845-79), all of whom held the title of district rabbi.

The Sabbatarians (Sambatianer) are important factors in the history of the Jews in Transylvania. This sect originated among the Christians, under the influence of the Reformation, and was founded in 1588 by Andreas Eössy, whose followers regarded the Jews as the chosen people and held their belief to be the only true faith. They observed the Jewish dietary laws, kept the Jewish feasts, and were especially strict in their observance of the Sabbath. The persecutions of the princes Gabriel Bethlen and George Rakoczy I. alienated the Sabbatarians further and further from Christian doctrines, until they approached Judaism so closely that the only congregation which survived the persecution, and which still exists in Bözöd-Ujfalu, officially adopted Judaism with the permission of Baron Eötvös, minister of religion. At present (1905) the Jewish population of Transylvania is 59,239.

TRASTEVERE. See Rome.

TRAUBE, LUDWIG: German physician and medical author; born at Ratibor, Prussian Silesia, Jan. 18, 1818; died at Berlin April 11, 1876; elder brother of Moritz Traube. He studied at the gymnasium of his native town and the universities of Breslau, Berlin (M.D. 1841), and Vienna. After a postgraduate course at Vienna University he established himself as a physician in the city of Berlin in 1842. In 1843 he opened a private seminary course on auscultation and percussion, which he continued for a year; in 1844 he commenced his experiments on animals, especially in regard to affections of the lungs through cutting of the nervus vagus, in which experiments he followed the work of Longet. The results of his labors were: "Die Ursachen und die Beschaffenheit Derjenigen Veränderungen, Welche das Lungenparenchym nach Durchschneidung der Nervi Vagi Erleidet" and "Beitrag zur Lehre von den Erstickungserscheinungen am Respirations-Apparat," published in 1846 and 1847 respectively in "Beiträge zur Experimentellen Pathologie."

Traube became privat-docent at Berlin University and assistant to Schoenlein at the Charité Hospital in 1848, and was appointed chief physician of a department of the same institution and assistant professor in 1857. In 1862 he was appointed professor at the Prussian institution for army surgeons (Friedrich Wilhelms-Institut zur Ausbildung von Militärärzten); in 1866 he received the title of "Geheimer Medizinalrath"; and in 1872 he became professor at the university.

Through the above-mentioned essays Traube became one of the leading German specialists in experimental pathology, in which field he remained prominent up to his death. His fame as a clinician, too, was great, he being one of the best teachers at his university. Traube was also one of the leading practitioners of Europe. Many of his essays were epoch-making. To these belong his monographs on digitalis, fever, thermometry in medicine, diseases of the lungs, heart, and kidneys ("Ueber den Zusammenhang von Herz- und Nierenkrankheiten," Berlin, 1856), and above all his works on experimental pathology. His essays were originally published in the "Charité Annalen," "Verhandlungen der Berliner Medizinischen Gesellschaft," and other medical journals. He collected them later and published them in "Gesammelte Beiträge zur Pathologie und Therapie" (vol. i., Berlin, 1871, contains his experimental essays; vol. ii., *ib.* 1871, his clinical experiments; vol. iii., *ib.* 1878, published after his death by his nephew Albert Fränkel, contains his diary, and minor scientific works). In 1867 Traube published "Die Symptome der Krankheiten des Respirations- und Circulationsapparates" (not complete).

In 1878 a monument was erected to the memory of Traube in the second court of the Charité.

S. F. T. H.

TRAUBEL, HORACE: American editor; born at Camden, N. J., Dec. 19, 1858; educated in the public schools of his native town. In 1892 he was appointed, jointly with Richard Maurice Buckle and Thomas B. Harned, literary executor of Walt Whitman; he has contributed to the periodical press a number of essays on that poet. In 1886 he founded the Contemporary Club in Philadelphia. Among the publications which Traubel has edited are: "The Conservator" (Philadelphia; from 1890 to 1905); "The Dollar or the Man," and "Cartoons of Homer Davenport" (1900). In conjunction with his coexecutors he edited a memorial volume on Walt Whitman. Traubel is editor-in-chief of "The Artsman," a publication founded in Philadelphia in 1903. He is also secretary of the International Walt Whitman Fellowship.

A. F. H. V.

TRAVELERS: Jews early became accustomed to wandering, either by compulsion, as in the Exile and in the Diaspora, or through natural dispersion. The spreading out of the Jewish race in the first and second centuries indicated a willingness to change homes rarely found in other classes under the Roman empire, owing to the local nature of their cults. After the destruction of the Temple there was nothing to prevent Jews worshiping in any part of the habitable globe. Jews were found as far north as the Black Sea and as far west as Spain, and the intercourse between Palestine and Babylonia was continued, as is shown by the cases of Hillel, Akiba, and Rab. Communications between Palestine and Rome were frequent; and the example of Saul of Tarsus shows the wide extent of country that an individual without any means could cover in the course of a few years (see Harnack, "Ausbreitung des Christenthums," Berlin, 1904). With the spread of Islam, Jewish traders became the chief intermediaries between Moslem and Christian lands; and two routes between Spain and China are recorded as traversed by Jewish traders known as "Radanites," who are described in the "Book of Ways," written about 817 by Ibn Khordadhbeh (see Commerce). Other Jewish trade-routes ran from Byzantium to Prague, and possibly extended farther north. A Jew named Isaac accompanied an embassy of Charlemagne's from Aix-la-Chapelle to Bagdad in 802. It is said that Jacob ibn Tarik was sent in the ninth century from Bagdad as far as Ceylon to obtain astronomical books from the Indians; and according to Abraham ibn Ezra a Jewish traveler brought from India the so-called Arabic numerals (see "Fables of Bidpai," ed. Jacobs, p. xxiv.). His name is given also as "Joseph of Spain" (Weissenbron, "Zur Gesch. der Jetzigen Ziffern," 1892, pp. 74-78).

The travels of Eldad ha-Dani are stated to have extended from Babylonia to Spain, but their authenticity is somewhat doubtful. The travels of Abraham ibn Ezra between 1140 and 1168 extended as far as Palestine on the one side, and to England on the other. The same century was distinguished by two important travelers. Benjamin of Tudela started from Saragossa in 1160 and went at least as far as Bagdad, returning to Spain about 1171. It is doubtful whether his accounts of countries east of Bagdad are derived from personal knowledge or from hearsay. About the same time Pethahiah of Regensburg traveled from Prague to Poland and South Russia, to Bagdad, to Jerusalem, and back to Greece and Bohemia. In 1210 a band of over 300 rabbis from France and England made a pilgrimage to the Holy Land, following the example of Judah ha-Levi in 1140 and starting the practise of pilgrimages, a list of which will be found under Pilgrimage. Estori Farhi was perhaps the most important of their followers; after the expulsion of Jews from France in 1306 he wandered in Spain, Egypt, and Palestine, over which he traveled very thoroughly for seven years for geographical purposes.

Part in Geographical Discovery.

Jews were intimately connected with the important extension of geographical knowledge in the fifteenth century—theoretically through the school of Majorca map-makers to which belonged Cresques lo Juheu and Mecia, and practically through a number of travelers like Affonso de Bayba, Abraham of Bega, and Joseph of Lamejo, who accompanied Pedro de Covilham on the discovery of the land-route to the East Indies, and Gaspar da Gama, who had gone from Poland to Goa, where he met Vasco da Gama (Jacobs, "Story of Geographical Discovery," p. 89, New York, 1904). Jews accompanied Columbus on his first voyage to America (see America, Discovery of).

Pilgrimages like those of Meshullam b. Menahem of Volterra and Obadiah Bertinoro to the Holy Land and back became too frequent to deserve special mention; David Reubeni's travels were in the opposite direction. A certain Jew named Jehonadab of Morocco, mentioned by André Thevet as having acquired twenty-eight languages from personal intercourse with those who spoke them, was probably well acquainted with North Africa. Antonio de Montesinos appears to have traveled widely in South America; he claimed to have discovered there the Lost Ten Tribes about 1642. Moses Pereira de Pavia traveled from Holland to Cochin and described the Jews there (1687), while Teixeira's descriptions of his travels in the Philippines, China, and parts of America are of considerable interest. In the eighteenth century few names of travelers occur, apart from those of pilgrims to Palestine and wanderers through Europe, though Samuel Romanelli of Mantua, who lived in Berlin in 1791, described his travels from Gibraltar to Algiers and Morocco, giving many interesting details. In the nineteenth century Jews took a large share in travel in unknown parts. Mention may be made of Joseph Wolf and his travels to Bokhara; of Nathaniel Isaacs, who was one of the earliest to explore Zululand and Natal; and of C. S. Pollack, one of the earliest settlers in New Zealand, of which he wrote an account ("Residence in New Zealand," 2 vols., London, 1831-37). W. G. Palgrave gave an interesting account of his journeys in central Arabia; Arminius Vámbéry of his in central Asia; Captain Binger discovered the bend of the Niger; and Captain Foa wandered from South to North Africa. Emin Pasha and Louis A. Lucas are also to be mentioned as having added to the knowledge of darkest Africa. On Polar expeditions Bessels, Israel, and Angelo Heilprin have done service.

Among modern travelers who have devoted their attention particularly to the condition of Jews in various lands have been: Benjamin II., who wandered over all the continents except Australia; Jacob Saphir, who was especially interested in the Jews of Yemen; J. Halévy, who visited the Falashas; and J. Rinmann, who traveled among the Jews of India. Chorny's travels among the Jews of the Caucasus and Deinard's among those of the Crimea should be mentioned. To these should be added E. N. Adler, who has visited most of the outlying colonies of Jews in Africa, Asia, and America ("Jews of Many Lands," Philadelphia, 1905).

S. J.

TRAVNIK: Town of Bosnia. The first Jews settled there at the beginning of the nineteenth century, during the reign of the sultan 'Abd al-Majid, most of them being Sephardim from Sarajevo. The first to come were the army purveyor Abraham Eskenasi, the Ottoman army surgeon Isaac Salom (descendants of both of whom are now living at Sarajevo), and the rabbi Isaac Attias. About this time Moses Amar, a Jew from Belgrade, whose descendants still live in that city, was employed by the Ottoman government as collector of taxes at Travnik. His successors down to the time of the occupation (1878) were the following Jews: Judah Montilijo, R. Salom, T. Levi, D. Salom, and M. I. Salom. The Ottoman government treated them liberally, allowing them to close the tax-office on Jewish feast-days and, on Saturdays—a fact which indicates the influence and respect which the Jews enjoyed.

The Jews of Travnik have always been conservative. About 1840, when their number had increased, they built a wooden chapel, which was replaced by a massive temple in 1863, the leading Jews of the community helping in its construction by personally carrying stone and brick. A schoolhouse was erected in 1877, but both these edifices were burned in the conflagration of Sept. 3, 1903. The acting rabbi, Isaac Attias, who has already been mentioned, was succeeded by Abraham Abinon, who officiated for twenty-six years, when he was called to SARAJEVO as chief rabbi of the Sephardim in Bosnia-Herzegovina. The Jews of Travnik have never been subjected to any persecutions or restrictions on account of their religion, and have always lived peaceably with the followers of other creeds. In 1903, out of a total population of 6,626, there were 426 Jews in the town, comprising in a single community sixty-five Sephardic and twenty-four Ashkenazic families, the latter having come after 1878.

TREASON.—Biblical Data: In the strictest sense there is no record in the Bible of an attempt to betray one's country, nor is there any mention of an unsuccessful attempt at regicide, which is high treason; but there are numerous instances of successful attempts to overthrow the government by killing its head. Abimelech, the son of Jerubbaal, slew his half-brothers, the seventy sons of Gideon, and proclaimed himself ruler of Israel (Judges ix. 1–5). Athaliah annihilated all those of royal blood and made herself Queen of Judah (II Kings xi. 1).

Saul evidently considered David's action as treasonable and deserving of death (I Sam. xx. 31), and he executed Abimelech and his family of priests for aiding David (I Sam. xxii. 11–18), though Samuel, by God's command, had already anointed David as Saul's successor. Nevertheless, David killed the Amalekite who assisted Saul in committing suicide, "for stretching forth his hand to destroy the Lord's anointed" (II Sam. i. 14). Baanah and Rechab, two captains, killed Ish-bosheth, the son of Saul, in the expectation of being rewarded by David; but the latter charged them with treason and executed them (II Sam. iv. 2–12). Joab killed Absalom for having attempted to overthrow the government and to depose his father, David, in the kingship (II Sam. xviii. 14). Shimei, the son of Gera, was guilty of treason in insulting and cursing David (II Sam. xvi. 5–8). When Shimei begged David's forgiveness, the latter pardoned him (II Sam. xix. 21), but King Solomon found a pretext to avenge his father (I Kings ii. 46). Sheba, the son of Bichri, raised the standard of rebellion against David, and was killed by those he had misled (II Sam. xx. 22). Adonijah was found guilty of treason, and was finally executed (I Kings i. 5, ii. 25).

Zimri, a captain in the army of Elah, the son of Baasha, killed his king, and after a reign of seven days, fearing capture, committed suicide (I Kings xvi. 9–18). His action became proverbial, and was recalled in Jezebel's remark, "Zimri, . . . who slew his master" (II Kings ix. 31). Pekahiah, the son of Menahem, King of Israel, was killed by his captain Pekah, the son of Remaliah, who succeeded him. In return, Hoshea, the son of Elah, conspired against Pekah, killing and replacing him (II Kings xv. 25, 30). Ishmael killed Ahikam's son Gedaliah, whom the king of Babylon had appointed governor (II Kings xxv. 25).

——**In Rabbinical Literature:** The Rabbis find the penalty of death for disobedience to the king in Josh. i. 18 (see Sanh. 49a). A Jewish king may inflict death upon those guilty of revolt. Even if the king orders one of his subjects to go to a certain place, or forbids him to leave his own house, he must obey or become liable to capital punishment. The king also has the right to kill one who insults or disgraces him, as in the case of Shimei ben Gera. Death for treason is by the sword only. The king may also punish the offender otherwise, but he may not confiscate his property, as this would be robbery (Maimonides, "Yad," Melakim, iii. 8). David ben Solomon ibn Abi Zimra defines a king as one chosen by a prophet or elected by the people, but not a self-appointed ruler who has acquired his kingdom by usurpation. No one can be guilty as a "mored be-malkut" in the case of such a king (commentary on the "Yad," *ad loc.*, ed. Wilna, 1900). R. Joseph partly justifies David's action against Uriah by the latter's reference to "my lord Joab, and the servants of my lord" (II Sam. xi. 11), which placed Joab on equal terms with the king, an offense which amounted to treason (Shab. 56a). Others are of the opinion that Uriah deserved death because he disobeyed David's command to go home (Tos. *ad loc.*, s.v. ואמר). David adjudged Nabal guilty of disrespect to the king; but Abigail pleaded that Saul was still living and that David was not yet recognized generally as king: David admitted the force of her argument (I Sam. xxv. 33; Meg. 14b). Amasa was guilty of disobedience when he "tarried longer than the set time which he [David] had appointed him," and thereby earned his death at the hands of Joab (II Sam. xx. 5, 10; Sanh. 49a).

TREASURE-TROVE. See FINDER OF PROPERTY.

TREBINO (TREMINO) DE SOBREMONTE, TOMAS: Martyr; burned at the stake at Mexico, or Lima, April 11, 1649. He had previously been reconciled by the Inquisition; but in 1642, during the trial of Gabriel de Granada, information was brought against him and his wife, Maria Gomez. He appears to have been thrown into the dungeon of the Inquisition at that time, and kept in imprisonment till his death, possibly in order that the Inquisitor might obtain possession of his fortune; for when burning he taunted the officials with using up wood which had cost them nothing, because it had been bought with his money. Out of a group of 109 prisoners, Trebino de Sobremonte was the only one to be burned alive. He died without uttering a groan, mocking "the pope and his hirelings," as he called them, and taunting his tormentors with his last breath. De Barrios, the Spanish-Jewish historian, who visited Cayenne in 1660, dedicated two sonnets to him.

A. J.

TREBITSCH, ABRAHAM BEN REUBEN ḤAYYAṬ: Austrian scholar; born at Trebitsch, Moravia, about 1760; died at Nikolsburg in the first half of the nineteenth century. He attended the yeshibah of Löb Fischels at Prague in 1775 ("Ḳorot ha-'Ittim," p. 24a), and then settled in Nikolsburg, where he became secretary to the "Landesrabbiner." He was the author of "Ḳorot ha-'Ittim," a history of the European monarchs, including the emperors of Austria, from 1741 to 1801 (part i., Brünn, 1801; with additions, under the title "Ḳorot Nosafot," up to the year 1830, by Jacob Bodek, Lemberg, 1841). It deals especially with the history and literature of the Jews in the Austrian states. Trebitsch's work is a continuation of Menahem Mann ben Solomon ha-Levi's "She'erit Yisrael," which traces the history down to the year 1740 (see JEW. ENCYC. i. 490, *s.v.* AMELANDER).

Trebitsch, with Hirsch Menaḳḳer, was the author of "Ruaḥ Ḥayyim," a story of the exorcising of an evil spirit that possessed a young man (published in Hebrew and Yiddish, Nikolsburg, 1785; Frankfort-on-the-Oder, 1794).

D. S. MAN.

TREBITSCH, NEHEMIAH (MENAHEM NAHUM): Austrian rabbi; born at Prague Aug. 14, 1779; died there July 4, 1842. He was a son of Selig Trebitsch, ḥazzan at the Altneuschule, and he received a thorough Talmudical training at the yeshibah of Jacob Günsberg. Upon the recommendation of the "Landesrabbiner" Mordecai Benet (Marcus Benedict), Trebitsch became rabbi of Prossnitz in 1826.

On May 13, 1832, the government confirmed the election of Trebitsch as "Landesrabbiner" of Moravia, in succession to Mordecai Benet, and granted him a salary of 600 florins; he was the last Moravian "Landesrabbiner" of the old school. In Sept., 1833, the provincial government issued a decree conferring upon the chief rabbi the power of proposing candidates for the various rabbinates of the province, and of making an appointment when the congregation failed to inform him of a vacancy or rejected the candidate proposed by the "Landesrabbiner." This decree, for which Trebitsch was declared by his opponents to be responsible, brought him into conflict with the congregations of Gewitsch, Weisskirchen, Prossnitz, and Loschitz; and five years later (May 23, 1838) another decree canceled the chief rabbi's privilege of proposing candidates. Abraham Neuda, rabbi of Loschitz, whom Trebitsch refused to confirm on account of liberal tendencies, was reinstated after having passed a successful examination before a committee of which Trebitsch was a member. This defeat, and the censure of the government for his opposition to the use of the German language among the Jews greatly affected Trebitsch, who died while on a journey to Carlsbad.

Trebitsch wrote: "Shelom Yerushalayim," glosses on Seder Mo'ed of the Palestinian Talmud, with the text and David Fränkel's commentary (Vienna, 1821); "Ḳobeẓ 'al Yad," notes on Maimonides' "Yad ha-Ḥazaḳah," part i., with text (*ib.* 1835).

S. S. MAN.

TREE OF LIFE.—Biblical Data: According to Gen. ii. 9, there stood in the midst of the Garden of Eden a "tree of life," apparently by the side of the "tree of knowledge of good and evil." Although Gen. iii. 3 seems to presuppose but one tree there, Gen. iii. 22 asserts that, after the primitive pair had eaten of the tree of knowledge, they were expelled from Eden lest they should put forth their hands and take of the tree of life and live forever. The view of the writer was that Eden contained a tree the magical power of the fruit of which conferred immortality upon him who partook of it, though YHWH prohibited mortals from partaking of this fruit.

Referred to in Proverbs.

A tradition of this tree lingered long in Israel. In Prov. iii. 16–18 the poet says of wisdom, "Length of days is in her right hand; . . . She is a tree of life to them that lay hold upon her," a passage which clearly alludes to the primitive conception of a life-prolonging tree. Again, Prov. xi. 30 reads, "The fruit of the righteous is a tree of life"; and Prov. xiii. 12, "Hope deferred maketh the heart sick: but when the desire cometh, it is a tree of life." In Prov. xv. 4 it is said, "A wholesome tongue is a tree of life." In the last three references the thought may not be so literal as in the first, but the use of the tree of life in this gnomic poetry is evidence that the tradition lived. In Ezek. xlvii. 12 also there seems to be an allusion to the tree of life. In describing the river which would flow out from Jerusalem to the Dead Sea the prophet says, "And by the river upon the bank thereof, on this side and on that side, shall grow all trees for meat, whose leaf shall not fade, neither shall the fruit thereof be consumed: it shall bring forth new fruit according to his months." In the New Testament, where this passage is quoted (Rev. xxii. 2), the tree is described as the tree of life.

In the extracanonical literature there are two or three additional references. The Ethiopic Book of Enoch (xxiv. 4) describes the tree of life as having "a fragrance beyond all fragrance; its leaves and bloom and wood wither not forever; its fruit is beautiful and resembles the dates of a palm." The Slavonic Book of Enoch (viii. 3) says, "In the midst there is the tree of life . . . and this tree can not be described for its excellence and sweet odor." IV Esd. viii. 52, in describing the future, says, "Unto you is paradise opened, the tree of life is planted," etc.

——**Critical View:** Budde ("Urgeschichte," pp. 46 *et seq.*) showed that in the original narrative of Gen. ii.-iii. there was but one tree. This, he thought, was the tree of knowledge, and he accordingly eliminated the tree of life. Barton, however, has shown ("Semitic Origins," pp. 93 *et seq.*) that in primitive Semitic life the especially sacred tree was the date-palm, and that, because of its bisexual nature and because of a belief that man came to self-realization through sexual relations, it was regarded as both the tree of knowledge and the tree of life. The differentiation which divided these functions between two trees came in at a later time, when knowledge of the origin had become in part obscured. That this is the source of the idea of the tree of life among the Hebrews is rendered probable by the following considerations: (1) the Temple of Solomon, which was evidently intended to imitate a garden (comp. Bevan, in "Jour. of Theol. Studies," iv. 502 *et seq.*), was carved with cherubim, palm-trees, and flowers (I Kings vi. 29-32); (2) a recollection of the real origin of the tree of life crops out in Ethiopic Enoch, xxiv. 4; (3) the tradition came to the Hebrews by way of Babylonia (comp. Paradise, Critical View), and in Babylonia not only was the palm the sacred tree of a sacred garden (comp. Barton, *l.c.* p. 107), but in the literature its name is sometimes written with the determinative for deity (*idem*, "Documents from the Archives of Telloh," 1905, plate 25). For a similar Babylonian conception of a food of life see Paradise, Critical View. In Hebrew literature this idea first appears in its literal form in Genesis, is used as a literary metaphor in Proverbs, and in Ezekiel and the apocalypses becomes a part of the picture of the heavenly paradise.

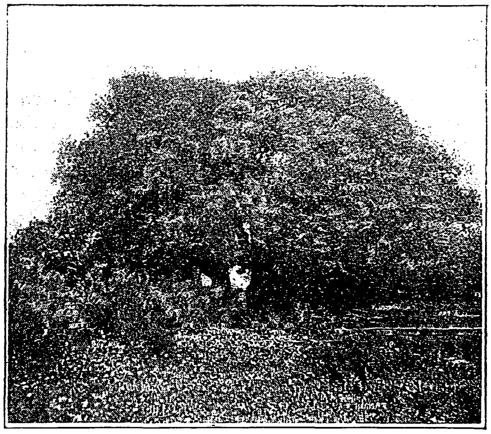
Bibliography: Budde, *Urgeschichte*, pp. 46-88, Giessen, 1883; Toy, *Proverbs*, in *International Critical Com.* 1899, pp. 69, 70; Barton, *Sketch of Semitic Origins*, pp. 90-98, New York, 1902.

E. G. H. G. A. B.

TREE-WORSHIP: Trees have been objects of worship in all parts of the world (comp. Mannhardt, "Wald- und Feldkulte," Berlin, 1875). They were worshiped among the Semites (comp. Wellhausen, "Reste Arab. Heidentums," 2d ed., 1897, pp. 101 *et seq.*; W. R. Smith, "Rel. of Sem." 2d ed., 1894, pp. 185 *et seq.*; Barton, "Sketch of Semitic Origins," pp. 87 *et seq.*), and the Hebrews were no exception to this. The tree that was generally regarded as sacred in Palestine was the oak, or the terebinth, which in hot countries, especially the more southerly of those about the Mediterranean, takes the place of the oak. It is called "allon," which possibly meant "divine tree" (from אל), though another etymology is perhaps more probable. This was not the only sacred tree; for traces of the worship of the palm-tree survive (comp. Tree of Life), and Abraham planted an "eshel" (tamarisk) by the sacred wells at Beer-sheba and called on the name of God there (Gen. xxi. 33). Tamarisks existed also at Ramah in the time of Saul and at Jabesh in Gilead (I Sam. xxii. 6, xxxi. 13, Hebr.). It was the terebinth, however, which was generally worshiped, and the worship of which was denounced by the Prophets.

The Sacred Terebinth.

The worship of this tree is connected with the earliest traditions. At Shechem, Yhwh is said to have appeared to Abraham at the terebinth (R. V. margin) of Moreh, when he first entered the land (Gen. xii. 6 *et seq.*). Under this tree Jacob buried the foreign gods of his followers (Gen. xxxv. 4); and Joshua set up a "maẓẓebah" under the terebinth which was in the sanctuary of Yhwh (Josh. xxiv. 26). Perhaps it was this tree to which allusion is made in Judges ix. 37. Near Beth-el there was another of these sacred terebinths (Eng. versions, "oak"; Gen. xxxv. 8). At Hebron, Abraham built an altar under one; there he dwelt, and there Yhwh appeared to him (Gen. xii. 18, xiv. 18, xviii. 1 *et seq.*). A descendant of this tree (see illustration *s.v.* Abraham's Oak) is still pointed out at Hebron, and is venerated by the Russo-Greek pilgrims who visit Palestine every year: it has probably maintained its sacred character through all the intervening centuries. At Ophra a sacred terebinth (A. V. "oak") existed in the time of Gideon (Judges vi. 11, 19). The wide-spread existence of this tree is evidenced by the names derived from it—as Elim (Ex. xv. 27), Elon (Judges xii. 11), and Elath (II Kings xiv. 22). The extent of its worship is indicated also by the denunciations of the Prophets. A favorite phrase of theirs in describing idolatrous practises was "upon every high hill and under every green tree" (Deut. xii. 2; Jer. ii. 20). Some-



Sacred Terebinth on Jabal Ausha', Palestine.
(From a photograph.)

times the name of the terebinth is combined with this phrase (comp. Isa. lvii. 5 and Ezek. vi. 13, R. V. margin), showing that it was to this tree the Prophets referred.

The sacred character of many of these trees has survived to the present time. There is, for example, one on Jabal Ausha', and others are at 'Ain Yajuz and Suf (comp. Barton in "Biblical World," 1904, xxiv. 170, 174; *idem*, "A Year's Wandering in Bible Lands," 1904, p. 162). The one at Suf is thickly hung with rags. In southern Gilead to-day the limbs of the ordinary terebinth are cut for fire-wood, so that the tops of the trees are kept small and are much misshapen. The sacred ones, on the contrary, are left intact and cast a fine shade. Perhaps this was the case in ancient times also. If so, it would explain the phrase "green tree" as applied to those which were sacred.

Other trees besides those mentioned may have had a sacred character, as is suggested by the fact that David once received an oracle through the mulberry- or balsam-tree ("baka"; comp. II Sam. v. 24); but nearly all trace of such a character has disappeared. As has been pointed out, the Prophets were unable completely to suppress tree-worship, which has survived in Palestine through all religious changes to the present day.

Bibliography: In addition to the works mentioned, see Baudissin, *Studien*, vol. ii.; Jacobs, *Studies in Biblical Archæology*, pp. 68-74.

E. C. G. A. B.

TREES, LAWS CONCERNING: Cutting down fruit-bearing and useful trees is forbidden by the Mosaic law. In time of war the fruit-trees about a besieged city may not be injured or used to build defenses; for war is waged against foes, and not against the life-preserving works of nature (Deut. xx. 19-20). The Rabbis regard this as an admonition against any kind of waste or wilful destruction. The prohibition is technically known as "bal tashḥit" (thou shalt not destroy; Shab. 129a). Some authorities, however, permit the cutting down of fruit-trees when the site is needed for a dwelling ("Ṭure Zahab," to Shulḥan 'Aruk, Yoreh De'ah, 117, 6).

A tree which extends into the public road may be cut to allow a camel and its rider to pass beneath (B. B. ii. 14). Trees were often used to mark the boundary between fields belonging to different owners. The fruit of a tree belongs to the owner of the land in which the tree is planted, though the branches extend over other property. If the trunk of the tree is in two properties, the two owners become partners in the tree and divide the fruit (B. M. 107a; "Yad," Shekenim, vi. 9). One who purchases three trees in one field may claim the right to as much ground around the trees as is necessary for the gatherer and his basket (B. B. 82b); one who purchases less than three trees has no claim to ground. An adjacent owner can not object because the roots of a tree are in his ground. He may, however, cut the roots when they are in the way of his plow or if they enter his well. When there is no fence between two separately owned fields, one must not plant trees nearer than 4 ells from his neighbor's boundary-line (B. B. 26a). Enough space must be left on either side of a river to allow a rower room to run his boat ashore (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 155).

TREMELLIUS, JOHN IMMANUEL: Italian Hebraist; born at Ferrara 1510; died at Sedan Oct. 9, 1580. He was educated at the University of Padua. He was converted about 1540 to the Catholic faith through Cardinal Pole, but embraced Protestantism in the following year, and went to Strasburg to teach Hebrew. Owing to the wars of the Reformation in Germany he was compelled to seek asylum in England, where he resided at Lambeth Palace with Archbishop Cranmer in 1547. In 1549 he succeeded Paul Fagius as regius professor of Hebrew at Cambridge. On the death of Edward VI. he revisited Germany, and, after some vicissitudes, became professor of Old Testament at Heidelberg (1561). He ultimately found refuge at the College of Sedan, where he died. His chief literary work was a Latin translation of the Bible from the Hebrew and Syriac. The five parts relating to the Old Testament were published at Frankfort-on-the-Main between 1575 and 1579, in London in 1580, and in numerous later editions. Tremellius also translated into Hebrew Calvin's "Catechism" (Paris, 1551), and wrote a "Chaldaic" and Syriac grammar (Paris, 1569).

T. J.

TRÉNEL, ISAAC: French rabbi; born at Metz Dec. 28, 1822; died at Paris in 1890. He studied at Marmoutier under his uncle Jacob Haguenauer, a famous Talmudist, and later at Merzig, Prussia, under the Talmudist Moïse Lévy, known also as R. Moché Merzig. After completing his studies at the rabbinical school of Metz, Trénel was appointed rabbi at Besançon; he resigned that office soon after, however, and went to Paris, where he was for a time secretary of the Comité de Bienfaisance Israélite. After some years he was appointed assistant to the chief rabbi of Paris, and in 1856 director of the Ecole Centrale Rabbinique, which was transferred to Paris in 1859; he retained the latter office until his death. He was the author of a Hebrew-French dictionary, compiled in collaboration with N. Sander (Paris, 1859), and of a study on the life of Hillel the Elder, published in the report of the Séminaire Israélite (*ib.* 1867).

S. I. L.

TRENT (German, **Trient**): Oldest city of the Tyrol; a sovereign bishopric from 1027 to 1803. During the first half of the fourteenth century a small number of Jews, probably from Italy, settled in the episcopal city. During the first decades their history differed in no wise from that of the Jews living in the rest of the Tyrol; but by the beginning of the fifteenth century there existed for the Jews of Trent special ordinances similar to those in force in Bozen, as is proved by an order promulgated by Bishop Ulrich III. of Brixen in 1403. The Jews as prominent business men showed themselves of service to the bishops, and accordingly stood high in favor with them. Thus Bishop Alexander of Masovia (1423-44) on one occasion gave a decision in favor of the Jew Isaac against Peter von Rido (Sept. 3, 1440). The Jewish physician Tobias, who later (1475) died a martyr for his faith, was likewise very popular among the Christians.

The Jews owned houses, estates, and a separate Jewish school, and in general lived on the best of terms with their Christian fellow citizens, until the fanaticism of a priest caused untold disaster to descend upon the small but prosperous community. Bernardinus of Feltre, the indirect and probably the direct instigator of the murder of Simon of Trent, brought about the notorious ritual-murder proceedings of 1475 (see Simon of Trent). The community was dissolved; its rich members were put to death after the confiscation of their property by order of Bishop Hinderbach; and the surviving members were expelled. Sixtus IV., seriously ill at the time, in the bull "Facit nos pietas," dated June 20, 1478, sanctioned these proceedings in spite of the efforts made by the Bishop of Ventimiglia, who showed that the charges which had been brought were a mere tissue of lies. For centuries from that time no Jews dwelt in Trent; and as late as Oct. 20, 1638, the proceedings of 1475 were cited by the prince bishop Karl Emanuel of Madruzzo as ground for forbidding the settlement of Jews in the town. On the same occasion a law was promulgated to the effect that Jews when traveling might not pass through the precincts of Trent in closed wagons or sedan-chairs, and that they must wear on the breast a badge the size of a thaler. The penalty for violating this law was to be a long imprisonment or heavy fine. In 1725 and again in 1731 it was ordered that Jews wear hats covered with red or yellow cloth. A few Jews were allowed to stay in Trent when provided with special letters of protection from the emperor, but only for a few days. Such a safe-conduct was granted, for example, by Emperor Maximilian to the Jew Emanuel, son of Samson, on March 1, 1516.

In recent times several Jewish merchants have settled in Trent; but they have no opportunities for holding religious services, and, like all the Jews in the Tyrol, they belong to the community of Hohenems.

J. A. Tä.

TRESPASS: Injury done directly, in most cases purposely, to the person or property of another. Trespass on the person has been discussed under the head of Assault and Battery: it remains to speak of the Talmudic law of trespass on property.

According to the Mishnah (B. Ḳ. ii. 6), "a man is always forewarned." That is, like the master of the forewarned ox (see Goring Ox), he is always liable for the whole damage arising from his direct act; and the words are added: "whether awake or asleep, whether acting of purpose or from ignorance."

The Scripture prescribes punishment for only one typical case ("ab") of trespass on property (Lev. xxiv. 8, Hebr.): "And he who kills a domestic animal shall make it good, life for life"; and (*ib.* verse 21): "And he who smites a beast shall make it good." This is extended by the oral law to all cases of direct harm done to property; but the above-quoted section of the Mishnah also singles out as a case, "whether he has blinded one's eye, or has broken his vessel, he pays full damage." In other places the Mishnah or Baraita speaks of tearing a person's clothes, or destroying his crops or plants, or killing his beast. Only one exception is made: viz., when the trespass constitutes otherwise a death-deserving, sinful act, there is no liability to make the damage good in money (see the case of the burglar in Sanh. viii. 6).

Trespass on Property.

Not only is sleep or ignorance no defense against the charge of trespass, but unwillingness or acting under compulsion (אונס) does not free from liability—for instance, where one stumbles or falls from the roof and in so doing hurts a person or breaks a thing—unless the hurtful movement was made under irresistible force and was not caused by lack of care (B. Ḳ. 26-28). This is illustrated in the Mishnah (B. Ḳ. iii. 4-5) thus:

> "When two potters [men carrying earthenware] are walking one behind the other, and the first stumbles and falls, and the second stumbles over him, the first is liable for the damage done to the other. Or when one goes along with his jar or barrel, and the other with his joist [meaning side by side], and the jar of the one is broken against the joist of the other, the latter goes clear; for each had the right to go where he went. If the man with the joist walked in front and the jar or barrel was broken against it, the man with the joist goes clear; but if he stood still, unless he told the man with the barrel to stand still also, he is liable. If the man with the barrel walked in front, and the other man behind him, and the barrel was broken by the joist, [the bearer of the latter] is liable; but if the man with the barrel suddenly stands still, without telling the man behind him to stop, the latter goes free. And the same results will follow where one carries a burning lamp and another a bundle of flax."

But when the injurious act is committed on the grounds of the injuring party, he who commits it is liable only for what he does wilfully, not for what he does unwittingly or involuntarily; such at least is the opinion of Maimonides, taken from post-Talmudic authorities, though based upon hints and analogies in the Mishnah and the Baraita.

The trespasser is responsible not only for what he does with his hand or other parts of his body, or with a weapon or implement which he wields, but also for any injury which he does by throwing or shooting or by spitting. But if he casts anything on the ground (even his saliva) and injury arises therefrom afterward (*e.g.*, where it causes a man or a beast to stumble), it is not a trespass, but is in the nature of a pit (see Jew. Encyc. i. 160b, *s.v.* Accident).

Extent of Trespass.

Where one strikes iron with a hammer so that sparks issue therefrom, by which a neighbor's house or goods are burned or otherwise damaged, it is deemed a trespass, for which the wielder of the hammer is liable. When one pushes his neighbor's beast into the water, or prevents it from leaving the water, and it is drowned, or when he locks it in a circumscribed place, where it dies from heat or from lack of air, he is liable; and thus in similar cases of death indirectly inflicted.

Where an injury does not affect the neighbor's property in the body and can not be seen—where the shape of the thing is not changed, yet the thing itself is diminished in value—it is held (Giṭ. 53b) that under the letter of the Torah there is no liability for damage; but there is a rabbinical ordinance to the effect that the person causing the diminution in value must make it good. This would happen where things Levitically clean were defiled by the act of one not the owner; or where "wine of a heathen libation" (יין נסך) was mixed with another man's wine, rendering its use unlawful; or in like cases where food or drink has by the trespasser's act been made a thing forbidden under the Jewish dietary, Levitical, or other religious laws.

Trespass Through Agent.

Where one man orders or procures another to commit a trespass, and the agent does so, both principal and agent are liable for the damage done. Where the construction of a house, or of a similar thing in which several work together, causes an injury, if those doing the several parts of the work are associated as partners therein, all are liable; but if they work as employees, each for his own wages, only the one who actually causes the injury is liable.

This case is also put: Five men have each put a burden on a beast, and it walks along; a sixth puts a further burden on it, and it stops and dies; the sixth alone is liable. If, however, the beast had stopped before the additional weight was laid on it, the sixth man goes free; but if there is doubt as to the facts, all six are liable, and the damage is divided among them; and generally, when two or more jointly have killed an animal or broken an implement, the damage is paid by them in equal parts.

All damages to property are paid in money, and are ascertained by subtracting the value of the dead beast or of the wreckage from the worth of the beast or other article before the trespass was committed. See Robbery.

TREUENBURG or **TREUENFELD, JACOB.** See Bassevi, Jacob; Coat of Arms.

TREVES (ancient, **Augusta Treverorum**; German, **Trier**): City of Rhenish Prussia, formerly an electorate comprising upper and lower bishoprics with Treves and Coblenz as capitals (see Jew. Encyc. iv. 133). In all probability Jews lived in the city in the early centuries of the common era, for Treves was the central point connecting Gaul and Rome. There is no specific mention of them, however, before 1066, when Archbishop Eberhard (1047–66) menaced them with expulsion unless they should accept baptism before Easter; but this threat was ineffective, for he was murdered on Feb. 12, 1066, by a priest named Christian, who had been instigated, it was alleged, by the Jews. Thirty years later (June, 1096) the pillaging bands of Emikos advanced upon Treves. Several Jews committed suicide, while the remainder sought refuge in the palace of Archbishop Egilbert, who endeavored to persuade them to accept baptism, although those who were converted obtained the permission of Emperor Henry IV. in the following year to return to Judaism (see Grätz, "Gesch." vi. 102 *et seq.*; Salfeld, "Martyrologium," pp. 3, 19 [Hebrew part], and pp. 98, 140 *et seq.* [German part], where a list of the names of the martyrs is given). The other communities of Treves, including those at Berncastel, Cochem, and Wittlich, were almost totally destroyed by the Crusaders. During the archbishopric of Bruno of Treves early in the twelfth century (1102–1124), one of the residents of the city was a Jew named Joshua, who later embraced Christianity, and who enjoyed a reputation as a physician, mathematician, astronomer, and student of Hebrew literature. Abrion, the Jew of Treves, who was unusually well versed in German, seems to have been a contemporary of Joshua (Goethe, "Reineke Fuchs," ii.).

First Expulsion, 1262.

In 1262 the Jews were expelled from Treves by Archbishop Heinrich of Vinstingen, who invited Lombards to take their places, although the latter proved to be even more usurious than the Jews. The elector Baldwin of Treves employed Jewish financial agents, among them Muskin (1323–36); Jacob Daniel (until 1341), a banker who had a Hebrew chancellery and who, like his chief manager, bore the title of "Judæorum dominus"; and Michael, Jacob's son-in-law, who was in the electoral service until 1349. The Jews of Treves suffered much during the Armleder Persecutions in 1336, when their houses were pillaged (Salfeld, *l.c.* p. 239, note 1); but three years later they were permitted to remain in Treves in consideration of an annual tax of 100 pounds heller, half this sum being paid in May and half on St. Martin's Day. At Coblenz on March 17, 1345, two Jews of Treves farmed the archiepiscopal "Rheinzoll" of 15 tournois for three years at 655 livres gros tournois annually.

At the time of the Black Death the Jews of Treves were persecuted, like those of the entire Moselle valley (Salfeld, *l.c.* pp. 69, 78, 80, 84 [Hebrew part]; pp. 246 *et seq.*, 268, 276, 286 [German part]). On Oct. 9, 1354, Archbishop Boemund II. engaged the Jew Symon as his physician in ordinary, and Emperor Charles V., in a document dated Metz, Dec. 13, 1356, granted the elector the right of admitting Jews. On Sept. 30, 1362, an agreement was made between Archbishop Cuno of Falkenstein and the city of Treves by which the latter pledged itself to protect the Jews of the archbishopric like any other citizens, although the number of families permitted to reside there was limited to fifty; and they were ordered to pay an annual tax of 100 livres noir tournois in two instalments, at St. John's Day and at Christmas, while in case twenty-five families or fewer lived there, they were to pay 50 livres. On Aug. 24, 1405, King Ruprecht waived his claim to the Opferpfennig which had not been collected from the Jews of Treves for several years, although he ordered them for the future to pay it annually (Stern, "König Ruprecht von der Pfalz," p. 31, Kiel, 1898).

The Jewry.

The Jews of Treves anciently lived in a district ("Vicus Judæorum," mentioned in a document of Sept. 21, 1284) represented by the modern Judenplatz; the main street of residence was the Judenmauergasse (Jüdemergasse) near the Jewish cemetery. This

Jewish quarter is mentioned in documents of 1330, 1346, and 1350; the synagogue ("scola") in one of 1235; the cemetery, of 1240; the "Spylhus," or dancing-hall, which was used for marriages (see Güdemann, "Gesch." iii. 138 *et seq.*), of 1315; the hospital, of Oct. 12, 1422; and a "Judenporte" in Simeonsgasse, of 1460. At the head of the Treves community, whose members appear as owners of real estate as early as 1229 and Feb. 19, 1235, was a Bishop of the Jews ("episcopus," "magistratus Judæorum" [1307]), who was required to loan the archbishop 10 marks yearly without interest, receiving in return a cow, an aam of wine, two bushels of wheat, and a discarded cloak. Each Christmas and Easter the Jews gave six pounds of pepper to the archbishop and two to the chamberlain, besides furnishing silk and girdles for new garments for the former. For their cemetery they had to pay six denarii to the cathedral on St. Stephen's Day (Dec. 26 or Aug. 3).

Second Expulsion, 1418.

In 1418 Archbishop Otto von Ziegenheim banished the Jews from the entire electorate of Treves; and almost seventy years elapsed before the Jew Ytzinger was admitted (1486) as a veterinary surgeon into Vallendar, south of Coblenz, where other Jews were afterward allowed to settle (July 19 and Oct. 7, 1499) for a period of five years, on payment of an annual tax of 35 gulden. In the beginning of the sixteenth century Jews were again permitted to live in the archbishopric of Treves, and in a document dated at Cochem, Feb. 1, 1555, Archbishop Johann of Isenburg granted them the privilege, renewed in 1679, of appointing a rabbi, although they were obliged to submit to additional taxation. On July 1, 1561, however, Archbishop Johann von der Leyen notified the Jews that they must leave the archbishopric within five months, though twenty-three families were permitted to remain for another period of five years from Dec. 1, 1561; while Jacob III. and Johann VII. of Schoeneberg ordered the Jews to leave Treves in 1580 and the following years, their complete expulsion occurring on Oct. 28, 1589. After a few years, however, the electors of Treves granted special commercial privileges to some Hebrew merchants, headed by the silk manufacturer Magino, and as early as 1593–94 Jews were again residing in the episcopal city, although, according to the statute-books, they were compelled to wear the yellow Badge on their garments. On Jan. 15, 1618, Archbishop and Elector Lothar von Metternich promulgated a special ordinance for the Jews, which was reissued on Feb. 14, 1624; and in 1663 the electoral court chancery enacted that those Jews of Treves who were under the archbishop's protection should be permitted to use wells and pastures and to gather firewood anywhere.

The 15th of Elul, 5435 (= 1675), marked the beginning of a persecution of the Jews in Treves which lasted until Purim of the same year; and by order of the physician Tewle, who was the head of the Jewish congregation, and who began the Treves memorbook in 1664, this day was appointed a general fast for the community in memory of this event. At Treves, as elsewhere, the Jews suffered at times from the pranks of Catholic students, as in 1666, 1687, 1707, and 1723. In 1681 Archbishop Johann Hugo issued a new Jewish ordinance, and in 1696 the Jews were forbidden to acquire real estate. A law relating to the Jews, promulgated by Elector Franz Ludwig in 1723, remained in force until the end of the electorate, although the archbishopric was secularized in 1803.

Under the French.

The city of Treves was taken by the French on Aug. 10, 1794; by a law enacted on the 29th of Fructidor, year 5 (= Sept. 15, 1797), the Leibzoll was abolished (see Hansen, "Treviris, oder Trierisches Archiv für Vaterlandskunde," ii. 37, No. 217, Treves, 1841); and the French invasion brought also civic equality to the Jews. Treves then became a consistorial diocese, like Bonn and Krefeld. On Sept. 9 and 10, 1859, the new synagogue of Treves was dedicated. At present (1905) the community numbers 900, and maintains several benevolent societies, as well as a Society for Jewish History and Literature. A separate Orthodox congregation also exists.

Rabbis and Scholars.

Among the rabbis and scientists of Treves the following may be mentioned: David Tewle b. Isaac Wallich, communal leader and physician (exiled from Fulda; died Oct. 5, 1691; see Kaufmann, "Vertreibung der Juden aus Wien," pp. 225 [note 3], 226 [note 1]; Löwenstein, "Gesch. der Juden in der Kurpfalz," p. 6, note 2; also mentioned in Gershon Ashkenazi's Responsa, Nos. 13, 21, 84, 89, and in the preface); R. Joseph Israel b. Abraham Worms (died in Bingen Sept. 9, 1684); his son R. Isaac Aaron Worms (died in Metz July 25, 1722; see Löwenstein, *l.c.* p. 99 and note 1; Gershon Ashkenazi's Responsa, No. 18; Cahen, "Le Rabbinat de Metz," in "R. E. J." 1886, pp. 48 *et seq.*); Moses Meïr Grotwohl (died 1691; see Löwenstein, *l.c.* p. 86, note 2; Jair Ḥayyim Bacharach's Responsa, p. 234b; Jacob Reischer's Responsa, i. 110; Freudenthal, "Aus der Heimat Mendelssohns," p. 287); Moses Lewow (see Friedberg, "Luḥot Zikkaron," 2d ed., 1904, p. 78; Lewinstein, "Dor Dor we-Dorshaw," p. 95, No. 628); R. Moses b. R. Heshel (died 1st of Ab, 1788); R. Moses Shah (or Moses Trier b. R. Eliezer = R. Moses Levy, died Nisan, 1840; see Löwenstein in "Blätter für Jüdische Gesch. und Literatur," iii. 98); Joseph Kahn; Dr. I. Holländer (died Dec. 8, 1880); Dr. M. S. Zuckermandel (at present "Stiftsrabbiner" in Breslau); and the present chief rabbi, Dr. Bassfreund.

TREVES: Family which derived its name from the Prussian city of Treves, famous for its prominent men. No other family can boast such a continuous line of scholars as this one, branches of which have been known under the names **Treves, Tribas, Dreifuss, Trefouse,** and **Drifzan.** There exist, however, no means of tracing the connection of these various branches, which even as early as the fourteenth and fifteenth centuries were already scattered over Germany, Italy, southern France, Greece, Poland, and Russia.

Treves Pedigree.

Abraham b. Gershon Treves (called also **Ẓarfati**): French cabalist; flourished about 1572. He was the author of the following works: (1) commentary on the "Ma'areket ha-Elahut" of R. Perez; (2) glosses to the "Sefer Yeẓirah" and to the commentaries of Moses Botarel, Naḥmani, and Abraham b. David; (3) glosses to the "Sha'are Orah."

S. F. T. H.

Abraham ben Solomon Treves (called also **Ẓarfati**): Scholar of the sixteenth century. He emigrated from Italy to Turkey, where he officiated as rabbi of German and Portuguese congregations in Adrianople and various other cities. He favored the Sephardic ritual, and corresponded with David Cohen and Elijah Mizraḥi. From one of his letters to Joseph Caro ("Abḳat Rokel," No. 34) it appears that he was a physician also. He was the first scholar to quote the "Kol Bo," and was the author of "Birkat Abraham," a work on the ritual.

Bibliography: Mortara, *Indice*, p. 66; Zunz, *Ritus*, p. 32, note b; Steinschneider, *Cat. Bodl.* col. 711; Benjacob, *Oẓar ha-Sefarim*, p. 87; Azulai, *Shem ha-Gedolim*, ii. 20; Brüll's *Jahrb.* i. 109-111.

Aryeh Löb ben Naphtali Treves: Russo-Polish scholar; born 1848; died 1873; lived in Augustovo. He was a valued collaborator on the journal "Ha-Maggid," to which he contributed articles over the signature "Ṭure Eben."

Bibliography: Brüll's *Jahrb.* i. 121; *Ha-Maggid*, 1873, p. 60.

Dob Bär ben Judah Treves: Scholar of the eighteenth century; died 21st of Tishri (Oct. 17), 1803. Prior to 1760 he officiated as rabbi in Hungary, and from that year to 1790 as rabbinical judge in Wilna. He was the author of "Rebid ha-Zahab" (Grodno, 1797), a commentary on the Pentateuch, in which, through cabalistic explanations, he endeavored to establish a connection between the written and the oral law. He wrote also "Shir Ḥadash" (Wilna, 1800), a commentary on the Song of Solomon.

Bibliography: Steinschneider, *Cat. Bodl.* cols. 893-894; Benjacob, *Oẓar ha-Sefarim*, pp. 543, 575; Fuenn, *Ḳiryah Ne'emanah*, p. 200; Brüll's *Jahrb.* i. 121.

Eliezer ben Naphtali Hirz Treves (known also as **Eliezer Frankfurt**): German rabbi; born 1495; died 1567. He officiated as rabbi in Frankfort-on-the-Main. He was an adherent of Asher Lemmlein, a pseudo-Messiah who appeared in the sixteenth century, and attributed the non-fulfilment of Lemmlein's prophecy concerning the Messiah to circumstances other than fraud.

Eliezer held the Frankfort rabbinate for twenty-two years; and during a ritualistic controversy which took place in 1550 he was called upon to render a decision. In 1558 he was a member of a committee appointed by Emperor Ferdinand I. to organize a system for registering the votes of the Jews of Prague. In 1561 he went for a time to Cracow, where he copied Solomon Molko's commentaries. He was an enthusiastic collector of manuscripts, from which he prepared certain treatises. There are extant several decisions signed by Eliezer, pertaining to the community of Frankfort-on-the-Main, and extending over the period 1556–66 with the exception of the time spent by him in Cracow.

G.* p. 233 and note d; Gedalia ibn Yaḥya, *Shalshelet ha-Ḳabbalah*, ed. Amsterdam, p. 51a; De Rossi, *Dizionario*, p. 520; Steinschneider, *Cat. Bodl.* col. 967; Brüll's *Jahrb.* i. 105-106.

Eliezer ben Samuel Treves (surnamed **Ashkenazi**): Polish scholar of the sixteenth and seventeenth centuries; officiated as rabbi in Opatow. He wrote several Talmudic commentaries, of which, however, only one was published; namely, that on the treatise Ḥullin, entitled "Dammeseḳ Eli'ezer" (Lublin, 1646). In the same year he published a collection of daily prayers under the title "Siaḥ ha-Sadeh." He was the author also of a treatise on the writing of names in bills of divorce; and on a journey through Belgrade he gave a copy of that work to Rabbi Simḥah ha-Kohen Portrapa, who happened to be there at that time, and who later embodied it in a work published by himself. In 1648 Eliezer approved Jacob Chentschin's commentary on the Masorah.

S. S. O.

Emilio Treves: Italian writer; born at Triest Dec. 31, 1834. He was educated in his native town, and when quite young entered the printing-office of the "Oesterreicher Lloyd" in that city. He contributed to the "Raccolta dei Classici," a work issued from that press and edited by Anton Racheli. At the same time Treves wrote anonymously for "L'Anelo," a journal prohibited by the Austrian government. When his association with "L'Anelo" was discovered he went to Paris, where he was correspondent for the "Crepusculo" of Milan. Two years later he went for a short time to Turin, and then became manager of a printing establishment at Fiume. When this house failed Treves followed the vocation of a teacher in Udine.

In 1858 he settled in Milan and became translator for the official journal "Gazzetta di Milano," at the same time contributing to the "Italia Musicale" and "Uomo di Pietra." In the war of 1859 he served in Garibaldi's legion, and after peace was declared resumed his connection with the "Gazzetta." In 1862 he founded the "Museo di Famiglia," and in 1865 the "Biblioteca Utile," comprising examples of Italian literature as well as various works translated from other languages into Italian. In 1869 he resigned his position on the "Gazzetta di Milano" and founded the "Corriere de Milano," which he sold in 1871. In the latter year he entered into partnership with his brother Giuseppe, and in 1874 the two founded in Milan the "Illustrazione Italiana," which proved very successful.

Treves has written many articles for various journals and publications, and is the author also of several dramas, *e.g.*, "Richezza e Miserie," Triest, 1847, which was well received, and "Il Duca d'Enghien," *ib.* 1850.

BIBLIOGRAPHY: P. Wurzbach, *Biographisches Lexicon des Kaiserthums Oesterreich*, Vienna, 1882.

Gershon Treves: Scholar of the fifteenth century. He was of German descent and resided in Avignon. Upon the death of Joseph Colon, his father-in-law, he arranged the latter's collection of responsa, Nos. 13, 14, 98, and 102 of which contain letters addressed to himself. During a controversy between the rabbi of Padua and Lewa Landau, Treves was drawn into the dispute (see Moses Minz, Responsa, No. 98).

BIBLIOGRAPHY: Colon, *Responsa*, No. 102; Brüll's *Jahrb.* i. 100.

Giuseppe Treves: Brother of Emilio Treves, and with him cofounder in 1874 of the "Illustrazione Italiana."

S. F. T. H.

Ḥayyim Treves (known also as **Ḥayyim Schwarz**): Scholar of the sixteenth century; rabbi of the former provinces of Cologne and Jülich. In 1577 he resided in Königswinter, and from 1585 to 1595 in Ahrweiler. His son-in-law was Isaac ben Ḥayyim of Ahrweiler. Treves in deciding a certain question was said to have attacked Christianity; and his son-in-law, together with other contemporary scholars, was compelled to give testimony in the matter.

BIBLIOGRAPHY: Auerbach, *Berit Abraham*, p. 23a; Brüll's *Jahrb.* i. 106–107.

Isaac Treves: Son of Shneor Treves of Frankfort-on-the-Main. He was rabbi of Kopytzk; but no details of his life are known.

Isaac ben Gershon Treves: Venetian scholar of the sixteenth century. He was employed as a corrector of the press on several rabbinic Bible editions which appeared at Venice in 1508, and later on Issachar ibn Susan's "'Ibbur ha-Shanim" (Venice, 1579), a work treating of the Hebrew calendar. Isaac was the author of an introduction to Eliezer Ashkenazi's "Ma'ase Adonai," of an index to Elijah de Vidas' "Reshit Ḥokmah," and of additions to Solomon al-Ḳabiẓ's commentary on the Book of Esther.

S. S. O.

Isaac and **Jacob Treves**: Two Austrian philanthropists who in 1828 donated a fund of 2,100 florins to the Sick Soldiers' Home in Vienna (Militär-Invalidenhaus).

S. F. T. H.

Israel Hezekiah Treves: Ḥazzan at the Italian synagogue in Padua in the eighteenth century, and, on the death of its rabbi in 1782, rabbinical judge there. He was a pupil of the poet Moses Ḥayyim Luzzatto, who introduced him to the mysteries of Cabala.

BIBLIOGRAPHY: Almanzi, in *Kerem Ḥemed*, iii. 374; Carmoly, in *Revue Orientale*, ii. 182; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 204; Grätz, *Gesch.* x. 338; Brüll's *Jahrb.* i. 116.

Jacob Treves (called also **Jacob Brisker**, after his native town, Brest, in Russia): Scholar of the seventeenth century; son of the martyr Moses Abraham Treves (Ashkenazi); lived in Frankfort-on-the-Main. In 1680 he wrote an addendum to Shabbethai Bass' supercommentary on Rashi's commentary on the Pentateuch (Frankfort-on-the-Main, 1712).

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 2230; Benjacob, *Oẓar ha-Sefarim*, p. 609; *Sifte Yeshenim*, Introduction; Brüll's *Jahrb.* i. 119.

Jehiel ben David Treves: German scholar of the seventeenth and eighteenth centuries; rabbi of Gailingen. He was the author of important notes to Rashi and to the tosafot of the treatise Beẓah (Offenbach, 1717).

BIBLIOGRAPHY: Wolf, *Bibl. Hebr.* ii. 910; Brüll's *Jahrb.* i. 117.

Jehiel ben Simeon Sofer Treves (Ashkenazi): Russian rabbi of the eighteenth century; officiated in Tikoczin, Russia. Nothing is known concerning his career; but his "Be'er Heṭeb," a compendium of the Shulḥan 'Aruk, has won the approval of the casuists, and is regarded as a standard work on Jewish law. Certain eminent Talmudists, however (Jacob Reischer and Raphael Meisels, for example), have pointed out the author's imprudence in attacking Moses Isserles in an unjustifiable manner ("Shebut Ya'ḳob," iii., No. 41; introduction to the "Tosefet Shabbat").

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 1242; Azulai, *Shem ha-Gedolim*, ii. 12; Benjacob, *Oẓar ha-Sefarim*, p. 64; Brüll's *Jahrb.* i. 119-120.

S. S. O.

Johanan ben Mattithiah Treves: Chief rabbi of France from about 1385 to 1394; died in Italy July 21, 1439. After having received his rabbinical diploma from his father, who was chief rabbi of France, he married the daughter of the rich and influential Manessier de Vesoul, and filled the position of rabbi in a provincial town. On the death of his father he returned to Paris and was appointed, by agreement of Charles VI. with the community, to the chief rabbinate.

During the last years of his incumbency he suffered much persecution at the hands of Isaiah ben Abba Mari (called also "Astruc of Savoy"), a former pupil of his father. Being well versed in rabbinical literature, Isaiah arrogated to himself, with the approbation of Meïr ben Baruch of Vienna, the right to ordain French rabbis, and endeavored by all possible means to undermine Johanan's authority. The latter applied for aid to Ḥasdai Crescas and Isaac ben Sheshet, who pronounced themselves in favor of the persecuted rabbi, blaming both Isaiah and his supporter Meïr ben Baruch ("She'elot u-Teshubot Ribash," No. 270). The quarrels, however, ceased only with the expulsion of the Jews from France in 1394. Johanan then settled in Italy, where he remained until his death.

Johanan was one of the most eminent rabbinical authorities of his time; and his halakic decisions were often cited ("Sha'are Dura," see Neubauer, "Cat. Bodl. Hebr. MSS." No. 690). From Italy he carried on a scientific correspondence with Jacob Mölln (MaHaRIL). A responsum of his on the prayers of orphans for their deceased parents, and a letter addressed to the community of Padua, are still extant in manuscript in the Florence Library (Bisconi, "Bibliothecæ Hebraicæ Florentinæ Catalogus," p. 426).

G. I. Br.

Joseph ben Hirz Treves: German scholar; born in 1490. Together with his brother Eliezer he published his father's commentary on the prayer-book, to which he added an introduction and glosses. He took part in the publication of the mystagogic Midrash on Ruth, which appeared under the title "Tappuḥe Zahab," or "Yesod Shirim" (Thingen, 1560; Cracow, 1569).

BIBLIOGRAPHY: Brüll's *Jahrb.* i. 104-105 and note 76.

Joseph ben Johanan Treves I. (surnamed **ha-Gadol** = "the Great"): First bearer of the name of Treves. He flourished in the fourteenth century, and, according to Zunz ("Z. G." p. 173), was rabbi in Paris. Brüll, however ("Jahrb." i. 90), refers to him as rabbi of Marseilles about 1343. His wife was well versed in Jewish literature, and explained several Talmudical passages; and when later she with her sons took up her residence in Paris the whole family was exempted from wearing the Jewish badge.

BIBLIOGRAPHY: Zunz, *Z. G.* p. 173; Grätz, *Gesch.* viii. 8-9; Isaac ben Sheshet, *Responsa*, No. 271; Isaac de Lattes, *Responsa*, p. 88, Vienna, 1860; Carmoly, in *Revue Orientale*, ii. 114; Brüll's *Jahrb.* i. 90-91.

Joseph ben Lipmann Eliezer Treves (surnamed **Ashkenazi**): Rabbi of the seventeenth century; officiated in Prossnitz, Moravia. He edited a brief abstract of Jacob Weil's "Hilkot Sheḥiṭah" (Amsterdam, 1660), and wrote an elegiac poem ("ḳinah") on the destruction of Kremsir by the Swedes in 1643 and on the devastations which took place in Poland and Lithuania. The poem appeared in 1648.

BIBLIOGRAPHY: Zunz, *Literaturgesch.* p. 435; Steinschneider, *Cat. Bodl.* col. 1456.

Joseph ben Mattithiah Treves: Brother of Johanan Treves; scholar and liturgical poet of the fifteenth century; died on the Ninth of Ab, 1429. At an early age he emigrated to Italy, and there wrote the following liturgical poems: a yoẓer for the Sabbath preceding New-Year; "Silluḳ," consisting of three parts and containing exhortations to repentance; and "Tokaḥah," a prayer written in the form of a dialogue between the living and the dead. In Italy he had copies made of several writings, of which one, of the "Sefer ha-Nayyar," written in 1392, is still extant.

BIBLIOGRAPHY: Zunz, *Literaturgesch.* p. 370; idem, *Ritus*, p. 31; Brüll's *Jahrb.* i. 99.

Joseph ben Mattithiah Treves: Rabbi of Savigliano, Italy, in the sixteenth century. In the divorce proceedings instituted by the physician Joseph Tamari of Venice against his son-in-law Samuel Venturozzo of Perugia, Joseph sided with the latter. Of his writings only a responsum has appeared in print (in Lampronti's "Paḥad Yiẓḥaḳ," i. 105a). A commentary by him on the first chapter of Genesis, and a treatise of his on the Talmudic proverb "An old man in the house is a burden; an old woman, a treasure" ('Ar. 19a), are extant in manuscript.

BIBLIOGRAPHY: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 161; Mortara, *Indice*, s.v. *Treves*; Zunz, *Ha-Palit*, pp. 22–23.

Levi ben Jacob Treves (surnamed **Ẓarfati**): French scholar of the sixteenth century. He was the first who declared it permissible at the reading from the Law to call up before any Cohen who might be present an Israelite who paid for the privilege. In the course of time this seems to have become customary in several places; for even in the eighteenth century German casuists protested vigorously against it. Levi is probably identical with the Levi ben Jacob who copied Abravanel's commentary on Isaiah, and who, at an advanced age, emigrated to Jerusalem.

Mattithiah ben Joseph Treves (called **the Provençal**): French scholar; chief rabbi of Paris; born there about 1325; died about 1387. He was educated by his father, and later studied under Nissim ben Reuben and Perez Cohen ben Isaac. He lived in various Spanish cities until 1361, when he returned to Paris; and, as at that time there were only a few scholars in France, he founded a seminary in the French capital. Through the intercession of his brother-in-law, Procurator Manessier de Vesoul, Charles V. in 1363 appointed him chief rabbi of Paris.

Mattithiah collected books, and also engaged in literary pursuits. A responsum signed by him is extant in the Paris Library (Codex 676, No. 5). He was the author of a work on Talmudic methodology, fragments of which have been preserved in Joseph ibn Verga's "She'erit Yosef" (ed. Mantua, pp. 3b, 4a). He is said to have been styled "Ha-Parnas," and to have composed several liturgical poems, among which were one for the eve of the Day of Atonement, and one—a penitential prayer in twenty stanzas—treating of the Ten Martyrs. He is the alleged author of a work entitled "Eben Boḥan." A manuscript copy of the Talmud, now in the Royal Library, Munich, and which was made by a German copyist for Benjamin Josiphiah, was at one time in the possession of Mattithiah.

s. F. T. H.

Mordecai Treves: Italian scholar of the fourteenth century. He was the author of a historical work treating of the seliḥah poets, in the introduction to which he tells of the persecutions of 1349. He mentions a town named Heila (היילא), where Mar Zuṭra was buried, and which contained large institutions of learning. From this, as well as from the circumstance that Treves confuses the names of the seliḥah poets, Zunz deduces that he failed to consult historical sources.

BIBLIOGRAPHY: Zunz, *Literaturgesch.* pp. 625-627; Brüll's *Jahrb.* i. 115.

Moses ben Jacob Treves: Venetian rabbi and scholar of the seventeenth century. His father was a friend of David de Pomis. From 1648 he maintained a regular correspondence with Samuel Aboab. In 1661 he wrote a poem in honor of Yom-Ṭob Valvason, the founder of a bet ha-midrash in Venice; this poem was published in "Hed Urim" (Venice, 1661). In 1668 he was a member of the rabbinical committee of Venice before which the itinerant prophet Nathan of Gaza was arraigned. In 1670 he sanctioned the publication of Solomon Rocca's "Kawwanat Shelomoh," a cabalistic commentary on the prayers.

Naphtali Hirz Treves: Younger brother of Eliezer ben Samuel Treves (Ashkenazi). He held an important rabbinate in Poland, but no details of his life and literary activity are known.

Naphtali Hirz ben Eliezer Treves: Cabalist and scholar of the sixteenth century; officiated as ḥazzan in Frankfort-on-the-Main. He was the author of "Perush" (1560), a famous cabalistic commentary on the prayer-book; and probably also of "Naftule Elohim" (Heddernheim, 1546), an index to Baḥya ben Asher's commentary on the Pentateuch. The preface to the "Naftule Elohim" consists partly of the result of private studies and partly of quotations from other cabalistic works. Treves wrote, too, a supercommentary on Rashi, which is still extant. Naphtali Hirz engaged in disputations with Christian scholars; and he made comments on the pronunciation of German. He is especially important for his accounts of Jewish customs and ceremonies.

Raphael ben Baruch Treves: Italian scholar of the seventeenth century. He was the author of a commentary on the Song of Solomon, which, together with some of his Talmudic decisions, was printed in Constantinople in 1743. This commentary is written in the style used by the philosophers of the early Middle Ages, and follows the methods known as "PaRDeS" (the initials of "Peshaṭ," "Remez," "Derash," and "Sod"). Raphael affixed his approbation to Elijah ha-Kohen's "Shebeṭ Musar" (Smyrna, 1667).

Raphael ben Baruch must not be confounded with the Raphael Treves who, in the beginning of the eighteenth century, owned a printing establishment in Constantinople, from which R. Nissim's novellæ to Giṭṭin were issued.

BIBLIOGRAPHY: Zedner, *Cat. Hebr. Books Brit. Mus.* p. 761; Azulai, *Shem ha-Gedolim*, ii. 29a; Benjacob, *Ozar ha-Sefarim*, p. 108; Steinschneider, *Cat. Bodl.* col. 3024; idem, *Jüdische Typographie*, in Ersch and Gruber, *Encyc.* section ii., part 28, p. 63b; Brüll's *Jahrb.* i. 117.

Raphael Joseph ben Johanan Treves: Rabbi of Ferrara in the sixteenth century. Of his works only two responsa are extant, one treating of the legality of the levirate marriage, and the other of the permissibility of business partnerships between Jews and Christians when the latter attend to business on Saturdays and Jewish holy days. Treves is especially known as a corrector of the press in Foa's printing establishment at Sabbionetta. He wrote encomiums on Maimonides' "Moreh," and Meïr Me'iri's "Yaïr Natib," which appeared in 1553; and he supplied marginal glosses to Abraham ben Isaac ha-Levi's commentary on the Song of Solomon (1558).

In the Tamari-Venturozzo case Treves played a double rôle, for after having signed the sentence of excommunication against Samuel (1566), he appeared as a witness for the latter.

S. S. O.

TRÉVOUX (Hebrew, טרבוט): Principal town of the arrondissement of the same name in the department of Ain, France. Henry of Villars, Archbishop of Lyons and seignior of Trévoux, stipulated in the charter which he gave to the latter town in 1300 that no Jew should be allowed to settle in it. A certain number of Jews nevertheless obtained permission to establish themselves there on payment of a yearly tax of 15 livres. The Jews who were expelled from Lyons in 1420 sought refuge at Trévoux, where they engaged in making gold and silver wire. In 1425 they were obliged to contribute largely to the forced loan which the city had to make to the Duchess of Bourbon, who had succeeded to the seignioralty of Trévoux.

The other inhabitants of the town, who were jealous of the Jews, especially of their commercial prosperity, accused them in 1429 of having in their possession Hebrew books containing blasphemies against the Christian religion. At the instance of the archbishop the Duchess of Bourbon ordered an investigation, which she entrusted to Jean Namy, appellate judge of Beaujolais; Jean Châlon, licentiate in law; and Ayme, a baptized Jew of Chambéry, who was commissioned to inspect the Hebrew books and to translate the reprehensible passages. The books were thereupon seized and burned, and the Jews, after being sentenced to pay various fines, were expelled from the city (see CHAMBÉRY). Three years later a few of them returned; but they were again driven out in 1467; and there was another expulsion in 1488. A certain number of these Jews subsequently took the name "Trabot" or "Traboto," indicating their native place. Steinschneider ("Cat. Bodl." col. 2052) has given a list, which has been completed by Berliner (see his "Magazin," ii. 16, 96).

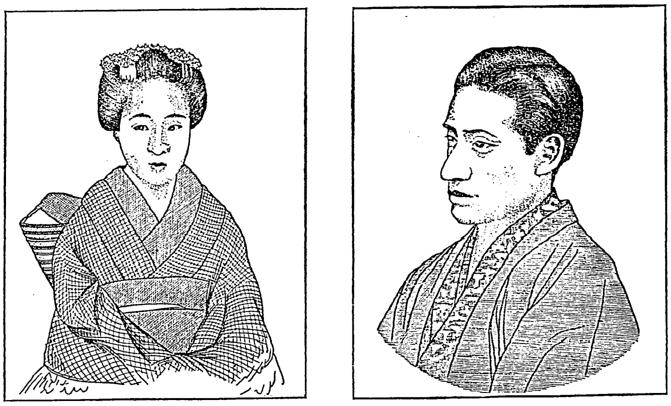
TRIAL. See PROCEDURE IN CIVIL CAUSES.

TRIBES, LOST TEN: According to the Bible, Tiglath-pileser (II Kings xv. 29) or Shalmaneser (*ib.* xvii. 6, xviii. 11), after the defeat of Israel, transported the majority of the inhabitants of the Northern Kingdom to Assyria, and placed them in Halah and Habor, on the stream of Gozan, and in the towns of Media. In their stead a mixed multitude was transported to the plains and mountains of Israel. As a large number of prophecies relate to the return of "Israel" to the Holy Land, believers in the literal inspiration of the Scriptures have always labored under a difficulty in regard to the continued existence of the tribes of Israel, with the exception of those of Judah and Levi (or Benjamin), which returned with Ezra and Nehemiah. If the Ten Tribes have disappeared, the literal fulfilment of the prophecies would be impossible; if they have not disappeared, obviously they must exist under a different name. The numerous attempts at identification that have been made constitute some of the most remarkable curiosities of literature.



Japanese Types, Showing Jewish Features.
(According to McLeod, "Epitome of the Ancient History of Japan," Tokyo, 1879.)

In the Apocrypha it is presumed that the Ten Tribes still exist as tribes. Thus Tobit is stated to be of the tribe of Naphtali, and the Testaments of the Twelve Patriarchs assume their continuous existence. In the Fourth Book of Ezra (xiii. 39-45) it is declared that the Ten Tribes were carried by Hosea, king in the time of Shalmaneser, to the Euphrates, at the narrow passages of the river, whence they went on for a journey of a year and a half to a place called Arzareth. Schiller-Szinessy pointed out that "Arzareth" is merely a contraction of "ereẓ aḥeret," the "other land" into which the Lord says He "will cast them [the people] as this day"; see Deut. xxix. 27, which verse is referred by R. Akiba to the Lost Ten Tribes (Sanh. x. 4; comp. "Journal of Philology," iii. 114).

According to haggadic tradition, the Ten Tribes were divided into three groups, one on this side of the River Sambation, another on the opposite side, and the third in the neighborhood of Daphne, near Antioch (Lam. R. v. 2). This was based on the Targum of pseudo-Jonathan to Ex. xxxiv. 10; but the course of the River Sambation is differently given, according to the prepossessions of the various writers (see SAMBATION). Akiba, indeed, because he was a believer in the Messianic claims of Bar Kokba, and trusted in the immediate fulfilment of such passages as Isa. xi. 11, Jer. xxi. 7, Ezek. xxxvii. 15, without the restoration of Israel, distinctly expressed the opinion that the Ten Tribes would never return (Sanh. x. 3). In the ninth century ELDAD BEN MAHLI HA-DANI came forward, claiming to give specific details of the contemporary existence of the Ten Tribes and of their location at that time. Dan, Naphtali, Gad, and Asher were in Havilah; Zebulun and Reuben in the mountains of Paran; Ephraim and half of Manasseh in South Arabia; Simeon and the other half of Manasseh in the land of the Chazars (?). According to him, therefore, the Ten Tribes were settled in parts of southern Arabia, or perhaps Abyssinia, in conformity with the identification of Havilah. The connection of this view with that of the Jewish origin of Islam is obvious; and David Reubeni revived the view in stating that he was related to the king of the tribes of Reuben situated in Khaibar in North Arabia.

Arabia, India, and Abyssinia.

According to Abraham Farissol, the remaining tribes were in the desert, on the way to Mecca, near the Red Sea; but he himself identifies the River Ganges with the River Gozan, and assumes that the Beni-Israel of India are the descendants of the Lost Ten Tribes. The Ganges, thus identified by him with the River Sambation, divides the Indians from the Jews. The confusion between Ethiopia and Farther India which existed in the minds of the ancients and medieval geographers caused some writers to place the Lost Ten Tribes in Abyssinia. Abraham Yagel, in the sixteenth century, did so, basing his conclusions on the accounts of David Reubeni and Eldad ha-Dani. It is probable that some of the reports of the FALASHAS led to this identification. According to Yagel, messengers were sent to these colonists in the time of Pope Clement VII., some of whom died, while the rest brought back tidings of the greatness of the tribes and their very wide territories. Yagel quotes a Christian traveler, Vincent of Milan, who was a prisoner in the hands of the Turks for twenty-five years, and who went as far as Fez, and thence to India, where he found the River Sambation, and a number of Jews dressed in silk and purple. They were ruled by seven kings, and upon being asked to pay tribute to the sultan Salim they declared they had never paid tribute to any sultan or king. It is just possible that this may have some reference to the "Sâsanam" of the Jews of Cochin. It is further stated that in 1630 a Jew of Salonica traveled to Ethiopia, to the land of Sambation, and that in 1646 one Baruch, traveling in Persia, claimed to have met a man named Malkiel of the tribe of Naphtali, and brought back a letter from the king of the children of Moses; this letter was seen by Azulai. It was afterward reprinted in Jacob Saphir's book of travels ("Eben Sappir," i. 98). Moses Edrehi wrote a separate work on the subject. So much interest was taken in this account that in 1831 a certain Baruch ben Samuel of Pinsk was sent to search for the children of Moses in Yemen. He traveled fifteen days in the wilderness, and declared he met Danites feeding flocks of sheep. So, too, in 1854 a certain Amram Ma'arabi set out from Safed in search of the Ten Tribes; and he was followed in 1857 by David Ashkenazi, who crossed over through Suakin to make inquiries about the Jews of Abyssinia.

Nestorians and Devil-Worshipers.

In 1835 Asahel Grant, an American physician, was appointed by the American Board of Foreign Missions to pursue his calling among the Nestorians of Mesopotamia. He found among them a tradition that they were descendants of the Lost Ten Tribes, a tradition which had already been gathered by Smith and White during their earlier mission ("Researches in Armenia," vol. ii.). He found also among the Jews of the neighborhood of Urumiah recognition of this tradition, which he considered to be confirmed by the following facts: they dwelt in the neighborhood to which the Israelites were originally deported, while Josephus declared that the Ten Tribes lived beyond the Euphrates up to his time ("Ant." xi. 5, § 3), and his statement is confirmed by Jerome ("Opera," vi. 780); their language is a branch of the Aramaic; they still offer sacrifices and first-fruits like the ancient Israelites, and they prepare for the Sabbath on the preceding evening; they have Jewish names and Jewish features. Other similarities of custom are recorded by Grant ("The Nestorians, or the Lost Tribes," New York, 1845). Grant was of the opinion also that the Yezidis, or devil-worshipers, of the same region were likewise descended from the Ten Tribes, as they observed the rite of circumcision, offered sacrifices, including that of the paschal lamb on the 24th of Nisan, and also abstained from forbidden food (*ib.* pp. 363–372).

Afghans.

According to their native traditions, the Afghans also are to be identified with the Lost Ten Tribes. They declare that Nebuchadnezzar banished them into the mountains of Ghur, whence they maintained correspondence with the Arabian Jews. When some of the latter were converted by Mohammed, one Khalid wrote to the Afghans and invited them to embrace Islam. Several Afghan nobles went to Arabia under one Ḳais, who claimed to trace his descent through forty-seven generations from Saul. He was accordingly greeted by Mohammed by the title of "malik," in deference to this illustrious descent. Ḳais is reported to have died at the age of eighty-seven, in 662; and all the modern chiefs of Afghanistan claim to be descended from him (Malcolm, "History of Persia," ii. 596, London, 1815). The Afghans still call themselves "Beni-Israel," and are declared to have a markedly Jewish appearance. Their claim to Israelitish descent is allowed by most Mohammedan writers. G. Moore, in his "Lost Tribes" (pp. 143–160, London, 1861), also identified the Afghans with the Ten Tribes.

Karaites and the Caucasus.

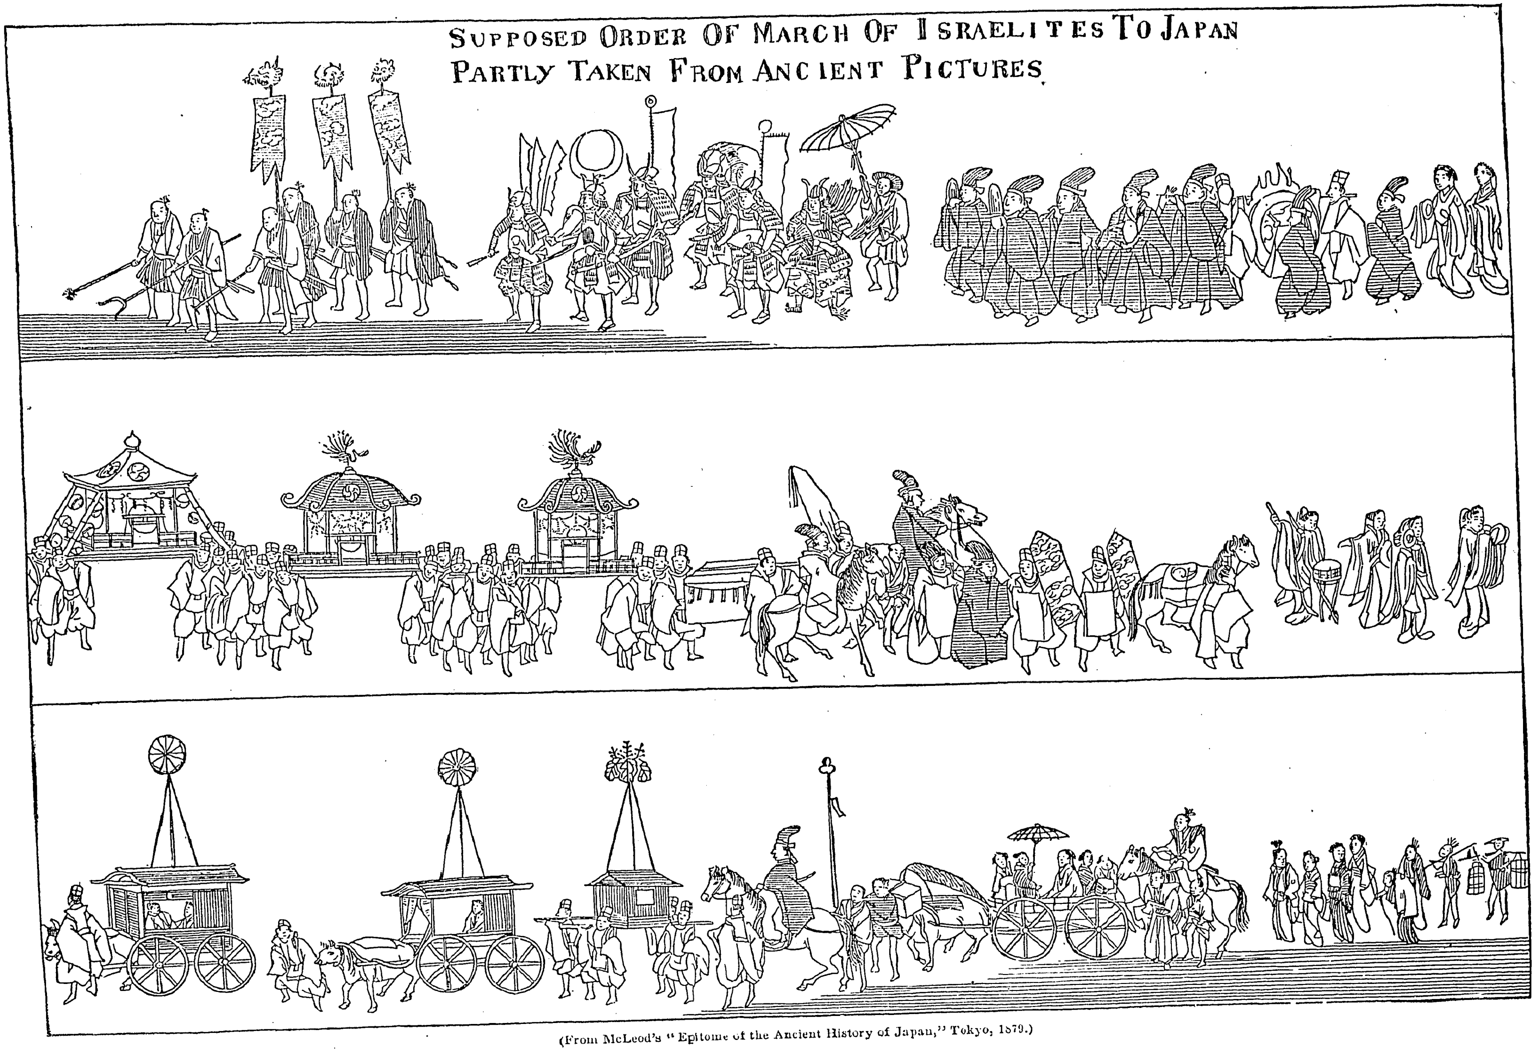
In order to avoid the disabilities imposed upon Rabbinite Jews, the Karaites of Russia attempted to prove that they were guiltless of the execution of Jesus because they were descended from the Lost Ten Tribes and had been settled in the Crimea since the time of Shalmaneser (seventh century B.C.). In particular Abraham Firkovich edited a number of forgeries of inscriptions on tombstones and manuscripts to prove the early date of their settlement in the Crimea. The argument was effective with the Russian government in 1795, when they were exempted from the double taxation imposed upon the Rabbinites, and in 1828, when it obtained for them exemption from military service. From the similar traditions among the Jews of the Caucasus, according to Chorny ("Sefer ha-Massa'ot," p. 585, St. Petersburg, 1884), the Jews of Derbent declared that the Daghestan Jews were those who were carried away by the Assyrians, and that some of them had ultimately migrated to Bokhara, and even as far as China. It is, of course, only natural that the outlying colonies in China, in India, and even in the Sahara should have been at one time or another identified as remnants of the Lost Ten Tribes.

G. Moore, indeed, attempts to prove that the high-class Hindus, including all the Buddhists, are descendants of the Sacæ, or Scythians, who, again, were the Lost Ten Tribes. He transcribes many of the Indian inscriptions into Hebrew of a wonderful kind to prove this contention. Buddhism, according to him, is a fraudulent development of Old Testament doctrines brought to India by the Ten Tribes. The Kareens of Burma, because of their Jewish appearance, their name for God ("Ywwah"), and their use of bones of fowls for divination purposes, are also identified by him and by Mason as descendants of the Lost Tribes.

Anglo-Israelism.

The identification of the Sacæ, or Scythians, with the Ten Tribes because they appear in history at the same time, and very nearly in the same place, as the Israelites removed by Shalmaneser, is one of the chief supports of the theory which identifies the English people, and indeed the whole Teutonic race, with the Ten Tribes. Dan is identified sometimes with Denmark, and sometimes with the Tuatha da Danaun of Irish tradition; but the main argument advanced is that the English satisfy the conditions of the Prophets regarding Israel in so far as they live in a far-off isle, speak in a strange tongue, have colonies throughout the world, and yet worship the true God. For further discussion of the argument and the history of its development see Anglo-Israelism.

One of the most curious offshoots of the theory is



SUPPOSED ORDER OF MARCH OF ISRAELITES TO JAPAN
PARTLY TAKEN FROM ANCIENT PICTURES.

(From McLeod's "Epitome of the Ancient History of Japan," Tokyo, 1879.)

Japan.

that which identifies the Shindai, or holy class, of Japan as the descendants of the Lost Ten Tribes. This is advocated by N. McLeod in his "Epitome of the Ancient History of Japan" (3d ed., Tokyo, 1879). He calls attention to a point of agreement between the two, namely, the fact that the first known king of Japan was Osee, 730 B.C., and the last king of Israel was Hosea, who died 722 B.C. In addition to this, McLeod points out that the Shinto temple is divided into a holy and a most holy place. The priests wear a linen dress, bonnet, and breeches, like the Jewish priests of old, and the ancient Temple instruments are used in the Shinto temple. The Japanese worship their ancestors, as the old Israelites did; and in addition to this McLeod points out the Jewish appearance of some Japanese, and supplements his "Epitome" with a volume of illustrations depicting among other things the supposed rafts on which the Israelites crossed, via Saghalien, to Japan, and their supposed order of march. Still further removed is the suggestion of some writers that the Australians are the Lost Tribes because they practise circumcision ("Allg. Zeit. des Jud." 1842, No. 6).

Quite recently the Masai of British East Africa have been identified owing to similarity of custom (M. Merker, "Die Masai," Berlin, 1904).

America.

Immediately after the discovery of Central and South America the legend of the Lost Tribes began to be referred to the aboriginal inhabitants. Garcia, in his "Origen de los Medianos" (1607, pp. 79-128), declares that the Tribes passed over the "Strait of Aninai," *i.e.*, Bering Strait, and went by that way to Mexico and South America. He deduces their identity from the common cowardice and want of charity of the Israelites and Indians. Both of these peoples, according to him, bury their dead on the hills, give kisses on the cheek as a sign of peace, tear their clothes as a sign of mourning, and dance as a sign of triumph. Garcia claimed to have found many Hebrew terms in the American language.

According to Manasseh ben Israel, Antonio Montesinos deposed in 1644 before the bet din of Amsterdam that while traveling in Peru he had met with a number of the natives who recited the "Shema'" in Hebrew, and who informed him through an interpreter that they were Israelites descended from Reuben, and that the tribe of Joseph dwelt in the midst of the sea. He supported their statements by tracing Jewish customs among other inhabitants of Central and South America. The Indians of Yucatan and the Mexicans rent their garments in mourning and kept perpetual fires upon their altars, as did also the Peruvians. The Mexicans kept the jubilee, while the Indians of Peru and Guatemala observed the custom of levirate marriage. Manasseh ben Israel therefore concluded that the aboriginal inhabitants of America were the Lost Ten Tribes, and as he was of the opinion that the Messiah would come when the whole world was inhabited by the descendants of Israel, he directed his efforts to obtaining admission for the Jews to the British Islands, from which they were at that time excluded (see MANASSEH BEN ISRAEL). The Mexican theory was later taken up by Viscount Kingsborough, who devoted his life and fortune to proving the thesis that the Mexicans were descended from the Lost Ten Tribes, and published a magnificent and expensive work on the subject ("Antiquities of Mexico," 9 vols., 1837-45). Kingsborough's chief arguments are that Mexicans and Israelites believe in both devils and angels, as well as in miracles, and use the blood of the sacrifice in the same way, namely, by pouring it on the ground; also that the high priest of Peru is the only one allowed to enter the inner, most holy part of the temple, and that the Peruvians anointed the Ark, as did the Israelites. He also finds many similarities in the myths and legends. Thus certain Mexican heroes are said to have wrestled with Quetzalcohuatl, like Jacob with the angel ("Antiquities of Mexico," vol. vii.).

North-American Indians.

Manasseh b. Israel's views were taken up by T. Thorowgood in his "Jewes in America" (London, 1650), and he was followed by the "Apostle" Eliot in a publication ten years later; and their views, referring now to the North-American Indians instead of the Mexicans or Peruvians, were adopted by Cotton Mather, Roger Williams, and even William Penn. S. Sewall also gave expression, in 1697, to the same views in a special publication.

Charles Beatty, in his "Journal of a Two-Months' Tour" (London, 1678), declared that he had found among the Delaware Indians traces of Israelitish origin; and J. Adair, in his "History of the American Indians" (London, 1775), devotes a considerable amount of attention to the same view, which he accepts. Adair was followed by Jonathan Edwards. A special work was written by E. Boudinot ("A Star in the West," Trenton, N. J., 1816); and he was followed by Ethan Smith in 1825, and by Israel Worsley ("View of the American Indians, Showing Them to Be Descendants of the Lost Tribes of Israel," London, 1828). Mordecai M. Noah accepted the Israelitish origin of the Indians (1837) in a pamphlet republished in Marryat's "Diary in America" (vol. ii.). J. B. Finlay claimed to have found traces among the Wyandottes in 1840, and the view was even considered by George Catlin in his "Manners . . . of the North American Indians" (London, 1841). Discoveries of alleged Hebrew tablets, as at Pittsfield, Mass., 1815, and Newark, Ohio, about 1860, have given fresh vigor to the theory. Altogether, with the exception of the Anglo-Israelite craze, a larger amount of literature has been written on this identification than on any other.

The Mormons.

It was doubtless owing to this belief in the identity of the Lost Ten Tribes with the American Indians that Joseph Smith was led to adopt a somewhat similar view in his celebrated "Book of Mormon." According to him, America was colonized by two sets of people—one being the Jaredites, who came over after the dispersion from the Tower of Babel; the other a group of sixteen, who came from Jerusalem about 600 B.C. Their chief families were destroyed about the fourth century B.C., and descendants of the remainder are the North-American Indians.

TRIBES, THE TWELVE: The individual tribes having been treated under their respective captions, it is proposed to discuss in the present article the theories concerning the nature, number, and origin of the tribes of Israel. The uncritical or precritical theory accepts as data of personal histories the Biblical accounts of the Patriarchs' lives. Accordingly, the tribes are regarded as having been formed in the main by the natural increase of the offspring of Jacob. The descendants of each of his sons are believed to have held together and thus constituted a social entity, though foreign wives and slaves were at times admitted and their offspring absorbed. The difficulties which have led to the rejection of this theory by most Biblical scholars are of a twofold nature. In the first place, such natural origin could by no means account for the numbers given in the Biblical books as the census of the various tribes. Anthropology furnishes no other example of a nation having arisen by natural descent from one ancestral family. In the second place, the study and comparison of the various (and only in one instance perfectly concordant) lists of the tribes, as preserved in the Biblical records, suggest that considerations other than the fact of common descent underlie the different groupings and discordant order of these tribal tables, and the common origin is thus shown to be only theoretical. The tribes are arranged in twenty different orders, only one of which (Num. ii., vii., x. 14-29) recurs.

The Lists.

Various principles are readily detected to be worked out in the tables. (1) A certain number of tribal lists (*e.g.*, those in Gen. xxix.-xxxv., xlvi., xlix.; Ex. i.; Num. i., ii., vii., x., xiii., xxvi.; I Chron. ii., xxvii.) trace descent from Jacob, but through his various wives and concubines, grouping those always together that have a common mother, thus: (*a*) tribes of Leah: Reuben, Simeon, Levi, Judah, Issachar, Zebulun; (*b*) tribes of Zilpah (Leah's slave): Gad, Asher; (*c*) tribes of Rachel: Joseph, Benjamin; (*d*) tribes of Bilhah (Rachel's slave): Dan and Naphtali. (2) Other lists are arranged according to geographical position (Num. xxxiv.; Deut. xxxiii.; Josh. xiii.; Judges v.; I Chron. ii. 3-viii.). (3) Tradition concerning both affinity and geographical position (Deut. xxvii.). But even here the relative importance of the tribes decides whether they are to receive a blessing or a curse. Ezekiel's list (Ezek. xlviii.) reflects the prophet's ideal conceptions. It is thus plain that the records do not give simple and indubitable facts, but disclose certain theories and reflect certain post-patriarchal conditions.

As anthropology presents no warrant for assuming that nations are formed through natural descent from one ancestor, so the process of a tribe's origin must be the reverse of that underlying the presentation of Biblical patriarchal tradition. Tribes result from combinations of various septs or clans. The tribe (Hebr. "maṭṭeh" or "shebeṭ") was a confederation of "mishpaḥot" (R. V. "families") and septs; and these again were composed of various households ("battim" or "batte abot"). Community of worship is the characteristic and constitutive element of this ascending and enlarging order of tribal society (comp. I Sam. xx. 6). The names of the tribes probably represent, therefore, former eponymous deities whose "sons"—even in a physical sense—the members of the tribe felt themselves to be. The tribal denominations therefore do not represent historical and personal progenitors, but mythical figures, former divinities, or heroes.

Modern View.

This is the theory now held by most of the modern scholars, modified by the recognition that many of the subclans' names point to localities—the numen of the place being believed to be the father of the inhabitants. This fact suggests a similar original meaning of the names of some of Jacob's sons (*e.g.*, Asher, Benjamin [the southern]); and it is evident that in the patriarchal cycles later history is projected into earlier centuries, so that tribal rankings as expressed in patriarchal family events correspond to subsequent historical relations. For example, Joseph and Judah typify two distinct lines of descent, Judah in all likelihood being a non-Israelitish mixed tribe. In the quarrels of Leah and Rachel are mirrored the struggles for the hegemony waged by these two sets of tribes.

That some of these tribes are descended through a concubine, the bondwoman of a legitimate wife, expresses the historical fact that they were deemed to be of less pure blood or of less importance than others, and were held to a certain extent in vassalage by the more powerful tribes. In like manner later territorial relations are worked out in the tribal genealogies, which accounts for the omission of some of the tribes (*e.g.*, Simeon and Levi) from the lists or from the blessings (Deut. xxxiii., for instance).

Historical Kernel.

The historical kernel involved in all the tribal catalogues and the patriarchal legends would appear to be this: In the Sinaitic Peninsula a number of pastoral tribes had for centuries been pasturing their flocks; and at times, when food was scarce, were driven to take refuge in Egypt, in the border district of which country some (*e.g.*, Joseph) of their number found settled habitations. These tribes were loosely conscious of their common religious affinity, regarding as their progenitor Israel, whose sons they were called ("Beni Israel"). This loose consciousness gave way to a deeper national sense of unity under Moses, though in the conquest of Palestine the tribes still acted without coherence. Judah seems to have stood aloof from the tribe of Joseph and its vassals, and to have joined its fortunes with theirs only after the Joseph group had finally gained a foothold across the Jordan. Geographical considerations after this replaced the traditional memories of relations that prevailed in the trans-Jordanic districts, Judah and Benjamin in the south gaining for a time the ascendency over Joseph in the north.

With the establishment of the kingdom and the later division of the realm the force of tribal association gradually waned. In fact, the premonarchical period of tribal dissensions and intertribal feuds had reduced many of the tribes to a state of weakness which resulted in their absorption by their stronger and more numerous neighbors. This process of tribal disintegration was accelerated by the Syrian and Assyrian wars leading up to deportation and exile, the "ten" tribes constituting the Northern Kingdom being "lost" through natural decimation in consequence of war and famine at home and through absorption by the "people of the land," the Syrians north of them and the colonists settled in their territory by the Assyrian conquerors.

The artificiality of the number twelve is apparent. The subdivisions of Joseph (Ephraim and Manasseh) intrude into the duodecimal notation, while, on the other hand, omissions as frequently reduce the number. Manasseh at times is treated as two, which again interferes with the theory. That twelve is a favorite conventional number, even in connection with non-Jacobean tribes, appears from Gen. xvii. 20; xxii. 20-24; xxv. 13-16; xxxvi. 15-19, 40-43. It probably is of mythological character, having some connection with the twelve months of the year and the twelve signs of the zodiac. According to B. Luther (in Stade's "Zeitschrift" [1901], xxi.), this number recalls the twelve departments into which Solomon divided the land of Israel, which division, however, attests the sacred nature of the number, twelve being used as a round figure. Other reckonings, as ten and eleven, are indicated in II Sam. xix. 43; I Kings xi. 31.

E. G. H.

TRIENNIAL CYCLE: A cycle of three years, in the course of which the whole Law is read on Sabbaths and festivals. This was the practise in Palestine, whereas in Babylonia the entire Pentateuch was read in the synagogue in the course of a single year (Meg. 29b). The modern practise follows the Babylonian; but as late as 1170 Benjamin of Tudela mentioned Egyptian congregations that took three years to read the Torah ("Itinerary," ed. Asher, p. 98). The reading of the Law in the synagogue can be traced to at least about the second century B.C., when the grandson of Sirach refers to it in his preface as an Egyptian practise; it must, therefore, have existed even earlier in Palestine. It has been suggested that the reading of the Law was due to a desire to controvert the views of the Samaritans with regard to the various festivals, for which reason arrangements were made to have the passages of the Pentateuch relating to those festivals read and expounded on the feast-days themselves.

The Masoretic divisions known as "sedarim" and variously indicated in the text, number 154 in the Pentateuch, and probably correspond, therefore, to the Sabbath lessons of the triennial system, as was first surmised by Rapoport ("Halikot Ḳedem," p. 11). The number varies, however, so that Menahem Me'iri reckoned 161 divisions, corresponding to the greatest number of Sabbaths possible in three years; the Yemen grammars and scrolls of the Pentateuch enumerate 167 (see Sidra); and the tractate Soferim (xvi. 10) gives the number as 175 (comp. Yer. Shab. i. 1). It is possible that this last division corresponds to a further development by which the whole of the Pentateuch was read twice in seven years, or once in three and a half years. The minimum seder for a Sabbath portion when seven persons are called up to the Law (see 'Aliyah) should consist of twenty-one verses, since no one should read less than three verses (Meg. iv. 4). Some sedarim have less than twenty-one verses, however, as, for example, Ex. xxx. 1-8.

Divisions and Beginning of the Cycle.

If the 154 sedarim are divided into three portions corresponding to the three years, the second would commence at Ex. xii. and the third at Num. vi. 22, a passage treating of the priestly blessing and the gifts of the twelve tribal chiefs after the erection of the Tabernacle. Tradition assumes that the events described in Num. vi. took place on the 1st of Nisan, and it would follow that Gen. i. and Ex. xi. would also be read on the first Sabbath of that month, while Deut. xxxiv., the last portion of the Pentateuch, would be read in Adar. Accordingly, it is found that the death of Moses is traditionally assigned to the 7th of Adar, about which date Deut. xxxiv. would be read.

A. Büchler has restored the order of the sedarim on the assumption that the reading of the Law was commenced on the 1st of Nisan and continued for three years, and he has found that Genesis would be begun on the 1st of Nisan, Deuteronomy on the 1st of Elul, Leviticus on the 1st of Tishri, and Exodus and Numbers on the 15th of Shebaṭ, the four New-Years given in the Mishnah (R. H. i. 1). Nisan has always been regarded as the ecclesiastical New-Year. This arrangement would account for many traditions giving definite dates to Pentateuchal occurrences, the dates being, strictly speaking, those of the Sabbaths on which the lessons recording the occurrences are read. Thus, it is declared that the exodus from Egypt took place on Thursday, the 15th of Nisan ("Seder 'Olam," x.), and the passage relating to the Exodus was read on that day. The slaying of the Passover lamb is said to have occurred on the 10th of Nisan, and is described in Ex. xii. 21, the passage read in the triennial cycle on the second Sabbath of Nisan, which would be the 10th where the 15th fell on Thursday. This likewise explains the tradition that the Israelites encamped at Rameses on a Sabbath, the 17th of Nisan, on which Ex. xii. 37 would be read in the triennial cycle. The tradition that Rachel was remembered on New-Year's Day (R. H. 10b) is due to the fact that in the first year of the cycle the sidra Gen. xxx. 22, beginning, "And God remembered Rachel," would be read on Rosh ha-Shanah. As the reading of Deut. xxxiv. would occur on the 7th of Adar, there would be four remaining Sabbaths to be filled in before the new triennial cycle, which began with Nisan. Four special Sabbaths, Sheḳalim, Zakor, Parah, and Ha-

Ḥodesh, still occur in Adar. Including these and the festival parashiyyot, and possibly also the special sedarim for Ḥanukkah and Purim, eleven extra divisions would be obtained, making up the 166 or 167 of the Yemen Bible.

Connections Between Readings and Festivals.

The triennial cycle seems to have been established in New Testament times. John vi. 4 contains an allusion to the Passover, and vii. 2 to the Feast of Tabernacles, while in vi. 59, between the two, reference is made to a sermon on the manna delivered in the synagogue at Capernaum. This would be appropriate for a discourse on the text for the first or eighth of the month Iyyar (*i.e.*, between Passover and Tabernacles), which, in the triennial cycle, dealt with Ex. vi. 1-xvii. 1, where the account of the manna is given. So, too, at the season of Pentecost the cycle of readings in the first year would reach Gen. xi., which deals with the story of Babel and the confusion of tongues, so that in Acts ii. Pentecost is associated with the gift of the spirit which led to a confusion of tongues. Similarly, the Decalogue was read on Pentecost in the second year of the cycle, whence came, according to Büchler, the traditional association of the giving of the Law with Pentecost. Ex. xxxiv., which contains a second Decalogue, is accordingly read on the 29th of Ab, or 80 days after Pentecost, allowing exactly forty days before and after the sin of the golden calf. So too Deut. v., containing a third Decalogue, began on the same day, the 29th of Ab. The above diagram shows the arrangement and the connection of the various dates with the successive sedarim, the three concentric rings showing the three cycles, and the twelve radii separating the months of the Jewish year indicated in the inner circle.

Diagram Showing Arrangement of Readings from the Law During the Triennial Cycle. The Readings are Represented by Concentric Circles; Hebrew Months are Indicated by Radii.

(From the "Journal of Theological Studies.")

The Triennial Cycle of the Psalms.

In addition to this division of the Pentateuch into a triennial reading, E. G. King has proposed an arrangement of the Psalms on the same system, thus accounting for their lection in a triennial cycle which varied between 147 and 150 Sabbaths; and he also shows the agreement of the five divisions or books of the Psalms, now fixed by the doxologies, with the five divisions of the Pentateuch, the first and third books of both the Psalter and the Pentateuch ending in the month Shebaṭ. Ps. lxxii. 19 would be read on the same day as Ex. xl. 34, the two passages throwing light on each other. The Asaph Psalms (lxxiii.-lxxxiii.) would begin, on this principle, on the Feast of "Asif" in the seventh month, just when, in the first year of the Pentateuchal cycle, Gen. xxx. *et seq.* would be read, dealing with the birth of Joseph, whose name is there derived from the root "asaf." A still more remarkable coincidence is the fact that Ps. c. would come just at the time in Adar when, according to tradition, the death of Moses occurred, and when Deut. xxxiii. would be read; hence, it is suggested, originated the heading of Ps. xc., "A prayer of Moses, the man of God." The Pilgrim Psalms (cxx.-cxxxiv.) would be read, in this system, during the fifteen Sabbaths from the 1st of Elul to Ḥanukkah, the very time when a constant procession of pilgrims was bringing the first-fruits to the Temple. Many other associations of appropriate Psalms with the festivals which they illustrate have been pointed out.

Besides these examples Büchler gives the following sections of the Pentateuch read on various Sabbaths in the different years of the cycle, basing his identification on certain haggadic associations of the Sabbaths with the events to which they refer. In the first year the four sedarim of Nisan appear to be Gen. i. 1-ii. 3, ii. 4-iii. 21, iii. 22-iv. 26, and v. 1-vi. 8. The second Sabbath of Iyyar was probably devoted to Gen. vi. 9-vii. 24 (comp. vii. 1). In the second year the readings on the Sabbaths of Nisan deal with Ex. xii., xiii., xiv., and xv., ch. xiv. concurring with the Passover; and it is for this reason that the Haggadah states that Adam taught his sons to bring a Passover offering, since the passage Gen. iii. was read during the Passover week in the cycle of the first year. In Iyyar of the second year the readings included Ex. xvi. 1, xxviii., xvii. 1, xviii. 1, and xix. 6, there being usually five Sabbaths in that month. Two of the portions for Siwan are also identified as Ex. xx. 1, xxii. 4; at the end of Elul Lev. i. was read; while on the first days of Tishri *ib.* iv. 1, v. 1, and vi. 12 were the readings, and on the 10th (Yom Kippur) *ib.* viii. 1 and x. 7.

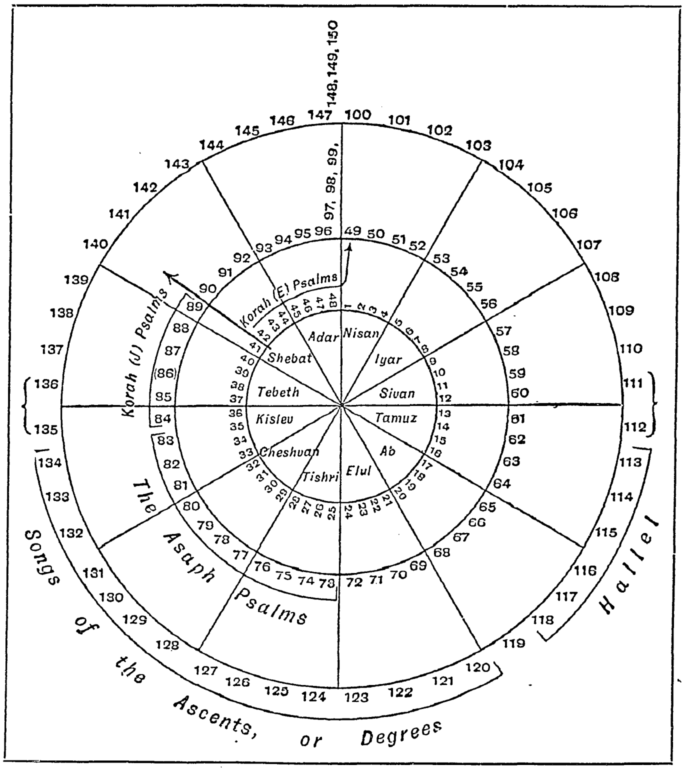

Diagram Showing Arrangement of Readings from the Psalms During the Triennial Cycle. The Psalms are Represented by Concentric Circles; Hebrew Months are Indicated by Radii.

(From the "Journal of Theological Studies.")

In the third cycle, besides the account of the death of Moses already referred to as being read on the 7th of Adar, or the 7th of Shebaṭ, in Nisan the four pericopes were Num. vi. 22, vi. 48, viii. 1, and ix. 1, while the third Sabbath of Iyyar was devoted to the reading of Num. xv. 1, and the 3d of Ab to that of *ib.* xxxvi. Some of these passages were retained for the festival readings, even after the annual cycle had been introduced.

Hafṭarot.

Besides the readings from the Law the readings from the Prophets were also arranged in a triennial cycle. These appear to have been originally a few selected verses intended to strengthen the passage from the Law read previously, and so connect it with the following discourse of the preacher, which took for its text the last verse of the hafṭarah. Thus there is evidence that Isa. lii. 3–5 was at one time regarded as a complete hafṭarah to Gen. xxxix. 1. Even one-verse hafṭarot are known, as Ezek. xlv. 17 and Isa. lxvi. 23, read on New Moons. A list of the earlier hafṭarot suitable for the festivals is given in Meg. 31a. Evidence of two hafṭarot for one festival is shown in the case of Passover, for which Josh. v. 10 and Josh. iii. are mentioned. This can easily be explained by the existence of a triennial cycle, especially as Num. ix. 2–3 was the reading for the first day of Passover, and corresponds exactly to Josh. v. 20. In the case of the New-Year it has been possible to determine the hafṭarot for the three cycles: I Sam. ii. 21, Jer. xxxi. 19, and, for the third year, Joel ii. 1, corresponding to the reading Deut. v., which formed the Pentateuchal lesson. For Ḥanukkah, the Torah seder of which treats of lamps (Num. viii. 1–2), the hafṭarot Zech. iv. 2 and I Kings vii. 49 were selected as being suitable passages. A third hafṭarah is also found (I Kings xviii. 31), completing the triennial arrangement.

The Karaites adopted some of the triennial hafṭarot in their reading of the Law. The hafṭarot of the first year of the cycle can often be identified by this fact. Of the twenty-nine sedarim of the Book of Exodus eighteen were taken from Isaiah, three from Jeremiah, four from the Minor Prophets, three from the historical works, and one from Ezekiel, whose words, for some reason, seem on the whole to have been eschewed by those who selected the prophetic readings. A certain confusion seems to have arisen among the hafṭarot, owing to the fact that among some congregations the reading of the Pentateuchal portions was begun on the 1st of Elul (also regarded as a New-Year).

In the Masoretic text of the Prophets occur a number of divisions marked as sedarim which correspond to smaller divisions in the Torah. Among these may be mentioned:

I Kings vi. 11–13	corresponding	to	Ex. xxv.
Ezek. xii. 20	"	"	Lev. xxvi. 3 or 4?
I Sam. vi. 14	"	"	Num. iv. 17
Josh. xvii. 4	"	"	Num. xxvi. 52
Jer. ix. 22–24	"	"	Deut. viii.
II Kings xiii. 23	"	"	Deut. x.
Judges ii. 7	"	"	Deut. xxxi. 14

The present arrangement of hafṭarot seems to have been introduced into Babylonia by Rab, especially

those for the three Sabbaths of repentance preceding the Ninth of Ab, and the three consolatory ones succeeding it. Büchler has traced the prophetic portions of these three latter Sabbaths for each of the three years of the cycle as follows:

I. Isa. xl. 1, li. 12, liv. 11.
II. Isa. xlix. 14, lx. 1, lxi. 10.
III. Isa. liv. 1, Zech. ii. 14, ix. 9.

He finds traces of the triennial cycle also in the prophetic portions for the four supplementary Sabbaths, Sheḳalim, Zakor, Parah, and Ḥodesh. For Sheḳalim hafṭarot are found from (*a*) II Kings xii., (*b*) Ezek. xlv. onward (among the Karaites), and (*c*) I Kings iv. 20 onward. It is tolerably clear that these were the hafṭarot of the three different years of the cycle when that particular Sabbath came round. It is possible that when the arrangement of the calendar and of the reading of the Law was first made these four supplementary Sabbaths were intended to fill out the time between the 7th of Adar, when the account of the death of Moses in Deut. xxxiv. was read, and the first Sabbath in Nisan, when the cycle began. Traces of the cycle are also found in the hafṭarot for the festivals. Thus, on the first day of Passover, Ex. xii. 29 was read, approximately in its due place in the cycle in the second year; and corresponding to this Josh. v. 10 was read in the Prophets, whereas there are also traces of Num. ix. 22 being read on that day, as would occur in the third year of the cycle, when Josh. iii. was read as the hafṭarah. The passage for the second day of Passover, Num. ix. 1 *et seq.*, which was introduced by the Babylonians, has attached to it II Kings xxiii. 21 as the hafṭarah, and would correspond to the section in the first year's cycle. On Pentecost, Ex. xix. was read in the second year, while Gen. xi. 15 was read for the first year of the cycle. So, too, on New-Year, Gen. xxx. 22 was read in the first year, Lev. iv. in the second, and Deut. v. in the third, the corresponding hafṭarot being Jer. xxxi. 19, I Sam. ii., and Joel ii. For the Sukkot of the first year for the sidra of Gen. xxxii., the hafṭarah was Zech. xiv. 16-19; for that of the second year, Lev. ix. 10, the hafṭarah was I Kings viii. 8; and for that of the third year, Deut. viii. 9, the hafṭarah was Isa. iv. 6 (among the Karaites).

In the accompanying diagram the sidrot of the Law for the Sabbaths of the three years of the cycle are indicated, as well as the hafṭarot which accompany them. Sometimes these have alternatives, and in several cases, as for Gen. xl. 23, xliii. 14, Ex. i. 1, xxvii. 20, and Lev. xix. 1, three hafṭarot are given for the sidra, pointing in all probability to the hafṭarot reading during the triennial cycle. In this enlarged form the connection of the beginning of the reading of the books with the various sacred New-Years, those of Nisan, of Elul (for tithes), and of Shebaṭ (for trees), comes out most clearly and convincingly. The manner in which the present-day reading of the Law and the Prophets has been derived from the triennial cycle is shown clearly by the diagram. It would appear that at the beginning of the cycle all the sidrot of the month were read together; but this was soon given up, as obviously it would result in the whole of the Law being read in three-quarters of a year or less.

There are indications of the application of the triennial cycle to the Psalms also. The Aggadat Bereshit treats twenty-eight sedarim of Genesis uniformly in three sections, one devoted to a passage in Genesis, the next to a corresponding prophetic passage (hafṭarah), and the third to a passage from the Psalms, generally cognate with either the Law or the Prophets. It may be added that in Luke xxiv. 44 a threefold division is made of "the Law of Moses and the Prophets and the Psalms."

The transition from the triennial to the annual reading of the Law and the transference of the beginning of the cycle to the month of Tishri are attributed by Büchler to the influence of Rab, and may have been due to the smallness of the sedarim under the old system, and to the fact that people were thus reminded of the chief festivals only once in three years. It was then arranged that Deut. xxviii. should fall before the New-Year, and that the beginning of the cycle should come immediately after the Feast of Tabernacles. This arrangement has been retained by the Karaites and by modern congregations, leaving only slight traces of the triennial cycle in the four special Sabbaths and in some of the passages read upon the festivals, which are frequently sections of the triennial cycle, and not of the annual one. It would further be of interest to consult the earlier lectionaries of the Church (which has borrowed its first and second lessons from the Jewish custom) to see how far they agree with the results already obtained for the triennial cycle. The Church father Chrysostom about 175 C.E. declared that it was customary to begin reading from Genesis during Lent, that is, in Nisan, thus showing that to the end of the second century the Church followed the Synagogue in commencing the reading of the Law at the beginning of the Jewish ecclesiastical New-Year. See also PARASHIYYOT; SIDRA.

J.

TRIER, ERNST JOHANNES: Danish educator; born in Copenhagen Jan. 23, 1837; died at Vallekilde Dec. 29, 1893. He was graduated from the University of Copenhagen (B.D. 1863), officiated for some time as teacher at Blaagaards Seminary, and took part in the war with Germany (1864). In 1865 he became an ardent adherent of Grundtvig, at whose initiative he founded (1866) at Vallekilde a high school which soon grew to be the foremost school of its kind in Denmark. It offers not only the ordinary high-school curriculum of studies, but also courses in navigation and in various branches of trade. It was the first Danish school in which the Swedish system of gymnastics was introduced.

Of Trier's memoirs, entitled "Fem og Tyve Aars Skolevirksomhed i Vallekilde," only two volumes appeared (Copenhagen, 1890, 1894), his untimely death—brought on by overstudy—preventing him from completing the work. Trier was a convert to Christianity.

S. F. C.

TRIER, FREDERIK JACOB: Danish physician; born in Copenhagen June 14, 1831; died there May 17, 1898. He studied at the Metropolitan School and at the University of Copenhagen (M.D. 1860). In the following year he published several clinical essays (of which "Ulcus Duodeni" was the most noteworthy), and became editor of "Ugeskrift for Læger," a medical journal, a position which he held until 1874. He was also for some years coeditor of "Nordisk Medicinsk Arkiv," to which he contributed valuable medical papers. In 1881 his alma mater conferred upon him the title of professor. From 1874 till his death Trier was resident physician of the clinical division of the Communal Hospital of Copenhagen, and he was president of the medical section of the International Congress of Physicians, held at Copenhagen in 1884. He was a member of the medical board of revisers of the "Pharmacopea Danica" (1889).

S. F. C.

TRIER, HERMAN: Danish educator, writer, and politician; born in Copenhagen May 10, 1845. He received his early education at the Von Westenske Institut, later attending the University of Copenhagen, where he studied jurisprudence for a few years. In 1864 he took up the study of pedagogics, in which field he has won international fame. In 1876 Trier began publishing a series of "Kultur-Historiske Personligheder," containing biographies and character studies of different authors. In the same year appeared his first work on pedagogics, "Pædagogikken som Videnskab," which endeavored to establish for pedagogics a place among the abstract sciences.

Since 1879 Trier, together with School-Inspector P. Voss of Christiania, has published "Vor Ungdom," a periodical devoted to pedagogics. From 1892 to 1893 he published "Pædagogiske Tids- og Stridsspörgsmaal," and in 1901 a valuable addition to the knowledge of the medieval history of Copenhagen, entitled "Gaarden No. 8 Amagertorv." In 1884 he was elected a member of the Danish Folkething (House of Commons) for the first district of Copenhagen, and in 1898 he became a member of the board of aldermen of that city.

S. F. C.

TRIER, SALOMON MEYER: Danish pharmacist; born in Copenhagen in 1804; died there in Dec., 1888. He was graduated from the Copenhagen College of Pharmacy in 1826, and was from 1830 to 1856 the owner of a pharmacy in Lyngby, Zealand. From 1844 to 1866 Trier published "Archiv for Pharmacy," and in 1868 he assisted in compiling the "Pharmacopea Danica," which is still in use in Denmark and Norway.

S. F. C.

TRIER, SELIGMANN MEYER: Danish physician; born in Copenhagen June 7, 1800; died there Dec. 20, 1863. He was the son of poor parents, who destined him for a mercantile career. His unusual brightness, however, attracted the attention of the family's physician, Professor Herholdt, who took an interest in him and sent him to the University of Copenhagen, where he studied medicine. He graduated in 1823, and in 1825 was appointed physician for the Jewish poor, and shortly after assistant physician at the Royal Frederik's Hospital in Copenhagen. In 1827 he obtained the degree of doctor of medicine from his alma mater. In 1828 Trier's attention was called to the French physician Laënnec's great discoveries in the field of pathological anatomy, and to his invention of the stethoscope for examination of the thorax. Trier devoted some time to the intimate study of these discoveries, and published in 1830 his "Anvisning til at Kjende Lunge og Hjærtesygdomme ved Perkussion og Middelbar Avskultation." This work was translated into Swedish (Stockholm, 1831) by Elliot, and it was for a long time the only authentic Danish manual on stethoscopy. From 1831 to 1832 Trier was coeditor of "Samlinger til Kundskab om Kolera," an instructive work on the symptoms and treatment of Asiatic cholera. In 1836 he was appointed a member of the Copenhagen board of health, an appointment which, on account of his religion, caused a great deal of comment. In 1842, on the death of Prof. O. Bang, Trier became physician-in-chief of the Royal Frederik's Hospital, a position he held for eighteen years. From 1848 to 1853 he assisted in the publication of "Hospitals-Meddelelser," a medical journal of prominence. In 1847 his alma mater conferred upon him the title of professor, and in 1857 King Frederick VII. honored him with the title of "Etatsraad." Trier was a member of the board of revisers of the "Pharmacopea Danica" (1863).

S. F. C.

TRIESCH: City in Moravia. Its Jewish congregation was most probably founded by exiles from IGLAU shortly after 1426. In the latter city the Jews of Triesch transacted their business during the day, spending the night beyond the city limits, and returning home for the Sabbath. They dealt chiefly in wool, which they sold to the cloth-makers in Iglau. Joseph ben Moses, a disciple of Israel Isserlein of Marburg, mentions in his "Leḳeṭ Yosher" (ed. J. Freimann, Berlin, 1904) a rabbinical scholar named Isaac of Triesch (1469). It may be, too, that Isaac of טרישט, mentioned in the letter of JONATHAN LEVI ZION to the congregation of Frankfort-on-the-Main (1509) as having assisted him in his efforts to obtain from Emperor Maximilian the repeal of the confiscation of Hebrew books (see PFEFFERKORN), was from Triesch, which the Jews called "Trieschet" or "Tritsch," and not from Triest ("Monatsschrift," 1900, p. 125). The grant of freedom of residence to the Jews of Austria in 1848 reduced the congregation of Triesch considerably; and the national fanaticism of the Czech population deprived the Triesch Jews of their former position in the commercial life of the town. On the other hand, Jews became prominent manufacturers of cloth, furniture, and matches.

Of the rabbis of the city the following are known: Mordecai Bet ha-Levi, a prolific cabalistic author whose numerous manuscripts were destroyed in the great conflagration of 1824. He composed for the

Seventh of Adar a special service which is still in use. Eleazar Löw, author of "Shemen Roḳeaḥ," was rabbi in Triesch about 1800 to 1810 and, after having officiated meanwhile at Ronsperg, again from 1812 to 1820. He was a prolific author, and took an active part in the controversy on the Hamburg Tempel. Before his second term of office Moses SCHREIBER urged the candidacy of his own father-in-law, Akiba EGER. Löw was succeeded by Moses Friedenthal, Joseph Frankfurter, B. Friedmann (later in GRÄTZ), and Dr. M. L. Stern, the present (1905) incumbent, who has held office since 1885. Moses Joseph SPIRO was a native of Triesch.

The congregation of Battelau belongs to the district of Triesch. The Jews of Triesch number about 300 in a total population of 5,000. The congregation has numerous well-endowed foundations.

D. M. L. S.

TRIESCH, FRIEDRICH GUSTAV (pseudonyms, **Alex Hartmann, Paul Richter, H. Martin**): Austrian dramatist; born at Vienna June 16, 1845. Triesch studied sculpture for a time at the Akademie der Bildenden Künste, Vienna, but soon turned to literature. Lack of means forced him to follow mercantile pursuits for a short period, but the success of his second piece, the farce "Lachende Erben" (1867), caused him to devote all his time to playwriting. In 1868, in the prize competition of the Hofburgtheater, Vienna, he obtained honorable mention and a production for his comedy "Im XIX. Jahrhundert," and in 1877 two of his plays, "Höhere Gesichtspunkte" and "Die Wochenchronik," were similarly honored. In 1879 his comedy "Neue Verträge" won the first prize offered by the Munich Hoftheater; and in 1892 his drama "Ottilie" won the first prize in the competition instituted by the Litterarisches Vermittlungsbureau of Hamburg, there being 383 competitors.

Triesch is also the author of numerous poems and short stories and of the following plays: "Amalie Welden," comedy, 1865; "Mädchenherzen," drama, 1873; "Träume Sind Schäume," comedy, 1873; "Vorsicht," comedy, 1876; "Reine Liebe," comedy, 1877; "Anwalt," drama, 1881; "Hexenmeister," comedy, 1884; "Nixe," comedy, 1887; "Hand in Hand," 1890; "Factotum Flitsch," farce, 1892; "Liquidator," farce, 1896; "Ihr System," farce, 1898; "Endlich Allein," comedy, 1900.

S. E. Ms.

TRIEST: A commercial city and an important seaport, situated at the head of the Adriatic; ethnographically Italian, but politically Austrian. Although no consecutive history of the Jews of Triest has ever been written, much information concerning them may be gleaned from unpublished documents preserved in the municipal records. The city was originally an insignificant town, and first gained importance after it placed itself under Austrian control in 1382. Even before that time, however, a small colony of Jews had settled there, and one of them, the city banker, was permitted to reside in the great square of the city. It appears, moreover, that certain banking establishments existed at Triest under the management of Jews from various parts of Italy, although the earliest Jewish inhabitants of the city seem to have been Germans, since the Ashkenazic ritual was adopted in the first synagogue. This building was situated in the most ancient portion of the ghetto at the head of the Via dei Capitelli, where the structure traditionally regarded as the synagogue was still in existence thirty years ago. Strictly speaking, however, it has been many years since there has been a ghetto at Triest, as the Jews have always enjoyed exceptional favor there, being allowed to live in any part of the city and being exempt from wearing the BADGE. With the growth of Triest the center of the Jewish quarter changed to what is now the Piazza delle Scuole Ebraiche, where an Ashkenazic synagogue was erected. This edifice, together with all the ancient records, was destroyed in a conflagration, and was subsequently rebuilt. A new synagogue, with the German ritual, was erected about 1787 to meet the requirements of the rapid growth of the community. This building, a magnificent structure for its time, is still standing. The first floor is now used as a synagogue by the Jews who have immigrated to Triest from Dalmatia and the East; they adopt the Sephardic ritual. A number of years later a synagogue was built especially for the Sephardim in a central part of the city on the site of an ancient cemetery in the Via del Monte, near the Talmud Torah (to which is annexed a Jewish public school) and the Jewish hospital. The oldest gravestones in this cemetery are between 140 and 150 years old, showing that the Jews must formerly have possessed another burial-place. A new cemetery, recently enlarged, was opened about seventy-five years ago on a site allotted by the municipal government at some distance from the city and in the vicinity of the other cemeteries. Triest likewise has an orphan asylum, a convalescent home for aged invalids, and many charitable societies, the principal one being the wealthy Fraternità della Misericordia, while the Beneficenza Israelitica also disburses large sums of money. The community has recently acquired a site for a new temple, the plans for which are already in process of preparation.

Institutions.

The Jewish population of Triest has recently been increased by a large number of German and Hungarian families, attracted thither by commercial interests. Among the noted Jewish families of the city are the Parentes, Morpurgos, Hirschels, Salems, and Minerbis. Aaron Parente was president of the chamber of commerce of Triest, and was succeeded by his son Solomon, while Baron Elio Morpurgo and his son Mario have been presidents of the Austrian Lloyd. Caliman de Minerbi has been vice-podestà, and the Hirschel family was received at court at a time when the Jews of other cities were persecuted and despised. At present Jews control the principal banks and commercial institutions and the chief insurance companies. The rabbinate of Triest has recently included such noted men as Formiggini, Levi, Treves, Castiglione, and Marco Tedeschi. The city ranks high in the history of Jewish literature as the birthplace of Samuel David Luzzatto and his cousin, the poetess Rahel Morpurgo; of Giuseppe Lazzaro Morpurgo, an economist and Hebrew poet; of Saul Formiggini, who translated Dante's "Inferno" into Hebrew; of Samuel Vita Zelman, poet and author of the "Yelid Kinnor"; of Moses Tedeschi, rabbi and author of "Ho'il Mosheh" (a commentary on the entire Bible), of a dictionary of synonyms, and of other works; and of Aaron Romanini and Vittorio Castiglione, Hebrew poets of high reputation, the latter being also the author of a number of literary, philosophical, and pedagogic works in Hebrew and Italian, and the present chief rabbi of Rome. The population of Triest is now (1905) 180,000, including 5,000 Jews.

S. V. C.

TRIESTE, GABRIEL: Italian merchant and philanthropist; born Dec. 24, 1784; died at Padua March 9, 1860. He was president of the Jewish community in Padua. Of his many benevolent foundations two call for special mention; viz., that of 24,000 Austrian lire for the promotion of art among young Jewish artists, and his prize of 1,000 gulden, in 1850, for the publication of a history of the Jews. Trieste translated Troki's "Ḥizzuḳ Emunah."

S.

TRILLINGER, ELIEZER BEN JOSEPH YOSPA (called also **Eliezer Nin of Nikolsburg**): Austrian rabbi; lived in the latter half of the seventeenth and at the beginning of the eighteenth century; died at Wilna. The name "Trillinger" is probably derived from "Wassertrüdingen," called by the Jews "Wassertrilling" or "Trilling." Trillinger was active in several congregations. At an advanced age he set out for Palestine, but on his way he fell ill at Wilna and, as stated above, died there. He was the author of "Mishnat Rabbi Eli'ezer," derashot on the Pentateuch, published by his son Joseph Yospa at Frankfort-on-the-Oder in 1707 (not 1717, as erroneously stated by some bibliographical authors).

D. S. MAN.

TRINITY: The fundamental dogma of Christianity; the concept of the union in one God of Father, Son, and Holy Spirit as three infinite persons. It was the Nicene Council and even more especially the Athanasian Creed that first gave the dogma its definite formulation: "And the Catholick Faith is this: That we worship one God in Trinity, and Trinity in Unity; Neither confounding the Persons; nor dividing the Substance." Equalization of the Son with the Father marks an innovation in the Pauline theology: "Yet to us there is one God, the Father, of whom are all things, and we unto him; and one Lord, Jesus Christ, through whom are all things, and we through him" (I Cor. viii. 6, R. V.), while in another passage the Holy Ghost is added (*ib.* xii. 3; comp. Titus ii. 13), thus rapidly developing the concept of the Trinity (II Cor. xiii. 14). Although the Judæo-Christian sect of the EBIONITES protested against this apotheosis of Jesus ("Clementine Homilies," xvi. 15), the great mass of Gentile Christians accepted it.

The Holy Ghost.

The Holy Ghost as the third person of the Trinity could originate only on Gentile soil, since it was based on a linguistic error. The "Gospel According to the Hebrews," which was once held in high esteem, especially in Ebionitic circles, still regards the term "mother" as equivalent to "Holy Ghost" (Origen, Commentary on John ii. 12; see Preuschen, "Antilegomena," p. 4, Giessen, 1901; Hennecke, "Neutestamentliche Apokryphen," p. 19, Tübingen, 1904), since in Aramaic, the language of this Gospel and possibly the original dialect of all the Gospels, the noun "ruḥa" (spirit) is feminine (comp. the Gnostic statement *ἐντεῦθεν πάλιν ἀναδεχθῆναι μητέρα καὶ υἱόν*; Irenæus, "Adversus Hæreses," i. 271). The OPHITES, furthermore, actually taught a trinity of father, son, and mother (Hilgenfeld, "Ketzergeschichte," p. 255); and the fact that the Church father Hippolytus found among the Ophites the Assyrian doctrine of the trinity of the soul (Hilgenfeld, *l.c.* p. 259) justifies the assumption of a kinship of the dogma of the Trinity with older concepts. The MANDÆANS also believe ruḥa to be the mother of the Messiah, though they regard them both as demons (Brandt, "Die Mandäische Religion," p. 124, Leipsic, 1889). The original trinity must, therefore, have included a feminine being, since thus alone could the concept of ruḥa have been obtained, and only after this form of trinity had been accepted in Judæo-Christian circles could the Greek *τὸ πνεῦμα* be regarded as a person, although it then became masculine instead of feminine. Philo's doctrine of the Logos is connected with this belief. God, who created His son in His own image (Gen. ii. 7), thereby made Himself triform, so that He Himself and the biform first Adam (= Logos = Jesus) constituted the first trinity.

Jewish Objections.

The controversies between the Christians and the Jews concerning the Trinity centered for the most part about the problem whether the writers of the Old Testament bore witness to it or not, the Jews naturally rejecting every proof brought forward by their opponents. The latter based their arguments on the Trisagion in Isa. vi. 3, a proof which had been frequently offered since Eusebius and Gregory of Nazianzus. The convert Jacob Perez of Valentia (d. 1491) even found an allusion to the Trinity in the word "Elohim," and Luther saw distinct traces of the doctrine in Gen. i. 1, 26; iii. 21; xi. 7, 8, 9; Num. vi. 22; II Sam. xxiii. 2; and Dan. vii. 13. The Jewish polemics against this doctrine date almost from its very conception. Even in the Talmud, R. Simlai (3d cent.) declared, in refutation of the "heretics," "The three words 'El,' 'Elohim,' and 'YHWH' (Josh. xxii. 22) connote one and the same person, as one might say, 'King, Emperor, Augustus'" (Yer. Ber. ix. 12d), while elsewhere he substitutes the phrase "as if one should say, 'master, builder, and architect'" (*ib.* 13a). There are, however, no other allusions to the Trinity in Talmudic literature, as has been rightly pointed out by Herford ("Christianity in Talmud and Midrash," p. 395, London, 1903), since the polemics of the rabbis of that period were directed chiefly against dualism (שתי רשויות). Another polemic, which is noteworthy for its antiquity and its protagonists, was the disputation between Pope Sylvester I. (314–335) and the Jew Noah (Migne, "Patrologia Græca," viii. 814).

In the Middle Ages the nature of the Trinity was discussed in every one of the numerous disputations between Christians and Jews, the polemic of Abraham Roman (in his "Sela' ha-Maḥaloḳet," printed in the "Milḥemet Ḥobah," Constantinople, 1710) being especially bitter; while in his well-known disputation Naḥmanides wrote as follows:

> "Fra Pablo asked me in Gerona whether I believed in the Trinity [שלוש]. I said to him, 'What is the Trinity? Do three great human bodies constitute the Divinity?' 'No!' 'Or are there three ethereal bodies, such as the souls, or are there three angels?' 'No!' 'Or is an object composed of three kinds of matter, as bodies are composed of the four elements?' 'No!' 'What then is the Trinity?' He said: 'Wisdom, will, and power' [comp. the definition of Thomas Aquinas cited above]. Then I said: 'I also acknowledge that God is wise and not foolish, that He has a will unchangeable, and that He is mighty and not weak. But the term "Trinity" is decidedly erroneous; for wisdom is not accidental in the Creator, since He and His wisdom are one, He and His will are one, He and His power are one, so that wisdom, will, and power are one. Moreover, even were these things accidental in Him, that which is called God would not be three beings, but one being with these three accidental attributes.' Our lord the king here quoted an analogy which the erring ones had taught him, saying that there are also three things in wine, namely, color, taste, and bouquet, yet it is still one thing. This is a decided error; for the redness, the taste, and the bouquet of the wine are distinct essences, each of them potentially self-existent; for there are red, white, and other colors, and the same statement holds true with regard to taste and bouquet. The redness, the taste, and the bouquet, moreover, are not the wine itself, but the thing which fills the vessel, and which is, therefore, a body with the three accidents. Following this course of argument, there would be four, since the enumeration should include God, His wisdom, His will, and His power, and these are four. You would even have to speak of five things; for He lives, and His life is a part of Him just as much as His wisdom. Thus the definition of God would be 'living, wise, endowed with will, and mighty'; the Divinity would therefore be fivefold in nature. All this, however, is an evident error. Then Fra Pablo arose and said that he believed in the unity, which, none the less, included the Trinity, although this was an exceedingly deep mystery, which even the angels and the princes of heaven could not comprehend. I arose and said: 'It is evident that a person does not believe what he does not know: therefore the angels do not believe in the Trinity.' His colleagues then bade him be silent" ("Milḥemet Ḥobah," p. 13a).

The boldness of the Christian exegetes, who converted even the "Shema'," the solemn confession of the Divine Unity, into a proof of the Trinity (Maimonides, in "Teḥiyyat ha-Metim," beginning), furnishes an explanation of the bitterness of the Jewish apologists. Joseph Ḳimḥi assailed the doctrine of the Trinity first of all ("Milḥemet Ḥobah," p. 19a), refuting with weighty arguments the favorite proof based on Gen. xviii. 1–2, where Yhwh is described as first appearing alone to Abraham, who later beholds two persons (comp. Abraham ibn Ezra's commentary, *ad loc.*). Simeon ben Ẓemaḥ Duran, who also refuted the Trinitarian proofs, added: "The dogma itself is manifestly false, as I have shown by philosophic deduction; and my present statements are made only with reference to their [the Christians'] assertions, while the monk Nestor accepted Judaism for the very reason that he had refuted them" ("Milḥemet Ḥobah," p. 48b). Noteworthy among modern polemics against the Trinity is Joshua Segre's critique ("Zeit. für Hebr. Bibl." viii. 22).

In the Zohar.

The Cabala, on the other hand, especially the Zohar, its fundamental work, was far less hostile to the dogma of the Trinity, since by its speculations regarding the father, the son, and the spirit it evolved a new trinity, and thus became dangerous to Judaism. Such terms as "matronita," "body," "spirit," occur frequently (*e.g.*, "Tazria'," ed. Polna, iii. 43b); so that Christians and converts like Knorr von Rosenroth, Reuchlin, and Rittangel found in the Zohar a confirmation of Christianity and especially of the dogma of the Trinity (Jellinek, "Die Kabbala," p. 250, Leipsic, 1844 [transl. of Franck's "La Kabbale," Paris, 1843]). Reuchlin sought on the basis of the Cabala the words "Father, Son, and Holy Ghost" in the second word of the Pentateuch, as well as in Ps. cxviii. 22 (*ib.* p. 10), while Johann Kemper, a convert, left in manuscript a work entitled "Maṭṭeh Mosheh," which treats in its third section of the harmony of the Zohar with the doctrine of the Trinity (Zettersteen, "Verzeichniss der Hebräischen und Aramäischen Handschriften zu Upsala," p. 16, Lund, 1900). The study of the Cabala led the Frankists to adopt Christianity; but the Jews have always regarded the doctrine of the Trinity as one irreconcilable with the spirit of the Jewish religion and with monotheism. See Christianity in Its Relation to Judaism; Polemics.

K. S. Kr.

TRINQUETAILLE (Hebrew, טרנקאטאלייש or טרנקטלייש): Suburb of Arles, France, on the right bank of the Rhone. Its Jewish community was of much importance in the Middle Ages. Favorably received by the lords of Baux, the Jews lived peacefully at Trinquetaille until 1300, when the town was incorporated with Arles, the two communities being likewise united. In 1349, however, the "baylons" of Arles were obliged to request the provost to authorize them to separate from the Jews of Trinquetaille, who "refused to share in the communal expenses." A reference to the place occurs in Isaac ben Jacob Lattes, "Sha'are Ẓiyyon," pp. 72, 75 (see "R. E. J." ix. 222).

In the thirteenth and fourteenth centuries Trinquetaille was the home of many scholars, including the following: Meïr ben Isaac, author of the "Sefer ha-'Ezer," in which he defended Alfasi against the attacks of Zerahiah ben Isaac ha-Levi Gerondi; Nathan ben Meïr, author of a commentary on the Pentateuch and of the "Sha'are Tefisah," on illegal seizures; and Todros ben Meshullam ben David (Todros Todrosi).

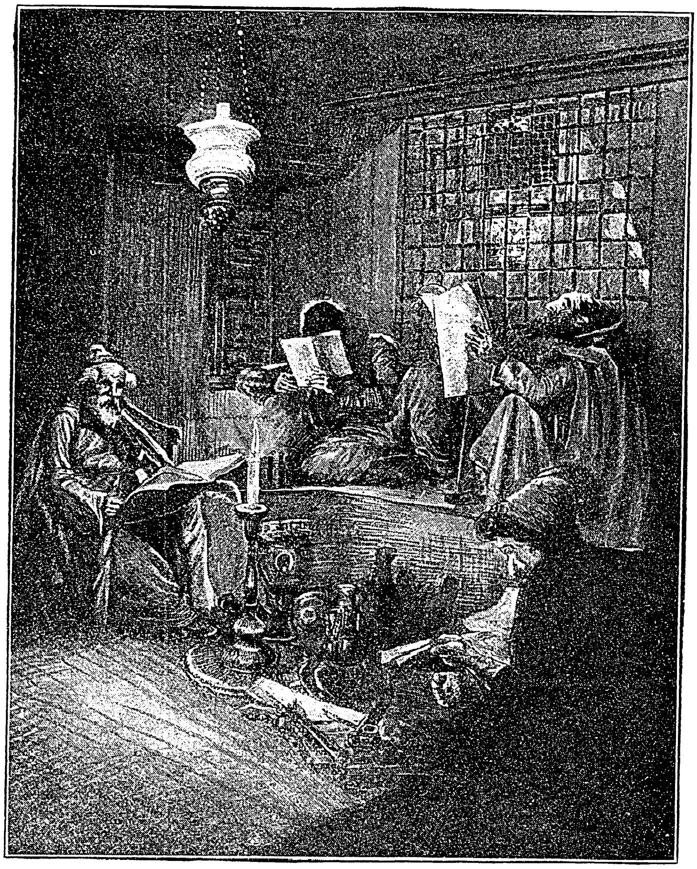
S. S. K.

TRIPOLI (ancient **Oea**): Seaport on the northern coast of Africa; capital of the Turkish vilayet of the same name. Local tradition states that under the Fatimite dynasty in Egypt, Jews from the oasis of Pessato established the most ancient community in Tripoli. Benjamin of Tudela, on the other hand, who traveled through northern Africa in the latter part of the twelfth century and visited Tunis and Alexandria, makes no mention of Tripoli.

Early History.

When the Jews were exiled from Spain in 1492, they avoided Tripoli, which was then a part of the dominions of Ferdinand the Catholic; nor did they settle there until it passed into the hands of Sultan Sulaiman the Magnificent in 1551. The surnames of the Jewish families of Tripoli show that Spanish Jews never resided in the city in considerable numbers; for instead of bearing names like "Toledo," "Carmona," and "Tarragone," they are called "Arbib," "Hasan," "Halefi," "Racah," "Tayar," "Tamam," etc. Moreover, the traveler Benjamin II. drew particular attention to the fact that the family of Sylva was descended from Spanish Maranos who had come to the city at some unknown period. In 1667 Miguel Cardoso, one of the most ardent disciples of Shabbethai Ẓebi, endeavored to establish a Shabbethaian sect at Tripoli, but was forced by the Jews to leave the city.



Interior of a Bet Ha-Midrash at Tripoli
(From a painting by Israel Gentz.)

In 1705 the Bey of Tunis made war upon Ḥalil Pasha, governor of Tripoli, and threatened to put the inhabitants to the sword; but his camp was ravaged by an epidemic, and he was forced to retreat. In memory of this event the local rabbis instituted a yearly festival on the 24th of Ṭebet, called "Purim Sherif," or "Purim Kidebuni."

Special Purims.

Eighty-seven years later a corsair named Borghel attacked Ali Pasha Karamanli, the governor, and committed many atrocities in the city, burning at the stake the son of Abraham Ḥalfon, the caid of the Tripolitan Jews. At the end of two years, however, Karamanli succeeded in expelling the invaders; and in commemoration of this deliverance the Jews established the Purim Borghel, which falls on the 29th of Ṭebet. See Purims, Special.

When Benjamin II. visited Tripoli in 1850, he found there about 1,000 Jewish families, with eight synagogues and several Talmudic schools, while the spiritual interests of the community were in the keeping of four rabbis.

Tripoli has produced a number of rabbinical authors, the most important being the following: Simeon b. Labi, who flourished about 1509 and was the head of a local Talmudic school, besides being the author of a cabalistic commentary on Genesis entitled "Ketem Paz" and of a hymn on Simeon b. Yoḥai; Abraham Ḥalfon, who flourished in the latter part of the eighteenth century and wrote "Ḥayye Abraham" (Leghorn, 1826), on the ritual laws of the Bible and the Talmud, in addition to a manuscript diary, still extant; Moses Serussi, who flourished in the second half of the nineteenth century and wrote the "Wa-Yasheb Mosheh"; and Ḥayyim Cohen, author of "Millot ha-Melek," "Leb Shomea'," "Zokrenu le-Ḥayyim," "'Ereb Pesaḥ," "Allon Bakut," "Perush al-Seliḥot," "Na'awah Ḳodesh," "Torat Ḥayyim," "Perush Hosha'anot," and "Miḳra Ḳodesh."

The administration of the community, which pays an annual tax of 4,890 francs for exemption from military service, is in the hands of a chief rabbi ("ḥakam bashi"), who is assisted by four judges.

Rabbis and Scholars.

Since 1840 the following chief rabbis have officiated at Tripoli: Jacob Memun (d. 1849), Shalom Tito, Moses Arbib, Elijah Hazan (1874-88; appointed by a firman of the sultan Aziz and decorated with the Order of the Medjidie), Ezekiel Sasson (1897), David Ḳimḥi (1897-1902), and the present incumbent, Shabbethai Levi. The Jews of Tripoli, who are characterized by many superstitious beliefs, now (1905) number 12,000 in a total population of 40,000. They have many representatives in various mechanical and mercantile pursuits. They possess eighteen synagogues, eleven yeshibot, a society for the relief of the sick; also two schools maintained by the Alliance Israélite Universelle.

A number of towns in the vicinity of Tripoli contain a considerable Jewish population, *e.g.*, **Amrum**, 1,000; **Derne** or **Derna**, 150; **Garian**, 300; **Homs**, 300; **Messilata**, 350; **Misserato**, **Idir**, and **Maatin**, 400; **Tajoorah**, 200; **Yiffren** or **Jebel**, 1,000; **Zanzbur**, 60; **Zawiel**, 450; and **Ziliten**, 450.

S. M. FR.

TRISTRAM, HENRY BAKER: English clergyman, Biblical scholar, and traveler in Palestine; born May 11, 1822, at Eglingham, Northumberland. He was educated at Durham School and Oxford University, and took orders in 1845; but sickness compelled him to live abroad. He explored the northern Sahara, and in 1858 paid his first visit to Palestine. In 1863 and in 1872 he again visited Palestine and spent a great deal of time there in making scientific observations and identifying Scripture localities. In 1873 he made a similar tour into Moab. In 1879 he declined the offer of the Anglican bishopric of Jerusalem, made to him by the Earl of Beaconsfield. In 1881 he journeyed extensively in Palestine, the Lebanon, Mesopotamia, and Armenia. Since 1873 he has been canon residentiary of Durham.

Among Tristram's many publications those dealing with the Holy Land are: "The Land of Israel, a Journal of Travels with Reference to Its Physical History," London, 1865 (many editions); "The Natural History of the Bible" (*ib.* 1867); "Land of Moab" (*ib.* 1874); "Pathways of Palestine" (*ib.* 1882); "The Fauna and Flora of Palestine" (*ib.* 1884); and "Eastern Customs in Bible Lands" (*ib.* 1894).

J. A. M. F.

TRIWOSCH, JOSEPH ELIJAH: Russian Hebrew writer and poet; born at Wilna Jan. 18, 1856; settled at Grodno as a teacher of Hebrew and Russian. His literary activity began in 1873, in which year he published in "Ha-Lebanon" his first articles. Since then he has contributed to most of the Hebrew literary periodicals. With the exception of his "Dor Tahapukot" (Warsaw, 1881), which describes the activity of the Russian Social-Democrats, all his novels, representing Jewish life in Russia, have been published in various periodicals. They are as follows: "Toḥelet Nikzabah," in "Ha-Shaḥar," viii., No. 12; "Bi-Meḳom Ẓawwa'aḥ," in "Ha-Karmel," iv.; "Ha-Liṭo'i," in "Ha-Shaḥar," x., No. 12; "'Al Shete ha-Se'ippim," in "Ha-Asif," ii. 577–629. Many of his poems likewise have been published in "Ha-Shaḥar" and in other periodicals.

TROKI: District city in the government of Wilna, Russia. It was an important Jewish center in the fourteenth, fifteenth, and sixteenth centuries; and there is a tradition, quoted by Firkovich, that 330 out of the 483 Karaite families which Grand Duke Witold of Lithuania brought from the Crimea after his war with the Tatars, were settled in the new city of Troki, which was built expressly for them. The provisions of Witold's charter of 1388 to the Jews of Lithuania applied to those of Troki also. In describing Troki as it appeared in 1414 Gilbert de Lannua of Burgundy says: "In this city there live Germans, Lithuanians, Russians, and a great number of Jews, each of these peoples using its own language."

Casimir IV. granted the Magdeburg Rights to the Karaites of Troki in 1441. The latter were to be subject to the jurisdiction of their own elder; and he in turn was to be responsible directly to the king or to judges appointed by the latter. Neither the waywode nor the starost was to interfere in local matters concerning only the Karaites. Lawsuits between Karaites and Christians were to be decided by a tribunal composed of the Karaite elder and the waywode. These privileges were confirmed by Alexander Jagellon in 1492.

Fourteenth, Fifteenth, and Sixteenth Centuries.

Toward the end of the fifteenth century the autonomy of the Jewish community in Troki was still further strengthened by a royal order (1485) directing a separate levy and collection of taxes for its members. Individual Jews gained in influence through their growing commercial enterprises, as is shown by a series of contemporary documents. Thus in 1484 the customs duties of Novogrudok were leased to the Troki Jews Ilia Moiseyevich, Rubim Sakovich, Avram Danilovich, and Eska Shelemovich; in 1486 those of Jitomir, Putivl, Kiev, and Vyshegorod were leased to Simsa Kravchik, Sadka, Shamak Danilovich, and Rizhka, Jews of Kiev and Troki; and in 1489 those of Troki were leased to the Jew Mikhail Danilovich, of whom mention occurs in a document of 1495 also.

Decree of 1507.

At the beginning of the sixteenth century the prosperity of the Troki Jews had declined considerably, and they petitioned King Sigismund for relief. In response the king issued the following decree, dated July, 1507: "In view of the impoverished condition of the Jews of Troki, and desiring to help them to regain the prosperity which they enjoyed under King Casimir, King Sigismund confirms to them their ancient privileges." Suits between Jews were to be decided by the Jewish elder appointed by the waywode of Troki with the king's consent. Suits of Jews against "Lithuanians, Russians, and others" were placed under the jurisdiction of the waywode or his vicegerent. The Jews of Troki were to pay taxes once a year on equal terms with the other citizens; and no other taxes were to be levied upon them. In emergencies, following an ancient practise, they were to contribute according to their means, in common with the other citizens of Troki—Lithuanians, Russians, and Tatars—living in the Jewish portion of the town. They were further permitted to pasture their cattle and to gather hay on the meadows which Jews had used from olden times. They were exempted from all customs duties; and they were further permitted to travel unrestrictedly on the highways and rivers. They were also exempted from field-work and similar tasks connected with the royal castle in Troki.

In 1514 the Troki Jews again petitioned the king for the confirmation of their ancient privileges; and in 1516 Sigismund ordered, "in response to the petition of the inhabitants of Troki of the Roman, Greek-Catholic, and Jewish religions, in consequence of the great impoverishment of the city," that semiannual fairs be held at Troki, and that all merchants traveling from Kovno to Wilna, or vice versa, pass through Troki. In March, 1521, the Jewish elder of Troki, Mordecai Yeskovich, complained to the king that the waywode of Troki had quartered his servants in the Jewish houses contrary to previous usage, which permitted the quartering of officers and nobles in houses of the Jews only during the king's sojourn in the city. The king's decision was favorable to the petitioners. In 1522 mention is made of the Jews of Troki as sharing the privileges granted to the Jews of Lithuania, and in 1529 as having paid their share of the tax of 1,000 kop groschen levied on all the Jews of Lithuania. A document of 1540 confirms the Troki Jew Batko Agrianovich in the possession of lands and of two lakes formerly belonging to Boyar Yuri Stanislavovich. The Troki Jews are mentioned in 1551 as being exempt from the payment of the SEREBSZCZYZNA; also in documents of 1552 and 1555. From a document of 1562 it appears that the salt monopoly of Troki was leased in that year to the Jew Yesko Mordukhayevich; and from one of 1563 it is evident that the Jews of Troki paid a tax of 376 kop groschen imposed on the Jews of Lithuania. Important properties were at this time held by Jews of Troki, as is evidenced by a document of 1568, wherein the king confirms the Jew Zakharias Moizeshovich in the possession of one of the castle properties, and by another of 1569, which refers to the sale of the "Jewish castle" held by the Jew Ogron Mordukhayevich. The castle property included fields, forests, pastures, swamps, etc., as is indicated by the bill of sale, which was signed by Ogron in Hebrew letters.

Under Stephen Bathori.

Stephen Bathori included the Jews of Troki in the confirmation of ancient privileges granted to the Jews of Lithuania in 1576. In 1578 he reminded them of their arrears of taxes; and in 1579 he decreed that the taxes imposed upon them should not exceed in amount those levied in the preceding reigns, and confirmed the privileges granted them by Sigismund in 1507. In 1579 Bathori found it necessary to adjust a suit originating in the commercial rivalry between the Christians, Jews, and Tatars of Troki and the Christian burghers of Kovno. In 1582 the Jewish burghers of Troki, represented by their elder Alexander Isakovich, made complaint to King Stephen Bathori against the waywode Stephen Koributovich, who had quartered his servants in Jewish houses during the king's absence from the town. The complaint was sustained. In 1585 the Jews together with the Christians of Troki are mentioned in a lawsuit against the farmer of the customs duties, who had seized merchandise belonging to them. The difficulty seemingly arose in the abuse by the citizens of Troki of an old privilege exempting them from the payment of customs duties. Four years later the Jews of Troki, through their elder Aaron Sholomovich, complained to King Sigismund that the burghers of Kovno prohibited them from trading freely in that city and confiscated their wares contrary to privileges granted to the Jews by the Polish kings and Lithuanian grand dukes. In response to this petition the king directed (March 28, 1589) that the rights of the Jews of Troki be respected. In 1619 reference is made in a legal document to the Jew Samuel Yakhimovich of Troki.

Present Day.

The Troki Karaites.

In 1897 Troki had a total population of 2,390, of whom 818 were Rabbinites and 424 were Karaites. The Karaites, who enjoy full civic rights, are as a rule friendly to their Rabbinite neighbors, but live separate from them. Considerable antagonism arose between these two classes in the reign of Nicholas I., largely through the action of Firkovich. A law was passed prohibiting Rabbinites from residing in Troki; but this was repealed in the sixth decade of the nineteenth century. The Karaites still use their ancient Tatar dialect; but in their religious services according to the Sephardic ritual they employ Hebrew. In olden times the Karaites were granted 250 deciatines of land, which they are now permitted to use for farming purposes. Most of them are market-gardeners and truckers, and lease their meadows to the peasants. They are engaged also in retail trade and in handicrafts. The young Karaites, desiring broader opportunities, leave their native town to seek their fortunes elsewhere. Some of them enter the liberal professions or become government officials; and not a few have achieved notable success as merchants and manufacturers. Most of them remember their native town and contribute generously toward its communal needs. Large numbers return to Troki for the fall holy days. The evening after Yom Kippur is celebrated with great gaiety. A Karaite ḥakam was formerly stationed at Troki; but now there is only one for all the Russian Karaites: he resides at Eupatoria. The Karaites of Troki have their own shoḥeṭ; but they employ the Rabbinite mohel. Troki has one Karaite school, in which religious instruction is given to the children. The Rabbinites are for the most part merchants of small means. There are no very important industries in the place.

Some of the early Karaite settlers in Troki emigrated to Lutsk in Volhynia and to Halicz in Galicia, and established Karaite communities in those towns. See JEW. ENCYC. vii. 438, *s.v.* KARAITES.

H. R. J. G. L.

The Karaite community of Troki produced several important scholars, among them being the follow-

Scholars.

ing: Isaac ben Abraham Troki (16th cent.), author of the apologetic work "Ḥizzuḳ Emunah"; Zerah Troki (17th cent.), for whom Joseph Solomon Delmedigo wrote his "Elim"; Ezra Troki (d. 1666), who was a relative and pupil of the above-mentioned Zerah, and studied medicine under Delmedigo, later becoming physician to King John Casimir of Poland; Abraham b. Samuel (second half of 17th cent.), a judge of the Karaites of Troki, and reputed to have been a favorite of King John Sobieski. At that time Troki was recognized as the seat of authority for the Karaites of the surrounding towns of Posvol, Birzhi, Seltz, Shat, Zermer, Neustadt, and others; but the number of Karaites in Troki was apparently very small. In a decision of the Lithuanian council, or "wa'ad," dated Zabludowo, 9th of Adar (March 7), 1664, and relating to the adjustment of the rates of taxation (a matter in which the Karaites seem to have been dependent on the Rabbinites), the authority of the Karaites of Troki was recognized on the condition that at the end of two years Troki should be found to have not less than ten Karaite "ba'ale battim," or heads of families. This amply disproves Firkovich's statement that prior to the pestilence of 1710, in which almost all of them perished, Troki had 500 Karaite families. Since then Troki has been of little importance among the Karaites; and its name is seldom seen in the lists of subscribers to Karaite works. Gabriel Firkovich, son-in-law of Abraham Firkovich, was probably the last Karaite of Troki to attain any prominence.

The Rabbinite community of Troki is likewise of little importance. Rabbi Ẓebi Hirsch, father of Samuel Salant of Jerusalem, was rabbi of Troki in the first half of the nineteenth century, and Benjamin Friedman, later rabbi of Antokol, a suburb of Wilna, occupied the Troki rabbinate from 1865 to 1870.

H. R. P. Wi.

TROKI: Karaite family deriving its name from the city of Troki, in the government of Wilna, Russia. The more important members of the family are:

Abraham ben Aaron Ḥazzan Troki: Karaite liturgical poet; lived at Troki in the sixteenth century. A liturgical poem of his, beginning with the words אשורר לאדון עולם במורא, for the Sabbatical section "Beshallaḥ," has been inserted in the Karaite Siddur (i. 315). It is possible that the numerous liturgical poems found there under the name "Abraham" without any other indication may also have been composed by Troki.

Bibliography: Fürst, *Gesch. des Karäert.* iii. 37; Gottlober, *Biḳḳoret le-Toledot ha-Ḳara'im*, p. 151, Wilna, 1865.

Abraham ben Josiah ha-Shofeṭ Troki: Karaite physician and scholar; born at Troki; died Dec., 1688. He was physician to John III., Sobieski, and later to Grand Duke Sigismund II. Troki was the author of two medical works: one, in Hebrew, entitled "Oẓar ha-'Am," and the other, in Latin, still extant in manuscript (St. Petersburg Cat., No. 732). According to Abraham Firkovich, Troki wrote also a work in seven sections entitled "Masa ha-'Am," which, after having translated it into Latin, he sold to the Dominican friars at Wilna. Simḥah Luzki mentions two other works by Troki, "Bet Abraham" and "Pas Yeda," both of which dealt with scientific subjects.

Bibliography: Fürst, *Gesch. des Karäert.* iii. 94; Gottlober, *Biḳḳoret le-Toledot ha-Ḳara'im*, p. 151; Simḥah Luzki, *Oraḥ Ẓaddiḳim*, s.v. ב and פ; Fuenn, *Keneset Yisrael*, p. 29; Neubauer, *Aus der Petersburger Bibliothek*, p. 72.

S. I. Br.

Isaac ben Abraham Troki: Karaite polemical writer; born at Troki 1533; died in the same city 1594. He was instructed in Bible and Hebrew literature by the Karaite scholar Zephaniah ben Mordecai, and in Latin and Polish literatures by Christian teachers. Moving in Christian circles, Troki was often called upon to take part in religious controversies; and this prompted him to study religious philosophy and Christian theology and to acquaint himself with the tenets of the various Christian sects. In the course of his studies he became interested in the anti-Christian and anti-Jewish writings of his contemporaries and compatriots Nicholas Paruta, Martin Czechowic, and Simon Budni. To refute the arguments of the writers against the Jewish religion and to show the superiority of Judaism, Troki wrote his epoch-making "Ḥizzuḳ Emunah."

His "Ḥizzuḳ Emunah."

This work is in two volumes, containing ninety-nine chapters in all. The author begins by demonstrating that Jesus was not the Messiah predicted by the Prophets. "This," he says, "is evident (1) from his pedigree, (2) from his acts, (3) from the period in which he lived, and (4) from the fact that during his lifetime the promises that related to the advent of the expected Messiah were not fulfilled." His arguments on these points are as follows: (1) Jesus' pedigree: Without discussing the question of the relationship of Joseph to David, which is more than doubtful, one may ask, What has Jesus to do with Joseph, who was not his father? (2) His acts: According to Matt. x. 34, Jesus said, "Think not that I am come to make peace on earth: I came not to send peace, but a sword. For I am come to set a man at variance against his father, and the daughter against her mother, and the daughter-in-law against her mother-in-law." On the other hand, Holy Writ attributes to the true and expected Messiah actions contrary to those of Jesus. (3) The period of his existence: It is evident that Jesus did not come at the time foretold by the Prophets; for they predicted the advent of the Messiah in the "last days" (Isa. ii. 2). (4) The fulfilment of the Messianic promises: All the Prophets predicted that at the advent of the Messiah peace and justice would reign in the world, not only among men, but even among the animals; yet there is not one sincere Christian who would claim that this has been fulfilled.

Among Troki's objections to the divinity of Jesus the following may be mentioned: The Christian who opposes Judaism must believe that the Jews tormented and crucified Jesus either with his consent or against his will. If with his consent, then the Jews had ample sanction for what they did. Besides, if Jesus was really willing to meet such a fate, what cause was there for complaint and afflic-

Arguments.

tion? And why did he pray in the manner related in Matt. xxvi. 39? On the other hand, if it be assumed that the crucifixion was against his will, how then can he be regarded as God—he, who was unable to resist the power of those who brought him to the cross? How could one who had not the power to save his own life be held as the Savior of all mankind ("Ḥizzuḳ Emunah," ch. xlvii.). In the last chapter Troki quotes Rev. xxii. 18, and asks how Christians could consistently make changes of so glaring a nature; for the change of the Sabbath from the seventh to the first day of the week was not authorized by Jesus or by any of his disciples. Moreover, partaking of the blood and flesh of a strangled beast is a palpable infringement of the dictates of the Apostles.

Editions and Translations.

Troki died before completing his work, the index and preface to which were made by his pupil Joseph ben Mordecai Malinovski Troki. The "Ḥizzuḳ Emunah" remained for many years in manuscript, and the text underwent many changes at the hands of the copyists. One rabbi went so far as to substitute for many of Troki's philosophical arguments Talmudical sayings. The work was first published, with a Latin translation, by Wagenseil in his "Tela Ignea Satanæ" (Freiberg, 1681), and was reprinted in Amsterdam (1705), Jerusalem (1845), and Leipsic (1857). It was also translated into Judæo-German (Amsterdam, 1717), into English by Mocatta (London, 1851), into German by David Deutsch (Sohran, 1865, 2d ed. 1873, with the Hebrew text) and into Spanish, the last-mentioned translation being extant in manuscript. Through its Latin translation the "Ḥizzuḳ Emunah" became the object of passionate debates in Christian circles; and its arguments against Christianity were used by all freethinkers. Voltaire gives the following appreciation of it: "Il a rassemblé toutes les difficultés que les incrédules ont prodiguées depuis. Enfin les incrédules les plus determinés n'ont presque rien allegué qui ne soit dans le Rempart de la Foi du rabbin Isaac" ("Mélanges," iii. 344).

Simḥah Luzki mentions two other works by Troki; namely, a treatise on the new moon, according to the "Gan 'Eden" of Aaron the Younger, and a work, in the form of questions and answers, on the slaughtering of animals, also according to the "Gan 'Eden." Troki composed also liturgical poems, some of which have been inserted in the Karaite Siddur.

J. I. Br.

Joseph ben Mordecai Malinovski Troki: Karaite scholar; lived at Troki in the sixteenth century; pupil of Isaac ben Abraham Troki, to whose "Ḥizzuḳ Emunah" he wrote the preface and the index. Joseph Troki was the author of: "Ha-Elef Leka" (Amsterdam, *c.* 1626), a prayer consisting of 1,000 words, each beginning with the letter ח; "Ḳizzur 'Inyan Sheḥiṭah" (Vienna, 1830), on the laws concerning the slaughtering of animals according to Elijah Bashyaẓi, published together with the "Dod Mordekai" of Mordecai ben Nissim. Simḥah Luzki attributes also to Troki: "Sefer Minhagim," on the ritual customs of the Karaites; "Perush 'al Haḳdamat Aẓulah," a commentary on the prayer "Aẓulah"; a commentary on the ten Karaite articles of faith; and "Perush 'al 'Inyan ha-'Arayot," on the laws of incest according to Elijah Bashyaẓi.

Bibliography: Fürst, *Gesch. des Karäert.* iii. 37; idem, *Bibl. Jud.* iii. 448; Simḥah Moses Luzki, *Oraḥ Ẓaddiḳim*, s.v. פ; Steinschneider, *Cat. Bodl.* col. 1509.

Solomon ben Aaron Troki: Karaite scholar; lived at Troki in the seventeenth and eighteenth centuries. He was a relative of Mordecai ben Nissim, author of the "Dod Mordekai," whom he surpassed in knowledge both of rabbinical literature and of secular science, of which latter he made use in his writings. Troki was the author of: "Migdal 'Oz," a polemical work, in seven chapters, against Christianity; "Rak we-Ṭob," a controversy between Karaites and Rabbinites, in the form of questions and answers; "Leḥem Se'orim," in two volumes, each containing five chapters, on the differences between the Karaites and the Rabbinites; "Appiryon," a religious code in two volumes, the first, entitled "Reḥaba'am ben Shelomoh," giving the Karaite view of the Mosaic precepts, and the second, entitled "Yarabe'am ben Nebaṭ," refuting the Christian dogmas. Troki displayed in the last-named work, which is extant in manuscript (St. Petersburg Cat., Nos. 754, 755), a wide knowledge of rabbinical literature. He enumerates the Lithuanian scholars of his time and gives a list of the Karaite works in the possession of Joseph Delmedigo. One chapter is devoted to pedagogy and the religious customs of Karaites in Poland. Troki was the author of another work, also bearing the title "Appiryon," in which he answers in concise form the questions of the minister of the government of Sweden as to the origin of Karaism and as to the points in which it differs from Rabbinism. It is divided into twenty-four short chapters, in which all the ceremonial laws of the Karaites are passed in review. The "Appiryon" has been published by Neubauer in his "Aus der Petersburger Bibliothek" (p. 79, Leipsic, 1866).

Bibliography: Fürst, *Gesch. des Karäert.* iii. 80 *et seq.*; Gottlober, *Biḳḳoret le-Toledot ha-Ḳara'im*, p. 201.

Zerah ben Nathan Troki: Karaite scholar; born at Troki 1580. He addressed to Joseph Delmedigo twelve questions on mathematics, astronomy, angelology, Cabala, etc. The answers to these questions, together with seventy mathematical paradoxes, form the subject of Delmedigo's "Elim," which work the Karaites attribute to Troki. Troki's letters to Joseph Delmedigo and to Meïr of Metz, with whom the Karaite scholar became acquainted, were published by Abraham Geiger under the title "Miktab Aḥuz" in his "Melo Chofnajim." Troki composed several liturgical poems, two of which have been inserted in the Karaite Siddur (i. 402; iv., end).

Bibliography: Fürst, *Gesch. des Karäert.* iii. 28; Gottlober, *Biḳḳoret le-Toledot ha-Ḳara'im*, p. 165; Geiger, *Melo Ḥofnayim*, Introduction, p. xxxvii.

TROY, N. Y.: City and the capital of Rensselaer county in the state of New York; situated on the east bank of the Hudson River six miles above Albany. Although it was settled in 1787, no authentic record is found of a Jewish inhabitant until about 1842, when Emanuel Marks of Albany, now (1905) a retired merchant, established business relations with some of the people of Troy and, being pleased with their public spirit and progressiveness, settled in that city. He was followed in 1843 by Herman Levy and family, and in 1845 by Charles Wolf.

In Sept., 1851, Emanuel Gratz, who also had settled in Troy, undertook the task of organizing a congregation. He rented two rooms, one for men and one for women, in the old Wotkyns Block on Congress street, and engaged a certain Königsberg as cantor for the holy days, thereafter officiating himself. In 1853, the membership having increased to eighteen, he organized a permanent congregation under the name "Anshe Chased." A hall was hired in Wotkyns Block and furnished in the Orthodox style. In 1855 dissensions arose among the members, and many withdrew, leaving in the old congregation but eight members, not sufficient for a quorum. The seceding members organized a congregation of their own.

In 1857 Aaron Ksensky made Troy his home, and became active in Jewish matters. Seeing the uselessness of two congregations, he at once took steps to reunite them. At a meeting, lasting almost an entire day, harmony was restored, and a congregation was organized under the name "Berith Shalom" (Covenant of Peace). This congregation in 1870 erected on the corner of Third and Division streets a synagogue which is known as the Third Street Temple. About this time some members adhering to the Orthodox doctrine withdrew and formed a congregation known as "Beth Israel Bickur Cholim"; they now (1905) worship in a hall at No. 8 State street. In 1873 another Orthodox congregation came into existence under the name "Sharah Tephilah": it has erected a synagogue on Division street.

The following orders have lodges in Troy: B'nai B'rith, Free Sons of Israel, Kether shel Barzel, B'rith Abraham, and Sons of Benjamin. The following Jewish charitable organizations exist in the community: Sisterhood of the Third Street Temple, the Hebrew Shelter Society, the Ladies' Hebrew Aid Society, and the Ladies' Hebrew Benevolent Society.

J. L. LOE.

TROYES (Hebrew, טרוייש or טרוין): Capital of the department of Aube, France. It contained a Jewish population as early as the tenth century, as is clear from a responsum addressed to the community of Troyes about the year 1000 by Judah ben Meïr ("Sire Léontin") and Eliezer ben Judah (or, more probably, Eliezer the Great, pupil of R. Gershom). Another "teshubah," sent to the same community by Joseph ben Samuel Bonfils of Limoges in the early part of the eleventh century, shows that at that time the Jews of Troyes, with the sanction of the counts of Champagne, who regarded them as an important source of revenue, owned vineyards and other real estate. At the end of the twelfth century and at the beginning of the thirteenth the counts of Champagne and the King of France entered into an agreement by which the contracting parties bound themselves to surrender to each other all Jews who should quit the domains of the one and settle in the territories of the other. In 1204 all rights over the Jews who settled in Ervy were waived by the Seigneur d'Ervy in favor of Countess Blanche of Troyes; and in 1222 Thibaud, Count of Champagne, acknowledged the receipt for 160 livres given by the Jews of the city to Jacob, "Master of the Jews of Troyes."

In March, 1288, the Jewish inhabitants of Troyes were accused of a ritual murder; and on April 24 of the same year the tribunal of the Inquisition condemned to the stake thirteen Jews, whose names, according to the elegy of Jacob ben Judah on the auto da fé, were as follows: Isaac Châtelain, with his wife, two sons, and daughter-in-law, Samson Ḳadmon, Solomon or Salamin ben Vivant, Baruch d'Avirey or Baruch Ṭob 'Elem (Bonfils), Simeon of Châtillon, Jonah or "le Beau Colon," Isaac Cohen, Ḥayyim of Brinon (department of Yonne) or "le Maître de Brinon," and Ḥayyim of Chaource (department of Aube). In 1298 Vivant of Troyes was one of the Jews subsidized by the treasury as an administrator for the Jews of France.

The Jewish revenues from the bailiwick of Troyes indicate that at this time the Jews were very numerous throughout the country; for in 1301 their total income amounted to 1,000 livres. Prosperity reigned among them; and the seigniors of the country and the ecclesiastical dignitaries when financially embarrassed applied to them for assistance. The Jews were expelled from Troyes in 1306, but returned in great numbers in 1315. The "Document sur les Juifs du Barrois" contains the names of some who settled at Troyes during the years 1321 to 1323: Maistre Deuaye, Bonjuyf son of Bonjuyf, Bonne Vie and Domim his son, Terine, and Haquinet. In 1379 the family of Isaac Lyon of Troyes obtained as a special favor permission to reside in Burgundy. Toward the close of the fourteenth century Abraham of Treves, son of Mattithiah, and Johanan of Treves lived at Troyes. At the present day (1905) the Jewish community contains about forty families.

A Hebrew school of great importance, directed by the highest rabbinical authorities and attended by numerous students from various lands, especially Germany and France, flourished at Troyes in the twelfth century. Several synods whose ordinances were adopted in foreign countries assembled at Troyes about 1160.

Among the most noted scholars of the city were RASHI and his chief disciples, Simḥah of Vitry, Judah ben Nathan (ריבן), Joseph ben Simeon Ḳara, Shemaiah and Judah ben Abraham, Samuel ben Meïr (RaSHBaM), Jacob ben Meïr (R. Tam), Joseph ben Moses, Isaac ben Hoshaiah ha-Levi, and Simeon the Tosafist (11th and 12th cents.), as well as Joseph

Ḥazzan ben Judah, and Menahem and his disciple Judah ben Eliezer (13th cent.). Troyes is mentioned in "Mordekai" on Giṭ. ix., No. 446. The "Seder Troyes" (Troyes ritual) has been edited by Max Weiss in the "Festschrift" published in honor of Moses Bloch (Budapest, 1905).

TRUMBULL, HENRY CLAY: American Christian Orientalist; born at Stonington, Conn., June 8, 1830; died at Philadelphia Dec. 8, 1903. He was educated at Williston Seminary, Mass., and took up Sunday-school work, becoming in 1858 state missionary of the American Sunday-School Association, and in 1865 the New England secretary of the American Sunday-School Union. In 1875 he took charge of the "Sunday School Times," which he made an organ of considerable influence, even in scholarly circles. In 1881 ill health caused him to travel. He visited Egypt, Arabia, and Syria, and during the journey he identified the site of Kadesh-barnea, on which he wrote a monograph (Philadelphia, 1884). He wrote also "Studies in Oriental Social Life" (1894), dealing especially with the aspects which threw light upon Biblical archeology; and two works of considerable influence; namely, "The Blood Covenant" (New York, 1885), in which he laid down the theory, afterward developed by W. R. Smith, that sacrifice was a blood covenant; and "The Threshold Covenant" (1896; see Threshold).

TRUMPET ("ḥaẓoẓerah"): In Shab. 36a (comp. Suk. 34a) it is noted that since the destruction of the Temple the names for the shofar and the trumpet had been confused. The same complaint may be made against the Septuagint, which generally renders the Hebrew "shofar" by σάλπιγξ, properly applicable only to the ḥaẓoẓerah, and against the English versions, which render it by "trumpet" or, still more incorrectly, by "cornet." In the Hebrew text the distinction between Shofar and trumpet is well maintained, as may be seen from such passages as Ps. xcviii. 6 and I Chron. xv. 28, where "shofar" and "ḥaẓoẓerah" are mentioned side by side.

In Num. x. 1 *et seq.* two trumpets of beaten silver are ordered to be made, and, according to II Chron. v. 12, the number was increased in Solomon's Temple to 120; while, judging from the representation on the Arch of Titus, in the Herodian Temple the number was reduced to the original two. Besides the shofar, the trumpet is the only musical instrument of the Old Testament concerning whose shape there is absolute certainty, there being extant a detailed description of it in Josephus and representations on the Arch of Titus and on a Bar Kokba coin. According to Josephus ("Ant." iii. 12, § 6), the trumpet was nearly a yard long and a little wider than a flute, with a slight expansion near the mouthpiece to catch the breath, and terminated in a bell. This description tallies better with the representation on the Bar Kokba coin than with that of the two trumpets leaning against the table of show-bread on the Arch of Titus.

The trumpet, like the shofar, was not so much an instrument of music as one of "teru'ah" (noise), that is, of alarm and for signaling. Its primary use was to give signals to the people and their chiefs to assemble and to break camp (Num. x. 5 *et seq.*, 9, where the manner of blowing is specified so as to indicate the different signals intended); also generally to announce an important event and to aid in the joyous shouting of the people on festive occasions (II Kings xi. 14; Hos. v. 8; Ps. xcviii. 6, cl. 3). But its chief use, at least in later times, was religious; and it was therefore almost exclusively a priestly instrument (Num. x. 8, xxxi. 6; II Chron. xiii. 12, 14). It was sounded on New Moons; at the daily offerings; and during the pauses in the singing of the Psalms, when the people fell down and worshiped (Num. x. 10; II Chron. xxix. 26-28; Tamid vii. 3; comp. Ecclus. [Sirach] l. 16 *et seq.*; I Macc. iv. 40, v. 33). Altogether from twenty-one to forty-eight trumpet-blasts are said to have been sounded daily in the Temple (Suk. 53b). The sound of the trumpet also accompanied the joyous ceremony of water-drawing on the Feast of Tabernacles (*ib.* 51b); and a blast of trumpets announced the beginning and close of the Sabbath (*ib.* 53b; Shab. 35b). As the shofar was the instrument par excellence of New-Year's Day, so was the trumpet that of solemn fast-days (R. H. 26b; Ta'an. 15b, 16b).

From Neh. xii. 41 and I Chron. xv. 24 it has been inferred that there were seven trumpets in the Temple orchestra (comp. Stade's "Zeitschrift," 1899, p. 329).

TRUMPETS, FEAST OF. See New-Year.

TRUSTS AND TRUSTEES: It has been shown under Guardian and Ward and under Community how the Jewish law took notice of the various powers and duties of those to whom the property of orphan children or of the community was entrusted for management. But a fiduciary relation might also be sustained toward other parties, as, for instance, a betrothed or married woman; and then the trustee was known as שליש (lit. "a third man"). There is, however, no wide development of the law of trusts, such as is found in modern, especially Anglo-American, law.

The Mishnah (Ket. v. 8) puts the case of a husband who maintains his wife in food and clothing through a trustee, and prescribes the least amount of food, raiment, and pin-money which he must furnish annually. A much more important passage for this purpose, however, is Ket. vi. 7, which presents a case like that of a trust for the separate use of a married woman under the English equity system:

"When one puts money in the hands of a trustee for his daughter and she says, 'I have full confidence in my husband,' the trustee should nevertheless carry out the trust placed in him [that is, he should disregard her wish and invest the money in land for the daughter's use]. Such is the opinion of R. Meïr; while R. Jose says, even if the field has been already bought and she is willing to sell it, it is sold right then. When does this apply? In the case of an adult woman; but the wishes of an infant amount to nothing."

In the Talmud (Ket. 69b), on the basis of a baraita, the position of the sages is thus explained: A betrothed damsel may not, according to R. Meïr, turn the trust fund over to her betrothed. R. Jose says she may. Both, however, agree that, when actually married, the wife, if of age, may turn the fund over to her husband. Later authorities (see Bertinoro *ad loc.*) hold that the Halakah is with R. Meïr.

In Giṭ. 64a a trustee (שליש) is entrusted by the husband with a bill of divorcement, and a dispute arises between the husband and the trustee as to whether the bill was merely deposited with the latter, or was given to him for delivery to the wife, to dissolve the marriage bond. Two amoraim differ on the point whether the husband or the trustee should be credited in his assertion in such a case; but the question is broadened to apply to the more frequent case in which a bond or deed for money or property is deposited with a trustee for both parties to the instrument. The conclusion arrived at is that the word of the trustee must be taken, without any oath, against the assertion of either of the parties who appointed him; for by making him their trustee they have vouched for his truthfulness. It is so ruled in the codes; *e.g.*, in Maimonides, "Yad," Malweh, xv. 8; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 56, 1.

E. C. L. N. D.

TRYPHON: 1. Son of Theudion; one of the four envoys sent by the Jews in 45 C.E. to petition Emperor Claudius that the high-priestly vestments might remain in the possession of the Jews (Josephus, "Ant." xx. 1, §§ 1-2; see also DOROTHEUS).

2. See ṬARFON.

S. S. KR.

TSCHERNIGOFF. See CHERNIGOV.

TUBAL-CAIN: Brother of Jabal and Jubal, sons of Lamech, who appear to have been the originators of several industries and arts. The correctness of the Masoretic text (לטש כל־חרש נחשת וברזל) of Gen. iv. 21-22, describing Tubal-cain, is in dispute. Holzinger and Gunkel maintain that לטש was a marginal gloss to חרש, and that, as in verses 20 and 21, there stood before כל־ originally הוא היה אבי. This would give Tubal-cain a position in metal industries comparable with those of his brothers in their lines. The Septuagint, however, omits any equivalent of קין. This fact is noted by Dillmann, Wellhausen, and others, who think that "Tubal" originally stood alone, and קין, being a later addition, was translated "smith."

Tubal is identified (by Dillmann, Schrader, and Delitzsch) with the Assyrian Tobal, a people living southeast of the Black Sea, and known in later history as the Aryan people, the Tibareni, with whom Phenicia (Ezek. xxvii. 13) traded for articles of bronze (A. V. "brass"). This fact would seem to point to the correctness of the view that "Tubal" originally stood alone and that the bearer of that name was the progenitor of a people whose chief industry was the production of vessels, instruments, and other objects of bronze and iron.

E. G. H. I. M. P.

As stated above, the Septuagint text calls the inventor "Tobel" ("Tubal"). An apocryphal tradition adds "Ḳainan" to the name ("The Book of the Bee," ed. Budge, ch. xix.). This variance of tradition continues in later times. Philo of Byblus (in Eusebius, "Præparatio Evangelica," i. 10) names two brothers as the inventors, one of whom was called "Chrysor" (χρυσώς, perhaps from חרש). These brothers discovered enchantment and sorcery as well as the art of working in iron (comp. חרש and לחש; also נחש and נחשת), and invented rafts and various fishing-implements.

TUBERCULOSIS. See CONSUMPTION.

TUCHMANN, JULES: French folklorist; born in Paris March 23, 1830; died there Feb. 28, 1901. Privately educated, he devoted his whole life to investigating the traces of supernaturalism in traditional beliefs. The results of some of his investigations appeared in a remarkable series of articles on "The Evil Eye" ("La Fascination") which ran through the whole ten volumes of the folk-lore journal "Melusine." While nominally devoted to this subject, however, the monograph deals with all kindred topics, as, for example, witches and witchcraft, folk-medicine, etc. It is perhaps the most thorough investigation of any single branch of folklore.

BIBLIOGRAPHY: *Melusine*, x. 8, April, 1901.

TUDELA (טודילה, תטילא; ancient **Tutela**): The oldest and most important Jewish community in the former kingdom of Navarre. When Alfonso the Valiant captured the city from the Moors in 1114 it contained a large number of Jews. As they were mentioned after the Moors and the Christians in the "fuero" granted them in 1115 by the conqueror, and suspecting that their safety was threatened, the Jews decided to emigrate; and only at the special request of Alfonso and on his promise that they should be granted municipal rights similar to those of Najera, did they consent to remain. As they continued to suffer much from the hatred of the Christians, they declared to the king that they would be obliged to leave the city if these abuses were not checked; whereupon Sancho the Wise in 1170 confirmed all the rights which Alfonso had granted them. For their greater security he even assigned to them the fortress as a residence and freed them from the tax on merchandise ("lezta"). He permitted them freely to sell their houses located in their former Juderia, and allowed them to establish a cemetery outside the city. He also showed tolerance in his regulation of their legal status (comp. Kayserling, "Gesch. der Juden in Spanien," i. 197).

Jewish Body-Physicians.

Like his grandfather, who had for his body-physicians the Jews Don Joseph and Don Moses Aben Samuel, Sancho also had a Jewish physician, named Solomon, to whom he not only granted baronial rights in the whole kingdom, but also gave farm- and vine-lands in two villages near Tudela. Further, in 1193, a few months before his death, he granted Solomon also proprietary rights in the bath located in front of the Albazares gate.

In Feb., 1235, Tudela was the scene of a rebellion against the government, when many Jews were wounded and several were sacrificed to the rage of the populace. Peace was restored only through a treaty between King Theobald I. and the city council (Kayserling, *l.c.* pp. 200 *et seq.*). The shepherd persecutions of 1321 really began in Tudela. About 30,000 rapacious murderers fell upon the Jews in Tudela, killing many of them. When, some time later, 500 (or, according to other accounts, 300) made another attempt to surprise the Jews, they were overcome by a knight who lay in wait for them. Out of gratitude to Providence for their escape from this danger the wealthier Jews endeavored to alleviate the condition of their coreligionists who had suffered from the persecutions. They collected grain and oil in storehouses, and supported poor Jews therefrom for a period of three years. In the great persecution of 1328, during which 6,000 Jews perished in Navarre, those of Tudela did not escape.

Special Market-Place.

The Jews of Tudela followed the most varying occupations; they traded in grain, wool, cloth, and other wares. There were among them tanners, who were obliged to pay 35 sueldos a year to the king for the use of their tannery, which was situated on the Ebro; and the Jewish shoemakers and gold- and silver-workers had their shops in a special market-place, for which in the year 1269 they paid to Theobald II. 1,365 sueldos. They had also their own "motalafia," or gagers' bureau, where their weights and measures were subjected to official inspection. They engaged in money-lending also, while some of them—D. Joseph and D. Ezmel de Ablitas, for example—had large commercial houses. The farming of the taxes likewise was in their hands. Solomon and Jacob Baco and Ezmel Falaquera were tax-farmers, and Nathan Gabai was chief farmer of the taxes.

As in the other cities of Spain, in Tudela the Jews lived in a separate quarter ("Juderia"), which was located in the fortified part of the city, where were also the large synagogue (repaired in 1401) and several smaller ones. They had their own magistrates, comprising two presidents and twenty representatives ("regidoros"), who drew up new statutes, inflicted penalties, excluded from membership in the community, and pronounced the ban. In 1359 the Jews of Tudela petitioned D. Luis, brother and representative of King Charles II., that they might be allowed to punish those Jews who violated their religious regulations. In a statute drawn up in March, 1363, by the representatives of the community it was decided to deal energetically with denunciators and slanderers. This statute was publicly read in all the synagogues on the Day of Atonement; and in 1400 it was renewed for a period of forty years (the statute is given in Kayserling, *l.c.* pp. 206 *et seq.*). The Jews of Tudela, whose 500 families had by 1363 diminished to 270, were greatly oppressed by the taxes imposed on them by the king. These in 1346 and the following years had amounted to 2,000 livres annually, and in 1375 to 3,382 livres; in addition, the Jews had to pay subsidies from time to time. In consequence of the war with Castile and owing to the ravages of the plague in 1379 and 1380, the community continued to decrease in numbers till in 1386 there were scarcely 200 Jewish families in the city, and these were so poor that the taxes could not be collected from them.

Baptism or Exile.

In 1498 King John, urged by the sovereigns of Castile, issued an edict to the effect that all Jews must either be baptized or leave the country. In Tudela 180 families received baptism, many of them emigrating a few years later to France. The Maranos, or secret Jews, were subjected to scorn, their names being published in a great roll called "La Manta" and exposed in the nave of the cathedral at Tudela.

Tudela was the birthplace or residence of several Jewish scholars, the most famous of whom was the traveler known as BENJAMIN OF TUDELA, the account of whose travels was translated into several languages. The cabalist Abraham Abulafia passed his youth in Tudela; and Ḥayyim ben Samuel, author of the "Ẓeror ha-Ḥayyim," Shem-Ṭob ben Isaac Shaprut, the philosopher and apologist, and several members of the learned MINIR family were born in the city. The following rabbis of Tudela are known: Joel ibn Shu'aib, author of sermons and Bible commentaries; Ḥasdai ben Solomon, a contemporary of Isaac ben Sheshet; and R. Astruc.

S. M. K.

TUGENDHOLD, JACOB: Russian educator and author; born in Breslau 1791; died at Warsaw April 20, 1871. Realizing that education was one of the best means for improving the condition of the Jews in Poland and Lithuania, he founded at Warsaw in 1819 a school for Jewish children, where the instruction was given according to the most modern principles of pedagogy and was not limited to purely Jewish subjects. In carrying out this plan Tugendhold had to overcome many obstacles which the conservative "melammedim" put in his way. In 1820 he was appointed by the Russian government censor of all the Jewish publications that appeared in Warsaw; and when the rabbinical school was established in that city, in 1853, Tugendhold was made director of the institution, which post he held until the school was closed in 1862.

Tugendhold was active not only as an educator but also as a communal worker. It was due to him that the Warsaw Home for Aged and Invalid Jews was built; and he was instrumental also in establishing a number of other benevolent institutions in that city. For a number of years he served as president of the Warsaw kahal.

Tugendhold's literary works include the following: "Book of Errors" (in Polish, Warsaw, 1830), a work, written with the assistance of Dr. Stern, which points out more than 900 errors in L. Chiarini's work on the Hebrew language; an answer to the work "Sposob na Zydow" (*ib.* 1831); "Obrana Izraelitow" (*ib.* 1831), a translation into Polish of Manasseh ben Israel's "Vindiciæ Judæorum," a defense against the blood accusation; "Fedon," a translation of Moses Mendelssohn's "Phädon"; "Ben Yaḳḳir" (*ib.* 1824), a text-book on the fundamental principles of the Jewish faith; "Pierwsza Wskrzeszona Mysl o Jstniemu Boga" (*ib.* 1840), a translation into Polish of Solomon Cohen's poem "Haẓẓalat Abram me-Ur Kasdim"; "Ḳosht Imre Emet we-Shalom" (Polish title, "Wskasawki Prawdy"; *ib.* 1844), a collection of passages from ancient and modern Jewish writings, showing Judaism in its relation to other religions; "Beḥinat 'Olam," a translation of Bedersi's work on the vanity and instability of all that is worldly.

Tugendhold wrote also "Marnot" (*ib.* 1851), a drama in three parts, and contributed extensively to many Polish and German periodicals of his time.

TUGENDHOLD, WOLF: Russian educator and author; brother of Jacob Tugendhold. He was teacher in the rabbinical school of Wilna and also censor of all the Jewish publications that appeared in that city. Of his writings the following are the most important: "Der Denunciant," a story of Jewish life in Poland based partly upon his brother's drama; "Stimmen der Feiernden Menge" (Warsaw, 1841), a translation of Lebensohn's "Ḳol Hamon Ḥogeg," which was made on the occasion of the celebration of the betrothal of the heir to the Russian throne; and a eulogy on the life and works of the Hebrew writer M. A. Günzberg.

TULL, EDMUND: Hungarian artist; born at Szekesfejervar 1870. He was educated at Budapest, Milan, and Paris, being in the last-named city a pupil of J. P. Laurens and of B. Constant. His first work, "The Cathedral of Notre Dame," attracted attention at the exposition in Budapest in 1896, while his etchings are especially valued in London and Vienna. His best-known works are: "Peasant Mowing," "A Lane in Dort," and "The Island of Capri," in the historical art museum of Budapest; and "The Smithy," owned by Archduchess Isabella.

S. L. V.

TUNIS: Formerly one of the Barbary States of North Africa, but since 1881 a dependency of France; situated between latitude 31° and 37° north, and longitude 8° and 11° east, and bounded north and northeast by the Mediterranean, southeast by Tripoli, south and southwest by the desert of Sahara, and west by Algeria. A tradition is current among the descendants of the first Jewish settlers, traces of whom are still to be found among the nomadic Mussulman tribes of Drid, Henansha, and Khumir, that their ancestors settled in that part of North Africa long before the destruction of the First Temple. Though this is unfounded, the presence of Jews there at the appearance of Christianity is attested by the Jewish monument found by Prudhomme at Ḥammam al-Laṭif in 1883 (see "Mémoires de l'Académie des Inscriptions et Belles-Lettres," 1883; "Revue Archéologique," March and April, 1883; "R. E. J." 1886).

In Roman Times. After the dissolution of the Jewish state a great number of Jews was sent by Titus to Mauritania, and many of them settled in Tunis. These settlers were engaged in agriculture, cattle-raising, and trades. They were divided into clans, or tribes, governed by their respective heads, and had to pay the Romans a capitation-tax of 2 shekels. Under the dominion of the Romans and (after 429) of the fairly tolerant Vandals, the Jewish inhabitants of Tunis increased and prospered to such a degree that African Church councils deemed it necessary to enact restrictive laws against them. After the overthrow of the Vandals by Belisarius (534), Justinian issued his edict of persecution, in which the Jews were classed with the Arians and heathens ("Novellæ," xxxvii.).

(From a photograph.)

In the seventh century the Jewish population was largely augmented by Spanish immigrants, who, fleeing from the persecutions of the Visigothic king Sisebut and his successors, escaped to Mauritania and settled in the Byzantine cities. These settlers, according to the Arabic historians, mingled with the Berber population and converted many powerful tribes, which continued to profess Judaism until the reign of the founder of the Idriside dynasty. Al-Ḳairuwani relates that at the time of the conquest of Hippo Zaritus (Bizerta) by Ḥasan in 698 the governor of that district was a Jew. When Tunis came under the dominion of the Arabs, or of the Arabian califate of Bagdad, another influx of Arab Jews into Tunis took place. Like all other Jews in Mohammedan countries, those of Tunis were subject to the ordinance of Omar.

Under Islam.

In 788, when Imam Idris proclaimed Mauritania's independence of the califate of Bagdad, the Tunisian Jews joined his army under the leadership of their chief, Benjamin ben Joshaphat ben Abiezer. They soon withdrew, however; primarily, because they were loath to fight against their coreligionists of other parts of Mauritania, who remained faithful to the califate of Bagdad; and secondarily, because of some indignities committed by Idris against Jewesses. The victorious Idris avenged this defection by attacking the Jews in their cities. After an unsuccessful resistance peace was concluded, according to the terms of which the Jews were required to pay a capitation-tax and to provide a certain number of virgins annually for Idris' harem. The Jewish tribe 'Ubaid Allah preferred to migrate to the East rather than to submit to Idris; according to a tradition, the Jews of the island of Gerba are the descendants of that tribe. In 793 Imam Idris was poisoned at the command of Harun al-Rashid (it is said, by the governor's physician Shamma, probably a Jew), and about 800 the Aghlabite dynasty was established. Under the rule of this dynasty, which lasted until 909, the situation of the Jews in Tunis was very favorable. As of old, Bizerta had a Jewish governor, and the political influence of the Jews made itself felt in the administration of the country. Especially prosperous at that time was the community of Kairwan, which was established soon after the foundation of that city by 'Uḳba ibn Nafi', in the year 670.

(From a photograph.)

A period of reaction set in with the accession of the Zirite Al-Mu'izz (1016-62), who persecuted all heterodox sects, as well as the Jews. The persecution was especially detrimental to the prosperity of the Kairwan community, and members thereof began to emigrate to the city of Tunis, which speedily gained in population and in commercial importance.

The accession of the Almohade dynasty to the throne of the Maghreb provinces in 1146 proved very disastrous to the Jews of Tunis. In pursuance of a fanciful belief, of which there is no trace in Moslem tradition, the first Almohade, 'Abd al-Mu'min, claimed that Mohammed had permitted the Jews free exercise of their religion for only five hundred years, and had declared that if, after that period, the Messiah had not come, they were to be forced to embrace Islam. Accordingly Jews as well as Christians were compelled either to embrace Islam or to leave the country. 'Abd al-Mu'min's successors pursued the same course, and their severe measures resulted either in emigration or in forcible conversions. Soon becoming suspicious of the sincerity of the new converts, the Almohades compelled them to wear a special garb, with a yellow cloth for a head-covering.

The intellectual status of the Tunisian Jews at that time was on a level with their political situation. Maimonides, who, while on his way to Egypt, sojourned some time in the island of Gerba and other localities, expressed himself, in a letter addressed to his son, in the following terms:

Maimonides' Opinion.

> "Beware of the inhabitants of the West, of the country called Gerba, of the Barbary States. The intellect of these people is very dull and heavy. As a rule, beware always of the inhabitants of Africa, from Tunis to Alexandria; and also of those who inhabit the Barbary coasts. In my opinion they are more ignorant than the rest of mankind, though they be attached to the belief in God. Heaven is my witness that they can be compared only to the Karaites, who possess no oral law. They evince no lucidity of spirit in their study of the Pentateuch, the Prophets, and the Talmud; not even when they discuss the haggadot and the laws, although there are among them rabbis and dayyanim. With regard to impure women they have the same beliefs and customs as the Bene Meos, a Mussulman tribe which inhabits the same country. They do not look upon the impure woman, and turn their eyes neither to her figure nor to her garments. Nor do they speak to her; and they even scruple to tread on the ground touched by her feet. They do not eat the hinder part of slaughtered animals. In short, there is much to say about their ways and customs."

The Jews of Tunis at that time scrupulously observed most of the festivals, but did not celebrate the second days; they entirely ignored the festival of Purim, although they observed that of Ḥanukkah. According to their statutes, a man who had lost two wives could marry only a widow; on the other hand, if a woman lost two husbands she was called a "husband-killer" and was not allowed to remarry. This prohibition included also a woman who had been twice divorced. Male twins were always named Perez and Zerah; female twins, Sarah and Rebekah; a male and female, Isaac and Rebekah.

Under the Ḥafṣites.

Under the Ḥafṣite dynasty, which was established in 1236, the condition of the Jews greatly improved. Besides Kairwan, there were at that time important communities in Mehdia, Kalaa, the island of Gerba, and the city of Tunis. Considered at first as foreigners, the Jews were not permitted to settle in the interior of the last-named city, but had to live in a building called "Funduḳ"; later, however, a wealthy and humane Mussulman, Sidi Mahrez, who in 1159 had rendered great services to the first Almohade, 'Abd al-Mu'min, obtained for them the right to settle in a special quarter of the city proper. This quarter, called the "Hira," constituted until 1857 the ghetto of Tunis; it was closed at night. In 1270, in consequence of the defeat of Saint Louis of France, who had undertaken a crusade against Tunis, the cities of Kairwan and Ḥammat were declared holy; and the Jews were required either to leave them or to embrace Islam. From that year until the conquest of Tunis by France (1857), Jews and Christians were forbidden to pass a night in either of these cities; and only by special permission of the governor were they allowed to enter them during the day.

Taxation.

That the Jews of Tunis, during the fourteenth and fifteenth centuries, were treated more cruelly than those of the other Barbary States may be surmised from the fact that, while refugees from Spain and Portugal flocked to Algeria and Morocco, only a few chose to settle in Tunis. Indeed, the Tunisian Jews had no rabbis or scholars worthy of mention, and had to consult those of Algeria or Morocco on the most ordinary religious questions. Their communal affairs were directed by a council, nominated by the government, the functions of which consisted in the administration of justice among the Jews, and, more especially, in the collection of the Jewish taxes. Three kinds of taxes were imposed upon the Tunisian Jews: (1) a communal tax, to which every member contributed according to his means; (2) a personal or capitation tax; and (3) a general tax, which was levied upon the Mohammedans also. In addition to these, every Jewish tradesman and industrial had to pay an annual tax to the gild to which his trade or industry belonged. In spite of all these exactions, however, the commerce of the country was in Jewish hands, and even the government was compelled to have recourse to Jewish merchants for the exploitation of the various monopolies; after the thirteenth century it adopted the policy of entrusting to a Jew the post of receiver of taxes. This functionary, who bore the title of "caid," served also as an intermediary between the government and the Jews, and his authority within the Jewish commu-

nity was supreme. The members of the council of elders, as well as the rabbis, were nominated at his recommendation, and no rabbinical decision was valid unless approved by him.

Under the Spaniards.

During the Spanish occupation of the Tunisian coasts (1535–74) the Jewish communities of Bizerta, Susa, Sfax, and other seaports suffered greatly at the hands of the conquerors; while under the subsequent Turkish rule the Jews of Tunis enjoyed a fair amount of security, being practically guaranteed the free exercise of their religion, and liberty to administer their own affairs. They were, however, always exposed to the caprices of princes and to outbursts of popular fanaticism. Petty officials were allowed to impose upon them the most difficult drudgery without compensation. They were obliged to wear a special costume, consisting of a blue frock without collar or ordinary sleeves (loose linen sleeves being substituted), wide linen drawers, black slippers, and a small black skull-cap; stockings might be worn in winter only. They might ride only on asses or mules, and were not permitted to use a saddle.

(From a photograph.)

From the beginning of the eighteenth century the political status of the Jews in Tunis steadily improved. This was due to the ever-increasing influence of the political agents of the European powers, who, while seeking to ameliorate the condition of the Christian residents, had to plead also the cause of the Jews, whom Moslem legislation classed with Christians. Joseph Azulai, who visited Tunis in 1772, described in glowing terms the influence at court of the caid Solomon Nataf. Forty-two years later the United States consul to Tunis, Mordecai M. Noah, gave the following account of the situation of the Tunisian Jews:

> "With all the apparent oppression, the Jews are the leading men; they are in Barbary the principal mechanics, they are at the head of the custom-house, they farm the revenues: the exportation of various articles, and the monopoly of various merchandise, are secured to them by purchase, they control the mint and regulate the coinage of money, they keep the bey's jewels and valuable articles, and are his treasurers, secretaries, and interpreters; the little known of arts, science, and medicine is confined to the Jews. . . . If a Jew commits a crime, if the punishment affects his life, these people, so national, always purchase his pardon; the disgrace of one affects the whole community; they are ever in the presence of the bey, every minister has two or three Jewish agents, and when they unite to attain an object, it cannot be prevented. These people, then, whatever may be said of their oppression, possess a very controlling influence, their friendship is worthy of being preserved by public functionaries, and their opposition is to be dreaded" ("Travels in Europe and Africa," p. 308, New York, 1819).

Mohammed Bey.

During the long reign of Aḥmad Bey the Jews enjoyed a period of great prosperity. His successor, Mohammed Bey, inaugurated his reign in 1855 by abolishing the drudgeries formerly imposed upon the Jews; the caid Joseph Scemama, with whom the bey was on very intimate terms, probably used his influence in behalf of his coreligionists. In the same year, however, Mohammed Bey, being very religious, caused the execution of a Jew named Batto Sfoz on a charge of blasphemy. This execution aroused both Jews and Christians, and a deputation was sent to Napoleon III., asking him to interfere in their behalf. After two years of diplomatic negotiations a man-of-war was sent to enforce the demands of the French government. Mohammed Bey yielded, and issued a constitution, according to which all Tunisians, without distinction of creed, were to enjoy equal rights. The following articles of this constitution were of special interest to the Jews: (§ 4) "No manner of duress will be imposed upon our Jewish subjects forcing them to change their faith, and they will not be hindered in the free observance of their religious rites. Their synagogues will be respected, and protected from insult." (§ 6) "When a criminal court is to pronounce the penalty incurred by a Jew, Jewish assessors shall be attached to the said court." The constitution was abrogated in 1864 in consequence of a revolution, which entailed great suffering on several Jewish communities, especially on that of Sfax; but the constant fear of foreign interference rendered the government very circumspect in its treatment of the Jews. Since 1881 Tunis has been a dependency of France; and the Jews now enjoy the same rights as their Mohammedan fellow citizens.

Population and Organization.

The bulk of the Jewish population of the regency, which numbers about 50,000 souls, is found in the city of Tunis (about 30,000 in a total population of 180,000). The Jews of that city are divided into two distinct communities: (1) the Tunsi, which comprises the descendants of the first settlers, and (2) the Grana (from "Granada"), which includes the descendants of the Spanish and Portuguese exiles, and of Jews of Leghorn ("Gorneyim") who settled there during the seventeenth and eighteenth centuries. At first, owing probably to their small numbers, the Spanish and Portuguese exiles mixed with the old settlers; but toward the end of the sixteenth century they formed a separate congregation under the name "Ḳehal Gerush," and worshiped in a reserved place in the Great Synagogue. The new congregation was greatly augmented by the arrival of Italian, or Leghorn, Jews, and by the middle of the seventeenth century it had its own synagogue and its own rabbis. The two congregations, however, were united in so far as both were under the jurisdiction of the caid, both contributing to the communal revenues derived from taxation on articles of consumption, more especially on meat and Passover bread. A complete separation of the two congregations took place at the end of the seventeenth century, when the Leghorn Jews established butcher-shops of their own, refusing to pay the high tax on meat. This naturally provoked bad feelings on the part of the Tunsi congregation, which now had to bear the whole burden of this tax. At last, in 1741, the two congregations entered into an agreement according to which the Tunsi was to pay two-thirds of the taxes and the Grana the remaining third. The Grana congregation remained under the authority of the caid until 1824, when Ḥusain Bey officially recognized its autonomy.

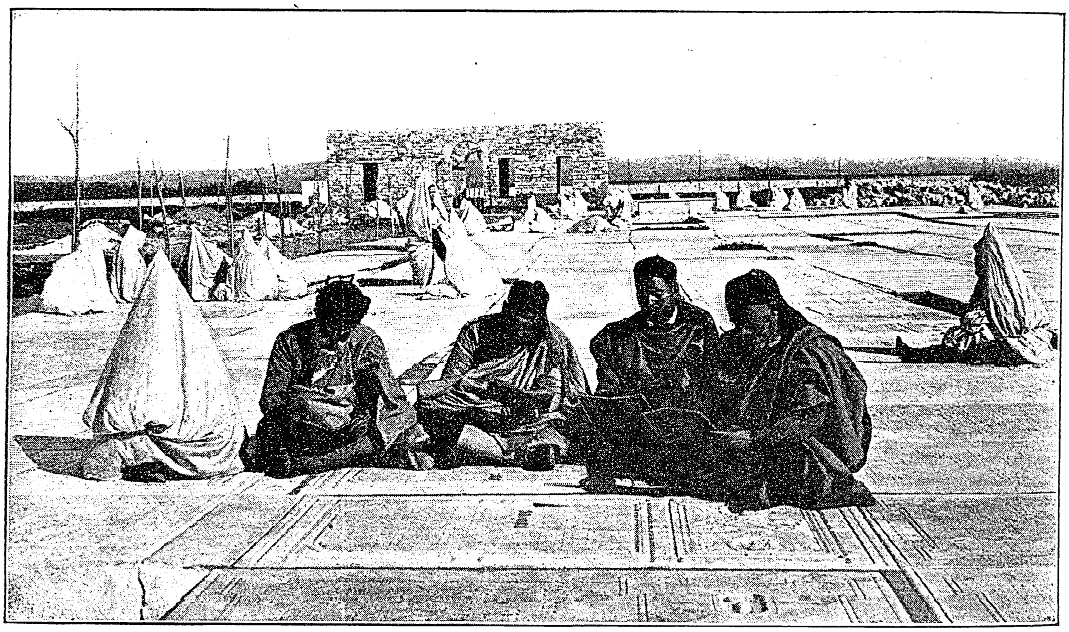
(From a photograph.)

Rabbis and Scholars.

The intellectual condition of the Tunisian Jews kept pace with their political progress. Even in the seventeenth century there were prominent rabbis and scholars in the city of Tunis and in Gerba. In the middle of that century a descendant of Ẓemaḥ Duran settled at Tunis and established a Talmud Torah which produced many Talmudic scholars. Isaac Lombroso, who officiated as chief rabbi of Tunis from about 1710 to 1752, was the author of a commentary, entitled "Zera‘ Yiẓḥaḳ," on different sections of the Talmud; this work, which appeared posthumously in 1768, is the only Hebrew book which has as yet been published in Tunis. Lombroso's successor as chief rabbi was Mas‘ud Raphael Alfasi, who, conjointly with his sons Ḥayyim and Solomon, published the "Mishḥa de-Rabuta" in Joseph Caro's Shulḥan ‘Aruk (Leghorn, 1805). Among other rabbis of the eighteenth century were Nathan ben Abraham Burgel, author of "Ḥoḳ Natan," novellæ and explanations on the mishnaic order Ḳodashim and the treatise Horayot, etc.; and Elijah Ḥai Vita Burgel, author of "Migdanot Natan," novellæ on various Talmudic treatises. The most prominent rabbis of the nineteenth century were: Joseph Burgel, author of "Zera‘ de-Yosef," on the Tosafot; Isaac Ṭayyib, author of "‘Erek ha-Shulḥan," on the Shulḥan ‘Aruk, "Ḥuḳḳot ha-Pesaḥ," on the laws of Passover, and "Wawe ha-‘Ammudim," on the "Sefer Yere'im" of Eliezer of Metz; Judah Nijar, author of "Ohole Yehudah," on the Sifre, "Shebut Yehudah," on the Mekilta, "Alfe Yehudah," on the treatise Shebu‘ot, "Mo‘ade Adonai," on the Semag; and "Simḥat Yehudah," on the small Talmudic treatises; Joshua Bases; Nathan Burgel; Samuel Sefag; Aaron ha-Kohen Mogadar; Abraham ha-Kohen Tanuji; Samuel Sefag; Abraham Ḥajjaj; Moses Faitusi; Nissim Marik; and Ḥai Bismut. The Tunisian rabbis possess full judicial power in all civil and commercial matters, and even in criminal cases if the crime committed is not one that calls for capital punishment. The community of Tunis possesses twenty-seven synagogues, among which the Great Synagogue of the Tunsi congregation, and that of the Portuguese, are very large. The Jewish inhabitants of Tunis include some financiers and a number of persons following liberal professions, but they are mostly engaged in commerce, in petty traffic, and especially in brokerage. There is also a considerable number of persons who follow various handicrafts.

Other Communities.

The other communities of the regency of Tunis are: **Bizerta,** with a Jewish population of about 600 persons; **Gabès,** with 500 Jews; **Gerba,** having 4,500 Jews and six synagogues; **Goletta,** 400 Jews and one synagogue; **Keff,** with 450 Jews, one synagogue; **Mehdia,** 100 Jews; **Monastir,** containing 500 Jews and one synagogue; **Nabel,** having 1,500 Jews; **Porta Farina,** 1,500 Jews; **Ras el-Jabel,** with 600 Jews and two synagogues; **Soliman,** 700 Jews; and **Susa,** with a Jewish population of 600 souls. Schools for children were established by the Alliance Israélite Universelle at Tunis, Mehdia, Susa, and several other places; special schools for Jews were established by the government at Sfax and Gabès. The superior hygienic conditions prevailing among the Jews of Tunis, in comparison with the other nationalities, caused great surprise to the French military physicians Testivint and Reinlinger. Instituting an inquiry into the number of deaths caused by tuberculosis among the various races of the regency, they found that from 1894 to 1900 the death-rate among the Mussulmans was 11.30 per 1,000 inhabitants; among the Europeans, 5.13; and among the Jews only 0.75 ("Revue d'Hygiène," xxii., No. 11).



Jewish Cemetery at Tunis.
(From a photograph in the possession of Dr. Maurice Fishberg, New York.)

Religious Customs.

The Tunsi preserve many peculiar religious customs which are not followed elsewhere. Their ritual, especially for the divine service on festivals, differs from the Sephardic as well as from the Ashkenazic. Some of the prayers are in Arabic. The first of every month the Yom Kippur Ḳaṭan is celebrated with great pomp, and the rabbis proclaim publicly full absolution from all sins. Passover cakes, as made in other countries, are wholly unknown to the Tunsi, but they use a peculiar method of their own in fashioning the unleavened dough into sticks, by joining the ends of which the cakes are made in the form of rings.

The Tunsi pronounce Hebrew largely according to the phonetic rules of Arabic. No distinction is made between the long and short vowels; the "ḳameẓ" is always pronounced as "ā." The pronunciation of the "ẓere" resembles more the "ḥiriḳ," while that of the "segol" approaches the "pataḥ." The פ and the ב are often confounded in pronunciation. No distinction is made between the "shewa" quiescent and the "shewa" mobile. Very peculiar is their custom of separating the Sabbatical sections "Maṭṭot u-Mas'e" at times when elsewhere they are read together, and vice versa. Contrary to the Masorah, the section Mishpaṭim is subdivided by the Tunsi into two sections, the first bearing the title of "Mishpaṭim," and the second that of "Im Kesef." Likewise another order is adopted in reading the Hafṭarot. With regard to the examination of the lungs of slaughtered animals ("bediḳah"), the Tunsi do not follow the regulations of Joseph Caro, but an older authority, whose prescriptions are less rigid.

Brides of twelve or thirteen are not uncommon among the Tunsi. The marriage ceremony is performed by a rabbi, and usually takes place in the synagogue. The bride and bridegroom are seated on chairs placed on a table, and a ṭallit covers the heads of both. Two witnesses stand one on each side, while the officiating rabbi takes his position in front of the table, with the prayer-book in one hand and the cup of blessing in the other. It is customary among the Tunsi women to appear every Friday in the cemetery with a small earthen jar containing slaked lime, and a brush, with which they clean and whitewash the tombstones of their relatives and friends. The cemetery is usually outside the city walls, and, not being enclosed, is frequently entered by animals; the tombs, which are built of brick and mortar, are flat, and not more than six inches above the ground. See CARTHAGE.

TUR, NAPHTALI WOLF: Russian Hebraist; born at Wilna; died there May 29, 1885 (according to Zeitlin, June 8, 1884). Tur settled in Warsaw, where he taught Hebrew and several modern languages. He was a talented poet; but, owing to his untimely death, most of his productions remain unpublished. Of those which have been printed may be mentioned: "Ha-Yobel" (in "Ha-Asif," i. 1-10), a long poem in honor of Sir Moses Montefiore's centenary; "Geberet ha-Ḥeshbon"; and "El ha-Ishshah" (*ib.* ii. 556-561). Several of his poems are published in Gottlober's "Ha-Boḳer Or."

TURIN: Italian city on the River Po; formerly capital of the duchy of Savoy, and later of the kingdom of Sardinia; now (1905) the chief city of the province of like name. Jews were admitted to Turin in 1424, probably because they loaned money at a lower rate of interest than the Christians. The first Jew to settle with his family in the city in that year was Elia Alamandi. A statute of Amadeus VIII., dated June 17, 1430, obliged the Jews of the duchy to wear a badge of red cloth on the shoulder, forbade them to live among Christians, and prohibited them from building new synagogues, besides imposing other restrictions. The Jews were now compelled to live in the Via San Tommaso, near the so-called "Gamelotto." About this time originated the treaty or agreement between the duke of Savoy and the Hebrews. It was made for ten years only, but was renewable; it guaranteed to the Jews freedom of residence in Turin, and regulated their rights and privileges. Amadeus, besides, promulgated a special decree forbidding Christians to kill, wound, or flog the Hebrew residents, or to disturb them in their religious worship or festivals.

Under Emmanuel Philibert.

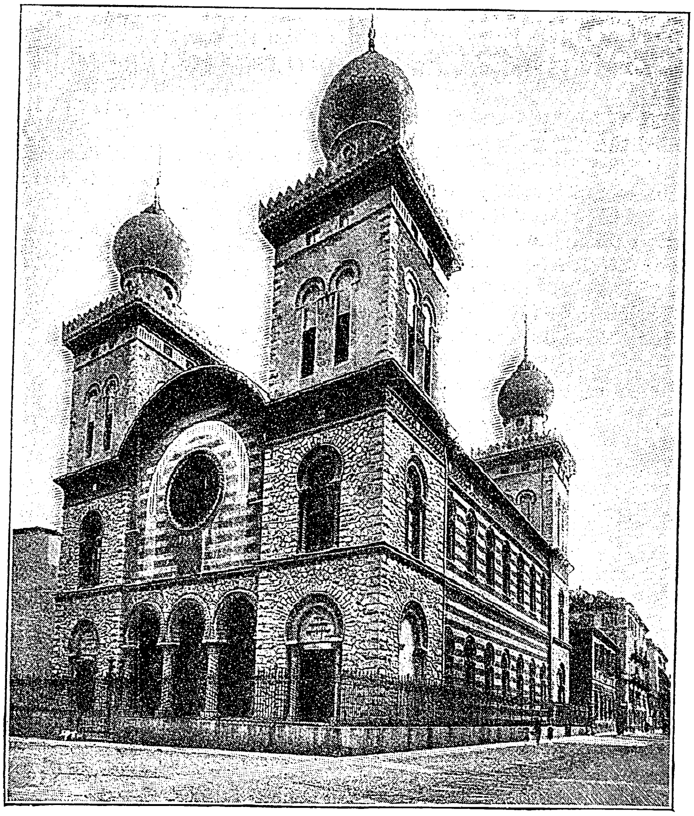
The reign of Emmanuel Philibert (1553-80) fell in a disastrous period for all the Italian Jews. Those of Piedmont alternately received concessions and suffered persecutions, according to the duke's need of money. On July 19, 1560, Emmanuel Philibert decreed the expulsion of all Jews from his dominions; but their own entreaties and the intercession made in their behalf by the Duchess Margherita secured for them a respite of four months. One of the duke's councilors, Negron de Negri of Genoa, urged his master to renew the decree of expulsion and to insist upon the departure of the Jews within ten days. Fortunately, however, the kindly intervention of an official at the ducal tribunal obtained the revocation of the decree; and the duke made an agreement with the Jews under which they were still permitted to inhabit Piedmont. Very soon after, however (Oct., 1566), Emmanuel Philibert again issued a decree ordering the departure of the Jews from his domains within a space of fifteen days unless they paid down 40,000 gold florins. The Jews at once quitted his dominions, but on the payment of half the sum demanded they were permitted to return. They then executed a new agreement under which they pledged themselves to pay a yearly tax of 1,500 gold florins. By another decree (Sept. 4, 1572) Emmanuel Philibert, at the request of Vitale Sacerdoti, introduced some favorable alterations into the statutes of Amadeus VIII. Among other things, the Jews were permitted to enjoy the right of "ḥazaḳah" and of owning real estate. Simon, a brother of Sacerdoti, was sent by the duke in the same year to Constantinople to propose the establishment of a consulate there. Emmanuel Philibert furthermore granted the Jews the right of assembling once a year (for religious purposes), and of owning a special piece of land as a cemetery.

In the Seventeenth Century.

At Philibert's death his son, Charles Emmanuel I., ascended the throne (1580-1630). Cardinal Borromeo of Milan urged him to expel the Hebrews again from his dominions. He yielded, however, to the entreaties of the latter, and made a new contract with them, allowing them to remain in the country on certain conditions. He also confirmed the privileges granted them by his father, and placed them under the jurisdiction of a specially appointed judge called the "conservatore." The first "conservatore" was the senator Gasparo Tesauro, Marquis of Fossiano. Charles Emmanuel also repealed the obligation, imposed on the Jews in 1560, of paying a yearly sum of 25 scudi to the students of the university on St. Catherine's Day. He twice renewed the decree forbidding Christians to molest the Jews or to offend them by disturbing their religious functions (Dec. 15, 1603, and Oct. 20, 1610). In the first instance he also agreed, on condition of a donation of 60,000 scudi payable in twelve years beginning with 1604, that the Jews should engage unmolestedly in trade and commerce, and should not be more heavily taxed than other citizens. Further, he allowed them to lend on pledges, which had been forbidden them by Amadeus VIII. This was, however, regulated by special laws. The tribunals were required to recognize the trustworthiness of the books in which the Jews entered their contracts. Permission was further granted the Jews to meet twice a year to elect their leaders and to arrange for the payment of the tribute due the state. In order to raise this tribute the Jewish community was allowed to tax all Hebrews who came to reside within the limits of the state.

Physicians and surgeons were allowed to follow their professions, subject, however, to the consent of the Archbishop of Turin. Finally, he granted a full pardon for all crimes, offenses, and infractions of the law committed up to the day of publication of the decree on condition of the payment of 2,000 ducats volunteered by certain members of the community, namely, G. Lattes, M. Jarach, C. and S. Melle, and S. Brisa, who were afterward exempted from wearing the distinctive badge. In Aug., 1612, a Jew named Leone Segre was murdered in the enclosure of the ghetto. The Jews accused of this deed were liberated on the payment of 50,000 "ducantoni." In 1614 all sentences then being served were remitted in consequence of the payment of 18,000 "ducantoni."

In 1618 the Jewish community of Piedmont was united with that of the city and territory of Nizza. In 1626 the residence of the Jews was changed, and the district at that time called "San Giovanni di Dio" was assigned to them. In 1640 Victor Amadeus I., at the request of M. Treves, L. Lattes, and A. Levi, confirmed all the rights and privileges granted to the Jews by his predecessors. At the instance of the Jewish community, which presented him with 3,300 lire, these privileges were further confirmed by the Senate on the occasion of the marriage of Charles Emmanuel II. in 1662. In 1680, by an order of the regent, Madama Reale, dated Aug. 12, 1679, the site of the ghetto was again changed, this time to the quarter of Beatus Amadeus; and here the Jews continued to dwell until 1828, in which year certain wealthy families obtained leave to reside beyond the ghetto limits. In 1706 the Jewish cemetery situated near the arsenal was destroyed by the chances of war, and the Jews obtained leave to bury their dead in San Giovanni di Dio, abandoned in 1680 (in 1782 this cemetery became part of the Vanchiglia district, near the River Po; and at length, in 1854, it was incorporated with the common cemetery).



The Synagogue at Turin, Italy.
(From a photograph.)

In the Eighteenth Century.

The condition of the Jews of Piedmont was no better during the eighteenth century, owing to the intolerant spirit shown by the papal government. Indeed, their legal status became in some respects considerably worse. For instance, Victor Amadeus II. wished to deprive them of the power of acquiring landed property. He therefore enforced the constitutions of the years 1723, 1729, and 1770, which, like so many of the ducal laws, were hostile to the interests of the Jews. A certain Luigi Pisani of Jerusalem, formerly a rabbi, but later converted to Christianity, preached a sermon to the Jews of Turin on Feb. 7, 1715, in the church of San Francesco di Paola, to demonstrate to them "the blindness, error, and falseness which enveloped them." In 1780 there were about 1,500 Jews in Turin.

The first indications of the approach of better times for the Jews came with the French Revolution; but the provisional Austro-Russian-Piedmontese government (May, 1799) demanded a stricter observance of all the laws and regulations than had been exacted of the Jews before the Revolution, and subjected the entire community to heavy penalties for the slightest infraction. On the return of French domination, the Jews of Turin obtained from the imperial government equality with their French coreligionists; but upon the restoration the old restrictions soon came into force again. Jewish students were expelled from the schools; and the proprietary classes were allowed five years in which to sell their possessions. At length, by a decree dated March 6, 1816, Victor Emmanuel I. finally exempted the Jews from wearing a distinctive badge, and gave them full liberty to engage in trade, commerce, and the useful arts. They were still excluded, however, from the universities, from municipal offices, and from the administration of works of charity. But better times were approaching. In 1848 a pamphlet, entitled "Dell' Emancipazione

Emancipation.

Civile degl' Israeliti," by the Marquis Massimo d'Azeglio of Turin, later minister of the kingdom of Sardinia, appeared in Florence, and was followed by the statute of March 4 of that year. On July 19, 1848, a law was passed declaring the equality of Jews with other citizens.

The following rabbis of note were natives of Turin: sixteenth century: Nethaneel ben Shabbethai ha-Dani; seventeenth century: Joseph Calvo, Daniel ben Joseph Calvo, and Joseph ben Michael Ravenna; eighteenth century: Joshua Colon, Isaac Formiggini, Abraham Sanson ben Jacob ha-Levi Fubini, Michel Solomon Jonah, Gabriel Pontremoli, Jacob ben Joshua Benzion Segre, Abraham ben Judah Segre, Daniel Valabrega; nineteenth century: Abraham de Cologna, Felice Bachi, Elijah Aaron Lattes, Samuel Solomon Olper, Isaiah Foà Lelio della Torre, Sabbato Graziadio Treves, Giuseppe Lattes, Samuel Ghiron, G. Foa, and G. Bolaffio.

The Jews of Turin in 1901 numbered 5,700.

TURKEY: Empire of southeastern Europe and western Asia. For present purposes Turkey is taken to mean that part of Europe which is directly under Ottoman rule, Asia Minor, the islands of the Archipelago, and Mesopotamia. Syria and Palestine, although under the direct administration of the Porte, and Arabia are considered as distinct countries, and have been so treated in The Jewish Encyclopedia.

Early History.

Jews have lived in Turkey from very early times. Tradition says that there was a colony of them in Thessaly at the time of Alexander the Great; and later they are found scattered throughout the eastern Roman empire (see Adrianople; Byzantine Empire). The first Jewish colony in Turkey proper was at Brusa, the original Ottoman capital. According to one tradition, when Sultan Urkhan conquered the city (1326) he drove out its former inhabitants and repeopled it with Jews from Damascus and the Byzantine empire. These Jews received a firman permitting them to build a synagogue; and this edifice still exists, being the oldest in Turkey. The Jews lived in a separate quarter called "Yahudi Mahalessi." Outside of Brusa they were allowed to live in any part of the country; and on payment of the "kharaj," the capitation-tax required of all non-Moslem subjects (see below), they might own land and houses in the city or country.

Fourteenth and Fifteenth Centuries.

Under Sultan Murad I. (1360–89) the Turks crossed over into Europe, and the Jews of Thrace and Thessaly came under Ottoman dominion. The change was a welcome one to them, as their new Moslem rulers treated them with much more toleration and justice than they had received from the Christian Byzantines. The Jews even asked their cobelievers from Brusa to come over and teach them Turkish, that they might the quicker adapt themselves to the new conditions. The Jewish community of Adrianople began to flourish, and its yeshibah attracted pupils not only from all parts of Turkey, but also from Hungary, Poland, and Russia. The grand rabbi at Adrianople administered all the communities of Rumelia. About fifty years after the conquest of Adrianople a converted Jewish Moslem, Torlak Kiamal by name, took part in an insurrection of dervishes and preached communistic doctrines, for which he was hanged by Sultan Mohammed I. (1413–21).

Sultan Murad II. (1421–51) was favorably inclined toward the Jews; and with his reign began for them a period of prosperity which lasted for two centuries and which is unequaled in their history in any other country. Jews held influential positions at court; they engaged unrestrictedly in trade and commerce; they dressed and lived as they pleased; and they traveled at their pleasure in all parts of the country. Murad II. had a Jewish body-physician, Isḥaḳ Pasha, entitled "ḥakim bashi" (physician-in-chief), to whom the ruler granted a special firman exempting his family and descendants from all taxes. This was the beginning of a long line of Jewish physicians who obtained power and influence at court. The same sultan created also an army corps of non-Moslems called "gharibah" (= "strangers"); and to this Jews also were admitted when they were unable to pay the kharaj.

Murad's successor, Mohammed the Conqueror (1451–81), issued three days after the conquest of Constantinople a proclamation inviting all former inhabitants to return to the city without fear. Jews were allowed to live freely in the new capital as well as in the other cities of the empire. Permission was granted them to build synagogues and schools and to engage in trade and commerce without restrictions of any kind. The sultan invited Jews from the Morea to settle in Constantinople; and he employed Jewish soldiers. His minister of finance ("defter-dar") was a Jewish physician named Ya'ḳub, and his body-physician was also a Jew, Moses Hamon, of Portuguese origin. The latter likewise received a firman from the sultan exempting his family and descendants from taxes.

Office of Ḥakam Bashi.

It was in this reign that the office of ḥakam bashi of Constantinople came to have so much importance. Moses Capsali was the first to fill the position, being appointed thereto by the sultan. He took his place in the Turkish divan, or state council, beside the mufti, or chief of the Ulema, and above the Greek patriarch. He was the official representative of the Jews before the Turkish government: he apportioned and collected their taxes, appointed rabbis, acted as judge, and administered the affairs of the Jewish communities generally. After Capsali the Jews themselves elected their chief rabbi, the government ratifying their choice as a mere matter of form.

Another celebrated rabbi who lived during the reign of Mohammed the Great was Mordecai b. Eliezer Comtino. Karaites as well as Rabbinites studied under him. The former, although having been the most influential element among the Jews during the Byzantine empire, had now fallen into

Comtino and the Karaites.

such a state of ignorance that for a full century they had produced no author of repute and had been obliged to turn to the Rabbinites for instruction. They were stirred to new life, however, by the increase in their numbers through immigration from Poland and the Crimea, and by contact with the Rabbinites; and they used their new energy in disagreeing among themselves, notably in regard to a reform in connection with the Sabbath light and about the old question of the calendar (see Karaites). Certain Rabbinites, therefore, particularly Gedaliah ibn Yaḥya, thought the proper time had come to effect a reconciliation between the two parties. Mordecai Comtino spoke with respect of the Karaites; and the Karaites and Rabbinites who studied under him acquired tolerance as well as knowledge. The Rabbinite teachers Enoch Saporta, Eliezer Capsali, and Elijah ha-Levi made their Karaite pupils promise not to speak disrespectfully of the Talmudic authorities, and to observe the Rabbinite festivals. On the other hand, the grand rabbi, Moses Capsali, was strongly opposed to any affiliation of the two parties, holding that Karaites ought not to be instructed in the Talmud, since they rejected it. His successor, Elijah Mizraḥi, was more tolerant, and used all his influence to preserve friendly relations. The Karaite community, however, became more and more isolated. Many of its members went to the Crimea; and those who were left lived in a separate quarter walled off from the rest of the Jews.

Isaac Ẓarfati's Letter.

The condition of the Jews in Turkey about the middle of the fifteenth century was so prosperous and in such contrast to the hardships endured by their fellow Israelites in Germany and Europe generally that Isaac Ẓarfati, a Jew who had settled in Turkey, was moved to send a circular letter to the Jewish communities in Germany and Hungary inviting their members to emigrate to Turkey. The letter is preserved in the Bibliothèque Nationale at Paris (Ancien Fonds, No. 291). It gives a glowing description of the lot of Jews in Turkey (for its date see Grätz, "Gesch." viii., note 6). Ẓarfati says:

> "Turkey is a land in which nothing is lacking. If you wish, all can go well with you. Through Turkey you can safely reach the Holy Land. Is it not better to live under Moslems than under Christians? Here you may wear the finest stuffs. Here every one may sit under his own vine and fig-tree. In Christendom, however, you may not venture to dress your children in red or blue without exposing them to the danger of being beaten blue or flayed red."

This letter caused an influx into Turkey of Ashkenazic Jews, who soon became amalgamated with the earlier Jewish inhabitants.

Effects of Expulsion from Spain.

The greatest influx of Jews into Turkey, however, occurred during the reign of Mohammed's successor, Bayazid II. (1481–1512), after the expulsion of the Jews from Spain and Portugal. That ruler recognized the advantage to his country of this accession of wealth and industry, and made the Spanish fugitives welcome, issuing orders to his provincial governors to receive them hospitably. The sultan is said to have exclaimed thus at the Spanish monarch's stupidity: "Ye call Ferdinand a wise king—he who makes his land poor and ours rich!" The Jews supplied a want in the Turkish empire. The Turks were good soldiers, but were unsuccessful as business men; and accordingly they left commercial occupations to other nationalities. They distrusted their Christian subjects, however, on account of their sympathies with foreign powers; hence the Jews, who had no such sympathies, soon became the business agents of the country. Coming as they did from the persecutions of Europe, Mohammedan Turkey seemed to them a haven of refuge. The poet Samuel Usque compared it to the Red Sea, which the Lord divided for His people, and in the broad waters of which He drowned their troubles. The native Turkish Jews helped their persecuted brethren; and Moses Capsali levied a tax on the community of Constantinople, the proceeds of which were applied toward freeing Spanish prisoners.

Sixteenth Century.

The Spanish Jews settled chiefly in Constantinople, Salonica, Adrianople, Nicopolis, Jerusalem, Safed, Damascus, and Egypt, and in Brusa, Tokat, and Amasia in Asia Minor. Smyrna was not settled by them until later. The Jewish population at Jerusalem increased from 70 families in 1488 to 1,500 at the beginning of the sixteenth century. That of Safed increased from 300 to 2,000 families and almost surpassed Jerusalem in importance. Damascus had a Sephardic congregation of 500 families. Constantinople had a Jewish community of 30,000 individuals with forty-four synagogues. Bayazid allowed the Jews to live on the banks of the Golden Horn. Egypt, especially Cairo, received a large number of the exiles, who soon outnumbered the native Jews (see Egypt). The chief center of the Sephardic Jews, however, was Salonica, which became almost a Spanish-Jewish city owing to the fact that the Spanish Jews soon outnumbered their coreligionists of other nationalities and even the original native inhabitants. Spanish became the ruling tongue; and its purity was maintained for about a century.

The Jews introduced various arts and industries into the country. They instructed the Turks in the art of making powder, cannon, and other implements of war, and thus became instruments of destruction directed against their former persecutors. They distinguished themselves also as physicians and were used as interpreters and diplomatic agents. Salim I. (1512–20), the successor of Bayazid II., employed a Jewish physician, Joseph Hamon. This ruler also was kind to the Jews: and after the conquest of Egypt (1517) he appointed Abraham de Castro to the position of master of the mint in that country. Salim changed the administrative system of the Jews in Egypt, and abolished the office of nagid. It is interesting to note that the Turkish Jews were in favor of the conquest of Egypt, whereas the orthodox Moslems opposed it.

Sulaiman the Magnificent (1520–66), like his predecessor Salim I., had a Jewish body-physician, Moses Hamon II., who accompanied his royal master on his campaigns. Turkey at this time was at the high-water mark of its power and influence and was feared and respected by the great powers of

Under Sulaiman the Magnificent.

Europe. Its Jews were correspondingly prosperous. They held positions of trust and honor, took part in diplomatic negotiations, and had so much influence at court that foreign Christian ambassadors were frequently compelled to obtain favors through them. Commerce was largely in their hands; and they rivaled Venice in maritime trade. In Constantinople they owned beautiful houses and gardens on the shores of the Bosporus. In 1551 Nicolo Nicolai, chamberlain to the King of France, who accompanied the French ambassador to Constantinople, described the Jews in Turkey as follows:

Nicolo Nicolai's Account.

> "There are so many Jews throughout Turkey, and in Greece especially, that it is a great marvel and downright incredible. They increase daily through the commerce, money-changing, and peddling which they carry on almost everywhere on land and on water; so that it may be said truly that the greater part of the commerce of the whole Orient is in their hands. In Constantinople they have the largest bazars and stores, with the best and most expensive wares of all kinds. In addition, one meets among them many skilled artists and mechanicians, especially among the Maranos, who some years ago were driven out of Spain and Portugal. These, with great harm and injury to Christendom, have taught the Turks to make implements of war. . . . The said Jews have also established a printing-press, which is a wonderful thing to the Turks. They print books in Latin, Greek, Italian, Syriac, and Hebrew; but in Turkish and Arabic they are not allowed to print. Besides, they know most languages; so that they are employed as interpreters" ("Viaggi nella Turchia," pp. 142-143, Venice, 1580).

Nicolai also mentions Hamon as "a person of great honor, great activity, great renown, and great wealth."

If one recalls the warlike activity of the Turks at this time, when they were laying siege to Vienna and threatening to overrun Europe, the full significance of Nicolai's allusion to the manufacture of implements of war is evident. The Jews also had a more direct influence on the making of war and of peace through the diplomatic negotiations in which they took part. Moses Hamon influenced the sultan in favor of Donna Gracia Mendesia; and the ruler sent an imperial messenger to Venice demanding that the authorities set her at liberty and allow her to proceed to Turkey. She and her nephew Don Joseph Nasi at once took a prominent part in Jewish affairs in Turkey. Joseph, through his wide business connections among his fellow Maranos in the capitals of Europe, was able to furnish the sultan with confidential information as to what was taking place at the foreign courts; and he soon became a favorite counselor. The sultan was induced to take an interest in the fate of the Turkish Jewish prisoners at Ancona; and he wrote a haughty letter to Paul IV. demanding their release. In revenge for the fate of the other Jews at Ancona, the Turkish Jews, led by Donna Gracia and Joseph, endeavored to place an effective boycott upon the port of that city, and to transfer its trade to Ferrara; but the scheme fell through owing to lack of unity among its promoters. Joseph's influence at court was further strengthened by the fact that he openly supported the claims of Sulaiman's son Salim to the throne at a time when the succession was doubtful. He thus won that prince's lasting favor, of which all the later intrigues of the French and the Venetian envoys were unable to deprive him.

Office of Kahiya.

Sulaiman instituted for the benefit of the Jews the office of "ḳiahya" or Kahiya (קהייא). It was the duty of this official to represent them at court and to defend them against injustice and oppression. The first incumbent of the office, appointed by the sultan himself, was Shealtiel. There was the more need for such a defender, since the Jews in the Turkish empire were continually being harassed by their Christian neighbors. In Amasia, in Asia Minor, the old accusation of ritual murder was revived; and several Jews were slain. Later, when their innocence had been established, the cadi in anger put to death some of the Greeks who had made the accusation. Another instance of the kind led Sulaiman to enact a law under which all future blood accusations should be tried before the sultan himself.

Sulaiman conferred the city of Tiberias and its environs upon his favorite Joseph Nasi; and the latter at one time planned the foundation of a Jewish colony in Palestine. The walls of Tiberias were rebuilt, and Joseph invited Jews from Europe, even providing ships for their transportation. It is not known how many responded to the call; but the scheme of a Jewish colony in Tiberias was not realized, and Joseph appears to have transferred his interest elsewhere.

French Ships Seized by Joseph Nasi.

At the accession of Salim II. (1566) Joseph was created Duke of Naxos and of the Cyclades Islands; but he continued to reside at Constantinople, appointing as his vicegerent for the islands a Spanish nobleman named Coronello. Thus in less than 100 years after the Jews had been driven out of Spain a nobleman of that realm was in Jewish employ. In the year following Salim's accession an Austrian embassy was commissioned to call on Joseph Nasi and offer him a fixed salary to secure his good graces. In the next year he received a firman from the sultan empowering him to seize the cargoes of French ships in Turkish waters, to the amount of the debt which the French government had long owed to the Mendesia family and which both Sulaiman and Salim had unsuccessfully tried to collect for him. In 1569 he finally succeeded in reimbursing himself from cargoes seized in the port of Alexandria, France complaining and protesting in vain. Not more successful were the efforts of the French ambassador to undermine Joseph's position at the Turkish court (see Nasi, Joseph). A few years later Joseph succeeded in influencing the sultan to make war against Venice because of Cyprus. Joseph's influence with the sultan was known to be such that even Christian rulers applied directly to him. Emperor Ferdinand of Austria addressed a letter to him, as did also William of Orange, the latter trying to induce him to declare war on Spain. This move, although favored by Don Joseph, was opposed by the grand vizier Mohammed Sokolli, who had long been his enemy. Joseph's influence ceased at the death of Salim, when the rule of the grand viziers, beginning with Sokolli, commenced.

Joseph Nasi's place was taken by another Jew, Solomon Ashkenazi, who, although remaining more in the background, and working through the grand viziers instead of coming directly in contact with the sultan, was even more influential than Joseph. Ashkenazi's name is frequently mentioned in the diplomatic correspondence of the time between the Porte and the other European courts. The war with Venice which had been begun by one Jew was terminated by another. Ashkenazi, who had been working in behalf of peace while hostilities were still in progress, was delegated by the Porte to arrange terms of peace and was sent to Venice for that purpose. The Venetians, distasteful as it was to them, were obliged to receive the Jew with all the honors due the ambassador of so powerful a nation as Turkey. Ashkenazi was influential also in causing the choice of a king of Poland to fall on Henry of Anjou. He was likewise entrusted with the negotiations for a peace between Spain and Turkey.

Sumptuary Laws.

All the favor shown to individual Jews, however, did not affect the lot of the community as a whole, whose fate depended on the caprice of a despotic ruler. Sultan Murad III., for instance, on one occasion ordered the execution of all the Jews in the empire merely because he was annoyed by the luxury which they displayed in their clothing. It was only after the intervention of Solomon Ashkenazi and other influential Jews with the grand vizier, seconded by the payment of a large sum of money, that the order was changed into a law restricting dress. Thereafter Jews were required to wear a kind of cap instead of a turban, and to refrain from using silk in making their garments.

Certain Jewesses became prominent about this time as physicians and intriguers. Esther Kiera was especially famous as the favorite of the Venetian sultana Baffa, wife of Murad III. and mother of Mohammed III. Turkish women of the harem have always exercised more influence than is commonly attributed to them; and the Jewesses who were made welcome there in various capacities frequently acted as go-betweens, and indirectly influenced the actions of prominent men. Esther Kiera, through her position as an intimate of the sultana Baffa, became all-important in the diplomatic intrigues of the time; and she carried on a traffic in army posts. She acquired great wealth, much of which was spent in helping her poor coreligionists and in furthering their literary efforts. Greed, however, appears to have overmastered her discretion; and she met a tragic end. The Mendesia family produced two women, Gracia Mendesia and her daughter Reyna Nasi, wife of Joseph Nasi, who did much for the Jews of Turkey. Another Jewess of importance was the widow of Solomon Ashkenazi. She succeeded in curing the young sultan Aḥmad I. of the smallpox, after all other doctors had failed. A contemporary of Esther Kiera in 1599 wrote a letter which accompanied a present from the sultan's mother to the Queen of England. A translation of it may be found in Kayserling, "Die Jüdischen Frauen," pp. 91-92.

Messianic Hopes.

The prosperity enjoyed by the Jews of Turkey in the sixteenth century led them to entertain hopes of the Messiah, and cabalistic doctrines spread rapidly. Especially prominent in promoting them were Judah Ḥayyat, Baruch of Benevento, Abraham b. Eliezer ha-Levi of Adrianople, Meïr ibn Gabbai, and David ibn Abi Zimra (Franco, "Histoire des Israélites de l'Empire Ottoman," p. 52). In the early part of the century the appearance of that eccentric adventurer David Reubeni, who claimed to be an ambassador from an independent Jewish king in Arabia, sent to seek aid against the Turks, aroused hopes throughout the Jewish world that he was the precursor of the Messiah. Influenced by him, Solomon Molko of Portugal began to have visions, and was moved in one of them to go to Turkey. In Salonica, one of the chief seats of the Cabala in the empire, he fell in with the aged cabalist Joseph Ṭaiṭazaḳ; and in Adrianople he inspired the young Joseph Caro with cabalistic visions. Molko went also to Palestine and remained for some time in Safed, at that time a veritable nest of cabalism. He proclaimed that the Messianic period would begin in 1540 (5300 A.M.). After Molko's death (1532) the Jews of Safed still clung to their hope of the Messiah; and, in order to prepare the way for him, they attempted to introduce unity into Judaism by organizing a recognized Jewish tribunal or Sanhedrin. The plan, however, came to nothing, owing to the personal rivalry of the two leaders of the Safed and Jerusalem communities respectively, Jacob Berab and Levi b. Jacob Ḥabib.

After Berab's death Joseph Caro became the leading rabbi in Safed, having come to Palestine filled with the idea that he was destined to take a prominent part in preparing the way for the Messiah. He, like Molko, saw visions and dreamed dreams. But the visions and religious ecstasies of Molko and Caro were as nothing compared with the extravagances of the cabalistic leaders who succeeded them. In the last three decades of the sixteenth century Safed and all Galilee became the scene of excesses of religious demoniacs, conjurers, and miracle-workers; and cabalistic notions spread thence throughout Turkey and into Europe. This movement derived its impulse principally from two men, Isaac Luria and his disciple Ḥayyim Vital. The former communed with departed spirits, talked with animals and angels, and developed a peculiar theory concerning the origin and quality of souls and their migrations. The Zohar was placed on a level with the Talmud and the Bible.

The prosperous condition of the Jews in Turkey during this period was not a deep-rooted one. It did not rest on fixed laws or conditions, but depended wholly on the caprice of individual rulers. Furthermore, the standard of civilization throughout Turkey was very low, and the masses were illiterate. In addition there was no unity among the Jews themselves. They had come to Turkey from many lands, bringing with them their own customs and opinions, to which they clung tenaciously, and had founded separate congregations. And with the waning of Turkish power even their superficial prosperity vanished. Aḥmad I., who came to the throne in the early years of the seventeenth century, was, it is true, favorably disposed toward the Jews, having been cured of smallpox by a Jewess (see above); and he imprisoned certain Jesuits for trying to convert them.

Seventeenth Century.

But under Murad IV. (1623–40) the Jews of Jerusalem were persecuted by an Arab who had purchased the governorship of that city from the governor of the province; and in the time of Ibrahim I. (1640–49) there was a massacre of Ashkenazic Jews who were expecting the Messiah in the year 1648, and who had probably provoked the Moslems by their demonstrations and meetings. The war with Venice in the first year of this sultan's reign interrupted commerce and caused many Jews to remove to Smyrna, where they could carry on their trade undisturbed. In 1660, under Mohammed IV. (1649–1687), Safed was destroyed by the Arabs; and in the same year there was a fire in Constantinople in which the Jews suffered severe loss. Under the same sultan Jews from Frankfort-on-the-Main settled in Constantinople; but the colony did not prosper. It was also during this reign that the pseudo-Messiah Shabbethai Ẓebi caused such an upheaval in Judaism. It is characteristic of the Turkish attitude toward the Jews, and in striking contrast with the attitude of European powers, that no steps were taken to punish the Jews who took part in the agitation. Shabbethai Ẓebi was one of the few pseudo-Messiahs who have left sects behind them. The chief seat of his followers is at Salonica.

The Dönmeh.

They are called "Dönmeh" (a Turkish word signifying "apostates") or "Ma'aminim." There are three subsects, whose devotions are separate and secret. The first is that of the Ismirlis or Smyrnians, who shave their chins; the second is composed of the followers of Jacob Querido, a reputed son of Shabbethai, who shave their heads, but not their chins; and the third, the members of which shave neither the chin nor the head, consists of followers of Othman Baba, who in the eighteenth century tried to reconcile the first two sects. The Dönmeh resemble the Moslems and outwardly practise their customs, even going to the mosques on Fridays. Their own meeting-houses, or "kals," are secret, and connect with their dwelling-houses by interior passages. They are very respectable and prosperous, and are said to have no poor among them (see Dönmeh; J. T. Bent, "A Peculiar People," in "Longman's Magazine," xi. 24–36).

Michel Febre, a Capuchin monk who lived in Turkey for eighteen years and who published an account of his experiences there and in other lands, has given a description of the Jews in Turkey in the middle of the seventeenth century. He says ("Théâtre de la Turquie," in "R. E. J." xx. 97 *et seq.*):

Michel Febre's Description.

> "There are two classes of Jews in Turkey, viz., natives, or original inhabitants of the country, and strangers, so called because their ancestors came from Spain and Portugal. The former, like the Christians, wear colored turbans, and are only to be distinguished from them by their shoes, which are black or violet, while those of the Christians are red or yellow. The second class wear a ridiculous head-dress, like a brimless Spanish hat. They have separate cemeteries and do not agree with Jews of the other class on certain tenets of religion. Both classes are found in large numbers in most of the cities belonging to the grand seignior, especially in commercial towns such as Smyrna, Aleppo, Cairo, Thessalonica, etc. They are mainly occupied as bankers, money-changers, and usurers; in buying old things and, after mending them, selling them as new; as employees in the custom-houses, as intermediaries in bargains, and as doctors, chemists, and interpreters. . . . They are so skilful and industrious that they make themselves useful to every one; and there will not be found any family of importance among the Turks and the foreign merchants which has not in its employ a Jew, either to estimate merchandise and to judge of its value, to act as interpreter, or to give advice on everything that takes place."

Febre also comments on the filth which he noticed in the Jewish houses.

The history of the Jews in Turkey in the eighteenth century is principally a very brief chronicle of misfortunes.

Eighteenth Century.

One name stands out against the dark background—that of Daniel de Fonseca, who was chief court physician and played a certain political rôle. He is mentioned by Voltaire, who speaks of him as an acquaintance whom he esteemed highly. Fonseca was concerned in the negotiations with Charles XII. of Sweden.

In 1702 a law was passed forbidding Jews to wear yellow slippers and ordaining that in future they should wear only black coverings for the feet and head. In 1728 the Jews living near the Baluk Bazar, or fish-market, were obliged to sell their houses to Moslems and to move away so as not to defile the neighboring mosque by their presence. In 1756 one of the most terrible fires that Constantinople has ever experienced broke out in the Jewish quarter and devastated the city; in the following year the sumptuary laws against the Jews were renewed; and in the next year an earthquake destroyed 2,000 Jewish houses in Safed.

In the beginning of the eighteenth century a colony of Turkish Jews settled in Vienna.

Turkish Colony at Vienna.

Their position was established in the Treaty of Passarowitz (1718) between Turkey and the German empire, which made it possible for the inhabitants of one country to live in and to receive the protection of the government of the other, and vice versa. Many Turkish Jews took advantage of this treaty to live in Vienna, which was forbidden to native Austrian Jews. Consequently the latter obtained passports allowing them to live in Vienna as Turkish subjects (see Austria).

The Janizaries.

The destruction of the janizaries in the early part of the nineteenth century (1826) was a great boon to the Jews; for this lawless corps of soldiery had long been such a terror to them that the word "janissaro" was (and still is) used by Jewish mothers to frighten their disobedient children. The word "janizary" (Turkish, "yenicheri") was applied to soldiers recruited from Christians who as children had been taken away from their parents and brought up in the Mohammedan faith. The corps was first instituted in the middle of the fourteenth century. No Jews appear ever to have been forced into this service; but they suffered most from the excesses of this unruly military body. Nearly every great fire in Constantinople started in the Jewish quarter, being lighted by greedy janizaries, who then pretended to help to quench the flames, while in reality they plundered the houses. The rabbinical responsa from the sixteenth to the nineteenth century are full of cases submitted to Jewish tribunals concerning the outrages, assassinations, and robberies of which the Jews were victims at the hands of these soldiers, both in Constantinople and in the provinces. Nevertheless certain wealthy Jews, under imperial authorization, held the position of banker to this corps. They were called "ojak baziriani," "ṣarraf bashi," "ojak ṣarrafi," or "shapchi bashi." The best-known Jews who occupied this post were Judah Rosanes, Meïr Ajiman, Jacob Ajiman, and Baruch Ajiman, in the eighteenth century, and Isaiah Ajiman and Behor Carmona, at the beginning of the nineteenth century. The Jews of the lowest classes at times fraternized with the janizaries in their drunken debauches; and on the day of their destruction many janizaries sought refuge in Jewish houses.

In the Nineteenth Century.

The low grade of civilization existing throughout Turkey since the beginning of the wars with Russia in the eighteenth century seriously affected the status of the Jews, who were in a miserable condition until toward the end of the nineteenth century, when the fruit of the labor expended by the Alliance Israélite Universelle for their enlightenment began to be visible. The masses are still very ignorant; and in the large cities they live in cramped, dirty quarters. Their sufferings are due not to the legal discriminations against them, but to the general economic condition of the country and to the poverty and ignorance caused by the despotic rule of centuries. The attitude of the government is uniformly kind; and prompt punishment follows attacks on the Jews. Thus reparative acts on the part of the government followed the events that caused the Damascus Affair in 1840; the abduction of a Jewish girl at Haifa in 1864; the extortions of the governors of Bagdad, Larissa, and Salonica in 1866; the troubles in Janina in 1872; and those in Smyrna in 1873. In 1875, through the intervention of the Alliance, the Jews in the region of Diarbekr were protected from molestation by surrounding Kurds. In the same year in Khania the Alliance brought about the appointment of a representative of the Jews in the general council of the island; and again in 1882 the threatened electoral rights of the Jews were safeguarded. In 1883 the sultan publicly expressed his sympathy for the fate of the Jews of other countries and declared his satisfaction at the presence of Jewish officials in the Ottoman administration. That same year, when a fire devastated the Jewish quarter at Haskeui, in Constantinople, the sultan subscribed £T1,000 for the relief of those who had been left homeless, and placed certain barracks at their disposal. In 1887 the minister plenipotentiary from the United States to Turkey was a Jew, Oscar S. Straus. When Straus was replaced by Solomon Hirsch, the grand vizier in his address of welcome to the latter said (see "Allg. Zeit. des Jud." Aug. 15, 1889): "I can not conceal the satisfaction it gives me to see that for a second time your country has called a son of Israel to this eminent position. We have learned to know and esteem your coreligionists in our country, which they serve with distinction." Straus was again minister from 1897 to 1900. The Jews have been loyal supporters of the government. In the war of 1885, although not admitted to the army, they gave pecuniary and other aid. In Adrianople 150 wagons were placed by them at the disposal of the government for the transportation of ammunition; and in the war of 1897 the Jews of Constantinople contributed 50,000 piasters to the army fund.

On the failure, in 1866, of a Belgian firm, Baron de Hirsch acquired from the sultan concessions for the construction of railways in Turkey; and it was owing to his enterprise that the important line connecting Constantinople with the rest of Europe was carried through.

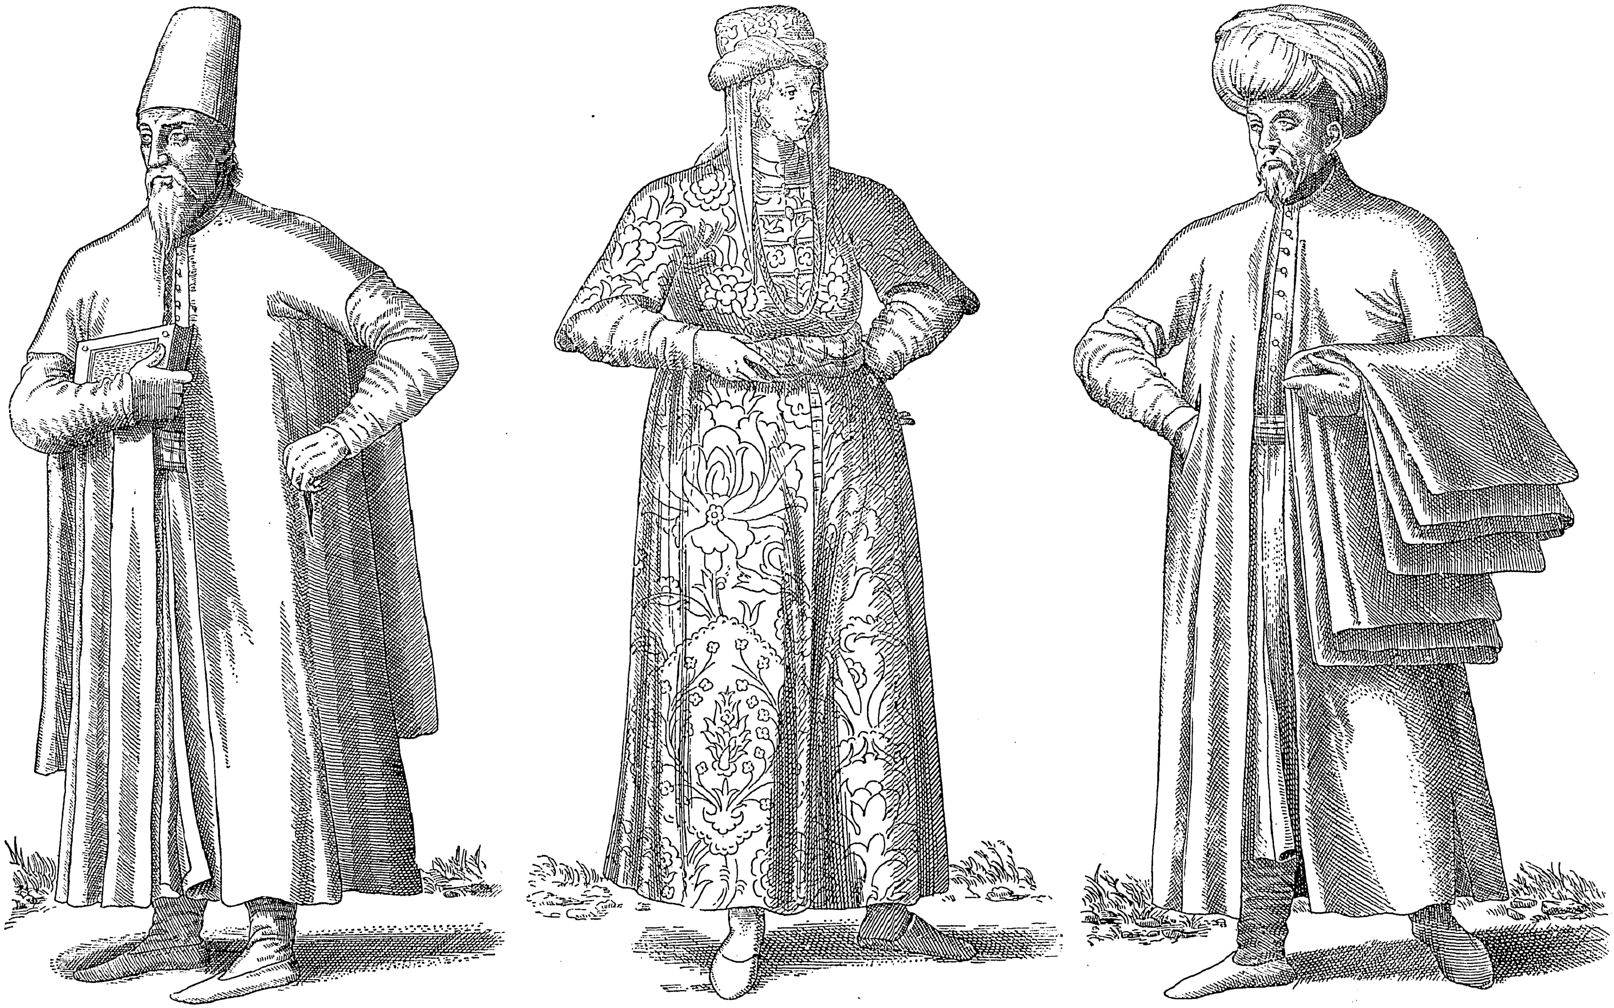
The Turkish government discriminates against foreign Jews visiting Palestine; and they are not allowed to stay in the Holy Land longer than three months. The question of Jewish immigration to Turkey came to the front in 1882, when the good offices of the United States were invoked in obtaining permission for Russian Jews to settle in Turkey. In 1885 the Lubrowsky brothers, two American citizens, were expelled from Safed because they were Jews. The United States government at once protested; but no permanent settlement of the question was arrived at. In 1888 the Porte declared that foreign Jews could not remain in Palestine longer than three months, whereupon the governments of the United States, Great Britain, and France sent notes protesting against such discrimination against creed and race. The Turkish government then announced that the restriction applied only to Jews arriving in Palestine in numbers, the political effects of colonization there being feared. Various protests have since been made at different times and by different governments, but the rule remains in force, and foreign Jews are not allowed to remain in the Holy Land longer than three months.

In 1895 the further question arose whether foreign Jews might hold real estate in Jerusalem, and the Porte decided it in the negative.

On the subject of Zionism, Dr. Theodor Herzl had several long interviews with the sultan in May, 1901 (see also Zionism).

Blood Accusations.

Accusations of ritual murder were frequent during the nineteenth century, hardly an interval of more than two or three years passing in which a disturbance on that score was not created in some part of the country. So late as 1903 there was a serious outbreak in Smyrna. The Ottoman government has always been quick to punish the guilty. The law made in the sixteenth century by Sulaiman the Magnificent in this connection has already been noticed. In 1633 a plot to injure certain Jews by the same accusation was discovered by the grand vizier, and the offenders were summarily punished by the sultan. In 1840 an outbreak in Damascus (see Damascus Affair) caused so serious a massacre of the Jewish inhabitants that the attention of the outside world was attracted to the sufferings of the Jews. A committee composed of Moses Montefiore, Isaac Adolphe Crémieux, and Salomon Munk journeyed to the Orient and insisted on reparation to the injured. This event, by revealing to the Western world the miserable condition of the Jews in Turkey, led to the foundation of the Alliance Israé-



TURKISH JEWS OF THE SIXTEENTH CENTURY.
(From Nicolo Nicolai's "Viaggi nella Turchia," Venice, 1580.)

LITE UNIVERSELLE. This society, through its schools—especially its manual-training and agricultural schools, which prepare their pupils for occupations other than those connected with the handling of money—has done much and is doing more to elevate the Turkish Jews. The names of the Hirsch and Rothschild families as well as that of Sir Moses Montefiore will be forever associated with the work of improving the condition of the Jews in Turkey. With influence and money and through philanthropic foundations they have ably seconded the work of the Alliance. At different times cholera, fire, and famine have reduced the Turkish Jews to the utmost misery, which their Western coreligionists have done their best to alleviate. The Jews in Asia Minor were affected also by the Armenian troubles in the latter part of the nineteenth century; and a rabbi was killed in Keui Sanjak on the Little Zab.

Literature.

The flourishing period of Jewish literature in Turkey was in the fifteenth and sixteenth centuries, after the arrival of the Spanish exiles, though before this time, also, the Turkish Jewry had not been without its literary and scientific men. Printing-presses and Talmud schools were established; and an active correspondence with Europe was maintained. Moses Capsali and his successor, Elijah Mizraḥi, were both Talmudists of high rank. The latter was noted also as a mathematician for his commentary on Euclid's "Elements," as well as for his independent work "Sefer Ha-Mispar." Mordecai Comtino wrote a Bible commentary entitled "Keter Torah," and commentaries on the mathematical and grammatical works of Ibn Ezra and others, and on the logical works of Aristotle and Maimonides. Elijah Capsali, in Candia, a nephew of the ḥakam bashi, wrote in Hebrew a history of the Turkish dynasties (1523), and his correspondence, entitled "Sefer No'am," is of historical value concerning the disputes between Italian, Greek, and Turkish rabbis. Another contributor to historical literature was Samuel Shullam from Spain, who edited Abraham Zacuto's "Yuḥasin" (1566) and wrote a continuation of Abu al-Faraj's "Historia Dynastiarum." Solomon Algazi wrote a compendium of chronology; and Peraḥyah and Daniel Cohen (father and son) in Salonica, and Issachar ibn Susan in Safed, published mathematical and astronomical works. Karaite literature was represented by Elijah Bashyaẓi and Caleb b. Elijah Afendopolo.

Talmudists.

Especially eminent as Talmudic authorities were Levi b. Ḥabib (son of Jacob b. Ḥabib of Salonica, author of "'En Ya'aḳob") and Jacob Berab, the dispute between whom, noticed above, causing the leading rabbinical writers to take sides with one or the other. Moses Alashkar, the synagogal poet, defended Ḥabib, while Moses b. Joseph Trani, the ethical and homiletic writer, took up the cudgels in behalf of Berab. Trani wrote a collection of ethical treatises entitled "Bet Elohim," and a commentary on Maimonides' "Mishneh Torah." His son, Joseph Trani, was also prominent in this field. Other Talmudic scholars were: David ibn Abi Zimra, who wrote exegetic, cabalistic, and methodological works; Samuel Sedillo of Egypt; and his namesake in Safed, who wrote a commentary on the Palestinian Talmud. Collections of responsa were made by David ha-Kohen, David b. Solomon Vital, Samuel of Medina, Joseph b. David ibn Leb, Joseph Ṭaiṭazaḳ, Eliezer Shim'oni, Elijah ibn Ḥayyim, Isaac Adarbi, Solomon b. Abraham ha-Kohen, Solomon Levi, Jacob b. Abraham Castro, Joseph ibn Ezra, Joseph Pardo, Abraham di Boton, Mordecai Ḳala'i, Ḥayyim Shabbethai, Elijah Alfandari, Elijah ha-Kohen, Benjamin b. Metalia, and Bezaleel Ashkenazi of Egypt.

Commentaries on different books of the Old Testament were written by Jacob Berab, David ibn Abi Zimra, Joseph Ṭaiṭazaḳ, Isaac b. Solomon ha-Kohen, Joseph Ẓarfati, Moses Najara, Meïr Arama, Samuel Laniado, Moses Alshech, and Samuel Valerio. Moses b. Elijah Pobian published a translation of the Bible into modern Greek (1576); and a Persian translation was made by Jacob Tawus, who appears to have been brought from Persia to Constantinople by Moses Hamon. Moses Almosnino, a celebrated preacher in Salonica, wrote articles on philosophy and astronomy, a commentary on the Bible, a collection of sermons, and a description of Constantinople entitled "Extremos y Grandezas de Constantinople." Poetry, also, flourished. The most important Hebrew poet of Turkey and of the century was Israel b. Moses Najara of Damascus, who is represented in the ritual of Jewish congregations everywhere.

Cabalistic Writers.

The more distinguished cabalistic writers were: Moses Cordovero, Solomon Alḳabiẓ, Moses Galante and his sons, Elijah di Vidas, Moses Alshech, Moses Basula, and, most celebrated of all, Isaac Luria and Ḥayyim Vital. The leading representative of the Halakah was Joseph CARO, whose Shulḥan 'Aruk, the only really great work published on Turkish soil, marked an epoch in the history of Judaism.

Jewish literature in Turkey declined somewhat after the sixteenth century. The best-known writers of the seventeenth were Joseph Delmedigo, Joseph Cattawi, and Solomon Ayllon; of the eighteenth, Jacob Culi, Abraham of Toledo, and Jacob Vitas, who wrote in Judæo-Spanish. A large number of Talmudic works appeared in the eighteenth century (see Franco, *l.c.* pp. 124 *et seq.*). Many rabbinical works in Hebrew were published during the nineteenth century also; but the Judæo-Spanish literature underwent a change, becoming more popular in style and including translations of novels, biographies of eminent men, histories, scientific works, etc. (see list in Franco, *l.c.* pp. 270 *et seq.*). A certain amount of Hebrew literature has been published in Turkey by Protestant missionary societies (Franco, *l.c.* p. 276).

The only important Jewish writer in Turkish was Ḥaji Isḥaḳ Effendi, who became converted to Islam and was in the service of the Ottoman government as professor of mathematics and interpreter.

The total number of Jews in Turkey, including Syria, Palestine, and Tripoli, is estimated at 463,688 ("Bulletin de l'Alliance Israélite Universelle," 1904, p. 168). Of these, 188,896 (including the Jews of Constantinople) are in Europe. The accompanying table No. I. (compiled from Cuinet, "La

Distribution of Jews.

Turquie d'Asie," Paris, 1892) shows the distribution of Jews in Asiatic Turkey, Syria, and Palestine, according to vilayets, sanjaks, and mutessarifats or mutessarifliks. Table No. II. shows the Jewish population according to cities, and the schools of the Alliance Israélite Universelle. Where the two tables do not agree the figures in No. II. should be given the preference, as the Jews for various reasons (*e.g.*, the fear of increased taxation) are disinclined to give correct figures to a representative of the government ("Bulletin de l'Alliance," 1904, p. 164). In the tables, names are spelled as in the authorities cited.

Besides these schools, the Alliance has charge of the following: the Talmud Torahs of Adrianople and Damascus, numbering respectively 1,082 and 771 pupils; the Talmud Torah of Smyrna; the schools Revka-Nurial and Aaron Saleh, numbering 500 pupils, in Bagdad; and the common school in Smyrna, numbering 255 pupils. The Alliance has also agricultural schools, which, together with the industrial ones, offer the most hopeful outlook for the Jews of Turkey.

Characteristics.

The Sephardim have held themselves more aloof from the original Jewish inhabitants of the country, and have preserved many of the customs which they brought with them from Spain. The chief seat of the Sephardic Jews is at Salonica; but they predominate in the other cities of western Turkey. Besides these Jews of foreign descent there are the original Jewish inhabitants of the country, called in Palestine "Musta'ribin," and also the "Maghrabin," or Jews of northern Africa. In the eastern part of the Turkish empire, in the vilayets of Van and Mosul, are Jews who are said to be descendants of the Assyrian captives and of those brought back from Palestine by the Armenian king Tigranes III. They are hardly distinguishable from the other inhabitants of the country except by the long curls that they wear hanging over the temples (Cuinet, *l.c.* ii. 654). Of the 5,000 Jews in the vilayet of Van, only 360 adhere to their ancient faith, the rest having adopted the religion of the Armenians.

Language.

The language spoken by the Jews in Turkey is mainly a mixture of Spanish and Hebrew, in which the former is the predominating element. The Ashkenazic Jews speak a Judæo-German jargon. For about a century after their arrival in Turkey the Spanish exiles preserved their mother tongue in its original purity. Gonsalvo de Illescas, a Spanish writer of the sixteenth century, says that he met Jews in Salonica who spoke Castilian with as pure an accent as his own. In later years, however, through the intermixture of words from Hebrew and other tongues, the language degenerated into a jargon (see JUDÆO-SPANISH). For some unknown reason, contrary to their practise in most lands, the Jews have been slow to learn the official language of the country, which is Turkish. Even in the schools founded by the Alliance a knowledge of French was at first held to be more important. Of late years, however, the Jews have become alive to the fact that through their ignorance of the official language they have been crowded out of governmental positions by Greeks and Armenians; and an earnest effort is being made to spread the knowledge of Turkish. The Jews do not appear to have the same antipathy to Arabic; and in Aleppo, Syria, and Mesopotamia, or south of the linguistic line dividing Turkish and Arabic, the Jews ordinarily speak the latter, although Hebrew also is used. In the vilayet of Van the Jews use an Aramaic dialect. The Jews are called "Yahudi" by the Turks, or, with more respect, "Musavi" = "descendants of Moses." A term of contempt which is very commonly applied to them is "tchifut" = "mean," "avaricious."

The Jews have in the main been well treated by

Legal Status of the Jews.

the Turkish government; and, as compared with their coreligionists in European countries generally, have been subjected to few restrictions as regards dress and residence. To-day they enjoy the same privileges as all "rayahs," *i.e.*, non-Moslem subjects, whose official position was established in the laws of the "tanzimet" (reform). These were contained in the ḥatti-sherif of Gul-Haneh of 1839 and the ḥatti-humayun of 1856, both issued by the sultan Abd-ul-Mejid. The former placed rayahs and Moslems on an equal footing, guaranteeing them inviolability of person and property. This edict was confirmed and the privileges granted to non-Moslems were increased by the ḥatti-humayun, which assured to all subjects of the sultan, irrespective of creed, the following rights: (1) security of life, honor, and property; (2) civil equality; (3) admission to civil and military service; (4) liberty of religious worship and public instruction; (5) equal taxation; (6) equality on the witness-stand; (7) special and mixed courts; and (8) representation in provincial and communal councils and in the supreme councils of justice. This edict also admits the principle of exemption from military service among non-Moslems on the payment of a fixed tax; and this is the system at present in vogue, non-Moslems not being admitted to the army and paying instead a tax known as "bedel-i-askerieh" (see below).

After the Damascus Affair in 1840 the sultan issued a special firman defining the position of the Jews and protecting them from calumnious accusations. Sultan Abd-ul-Aziz issued a similar firman in 1866 for a similar cause (Franco, "Histoire des Israélites de l'Empire Ottoman," p. 222).

The constitution of 1876 proclaimed the equality of all Ottomans before the law, and admitted them to public office. Thus in the national assembly of 1877 three of the deputies were Jews; there were two Jews in the senate, and two in the council of state; and the secretary of the council was also a Jew. This parliament, however, was adjourned sine die before the world was able to discover what a Turkish parliament could accomplish.

At the time of the Armenian troubles more reforms and privileges were granted to the sultan's non-Moslem subjects, without, however, materially affecting their position. It is not from the nature of the laws but from the method of their execution that the Jews in Turkey suffer; and in this particular they fare no worse than all the other classes of the population.

Taxation.

As regards taxation, it may be remarked that originally the kharaj (see above) was a ransom exacted according to Mohammedan law from conquered peoples who refused to accept Islam and hence were liable to death. Later it came to be regarded as a compensation for exemption from military service. The Jews of Brusa were the first to pay the tax. The tax-paying Jews were distributed into three classes according to property: those of the first class paid 40 drams of silver; those of the second, 20; and those of the third, 10 (a dram at that time was worth a little over 5 cents). The "ḥakam bashi," or chief rabbi, the "millet-cha'ush," or secular agent of the community, the "ḥakam cha'ush," or rabbinical representative, the officiating ministers, teachers, the public slaughterer, and a few families specially favored by the state, were exempt from the tax. It was collected by the millet-cha'ush; and as it was discovered that the statistical lists were not trustworthy, owing to the fact that the rich Jews sometimes paid the tax for the poor, the Jewish tax-gatherers were required to take an oath on a scroll of the Law before delivering the taxes collected by them.

Amplification of the Term "Kharaj."

At the end of the sixteenth century the signification of the term "kharaj" was extended to include twelve different taxes; so that to be exempt from the kharaj was to be exempt from all taxes. The twelve taxes, paid by Jews and Christians alike, were the following: (1) "saliane," or annual levy; (2) "ordu-akchesi," or army-tax; (3) "resim-kismet," or heritage-tax; (4) "cherahor-akchesi," or imperial pasturage-tax; (5) "ḳaza-akchesi," or tax for maintaining the residence of the governor; (6) "ḳassab-akchesi," or meat-tax; (7) "chair-akchesi," or bird-tax; (8) "rab-akchesi," a tax payable by the community collectively; (9) "bedel-kharaj," or "bashi-kharaj," tax for exemption from military service; (10) "jelb-akchesi," tax for the support of the imperial flocks; (11) tax for the support of the imperial couriers; and (12) tax to supply the sultan with furs. Besides these levies the kharaj included certain services to the number of seven, exemption from which might be purchased. These were: work on the fortifications, public buildings, roads, etc.; sentry duty, etc.; and the quartering of new recruits. The promulgation of the ḥatti-sherif of 1839 abolished the kharaj in principle, although the tax survived in fact as compensation for non-performance of military duty, until the issue of the ḥatti-humayun. The admission of rayahs into the army as ordained by this edict presented so many difficulties that a new device was invented: every rayah purchased exemption from military duty by paying the bedel-i-askerieh (see above) instead of the old kharaj. The rayahs of Constantinople—Jews and Christians alike—were exempt from this tax. In the provinces the tax was collected by the "mukhtar," or collector for the rabbinate.

In its turn the bedel was modified; and to-day the rayahs throughout the empire (Constantinople excepted) pay in place of the old kharaj two annual taxes, namely: (1) the "bedel-i-askerieh," which amounts to about $1.68 for every male between the years of twenty and sixty; and (2) the "darbieh," or "yol-parasi" (road-tax), which averages about 76 cents for every male between the same years. In addition the Jews pay communal taxes.

Present Administration.

In the year 1864 the Jews of Constantinople, at the request of the government, drew up a constitution which was approved by Sultan Abd-ul-Aziz May 5, 1865. This provided for three councils: (1) a "mejlis-'umumi," or national assembly, to be composed of eighty members; (2) a "mejlis-jismani," or temporal council, of seven lay members; and (3) a "mejlis-ruḥani," or spiritual council, of nine rabbis. The grand rabbi at Constantinople has no authority over the other grand rabbis of the empire, merely representing them before the Porte and transmitting to them communications from the government. It should be stated that beginning with the reign of Sultan Maḥmud II. (1808-39) the spiritual chief chosen by the Jews has received the imperial sanction before entering upon his duties. The first rabbi to be elected in this way was Abraham Levy (1835), who was installed in office with much pomp and ceremony. His successor, Samuel Ḥayyim, was removed by the government after a year of office because he was a foreigner. Since that time there have been five ḥakam bashis (see Constantinople). The present chief rabbi, Moses ha-Levi, bears the title "ḳaimaḳam" (= "locum tenens").

The judicial authority is in the hands of a bet din of three members, who adjudicate civil and religious cases, but may not pronounce sentence of capital punishment. In the provinces the rabbi or a member of the bet din represents the community before the governor of the province. There are ḥakam bashis also at Adrianople and Salonica in Europe and at Aleppo, Bagdad, Beirut, Jerusalem, and Smyrna in Asia. See Arabia; Bulgaria; Egypt; Palestine; Rumania; Servia; Syria; and special articles on the cities of these countries and of Turkey.

TURTELTAUB, WILHELM: Austrian physician and poet; born at Rzeszow, Galicia, March 25, 1816. At the age of twelve he wrote a comedy in imitation of Kotzebue's "Sorgen Ohne Noth." In 1830 he entered the University of Vienna to study medicine (M.D. 1840), collaborating at the same time on the "Zuschauer," "Wanderer," and "Sammler." From 1841 he practised his profession in his native town. In 1835 his first work, "Wiener Fresko-Skizzen," was published; and his one-act comedy "Der Nachtwandler bei Tage" was produced with success at the Leopoldstädter Theater. At this time he made the acquaintance of Saphir, who induced him to contribute to his periodical "Der Humorist." In 1837 his "Nur Eine Löst den Zauberspruch" was played in Vienna and various other cities of Austria, and in Germany also. His "Der Abenteuerer" and "Der Jugendfreund" were produced at the Hofburg Theater, Vienna. In 1859 Turteltaub edited the "Wiener Volksbühne."

TUSHIYYAH (lit. "sound knowledge"): Publishing establishment founded in Warsaw in 1896, which, though a private enterprise, is in reality a Hebrew publication society striving to further the development and spread of Neo-Hebrew literature. Its founder, Ben-Avigdor, who was also one of the founders of the older and similar concern, the Aḥiasaf, was its first editor, and M. Balascher was his associate in the business management. The present (1905) editors are Ben-Avigdor and S. L. Gordon (born in Lida, government of Wilna, 1866). The Tushiyyah's program is given in its subtitle: "The editing of good and useful books in the Hebrew language for the spread of knowledge and for the teaching of morality and civilization among Jewish youth; also scientific books in all branches of literature." It has published, either in the original or in translations, numerous novels, biographies, poems, and historical and miscellaneous works, and has contributed much to the revival of Hebrew literature in its latest phases. It has provided Hebrew teachers with the most popular text-books for the elementary teaching of Hebrew according to modern methods, and has also done much to encourage talented Hebrew writers. Among the authors whose works have been published by the Tushiyyah are: Frischman, Bernfeld, Brainin, Ludvipol, Slouschz, Taviov, Berdyczewski, and Rabinowitz.

TYCHSEN, OLAUS GERHARD: Christian Hebraist and Orientalist; born at Tondern in Sleswick, Denmark, Dec. 14, 1734; died at Rostock, Germany, Dec. 30, 1815. He studied rabbinics at the University of Halle, and journeyed through Germany and Denmark in the years 1759 and 1760 on a fruitless mission for the conversion of the Jews, giving rise to an unseemly altercation by a conversionist sermon in the Altona synagogue. In the latter year he was called to the newly founded University of Bützow, Mecklenburg, and remained there as professor of Oriental languages till the university ceased to exist (1789), when he became chief librarian and director of the museum at Rostock. Besides many works on Arabic and Syriac archeology and philology, he published "Bützowische Nebenstunden" (6 vols., Wismar, 1766-69), containing a large amount of material regarding the text of the Old Testament, derived mainly from Jewish commentators like Rashi and from the older versions, as the Septuagint and Targum. He claimed the ability to speak "the Talmudic language," and in a special monograph denied the authenticity of the Maccabean and other Jewish coins.

TYPES, ANTHROPOLOGICAL: Correlated norms of racial qualities. Individuals who present an interrelation between the color of the hair and that of the eyes are considered typical representatives of their race. In the blond races fair hair is generally accompanied by blue eyes; in brunette races brown or black hair is generally accompanied by dark eyes. The former are considered anthropologically blond types; the latter, brunette types. Individuals who do not exhibit such an interrelation of the color of the hair and eyes, having dark hair with blue eyes and vice versa, are called mixed types. Owing to the preponderance of dark hair and eyes among the Jews (see Eye; Hair), anthropologists have counted them among the races of a brunette type.

From extensive investigations of the color of the hair and eyes of the school-children in Germany, Virchow has shown that the Jews have not maintained their type in as pure a state as has been generally supposed. Of 75,377 Jewish children examined, only 46.83 per cent were brunettes having both dark hair and dark eyes; 11.17 per cent were blonds having light hair and light-colored eyes; and 42 per cent were of the mixed type having either dark hair with fair eyes, or vice versa. In Austria, according to Schimmer, 32 to 47 per cent (according to the province) of the Jewish children are pure brunettes, and 8 to 14 per cent are pure blonds. In Bulgaria, Wateff has found that only 49.57 per cent of Jewish children are brunettes, while 8.71 are blonds and 41.72 are of mixed type; and even in North Africa, where the dark type predominates among the Jews, 76.40 per cent are brunettes, 4.62 per cent are blonds, and 18.98 per cent are of mixed type.

United States:					
Men in New York.....	50.81	8.87	40.32	124	Fishberg.

Among Jewish adults anthropological investigation has shown that the brunette type is not in the majority. From the accompanying table it will be observed that the percentage of brunettes is only 43 among the Galician Jews, while it reaches as high as 74 per cent among Lithuanian Jewesses. Blonds are very rare among the Jews of Russian Poland; but among other classes they are encountered quite often. Among the Little-Russian Jews the proportion reaches 16 per cent. The mixed types are everywhere found in the proportion of from 30 to 40 per cent of all the individuals examined.

Origin of Blond and Mixed Types.

The origin of the blond and mixed types among the Jews has been a favorite topic of discussion for many anthropologists. Some have maintained that they are the product of intermixture with the indigenous peoples of the European countries in which the Jews have lived; others show that even among Jews who do not live among blond races, as, for instance, those of Syria, Tunis, Morocco, and Algiers, many blonds are met with. It is also shown that if intermixture with northern European races were the origin of the blond Jews, the countries whose non-Jewish populations present the largest percentage of blonds, as Prussia, Lithuania, etc., should have the largest proportion of Jewish blonds also. On the other hand, in the south and the east of Europe, where the Gentiles are darker, more Jewish brunettes and fewer blonds should be found. That this is not the case is shown by the following figures, taken from Virchow's census of the color of the hair and eyes of school-children in Germany:

Province.	Per Cent of Blonds.		Per Cent of Brunettes.	
	Jews.	Christians.	Jews.	Christians.
Prussia..............	11.23	39.75	43.34	14.05
Hesse................	11.17	31.53	41.50	13.22
Baden................	10.32	24.34	41.95	21.18
Bavaria..............	10.38	20.36	39.45	21.10
Alsace-Lorraine......	13.51	18.44	34.59	25.21

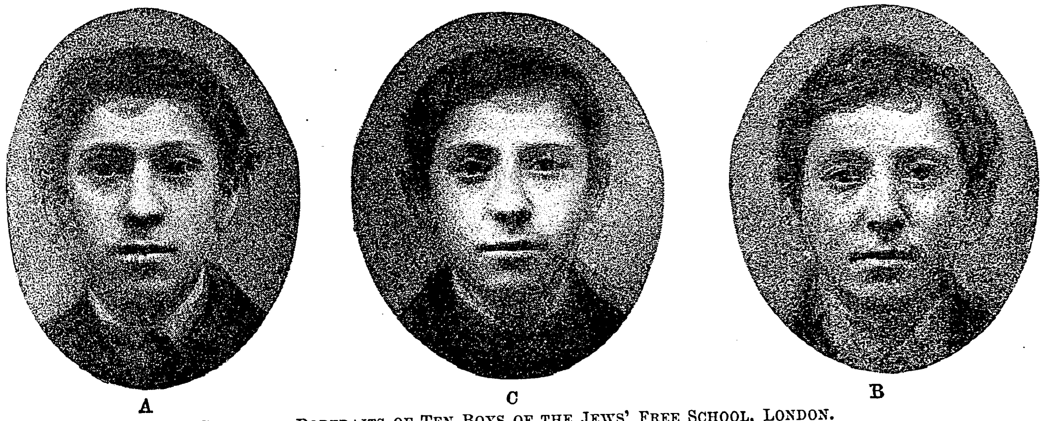
These figures show in a striking manner that in the provinces of Germany where the percentage of brunettes is smallest among the Christian population—in Prussia, for instance, only 14.05 per cent—the Jews have 42.34 per cent of brunettes; while in Alsace-Lorraine and Bavaria, where the Christians show 25.21 and 21.1 per cent of brunettes respectively, the Jews have only 34.59 and 39.45 per cent respectively of such. This is further confirmed by the following figures (from the works of Virchow and Schimmer) showing the distribution of Jewish pure blond and brunette types in Germany and Austria:

Province.	Germany (Virchow).		Province.	Austria (Schimmer).	
	Pure Blonds.	Pure Brunettes.		Pure Blonds.	Pure Brunettes.
Silesia............	8.20	49.53	Bohemia........	8.29	46.87
Pomerania.......	8.85	50.58	Lower Austria...	8.69	46.16
Brandenburg......	9.64	47.39	Moravia.........	9.86	43.15
East and West Prussia........	11.61	43.04	Bukowina.......	13.55	35.21
Posen............	12.39	39.22	Galicia..........	13.97	32.91

It is evident from these figures that the farther one goes south and east in Europe, the smaller is the

Distribution of Blonds.

percentage of brunettes encountered among the Jews and the larger the percentage of blonds. With the non-Jewish population the reverse is the fact. Most of the blonds are found in Prussia, Pomerania, Sleswick-Holstein, Hanover, Westphalia, etc., while farther east, reaching to Posen, Silesia, Bohemia, Moravia, Upper and Lower Austria, Bukowina, and Galicia, the percentage of pure blonds decreases and that of brunettes increases. It is also noteworthy, as has been pointed out by Virchow, that in localities where, owing to religious and social prejudices, the Jews have lived for centuries in strict isolation from other races, and presumably have not intermarried with their Gentile neighbors, the proportion of blond types is larger than in the Prussian provinces, where they have not been socially isolated, but, on the contrary, have entered into general social intercourse with the non-Jewish inhabitants. Here the largest proportion of brunettes is found among the German and Austrian Jews. But it must be mentioned that in Algiers, Tunis, and Morocco, where the indigenous population is of a dark type, the Jews also are darker.



Composite Portraits of Ten Boys of the Jews' Free School, London.
A is the composite portrait of five boys, B of another five, and C a composite of A and B.
(From the "Journal of the Anthropological Institute.")

It has been suggested that the blond type among the Jews is due to intermixture with the so-called Aryan, or north-European, races, in proof of which the following argument has been advanced: The Aryan type is known to consist in the combination of blond hair, blue eyes, tall stature, and dolichocephalism or long-headedness. Among the Galician Jews, Majer and Kopernicki found that while among the brunette Jews 6.2 per cent are dolichocephalic, 20 per cent of the blond Jews of the same section are so. This has been repeatedly cited as evidencing a relation between blondness and long-headedness among the Jews in Galicia, and is thought to be due to Teutonic intermixture. In Odessa, Pantukhof ("Proc. Russian Anthropological Society," pp. 26–30, St. Petersburg, 1889) has found that the Jews who have dark hair and eyes are of short stature, while those who have fair eyes and hair are taller. In Caucasia the same author has observed that the Jews with fair eyes measure on the average 1.644 meters, and those with dark eyes 1.617 meters only. But all these conclusions are based on a small number of cases, and other investigations tend to disprove them. In Baden, Otto Ammon found no relation between blond hair, blue eyes, and dolichocephalism, while in Poland, Elkind noticed that Jews with dark hair and eyes were taller than those with fair hair and light eyes, which phenomena are the reverse of those in the so-called Aryan type. Similar results were obtained by Fishberg in his observations of the immigrant Jews in New York. The darker Jews had practically the same head-form (cephalic index 81.97) as the blond-haired (82.35). The same was the case with tall Jews as compared with those of short stature: the craniometrical lines were about the same. Indeed, Jews with fair hair and eyes were taller than those with dark hair and eyes.

Fishberg concludes from all the statistics gathered by him that the ideal Aryan type is not to be observed among the Jews. On the contrary, the rule appears to be that tall persons have darker hair and eyes, and that a smaller percentage of them are dolichocephalic; while Jews of short stature are of fairer complexion and include a larger percentage of dolichocephalic persons. This tends to exclude the hypothesis that Aryan influence is the cause of the Jewish blond type; but it tends to confirm the theory of admixture from the Slavonian type.

Bibliography: M. Fishberg, *Materials for the Physical Anthropology of the Eastern European Jews*, in *Annals of the New York Academy of Sciences*, 1905; S. Wateff, *Anthropologische Beobachtungen der Farbe der Augen, der Haare und der Haut bei den Schulkindern von den Türken, Pomaken, Tataren, Armenier, Griechen und Juden in Bulgarien*, in *Correspondenzblatt der Deutschen Gesellschaft für Anthropologie*, 1903, xxxiv., Nos. 7, 8. See also Eye and Hair.

J. M. Fi.

What is popularly known as "the Jewish type" is not a correlation of definite anthropological measures or characteristics, but consists principally in a peculiar expression of face, which is immediately and unmistakably recognized as "Jewish" in a large number of cases of persons of the Jewish race. It has been observed that children in New York, Gentile as well as Jewish, can unerringly distinguish between Jew and Gentile, whether juvenile or adult. The negroes of the Gold Coast are said to differentiate the two types of Europeans with equal exactitude, saying "here come two whites and a Jew," instead of "here come three whites" (Andree, "Zur Volkskunde der Juden," p. 38). Yet when taken together in large numbers, a considerable proportion of Jews fail to betray their racial provenience. In collective photographs of Jewish school-children and inmates of institutions it has been found that while about 53 per cent of the subjects can be more or less certainly identified as Jews by their facial expression, the remaining 47 per cent fail to show any distinctive feature which would definitely mark them as Semites, though if compared with Gentiles of the same class they could probably be differentiated. It has also been remarked that persons who do not have the Jewish expression in their youth acquire it more and more as they grow from middle to old age. Although Jewesses appear to be more variable in appearance than Jews, they seem to show the type in its greatest purity when they actually are Jewish in features.

Expression.

Composite Portraits.

The precise nature of this Jewishness is very difficult to determine with any degree of certainty or accuracy. Evidently it is not in any one feature, for whenever any single trait, such as the shape of the nose or the brilliancy of the eyes, is assumed to be characteristic, the very next example is liable to disprove the validity of the test. The sole attempt to obtain any scientific discrimination of the Jewish expression was made by F. Galton and Joseph Jacobs in 1885, by means of composite portraiture. In their experiments Jewish boys of the Jewish Free School, London, were selected as being typically Jewish in appearance, and full-face and profile photographs were first taken on a uniform scale, and then superimposed on a single plate, so that the eyes and mouth in each case fell upon the same spots on the plate. By this means all the varying traits and features blurred out, while the common characteristics were emphasized and became stronger. The results were given in "The Photographic News," April, 1885, and in "The Journal of the Anthropological Institute," 1885. The full-face composite here given is made up of (*a*) that of five Jewish lads, (*b*) that of another five, and (*c*) one of (*a*) and (*b*), thus giving the summary of the characteristic features of ten typically Jewish boys. The result is remarkably Jewish in appearance, and it will be found that this character is given by the eyebrows, eyes, nose, and lips, while the position and contour of the cheek-bone also serve to determine it. The eyebrows are generally well-defined, somewhat bushy toward the nose, and tapering off toward the extremities. The eyes themselves are generally brilliant, both lids are heavy and bulging, and it seems to be the main characteristic of the Jewish eye that the upper lid covers a larger proportion of the pupil than among other persons. This may serve to give a sort of nervous, furtive look to the eyes, which, when the pupils are small and set close together with semistrabismus, gives keenness to some Jewish eyes. The lymph-sac beneath the eye is generally fuller and more prominent than among non-Jews. The high cheek-bone gives as a rule the hollow cheek that adds to the Jewish expression, while the nose in full face can be discerned only by the flexibility of the nostrils, the chief Jewish characteristic of this organ (see Nose). The upper lip is generally short, and the lower projects, giving a somewhat sensual appearance to the face. The chin almost invariably recedes from the lip, leaving an indentation beneath it in the great majority of instances. The ears of many Jewish persons project, and in boys increase the impression of Jewishness.

Adults.

With growth, as already noted, the Jewish expression becomes even more marked. In males this may be due to the appearance of the mustache and beard, and it is frequently found that the mustache is somewhat sparse, a rather bare portion intervening between the tuft under the nostril and the mustache proper. The beard is in some cases comparatively thick and in others luxuriant, curling, and parting naturally. It is to be observed that some Jewish faces have almost all of these stigmata. The miniature of Spinoza (Jew. Encyc. xi. 512) shows the brilliant and sensitive eye, the conspicuous nostril, and the thick underlip. That of Benfey (*ib.* iii. 16) has the projecting ears, the thick underlip, and the conspicuous alæ of the nose, while the lymph-sac is well developed and the pupil of the eye is nearly half hidden by the upper lid. The same characteristic will be seen in the portrait of Moses Berlin (*ib.* iii. 80), which has, in addition, the marked eyebrows and the curved nostril.

Besides all these details, there is something in the whole formation of the face which is generally found in the Jewish type. As a rule, the face is oval in shape, especially in the best type of Jewesses, and if regarded in profile, it is distinctly convex, the nose being, as it were, an appendix to the ellipsoid. It is rare indeed that a Jew is found with a prognathous jaw.

Notwithstanding the similarity of expression found in large measure among all Jews, there are a number of distinctions which enable a close observer to distinguish between various subtypes of the Jew. Close attention to Talmudic study, combined with the peculiar work of the sweat-shop, produced in eastern Europe what is known as "the ghetto bend." The need for wearing phylacteries on the forehead while the head is covered has led in many instances to the hat being worn upon the back of the head. These two characteristics often enable observers to identify Jews from eastern Europe, even before their faces are seen. Among them, too, it has been claimed, various subdivisions can be discerned, consisting mainly in differences in the projection of the cheek-bones, the formation of the eyelids, and the thickness of the lips. It has even been held by those who believe in a strong admixture from surrounding nations that there is a Slavonic, Mongoloid, and Armenioid type of the Jew, due to admixture of Slavic, Tatar, or Armenian blood. Luschan indeed professes to regard

the last-named as the original source of the Jewish race.

Numbers of Jews are found, on the other hand, who possess none of the characteristics here noted, and yet are recognizable as Jews. This is especially true of the Little-Russians, who apparently resemble their Gentile neighbors in every facial characteristic, but are differentiated from them by some subtile nuance which distinguishes them as Semites. It is seemingly some social quality which stamps their features as distinctly Jewish. This is confirmed by the interesting fact that Jews who mix much with the outer world seem to lose their Jewish quality. This was the case with Karl Marx, Halévy the musician (Meyerbeer was remarkably Jewish), Sir Julian Goldsmid, Sir John Simon (in whom there was a mixture of Gentile blood), Sir David Salomons, and Rubinstein. Two illustrious living Italians, Lombroso and Luzzatti, would scarcely be taken for Jews; and even the late Theodor Herzl was not distinctively Jewish, all observers drawing attention to his resemblance to the Assyrian rather than to the Jewish type.

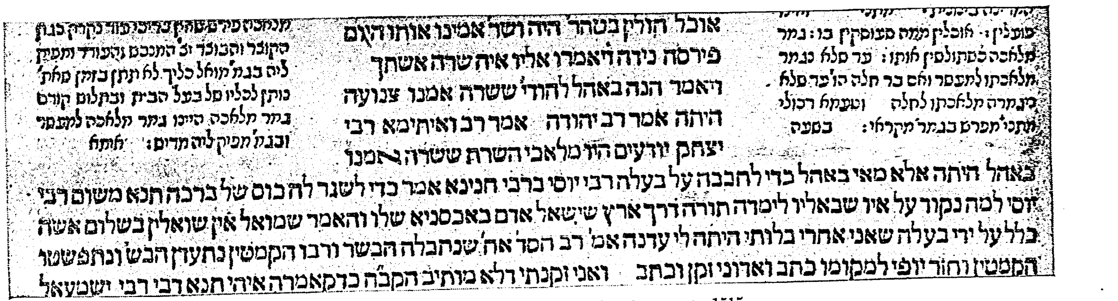
J.

TYPOGRAPHY: The art of printing. The invention of printing was welcomed by the Jews as "the art of writing with many pens." From the time of the earlier printers reference is made to their craft as "holy work" ("'Abodat ha-Ḳodesh"). It may here be treated under the two headings of history and characteristics.

I. History: The history of Hebrew printing is divided into five stages, of which only a sketch can be attempted in this place, many of the details being already treated under the names of prominent printers or presses. The five stages of Hebrew typography are as follows: I., 1475-1500, incunabula in southern Europe; II., 1500-42, spread to north and east; III., 1542-1627, supremacy of Venice; IV., 1627-1732, hegemony of Amsterdam; V., 1732-1900, modern period, in which Frankfort, Vienna, and, more recently, Wilna and Warsaw have come to the front. For the most part Hebrew printing has been done by Jews, but the printing of Bibles has been undertaken also by Christian typographers, especially at the university towns of Europe. These productions, for lack of space, are for the most part to be neglected in the following sketch.

Incunabula.

I. (1475-1500): It was twenty years before the Jews made use of the art for Hebrew printing, as the conditions in Germany did not admit of their doing so there; and all the Hebrew printing of the fifteenth century was done in the Italian and Iberian peninsulas, where about 100 works were produced before 1500. Hebrew printing began in Italy; and apart from **Reggio di Calabria,** where the first printed book was produced in 1475, and **Rome,** where possibly the earliest Hebrew press was set up, printing was centered about **Mantua,** where it began in 1477. In the same year **Ferrara** and **Bologna** started printing. The chief printer family of Italy was that of the Soncinos, which besides working at Mantua printed at **Casale-Maggiore, Soncino, Brescia, Naples,** and **Barca.** Bible, Talmud, and ritual, halakic, and ethical works naturally formed the chief subjects of printing in these early days. In Spain, Hebrew printing began at **Guadalajara** in 1482, went three years later to **Ixar,** and finished at **Zamora,** while in Portugal it began at **Faro** in 1487, went to **Lisbon** in 1489, and finished at **Leiria** in 1792. The total number of books printed in Spain and Portugal amounted to only 17. The early types were rough in form; but the presswork for the most part was excellent, and the ink and paper were of very enduring quality. Owing to the work of the censor and the persecution of the Jews, the early productions of the Hebrew presses of Italy and the Iberian Peninsula are extremely rare, one-fifth of them being unique (for further particulars see Incunabula).



From the Tractate Baba Meẓi'a, Soncino, 1515.

Second Period.

II. (1500-42): This period is distinguished by the spread of Jewish presses to the Turkish and Holy Roman empires. In **Constantinople,** Hebrew printing was introduced by David Naḥmias and his son Samuel about 1503; and they were joined in the year 1530 by Gershon Soncino, whose work was taken up after his death by his son Eleazar (see Constantinople—Typography). Gershon Soncino put into type the first Karaite work printed (Bashyaẓi's "Adderet Eliyahu") in 1531. In **Salonica,** Don Judah Gedaliah printed about 30 Hebrew works from 1500 onward, mainly Bibles, and Gershon Soncino, the Wandering Jew of early Hebrew typography, joined his kinsman Moses Soncino, who had already produced 3 works there (1526-27); Gershon printed the Aragon Maḥzor (1529) and Ḳimḥi's "Shorashim" (1533). The prints of both these Turkish cities were not of a very high order. The works selected, however, were important for their rarity and literary character. The type of Salonica imitates the Spanish Rashi type.

Turning to Germany, the first Jewish press was set up in **Prague** by Gershon ben Solomon Cohen, who founded in that city a family of Hebrew printers, known commonly as "the Gersonides." He began printing in 1513 with a prayer-book, and during the period under review confined himself almost exclusively to this class of publications, with which he supplied Jewish Germany and Poland. He was joined about 1518 by Ḥayyim ben David Schwartz, who played in northern Europe the same wandering rôle the Soncinos assumed in the south. From 1514 to 1526 he worked at Prague, but in 1530 he was found at **Oels** in Silesia, printing a Pentateuch with the Megillot and Haftarot. He transferred his activity to the southwest at **Augsburg**, where in 1533 he published Rashi on the Pentateuch and Megillot, the next year a Haggadah, in 1536 a letter-writer and German prayer-book, and in 1540 an edition of the Ṭurim, followed by rimed Judæo-German versions of Kings (1543) and Samuel (1544). In 1544 he moved to **Ichenhausen**, between Augsburg and Ulm, and finally settled in 1546 at **Heddernheim**, where he published a few works. At Augsburg, 1544, the convert Paulus Emilius printed a Judæo-German Pentateuch. Three works of this period are known to have been printed at **Cracow**, the first of them, in 1534, a commentary of Israel Isserlein on "Sha'are Durah" with elaborately decorated title-page.

FROM TRACTATE 'ERUBIN, PRINTED BY BOMBERG, VENICE, 1521.

Other towns of Germany also printed Hebrew works during this period, but they were mainly portions of the Biblical books, mostly editions of the Psalms, produced by Christian printers for Christian professors, as at **Cologne** (1518), **Wittenberg** (1521 onward), **Mayence** (1523), **Worms** (1529), and **Leipsic** (1538). To these should be added Thomas Anshelm's edition of the Psalms at Tübingen in 1512. It was followed by his edition of Ḳimḥi's grammar at **Hagenau**, 1519. With these may be mentioned the **Paris** printers of the sixteenth century (from 1508 onward), who produced grammars and Bibles (see PARIS).

who is found in **Fano** (1515), **Pesaro** (1517), **Ortona** (1519), and **Rimini** (1521); other presses were temporarily worked in **Trino, Genoa,** and Rome, the last under Elijah LEVITA. In Bologna nine works were produced between 1537 and 1541, mainly prayer-books and responsa. Above all, this period is distinguished in Italy by the foundation and continuance of the Venetian press under the guidance of Daniel BOMBERG, a Dutchman from Antwerp.

היתה ירושלם פעם בנויה פעם חר

From the "Wikkuaḥ" Printed by Sebastian Münster, Basel, 1539.

Daniel Bomberg.

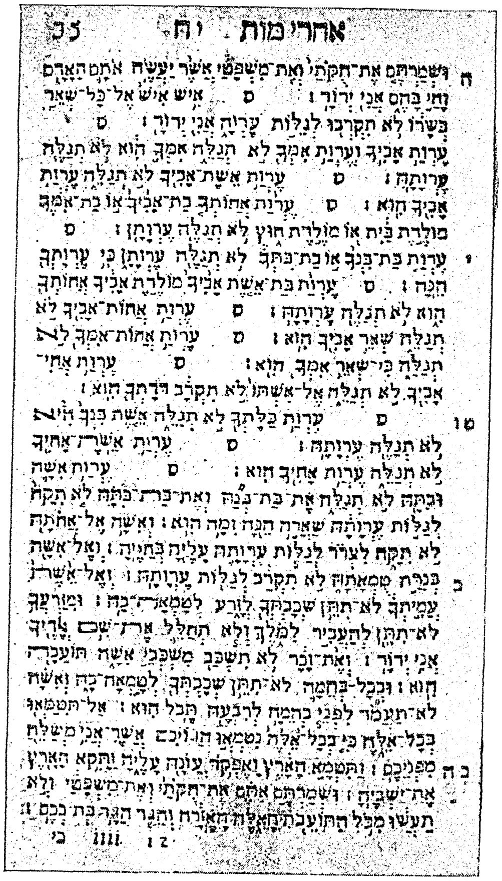
His thirty-five years' activity from 1515 to 1549 was in a measure epoch-making for Hebrew typography. His productions shared in all the excellence of the Venice press, and included the first rabbinic Bible in 1517, the first complete edition of the Babylonian Talmud in 1520 (its pagination is followed at the present day), a large number of editions of the Bible in whole or part, several grammatical, lexicographic, and midrashic works, seven commentaries on the Pentateuch, six responsa collections, philosophical and ethical writings, and several rituals, including a Tefillah and a Maḥzor according to the Spanish rite, one according to the Greek rite (Maḥzor Romania), and a Karaite one. Finally, reference should be made to the university press of **Basel,** where the Frobens produced Hebrew works in a remarkably clear type, with the letters slanting to the left, somewhat after the manner of the early Mantua editions. Froben began in 1516 with an edition of the Psalms, and produced many of the works of Elijah Levita and Sebastian MÜNSTER. Altogether Schwab (in "Incunables Orientaux," pp. 49–128) enumerates about 430 works produced between 1500 and 1540. Allowing for omissions by him, not more than 600 works were produced between 1475 and 1540.

III. (1542–1627): The third period is distinguished by the activity of the censor, which lasted for two centuries or more in southern and eastern Europe. The principle of regulating the books to be read by the faithful, and even by the unfaithful, was inaugurated by the Roman Curia in 1542, though the first carrying out of it was with the burning of the Talmud in 1554. But even previous to that date Jews had taken precautions to remove all cause of offense. About 1542 Meïr Katzenellenbogen censored the seliḥot of the German rite, and Schwartz adopted his changes in the edition which he published at Heddernheim in 1546.

Resuming the history of the Italian presses, that of **Venice** first engages attention.

Third Period. Supremacy of Venice.

Bomberg was not allowed to have a monopoly of Hebrew printing, which had been found to be exceptionally profitable. Other Christians came into the field, especially Marco Antonio Giustiniani, who produced twenty-five works between 1545 and 1552. Another competitor arose in the person of Aloisio BRAGADINI, who began printing in 1550. In the competition both parties appealed to Rome; and their disputes brought about the burning of the Talmud in 1554 at Ferrara, and the strict enforcement of the censorship, even in Venice, the presses of which stopped printing Hebrew books for eight years. Similar competition appears to have taken place with regard to the Hebrew typesetters whom these Christian printers were obliged to employ. Cornelius ADELKIND and his son, German Jews of Padua, first worked with Bomberg, and then were taken over by Farri (1544), and they appear to have also worked for both Bragadini and Giustiniani. There was a whole body of learned press-revisers. Among them should be mentioned Jacob b. Ḥayyim,

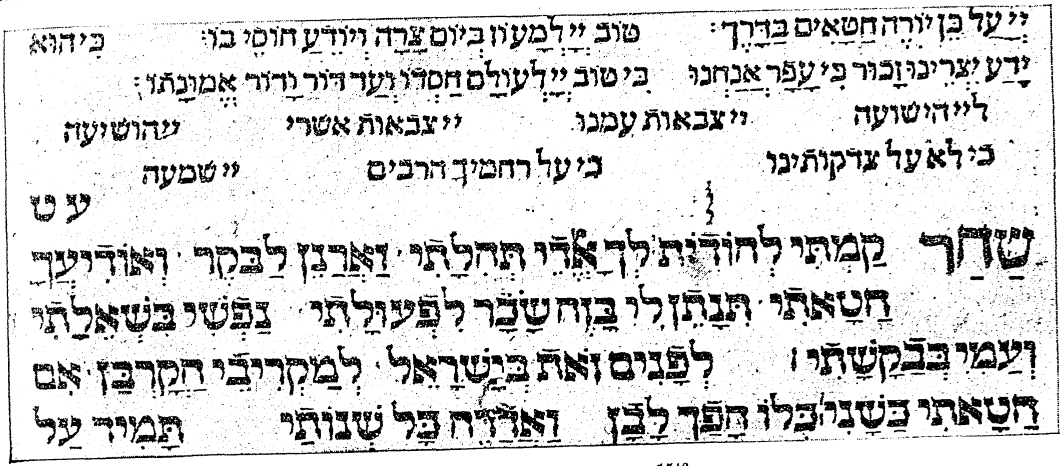


אחרי מות . יח . כב

From Pentateuch, Sabbionetta, 1557.

the editor of the rabbinic Bible, and Meïr Katzenellenbogen, who helped to edit Maimonides' "Yad" (1550). When Venice ceased for a time to issue Hebrew books, printing was taken up in **Ferrara** (1551–1557) by Abraham Usque, who printed the "Consolaçam" of his brother Samuel Usque (1553). In **Sabbionetta** (1551–59) Tobias Foa printed about twenty works, among them a very correct edition of the Targum on the Pentateuch, employing the ubiquitous Adelkind to print a fine edition of the "Moreh" and an edition of the Talmud in parts, only one of which is extant. The Sabbionetta types are said to have gone back to Venice when the Bragadinis resumed work. In **Cremona** a Hebrew press was set up in 1556 by Vincentio Conti, who issued altogether forty-two works up to 1560, including the first edition of the Zohar, 2,000 copies of which were saved with difficulty from the fires of the Inquisition. His first edition of Menahem Zioni's commentary was not so fortunate; notwithstanding that it had received the license of the censor, it was burnt. About thirty-three works were produced during this period at **Riva di Trento** by Joseph Ottolenghi under the auspices of Cardinal Madruz, whose titular hat appears upon the title-pages of the volumes.

Reverting to Venice, printing was resumed in 1564 by Giovanni de Gara, who took up the work of Bomberg, and between 1564 and 1569 produced more than 100 different works, making use of Christian as well as Jewish typesetters, among the latter being Leon of Modena in the years 1595–1601. Besides Gara there were Grippo, Georgio de Cavalli, and the Zanetti family, but none of them could compete with the activity of the Bragadinis, which was resumed about the same time. They made use of Samuel Archevolti and Leon of Modena among their typesetters. It is worthy of mention that several important works appeared at Venice from printing establishments which can not be identified, including the editio princeps of the Shulḥan 'Aruk (1565). A few works were printed at Rome (1546–81) by Antonio Bladao and Francesco Zanetti, and a couple of works in **Verona** by Francesco delle Donne.



יי על כן יורה חטאים בדרך: טוב יי למעוז ביום צרה ויודע חוסי בו: כי הוא
ידע יצרינו זכור כי עפר אנחנו כי טוב יי לעולם חסדו ועד דור ודור אמונתו:

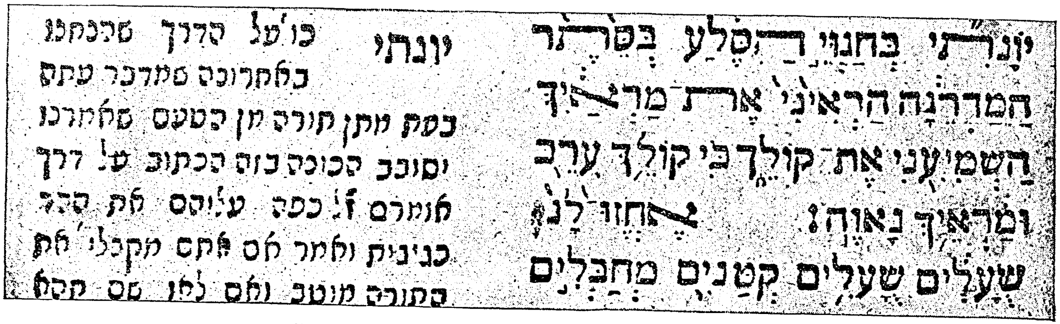
לא ידע עמי לא התבונן: הוי גוי חטא עם כבד עון זרע מרעים

From the Hutter Bible, Hamburg, 1587, Showing Hollow Servile Letters.

The greatest activity in Italy outside Venice was that carried on at Mantua by the Rufenellis, who employed Joseph Ashkenazi and Meïr Sofer, both from Padua, as their chief typesetters. Their activity was followed by that of Ephraim b. David of Padua and Moses b. Katriel of Prague, both working in the last decade of the sixteenth century, the latter for the publishers Norzi brothers. Altogether

Zunz enumerates seventy-three works produced at Mantua during the third period, including a "Sefer Yeẓirah," "Tanḥuma," Aboab's "Menorat ha-Ma'or," and an edition of Abot in Italian.



יונתי בחגוי הסלע בסתר

כגיגית ואמר אם אתם מקבלי׳ את
התורה מוטב ואם לאו שם [illegible]

FROM A COMMENTARY ON SONG OF SONGS, SAFED, 1578.

During this period the Hebrew press of Basel received new light in the advent from Italy of Israel b. Daniel Sifroni, one of those wandering master workmen who, like Soncino and Schwartz, characterized the early history of Hebrew printing.

Froben and Waldkirch.

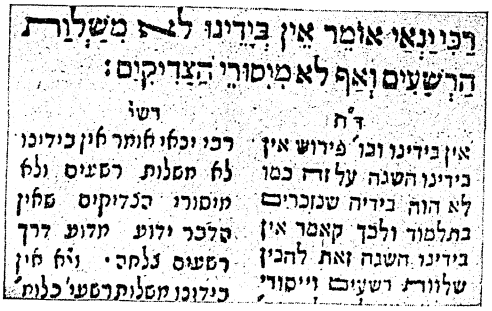
Through his workmanship a number of important works were produced by Froben of Basel between 1578 and 1584, including a Babylonian Talmud, Isaac Nathan's Concordance, and the "'Ir Gibborim," whose publisher in Prague, finding that he could not have printing done as well there as by Sifroni, sent it to the latter in Basel. In the year 1583-84 Sifroni was working for Froben at **Freiburg-im-Breisgau,** where he printed several Judæo-German works, including the Five Megillot with glossary in red ink; he printed also an edition of Benjamin of Tudela's "Travels." Froben's success, like that of Bomberg, induced other Christian printers to join in competition, as Guarin (for whom Sifroni also worked), Beber, and especially Conrad Waldkirch, who from 1598 on published a Great Tefillah, an 'Aruk, an Alfasi in octavo, and "Synagogue Music and Songs" by Elijah b. Moses Loans, who was for a time Waldkirch's corrector for the press. Mordecai b. Jacob of Prossnitz, who, as shown below, had had a large printing experience in the east of Europe, also assisted Waldkirch in 1622. After his departure the Basel Hebrew prints became scarcer, and were confined mainly to the productions of the Buxtorfs, while only sporadic Hebrew works were produced at **Altdorf, Bern,** and **Zurich** (where, however, one of the finest specimens of Hebrew printing had been produced in the Judæo-German "Yosippon" of 1546). Reference may be here made to prints of Paulus Fagius at **Constance** in 1643-44, mainly with Judæo-German or Latin translations. Altogether the total number of Hebrew works produced in Switzerland was not more than fifty.

The history of the Hebrew press in Denmark deserves treatment in fuller detail, as it has been recently investigated by Simonsen. In 1598 Heinrich Waldkirch imported some inferior Hebrew type to **Copenhagen** from Wittenberg; but nothing of importance was printed during the following three decades. In 1631 Solomon Sartor published some excerpts from the Bible; and in 1663 Henrik Göde printed similar extracts. In 1734 Marius Fogh (who later became city magistrate of Odense) published an edition of Isaac Abravanel's commentary on Gen. xlix. This work, which bore the imprint of the Copenhagen publishing-house of I. C. Rothe, was for sale as late as 1893. Christian Nold's concordance of the Bible appeared in 1679 from the press of Corfitz Luft in Copenhagen, and the solid quarto volume, containing 1,210 pages, gives evidence of the author's diligence, as well as of the printer's skill and care. A Lutheran pastor, Lauritz Petersen, in **Nyköbing** on the island of Falster, published in 1640 a new Hebrew versification of the Song of Solomon, intended as a wedding-present for the son of King Christian IV. and his bride Magdalena Sibylla. This work, which was entitled "Canticum Canticorum Salomonis," consisted of Hebrew verse with Danish translation, and with various melodies added; it was printed by Melchior Martzau. Samuel ben Isaac of Schwerin published in 1787 some Talmudic annotations entitled "Minḥat Shemu'el," printed by the Copenhagen firm of Thiele, but showing evidence of lack of skill.

To revert to Switzerland, Fagius printed a number of Biblical, grammatical, and polemical works at **Isny,** with the help of Elijah Levita, who produced there the "Tishbi," "Meturgeman," and "Baḥur," besides a German translation of the "Sefer ha-Middot" in 1542, which is now very rare.

Fagius and Hene.

Another Christian printer who is mentioned throughout this period is Hans Jacob Hene, who produced about thirty Jewish works in Hebrew at **Hanau** (1610-30). He ca-



רבי ינאי אומר אין בידינו לא משלות
הרשעים ואף לא מיסורי הצדיקים׃

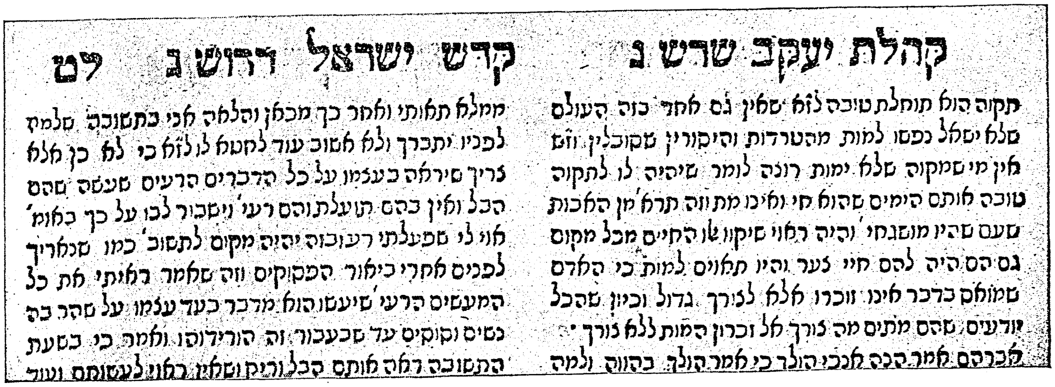
רשעים צלחה. ו״א אין
בידינו משלות רשעי׳ כלומ׳

From a Commentary on Pirke Abot, Cracow, 1589.

tered more to the students of the Talmud and Halakah, producing three responsa collections, three commentaries on the Talmud, the Ṭur and Shulḥan 'Aruk, and three somewhat similar codes, as well as a number of Judæo-German folk editions like the "Zuchtspiegel" or the "Brandspiegel" (1626), and the "Weiberbuch" of Benjamin Aaron Solnik. Among his typesetters were a couple of the Ulmas, of the Günzburg family, and Mordecai b. Jacob Prossnitz, who has already been mentioned. Hene's type is distinguished by its clearness, and by the peculiar form of the "shin" in the so-called "Weiberdeutsch." Other isolated appearances of Hebrew works at **Tannhausen** (1594), **Thiengen** (1660), and **Hergerswiese** did not add much to German Jewish typography in this period.

Meantime, in eastern Europe, the Gersonides continued their activity at **Prague,** especially in the printing of ritual works; but they suffered from the competition of the Bak family, who introduced from Italy certain improvements from the year 1605 onward. Among the typesetters at Prague in this period was the Jewess Gütel (daughter of Löb Setzer), who set up a work in 1627. At Prague almost for the first time is found the practise of rabbis issuing their responsa from the local presses. The decoration employed by the Prague press of this period was often somewhat elaborate. Besides the illustrated Haggadah of 1526, the title-page of the Ṭur of 1540 is quite elaborate and includes the arms of Prague.



קהלת יעקב שרש ג

תקוה הוא תוחלת טובה לזה שאין גם אחד בזה העולם
שלא ישאל נפשו למות מהטרדות והיסורין שסובלין וזה
אין מי שמקוה שלא ימות רוצה לומר שיהיה לו לתקוה
טובה אותם הימים שהוא חי ואינו מת וזה תרא' מן האבות
שעם שהיו מושגחי' והיה ראוי שיקוו אל החיים מכל מקום
גם הם היה להם חיי צער והיו תאוים למות כי האדם
שמואס בדבר אינו זוכרו אלא לצורך גדול וכיון שהכל
יודעים שהם מתים מה צורך אל זכרון המות אלא צורך
להכרם אמר הנה אנכי הולך כי אמר הולך בהווה ולמה

קדש ישראל דרוש ג לט

ממלא תאותו ואחר כך מכאן והלאה אני בתשובה שלמה
לפניו יתברך ולא אשוב עוד לחטא לו לזה כי לא כן אלא
צריך שירחם בעצמו על כל הדברים הרעים שעשה שהם
הבל ואין בהם תועלת והם רעי' וישבור לבו על כך באומ'
אוי לי שפעלתי רעות יהיה מקום לתשוב' כמו שצריך
לפנים אחרי ביאור הפסוקים וזה שאמר ראיתי את כל
המעשים הרעי' שיעשו הוא מדבר בעד עצמו על שהיה בה
נשים וסוסים עד שבעבור זה הורידוהו ואמר כי בשעת
התשובה ראה אותם הבל ורעות ושאין ראוי לעשותם ועוד

FROM "KEHILLOT YA'AḲOB," VENICE, 1599.

Cracow and Lublin.

In **Cracow** Isaac ben Aaron of Prossnitz revived the Hebrew press in 1569, and produced a number of Talmudic and cabalistic works from that time to his death in 1614, when his sons succeeded to his business. He was assisted by Samuel Bohn, who brought from Venice the Italian methods and title-page designs, which were used up to about 1580. He produced, besides the Jerusalem and Babylonian Talmuds, two editions of the Midrash Rabbot, the "Yalḳuṭ Shim'oni" (1596), and several works of Moses Isserles and Solomon Luria, besides the "Yuḥasin," "Shalshelet ha-Ḳabbalah," and "Yosippon." Isaac b. Aaron for a time ran a press in his native city of **Prossnitz,** where from 1602 to 1605 he published four works.

Lublin competed with Cracow for the eastern trade from 1556 onward, when an edition of the tractate Shebu'ot appeared in the former city. Its printers were mainly of the Jaffe family; Kalonymus Abraham (1562–1600) was followed by his son Zebi (1602 onward), who made use of the services of the above-mentioned Mordecai b. Jacob of Prossnitz. The prints of the Jaffes were mainly productions of local rabbis and Judæo-German works. During the plague which ravaged Lublin in 1592 Kalonymus Jaffe moved his printing establishment to **Bistrovich,** whence he issued a Haggadah with Abravanel's commentary.

It should perhaps be added that at **Antwerp** and **Leyden** in this period Biblical works by Christian printers appeared, at the former place by the celebrated Christopher Plantin, who got his type from Bomberg's workshop.

Fourth Period. Hegemony of Amsterdam.

IV. (1627–1732): This period is opened and dominated by the foundation of the press at **Amsterdam,** the rich and cultured Maranos of the Dutch capital devoting their wealth, commercial connections, and independent position to the material development of Hebrew literature in book form. For nearly a century after its foundation Amsterdam supplied the whole of Teutonic Europe with Hebrew books; and the term "Defus Amsterdam" was used to denote type of special excellence even though cast elsewhere, just as the term "Italic" was applied to certain type cast not only in Italy but in other countries. The first two presses were set up in the year 1627, one under Daniel de Fonseca, the other under Manasseh ben Israel, who in the following twenty years printed more than sixty works, many of them his own, with an excellent edition of the Mishnah without vowels, and, characteristically enough, a reprint of Almoli's "Pitron Ḥalomot" (1637). The work in later times was mainly done by his two sons, Ḥayyim and Samuel. Toward the latter part of Manasseh ben Israel's career as a printer an important competitor arose in the person of Immanuel Benveniste, who in the twenty years 1641–60 produced prayer-books, a Midrash Rabbah, an Alfasi, and the Shulḥan 'Aruk, mostly decorated with elaborate titles supported by columns, which became the model for all Europe. He was followed by the firm of Gumpel & Levi (1648–60). Particular interest attaches to the name of Uri Phoebus ha-Levi, an apprentice of Benveniste's who was in business in Amsterdam on his own account from 1658 to 1689. He was the medium through which the Amsterdam methods of printing were transferred to Zolkiev between 1692 and 1695. His productions, though in the Amsterdam style, were generally of a less costly and elegant nature, and he appears to have printed prayer-books, Maḥzors, calendars, and Judæo-German works for the popular market. Just as Uri Phoebus worked for the German Jews, so Athias contemporaneously published ritual works for the Spanish Jews, who demanded usually a much higher grade of printing, paper, and binding than did their poorer German coreligionists (1660-83). Athias' editions of the Bible, and especially of the Pentateuch, for which he had Leusden's help, are especially fine; and the edition of Maimonides' "Yad" which his son and successor, Immanuel, published in 1703, is a noteworthy piece of printing. A third member of the Athias family printed in Amsterdam as late as 1739-40.

The Sephardic community of Amsterdam had also the services of Abraham de Castro Tartas (1663-95), who had learned his business under the Ben Israels. He printed, chiefly, works in Spanish and Portuguese, and in the decoration of his titles was fond of using scenes from the life of David. A number of Poles who fled to Amsterdam from the Cossack uprisings in 1648-56 were employed by Christian printers of that city, as Albertus Magnus, Christoph von Ganghel, the Steen brothers, and Bostius, the last-named of whom produced the great Mishnah of Surenhusius (1698-1703). A most curious phenomenon is presented by Moses ben Abraham, a Christian of Nikolsburg, who was converted to Judaism, and who printed several works between 1690 and 1694. Abraham, the son of another proselyte named Jacob, was an engraver who helped to decorate the Passover Haggadah of 1695, printed by Kosman Emrich, who produced several important works between 1692 and 1714.

טעם ארבע כוסות נגד ד' לשונות של גאולה בפרשת וארא והוצאתי והצלתי וגאלתי ולקחתי :

From a Passover Haggadah, Amsterdam, 1695.

Less important presses at the beginning of this period were erected in Amsterdam by Moses Coutinho, Isaac de Cordova, Moses Dias, and the firm of Soto & Brando. Members of the Maarssen family are also to be reckoned among the more productive Hebrew printers of Amsterdam. Jacob, Joseph, David, and Mahrim Maarssen produced many works between 1695 and 1740, among them reproductions of cursive writing. The last-named settled later at Frankfort-on-the-Main.

The Proopses.

By this time the Hebrew press at Amsterdam had become entirely dominated by mercantile considerations, and was represented by the publishing- and printing-houses of Solomon ben Joseph Proops, whose printed catalogue "Appiryon Shelomoh," 1730

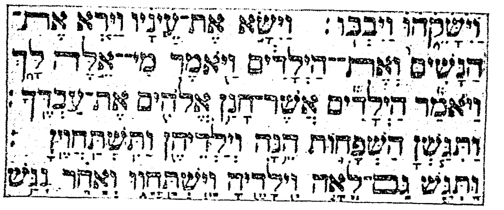
PAGE FROM THE "MIḲRA'OT GEDOLOT," AMSTERDAM, 1724.

(the first known of its kind), shows works published by him to be mainly rituals and a few responsa, two editions of the "'En Ya'aḳob," the "Ḥobot ha-Lebabot," and the "Menorat ha-Ma'or," two editions of the Zohar (1715), and the Judæo-German "Ma'asehbuch." Proops was evidently adapting himself to the popular taste from 1697 onward. The house established by him continued to exist down to the middle of the nineteenth century, Joseph and Jacob and Abraham being members thereof from 1734 until about 1780. They were followed by Solomon ben Abraham Proops in 1799, while a David ben Jacob Proöps, the last of the family, died in 1849, and his widow sold the business to I. Levisson.

Mention should be made here of the two Ashkenazic Dayyanim of Amsterdam, who added printing to their juridical accomplishments, Joseph Dayyan from 1719 to 1737, and Moses Frankfurter from 1720 to 1743; the latter produced between the years 1724 and 1728 the best-known edition of the rabbinic Bible. The only other Amsterdam printer whom it is necessary to mention is Solomon London (*c.* 1721), on account of his later connection with Frankfort-on-the-Main.

Resuming the history of the **Prague** press during this period, the Bak family continued its activity, especially in printing a number of Judæo-German works, mostly without supplying the place or the date of publication. Many local folk-songs in German now exist only in these productions. One of the productions of this firm, a Maḥzor, the first volume of which appeared in Prague in 1679, was finished in **Wekelsdorf** by the production of the second volume in 1680.



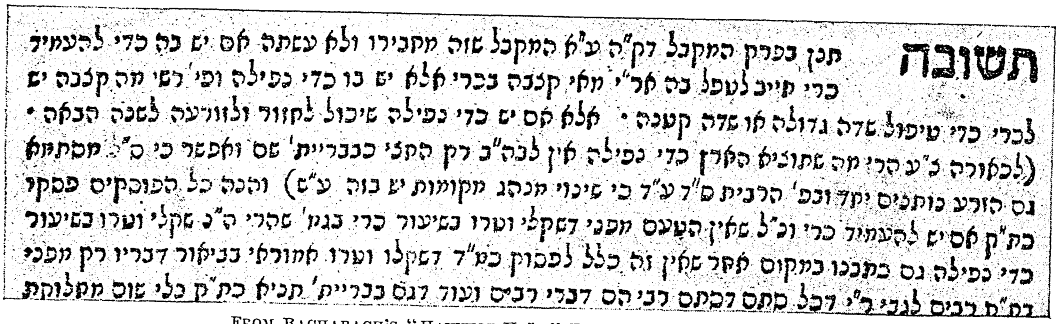
וַיִּשָּׁקֵהוּ וַיִּבְכּוּ׃ וַיִּשָּׂא אֶת־עֵינָיו וַיַּרְא אֶת־
הַנָּשִׁים וְאֶת־הַיְלָדִים וַיֹּאמֶר מִי־אֵלֶּה לָּךְ
וַיֹּאמַר הַיְלָדִים אֲשֶׁר־חָנַן אֱלֹהִים אֶת־עַבְדֶּךָ׃
וַתִּגַּשְׁןָ הַשְּׁפָחוֹת הֵנָּה וְיַלְדֵיהֶן וַתִּשְׁתַּחֲוֶיןָ׃
וַתִּגַּשׁ גַּם־לֵאָה וִילָדֶיהָ וַיִּשְׁתַּחֲווּ וְאַחַר נִגַּשׁ

From a Pentateuch, Amsterdam, 1726.

Another offshoot of the Prague press was that of **Wilhermsdorf**, which was founded in 1669 in order to take advantage of the paper-mills erected there by Count von Hohenlohe. The first printer there was Isaac Cohen, one of the Gersonides who printed two works there in poor style in 1691. He was followed in 1712 by Israel ben Meïr of Prague, who sold out to Hirsch ben Ḥayyim of Fürth. Among the 150 productions of these presses may be mentioned a list of post-offices, markets, and fairs compiled by the printer Hirsch ben Ḥayyim and printed in 1724.

In Prague itself the Baks found a serious competitor in Moses Cohen Ẓedeḳ, founder of the Katz family of typographers; this competition lasted for nearly a century, the two houses combining in 1784 as the firm of Bak & Katz.

Cracow during this period is distinguished by the new press of Menahem (Nahum) Meisels, which continued for about forty years from 1631 onward, producing a considerable number of Talmudic and cabalistic works, including such productions of the local rabbis, as the "Ḥiddushe Agadot" of Samuel Edels; this was put up in type by Judah Cohen of Prague, and corrected by Isaac of Brisk. The year 1648, so fatal to the Jews of Slavonic lands, was epoch-making for both Cracow and Lublin. At the latter place a few works appeared from 1665 onward, mainly from the press of Samuel Kalmanka (1673-83) of the Jaffe family.



תשובה תנן בפרק המקבל דק״ה ע״א המקבל שדה מחבירו ולא עשתה אם יש בה כדי להעמיד
כרי חייב לטפל בה אר״י מאי קצבה בכרי אלא יש בו כדי נפילה ופי׳ רש״י מה קצבה יש
לכרי כדי שיפול שדה גדולה או שדה קטנה · אלא אם יש כדי נפילה שיכול לחזור ולזורעה לשנה הבאה ·

FROM BACHARACH'S "ḤAWWOT YAÏR," FRANKFORT-ON-THE-MAIN, 1699.

This period is especially distinguished by the rise of the Jewish Hebrew press in Germany, chiefly in five centers: (1) Frankfort-on-the-Main, (2) Sulzbach, (3) Dessau, (4) Hamburg, and (5) Dyhernfurth. For various reasons presses were erected also in the vicinity of each of these centers.

Germany. In **Frankfort-on-the-Main** the municipal law prohibited any Jew from erecting a printing-press, so that, notwithstanding its large and wealthy Jewish population, the earliest Hebrew productions of this city came from Christian printers, especially Christian Wüst, who produced a Bible in 1677, and an edition of the "Ḥawwot Yaïr" in 1699. Then came the press of Blasius Ilsner, who began printing Hebrew in 1682, and produced the "Kuhbuch" of Moses Wallich in 1687, in which year he produced also part of a German Pentateuch as well as a standard edition of the Yalḳuṭ. This last was published by the bookseller Seligmann Reis. Besides other Christian printers like Andreas and Nicholas Weinmann, Johann Koelner produced a number of Hebrew works during the twenty years 1708-27, including the continuation of an edition of the Talmud begun at Amsterdam and finished at Frankfort-on-the-Main (1720-23); it is probable that the type was brought from Amsterdam. An attempt of Koelner to produce 1,700 copies of an Alfasi by means of a lottery failed, though an edition was produced in Amsterdam four years later. Many of the typesetters of Amsterdam and Frankfort about this period frequently alternated their residence and activity between the two cities. In 1727 few Hebrew books were produced at Frankfort-on-the-Main. In connection with the Frankfort book market a number of presses in the neighborhood turned out Hebrew books, in **Hanau** as early as 1674. The book entitled "Tam we-Yashar" was printed there, with Frankfort as its place of publication. From 1708 onward Bashuysen produced a series of books, including Abravanel on the Pentateuch (1710), which was issued by Reis of Frankfort. Among his workmen were David Baer of Zolkiev, who had worked at Amsterdam, and Menahem Maneli of Wilmersdorf. Bashuysen sold his rights to Bousang (1713), who continued producing Hebrew works till 1725.

Homburg was also one of the feeding-presses for Frankfort, from 1711 to 1750. Its press was possessed from 1737 on by Aaron of Dessau, an inhabitant of the Frankfort Judengasse, who produced among other works two editions of the "Ḥiddushim" of Maharam Schiff (1745). Seligmann Reis, who had learned printing in Amsterdam, started another press in **Offenbach** (1714–20), mostly for Judæo-German pamphlets, including a few romances like the "Artus Hoof," "Floris and Blanchefleur," and "The Seven Wise Masters." In opposition to Reis was Israel Moses, working under the Christian printer De Launoy from 1719 to 1724 and for himself till as late as 1743.

Sulzbach.

The history of the **Sulzbach** Hebrew press is somewhat remarkable. On May 12, 1664, one Abraham Lichtenthaler received permission to found a printing-press at Sulzbach. He began to print in 1667 Knorr von Rosenroth's "Kabbala Denudata," a work which was for the Christian world the chief source of information as to the Cabala. This appears to have attracted to Sulzbach Isaac Cohen Gersonides, who produced in the year 1669 a couple of Judæo-German works, "Leb Ṭob" and "Shebeṭ Yehudah," from the press of Lichtenthaler. Nothing followed these first productions till the "Kabbala Denudata" was finished in 1684, when Knorr determined to have an edition of the Zohar printed at Sulzbach, and for that purpose had one Moses Bloch cut Hebrew letters, with which the Zohar was printed in a rather elementary fashion. This attracted attention to Sulzbach as a printing-place; and an imperfect edition of the Talmud was printed in 1694 by Bloch and his son (the latter succeeded Bloch). The competition of the Amsterdam edition of 1697–99 prevented its completion. One of the most curious productions of the Sulzbach press was a Purim parody, which was issued anonymously in 1695. Bloch was followed by Aaron Frankel, son of one of the exiles of Vienna, and founder of the Frankel-Arnstein family, having worked at the office of Bloch as early as 1685. He set up his press in 1699, his first production being a Maḥzor and part of the Talmud; and his son Meshullam carried on the press for forty years from 1724 to 1767. One hundred and fourteen productions of the Sulzbach press have been enumerated up to 1732.

Fürth and Hamburg.

Fürth also commenced in this period its remarkable activity as a producer of Hebrew works, more distinguished perhaps for quantity than quality. Beginning in 1691 just as the Wilmersdorf press gave up, Joseph Shneior established a press at Fürth, which produced about thirty works during the next eight years. Most of his typesetters had come from Prague. An opposition press was set up later (1694, 1699) by Ẓebi Hirsch ha-Levi and his son-in-law Mordecai Model. This was one of the presses which had as a typesetter a woman, Reichel, daughter of Isaac Jutels of Wilmersdorf. The former press was continued in 1712 by Samuel Bonfed, son of Joseph Shneior, together with Abraham Bing (1722–24); the firm lasted till 1730.

Similar presses were founded at **Dessau** by Moses Bonem (1696), and at **Köthen** in 1707–18 by Israel ben Abraham, the proselyte, who had previously worked at Amsterdam, Offenbach, and Neuwied. Israel then transferred his press to **Jessnitz,** where he worked till about 1726, at which date he removed it to **Wandsbeck,** near Hamburg, staying there till 1733, when he wandered to **Neuwied** and back to Jessnitz (1739–44) together with his sons Abraham and Tobias. Another proselyte, Moses ben Abraham, had printed Hebrew in **Halle** (1709–14).

The earliest production of the Hebrew press of **Hamburg** was a remarkable edition of a Hebrew Bible, set up by a Christian, Elias Hutter, and having the servile letters distinguished by hollow type, so as to bring out more clearly the radical letters. Hutter was followed by two Christians: (1) George Ravelin, who printed a Pentateuch with Targum and Hafṭarot in 1663; and (2) Thomas Rose, who from 1686 to 1715 printed several Jewish books and who was succeeded by his son Johann Rose up to 1721. In the neighboring city of **Altona** Samuel Poppart of Coblenz started printing in 1720, mainly ritual matters; and he was followed by Ephraim Hekshcr in 1732 and Aaron Cohen of Berlin in 1735.

Dyhernfurth.

Finally more to the east Shabbethai Bass established at **Dyhernfurth** in 1689 a printing-press especially devoted to meeting the wants of the Breslau book market, which had hitherto been dependent upon Amsterdam or Prague. For the varying history of his press, which lasted till 1713, see his biography (Jew. Encyc. ii. 583). It was sold by Shabbethai's son Joseph to his son-in-law Issachar Cohen for 5,000 thalers, who carried it on till 1729, when he died, his wife then continuing the business.

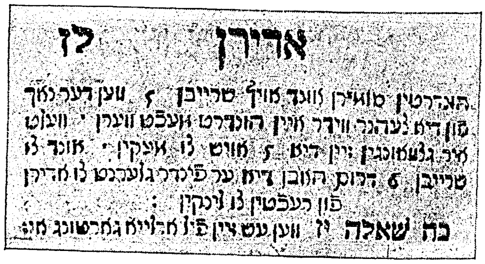
From "Sefer Ḥokmat ha-Mishkan," Leghorn, 1772.

Hebrew works were early printed at **Frankfort-on-the-Oder**, by two Christians, Hartmann Brothers, from 1595 to 1596, who produced Bibles, and Eichhorn, who printed the "Musar Haskel" of Hai Gaon in 1597. Their work was continued in the next century by Professor Beckmann in 1681, and Michael Gottschek, who produced, at the cost of Baermann Halberstadt, an edition of the Babylonian Talmud in 1698 to supply the loss of the Talmuds during the Cossack outbreaks. A second edition of this Talmud was produced by Gottschek in company with Jablonski at Berlin, who had purchased a Hebrew set of types in 1697. They began work in 1699, and produced a Pentateuch with a Rashbam in 1705, and the aforesaid Talmud in 1715–21. One of his chief typesetters was Baruch Buchbinder, who afterward printed in Prausnitz. Other Hebrew books were produced by Nathan Neumark (1720–26), in whose employ Aaron Cohen, afterward at Altona, learned to set type.

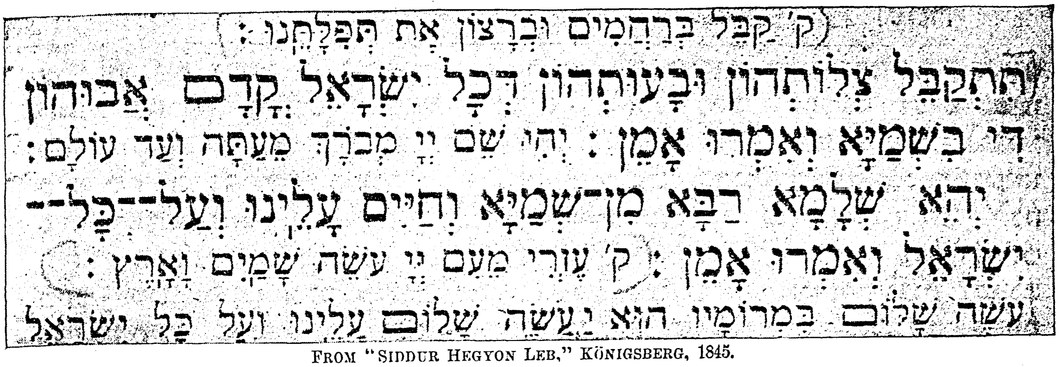
In this period a beginning of Hebrew typography was made also in the British Isles, by Samuel Clarke at Oxford about 1667, and by Thomas Ilive (1714–1718) in London, both Christian printers.

To return to the south of Europe: the **Venice** press was carried on by a succession of the Bragadinis: Aloisio II. (1625–28), Geralamo (1655–64), and Aloisio III. (1697–1710). Among the Jewish setters or correctors for the press employed by the Bragadinis may be mentioned Leo de Modena, Moses Zacuto, Menahem Ḥabib, Moses Ḥayyim of Jerusalem, and Solomon Altaras. The chief competitor of the Bragadinis was Vendramini, from 1631 onward; but the opposition of Amsterdam reduced the activity of the Venetian press toward the end of the seventeenth century, while **Leghorn** began to cater to the printing of the Oriental Jews about 1650, when Jedidiah Gabbai produced the "azharot" of Solomon ibn Gabirol. His chief production was a Yalḳuṭ in 1660, after which he removed to **Florence** and finally settled in Smyrna, where his son Abraham printed from 1659 to 1680 with the aid of Samuel Valenci from Venice. Abraham's productions include a few Ladino works in Hebrew characters, among the earliest of the kind. In Constantinople a family of printers named Franco—Solomon (1639), Abraham (1641–83), and Abraham (1709–20)—produced a number of casuistic works. Among their typesetters was Solomon of Zatanof (1648), who had escaped the Cossack outbreaks. The pause from 1683 to 1710 was broken by two Poles from Amsterdam, Jonah of Lemberg and Naphtali of Wilna. Jonah of Lemberg printed a few of his works at **Ortakeui**, near Constantinople, and finally settled at Smyrna.



From Moses Eidlitz's "Meleket ha-Ḥeshbon," Prague, 1775.

With the year 1732 the detailed history of Hebrew typography must cease. It would be impossible to follow in minute detail the spread of Hebrew presses throughout the world during the last 160 years. The date 1732 is also epoch-making in the history of Hebrew bibliography, as up to that date the great work of Johann Christoph Wolf, amplified and corrected by Steinschneider in his "Bodleian Catalogue," gives a complete account of the personnel of the Hebrew press, both Jewish and Christian. The list of these printers given by Steinschneider is of



ק׳ קבל ברחמים וברצון את תפלתנו:

רמב״ן

FROM PENTATEUCH, VIENNA, 1859.

considerable importance, both for identifying unknown or imperfect works of the earlier period, and as affording information of persons learned in Hebrew lore who utilized it only as typesetters or correctors for the press. Many, if not most, of the more distinguished families of recent date have been connected with these masters of printing, whose names are thus of importance for pedigree purposes (see PEDIGREE). For these reasons Steinschneider's list is here reprinted in shortened form.

LIST OF PRINTERS TO 1732.

Name.	Place.	Date.
Aaron	Amsterdam	1703, 6
Aaron b. Aaron Kohen	Amsterdam	1697
Aaron b. Abraham	Hanau	1722
Aaron da Costa Abendana b. Samuel.	Amsterdam	1726, 30
Aaron (Hezekiah) Credo	Amsterdam	1726
Aaron b. (Ḥayyim) David Levi	Zolkiev	1716, 18, 21, 47
Aaron b. David Witmund	Amsterdam	1659-64
Aaron b. Elijah Kohen of Hamburg.	Hamburg	1714-15, 32
	Offenbach	1716
	Sulzbach	1717
	Frankfort-on-the-Oder.	1719
	Jessnitz	1724
	Berlin	1724-26
	Wandsbeck	1726
	Altona	1735
Aaron (Shneor Zalman) b. Gabriel	Amsterdam	1721
Aaron Hamon	Constantinople	1423
Aaron b. Isaac (Drucker) b. Aaron	Prossnitz	1608-9, 10-12, 12-13, 13-19
Aaron b. Isaac Sofer	Amsterdam	1713
Aaron b. Jacob Levi	Dyhernfurth	1689
Aaron b. Jacob Senior	Amsterdam	1659
Aaron Jaffe b. Israel		1702
Aaron Leon	Constantinople	1576-77
Aaron b. Manasseh Ephraim	Amsterdam	1661
Aaron b. Meïr	Prague	1705-13
Aaron b. Moses Krumenau	Cracow	1608-9, 10-12, 17-18
Aaron Rodrigues-Mendes	Amsterdam	1728, 30
Aaron b. Selig of Glogau	Berlin	1709
	Dyhernfurth	1713
	Berlin	1717
	Amsterdam	1726
Aaron b. Shabbethai	Amsterdam	1723-24
Aaron b. Uri Lipmann		1700-17
Abba b. Solomon	Basel	1609
Abba-Mari of Vienna	Prague	1623
Abbele b. Judah	Prague	1706, 10
Abigdor b. Eliezer Ashkenazi	Constantinople	1547
Abigdor b. Eliezer Kohen	Prague	1614
Abigdor b. (Israel) Joseph	Cracow	1638-40, 43, 48
Abigdor b. Samuel b. Moses Ezra.	Cracow	1619
Abraham	Amsterdam	1708
Abraham b. Aaron	Prague	1674 (?)
Abraham b. Abigdor		1530
Abraham Aboab, Sr.	Venice	1590
Abraham Aboab, Jr.	Venice	1655, 57, 59, 60, 69
Abraham b. Abraham	Adrianople (?)	
Abraham Abudiente	Constantinople	1654
Abraham ibn Akra	Salonica	1595
	Venice	1599
Abraham b. Alexander	Venice	1606
Abraham Algazi b. Simeon	Constantinople	1711
Abraham Algazi b. Solomon	Smyrna	1659
Abraham Alkabizi	Constantinople	1516
Abraham Alkaraš	Damascus	1605-6
Abraham Altschul b. Jacob	Frankfort-on-the-Oder.	1697-99
Abraham Amnon b. Jacob Israel	Leghorn	1653-54
Abraham Arama b. Isaac	Salonica	1520
Abraham ibn Ashkara Ẓarfati b. Samuel.	Pesaro	1511
Abraham Bassa of Jerusalem	Amsterdam	1722
Abraham Benveniste b. Aaron	Venice	1546
Abraham b. Bezalel of Posen	Lublin	1622-26, 30, 33-34, 45, 46
Abraham di Boton b. Aaron	Smyrna	1600, 71, 74
Abraham (Hezekiah) Brandon ibn Yaḳḳar.	Amsterdam	(d. 1725)
Abraham Breit b. Moses	Amsterdam	1650
Abraham Broda b. Elijah of Prague.	Sulzbach	1715
	Wilmersdorf	1716
Abraham Cassel	Strasburg	1521
Abraham ("Senior") Coronel	Amsterdam	1661, 67
Abraham Dandosa	Constantinople	1513
Abraham b. David Gojetein	Cracow	1586, 93
	Prague	1608
Abraham b. David Naḥman	Salonica	1709, 13, 24, 29
	Constantinople	1711
Abraham b. David Posner	Wilmersdorf	1685
Abraham b. Dob (Baer) of Lissa	Amsterdam	1701
Abraham Dorheim b. Moses Dorheim.	Frankfort-on-the-Main.	1719
Abraham b. Eliezer Braunschweig	Hanau	1610, 17
	Basel	1618-19
Abraham b. Eliezer Kohen	Cracow	1589
Abraham b. Eliezer Kohen	Wilmersdorf	1685-90, 1712-23
	Sulzbach	1691-1712
Abraham b. Eliezer Rödelsheim	Cracow	1600
Abraham ibn Ezra	Salonica	1721
Abraham Facon (?)	Naples	1492
Abraham Faraji b. Meïr	Salonica	1593-94
Abraham de Fonseca	Amsterdam	1627
Abraham ben (ibn) Garton b. Isaac.	Reggio	1475
Abraham Gedaliah	Leghorn	1650-57
Abraham Ger	Salonica	1651-55
Abraham Ḥaber-Ṭob b. Solomon	Venice	1595, 99, 1614, 17-19, 24, 32-34, 37, 40, 42, 43
	Leghorn	1650-57
Abraham Ḥavez	Amsterdam	1724
Abraham b. Ḥayyim	Pesaro	1477
	Ferrara	1479
	Bologna	1482
	Soncino	1488
Abraham Ḥayyim of Fano	Ferrara	1693
Abraham Ḥayyon b. Solomon b. Abraham.	Constantinople	1578-79
Abraham Hurwitz b. Isaiah	Amsterdam	1728, 29
Abraham Hurwitz b. Judah (Löb) Deborles Levi.		
Abraham b. Isaac Ashkenazi	Safed	1577-79, 87
Abraham b. Isaac b. David	Ixar	1490
Abraham b. Israel	Cracow	1617, 18
Abraham b. Israel Menahem	Lublin	1578
	Offenbach	1729
Abraham b. Israel b. Moses	Neuwied	1735-37
	Jessnitz	1739-40
Abraham b. Issachar Kohen (Kaz) Gersoni of Prague.	Wilmersdorf	1679, 82
	Sulzbach	1684
	Prague	1686, 88, 90-93
Abraham b. Jacob	Hanau	1728
Abraham b. Jacob Levi	Amsterdam	1726, 30
Abraham (Israel) b. Jacob (Koppel) of Vienna.	Frankfort-on-the-Oder.	1705, 9, 11-12
Abraham Jedidiah de Cologna.		
Abraham b. Jekuthiel	Hanau	1715, 47
Abraham b. Jekuthiel Kohen	Hanau	1611-14, 23-30
Abraham b. Joseph	Lublin	1571-72
Abraham b. Joseph	Hamburg	1690
Abraham b. Joseph Manasseh	Constantinople	1732
Abraham b. Joshua Sezze	Venice	1696
Abraham b. Joshua of Worms	Amsterdam	1643-48, 45-46
Abraham b. Judah	Frankfort-on-the-Oder.	1697-99
Abraham b. Judah (Loeb)	Constantinople	1710, 12, 16-20, 26-27, 37
Abraham b. Judah b. Nisan.		
Abraham b. Kalonymus Reumold.	Prague	1614, 17-19, 21-24, 25
Abraham Ḳara	Salonica	1587
	Venice	1589
	Mantua	1589-90
Abraham Landau b. Jacob	Naples	1491-92
Abraham Laniado	Venice	1603
Abraham (Kohen) de Lara	Amsterdam	1691
Abraham Lichtenthaler	Sulzbach	1697
Abraham Luria	Jessnitz	1723
Abraham Mendes-Lindo	Amsterdam	1725
Abraham b. Meshullam of Modena.	Mantua	1558-60
Abraham Molko b. Joseph	Salonica	1709
Abraham b. Mordecai Kohen	Amsterdam	1661
Abraham b. Moses (Schedel)	Prague	1602-4
Abraham b. Moses Goslar	Wandsbeck	1733
Abraham b. Moses Kohen	Bologna	1538
Abraham b. Moses Nathan	Amsterdam	1700

Name.	Place.	Date.
Abraham b. Naḥman Kohen	Lublin	1635
Abraham b. Nathan	Amsterdam	1652
Abraham ibn Nathan b. Ḥayyim of Salonica.	Constantinople	1716, 17, 18, 19
Abraham Netto b. Joseph	Venice	1622
Abraham (Hai) Ortona b. David	Verona	1652
Abraham ibn Paredes	Constantinople	1522
Abraham Pereira b. Elijah	Constantinople	1642–43
Abraham Perls	Amsterdam	1678
Abraham Pescarol b. Kalonymus.	Venice, Cremona.	1544, 65
Abraham ibn Phorni	Venice	1565
Abraham Porto	Venice	1563, 64, 65, 66, 74, 84, 88, 89
Abraham Porto b. Jehiel	Verona	1594
Abraham b. Reuben Abi Saglo	Venice	1606
Abraham Reyna	Constantinople	1560
Abraham Rosanes b. Meïr	Constantinople	1711, 19–20
Abraham Sacchi	Venice	1586
Abraham b. Solomon Levi	Hamburg	1706–7

V. (1732-1900): From 1732 many of the presses already referred to have continued their activity down to the present day. That of **Leghorn**, for example, began a new life in 1740 in the workshop of Abraham Meldola; and he was followed by a number of Hebrew printers, who found a market for their products in the Levant and the Barbary States, so much so that Christian printers like Carlo Gorgio (1779) and Giovanni Falerno (1779) found it worth while to compete in producing ritual and cabalistic works for the southern markets. This period also saw the beginning of the remarkable activity of Wolf Heidenheim at **Rödelheim**, producing the well-known editions of the ritual. These, while originally intended for the Frankfort market, have been used by Ashkenazic congregations throughout the world; and the Tefillah had run to as many as 128 editions by 1902 ("Zeit. für Hebr. Bibl." v. 99). This period was likewise marked by the inauguration of Hebrew printing at **Carlsruhe**, at first under the egis of Christian printers beginning with Johann Herald in 1755, and later under Wilhelm Lotter from 1766. It was not till 1782 that Hirsch Wormser and his brother-in-law were allowed to start a printing-press, chiefly for ritual works. They were followed in 1814 by David Marx. Altogether about 61 Hebrew prints from this press are known.

Russia.

But the period is especially noteworthy for the rise and development of Hebrew printing in the lands where most persons lived who were acquainted with Hebrew. It is somewhat difficult to account for the fact that there was absolutely no Hebrew printing in the districts now constituting Russian Poland and the Pale of Settlement till past the middle of the eighteenth century, though they have for the past 200 years contained the largest number of Jews and the greatest number of those acquainted with Hebrew. In the old Polish kingdom the Council of the Four Lands kept a somewhat rigid control over the production of Hebrew books, to which it secured a kind of copyright by threatening excommunication for anybody reprinting works having its approbation. The Cossack outrages of 1648 had destroyed the chance of any independent printing in these countries, and the markets were mainly supplied by Prague, Cracow, Lublin, and later Frankfort-on-the-Oder. It was not till after the troublous period of the three partitions (1772-95) that local presses began to be established in Russia. Mention may here perhaps be made of the printing of the Karaite Tefillah (1784) at **Eupatoria** (not yet, however, within the precincts of the Russian empire), followed by that of the Krimchaks in the next year, and reference may also be made to two or three works printed at **Olexnitz** (1760-67) in connection with the beginnings of Ḥasidism. Soon after this, printing had begun in **Koretz** (1777), and was followed at **Neuhof** (Novy Dvor) near Warsaw (1782), at **Polonnoye** (1783-91), at **Shklov** (1783), and at **Poretzk** (1786-91). Lithuania for the first time obtained a printing-press of its own by the privilege granted by King Stanislaus Augustus to Baruch Romm, who established a printing-office at **Grodno** in 1789. After the settlement at the third partition under Catherine II., a considerable number of Russian printing-offices sprang up, which will be found in the list on pages 328 and 330. They continued to increase during the nineteenth century till Nicholas I. in 1845 passed a law restricting all Hebrew printing to two establishments, one at **Wilna**, the other at Slavuta. **Königsberg, Johannisberg, Lyck, Memel, Eydtkuhnen,** and other cities of East Prussia supplied the Russian requirements. This practically gave a monopoly of the Russian market to the firm of Romm, which had moved from Grodno to Wilna in 1799. But it maintained connection with Grodno, producing in 1835 a well-known edition of the Talmud which bears the imprint "Wilna and Grodno." The Romms down to the present day continue to be the most extensive Hebrew printers in Russia; but of recent years the Warsaw publishing firms "Tushiyyah" and "Aḥiasaf" produce perhaps even to a larger extent than the Wilna firm.

Mention may be made here of the Austrian presses in the nineteenth century, which have been very productive, especially those of **Vienna,** where Anton von Schmid obtained from 1800 onward the monopoly for the Austrian empire, and as a consequence produced about 250 Hebrew works, including a reprint of the Mendelssohn Bible and many Jewish prayer-books, besides the periodical "Bikkure ha-'Ittim." He was succeeded by his son, from whom the business was bought by De la Torre. The monopoly being given up, J. Schlesinger assumed the work; he devoted himself especially to rituals also for the outlying colonies of Jews, producing a Siddur for the Yemen Jews, a Maḥzor for the Algerian Jews, and other rituals for northern Africa; the Catalonian and Aragonian congregations of Salonica also had their rituals printed at Vienna. Other Austrian and Hungarian presses were at **Lemberg, Cracow** (Joseph Fischer), **Presburg** (Alkalai), **Paks, Przemysl, Lublin,** etc. J.

Austria.

Mention has already been made of the beginnings of Oriental typography in the city of **Constantinople.** Toward the end of the sixteenth century Donna Reyna Mendesia founded what might be called a private printing-press at **Belvedere** or **Kuru Chesme** (1593). The next century the Franco family, probably from Venice, also established a printing-press there, and was followed by Joseph b. Jacob of Solowitz (near Lemberg), who established at Constantinople in 1717 a press which existed to the end of the century. He was followed by a Jewish printer from Venice, Isaac de Castro (1764-1845), who settled at Constantinople in 1806; his press is carried on by his son Elia de Castro, who is still the official printer of the Ottoman empire. Both the English and the Scotch missions

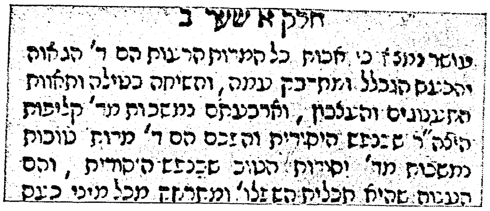
From the Heidenheim Maḥzor, Rödelheim, 1832.

to the Jews published Hebrew works at Constantinople.

Together with Constantinople should be mentioned **Salonica,** where Judah Gedaliah began printing in 1512, and was followed by Solomon Jabez (1516) and Abraham Bat-Sheba (1592). Hebrew printing was also conducted here by a convert, Abraham ha-Ger. In the eighteenth century the firms of Naḥman (1709–89), Miranda (1730), Falcon (1735), and Ḳala'i (1764) supplied the Orient with ritual and halakic works. But all these firms were outlived by an Amsterdam printer, Bezaleel ha-Levi, who settled at Salonica in 1741, and in whose name the publication of Hebrew and Ladino books and periodicals still continues. The Jabez family printed at **Adrianople** before establishing its press at Salonica; the Hebrew printing annals of this town had a lapse until 1888, when a literary society entitled Doreshe Haskalah published some Hebrew pamphlets, and the official printing-press of the vilayet printed some Hebrew books.



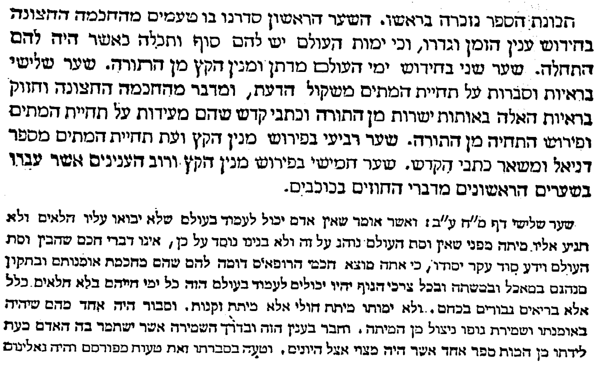
חלק א שער ב

From Ḥayyim Vital's "Sha'are Ḳedushshah," Aleppo, 1866.

From Salonica printing passed to **Safed** in Palestine, where Abraham Ashkenazi established in 1588 a branch of his brother Eleazar's Salonica house. According to some, the Shulḥan 'Aruk was first printed there. In the nineteenth century a member of the Bak family printed at Safed (1831–41), and from 1864 to 1884 Israel Dob Beer also printed there. So too at **Damascus** one of the Bat-Shebas brought a press from Constantinople in 1706 and printed for a time. In **Smyrna** Hebrew printing began in 1660 with Abraham b. Jedidiah Gabbai; and no less than thirteen other establishments have from time to time been founded. One of them, that of Jonah Ashkenazi, lasted from 1731 to 1863. E. Griffith, the printer of the English Mission, and B. Tatiḳian, an Armenian, also printed Hebrew works at Smyrna. A single work was printed at **Cairo** in 1740. Hebrew printing has also been undertaken at **Alexandria** since 1875 by one Faraj Ḥayyim Mizraḥi.

Israel Bak, who had reestablished the Safed Hebrew press, and was probably connected with the Bak family of Prague, moved to **Jerusalem** in 1841 and printed there for nearly forty years, up to 1878. Quite a number of presses which deserve enumeration have been set up in the Holy City; viz., those of Israel Bak (1841) and his son Nisan; Joel Moses Solomon (1863); Elijah Moses Ḥai Sassoon (1864); Israel Dob FRUMKIN (1871), the editor of the journal "Ha-bazzelet"; Isaac Goscinny (1876); Elhanan Tenenbaum (1879-90); Isaac b. Jacob Hirschensohn (1880) and his successors; Samuel Levi Zuckermann (1882); Moses Perez (1884); Abraham Moses LUNCZ (1885), known for his annual publications "Luaḥ Ereẓ Yisrael" and "Yerushalayim"; Eliezer ben Judah, called Perlemann, director of the journal "Hashkafah," originally "Ha-Ẓebi"; J. Nahum Lewi (1887); Adelmann and Meyuḥas (1887); M. Lilienthal (1895); Meir Blumenthal (1897); Sonnenfeld & Blumenthal (1897); Loeb Kahana (1899); A. M. Goldberg (1901); and Moses A. Azriel (1901).

Jerusalem.



הכונת הספר נזכרה בראשו. השער הראשון סדרנו בו טעמים מהחכמה החצונה
בחידוש ענין הזמן וגדרו, וכי ימות העולם יש להם סוף ותכלה כאשר היה להם
התחלה. שער שני בחידוש ימי העולם מרתן ומנין הקץ מן התורה. שער שלישי
בראיות וסברות על תחיית המתים משקול הדעת, ומדבר מהחכמה החצונה וחזוק
בראיות האלה באותות ישרות מן התורה וכתבי קדש שהם מעידות על תחיית המתים
ופירוש התחיה מן התורה. שער רביעי בפירוש מנין הקץ ועת תחיית המתים מספר
דניאל ומשאר כתבי הקדש. שער חמישי בפירוש מנין הקץ ורוב הענינים אשר עברו
בשערים הראשונים מדברי החוזים בכוכבים.

שער שלישי דף מ"ח ע"ב: ואשר אומר שאין אדם יכול לעמוד בעולם שלא יבואו עליו חלאים ולא
תגיע אליו מיתה מפני שאין וסת העולם נוהג על זה ולא בנינו נוסד על כן, אינו דברי חכם שהבין וסת
העולם וידע סוד עקר יסודו, כי אתה מוצא חכמי הרופאים דומה להם שהם מחכמת אומנותם ובתקון
מנהגם במאכל ובמשתה ובכל צרכי הגוף יהיו יכולים לעמוד בעולם הזה כל ימי חייהם בלא חלאים. כלל
אלא בריאים גבורים בכחם. ולא ימותו מיתת חולי אלא מיתת זקנות. וסבור היה אחד מהם שיהיה
באומנתו ושמירת גופו ניצול מן המיתה. וחבר בענין הזה ובדרך השמירה אשר ישתמר בה האדם בעת
לידתו מן המות ספר אחד אשר היה מצוי אצל היונים. וטעה בסברתו ואת טעות מפורסם וזה גאלינוס

FROM "SEFER HA-'IBBUR," PRINTED BY FILIPOWSKI, LONDON, 1853.

One of the Jerusalem printers, Elijah Sassoon, moved his establishment to **Aleppo** in 1866. About the same time printing began in **Bagdad** under Mordecai & Co., who recently have had the competition of Judah Moses Joshua and Solomon Bekor Ḥussain. At **Beirut** the firm of Selim Mann started printing in 1902. Reverting to the countries formerly under Turkish rule, it may be mentioned that Hebrew and Ladino books have been printed at **Belgrade** since 1814 at the national printing establishment by members of the Alḳala'i family. Later Jewish printing-houses are those of Eleazar Rakowitz and Samuel Horowitz (1881). In **Sarajevo** Hebrew printing began in 1875; and another firm, that of Daniel Kashon, started in 1898. At **Sofia** there have been no less than four printing-presses since 1893, the last that of Joseph Pason (1901), probably from Constantinople. Also at **Rustchuk,** since 1894, members of the Alḳala'i family have

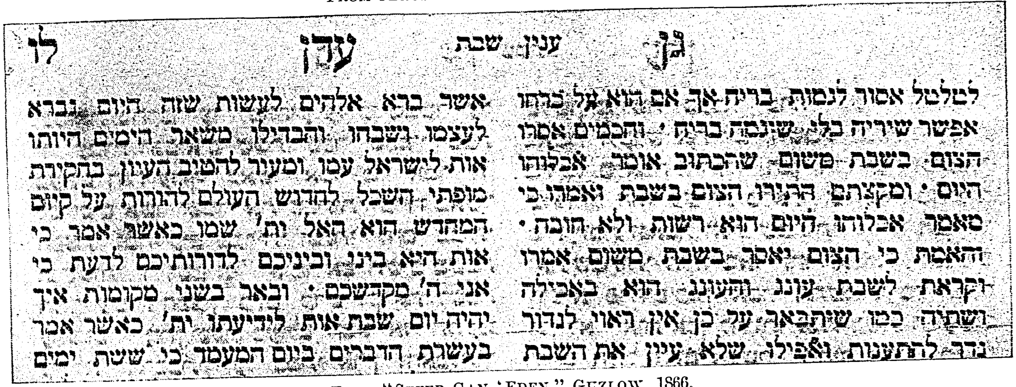
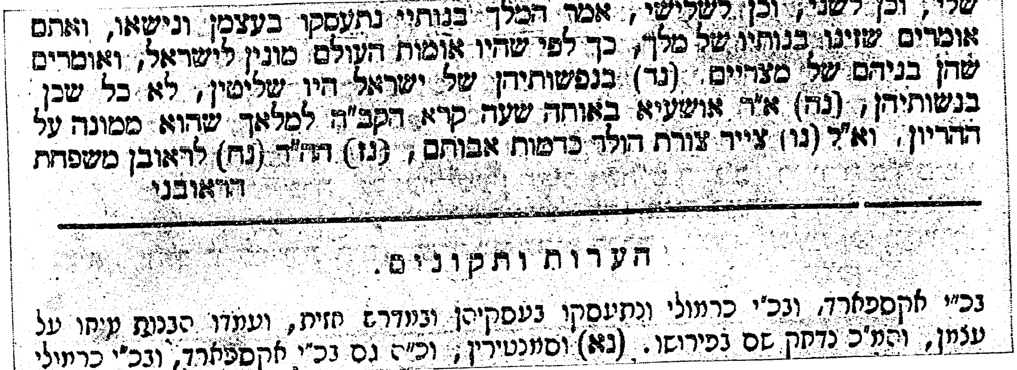
From Jerusalem Talmud, Jitomir, 1865.



גן עינן שבת עדן לו

לטלטל אסור לגמות בריה אף אם הוא על כהחו
אפשר שיריה כלי שנגמה בריה · והכמים אסרו
הצום בשבת משום שהכתוב אומר אבלוהו
היום · ומקצתם התירו הצום בשבת ואמרו כי
מאמר אבלוהו היום הוא רשות ולא חובה ·
והאמת כי הצום יאסר בשבת משום אמרו
וקראת לשבת עונג והעונג הוא באכילה
ושתיה כמו שיתבאר על כן אין ראוי לנדור
נדר להתענות ואפילו שלא עינן את השבת
אשר ברא אלהים לעשות שזה היום נברא
לעצמו ושבחו והבדילו משאר הימים היותו
אות לישראל עמו ומעיר להטיב העיון בחקירת
מופתי השכל להדוש העולם להורות על קיום
המהדש הוא האל ית' שמו כאשר אמר כי
אות היא ביני וביניכם לדורותיכם לדעת כי
אני ה' מקדשכם · ובאר בשני מקומות איך
יהיה יום שבת אות לידיעתו ית' כאשר אמר
בעשרת הדברים ביום המעמד כי ששת ימים

From "Sefer Gan 'Eden," Guzlow, 1866.



שלי, וכן לשני, וכן לשלישי, אמר המלך בנותיי נתעסקו בעצמן ונישאו, ואתם
אומרים שזינו בנותיו של מלך, כך לפי שהיו אומות העולם מונין לישראל, ואומרים
שהן בניהם של מצריים. (נד) בנפשותיהן של ישראל היו שליטין, לא כל שכן
בנשותיהן, (נה) א"ר אושעיא באותה שעה קרא הקב"ה למלאך שהוא ממונה על

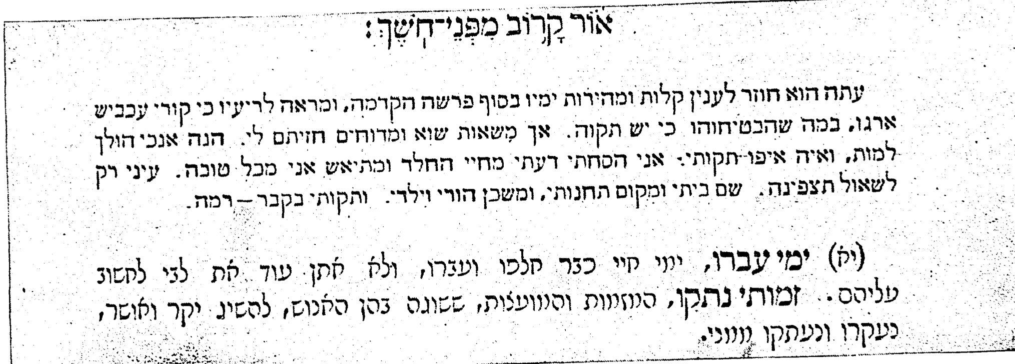
From Buber's Pesikta, Lyck, 1868.



אוֹר קָרוֹב מִפְּנֵי־חֹשֶׁךְ׃

עתה הוא חוזר לענין קלות ומהירות ימיו בסוף פרשה הקדמה, ומראה לריעיו כי קורי עכביש
ארגו, במה שהבטיחוהו כי יש תקוה. אך משאות שוא ומדוחים חזיתם לי. הנה אנכי הולך
למות, ואיה איפו תקותי: אני הסחתי דעתי מחיי החלד ומתיאש אני מכל טובה. עיני רק
לשאול תצפינה. שם ביתי ומקום תחנותי, ומשכן הורי וילדי. ותקותי בקבר — רמה.

(יא) ימי עברו, ימי חיי כבר הלכו ועברו, ולא אתן עוד את לבי לחשוב
עליהם. זמותי נתקו, המזמות והמועצות, שהגה בהן הלבוש, להשיג יקר ואוצר,
נעקרו ונעתקו ממני.

From Szold's Commentary on Job, Baltimore, 1886.

printed, while at **Philippopolis** the Pardo Brothers started their press in 1898 before moving it to Safed. Altogether in the Levant about eighteen cities have had 121 Hebrew printing establishments between 1504 and 1905. Their productions have been mainly rituals, responsa of local rabbis, and Cabala; the type has been mostly Rashi, and the result has not been very artistic.

J. M. Fr.

England and the United States.

In the English-speaking lands Hebrew printing proceeded slowly among the Jews. In England, for example, after a few Hebrew books had been printed by Christian printers the Alexanders began their series of prayer-books about 1770, which have continued to be reissued down to the present day; they were succeeded by the Valentines. The firm of Wertheimer, Lea & Co. printed most of the Jewish Hebrew productions of England till recently, including the first edition of the popular authorized prayer-book, of which 100,000 copies have been issued. The Clarendon Press, however, has during the last thirty years printed many works on rabbinic subjects, and has been followed by the Pitt Press of Cambridge, which issued especially the Mishnah edition by W. H. Lowe and the "Pirḳe Abot" of C. Taylor.

From Rabinowicz's "Catalogue Merzbacher," Munich, 1888.

In the British colonies only sporadic works have been published at **Bombay** and **Aden**, where the Yemen Jews have recently been printing a few of their manuscripts in oblong format. The use of Hebrew type in the Australian and African colonies appears to be confined to newspapers. The same applies to the French colonies in North Africa, though various productions have appeared at **Algiers, Tunis,** and **Oran.**

In the **United States** Hebrew printing was even later in appearance. Apart from a reprint at Philadelphia in 1814 of Athias' unpointed Bible, and Leeser's reprint of the Van der Hooght Bible in 1849, the first Hebrew book printed in America was "Abne Yehoshua'," by Joshua Falk, at **New York** in 1860. The chief production of the Hebrew press of the United States hitherto has been the commentary on Job by B. Szold, printed by I. Friedenwald at **Baltimore**; but since the emigration from Russia and Rumania large numbers of occasional works have been produced at New York, **Philadelphia,** and **Chicago.** In the first-named city the productions of the press of A. H. Rosenberg are voluminous.

A great deal of very good Hebrew printing, however, is done by non-Jewish printers, and often at university presses, where the Christian theologians who devote their attention to rabbinics print their

FROM SCHECHTER'S "MIDRASH HA-GADOL," VIENNA, 1902.

lucubrations. In addition, presses that make a special business of Oriental printing, like those of Drugulin of Leipsic and Brill of Leyden, also produce Hebrew works, the former having printed the well-known Polychrome Bible edited by Professor Haupt and published at Baltimore. By a special process the various sources of the Biblical books in this edition are distinguished by different colors, not of the type, but of the paper upon which the sections are printed. The various Bible societies have also produced some fine specimens of Hebrew printing, the chief being the so-called Letteris Bible, having the Authorized Version at the side, printed at Vienna; and the Ginsburg Bible, printed by the court printer Karl Fromme in Vienna. The Masorah, also edited by Ginsburg, is another fine piece of Hebrew printing by Fromme; while one of the best Hebrew prints is the fifth edition of the translation into Hebrew of the New Testament, by Franz Delitzsch, printed by Trowitsch & Co. of Berlin.

The following is a list (extending from the introduction of printing to the present day) of towns at which Hebrew presses are known to have existed; those places in which only Christian printers have been concerned, mainly in issuing Biblical editions, are set in italics. As far as possible, dates have been given for the first publication of Hebrew at the different localities. Where this was effected by Christian printers the date is marked with an asterisk. The letters "J. E." within parentheses following the names of towns indicate that special articles are given in THE JEWISH ENCYCLOPEDIA upon the typography of such towns. In a number of instances special monographs have been written upon the typography of various places, and these are cited together with their references. The remaining towns are mentioned by Steinschneider in his "Jüdische Typographie," in Ersch and Gruber, "Encyc." (section ii., part 28, pp. 21-94), or by Zedner and Harkavy. In a few instances the entries from Zedner may refer to publication rather than to printing.

II. Characteristics: There are in all four chief forms in which Hebrew letters are printed: the square; the Rashi; the Weiberteutsch, so called because it was used for the "Ẓe'enah u-Re'enah" read by women; and finally the cursive, imitating the handwriting used for business and other correspondence. The first three appeared as early as the beginning of Hebrew typography (see INCUNABULA); the fourth, only in the eighteenth century, mainly in books on business training, writing-books in this character being produced at Amsterdam in 1715.

Form of Letters.

One of the characteristics of Hebrew printing from its beginning was the different sizes in which the characters were printed, the Ṭur of Piove di Sacco, 1475, already showing three forms. This is attributed to the commentatorial character of rabbinic literature, the commentary naturally being printed in a smaller type than the text, and the supercommentary in a still smaller one, and the index to both in a yet more minute type. Such a difference of types soon led to the arrangement by which the text was printed in the center, with the commentaries in concentric arrangement around it. This plan has been employed with increasing elaboration; and in the last rabbinic Bible printed by the firm of Schriftgiesser at Warsaw no less than thirty-two commentaries are included, many of which are on a single page. In the beginning this arrangement simply followed that of the ordinary medieval manuscripts in which commentaries occurred. To fill spaces that would otherwise remain empty recourse was had to the use of letters of greater width, the so-called "littere dilatibiles"; but in early prints the first letter of the following word was often inserted instead. Sheet-marks and pagination were only gradually introduced; they were almost invariably in Hebrew letters printed on the recto only; each second page was numbered, the reference to the two sides (pages) of the sheet being by alef, bet, nowadays represented by a, b; *e.g.*, B. Ḳ. 10b; R. H. 17a (Isaiah Berlin tried to introduce the full point and colon, but without much success). The pagination of the Talmud was established by Bomberg, the arrangement of whose pages has been followed in all subsequent editions. Vowel-points and accents occur for the most part only in Bibles and prayer-books, and divisions of chapter and verse in the Bible only rarely till later times.

Paper and Format.

The paper of the early prints is generally good; that of the eighteenth century usually the opposite; the issues of Fürth, Cracow, and Rödelheim are generally distinguished by their foxy paper. White paper was generally used, but the Oppenheimer collection contained fifty-seven volumes on blue, seven on green, two on yellow, and a Haggadah on red paper. Rubrics are printed in red in a work issued at Freiburg in 1584. Amsterdam printers sometimes print red on white; Deinard at Newark on varicolored paper. Large-paper editions occur rather frequently, and parchment was used for special copies, the Oppenheimer collection having fifty-one of these, and many of the copies of the Bologna Tefillah of 1537 being printed on that material, though one on excellent paper is to be found in the Sulzberger collection at New York. All kinds of format occur from the earliest times, but the folio and quarto were chiefly used, the octavo and duodecimo being employed mainly in prayer-books. In the Oppenheimer collection the proportions of the various sizes were as follows:

Folio	1,005	Octavo	901
Quarto	1,240	Duodecimo	330

Strange to say, one of the most bulky of Hebrew books was also one of the earliest, Avicenna's "Canon," with 826 folio pages; this, however, is now far exceeded by the Babli with its 2,947 pages in one volume (Berdychev, 1894).

The Leghorn prints were at times in oblong form, while the recent Aden productions are of the same form, but with the longer side at the back. For variations of the Title-Pages see Jew. Encyc. xii. 154, and for ornamentations see the article Printers' Marks. To those mentioned in the latter article the following may be added: Ashkenazi (Safed, 1587), lion with two tails; Bat-Sheba (Salonica), half lion, half eagle; Mayer ben Jacob (Venice), elephant; Conti (Cremona), shield, angel, eagle; Abraham b. David (Talmud Torah, Salonica, 1719), three crowns; Koelner (Frankfort-on-the-Main), imperial eagle; De Lannoy (Offenbach), nest of bird with flowers; Aaron Lipman (Sulzbach), tree, crab, fish, and serpent; Shabbethai Bass (Dyhernfurth), two bars of music.

מָלַךְ אֲחַזְיָהוּ בֶן־יְהוֹרָם מֶלֶךְ יְהוּדָה׃ בֶּן־עֶשְׂרִים וּשְׁתַּיִם
שָׁנָה אֲחַזְיָהוּ בְמָלְכוֹ וְשָׁנָה אַחַת מָלַךְ בִּירוּשָׁלָםִ וְשֵׁם
אִמּוֹ עֲתַלְיָהוּ בַּת־עָמְרִי מֶלֶךְ יִשְׂרָאֵל׃ וַיֵּלֶךְ בְּדֶרֶךְ בֵּית
אַחְאָב וַיַּעַשׂ הָרַע בְּעֵינֵי יְהוָה כְּבֵית אַחְאָב כִּי חֲתַן
בֵּית־אַחְאָב הוּא׃ וַיֵּלֶךְ אֶת־יוֹרָם בֶּן־אַחְאָב לַמִּלְחָמָה
עִם־חֲזָאֵל מֶלֶךְ־אֲרָם בְּרָמֹת גִּלְעָד וַיַּכּוּ אֲרַמִּים אֶת־יוֹרָם׃
וַיָּשָׁב יוֹרָם הַמֶּלֶךְ לְהִתְרַפֵּא בְיִזְרְעֶאל מִן־הַמַּכִּים אֲשֶׁר
יַכֻּהוּ אֲרַמִּים בָּרָמָה בְּהִלָּחֲמוֹ אֶת־חֲזָהאֵל מֶלֶךְ אֲרָם

From the Letteris Bible, Vienna, 1892.

The idea of representing the title-page of a book as a door with portals appears to have attracted Jewish as well as other printers. The fashion appears to have been started at Venice about 1521, whence it spread to Constantinople. Bomberg used two pillars in his "Miklol" of 1545, and this was imitated at Cracow and Lublin. These pillars are often supported by, or support, figures, draped or undraped, as in the "Toẓe'ot Ḥayyim" of Cracow (c. 1593). A Maḥzor of Cracow (1619) has a flying angel of death, while the Pirḳe R. Eliezer of Constantinople (1640) has a centaur and siren. The tree with the shield of David supported by two lions appears first in the Sabbionetta prints, and is imitated by other symbolic figures, as the eagle in the Amsterdam Seliḥot of 1677. These decorations of the title-page led later to illustrations within the work itself, the first of these being in the "Mashal ha-Ḳadmoni," Soncino, 1491. The "Yosippon" and other works of a historical character were favorite receptacles for rather crude illustrations of this kind, as were also the Passover Haggadot, in which even maps of the Holy Land were printed (see Haggadah).

Colophon and Title-Page.

The place and date of printing, as also the name of the printer, were generally expressed in Colophons, but in later times were also placed on the title-page. The day of the week is often indicated by references to Biblical texts, having in view the lucky character of Tuesday as a beginning day (see Week). The date is also often made known by a text (see Chronogram). The omission of letters in these dates often leads to confusion (Zunz, "Datenbestimmungen," in "G. S." i.); and the place of publication does not always coincide with that of printing. Even the place of printing has sometimes to be checked, as frequently German printers attempted to claim the style and authority of Amsterdam, and those of Fürth passed themselves off as coming from Sulzbach. The place of printing was sometimes omitted in order to evade the censor.

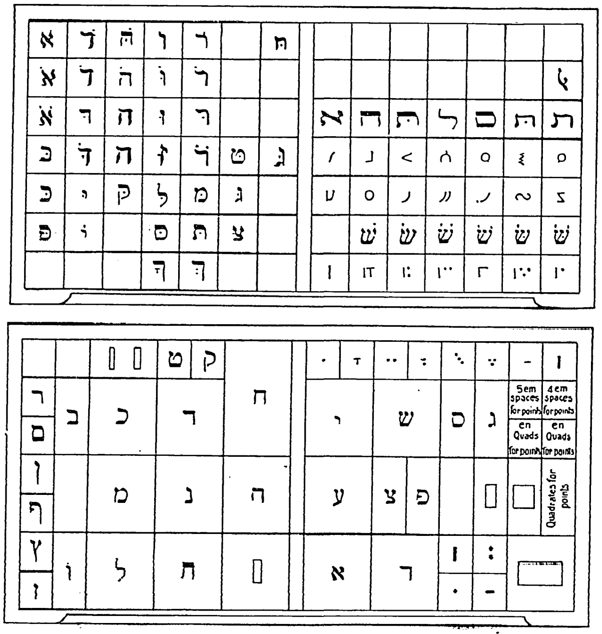
Information is often given in these colophons as to the size of the office and the number of persons engaged therein and the character of their work. In the larger offices there would be a **master printer** ("ba'al madpis"), who was sometimes identical with the **proprietor** of the office ("ba'al ha-defus"). The actual **printer** was called "madpis," or sometimes "meḥoḳeḳ." The master printer was occasionally assisted by a **manager** or factor ("miẓib 'al ha-defus"). Besides these there was a **compositor** ("meẓaref" or "mesadder"), first mentioned in the "Leshon Limmudim" of Constantinople (1542). Many of these compositors were Christians, as in the workshop of Juan di Gara, or at Frankfort-on-the-Main, or sometimes even proselytes to Judaism (see above). Finally, good **proof-readers** or correctors for the press were always indispensable. They were called "maggihim." Notwithstanding their help, a list of errata was often necessary, one of the earliest occurring in a German Maḥzor produced at Salonica in 1563.

Printers.

Up to the nineteenth century all work was naturally hand-work, and printing was comparatively slow. It took nearly a whole year for the Soncinos to print off 638 folio pages, while sixty years later Giustiniani printed 190 pages of Maimonides' letters in seven days.

For the injury done to the correctness of the text by the censors before and even after printing, see Censorship of Hebrew Books. The existence of censors in Italy, Germany, and Poland rendered the works printed previous to 1554 (the date of the Ferrara conference on this subject) of especial value for the text, though care was taken by the Jews themselves before that date not to offend Christian prejudices too much by printing the more outspoken passages. In a measure Jews had their own censorship in the form of Approbations ("haskamot"), without which in the seventeenth and eighteenth centuries no book was considered altogether respectable. These approbations were sometimes accompanied by special privileges, as when the rabbis of Venice issued a decree against any one buying a certain book except from the printer; and the parnasim of Amsterdam had the right of inflicting a fine for the infringement of the copyright of any one whom they favored. In the case of the Frankfort Talmud imperial permission was found necessary to produce it.

Of the cost of printing in early times little is known. The "Yeẓer Ṭob" of Venice (1597–1606) cost a thousand florins to print, while the thirty-six pages of the "Zore la Nefash" (?) of Venice (1619) cost as much as twenty-five ducats. Joseph Witzenhausen got four thalers a sheet for the Judæo-German translation of the Bible published by Athias. In the early days 300 copies of a work were sufficient. This number of the Psalms with Ḳimḥi (1477) was printed; so, too, of the "Yafeḳ Raẓon," while of the "Torat Ḥesed" only 200 came into existence. For the methods adopted in selling books see the article Book-Trade.



Hebrew Upper and Lower Cases.

(From Theodore L. De Vinne's "Modern Methods of Book Composition," New York, 1904.)

Technique of Hebrew Printing.

Turning to the technical side of Hebrew printing, it has to be remarked that in the justification of Hebrew, wide spacing is to be preferred, and that the vowels and accents have to be justified in a separate line after the consonants have been set up. The wide spacing is rendered necessary by the fact that hyphens can not be used in ordinary Hebrew printing, though in modern works this use is creeping in. To fill out spaces, as mentioned above, the extended letters, "alef," "he," "ḥet," "lamed," "mem," and "taw," are used.

In ordinary Hebrew printing "the compositor begins as he does with English, by setting the characters at the left hand of his copy, turning the nicks of his type inward to face the composing-rule. When the line has been spaced and justified . . . it is turned in the stick" (De Vinne, "Modern Methods of Book Composition," p. 245, New York, 1904). The arrangement of cases for Hebrew varies in different offices, but the accompanying illustration shows that generally adopted. The characters and points most used are in the lower case; accents, broad or extended letters, and letters with points are in the upper case.

The difficulty of Hebrew printing for persons not accustomed to the language consists in the great similarity of some of the letters, as "he," "ḥet," and "taw," "dalet" and "resh," "shin" and "sin," and other letters only distinguished by a dot, representing the dagesh. Final "pe" and final "ẓade" also are sometimes confounded, while their hair-lines often tend to break off during presswork. The contrast of the shaded portions of the letters with the hair-lines is perhaps the most marked type-founder's characteristic of Hebrew as compared with Roman type, in which hair-lines are avoided as much as possible. The actual forms of the letters have changed little since the first appearance of matrices in Italy in the fifteenth century. The tendency is rather toward making the letters smaller in size and squarer. Some of the most beautiful type of this kind is that of Filipowski. It is said that compositors unfamiliar with Hebrew tend to set type more accurately, though more slowly, owing to the extra care they devote to following copy. Few ordinary printing establishments have Hebrew type, and on the rare occasions when it is necessary to use it it is customary to borrow it from an establishment with a more varied outfit of types, or to have the type set up in such an establishment, the whole matter cast, and transferred bodily as a single type into the text. Christian printers handle only the square letter, Rashi and cursive always being set up by Jewish typesetters.

Productivity of Hebrew Presses.

With regard to the works which have been turned out by Hebrew printers during the last 450 years, it would be interesting to determine approximately their number and character. During the first quarter of the century in which incunabula were produced (1475–1500) 100 Hebrew works were issued, at the rate of four per annum. During the next forty years (1500–40) about 440 were issued (M. Schwab, in "Les Incunables Orientaux," enumerates 430 up to this period) averaging eleven per annum. During the next two periods from 1540 to 1732 a rough estimate would give the number of works at 6,605; namely, Bibles, 710; Targum, 70; Talmud, 590; ritual, 1,000; anonymous, 350; Judæo-German, 385; and works of specific authors, 3,500—an average of about thirty-three works issued per annum. During the 160 years since the last-mentioned date the production has rapidly increased, but it is difficult to determine the exact numbers. Some indication can be obtained by the gradually increased number of Hebrew works mentioned in the various sources as follows:

Bibliographer.	Date.	Hebrew Books.
1. Shabbethai Bass	1680	2,200
2. Bartolocci	1693	1,943
3. J. C. Wolf	1733	2,832
4. Azulai	1790	3,527
5. Oppenheimer	1826	4,221
6. Steinschneider, "Hebr. Bibl."	1858-82	2,004
7. Steinschneider	1860	5,232
8. Fürst	1863	9,360
9. Zedner	1867	5,220
10. Benjacob (including manuscripts and references)	1880	14,978 really about 6,500
11. Lippe (vols. i. and ii.)	1880-89	1,210
12. Van Straalen	1894	11,100
13. Zeitlin	1895	3,643
14. Lippe (vol. iii., addenda)	1899	878
15. Wiener (to "ṭet")	1904	4,575

Number of Hebrew Works.

Wiener's list promises to run to 17,000. If one may judge from the numbers given by him, and take account of the fact that the average recorded by Steinschneider between 1860 and 1880, about 100 per annum, is at best only a minimum, having been recently largely increased, there can be no doubt that 20,000 volumes have been produced during the last period. This is confirmed by the fact that the Asiatic Museum of St. Petersburg, containing the largest Hebrew collection in the world, has no less than 30,000 volumes, of which 5,000 are written in Judæo-German and Yiddish. The Jerusalem National Library (founded by Chazanowicz) in 1902 had 22,233 volumes, 10,900 of them Hebrew ("Ha-Meliẓ," 1902, No. 259). The British Museum in 1867 had nearly the same number. It would be of interest to compare the classes under which these various works are included, with the relative number of volumes contained in these two collections (see preceding table).

Classes.	Zedner.	Chazanowicz.
1. Bibles	1,260	794
2. Bible Commentaries	510	
3. Talmud	730

22. Fiction	....	510
23. Periodicals, Newspapers, Catalogues	....	648
24. Yiddish	....	900

It would be still more interesting to determine the actual works and editions of them which go to make up the 20,000 or so separate works which have been produced by the Hebrew presses up to the end of the nineteenth century. Unfortunately Hebrew bibliography is not in such a state that this could be done with any approach to accuracy, but a considerable number of subject lists have been made from which a close approximation can be given for the various branches. The sources from which lists are derived vary in thoroughness, mainly according to their date. Information from Reland, or the old Oppenheim catalogue of 1826, naturally does not vie with points ascertained from Steinschneider or S. Wiener, but such as it is, the following list will serve both as an indication of the topics treated of in Hebrew literature and as a guide to the sources in which the fullest account at present known is given. Occasionally the lists include sections of works which should not strictly be counted, as this leads to duplication, and besides some of the entries include also manuscripts. On the other hand, these items probably do not more than compensate for the omissions in the older lists. In some few instances no actual enumeration is accessible, and in these cases the number given by the Chazanowicz collection has been repeated as being the closest approximation that can now be offered. Altogether about 15,380 works are thus accounted for out of the 18,000 or 20,000 Hebrew works and editions that have been produced.

TYRE: Principal city of Phenicia. By "the strong city Tyre," mentioned in Josh. xix. 29 and II Sam. xxiv. 7 as marking the frontier of Israel (Asher), is evidently meant not the main city, but an outpost in the mountains protecting the road to it and to the coast (the Septuagint furnishes in Joshua an interesting variant, making that point a "fountain" in place of a "city").

Under King Hiram.

Tyre is first heard of under King Hiram, who furnished to his friends David (II Sam. v. 11) and Solomon (I Kings v. 1), for their building operations, wood from Mount Lebanon and skilled working men ("Sidonians," *ib.* v. 6), for which aid he received not only payment in grain (*ib.* v. 11), but also land concessions in Galilee (*ib.* ix. 11). Solomon's chief architect, Hiram, also, was a Tyrian (*ib.* vii. 13=II Chron. iv. 11). Tyrian ships in Solomon's service sailed even from the ports on the Red Sea (*ib.* ix. 27-28).

Tyre became immensely rich (Zech. ix. 3) by her commerce (Isa. xxiii. 2-3; comp. the elaborate description in Ezek. xxvii.); and the curses of the Prophets refer especially to its flourishing slave-trade (Amos i. 9; Joel iii. 4). Tyrian merchants—if the term "Tyrians" did not include all Phenicians at that period—furnished the timber for Ezra's Temple also (Ezra iii. 7), and "brought fish and all manner of ware" to Jerusalem (Neh. xiii. 16).

Ps. xlv. 2, lxxxiii. 7, and lxxxvii. 4 treat the city as representative of all Phenicia; elsewhere, however, the Tyrians and the Zidonians are identified in a way which seems to indicate that "Zidonians" was the earlier name for the Phenicians (comp. I Kings v. 6; Judges xviii. 7; Isa. xxiii. 2; and the Homeric use). "Ethbaal king of the Zidonians," the father of Jezebel (I Kings xvi. 31), is identical with Ithobalos of Tyre (Josephus, "Ant." viii. 13, § 2), who, however, may have possessed both cities. This earlier usage dates from a time when Zidon was preponderating among the Phenician cities (comp. the reference in Gen. x. 15 to Sidon, the first-born of Canaan; Tyre is not even mentioned in verse 18 of the same chapter).

Zidon always claimed that Tyre was merely a later colony. However, the Egyptian inscriptions of the eighteenth and nineteenth dynasties, which hardly mention Zidon, seem to show that even then Tyre ("Ṣa-ru," "Ṣa-ra") predominated (W. M. Müller, "Asien und Europa," p. 185), although in the El-Amarna tablets (ed. Winckler, Nos. 149-156) King Abimilki of "Ṣurri" seems to have been inferior to his adversary, Zimrida of Ziduna. This predominance of Tyre is shown also in the fact that the greatest Phenician colony, Carthage, claimed to have been founded from Tyre (probably much before the problematic date assumed by the Greeks, *i.e.*, 826 or 814 B.C.). (Isa. xxiii. 1, 6, 10 does not necessarily imply Tyrian colonization of Tarshish, but only flourishing intercourse with that remote country.)

Its Predominance.

Josephus (*l.c.*) gives a list of ten Tyrian kings from 969 (Hiram!) to 774 (for some kings of Ṣurru in later Assyrian time see Delitzsch, "Wo Lag das Paradies?" p. 284). The long siege by the Assyrians, reported by the local historian Menander (in Josephus, *l.c.* ix. 14) to have taken place under Shalmaneser (IV.), is by modern critics considered as a confusion of several Assyrian attacks under Sennacherib, Esarhaddon, and especially Assurbanipal (see Winckler, "Altorientalische Forschungen," 2d ed., ii. 65). Finally, Tyre submitted to Assyria, but kept always her own kings (comp. Jer. xxv. 22, xxvii. 3; Ezek. xxviii. 2), as also under Persian rule. A naval battle against the Egyptian king Apries (Herodotus, ii. 161) seems to indicate that this independence sought to maintain itself against the two rivals Egypt and Babylonia, but Nebuchadnezzar (comp. Ezek. xxvi. 7) obtained, after a siege of thirteen years, a certain submission in 574 B.C. Alexander the Great (332) first stormed the island-city after building a large dam across the shallow strait; and he sold 30,000 inhabitants as slaves.

Stormed by Alexander the Great.

Nevertheless, the city soon regained great importance. It enjoyed a certain liberty until Augustus, and under the Romans was the most populous of the Phenician cities (frequently mentioned in the New Testament). During the Crusades it was important owing both to its unusually strong fortifications and to its factories of glass, sugar, etc. The Christians under Baldwin II. took it in 1124 and held it to 1291 (Frederick Barbarossa was buried in the cathedral in 1190). The place degenerated afterward into a miserable village, especially after the Shi'itic sect of the Matawilah had taken possession of it; now Ṣûr has from 5,000 to 6,000 inhabitants.

The name seems to have meant "rock"; the Greek form "Tyros" suggests to some Semitists the preservation of the earlier "ẓ" for "ṣ." The earlier Latin form was "Sar(r)a." Now a peninsula by the accretion of sand to Alexander's dam, the city was originally an island (Ezek. xxvii. 3, 4) of limited space (how much of its former area has now been submersed by the sea is a subject of dispute),

Its Temple.

so that the large population was crowded together in very high houses. Nevertheless it contained a large and magnificent temple of Melkart (comp. II Macc. iv. 18 on games held every fifth year in honor of Hercules). The local female divinity was Astarte. On the mainland was a considerable city, Palætyrus, which seems to have had the earlier name "Usû" (so El-Amarna tablets; comp. "Oṭu" in the hieroglyphics, Assyrian, "Ušu"; Talmudic, "Usha," which, however, may be another city); from this place, before the Roman time, Tyre was provided with water. The island had two harbors: one to the north; the other, now sanded, to the south. Strabo (xvi. 223) reports that the purple-factories filled the island with an unpleasant smell from the crushed shells of which the purple was made.

TYRIA or **TIREH**: City of Asia Minor, sixty miles from Smyrna. Its Jewish community is of ancient date, the earliest members having arrived at Tyria before the Spanish expulsion; but catastrophes have reduced the Jewish population to insignificant proportions. Since 1825 the laws of the community have been modeled on those of Smyrna; and from the same year until 1882 the community obtained its revenue by means of assessments, although its income is now derived from the salt-tax, poll-tax, gifts, and rents. Most of the Jews of Tyria, who came originally from Constantinople, Brusa, Salonica, and Smyrna, and who speak Turkish, Greek, and Judæo-Spanish, live in a narrow ghetto, while some of them have their residences among adherents of other creeds. The community possesses three synagogues, the latest of which was erected in 1887; and there are a number of benevolent societies, including one for the burial of the poor. The cemetery contains a number of ancient gravestones, one of the oldest being that of Jehiel Caro, who died in 1488. The Talmud Torah at Tyria was converted in 1895 into a school controlled by the Alliance Israélite Universelle.

The list of the chief rabbis of the city includes Ḥayyim Benveniste (author of the "Keneset ha-Gedolah" and later rabbi at Smyrna), Benjamin Lapapa (whose wife died in 1694), Ḥayyim Danon, David Garguir, Ḥayyim Isaac Jaffe, Isaac Aria, Moses Capeluto, Abraham Sasson, Moses bar Siman Ṭob, Ḥayyim Beja, and the present (1905) rabbi, Nissim Joseph Lahana. It is noteworthy, however, that in the series of "hashkabot" recited on the eve of Yom Kippur for the repose of the souls of rabbis the name of Rabbi Lapapa is preceded by the names of Mattathias ben Rey, Joseph Galante, Issachar Abulafia, Solomon Mutevili, and Israel Obadiah, the last-named being followed by Abraham Sasson, although no fixed order and no definite dates are assigned them. The rabbi and physician Moses Abbas and Rabbi Elisha Gallico, both of them predecessors of the rabbis mentioned above, are also noteworthy.

The Jews of Tyria number about 1,600 in a total population of 20,000. In commerce and in industry they have displayed much activity, exporting raisins, cereals, silk, and cotton, and importing merchandise from Europe, while nearly every trade numbers Jews among its craftsmen. The government service likewise is open to Jews. Ḥayyim Jeremiah Danon, who built a Talmud Torah in 1837 and an asylum for the poor in the following year, held a governmental appointment as cashier from 1828 to 1845; while Behor Danon was municipal physician from 1895 to 1904. Formerly the government tithes were collected by Jews.

D. A. GA.

TYRNAU or **TERNAVA** (Hungarian, **Nagy-Szombath**): Manufacturing town of western Hungary. It was the scene of two martyrdoms of Jews: the first, in 1494, when fourteen men and two women gave up their innocent lives, as a manuscript dirge of the Cracow community recounts; the second, when the revenge and hatred of the citizens of Tyrnau were aroused against the Jews at the time that the inroads of the Turks terrified Hungary. The burning of the Jews at PÖSING in 1529 was followed by similar acts in the communities near Tyrnau. Still, the latter city did not succeed until ten years later in getting rid of the Jews within its limits. In 1536 a three-year-old boy of Tyrnau was found dead, whereupon the citizens, who were intriguing against the Jews, accused them of having murdered the child. King Ferdinand I. tried in vain to pacify the angry citizens: the Jews that were suspected were executed; and on the request of the city authorities Ferdinand banished (Feb. 19, 1539) forever the remaining ones (this decree was confirmed by Leopold I. in 1686). Jews were strictly forbidden to set foot within the city or the territory belonging to it; and those who even unwittingly violated the order were severely punished.

In 1717, when a subject of Count Kaunitz was punished, the count, wishing to put an end once for all to these proceedings of the city, did his utmost to secure the annulment of the charter of Ferdinand I.; but he succeeded only so far as to bring about the execution of an agreement between the city of Tyrnau and the Jews, the latter being represented by Simeon Michel, an ancestor of the German poet Heinrich Heine. Under this agreement the Jews renounced all claims that might be brought either by themselves or by their landlords against the city on account of their former imprisonment, while the city promised to allow Jews to pass through Tyrnau on payment of a certain toll. Though the agreement was supposed to be made for all time, Maria Theresa annulled it, and the Jews were again excluded from Tyrnau.

King Joseph II. allowed them to settle in the city (March 31, 1783); and from that time the once famous Jewish community of Tyrnau again began to flourish. See ISAAC TYRNAU.

S. A. BÜ.

TYROL: Crownland of Austria. The earliest documents referring to its Jews date from the beginning of the fourteenth century. The statement, found in the "Privilegium Ecclesiæ S. Stephani" in Rendena (Hormayr, "Gesch. Tirols," 1808, document 231), according to which Charlemagne overcame certain Jewish owners of castles in 800, can not be credited. In the fourteenth century Jews settled at Bozen, Meran, Riva, Rovereto, and in the episcopal cities of Brixen and Trent, as merchants, money-lenders, and mint- and tax-farmers. Isaac, "Judeus de Luncz (Lienz)" is mentioned (Aug. 16, 1308) as farmer of the mint at Meran. In 1318 the Jew Nikolaus of Bozen received in fief from King Heinrich of Carinthia a house and garden in that city. According to the accounts of the monk Goswin and others, the Jews of Tyrol were bitterly persecuted in the fourteenth century at the time of the Black Death, when they were accused of poisoning the wells.

There were no general statutes for the Jews of Tyrol; but to individuals a number of grants of privileges were made, many being quite important; noteworthy among them was the liberal decree, containing twenty-seven clauses, issued at Martinmas, 1403, by Bishop Ulrich III. of Brixen, in favor of the Jews Isaac, son of Gansmann, and his brother-in-law Samuel. Still more liberal was the decree, granted May 1, 1431, by Duke Frederick With the Empty Pocket, to the Jews Mendlein, Simeon, and Rubein. Frederick's son Sigmund had the Jew Seligman in his employ as surgeon. Sigmund's reign was marked by the imposition of the first Jews' tax in Tyrol and by the notorious trial for ritual murder on account of Simon of Trent. A similar occurrence is connected with the names of Anderle of Rinn near Innsbruck, and of Ursula of Lienz.

In 1475, while the events at Trent were still fresh in memory, twenty-one peasants of Lienz testified that on Good Friday, 1442, Ursula, the four-year-old daughter of Thomas Pöck of Lienz, had been murdered for ritual purposes by the few Jews of that city; and in consequence of this testimony the alleged murderers, two Jews, two Jewesses, and their accomplice, a Christian woman, were executed after a short trial and excruciating tortures. On Jan. 22, 1520, the Landtag issued a decree expelling all Jews from Tyrol. Soon after, however, Jews were again living at Bozen, Riva, and Nori; but they were forbidden to peddle, and were required to wear a badge and to pay a personal tax. This tax was reduced in 1573, on the complaint of one Abraham, spokesman for the Jews of Tyrol. Jews first settled at Innsbruck in 1578.

In the seventeenth century important privileges were granted to several Jews of Tyrol, especially to the descendants of Solomon of Bassano. In consequence of the attempt of Maria Theresa to expel all Jews from Tyrol in 1748, their numbers decreased so rapidly that by the end of the eighteenth century only eight Jewish families, tolerated under Joseph II., were living at Innsbruck and Bozen. While Tyrol was under Bavarian rule (1806–14) the edict issued by the king in 1813 granted to the Jews an assured legal status. The ancient rights of the Jews of Tyrol were confirmed by Austria in 1817, when Tyrol was again taken by that country, though the laws prohibiting the acquisition of real estate and the holding of public offices, as well as those against new settlers, remained in force. Still, there was a Jewish postmaster at Bozen at the end of the eighteenth century; Jews acted as purveyors to the Austrian army in the Napoleonic wars; and they took an especially prominent part in supporting the revolt of Andreas Hofer in Tyrol in 1809.

There is no legally recognized Jewish community in Tyrol, its Jews being subject to the community at Hohenems (Vorarlberg) in virtue of the law of 1890. Several Jews of Hohenems, as Schwarz of Bozen, have achieved distinction in industrial undertakings, notably in the building of railroads, and as brewers and bankers. Jews are now (1905) living in Tyrol only at Innsbruck, Bozen, Meran, and Trent.

U

U-BA LE-ẒIYYON ("And the Redeemer shall come to Zion"; Isa. lix. 20): Opening words of the closing prayer of the daily morning service, before which one should not leave the synagogue (Shulḥan 'Aruk, Oraḥ Ḥayyim, 132). The prayer consists of a series of texts, in which are included the Kedushshah following the lesson, with its Aramaic paraphrase (comp. Soṭah 49a), and two brief, ancient prayers embodying an aspiration for enlightenment through that and other studies. It is always preceded immediately or closely by Ashre (Ps. cxlv.; Ps. xx. intervening on ordinary week-days), and it is repeated in such association before the afternoon prayer on Sabbaths and festivals, and before Ne'ilah on the Day of Atonement.

"U-Ba le-Ẓiyyon" is not chanted at length; the greater portion is read in an undertone after the ḥazzan has intoned the introductory lines. The

chant for these, in the ritual of the Ashkenazim, is founded on the prayer-motive of the Sabbath afternoon service (see Music, Synagogal); but in the tradition of the Sephardim there is employed a special chant, of which a variant is used for Ps. xvi., recited shortly afterward, at the expiration of Sabbath. It is this melody which is here transcribed. In its frequent repetition of a short phrase, and the modification of it to fit the text, it reproduces the chief peculiarity of the worship-music traceable to a Spanish source earlier than 1492.

A. F. L. C.

UÇEDA, SAMUEL BEN ISRAEL DE: Palestinian commentator and preacher; born at Safed in the first quarter of the sixteenth century. His name, Uçeda, originally was derived from the town of that name in the archbishopric of Toledo. He was a pupil of Isaac Luria and Ḥayyim Vital, with whom he studied Cabala, and became rabbi and preacher in Safed and, later, in Constantinople. Samuel was the author of the following works: "Iggeret Shemu'el," commentary and supercommentary on the Book of Ruth (published in 1557; together with the text and the commentary of Rashi, Kuru Chesme, 1597; Amsterdam, 1712; Zolkiev, 1800); "Leḥem Dim'ah," commentary on Lamentations, with the text and the commentary of Rashi (Venice, 1600; Amsterdam, 1710, 1715); "Midrash Shemu'el" (Venice, 1579, 1585, 1597; Cracow, 1594; Frankfort-on-the-Main, 1713). The last-named work was his chief one, and consisted of a detailed commentary on the Pirḳe Abot, with reference to the commentaries (at that time in manuscript) of Jonah Gerondi, Meïr Abulafia, Samuel ben Meïr, Menahem Me'iri, Samuel ibn Sid, Joseph ibn Naḥmias, Baruch ibn Melek, Joseph ibn Susan, Moses Almosnino, and others, most of which have since been printed.

W. B. M. K.

UFHAUSEN, SOLOMON ẒEBI HIRSCH. See Brenz, Samuel Friedrich.

UGOLINO, BLAISIO: Italian polyhistor; born at Venice about 1700. He is stated to have been a Jewish convert, and was certainly well acquainted with Talmudic literature. He is known for the huge collection of treatises on Jewish antiquities, written in Latin, which he brought together in his "Thesaurus Antiquitatum Sacrarum" (34 vols., Venice, 1744–69). In this work he reprinted most of the seventeenth-century treatises on Jewish antiquities by Bochart, Bonfrère, Buxtorf, Carpzov, Cellarius, Clavering, Deyling, Goodwin, Hottinger, Huet, Lowth, Opitz, Pfeiffer, Prideaux, Reland, Rhenferd, Saubertius, Selden, Sigonius, Spencer, Trigland, Van Til, Wagenseil, and Witsius, besides obtaining fresh contributors, and translating much himself from the Midrashim. The subjects treated are as follows: (*a*) Festivals, i. (*b*) General antiquities, ii.–iv. (*c*) Geography, v.–vi. (*d*) Priests and temple, vii.–xiii. (*e*) Midrashim, xiv.–xvii. (*f*) Talmud, xvii.–xx. (*g*) Ritual and synagogue, xxi. (*h*) Sects and proselytes, xxii. (*i*) Gentile deities, xxiii. (*j*) Jewish law, xxiv.–xxvii. (*k*) Numismatics, xxviii. (*l*) Costume, marriage, and medicine, xxix.–xxx. (*m*) Poetry and music, xxxi.–xxxii. (*n*) Death and burial, xxxiii. Biblical, Hebrew, author, and subject indexes are contained in vol. xxxiv.

Ugolino himself translated the treatises Menaḥot and Zebaḥim (vol. xix.); Pesaḥim, Sheḳalim, Yoma, Sukkah, Rosh ha-Shanah, Ta'anit, Megillah, Ḥagigah, Beẓah, Mo'ed Ḳaṭan, Ma'aserot, Ma'aser Sheni, Ḥallah, Orlah, and Bikkurim (vols. xvii.–xviii.); Sifra, Sifre, and Tosefta (vols. xvii.–xix.); besides a part of Maimonides' "Yad" and of Abraham Portaleone's "Shilṭe ha-Gibborim."

T. J.

UJHELY (SATORALJA-UJHELY): City in the county of Zemplin, Hungary. Documents in its archives show that in 1734 Jews were living at Ujhely and that they were allowed to acquire real estate. It is evident that the community was then increasing; for ten years later the Jews possessed a school which in 1829 received a bequest of 260,000 gulden from Martin Raphael Kästenbaum, and which was thenceforth known by his name. The oldest tombstone bears date of 1760, although the ḥebra ḳaddisha, with which was connected a hospital, was not established until 1772, its founder being an itinerant rabbi named Naphtali Hirsch. The first ḥebra-book has a drawing on its title-page representing the last rites.

A synagogue was built at Ujhely in 1790; and when it was demolished in 1887, to be replaced by a new house of worship, it was found to have eight subterranean chambers, which probably served as dungeons. The oldest document of the community is dated 1831, during the rabbinate of Moses Teitelbaum, of whom the story is told that Louis Kossuth, afterward leader of the Hungarian Revolution, when suffering from an infantile sickness, was brought to him, and that the rabbi blessed the child and, referring to the word "ḳosheṭ" in Ps. lx. 6 (A.V. 4), prophesied his future greatness. Teitelbaum died in 1841, and was succeeded by his son Leopold, who, however, soon went to Marmaros-Sziget. Jeremiah Löw was then appointed rabbi of Ujhely. Löw, who was one of the leaders of the Orthodox party, was succeeded by the present chief rabbi, Koloman Weisz, and the preacher Isidor Goldberger. Michael Heilprin, who acted as secretary to Minister Szemere in 1848, was, prior to the Revolution, a teacher in the Jewish school of Ujhely.

The Jews of the city now (1905) number 4,500 in a total population of 13,000.

'UḲBA, MAR: Exilarch at Bagdad in the first half of the tenth century; the second exilarch to die in banishment. When Kohen Ẓedeḳ II. was appointed gaon of Pumbedita he became involved in a controversy with Mar 'Uḳba over the revenues from Khorasan; and the calif Al-Muḳtadir (908–932) was induced by Ẓedeḳ's friends to depose Mar 'Uḳba. Soon afterward (917) the latter left Bagdad for Karmisin (Kermanshah), but when the young calif went for the summer to his palace at Safran, Mar 'Uḳba devised a scheme to win the royal favor by meeting Al-Muḳtadir's secretary daily in his gardens and greeting him with the recitation of beautiful verses. These pleased the calif's secretary so much that he wrote them down and showed them to his master, who in his turn was so delighted that he sent for Mar 'Uḳba, entered into conversation with him, and asked him to express a wish, whereupon the gaon requested that he might be reinstated. The calif granted this wish, and Mar 'Uḳba soon returned to Bagdad as exilarch. Kohen Ẓedeḳ and his friends, however, again succeeded in securing his deposition and banishment from the country, whereupon he went to Africa, and was received with high honors at Kairwan as a descendant of the royal house. A sort of throne ("bimah") was built for him in the synagogue, near the Ark of the Law, and he was always the third to read the "parashah," the scroll of the Law being brought to him in his seat.

'UḲẒIN ("Stalks of Plants"): Name of a treatise of the Mishnah and the Tosefta, dealing chiefly with the conveyance of ritual impurity by means of the roots, stalks, and hulls of plants. In the Mishnah it is the twelfth and last treatise of the order Tohorot; and it is also the last of the whole Mishnah. Maimonides says: "This treatise has been placed at the end because the impurity of stalks is not explained in the Bible, and depends solely on the judgment of the Rabbis." It is divided into three chapters, containing twenty-seven paragraphs in all. Its contents may be summarized as follows:

Ch. i.: Difference between roots, stalks, and hulls in regard to impurity; wet roots become unclean sooner than dry ones (§§ 1–2); size of unclean stalks; certain roots that convey no impurity (§§ 3–4); stalks that have been cut from the fruit are clean; a stalk of figs (fresh or dried), or any pods, carobs, gourds, or other portion of a plant, conveys impurity if when taken together with the body of the plant it is as large as an egg (§§ 5–6).

Ch. ii.: Olives preserved with their leaves in liquor receive no impurity; kernels of fruit receive impurity (§§ 1–2); pomegranates and melons that have been partly crushed so that the remnant is smaller than an egg can not become unclean; all husks receive impurity. Rabbi Judah says: "An onion has three skins; the outermost never receives impurity; the innermost always receives impurity; the middle one receives impurity when whole, but not when honeycombed" (§§ 3-4). What parts of garments and plants convey impurity (§§ 5-8); plants growing in the earth can not be unclean; laws relating to plants growing in vases (§§ 9-10).

Ch. iii.: Certain objects can become unclean only after they have once been wet (§§ 1-3); under what conditions dills, spices, pepper, unripe fruit, fish, milk, and honeycombs receive impurity (§§ 4-11). The Mishnah concludes with the following paragraphs (§ 12) which are later additions: "Rabbi Joshua ben Levi says, 'The Holy One, blessed be He! will cause every righteous man to inherit 310 worlds, as it is said: "To make those that love me inherit substance; and their treasuries I will fill [Prov. viii. 21, Hebr.: numerically the letters in the word יש (= "substance") amount to 310]."' Rabbi Simeon ben Ḥalafta says, 'The Holy One, blessed be He! found no other vessel capable of containing so much blessing for Israel as peace, as it is said: "The Lord will give strength unto his people; the Lord will bless his people with peace [Ps. xxix. 11]."'"

In the Tosefta likewise, 'Uḳẓin is the last treatise. It is divided into three chapters, containing forty-two paragraphs in all. It includes no haggadic sayings. 'Uḳẓin has no Gemara.

ULAM. See TEMPLE IN RABBINICAL LITERATURE.

ULAMO, JACOB DANIEL. See OLMO.

ULIF, GERSHON ASHKENAZI. See ASHKENAZI, GERSHON.

ULLA (עלא; called **Rab 'Ula** in Ket. 65b and Ḳid. 31a): One of the leading halakic amoraim in Palestine during the latter part of the third and in the beginning of the fourth century. In his youth he studied under R. Eleazar II. (Tos. to Ḥul. 34a, *s.v.* "Man Ḥabraya"); and he transmitted nine of his teacher's halakic sayings, seven of which are contained in B. Ḳ. 11, end, one in 'Er. 21b, and one in Ket. 74a. He was greatly respected for his learning; and during his visits to Babylonia he seems to have been invited frequently by the "resh galuta" to deliver halakic lectures (Ket. 65b; Ḳid. 31a; Shab. 157b). He traveled repeatedly to Babylonia; and on one of his journeys he was in danger of assassination by one of his companions, saving his life only by condoning the murder of another (Ned. 22a).

Ulla rendered important decisions regarding the benedictions and the calculation of the new moon, and was accustomed to promulgate his rulings in Babylonia when he went thither (Ber. 38b; R. H. 22b; Pes. 53b, 104b). He was very strict in his interpretation of religious laws (Shab. 147a, 157b); and on one occasion, when he heard R. Huna use an expression which he did not approve, he retorted, "As vinegar to the teeth, and as smoke to the eyes, so are the words of R. Huna," applying to him the first half of Prov. x. 26 (Ḳid. 45b). Only in the presence of R. Naḥman did Ulla hesitate to pronounce his opinions, generally waiting until the former had departed (Giṭ. 11b, 12a); although he frequently sought Naḥman's company (Ket. 53a). Of his contemporaries with whom he engaged in controversies may be mentioned, besides R. Naḥman, R. Abba (B. M. 11a), Abimi bar Papa, Ḥiyya bar Ammi (Ket. 53a), and R. Judah (Ḥul. 68b, 70a); but his personal friend, with whom he associated most frequently, was Rabbah bar bar Ḥana (Tosef., Ḥul. xxxiv. 1).

In addition to the sayings of his teacher Eleazar, Ulla transmitted those of R. Hoshaiah (Ḥul. 76a), Joshua ben Levi (*ib.* 122a), R. Johanan ('Er. 67b), Rab (Shab. 143b), and Simeon ben Laḳish (Ḥag. 8b), while his own sayings were transmitted by R. Aḥa bar Adda (B. M. 117b), Hamnuna (Shab. 10b), Ḥiyya bar Abba (Ḥag. 25b), Ḥiyya bar Ami (Ber. 8a), Raba bar Ḥinena (Men. 30b), R. Ḥisda (Ber. 38b), Judah bar Ammi (M. Ḳ. 5b), and Joshua bar Abba (*ib.* 5b). Raba appears to have been his only son (Shab. 83b).

Ulla died in Babylonia, before his teacher R. Eleazar; but his remains were taken to Palestine for burial (Ket. 111a).

ULLMANN, ALEXANDER DE ERÉNY: Hungarian deputy and political economist; born at Budapest Feb. 18, 1850; died there 1897; son of **Karl Ullmann** (b. 1809; d. 1880), founder of the first Hungarian insurance company, and vice-president of the Bank of Commerce at Pest. Ullmann was educated in Budapest and Vienna (LL.D. 1872), and was admitted to the bar in 1873. On the death of his father the family was elevated to the Hungarian nobility. From 1884 to 1892 Ullmann represented the electoral district of Also-Arpas in the Hungarian Parliament.

In addition to numerous juridical and economic essays in the "Pester Lloyd," "Ellenör," and "Neuzeit," Ullmann wrote the following works: "A Részvényes Kereseti Jogáról" (Budapest, 1877), on the right of stockholders to institute legal proceedings; "A Kényszeregyezség Kérdéséhez" (*ib.* 1879), on compulsory settlements; "Az Ipartörvény Revíziója" (*ib.* 1880), on the revision of the industrial laws; "A Magyar Kereskedelmi és Iparkamarák Reformja" (*ib.* 1882), on the reform of the Hungarian board of trade and commerce; and "Zsidó Felekezeti Ügyek Rendezése" (*ib.* 1888), on the legal regulation of Jewish affairs.

ULLMANN, SHALOM: Hungarian Talmudist; flourished in the beginning of the nineteenth century; officiated as rabbi in Fürth, and later at Boldogasszony (Frankirchen), a small place in the county of Wieselburg. He was the author of "Dibre Rash" (1826), a work containing notes on various Talmudic treatises.

S. A. KE.

ULM: City and district of Württemberg. As in many other German cities, there is in Ulm a legend that Jews lived there before the Christian era;

Thirteenth and Fourteenth Centuries.

but the first historical evidence of a Jewish settlement is a tombstone dated 1243 and erected in memory of Huknah, daughter of R. Solomon ha-Levi. The next oldest record is a declaration, issued by the city council of Ulm in 1274, which terms the Jewish community a privileged "Darleihergenossenschaft" (loan society), fully authorized to dispose of unredeemed pledges. By the aid of a Jew the Bavarians, who in the fourteenth century were at war with Austria, succeeded in reducing the city (April 20, 1316); and eight years later (Nov. 10, 1324) Louis the Bavarian pledged to the counts of Öttingen the state taxes payable by the Jews of Ulm. In like manner Charles IV. pawned the Jewish taxes of Ulm to Albrecht of Rechberg; and the Jews of the city thus found themselves compelled to collect part of their taxes from their coreligionists of Schelklingen and Ehingen. The Jews of the latter place, however, complained of this procedure; and on Aug. 1, 1348, the Jews of Ulm were officially reprimanded. The imperial prefects of Swabia finally took them under their protection on condition that they paid their "Schutzgeld" (protection-money) promptly. The other fees which they gave for protection went to the city treasury of Ulm, and were used to defray the cost of new fortifications.

Accused of Well-Poisoning.

About this time the Jews of Ulm were accused of poisoning the wells, and were persecuted by mobs, while the city council, on being called to account by Count Helfenstein, declared itself powerless to check the rabble. The property of the victims was attached by the city authorities; and on this occasion a letter from the Jewish community of Jerusalem, informing the Jews of Ulm of the crucifixion of Jesus, is said to have been found (Nübling, "Die Judengemeinden des Mittelalters," p. 300, Ulm, 1896). On the career of the "Grossjuden" Jäcklin, who was an important figure in Ulm during the latter half of the fourteenth century, see Jew. Encyc. vii. 19.

The Jews of Ulm suffered much during the warfare between their city and the kingdom of Württemberg; for when Eberhard III., the Mild (1388-1417) ascended the throne of Württemberg he asked the assistance of the empire in enforcing the laws which had been introduced to liquidate the Jewish debt. His request was granted; and Borziwoy of Swynar was appointed prefect. The Jews of Ulm realized that, so far as they were concerned, the intention was to annul their outstanding claims in order to defray the cost of the war and to cover the so-called "Judenbrände" (riots against the Jews) of the Swabian Bund in the county of Württemberg; consequently they either took their promissory notes to places of safety or else openly resisted these demands, and delayed payment. Consequently the proposed liquidation was postponed until Aug. 11, 1392, when Wenceslaus issued an edict containing the following four clauses:

(1) The city of Ulm is granted the privilege of admitting Jews and Jewesses.

(2) One-half of the Jewish taxes is to be paid to the city, and the Opferpfennig is to be paid during the week preceding Christmas.

(3) Jurisdiction in loan proceedings is vested solely in the supreme court of Ulm.

(4) For a period of ten years a large sum of money is to be paid the city by all the citizens of Ulm as well as by the Jews.

Importance in Spiritual Affairs.

There are no records extant showing the size of the Jewish community of Ulm at this period; but the frequency of the family names "Ulma" and "Ullmann" points to a numerous congregation. That it took high rank in spiritual affairs is evidenced by the fact that it possessed a yeshibah, over which R. Simelin presided. In addition to Simelin, there were three other rabbis in Ulm; namely, Seligmann, Lafen, and Gershon. Simelin violated a regulation, issued by the community of Nuremberg, to which he had himself subscribed; and the result was a controversy which involved the entire congregation. Simelin and the leaders of the community finally brought the matter before Jacob Weil for adjudication; and the latter decided that Simelin should make a public retractation of his utterances in three different communities, or suffer the penalty of excommunication.

Nothing further is known of the spiritual life of the Jews of Ulm at this period; but their social condition steadily deteriorated. The following regulations (dated Nov. 24, 1395) from the so-called "Red Book" are extant:

"Red Book" Regulations.

(1) The Jews must weigh on "sworn money-scales" ("Geldwage") everything which they buy or sell.

(2) From Palm Saturday until Easter Wednesday, as well as on Corpus Christi Day, all Jews must remain within the Jewish quarter; transgressions of this ordinance will be punishable with a fine of five pounds heller.

(3) Any discourtesy shown a Jew by a Christian will be punished twice as severely as if shown to another Christian.

(4) A Jew may not lend money on a pledge unless he knows the debtor well.

(5) No Jew may have a Christian servant in his house.

(6) No inhabitants of Ulm other than Jews may engage in pawnbroking.

As a result of a complaint lodged by the goldsmiths' gild the following restrictions were imposed by the city council of Ulm: (1) No Jew may melt gold, silver, or other precious metals without the knowledge of the gild. (2) Jews may neither buy nor sell silver bullion in the city. (3) They are permitted to trade only in pearls, gems, and undamaged wares in gold and silver. On Sept. 30, 1421, the following laws were promulgated: (1) Christians may not be employed by Jews; (2) cattle purchased by Jews in the market, or meat sold by them, may be examined only by Christian butchers, and animals may be slaughtered only in the courtyard of the synagogue; (3) Jews are forbidden to touch provisions while purchasing them in the market.

On May 15, 1422, the Jews of Ulm were prohibited from advancing loans on wool or cotton. In the middle of the fifteenth century they were accused of the ritual murder of a Swiss boy named Ludwig of Bruck at Ravensburg, near Ulm, in 1428. Until the end of this century nothing further is known concerning the Jewish community; but under Maximilian I. the city council complained to the emperor of the residence of Jews in the city, and received from him a so-called "Freiheitsbrief" authorizing their expulsion under the following conditions: (1)

Expulsion in the Fifteenth Century.

Jews Again in Ulm in the Sixteenth Century.

The Jews were to be given the shortest time possible in which to dispose of their movable property. (2) The proceeds of the sale of the synagogue, cemetery, hospital, bath, dwelling-houses, and the like, together with their appurtenances, were to accrue to Wolf of Asch, the prefect of Geislingen. (3) All former privileges were to be annulled. (4) After the date of the expulsion every Jew remaining in the city was to be outlawed. This manifesto was published on Aug. 6, 1499; and after four days the imperial treasury sold to the city of Ulm for 5,000 gulden the real estate belonging to the Jews, the date of the expulsion being set for five months later. No Jews were again admitted to any town in the district of Ulm until 1526, when one was allowed to settle in Albeck, on condition that he charged interest at the rate of 1, and not 2, heller per gulden. In a short time this Jew succeeded in bringing coreligionists to the district, and the council of Ulm again complained to the emperor; whereupon, on July 18, 1541, Charles V. issued a "Freiheitsrecht" from Regensburg, containing the following clause: "This Jew is not permitted to borrow money. If he does so, he is liable to a fine of 10 marks in gold; and the money, together with interest, shall go to the city of Ulm." Further, a debtor was forbidden to waive his rights under the "Freiheitsbrief" in favor of his creditor; this rendered it impossible for the Jews to remain in the city. A second "Freiheitsbrief" was issued by Ferdinand I. (Vienna, March 28, 1561); and throughout the seventeenth century Jews were found in the district of Ulm only during the Diets, as imperial or princely envoys, or when traveling with safe-conducts, although occasionally they sojourned for some time in the city, and even had their own slaughter-houses.

Eighteenth and Nineteenth Centuries.

During the eighteenth century the condition of the Jews improved slightly. On Jan. 19, 1712, the council permitted them to attend the horse-markets on payment of 10 kreutzer per diem; but they were forbidden to peddle leather. In the middle of the eighteenth century, however (May 20, 1750), they received permission to attend all the fairs and to deal in wares of any kind. They were charged 1 gulden a day for the privilege of staying in Ulm; and their safe-conducts cost 3 kreutzer per hour. At the outbreak of the French war several Jews went to Ulm, among them being the army contractors Kaulla of Hechingen, and Gumberz, manager of the Stadttheater in Ulm. When the condition of the Jews in Württemberg was regulated (1827) and civic equality was granted to them, the Diet of Ulm lodged an unavailing protest. Soon afterward the special taxes levied on Jews for protection and the like were repealed.

On Feb. 3, 1845, the Jews of Ulm organized divine services, Simon Einstein of Laupheim being chosen ḥazzan. In 1853 a Jewish cemetery was opened; on Sept. 12, 1873, a new synagogue was dedicated; and in 1888 Solomon Fried of Ratibor was called as rabbi. The Jews of Ulm now (1905) number 730 in a total population of about 43,000. They support four charitable organizations.

ULMANN, ALBERT: American banker and author; born in New York city July 2, 1861; educated in the public schools and at the College of the City of New York. In 1900 he became a member of the New York Stock Exchange firm of J. H. Sulzbacher. He is one of the founders and governors of the Judæans, and has been interested in the history of New York and of the Jews in that city. He has contributed to the "New York Times Saturday Review," to the "Saturday Evening Post," and to other journals, and is the author of: "Frederick Struther's Romance" (New York, 1889); "Chaperoned" (*ib.* 1894); "A Landmark History of New York" (*ib.* 1901); and "New York's Historical Sites, Landmarks, Monuments, and Tablets" (*ib.* 1902).

Bibliography: *The American Jewish Year Book*, 1904-5; *Who's Who in America*, 1903-5; *Who's Who in New York City and State*, 1905.

A. F. T. H.

ULMANN, BENJAMIN: French historical painter; born at Blotzheim, Alsace, May 24, 1829; died at Paris Feb. 24, 1884. He studied at the Ecole des Beaux-Arts under Drölling and Picot, and in 1859 won the Prix de Rome.

Of his paintings may be mentioned: "Sylla at the House of Marius" (1866; now in the Luxembourg Museum); "Patroclus and Amphidamas" (in the art gallery at Mans); "Junius Brutus" (in the museum at Melun); "Remorse"; "The Gitanos of Granada"; "The Bell-Ringers of Nuremberg" and "The Lorelei" (exhibited at the Paris Salon, 1872); "A Defeat"; "The Hour of Wailing"; and "The Deliverer of the Fatherland." At the Paris Salons of 1859 and 1872 Ulmann's exhibits won medals of the second and third class. In 1872 he was decorated with the cross of the Legion of Honor.

S. F. C.

ULMANN, SALOMON: French rabbi; born at Zabern, Alsace, Feb. 25, 1806; died at Paris May 5, 1865. He commenced his rabbinical studies at Strasburg under Moïse Bloch (better known as Rabbi Mosche Utenheim), and was the first pupil enrolled at the initial competitive examination of candidates for the Ecole Centrale Rabbinique, inaugurated in July, 1830. He was also the first in his class at this institution to receive the diploma of chief rabbi. In 1834 he was appointed rabbi of Lauterbourg, Alsace; in 1844 he became chief rabbi of Nancy, in Lorraine; and in 1853 he succeeded Marchand Ennery as chief rabbi of the Central Consistory of the Israelites of France.

Ulmann published a limited number of sermons and pastoral letters, and was the author also of

"Catéchisme, ou Eléments d'Instruction Religieuse et Morale à l'Usage des Jeunes Israélites" (Strasburg, 1845; 3d ed., Paris, 1871), which is considered a classic.

The most important act in Ulmann's rabbinical career was the organization of the Central Conference of the Chief Rabbis of France, over whose deliberations he presided at Paris in May, 1856. In that year Ulmann addressed a "Pastoral Letter to the Faithful of the Jewish Religion," in which he set forth the result of the deliberations of the conference, which were as follows: (1) revision and abbreviation of the piyyuṭim; (2) the introduction of a regular system of preaching; (3) the introduction of the organ into synagogues; (4) the organization of religious instruction; (5) the institution of the rite of confirmation for the Jewish youth of both sexes; (6) a resolution for the transfer of the Ecole Centrale Rabbinique from Metz to Paris.

UNGER, EPHRAIM SOLOMON: German educator and writer; born at Coswig-on-the-Elbe March 8, 1789; died Nov. 1, 1870. He studied philosophy, mathematics, and natural science at the University of Erfurt, and from 1810 to 1816 was privat-docent in mathematics and philosophy at the same institution. In 1820 he founded, together with his brother David, a school for mathematics and modern languages, which fourteen years later was transformed into a real-school. The school board offered him the directorship on condition that he embraced Christianity, but he refused to do so. He retained, however, the position of "Oberlehrer" until 1862, in which year he was pensioned.

Unger was for many years a member of the city council of Erfurt. He was made an honorary citizen; and the King of Prussia conferred upon him the title of professor and decorated him with the Order of the Red Eagle in recognition of his services. Through his efforts the Jewish congregation of Erfurt was incorporated in 1812; and for many years he was its first overseer. Of his works the following may be mentioned: "Handbuch der Mathematischen Analysis," 4 vols. (Gotha, 1824–27); "Abriss der Geschichte der Zahlenlehre von Pythagoras bis Diophant"; and "Die Bedeutung der Zwei Bücher des Apollonius von den Berechnungen für die Geometrische Analysis."

s. W. Sa.

UNGER, JOACHIM JACOB: Austrian rabbi; born at Homona, Hungary, Nov. 25, 1826; studied at the University of Berlin (Ph.D. 1859), and was appointed rabbi of Iglau, Moravia, in 1860. He is the author of several works, of which the following may be mentioned: "Hebräische Philologie und Biblische Exegese," in "Mannheimer-Album," Vienna, 1864; "Bemerkungen über die Phönicischen Opfertafeln von Marseille und Carthago," in "Zeitschrift der Deutschen Morgenländischen Gesellschaft," xxiv.; "Die Judenfrage in Preussen," in "Neuzeit," 1874; "Patriotische Casual-Reden," Iglau, 1881 (2d ed. Prague, 1899); "Dichtungen," *ib.* 1885; "Fest- und Sabbath-Predigten," Prague and Breslau, 1903.

UNGER, JOSEPH: Austrian jurist and statesman; born in Vienna July 2, 1828. Having studied law at the university of his native city, he in 1850 was appointed assistant librarian, and in 1852 privat-docent, at his alma mater. The following year he was called to Prague as assistant professor at the university, and in 1855 to Vienna in a similar capacity. In 1857 he was appointed professor of jurisprudence at the latter institution. In 1867 he was successively elected a member of the Austrian Landtag and of the Reichsrath; but on account of ill health he had to resign in the following year. Appointed in 1869 by the Emperor of Austria a life-member of the House of Lords, he soon became the whip of the Liberal Party. Two years later he became minister (without portfolio) in Prince Auersperg's cabinet, but resigned upon the prime minister's defeat in 1879. In 1881 he was appointed president of the Reichsgericht (Supreme Court of Administration). Unger is a convert to Christianity.

Of Unger's works the following may be mentioned: "Die Ehe in Ihrer Welthistorischen Entwicklung" (Vienna, 1850); "Ueber Wissenschaftliche Behandlung des Oesterreichischen Gemeinen Privatrechtes" (*ib.* 1853); "Der Entwurf eines Bürgerlichen Gesetzbuches für das Königreich Sachsen" (*ib.* 1853); "System des Oesterreichischen Allgemeinen Privatrechts" (Leipsic, 1856–64; vols. i. and ii., 5th ed., 1892; vol. vi., 1894), a standard work on Austrian law, which established Unger's reputation; "Die Rechtliche Natur der Inhaberpapiere" (Vienna, 1857); "Der Revidierte Entwurf eines Bürgerlichen Gesetzbuches für das Königreich Sachsen" (*ib.* 1861); "Zur Lösung der Ungarischen Frage" (*ib.* 1861; written in collaboration with Fischhof, and published anonymously), a work advocating a dual monarchy for Austria and Hungary, its appearance marking Unger's entry upon a political career; "Die Verlassenschaftsabhandlung in Oesterreich" (*ib.* 1865); "Zur Reform der Wiener Universität" (*ib.* 1865); "Die Verträge zu Gunsten Dritter" (Jena, 1869); "Schuldübernahme" (Vienna, 1889); "Handeln auf Eigene Gefahr" (Jena, 1891); and "Handeln auf Fremde Gefahr" (*ib.* 1894).

UNGER, MANASSE: German art critic; born in Coswig-on-the-Elbe March 14, 1802; died at Berlin May 17, 1868. When he was only four years of age his parents moved to Erfurt, where he received his first instruction in the art of sketching, and where he also devoted himself to the study of mathematics and architecture, later passing the state examination for architects in Berlin. In spite of this training, however, he decided to pursue an artist's career. Supported by a government scholarship, he traveled through Italy, visiting Venice (1844), Florence, and Rome (1845), and returning in 1846 to Berlin, where he resided until his death. During the Revolution of 1848 Unger was elected captain of the artists' corps which protected the museums. In 1852 he traveled through France, Belgium, and Holland, in which last-named country he discovered Rubens' "Sacrifice of Abraham."

Unger produced no paintings of importance, only a few portraits painted by him being in existence; but his knowledge of the technique and individuality of many a great painter made it possible for him to restore old paintings and to become an art critic of note. He was the author of "Das Wesen der Malerei," Leipsic, 1851; "Kritische Forschungen im Gebiete der Malerei Alter und Neuer Zeit," Berlin, 1868; and "Künstler und Fürst," an epos, published posthumously, Berlin, 1875. After the death of his parents Unger joined the Protestant Church.

UNICORN: Rendering in the Authorized Version of the Hebrew רים or ראם, following the Septuagint and the Vulgate. Aquila and Saadia, on Job xxxix. 9, read "rhinoceros"; Bochart ("Hierozoicon") and others, "oryx," or "white antelope"; Revised Version, "wild ox" (margin, "ox-antelope"). The allusions to the "re'em" as a wild, untamable animal of great strength and agility, with mighty horns (Job xxxix. 9-12; Ps. xxii. 21, xxix. 6; Num. xxiii. 22, xxiv. 8; Deut. xxxiii. 17; comp. Ps. xcii. 11), best fit the aurochs (*Bos primigenius*). This view is supported by the Assyrian "rimu," which is often used as a metaphor of strength, and is depicted as a powerful, fierce, wild, or mountain bull with large horns. The term evidently denotes from its connection some animal of the bovine or antelope class, perhaps the oryx (so LXX.). The oryx, as well as the wild bull and ox, is common in Palestine and Syria; and aurochs' teeth were found by Tristram on the flooring of an ancient cave in the Lebanon.

The Talmud has for "re'em" אורזילא or ארזילא, which etymologically recalls the Arabic "ghazal" (= "gazel"), but is said to be the name of an animal of such size that it could not enter the ark of Noah, but had to be fastened thereto by its horn (Zeb. 113b: comp. B. B. 74b; Shab. 107b; Yalkuṭ Shim'oni, ii. 97d, where it is said that the re'em touches the clouds). If the Talmud intended the urzila for the unicorn, it can not be identical with the one-horned ox which Adam is said to have offered as sacrifice (Ḥul. 60a and parallels), because the urzila is classed among the animals of the field that may not be offered for that purpose. The Tosefta on the passage in Zebaḥim explains the urzila as the buffalo.

Again, in Ḥul. 59b is mentioned an animal called קרש (perhaps shortened from "monoceros" or "rhinoceros"), which, "though it has only one horn, is allowed as food," and is then explained as the "hart of the forest 'Ilai" (טביא דבי עלאי; comp. B. B. 16b). The Talmud apparently thinks here of the antelope oryx, the mode of depicting which on Persian monuments gave rise to the belief by the ancients (comp. Pliny, "Historia Naturalis," viii. 21, 30) in the existence of the unicorn (comp. "S. B. O.T.," Psalms [Eng. transl.], p. 173). In Arabic likewise "re'em" is applied to the leucoryx. The aurochs is mentioned in the Talmud under the name שור הבר (= "ox of the plain"), in explanation of תורבלא, the rendering of תאו (Deut. xiv. 5) by the Targum, which Rashi (Ḥul. 80a) explains as the "ox of the Lebanon." It is classed among cattle (Kil. viii. 6), and is caught with slings (B. Ḳ. 117a; comp. Isa. li. 20).

UNION OF AMERICAN HEBREW CONGREGATIONS, THE: Association of American Jewish congregations composed chiefly of the Reform element, and established largely through the persistent efforts, extending for a period of over twenty years, of Isaac M. WISE. The initiative was taken by Moritz Loth, president of Wise's congregation in Cincinnati, who, in his annual message of Oct. 10, 1872, recommended the appointment of a committee to act with committees from other local congregations for the purpose of calling a convention for organization. The five Cincinnati congregations joined in a call, issued on March 30, 1873, in pursuance of which delegates from thirty-four congregations met in that city on July 8, 1873. "The Union of American Hebrew Congregations" was the official title adopted; and under that name the organization was subsequently incorporated pursuant to the laws of Ohio.

The objects of the organization are set forth in section 2 of the constitution:

> A.—To establish and maintain institutions for instruction in the higher branches of Hebrew literature and Jewish theology, with the necessary preparatory schools in such cities of those States as may hereafter be designated.
>
> B.—To provide means for the relief of Jews from political oppression and unjust discrimination, and for rendering them aid for their intellectual elevation.
>
> C.—To promote religious instruction and encourage the study of the Scriptures and of the tenets and history of Judaism.
>
> All this, however, without interfering in any manner whatsoever with the worship, the schools, or any other of the congregational institutions.

Under provision (A) the Hebrew Union College was called into existence by the first council, which met in Cleveland in July, 1874 (see HEBREW UNION COLLEGE). Under (B) a Board of Delegates on Civil Rights has been created with its seat in Washington, D. C., Simon Wolf being its chairman. The objects provided for by (C) have been entrusted to a Board of Managers on Synagogue and (Sabbath) School Extension, which body has charge of the work formerly carried on by the Hebrew Sabbath-School Union of America, which went out of existence in Jan., 1905.

The presidents of the union have been Moritz Loth (1873-89); Julius Freiberg (1889-1903); and Samuel Woolner (since 1903); and Lipman Levy has been secretary from the beginning. The legislative body of the union, and its highest authority, is a council which meets biennially, the members of which are elected by the constituent congregations. In electing these representatives there is no restriction as to sex. During the intervals between the meetings of the council the union is governed by an executive board of thirty members elected by the council. This executive board in turn elects the Board of Governors of the Hebrew Union College, the Board of Delegates on Civil Rights, and the Board of Managers on Synagogue and (Sabbath) School Extension. At present (1905) the union is composed of 128 congregations with an aggregate contributing membership of 14,000.

UNION ISRAÉLITE. See Periodicals.

UNION OF JEWISH LITERARY SOCIETIES: An association of societies founded in 1902 in London, England, for the diffusion of Jewish literature, history, and sociology, and for the coordination of the work of Jewish literary societies. The organization grew out of a conference of Jewish literary societies convened by the North London Jewish Literary and Social Union, chief among whose objects was the study of Jewish literature, history, and sociology. Its first president was Israel Abrahams.

The union has constituent societies in many districts of the British empire. Each reserves its complete local independence, and is in no way controlled by the central organization. The union, however, renders assistance to the constituent societies in many ways. It has published a directory of Anglo-Jewish lecturers, with a supplementary list of Jewish litterateurs resident abroad who have placed papers prepared by them at its disposal. It also provides literary material and guidance for members of the constituent societies desirous of preparing lectures, and it has arranged a number of illustrated lectures for their use.

An important feature of the work of the union is its publications. In addition to a number of pamphlets, it issues yearly, in time for the annual conference of constituent societies held in the month of June, the "Jewish Literary Annual," which, besides supplying a record of the work of the union and its constituent societies during the previous year, contains the installation address of the retiring president and a selection of the papers read before the constituent societies during the preceding twelve months. Another feature is a bibliography of books, essays, etc., of Jewish interest published in English during the year.

The union has been instrumental in introducing the Jewish Chautauqua movement into England. It has also arranged with considerable success summer gatherings at English seaside resorts.

UNITARIANISM: A denomination of the Christian Church which rejects the doctrine of the Trinity. One of the Protestant sects that developed out of the Reformation, it is found under various names, first in Poland in the second half of the sixteenth century, and a little later in Transylvania, where it still flourishes, although its modern center of gravity is England and the other English-speaking countries, notably the United States. Exclusion from Protestant synods crystallized the Unitarians into a separate church in 1565. Among its prominent exponents may be mentioned the elder and the younger Socinus, who formulated its first theology; Francis David, its first martyr; and Joseph Priestley, the English discoverer of oxygen. It also claims Milton, Locke, and Newton, and it owes much to James Martineau, who rationalized the crudities of Priestley's theology, while Emerson gave it its transcendental touch and the writings of Channing and Theodore Parker furthered its propaganda.

From its inception this sect has been divided into conservative and radical wings. In the former school the divinity of Jesus is rejected, but the miracles ascribed to him are accepted, and some regard him as preexistent and superangelic. Socinus insisted on his worship. In the new, or radical, wing of Unitarianism, Jesus is still sublimated above all humanity, while the cross, the symbol of the whole of Christianity, is accepted metaphorically as expressed in poetry and hymnal. The Lord's Supper is observed as a commemoration, thus uniting Unitarianism with the whole Church. For about fifteen centuries, accordingly, Unitarianism has been historically linked with Christianity, from which it has never entirely broken away. The Apostles, the Church Fathers, and the Holy Roman Empire are its remote progenitors. More specifically, its progressive steps may be traced from the Arian movement through Calvinism, Socinianism, Arminianism, Presbyterianism, and Congregationalism, the Hicksite Quakers and the Universalists occupying parallel places. Unitarianism has, therefore, been a development out of Trinitarianism. Gradually the Holy Ghost was rarefied into an "influence," and the Son of God was explained away as a figure of speech. The preponderating influence of the parent faith, however, still abides, and the Unitarians do not look upon the character of Jesus in the cold light of history.

UNITED STATES: A federal republic of North America. The history and condition of the Jews in this territory—apart from Russia and Austria the largest concourse of Israelites under one government in the world—is treated, for convenience, under the following rubrics:

1. Successive Waves of Immigration.
2. Separate Cities and States (in order of settlement or population)—New York, Newport, New England, Maryland, Pennsylvania, Georgia, South Carolina, North Carolina, Virginia, West Virginia, Louisiana, Kentucky, Tennessee, Alabama, Mississippi, Florida, Texas, Michigan, Wisconsin, Ohio, Illinois, Missouri, Kansas, Nebraska, Iowa, California, Oregon, Utah, Colorado, Montana, Washington, Idaho, North Dakota, and South Dakota.
3. Jews in Their Relation to the Federal Government.
4. Education.
5. Philanthropy.
6. Religious Development.
7. Military, Naval, and State Service.

8. Civil and Political Rights.
9. Science, Art, Literature, and the Learned Professions.
10. Commerce and Industry.
11. Social Condition.
12. Russian Immigration.
13. Statistics—Growth, Distribution, List of States and Cities with Population 1877 and 1905, Nationalities of Immigrants, Occupations, Clothing Trade, Social Condition, Charity, Destitutes, Defectives and Delinquents, Synagogues, Institutions, Lodges, Periodicals, Distinguished Persons, Biostatics, Anthropology.

1. Successive Waves of Immigration: Persecution is the principal factor affecting Jewish immigration to the United States. The adventurous pioneer, seeking new lands from the desire to conquer obstacles and live a life untrammeled by the conventions of society, is less frequently found among the leaders of Jewish settlement in this country than the hardened victim of persecution—broken in almost everything but spirit and energy—in search of the opportunity merely to live in unmolested exercise of his faith. The effects of the events of European history upon American development might be written almost entirely from the annals of Jewish immigration. The first explorers and settlers of America came from Spain and Portugal; and Jews naturally followed in their wake when the Inquisition made further residence in those countries an impossibility. Naturally, also, following the lines of least resistance, the Jews went to those places where the languages were spoken with which they were familiar. Therefore the first traces of Jews are found in South and Central America and Mexico, whence they spread to the West Indies; and the changes in the map of Europe which are reflected in America during the seventeenth and eighteenth centuries caused the first settlements in the territory which is now the United States.

First Settlers from Spain and Portugal.

The tolerance of Holland (practically the only Jewish refuge in Europe in the sixteenth and seventeenth centuries) was extended to her dominions in the New World, and resulted in laying the foundation of what has developed into the great New York community. By way of gratitude for the favors shown them, Jews effectively aided the Dutch in their resistance to foreign encroachment, especially in South America. From Spain, Portugal, and Holland, then, came most of the first settlers; and though the large majority were of Sephardic stock, a few Germans are also to be found among them. England, where until the beginning of the eighteenth century but few Jews dwelt, contributed but a small number to the effective settlements she was making on the seaboard of the mainland. Though the colony of Georgia had Jewish immigrants in large numbers from 1733 on, they came in ships from England only because passage to the New World could be procured most readily from that country.

The large numbers of Germans who sought refuge from persecution in the freer air of Pennsylvania, during the eighteenth century, attracted Jews as well. They settled not only in the coast towns, but made their way into the interior, and before the close of the century they were to be found among those engaged in developing the western parts of the state. Similarly, the unhappy fate of Poland, dating from 1772, caused that state to send forth its quota of Jews to the United States, and the contribution of that country would be notable if only for the commanding figure of Haym Salomon. The Napoleonic wars and the distress which they wrought, especially upon the South German principalities, once again caused a tide of German immigration to set toward the United States. The Jews joined this migratory movement beginning toward the end of the first quarter of the nineteenth century, and increased in numbers rapidly by reason of the events of 1848. From that time until 1870, when this phase of immigration lost its strength, they came in a steady stream, so that the Jewish population of the United States was quadrupled within the twenty years between 1850 and 1870.

The German Element.

But none of the early migratory movements assumed the significance and volume of that from Russia and neighboring countries. This emigration, mainly from Russian Poland, began as far back as 1821, but did not become especially noteworthy until after the German immigration fell off in 1870. Though nearly 50,000 Russian, Polish, Galician, and Rumanian Jews came to the United States during the succeeding decade, it was not until the anti-Jewish uprisings in Russia, of the early eighties, that the emigration assumed extraordinary proportions. From Russia alone the emigration rose from an annual average of 4,100 in the decade 1871–80 to an annual average of 20,700 in the decade 1881–90. Additional measures of persecution in Russia in the early nineties and continuing to the present time have resulted in large increases in the emigration, England and the United States being the principal lands of refuge. The Rumanian persecutions, beginning in 1900, also caused large numbers of Jews to seek refuge in the latter country. The total Jewish immigration to the United States, through the three main ports of entry, New York, Philadelphia, and Baltimore, from 1881 to Oct. 1, 1905, is stated to have been 996,908, although it is by no means certain that this number does not include Christians from Russia and Austria (see statistical section of this article for details).

Russian Immigration.

In considering the separate states of the Union in detail, the varying records of their Jewish inhabitants may be sketched in outline, reference being made for further particulars to the special articles devoted to each state in The Jewish Encyclopedia.

2. Separate Cities and States: As the Jews of the United States were destined to become more numerous, and consequently of more significance, in the state of **New York** than elsewhere, it were fitting on this account to begin this summary with the account of their settlement and development there. But there is a historical reason as well: the earliest documentary evidence concerning the Jews in this country relates to New York. Jewish connection with the Dutch colony of New Netherlands antedated by many years the beginnings of the migratory movement, for among the influential stockholders of the Dutch West India Company, founded in 1620, were a number of Jews. Their influence upon the fortunes of this company from that time on was of considerable importance. It would appear that Jews were on the muster-rolls of soldiers and sailors sent out to the colony of New Amsterdam in 1652, and that they had engaged to serve for the term of one year. Their identity, however, has been lost.

First Settlement.

The first known Jewish settler in New Amsterdam was Jacob Barsimson, who arrived on July 8, 1654, in the ship "Pear Tree." He was followed in September of the same year by a party of twenty-three who had taken passage in the bark "Saint Catarina." They probably came from Brazil, by way of Cuba and Jamaica, having been driven out when that country capitulated in 1654. The first authentic record of their arrival is obtained from the legal proceedings instituted against them, by the officers of the vessel, to procure the passage-money for which they had made themselves jointly liable. Some were unable to pay, and two were imprisoned in consequence. Others arrived while these proceedings were pending, much to the displeasure of Peter Stuyvesant, the Dutch governor of New Netherlands, who ordered them to leave the colony, and wrote to the directors of the Dutch West India Company asking authority for their exclusion. The directors overruled Stuyvesant, and under date of April 26, 1655, instructed him that his attitude "was unreasonable and unfair, especially because of the considerable loss sustained by the Jews in the taking of Brazil, and also because of the large amount of capital which they have invested in the shares of the company." They directed that "they [the Jews] shall have permission to sail to and trade in New Netherlands and to live and remain there." Stuyvesant carried out his instructions with no good grace, evaded them whenever possible, and put many obstacles in the way of these early settlers. Further appeals to the directors of the company followed, resulting in the issuance of a reproof to Stuyvesant in March, 1656; the instructions to him directed that the Jews should be permitted to enjoy all the civil and political rights in New Netherlands that were accorded them in Amsterdam, and they were to be allowed to hold real estate and to trade. But they were not to be employed in the public service, nor allowed to open retail shops. This provision against engaging in retail trade had a marked effect upon their own future, as well as upon that of the colony. It resulted in their engaging in foreign intercolonial trade, for which, because of their connections, they were peculiarly fitted. The part the Jews played as importers and exporters, and in the general field of colonial commerce, is accordingly one of great significance.

Asser Levy.

The most prominent figure among these pioneers of the New Amsterdam colony was Asser Levy; and it was due to his determined efforts that many of the political rights which the Jews enjoyed at this time were granted. In 1655, among others, he sought enlistment in the militia; this was refused, and instead, he, with other Jews, was ordered to pay a tax because of their exemption. He declined to do this, and on Nov. 5, 1655, petitioned for leave to stand guard like other burghers of New Amsterdam. The petition being rejected, he appealed to the higher authorities, and in 1657 succeeded in obtaining certain burgher rights, and was permitted to perform guard duty like other citizens. He was the first Jew to own land in what are now known as Albany and New York city. His name figures constantly in the court records, and the litigation almost invariably resulted favorably to him. He appears to have amassed considerable wealth, and to have obtained the respect and esteem of the leading men of the town. Another of the prominent early settlers was Abraham de Lucena, who, with several others, in 1655 applied for permission to purchase a site for a burial-ground. This was denied at the time, on the ground that there was no need for it, but was granted a year later. In June, 1658, the burgomasters declined to permit judgment in civil actions to be taken against Jacob Barsimson, holding that "though defendant is absent, yet no default is entered against him, as he was summoned on his Sabbath." This unusual instance of religious toleration foreshadowed a New York statute of two centuries later, which renders it a misdemeanor maliciously to serve any one with process on his Sabbath, or with process returnable on that day. When, in Oct., 1660, Asser Levy and Moses de Lucena were licensed as butchers, they were sworn "agreeably to the oath of the Jews" and were not to be compelled to kill any hogs.

Under English Rule.

Upon the capture of the colony by the English in 1664, the rights hitherto enjoyed by the Jews were not interfered with, and for twenty years they appear to have lived much as before the British occupation, though with slight increase in their numbers. In 1672 Rabba Couty attained prominence by his appeal to the King's Council, in England, from a decree passed against him by the courts of Jamaica, as a result of which one of his ships had been seized and declared forfeited. His appeal was successful and resulted in establishing the rights of Jews as British subjects, and his appears to be the first case in which a colonial grant of naturalization was recognized as valid.

Shearith Israel.

In 1685 the application of Saul Brown to trade at retail was denied, as was also that of the Jews for liberty to exercise their religion publicly. That they did so privately in some definite place of worship would appear from the fact that a map of New York, dated 1695, shows the location of a Jews' synagogue in Beaver street, also that Saul Brown was the minister, and that the congregation comprised twenty families. Five years later the site of the synagogue was so well known that in a conveyance of property the premises were referred to as a landmark. In 1710 the minister of the congregation, Abraham de Lucena, was granted exemption from civil and military service by reason of his ministerial functions, and reference is made to the enjoyment of the same privileges by his predecessors. The minutes of the Congregation Shearith Israel of New York begin in 1729, when it was located in Mill street, and refer to records dating back as far as 1706. This congregation established on Mill street, in 1730, on a lot purchased two years before, the first synagogue in the United States. It would thus appear that the religious rights of these early Jewish settlers had been secured in the beginning of the eighteenth century, and that they enjoyed also many political rights. An act passed by the General Assembly of New York on Nov. 15, 1727, provided that when the oath of abjuration was to be taken by any British subject professing the Jewish religion, the words "upon the true faith of a Christian" might be omitted. Three days later an act was passed naturalizing one Daniel Nuñez de Costa. A bitter political controversy of the year 1737 resulted in the decision by the General Assembly that Jews should not be allowed to vote for members of that body.

In 1740 Parliament passed a general act permitting foreign Jews to be naturalized in the colonies. Previous to this date, however, the New York Colonial Assembly had passed numerous special acts of naturalization, some of which were applicable to individuals only; others, more general in character, under which Jews could be naturalized without taking oath "upon the true faith of a Christian," were also put upon the statute-book. Between this time and the Revolutionary war the Jewish community in this colony increased by slow stages, the principal immigrants coming from Spain, Portugal, and the West Indies.

During the French and Indian war Jacob Franks was the royal agent, in association with a British syndicate, for provisioning the British forces in America; his dealings with the crown during this period exceeded £750,000 in value.

In the Revolution.

Before and during the Revolutionary war the Jews had representatives of their faith upon both sides of the controversy, though the majority joined the colonial side. On the Non-Importation Agreement of 1769 the names of not less than five Jews are found; this is also the case with respect to other agreements of a similar nature. The outbreak of the Revolutionary war dissolved the congregation in New York; and upon the eve of the British occupancy of the town the majority of the congregation, headed by Gershom Mendes Seixas, took all the belongings of the synagogue and removed to Philadelphia, where they established the first regular congregation, the Mickvé Israel, in 1782. The small number who remained in New York occasionally held services in the synagogue. At the close of the war most of the Jews who had gone to Philadelphia returned to New York, which was rapidly becoming one of the most important commercial cities of the country. From this time on the community grew slowly, so that by 1812 it is estimated there were not more than 500 Jews in New York. However, a number of Jewish soldiers participated in the War of 1812, and the prosperity of the community was ever on the increase. The great tide of emigration from Germany that set in toward the beginning of the first quarter of the nineteenth century brought with it many Jews. They were in sufficient numbers by 1825 to establish the first German Jewish congregation. During the next forty years the German congregations increased rapidly, so that by 1850 no less than ten had been organized. Charitable and relief organizations were established; and a considerable number of Jews took part in the Mexican war and entered the public service. The large influx which followed in the late forties and early fifties laid the foundation for the great community which afterward developed. Previous to 1881 the emigrants came for the most part from Germany, Bavaria, and Poland. Since the latter date Russia, Rumania, and Galicia have furnished the greatest numbers. At the present time (1905) the Jewish population of the state of New York is estimated at 820,000. Jews are now represented in New York city in every walk of life, political, professional, commercial, and industrial. See New York.

Up-State Settlements.

Though most of the earlier emigrants settled in New York city, a few wandered beyond its limits, some even as far as the confines of what now constitutes the state of Pennsylvania. In 1661, when **Albany** was but a trading-post, Asser Levy, as noted above, owned real estate there, but between that date and the early years of the nineteenth century there are no records of any settlers in that town. They were not there in sufficient numbers to form a congregation until 1838, and they had no rabbi until 1846. The present Jewish population is estimated at between 4,000 and 5,000.

Buffalo attained prominence in 1825 through the scheme of Mordecai M. Noah to establish Ararat as a city of refuge for the Jews. The corner-stone of the projected city was laid in one of the churches of Buffalo in that year; but, as is well known, this scheme attracted no settlers, and the first religious organization was not established until 1847. The number of Jews there increased gradually from that time, and many members of the Jewish community have held distinguished political office. The present Jewish population is estimated at 7,000.

The first settlement of Jews in **Syracuse** probably antedates 1839, and a permanent religious organization was established in 1846. At the present time the number of Jews is estimated at 5,000. There are Jewish communities in at least fifty-two of the cities of the state of New York, and most of them have been established within the past twenty years.

Next in historical importance to the settlement of New York city is that of **Rhode Island, at Newport.** Established by Roger Williams upon a basis of toleration for persons of all shades of religious belief, the Jews were among the first settlers. Though the earliest authentic reference to Jews at Newport bears the date 1658, no doubt a few stragglers arrived as early as 1655. Fifteen Jewish families arrived in 1658, bringing with them the first degrees of masonry. They established a congregation almost immediately, and in 1684 had their rights to settle confirmed by the General Assembly. There is record of the purchase of a burial-place in Feb., 1677. Between 1740 and 1760 a number of enterprising Portuguese Jewish settlers from Spain, Portugal, and the West Indies arrived, and by their activity established Newport as the seat of the most extensive trade of the country. The most prominent of the settlers during this period were the Lopez, Rivera, Pollock, Hart, and Hays families. Aaron Lopez was one of the leading merchants of his time, and owned as many as thirty vessels. With the advent of Jacob Rodriguez Rivera, a native of Portugal, in 1745, the

To the President of the United States of America.

Sir

Permit the children of the Stock of Abraham to approach you with the most cordial affection and esteem for your person & merits — and to join with our fellow Citizens in welcoming you to NewPort.

With pleasure we reflect on those days — those days of difficulty, & danger, when the God of Israel, who delivered David from the peril of the sword, — ſhielded Your head in the day of battle: — And we rejoice to think, that the ſame Spirit, who rested in the Bosom of the greatly beloved Daniel enabling him to preside over the Provinces of the Babylonish Empire, rests and ever will rest upon you, enabling you to discharge the arduous duties of Chief Magistrate in these States.

Deprived as we heretofore have been of the invaluable rights of free Citizens, we now (with a deep ſenſe of gratitude to the Almighty diſpoſer of all events) behold a Government, erected by the Majesty of the People. — a Government, which to bigotry gives no ſanction, to persecution no aſsistance — but generously affording to All liberty of conscience, and immunities of Citizenship: — deeming every one, of whatever Nation, tongue, or language equal parts of the great governmental Machine: — This ſo ample and extensive Federal Union whose basis is Philanthropy, Mutual confidence and Publick Virtue, we cannot but acknowledge to be the work of the Great God, who ruleth in the Armies of Heaven, and among the Inhabitants of the Earth, doing whatſoever ſeemeth him good.

For all the Bleſsings of civil and religious liberty which we enjoy under an equal and benign administration, we desire to ſend up our thanks to the Antient of Days, the great preserver of Men — beſeeching him, that the Angel who conducted our forefathers through the Wilderneſs into the promised Land, may graciously conduct you through all the difficulties and dangers of this mortal life: — And, when like Joshua full of days, and full of honour, you are gathered to your Fathers, may you be admitted into the Heavenly Paradise to partake of the water of life, and the tree of immortality.

Done and Signed by Order of the Hebrew Congregation in
NewPort Rhode Island August 17th 1790.

Moses Seixas Warden

Aaron Lopez.

manufacture of spermaceti was introduced in America. In 1762 the erection of a synagogue was begun, and was completed and dedicated in the following year. From 1760 until the outbreak of the Revolution the Rev. Isaac Touro, who had come from Jamaica, was the rabbi of the congregation. In 1763 there were between 60 and 70 Jewish families in Newport. The first Jewish sermon which was preached in America, and which has been published, was delivered in the Newport synagogue on May 28, 1773, by Rabbi Ḥayyim Isaac Carregal. This was delivered in Spanish, and was afterward translated into English. Carregal was a most interesting personality; he appears to have come from Palestine, and was on terms of intimacy with Ezra Stiles, the president of Yale College. The first Jewish club in America was formed in 1761 at Newport, with a membership limited to nine persons. Just before the outbreak of the Revolutionary war the Jewish population of Newport must have numbered nearly 1,000 souls. The war dispersed the community, which never regained its importance. The Jews for the most part espoused the colonial cause, and lost the greater part of their property when the town was captured by the British. In 1790 the congregation presented an address to Washington on the occasion of his visit to the city. The letter of welcome is still preserved and is reproduced here by courtesy of the owner, Mr. Frederick Phillips, New York. Abraham Touro bequeathed a fund to the city of Newport to maintain the synagogue as well as the cemetery; this fund is still in existence, though no representatives of the original families now live in the city. The present Jewish population is about 200. There are Jewish settlements likewise in **Providence, Woonsocket,** and **Pawtucket.** The entire Jewish population of the state is estimated at 3,500.

In Other Parts of New England there were probably occasional stray settlers in the seventeenth and eighteenth centuries, but the intolerance of the Puritans rendered impossible the establishment of any religious communities. An interesting personality is that of Judah Monis, who became a convert to Christianity and filled the chair of Hebrew in Harvard College from 1722 until his death in 1764.

Mention is found of a Jew in **Connecticut** under date of Nov. 9, 1659, and of another in 1670. The first Jewish family to settle in **New Haven** came in 1772, though a few individuals who had become converts to Christianity dwelt there a few years before. The first congregation was established about 1840, the congregants being members of about twenty Bavarian families. From that date on the community increased by slow stages, and there are at the present time (1905) in New Haven about 5,500 Jewish inhabitants. There are Jewish settlements also in **Bridgeport, Ansonia, Derby, Waterbury, New London,** and **Hartford.** In the last-mentioned city there are about 2,000 Jewish inhabitants, the first congregation having been established in 1843. Since 1891 a number of Jewish farmers have been settled in various parts of the state. The total Jewish population of the state is about 8,500.

The earliest mention of a Jew in **Massachusetts** bears the date May 3, 1649, and there are references to Jews among the inhabitants of Boston in 1695 and 1702; but they can be regarded only as stragglers, as no settlers made their homes in Massachusetts until the Revolutionary war drove the Jews from Newport. In 1777 Aaron Lopez and Jacob Rivera, with fifty-nine others, went from Newport to **Leicester,** and established themselves there; but this settlement did not survive the close of the war. A number of Jews, including the Hays family, settled at **Boston** before 1800. Of these Moses Michael Hays was the most important. In 1830 a number of Algerian Jews went to Boston, but they soon disappeared. The history of the present community begins with the year 1840, when the first congregation was established.

The Jewish immigrants to **Vermont** and **New Hampshire** have never been very numerous, though there are congregations in **Burlington,** Vt., and in **Manchester, Portsmouth,** and **Nashua,** N. H. The number of Jews at the present time (1905) in these two states does not exceed 2,000. Little of importance can be said about the communal life of the Jews in New England, and their numbers increased but slowly until after the beginning of the great Russian emigration in 1882, when the overflow from New York as well as the emigration through Canada commenced to stream into New England. It is estimated that the number of Jews now inhabiting the New England States is between 80,000 and 90,000, more than 60,000 of whom reside in Massachusetts alone.

The opening up of the West and the resulting unprofitable nature of farming in New England drew away from this part of the United States many thrifty farmers, who abandoned their unfruitful fields for the more attractive opportunities in the Western States. Of interest in connection with this shifting of the population is the fact that many of these abandoned farms, especially in Connecticut, have been taken up by Russian Jews, who, principally as dairy farmers, have added a new and useful element to the agricultural community.

Jacob Lumbrozo.

It would seem that only a few Jews found their way to **Maryland** during the first half of the seventeenth century, and that the first settlers of this colony came as individuals, and not in considerable numbers at any time, as was the case in New York, Newport, Savannah, and Charleston. To judge by the names alone it would appear that a few Jews were resident in Maryland from the earliest days of the colony. The most prominent figure, who was unquestionably a Jew, was a Dr. Jacob Lumbrozo, who had arrived Jan. 24, 1656, and who, in 1658, was tried for blasphemy, but was released by reason of the general amnesty granted in honor of the accession of Richard Cromwell (March 3, 1658). Letters of denization were issued to Lumbrozo Sept. 10, 1663. Besides practising medicine, he also owned a plantation, engaged in trade with the Indians, and had active intercourse with London merchants. He was one of the earliest medical practitioners in the colony, and his career casts much light upon the history and nature of religious tolerance in Maryland. By the strength of his personality he was able to disregard nearly all the laws which would have rendered his residence in the colony impossible, and he seems to have observed his faith even though this, under the laws, was forbidden. The unfavorable environment rendered the admittance of Jews to Maryland difficult, and until the Constitution of 1776 established the religious rights of all, few Jews settled in the colony. Beginning with the year 1797, by which time a considerable number of Jews had arrived there, the history of the Jews of Maryland is of special interest. By the terms of the Constitution of 1776 none could hold office in the state who was not a subscriber to the Christian religion. In the year just mentioned Solomon Etting and Barnard Gratz, and others, presented a petition to the General Assembly at Annapolis asking to be placed upon the same footing with other citizens. This was the beginning of an agitation, lasting for a generation, to establish the civil and political rights of the Jews. As this first effort failed it was renewed at almost every session of the Assembly until 1818. During the succeeding seven years the Cohen family, which had come to Baltimore in 1803 from Richmond, Va., took an important part in the attempt to establish their rights as citizens. The most active member of the family in this struggle was Jacob I. Cohen, who was ably assisted by Solomon Etting. Their persistent efforts met with success in 1825, when an Act of Assembly was passed removing the disabilities of the Jews; and in 1826 both of the above-named were elected members of the city council.

Jacob I. Cohen and the Struggle for Religious Liberty.

At the outbreak of the Civil war Maryland, although remaining in the Union, numbered among her citizens a large body of sympathizers with the Confederate cause. Owing to the pronounced antislavery attitude assumed by Rabbi David Einhorn, the conflict of opinion was especially severe among the Jews. For the most part the history of Maryland is the history of **Baltimore,** where Jews had settled in small numbers prior to the Revolution. The most prominent of these settlers was Benjamin Levy, who, in addition to being a prominent merchant, had the distinction of being appointed one of the committee to arrange the celebration in Baltimore of the adoption of the Declaration of Independence. The first cemetery was procured as early as 1786, and the beginnings of communal organization date from 1826, although the congregation was not regularly organized until 1838. The Jews of the city have participated to a considerable extent in the civic life of the town and state, and have taken some part in national affairs. A number have been members of the Assembly, and at the present time (1905) Isidor Rayner is a United States senator. The Jewish population of Baltimore in 1902 was estimated at 25,000, and that of the twenty-three counties, including towns outside of Baltimore, at 1,500, making 26,500 the total Jewish population of the state.

Philadelphia.

It is of record that Jews from New Amsterdam traded along the Delaware River as early as 1655. There were probably some settlers in the southeastern portion of the territory of which William Penn took possession in 1681. A very considerable number of the early **Pennsylvania** colonists were German Jews. The first Jewish resident of Philadelphia was Jonas Aaron, who was living there in 1703. Another early pioneer and one of considerable prominence was Isaac Miranda. He was the first to settle at Lancaster, at which place, as also at Shaefferstown, there was an early Jewish immigration. Miranda became a convert to Christianity and held several state offices. A number of Jews settled in Philadelphia in the first half of the eighteenth century, and became prominent in the life of the city. Among these were David Franks, Joseph Marks, and Sampson Levy. The Non-Importation Resolutions of 1765 contained the signatures of eight Jews, an indication of the importance of the Jewish community at this time. As early as 1747 a number of persons held religious services in a small house in Sterling alley, and afterward in Cherry alley—between Third and Fourth streets. They were mostly German and Polish Jews; and their differences as to the liturgy to be followed prevented, at the time, the formation of any regular congregation. Attempts, indeed, were made in 1761 and 1773 to form one, but none was established until the influx of Jews from New York during the Revolutionary war, with the arrival of Gershom Mendes Seixas, gave the community sufficient strength to carry out this cherished object. A lot was purchased and a synagogue erected, the dedication occurring in Sept., 1782. A number of Philadelphia Jews served in the army of the Revolution; and the inestimable services rendered by Haym Salomon to Robert Morris in the finances of the Revolution make his name stand out as the most prominent character in American Jewry. The Congregation Mickvé Israel adopted the Sephardic ritual, and the most important minister of the congregation after Seixas was Isaac Leeser, who arrived in 1829. He was the leading Jewish minister of his time, and few others have left such an impress upon American Jewish affairs as he. As minister, teacher, organizer, translator of the Bible, editor, and publisher he was a man of indefatigable energy and rare ability. Prominent also were members of the Phillips family, chief among whom were Zalegman Phillips and Henry M. Phillips. The latter was one of the leading lawyers of Philadelphia, a politician of importance, and a member of the 35th Congress. Leeser's successor as minister of the Mickvé Israel congregation was Sabato Morais, a native of Leghorn, Italy, who, from 1851 until his death in 1897, was a leading figure in American Jewish affairs. It was due to his efforts that a Jewish Theological Seminary was established in New York.

Mickvé Israel and Rodeph Shalom.

The first German congregation was the Rodeph Shalom, which was organized in 1802, but which probably had meetings at an earlier date. The most prominent of its rabbis was Marcus Jastrow, who was succeeded by the present incumbent, Henry Berkowitz. The best-known cantor of this congregation was Jacob Frankel. During the Civil war he acted as chaplain of hospitals under the United States government. The first leading Reform minister installed in Philadelphia was

Samuel Hirsch. Many other congregations have been formed, especially since 1882, when the Russian emigration brought large numbers to the city. Next in importance to the settlement at Philadelphia was that at **Lancaster,** where Jews were to be found in 1730, before the town and county were organized. Joseph Simon was the best known of the first arrivals. Meyer Hart and Michael Hart were among the earlier settlers at **Easton,** where they arrived previous to the Revolutionary war. A synagogue was established there in 1839. **Shaefferstown** had a few Jewish settlers at an early date, and a synagogue and cemetery in 1732. For a considerable number of years preceding the Revolutionary war a number of Jews of Pennsylvania were engaged in the exploitation and sale of western Pennsylvania lands. Among the more prominent of these were Jacob and David Franks, Barnard and Michael Gratz, Joseph Simon, and Levy Andrew Levy.

There is an important Jewish settlement in **Pittsburg,** where Jews arrived in considerable numbers as early as 1830, organizing a congregation in 1846; in **Harrisburg,** where a congregation was established in 1851; and in **Wilkesbarre, Scranton,** and **Reading.** As elsewhere, the Russian emigration of 1882 largely increased the number of Jews in Pennsylvania, and communities are now to be found in at least fifty towns of the state. The present (1905) Jewish population of Pennsylvania is estimated at 115,000, of whom nearly 75,000 live in Philadelphia.

The Jewish settlement in **Georgia** dates almost from the very foundation of the colony; and the early history of Georgia is practically the history of the growth and development of **Savannah,** Jewish life centering in that city. It would appear that a movement was set on foot in London to settle some Jews in the colony even before Oglethorpe, in June, 1733, led his first band of followers to the point which soon after became the city of Savannah. The second vessel which reached the colony from England (on July 11, 1733) had among its passengers no less than forty Jewish emigrants. Though their arrival was unexpected, the liberal-minded governor welcomed them gladly, notwithstanding that he was aware that the trustees of the colony in England had expressed some opposition to permitting Jews to settle there. These first settlers were all of Spanish and Portuguese extraction, though within a year of their arrival others, who were apparently German Jews, also took up their residence there. These two bands of settlers received equally liberal treatment from Oglethorpe, and were the progenitors of one of the most important communities of Jews in the United States. Many of their descendants are still living in various parts of the country. The first male white child born in the colony was a Jew, Isaac Minis.

Among the first immigrants was Dr. Nuñez, who was made welcome because of his medical knowledge, and because he, with a number of others, brought sufficient wealth to the colony to enable the immigrants to take up large tracts of land. A congregation was organized as early as 1734. Three years later Abraham de Lyon, who had been a "vineron" in Portugal, introduced the culture of grapes. The cultivation and manufacture of silk and the pursuit of agriculture and of commerce were the chief occupations of these early settlers. A dispute with the trustees of the colony respecting the introduction of slaves caused an extensive emigration to South Carolina in 1741, and resulted in the dissolution of the congregation. But in 1751 a number of Jews returned to Georgia, and in the same year the trustees sent over Joseph Ottolenghi to superintend the somewhat extensive silk-industry in the colony. Ottolenghi soon attained prominence in the political life of his associates, and was elected a member of the Assembly in 1761 and in succeeding years. There seems to have been little if any distinction made socially between the Jews and the other settlers, and educational and philanthropic institutions seem to have been supported by all alike.

In the Revolution.

Though the Jews participated prominently in the events leading up to the Revolution, it would appear that even in the midst of absorbing political discussions they were able, in 1774, to start another congregation. They were not all, however, to be found on the colonial side during the war, for Mordecai Sheftall, Levi Sheftall, Philip Jacob Cohen, Philip Minis, and Sheftall Sheftall were in the first days of the Revolution disqualified by the authorities from holding any office of trust in the province because of the pronounced revolutionary ideas which they advocated. The community was dispersed during the Revolution, but many Jews returned immediately after the close of the war. In 1787 the congregation was reestablished, largely owing to the energy of Mordecai Sheftall, and it was incorporated on Nov. 30, 1790, under the name of Mickvé Israel of Savannah. The charter, with the minutes of the congregation of that date, still exists. Under date of May 6, 1789, Levi Sheftall, in behalf of the Hebrew congregation of Savannah, presented an address to Washington on the occasion of his election to the presidency, to which Washington made a gracious reply. The community does not seem to have prospered in the last days of the eighteenth and the beginning of the nineteenth century, but in 1820 began to increase in importance; and on the occasion of the consecration of a new synagogue in July, 1820, Dr. Jacob de la Motta delivered an address which was printed, and which is still a document of great value to American Jewish history. The synagogue was destroyed by fire in 1829, but was replaced by a substantial brick structure ten years later, and was consecrated in Feb., 1841, by Isaac Leeser. In 1878 the old synagogue, having been outgrown, was closed, and a new edifice was consecrated on the same day. The community has prospered materially within the past twenty-five years, and a number of its members have held important political office. Herman Meyers has held the office of mayor of the city of Savannah for a number of years.

After Savannah, **Augusta** appears to have been the next town in the state in which Jews settled. In 1825 one Florence, accompanied by his wife, was the first arrival. Other families came the following year from Charleston, though a congregation was not organized until 1846. **Atlanta, Columbus,** and **Macon** have quite extensive communities, and congregations are to be found in Augusta, **Albany, Athens, Brunswick,** and **Rome.** They were all established after 1850, and most of them within the past twenty-five years. At Atlanta there is a home for orphans founded and managed by the Independent Order of B'nai B'rith. The community at Savannah still continues to be the most important, and numbers about 3,000. The total Jewish population of the state is estimated at 7,000.

The liberal charter which John' Locke drew up in 1669 for the governance of the **Carolinas** should have operated to attract Jews thither at an early date, since "Jews, heathen, and dissenters" were by the terms of Locke's charter granted full liberty of conscience. Though political changes modified Locke's original plans considerably, the spirit of tolerance was always retained. Nevertheless no Jews in any numbers appear to have come to **South Carolina** until the exodus from Georgia in 1740–1771, already referred to. However, one Simon Valentine is mentioned as living in **Charleston** in 1698, and probably arrived there three years earlier. A few others followed him, for in 1703 a protest was raised against "Jew strangers" voting in an election for members of the Assembly. In 1748 some prominent London Jews set on foot a scheme for the acquisition of a tract of 200,000 acres of land in South Carolina. Nothing came of this, however, though on Nov. 27, 1755, Joseph Salvador purchased 100,000 acres of land near Fort Ninety-six for £2,000. Twenty years later Joseph Salvador sold 60,000 acres of land for £3,000 to thirteen London Sephardic Jews. This land was known as the "Jews' Lands." Another of the Salvadors (Francis, the nephew of Joseph) purchased extensive tracts of land in the same vicinity in 1773–74. Moses Lindo, likewise a London Jew, who arrived in 1756, became actively engaged in indigo manufacture, spending large sums in its development, and making this one of the principal industries of the state. During the Revolutionary war the Jews of South Carolina were to be found on both sides; and the most eminent of the revolutionists was Francis Salvador, who was elected a member of the First and Second Provincial Congresses which met 1775–76, the most important political office held by any Jew during the Revolution. Two-thirds of a company of militia commanded by Richard Lushington was made up of Charleston Jews. After the fall of Charleston in 1780 the majority of Jews left that city, but most of them returned at the close of the war. The Sephardic Jews established a congregation in 1750, and the Jews of German descent another shortly thereafter. In 1791, when the Sephardic congregation was incorporated, the total number of Jews in Charleston is estimated to have been 400. At the opening of the nineteenth century the Charleston Jews formed the most important community in the United States. A number of its members held important political office, and Mayer Moses was a member of the legislature in 1810. About this time it was due to the Jews that freemasonry was introduced into the state. A large number of Jews from New York went to Charleston at the close of the Revolutionary war and remained there until the commencement of the Civil war. The Jews of South Carolina participated in the War of 1812 and in the Mexican war, and were in considerable numbers on the Confederate side during the Civil war. Many South Carolina Jews moved north during the reconstruction period.

Jewish Company.

A congregation was organized at **Columbia** in 1822. Communities also exist at **Darlington, Florence, Orangeburg,** and **Sumter.** The first Reform movement in any congregation in America was instituted at Charleston in 1824 and another in 1840 (see below). The total number of Jews in the state at the present time (1905) is estimated at 2,500.

The first settlers in **North Carolina** seem to have come to **Wilmington** before the end of the eighteenth century, and appear to have been an offshoot of the Charleston community. In 1808 an attempt was made to expel a member of the General Assembly because of his Jewish faith. The community grew slowly, so that in 1826 it was estimated that there were but 400 Jews in the state. No considerable augmentation of their numbers occurred until after the immigration of 1848. Wilmington continues to be the leading community; a congregation was established there in 1867. There are small communities in about ten other cities. The total Jewish population of the state is estimated at 6,000.

To judge by names alone it would appear that a few Jews wandered into **Virginia** as early as 1624. A small number seem also to have been there before the end of the seventeenth century, but for nearly 100 years no traces of Jewish settlement are found. At least one Jewish soldier—possibly two—served in Virginia regiments under Washington in his expedition across the Alleghany Mountains in 1754. It is probable that Jews drifted into the colony from Baltimore and other points in Maryland at an early date. By 1785 **Richmond** had a Jewish community of about a dozen families of Spanish-Portuguese descent, which organized a Sephardic congregation in 1791. This congregation remained in existence until 1898. The migration of German Jews to Richmond began early in the nineteenth century; and in 1829 they were in sufficient numbers to organize a congregation. In 1870, when the public-school system was established in Richmond, the first sessions were held in the rooms of the German Jewish congregation. Over one hundred Virginian Jews saw military service during the Civil war. The Richmond community has achieved prosperity, and now (1905) numbers about 2,500 Jews. An important community is established also at **Norfolk.** Nearly twenty other congregations exist in the remaining towns of the state, and there are similar organizations in about six towns of **West Virginia.** The present Jewish population of the entire state of Virginia is about 15,000, and that of West Virginia about 1,500.

The most prominent early figure in the history of the Jews in **Louisiana** is Judah Touro, who went to **New Orleans** about 1801. The community increased but slowly during the first half of the nineteenth century, but has grown rapidly since that time. The first congregation was established about 1830, and since that date, and especially during the last twenty years, a number of additional congregations have been formed and important charitable organizations established. Martin Behrman is mayor of New Orleans (1905). About twenty towns now have Jewish communities with an estimated population of 12,000.

The Western wave of migration which took place in the early years of the nineteenth century carried with it a considerable number of Jews to **Kentucky.** Among these was one Salamon from Philadelphia, who established himself at **Harrodsburg** about 1808. In 1816 he was made cashier of the Bank of the United States at Lexington. Shortly after the War of 1812 the Jews began to go to **Louisville,** where the most important community of the state is still located. The first congregation there was chartered in 1842, and a synagogue was built in 1850. Another congregation was organized in 1856, and since the Russian emigration, beginning in 1881, a number of others have been established. In 1901 Louisville had six congregations and numerous philanthropic and educational institutions. There are other communities in at least half a dozen other towns in the state. The total Jewish population at the present time (1905) is estimated at 12,000.

A few Jews were among the traders who settled in **Tennessee,** near the Holston River, in 1778, but they were mere stragglers and made no permanent settlement. About 1845 some Jews began to arrive in **Memphis,** where they had been preceded by Joseph J. Andrews. In 1853 a congregation was organized, and an Orthodox congregation in 1862. At **Nashville** a congregation was established in 1854. Jews have been prominent also in **Chattanooga**; in the years 1894 to 1898 George W. Ochs was mayor of the city. There are several communities in other towns of the state, though the total Jewish population probably does not exceed 7,000.

Of the remaining states of the southern group east of the Mississippi River the principal Jewish settlements have been made in **Alabama** and **Mississippi.** An occasional Jew made his way into the territory which is now Alabama during the early part of the eighteenth century. One Pallachio became prominent in 1776. Abraham Mordecai came from Pennsylvania and settled in Montgomery county in 1785; he established trading-posts, and dealt extensively with the Indians, and in Oct., 1802, with the aid of two Jews, Lyons and Barnett, who had come from Georgia, he erected the first cotton-gin in the state. Of the other early settlers Philip Phillips was the most prominent. He moved to **Mobile** about 1835, from Charleston, and held prominent political office; in 1853 he was elected to Congress. He afterward resided in Washington, and became known as a leading attorney there. The first congregation in Mobile was formed in 1841, where the largest community of the state is still to be found. A number of other congregations were established about the middle of the century, notably at **Montgomery.** About six other towns have Jewish communities. The present Jewish population is estimated at 7,000.

It is likely that there were a few Jews in the **Natchez** district of **Mississippi** before the close of the eighteenth century, but no congregation was organized until that of Natchez was established in 1843. No other congregation was organized before 1850. The present Jewish population of this state does not exceed 3,000.

Florida has a Jewish population of about 3,000, and the earliest congregation was established at **Pensacola,** in 1874.

Of the Western States of the southern group none has such Jewish interests as **Texas,** and with the early development of no states other than Georgia and California have Jews been so intimately associated. They were among the first of **Austin's** colonists in 1821, when Texas was still a part of Mexico: and Samuel Isaacs, who served in the Army of the Republic of Texas, received 320 acres of land in Fort Bend county for his services. Many of the earlier settlers came from England. When Abraham C. Labatt arrived in **Velasco** in 1831 he found that several other Jews had preceded him. Between 1832 and 1840 quite a number of Jews settled in the Nacogdoches district, serving the government in civil and military capacities. An unusually large number of Jews were attracted by the stirring events which preceded the annexation of Texas to the Union, and many took part in the military expeditions. Several were with Sam Houston's army in the Mexican war, and were present at the storming of the Alamo in Dec., 1835. A number received land and property for services rendered to the short-lived republic. Jacob de Cordova, a native of Jamaica, came to Galveston from New Orleans in 1837, and during the next thirty years was prominently identified with the development of the country. The real-estate operations in which he engaged in the early days became known far and wide. He published a newspaper, introduced the Order of Odd Fellows, was elected to the legislature from Harris county in 1847, and in 1849 laid out the city of Waco. Another of the prominent early pioneers was Henry Castro, a native of France, who had seen service in the French army and had gone to the United States in 1827. He lived for a time in Rhode Island, but went to Texas about 1840. In 1842 he made a contract with Sam Houston to settle a colony west of the Medina. Between 1843 and 1846 he sent 5,000 emigrants from the Rhenish provinces to Texas—a remarkably organized emigration for that early period. **Castroville** and Castro county, in northwest Texas, serve to perpetuate his name. On the admission of Texas into the Union David S. Kauffman, a Jew, was elected a member of Congress and served until his death in 1851. The first congregation was established at **Houston** as early as 1854, and others followed in **Galveston** and **San Antonio** shortly thereafter. Other important communities are at **Dallas** and **Waco.** Capt. L. C. Harby played a prominent part in the defense of Galveston during the Civil war. There are at present at least twelve other congregations within the state, whose Jewish population now numbers about 17,500.

Jacob de Cordova.

Though no congregation was established in **Michigan** until 1850, a number of individual Jews played a prominent part in the settlement and early history of the territory as Indian traders. The principal settlement has been at **Detroit,** where the first arrivals were from Germany. Since 1882 there has been a large influx of Russians, who have grown to be an important element of the community. In 1883 a colony of Russian Jews was established near **Bad Axe,** which met with some success. Eleven towns have regularly organized congregations, and there are small communities in many other towns. After Detroit, the principal settlements are at **Grand Rapids, Kalamazoo, Bay City,** and **Alpina.** It is estimated that the Jewish population of the state numbers 16,000.

The first Jewish settler in the territory now comprised within the state of **Wisconsin** was Jacob Franks, who went to Green Bay from Canada as early as 1792, and who two years later was granted by the Indians a tract of land on Devil River, about four miles from Fox River. He carried on an extensive trade with the Indians. In 1805 he was known far and wide among them, and established a high reputation for integrity, fair dealing, and hospitality; he erected the first saw- and gristmill ever put up in that region, and returned to Canada in the same year. Other traders followed in his wake, but none came in sufficient numbers to establish any congregation until shortly before the middle of the nineteenth century. The principal settlement was made in **Milwaukee,** where a congregation was organized in 1855. In 1900 there were congregations in ten other cities, and in 1905 the total Jewish population of the state is estimated at 15,000.

The important community of CINCINNATI, in **Ohio,** is the oldest west of the Alleghany Mountains. From the middle of the nineteenth century its Jewish community has played a significant part in Jewish affairs in the United States. The Jewish pioneer of the Ohio Valley was Joseph Jonas, who went to Cincinnati from England in March, 1817. He attracted others from his native country a few years thereafter, and in 1819 they held the first Jewish service in the western portion of the United States. Previous to 1830 considerable additions to the community came from England, and in 1824 the first congregation was formed. Beginning with 1830, a large number of German Jews made their way to Cincinnati, and the first synagogue was erected in 1836. The community was of significance as early as 1850, and contained capable and public-spirited members. Isaac M. WISE, who went to Cincinnati in 1854, and Max LILIENTHAL, who arrived in 1855, helped materially to enable Cincinnati to impress indelibly its individuality upon Judaism in America. These two men aided in making Cincinnati a center of Jewish culture, and assisted in the development of a number of movements that were national in scope. Cincinnati is the seat of the Union of American Hebrew Congregations, the Central Conference of the Reform Rabbis of American Judaism, and the Hebrew Union College, and its graduates occupy many pulpits throughout the country. The Jews of Cincinnati have always shown great public spirit and have filled many local positions of trust, as well as state, judicial, and governmental offices. At the present time (1905) Julius Fleischman is the mayor of the city. Next in importance to Cincinnati is the community of **Cleveland,** where Jews settled as early as 1837, and established a congregation in 1839. The history of the Jews in Ohio during the first half of the nineteenth century is confined to the cities just mentioned. After that date congregations grew up throughout the state. There are at the present time congregations in twenty other towns. About 1,000 Jews of Ohio saw service during the Civil war a number only exceeded by the Jewish contingent from New York. The present population of Ohio is given as 50,000.

The largest community of Jews in America, outside of New York and Philadelphia, is to be found in **Chicago.** It is probable that there were Jewish settlers in the **Illinois** territory when that country was still under French control. John Hays seems to have been the earliest Jewish pioneer, and he held the office of sheriff of St. Clair county from 1798 to 1818, and was appointed collector of internal revenue for the territory by President Madison in 1814, but no Jews appear to have followed in his footsteps until twenty years later. Considerable numbers of Jews found their way to the rising city Chicago previous to 1850, and the first congregation was organized in 1847. In 1842 a Jewish Colonization Society of New York sent Henry Meyer to select a tract in the vicinity of Chicago for a Jewish colony. He succeeded in attracting a considerable number of settlers, though only a few became farmers, the remainder removing for the most part to Chicago. After Chicago the next town to be settled by Jews was **Peoria,** and after the middle of the nineteenth century they settled in considerable numbers in most of the important towns in the state. Through the endeavors of B. Felsenthal, who went to Chicago in 1858, the Reform Congregation Sinai was established in 1861. He played an important part in the history of the development of the community. After the great fire of 1871 the community grew rapidly, and it has become one of the most prosperous in the country, its members being actively interested in the political life of the city and state. There are over fifty Jewish congregations in the city, and the population is estimated at 80,000. Some of the most important manufactories of the state are controlled by Jews. Samuel ALTSCHULER of Aurora was a Democratic nominee for governor in 1900. The Jewish community of Chicago has many notable educational establishments and relief institutions, and has furnished distinguished members to the legal profession, as well as renowned architects and musicians. Among its prominent rabbis, besides B. Felsenthal, have been Liebmann Adler and Emil G. Hirsch. The Jewish population of the state is estimated at 100,000.

In the southern and northwestern group of states **Missouri** stands out in special prominence. Between Chicago and San Francisco there is no city in which Jews have settled where they have formed so prosperous a community as in **St. Louis.** The pioneer Jewish settler in the state was Wolf Bloch, a native of Bohemia, who is reported to have reached St. Louis as early as 1816. A few others followed shortly thereafter, but their identity has been lost. They were not in sufficient numbers to hold services until 1836, and in the following year the first congregation was established. Two other congregations were organized before 1870. During the Civil war Isidore Bush attained prominence as a delegate on the "Unconditional Union Ticket" to the convention which decided that Missouri should remain in the Union. St. Louis harbored a number of refugees from Chicago after the fire of 1871, and since that time has grown rapidly in numbers and wealth. Representatives of the community have attained distinction politically and commercially. Moses N. Sale has been judge of the circuit court, and Nathan Frank was elected to the Fifty-first Congress. Next in importance to the community of St. Louis, whose numbers aggregate about 40,000, is that of **Kansas City**. The Jewish residents of the city number about 5,500. At **St. Joseph** Jews began to settle as early as 1850, and a congregation was organized nine years later. The Jewish population numbers 1,200. There are congregations in eight other cities of the state, whose Jewish population, however, is estimated at 50,000.

The first Jewish congregation in **Kansas** was established at **Leavenworth** in 1859; another was organized at **Kansas City** in 1870. Jews to the number of 3,000 are to be found in at least nine other towns of the state.

The first Jewish settlement made in **Nebraska** was on the site of the present city of **Omaha** in 1856, but it was not until ten years later that the first congregation was organized. There is also a congregation at **Lincoln,** and communities in several smaller cities. The great bulk of the 3,800 Jews of the state live in Omaha.

Jews are recorded as having lived in the river towns of **Iowa,** especially at **Dubuque** and **McGregor,** as early as 1847–48. These were the main shipping- and stopping-points for the far West, and attracted settlers on this account. As the population moved westward small Jewish communities also found their way to **Davenport, Burlington,** and **Keokuk.** The first congregation was established at **Davenport** in 1861, another at **Keokuk** in 1863, and that at **Des Moines** in 1873. The largest Jewish community is in the last-named city. There are Jewish communities in eleven other towns of the state, whose total Jewish population, however, does not exceed 5,000.

The gold discoveries of 1849 on the Pacific Coast proved not less attractive to some Jews than to other adventurous spirits, and to such an extent that as early as 1850 two congregations were organized in **San Francisco.** A striking characteristic of **California** Jewish migration is the cosmopolitan nature of its early Jewish population. Every country, even Australia, was represented among these pioneers. Another significant feature of the early settlement in California was the number of congregations which were organized in the fifties, when the gold fever was at its height, and which soon dwindled to insignificance, and during the course of the next ten or fifteen years passed out of existence. Noteworthy also is the high character of these early settlers, and the leading part they played in consequence in the political as well as the commercial development of this new country. Among the most distinguished was Solomon Heydenfeldt, who had gained prominence in Alabama before he came to California, where he attained the rare distinction of being elected chief justice of the state, a position which he held until his resignation in 1857. Subsequently he took a leading part in the politics of the state. Henry A. Lyons was one of the first three justices of the Supreme Court of California. A number of other Jews have occupied prominent political office; in the commercial world the Jews have been among the pioneers in the development of the state. Some of the leading Jewish bankers of New York came from San Francisco, where Jews are still a decided power in financial and commercial undertakings. Nor have they failed to develop on cultural lines: and the name of Peixotto is one of distinction in art and scholarship. Emma Wolf is a distinguished authoress. M. H. De Young is proprietor of the "San Francisco Chronicle," and Max C. Sloss is prominent as one of the judges of the Superior Court of San Francisco. Julius Kahn represents the San Francisco district in Congress.

Solomon Heydenfeldt.

The two congregations already mentioned grew rapidly; at the present time (1905) there are fourteen congregations in all, and the Jewish population of the city is estimated at 17,000. There are other congregations at **Sacramento, Los Angeles,** and many other towns, making up a Jewish population for the state of 28,000.

The overflow from California made its way into **Oregon,** where Jews were to be found as early as 1850; the first congregation was established in **Portland** in 1858. As in California, they played a prominent part from the very beginning in municipal and state politics. Solomon Hirsch was in 1889 appointed minister to Turkey by President Harrison, he having previously made himself one of the Republican leaders of the state. Joseph Simon has the distinction of having been one of the few Jews who represented a state in the United States Senate (1898–1903). Others, notably D. Solis Cohen, have been active in local politics. There are small communities in various towns of the state, whose Jewish population numbers 6,000.

Jews first settled in **Utah** in 1860, but there is no record of religious services before 1866. The first congregation was established in **Salt Lake City** in 1880. A few Jews have held important political office. The present population is estimated at 1,000.

It would appear that there were a considerable number of Jews among the first settlers of **Colorado.** The principal community is that of **Denver,** where the congregation was established in 1874. One of the prominent philanthropic institutions of the city is the National Jewish Hospital for Consumptives, founded in 1890. **Leadville** is said to have established its congregation in 1864. Five other cities in Colorado have Jewish congregations, and the total Jewish population of the state numbers 5,800.

The states of **Montana, Washington, Idaho,** and **North** and **South Dakota** have not failed to attract Jewish settlers, though for the most part they did not arrive previous to the Russian immigration.

Characteristics of Congregations.

Jews have penetrated into every state and all the territories of the Union, so that at this time practically no settlement of any significance in any part of the United States is without its Jewish community, small though it may be. Certain phases in the development of the Jewish communities throughout the United States have been common to all. The high holy days have always brought them together, often from far distant points, for religious worship. These occasional meetings soon resulted, when the communities grew greater, in the organization of congregations, which was often preceded, sometimes followed, by the purchase of a place of burial. As the communities grew the need for care of the sick and poverty-stricken resulted in the establishment of philanthropic institutions of various kinds. These were followed by the creation of various social organizations, many of which had beneficial features; and closely following in the wake of this development came the establishment, as prosperity became more enduring, of educational institutions; and practically no organized congregation ever failed to care for religious instruction.

3. Relation to the Federal Government: The Damascus Affair of 1840 marks the real beginning of the diplomatic or international phase in the history of American Jews, though a reference to the services which Mordecai M. Noah rendered his country as consul at Tunis (1813–16) should not be omitted. The persecutions and tortures to which some of the most prominent Jews of Damascus had been subjected were reported to the Department of State at Washington by the United States consul at Damascus. Immediate instructions, under date of Aug. 14, 1840, were thereupon issued to John Gliddon, the United States consul at Alexandria, Egypt, by Secretary John Forsyth, in which he directed that all good offices and efforts be employed to display the active sympathy of the United States in the attempts that the governments of Europe were making to mitigate the horrors of these persecutions. Three days later David Porter, the United States minister to Turkey, was instructed by Forsyth to do everything in his power at the Porte to alleviate the condition of the unfortunates. In both these communications the reasons for the intervention of the United States are based upon sentiments of justice and humanity, no American citizens being involved; in the communication to Minister Porter stress was laid upon the peculiar propriety and right of the intervention of the United States, because its political and civil institutions make no distinction in favor of individuals by reason of race or creed, but treat all with absolute equality.

Damascus Affair.

Though it would appear that this action of the United States was taken without the solicitation of any Jews of this country, measures were already on foot to display the feeling of the Jews at this time. Public meetings were held in August and September, 1840, in New York, Philadelphia, and Richmond, participated in by both Christians and Jews, at which resolutions were passed asking the United States to intervene to procure justice for the accused and the mitigation of their hardships. Among the leaders who were instrumental in calling these meetings were Jacob Ezekiel of Richmond, J. B. Kurscheedt and Theodore J. Seixas of New York, and Isaac Leeser and John Moss of Philadelphia. Considerable correspondence passed between these leaders and the Department of State, in which the humanitarian attitude of the government and the nature of its intervention are fully disclosed ("Publ. Am. Jew. Hist. Soc." No. 8, p. 141; No. 9, p. 155; No. 10, p. 119).

Ten years later the Jews of this country were concerned in the diplomatic relations with Switzerland. Almost simultaneously the negotiations assumed two phases: (*a*) respecting the ratification of a treaty in which lurked the possibility that American citizens who were not Christians might be discriminated against, and (*b*) concerning the actual discrimination in Switzerland against American citizens, on the ground that they belonged to the Jewish faith.

Swiss Disabilities.

In Nov., 1850, A. Dudley Mann, the American representative, negotiated a treaty with the Swiss Confederation, which was transmitted to the Senate on Feb. 13, 1851, by President Fillmore. At the same time the president sent a message in which he took exception to a part of the first article of the treaty, which specifically provided that Christians alone were to be entitled to the privileges guaranteed. An agitation against the ratification of the treaty was started by the Jews as soon as its existence was learned of, and Daniel Webster, then secretary of state, and Senator Henry Clay at once (Feb., 1851) went on record as opposed to the objectionable clause of the treaty. The principal agents in stirring up the opposition were Isaac Leeser, David Einhorn, J. M. Cardozo of Charleston, S. C., and Capt. Jonas P. Levy of New York. A movement was set on foot in this country shortly thereafter (1852–53) to procure religious toleration abroad for American citizens generally; this was quite distinct from any movement started by the Jews, but greatly aided the latter. As a result of this combined opposition the Senate declined to ratify the treaty. Senator Lewis Cass of Michigan figured largely in the opposition to it. He corresponded with Rev. Isaac Leeser and Captain Levy respecting it, delivered several notable speeches in the Senate against it in 1854, and presented a petition on April 19, 1854, which had been signed by Jews of the United States at the instance of a committee of New York Jews, of which Alexander J. Kursheedt was chairman. As a result the treaty was amended by the Senate, and in its amended form was ratified and proclaimed Nov. 9, 1855. But the amendment, though less objectionable in phraseology, retained the same connotation and rendered it possible, under its terms, for the Swiss cantons to discriminate against Jews in the manner they had adopted in 1851. Though unsuccessful in preventing the ratification of the treaty, the agitation against it did not cease. Notwithstanding the treaty was proclaimed at the end of 1855, it would appear that this was not generally known until 1857. Attention was drawn to it by the fact that one A. H. Gootman, an American citizen and a Jew, had received notice in 1856 to leave Chaux-de-Fonds, in Neuchâtel, where he had transacted business for five years. Public meetings of protest were held during the year 1857, in Pittsburg, Indianapolis, Easton, Pa., Charleston, Baltimore, and elsewhere, and a vigorous opposition was voiced by Isaac M. Wise in his paper, "The Israelite," by David Einhorn in "Sinai," and by Isaac Leeser in "The Occident." A convention of Jews met in Baltimore in October, and a delegation appointed by this convention waited on President Buchanan in the same month to protest against the treaty and request its abrogation; the president promised to take steps to accede to their request so far as lay in his power. Numerous memorials were also transmitted to the president and the Senate. That this agitation attracted general attention is manifested by the fact that the newspapers throughout the country expressed vigorous opinions against the treaty.

Though sporadic efforts to procure an alteration in the treaty and the establishment of the rights not only of American Jews but of the Jews of all nations in Switzerland continued to be made in the United States, the principal scene of negotiations shifted to the former country, and the principal actor was Theodore Fay, the American minister. Beginning in Aug., 1853 ("U. S. Ex. Doc." xii. 3), when an American citizen, the same Gootman referred to above, received orders from the authorities of Chaux-de-Fonds, canton of Neuchâtel, to leave that canton on the ground that he was a Jew, Fay, though at first disinclined to take any very energetic stand, finally became much interested in the subject of Swiss discrimination against Jews and kept up an active agitation until his recall in 1860. He succeeded in procuring permission for Gootman to remain, but only as an act of grace, not by right. The obstacle Fay had to attempt to overcome lay in the nature of the Swiss Confederation, which left to the cantons the regulation of the rights of domicil, the Federal Council having no control over the cantons in this respect. Fay was ably supported in his contentions by the secretaries of state Marcy and Lewis Cass, especially the latter. In the course of his negotiations Fay made an elaborate study of the Jewish question as it affected Switzerland, and in June, 1859, transmitted what he called his "Israelite Note" to the Federal Council. This is an extensive treatise explaining the American contention with much force, and embodying besides a general defense of the Jews. It was translated into German and French, was offered for sale by the Federal Council, received much notice in the Swiss newspapers, and caused the restrictions against Jews to be abolished in several cantons. In 1860 the executive committee of the Board of Delegates of American Israelites, of which Myer S. Isaacs was secretary, took steps to continue the agitation in America. Henry I. Hart, the president of the above-mentioned board, took up the matter with Secretary Seward shortly after he assumed office in 1861, and the secretary issued specific instructions to the new minister to Switzerland, Fogg, to be no less active in his endeavor to establish the rights of American Jews than was his predecessor. The restrictions in the cantons were gradually abolished, and full civil rights were finally guaranteed to all Jews by the new Swiss Constitution of 1874. It may be added, however, that the treaty of 1855 is still in force (1905; "Publ. Am. Jew. Hist. Soc." No. 11, pp. 7 *et seq.*).

Servia and Palestine.

In 1867 Myer S. Isaacs, on behalf of the Board of Delegates of American Israelites, endeavored unsuccessfully to have the government take some steps to alleviate the condition of the Jews in Servia. In 1882 Gen. Lew Wallace, United States minister to Turkey, moved by the hardships suffered by Russian refugees whom he found starving in the streets of Constantinople, called at the Foreign Office and received a communication from the minister of foreign affairs in which the statement was made that Jews would be made welcome anywhere in Turkey except in Palestine. In 1884 he took vigorous action against the threatened expulsion from Jerusalem of sundry naturalized American Jews. In 1887 and 1888 attempts were made by the Turkish government to limit the sojourn of American Jews in Jerusalem to one month—later extended to three months. This was earnestly opposed by the American minister, Oscar S. Straus, ably supported by Secretary Bayard, who contended that the United States, by reason of its Constitution, could not recognize any distinction between American citizens in respect to their religion. By his exertions Straus successfully halted any steps to expel American citizens who happened to be Jews ("U. S. For. Rel." 1887, 1888, 1889). Secretaries Blaine, Gresham, and Hay repeatedly took a similar stand, and it would appear that rights of American citizens who are Jews have been carefully guarded in Turkey ("U. S. For. Rel." 1894, 1898, 1901).

In 1863 atrocities perpetrated upon the Jews of Morocco led the Board of Delegates to ask the intervention of the United States. Secretary Seward instructed the United States consul at Tangier to use his good offices to further the mission of Sir Moses Montefiore, basing his act on the ground of common humanity. For two years the consul exerted himself to carry out his instructions and met with some slight success. In 1878 the Board of Delegates renewed its endeavors to have the government use its good offices in Morocco, and the consul at Tangier, F. A. Matthews, took earnest steps to alleviate the condition of the Jews whenever the opportunity arose during this and succeeding years. Adolph Sanger, on behalf of the Board of Delegates, in 1880 sent out an agent, L. A. Cohen, to Morocco to report on conditions there. In March, 1881, the United States minister at Madrid, Lucius Fairchild, proceeded to Morocco to investigate the condition of the Jews. He made a sympathetic and valuable report to the secretary of state, Blaine, in which he displayed an acute interest in the unfortunate conditions in that country, and did his utmost to alleviate them.

Rumanian conditions, which have so vitally interested the United States, first had attention drawn to them by the Board of Delegates in June, 1867, when the good offices of the United States in behalf of the persecuted Jews of Rumania were requested. In

1870 B. F. Peixotto of New York was appointed consul-general to Rumania, and during the six years that he held office he exerted himself to bring about an improvement in the condition of the Jews. In 1878 John A. Kasson, minister of the United States to Austria, in a despatch to the Department of State proposed as a condition preliminary to the recognition of Rumanian independence that the United States join with the European powers in exacting from Rumania, at the Congress of Berlin, the recognition of the equal civil, commercial, and religious rights of all classes of her population, as also equal rights and protection under the treaty and under Rumanian laws, irrespective of race or religious belief. In opening negotiations with Rumania in the following year, the recognition by that country of the rights of sojourn and trade of all classes of Americans irrespective of race or creed was strongly emphasized, as it was by Kasson about the same time with respect to Servia. The continued persecutions of the Jews of Rumania, her violations of the provisions of the Treaty of Berlin, and the greatly increased proportions which the Rumanian emigration to the United States assumed in consequence, as also the failure to conclude a naturalization convention between the two countries, because Rumania would not recognize the rights of American citizens who were Jews, moved Secretary of State John Hay to address on Aug. 11, 1902, identical instructions to the representatives of the United States in Russia, France, Germany, Great Britain, Italy, and Turkey upon the subject of Rumania's attitude. In this note he drew attention to the consequences to the United States of the continued persecutions in Rumania—namely, the unnatural increase of immigration from that country—and upon this based his right to remonstrate to the signatories to the Treaty of Berlin against the acts of the Rumanian government. Further, he sustained the right of the United States to ask the above-mentioned powers to intervene upon the strongest grounds of humanity. Acting upon the forcible instructions, the representatives of the United States presented this note to the government to which each was accredited. But beyond the abolition of the Oath More Judaico (1904) and some slight diminution of the harshness of the persecution, little has been accomplished, and Rumania continues (1905) almost unrestrictedly to violate the treaty which established her as an independent nation. In 1905 Congress made provision for an American legation at Bucharest.

Rumanian Disabilities.

The diplomatic correspondence between Russia and the United States involving Jews is of considerable bulk. It relates for the most part to the failure of Russia to recognize the validity of American passports where Jews are involved, which is the principal cause of difference between the United States and Russia. Russia has constantly violated the provisions of her treaty of 1832 with the United States, which gives to the citizens of the two countries unrestricted rights of sojourn, travel, and protection. Until the persecutions in Russia assumed acute form, beginning with 1880, the correspondence between the two countries was not of importance, though occasional earlier instances of discrimination by Russia against American citizens who were Jews had been vigorously protested against by the United States authorities. For the past twenty-five years the record is one of unceasing effort on the part of the United States to establish the rights of American citizens who are Jews, and of continued declination of Russia to live up to her treaty stipulations. The threatened expulsion from St. Petersburg of an American citizen named Pinkos, in 1880, was the occasion for the presentation of energetic notes of remonstrance by John W. Foster, the American minister to Russia. He acted not alone of his own responsibility, but was the recipient of specific instructions from the secretary of state, William M. Evarts. In the course of one of Evarts' letters of instruction the attitude assumed by the United States was clearly set forth in the following terms: "In the view of this government the religion professed by one of its citizens has no relation to that citizen's right to the protection of the United States" ("Am. Jewish Year Book," 1904-5, p. 287). The first protests of Foster and Evarts, inasmuch as they brought forth no satisfactory replies, were succeeded by others of the same tenor, in one of which Evarts stated "that we ask treaty treatment for our aggrieved citizens, not because they are Jews, but because they are Americans" (*ib.* p. 290). All the answers of the Russian Foreign Office are based on the claim that the proscriptive laws against the Jews were in existence prior to the treaty of 1832, that they, therefore, must be assumed under the treaty, and, furthermore, that the Jewish question in Russia was complicated by economic and other difficulties. These views were answered in the able despatch of James Blaine, secretary of state, of July 29, 1881. This despatch covers in considerable detail the whole of the American contention, and is so forcibly put that subsequent consideration of the same subject by the Department of State has been unable to add much to it ("For. Rel. U. S." 1881, p. 1030). As continued remonstrances during subsequent years led to no results, in 1893 the Department of State took the stand that it could not acquiesce in the action of Russian consuls in asking the religion of American citizens desiring to travel in Russia before granting a visé to their passports, and refusing Jews. The government regarded this as the "assumption of a religious inquisitorial function within our own borders, by a foreign agency, in a manner . . . repugnant to the national sense." In 1895 this view was forcibly presented to the Russian government by the American minister, Clifton R. Breckenridge, and in July of that year the Department of State took the attitude that a "continuance in such a course, after our views have been clearly but considerately made known, may trench upon the just limits of consideration" (*ib.* pp. 295, 297). But in spite of the presentation of the American contention in every possible light and with all possible emphasis, Russia stubbornly refuses to live up to her treaty obligations.

Russian Passports.

In April, 1902, at the instance of Henry M. Goldfogle, a member of Congress from New York, the House of Representatives passed a resolution calling upon the secretary of state to inform the House "whether American citizens of the Jewish religious faith holding passports issued by this government are barred or excluded from entering the territory of the Empire of Russia," and what action concerning the matter had been taken by the government. A few days later Secretary Hay replied, stating in brief what efforts had been made by the United States for the protection of American citizens in Russia, and added that though "begun many years ago . . . [they] have not been attended with encouraging success" (*ib.* pp. 301, 302).

In Jan., 1904, Goldfogle introduced another resolution, requesting the president to resume negotiations with Russia looking to the recognition of the validity of American passports irrespective of the religion of the holder. This resolution gave rise to notable addresses on the part of a number of members of the House, and was passed, in substance, in April of that year (*ib.* pp. 304, 305). In consequence of this resolution the question of American passports was taken up anew by the Department of State during the summer of 1904. The Russian reply made at that time was to the effect that a commission had been created in 1903 to consider the revision of the passport regulations, and that the desires of the United States would be brought to the attention of that commission. In his annual message, Dec., 1904, President Roosevelt wrote vigorously against the Russian attitude, characterizing it as "unjust and irritating toward us." In Feb., 1905, a committee of members of the House of Representatives was formed, with Wachter of Maryland as chairman, to urge further action by the Department of State. As yet nothing significant has been accomplished.

Kishinef Petition.

The massacres at Kishinef in April, 1903, aroused indignation throughout the United States. Though in response to a cable of inquiry sent by Secretary Hay to Ambassador McCormick at St. Petersburg, asking if relief could be sent to the sufferers, the ambassador stated that he was informed officially that there was no distress or want in southwestern Russia, nevertheless mass-meetings were held in almost every city of importance, and the comments in the newspapers portrayed the feelings of horror of the American people. A practical turn was given by the collection of considerable sums to alleviate the misery of the unfortunates. In the hope that if the attention of the czar were directly brought to the plight of the Jews in his dominions their condition might be alleviated, the Independent Order of B'nai B'rith took measures to prepare a petition for transmittal to him. On June 15, 1903, a committee of the order waited upon Secretary Hay and President Roosevelt, and presented a tentative draft of the petition. This having met with their approval, it was then circulated throughout the United States, and over 12,500 signatures of Christians and Jews in all walks of life were appended to it. On July 15 the American representative at St. Petersburg was instructed to ask an audience of the minister of foreign affairs in order to find out whether the petition, which was given in full in the despatch, would be received by the minister to be put before the czar. The minister declined to receive it, and the bound copy with the signatures was placed by Secretary Hay in the archives of the Department of State in Oct., 1903. Though the petition did not reach its destination, its words attained world-wide publicity, and its object was in a measure accomplished in this way (Adler, "Voice of America on Kishineff," 1904).

Throughout the history of the United States the government has insisted with great force upon the equal treatment of all American citizens in foreign countries, irrespective of race or creed. Further, it never has failed to intercede with foreign governments on humanitarian grounds, whenever the opportunity arose, in behalf of Jews who were being persecuted or of those to whom life was rendered precarious by inhuman proscriptive laws. A considerable number of Jews have held diplomatic posts, among the more prominent being Mordecai M. Noah, consul to Tunis, 1813-16; Edwin de Leon, consul-general to Egypt, 1854; August Belmont, secretary of legation at The Hague, 1853-55, and minister resident, 1855-58; Oscar S. Straus, minister to Turkey, 1887-89, 1897-1900; Solomon Hirsch, minister to Turkey, 1889-92; B. F. Peixotto, consul to Bucharest, 1870-76; Simon Wolf, consul-general to Egypt, 1881; Max Judd, consul-general to Vienna, 1893-97; and Lewis Einstein, third secretary of embassy at Paris, 1903, and London, 1905.

4. Education: Early in the history of the first Jewish congregation in New York there was attached to the synagogue a school in which secular as well as Hebrew branches were taught. It was one of the earliest general schools in America; poor children received instruction gratis. Religious instruction was established in connection with most of the early synagogues. For ordinary secular education the Jews resorted, in large measure, to the schools and colleges. There was a Jewish matriculate at the University of Pennsylvania, for instance, as early as 1772. The older communities, however, before the general establishment of the public-school system, frequently provided regular instruction in the secular branches. These schools ordinarily were adjuncts of the religious schools maintained by the congregations. In Philadelphia as early as 1838 a general Sunday-school, quite irrespective of congregational organization, was established, largely through the instrumentality of Rebecca Gratz, who was its superintendent and president until 1864. This was the beginning of a movement, which has spread throughout the country, for the organization of educational work along lines quite independent of congregational activities.

A similar school was organized in Charleston, S. C., in the same year; in the following year, one in Richmond, Va.; in 1845 this movement spread to New York, being taken up first by the Emanu-El Society, although the Shearith Israel congregation had started a Hebrew-school system as early as 1808. In 1848 the Hebrew Education Society was founded at Philadelphia—originally a school for general instruction in the ordinary branches up to and through the grammar-school grade, together with instruction in Hebrew and in the Jewish religion. In 1864 the Hebrew Free School Association was incorporated

Free Schools.

in New York; and throughout various states of the Union a movement gradually spread for the organization of free religious schools which would bring into a common-school system children from the various congregations in each city. These were largely intended to supersede the private institutions that had hitherto existed. They were, in the main, carried on by volunteer teachers; and their distinguishing feature was that the instruction was usually conducted by native-born persons and in the English language, as against the German teaching in the congregational schools.

Technical Schools.

The whole trend of this educational work was toward the unification of the community and the broadening of the interests of the individual members, with a tendency to overcome the narrowness of the congregational life that had prevailed. Within the last decade or so there has been a decided reaction; and religious schools and Sabbath-schools have been highly organized in connection with individual congregations. Particular stress is laid upon them by the congregations, which derive from them much of their communal strength. While many of the Hebrew education societies and schools continue in existence, they do not develop or flourish as might be expected; in fact, since 1882 they have largely taken upon themselves an entirely new function. With the sudden arrival in the United States of a large number of Russian Jews having no knowledge of the English language, and in many cases without any particular handicraft, there devolved upon the American Jewish community the necessity of providing, first, day- and night-schools for teaching English to the new arrivals, and, second, manual-training and technical schools. These have been established in New York, Philadelphia, Chicago, and other cities, more or less with the aid of the Baron de Hirsch Fund. The most noteworthy of these educational institutions called into existence since the Russian immigration began is the Educational Alliance of New York.

Theological Institutions.

Until recently provision for higher education on specifically Jewish lines was not found practicable, though as early as 1840 the versatile and suggestive Mordecai M. Noah urged the formation of a Jewish college in the United States. His project met with no response. Nor was I. M. Wise more successful when in 1855 he endeavored to establish a theological college in Cincinnati under the name of "Zion Collegiate Institute." In 1867 the scholarly and enterprising Isaac Leeser, however, established Maimonides College at Philadelphia. It was intended that general collegiate instruction should be provided there, though naturally the Jewish branches were to be given particular attention. A certain measure of cooperation with the University of Pennsylvania was planned, and the idea held in mind was that the college should serve as the capstone to the scheme of education builded by the Hebrew Education Society. The college was, however, much ahead of the times, and after a few years of languishing life passed out of existence. Not until nearly twenty years thereafter was the first institution for the training of rabbis and teachers founded. This was the Hebrew Union College of Cincinnati, established in 1875 by the Union of American Hebrew Congregations, an organization created at that time for the purpose, and mainly at the instance of I. M. Wise. The existence of the college has been continuous, and, though theoretically without partizan bias, it is practically the representative of the Reform wing in America. Graduates from this institution are to be found in charge of congregations in nearly every city of importance in the country. Rev. Dr. K. Kohler is president (1905), and there is a faculty of ten professors and several instructors. In 1886 there was established in New York the Jewish Theological Seminary, also for the training of rabbis and teachers, and representing the Orthodox wing of the community. The reorganization which this institution underwent in 1901-2 resulted in the calling of Dr. S. Schechter to its presidency. At the same time it was richly endowed, and in 1903 took possession of a new building, the gift of Jacob H. Schiff. Its library, largely the gift of Judge Mayer Sulzberger, contains one of the greatest collections of Hebraica. In 1893, through a trust vested by Hyman Gratz in the Mickvè Israel congregation, Gratz College was founded in Philadelphia, which is devoted to the preparation of teachers for Jewish schools, practically occupying the place of a normal school. The largest sum ever made available for the promotion of Semitic investigation is that bequeathed in 1905 by Moses A. Dropsie of Philadelphia for the establishment of a Jewish college along broad lines, for instruction "in the Hebrew and cognate languages and their respective literatures, and in the rabbinical learning and literature." The amount of this bequest is about $800,000.

Throughout the United States there have been established in connection with the various congregations, and also independently, Young Men's Hebrew Associations and other societies which are to a certain extent educational in their character. They usually maintain small libraries and provide lecture-courses on secular and religious topics. In 1893 there was founded the Jewish Chautauqua Society, which has branches all over the country and bears the same relation to the regular schools and colleges as does the University Extension movement, as interpreted in America, to regular colleges for university work. The Council of Jewish Women has engaged to a considerable extent in educational work among its own members. In 1886 the Reform wing of American Jewry organized at Cincinnati a Hebrew Sabbath-School Union for the purpose of promoting uniformity and approved methods in Sabbath-school instruction. In 1900 there were in the United States 415 Jewish educational organizations, 291 of which were religious schools attached to congregations, with 1,127 teachers and an attendance of about 25,000 pupils. There were also 27 Jewish free schools, chiefly in large cities, with about 11,000 pupils and 142 teachers.

Three societies have been organized in the United States to issue Jewish publications—the first, in Philadelphia in 1845; the second, in New York in 1873; and the third, in Philadelphia in 1888. This

Publication Societies and Libraries.

last is a flourishing organization, and has issued many instructive and important works. Among the educational activities should also be mentioned the American Jewish Historical Society, organized in 1892, which in its twelve volumes of publications has made notable contributions to American Jewish history. Associated with many of the schools are circulating and reference libraries—notably the Leeser Library of the Hebrew Education Society of Philadelphia—and there are several independent ones, the largest of which is the Aguilar Library in New York, founded in 1886. The Maimonides Library of the Independent Order B'nai B'rith in New York was organized in 1851. The last two are now merged in the New York Public Library, which itself contains the largest collection of Judaica and modern Hebraica in the country. The Order B'nai B'rith and many other orders and lodges did pioneer work in the education of their members and included lectures among the educational features. The various Zionist societies throughout the country make educational work along Jewish lines one of their principal activities.

5. **Philanthropy:** The measure of the American Jewry's philanthropic activity is full to overflowing. From the beginning of direct aid of individual to individual, philanthropy has progressed until it now devotes a large part of its endeavor to preventive work—the higher philanthropy—along the most approved scientific lines. In this the Jewish organizations have often been the pioneers. Dating from the days of the first arrivals, the ideal constantly maintained has been that none of the Jewish poor should become a charge upon the general community.

The simple charity of the first settlers was soon superseded by the dispensing of collective funds through the congregations. But this did not take the place of the "personal service" of our time, since the care of a needy family by one more favorably situated is one of the commonest phenomena of the earlier days. Soon, as the population increased and its needs outgrew individual or even congregational generosity, societies with specific objects were started. Some were established for the visitation of the sick and the burial of the dead; some, under congregational direction, for general charitable purposes; others for the distribution of unleavened bread at Passover. Gradually hospitals for the care of the sick, asylums for orphans, and homes for the aged were established. At first a large measure of volunteer work lightened the burden of the community, but this, though never entirely superseded, has had to give way to professional and trained service. Similarly, the small societies of the early days found it advantageous to cooperate, resulting in the formation of the United Hebrew Charities, which took general charge of all philanthropic work except that of hospitals and orphan asylums. In recent times the problem has become so complex that in a number of cities all of the charitable organizations have been federated, and the funds collected from all sources distributed pro rata to the various constituent organizations. The first Jewish hospital, the Mount Sinai, was established in 1852 in New York, and the Independent Order B'nai B'rith Home for the Aged and Infirm in 1848 at the same place. The first orphan asylum was that of New Orleans, established in 1855, though one had been projected in New York as early as 1829.

The Russian immigration, which has brought so many perplexing philanthropic and educational problems to the surface, has made itself felt in a particular degree on account of the necessity for the development of cooperative scientific philanthropic methods. The federated associations referred to have been found necessary because of the increasing inadequacy of the simpler methods of the earlier days to cope with the new conditions, and because of the fact that relief, to be effective, must be administered not only from the standpoint of the poor, but with a view to the promotion of the best interests of the community at large. Trained experts in this work have been developed, and in the larger cities the more extensive systems of relief are under their direction, though they in turn are controlled by volunteer boards of trustees. Out of the conditions just noted has developed the National Conference of Jewish Charities of the United States, organized at Cincinnati in 1899, with thirty-eight relief organizations composing its membership, distributed throughout the country. Its seat is at Cincinnati, and the objects it furthers are the discussion of the problems of charity and the promotion of reforms in administration, with a view of accomplishing uniformity of action and cooperation. Annual conferences for the reading and discussion of papers are held. The more or less mechanical methods by which relief must be distributed on the large scale now found necessary, with the element of personal sympathy largely eliminated, have, however, caused a reaction. In recent times societies, largely congregational, have been organized, whose object is the promotion of personal service in looking after the welfare of the unfortunate. See SISTERHOODS.

The numerous fraternal orders, of which the B'nai B'rith (1843), the Free Sons of Israel (1849), the B'rith Abraham (1859), and the Sons of Benjamin (1877) are the most important, do a large measure of charitable and beneficial work.

Baron de Hirsch Fund.

The inability of the Jews of the United States to bear the tremendous strain put upon their resources by the Russian immigration, prompted Baron de Hirsch in 1890 to come to their aid and to establish the Baron de HIRSCH FUND ($2,400,000 originally; since grown to $3,300,000), to be administered by a board of trustees named by him. Its annual income, amounting to about $125,000, is expended in looking after the reception of immigrants, the promotion of English and mechanical education, and, through the Jewish Agricultural and Industrial Aid Society (1899), the encouragement of farming and the transfer of industries to rural communities. The last-mentioned branch of the Fund and its related organization, the Industrial Removal Office, receive large subventions also from the JEWISH COLONIZATION ASSOCIATION. A town and agricultural colony were founded at Woodbine, N. J., in 1891, followed by an agricultural and industrial school at the same place in 1894. Other colonies under the same direction have been established at Alliance, Carmel, and Rosenhayn in the same state. At the present time (1905) the total number of colonies in New Jersey is about 2,500, but not more than half of the adults are engaged in farming and its related work. Industrial establishments have been introduced, and a large part of the several communities is employed in them. Other colonists have been aided in removing to New England, particularly to Connecticut, where about 600 persons are now engaged in agricultural pursuits, mainly dairy-farming. Efforts at the establishment of agricultural colonies in various other parts of the country have been made, but they have almost invariably been ultimate failures (see AGRICULTURAL COLONIES IN THE UNITED STATES).

The National Farm School, established through the instrumentality of Dr. Joseph Krauskopf in 1896, at Doylestown, Pa., aims to train boys for agricultural careers, and has met with some measure of success. Its pupils number about forty. There are two charitable organizations with a national field of activity, the ALLIANCE ISRAÉLITE UNIVERSELLE, which has had branches in the United States since 1868 (eight in 1905), and the Jewish Hospital for Consumptives at Denver, Colo., founded in 1890. A noteworthy charity is that instituted in New York in 1890 by Nathan Straus for the distribution to the poor, at nominal cost, of milk carefully prepared in accordance with the most scientific hygienic principles. Similar institutions have been aided by him in Philadelphia and Chicago. Statistical reports show a large reduction in infant mortality as a result of this efficient remedial measure.

6. Religious Development: As elsewhere, the religious life of the Jews in the United States has been centered for the most part about the congregations. The lack of theological seminaries until a comparatively late period necessitated that religious leaders should be brought from abroad. England, Germany, and to some extent Holland supplied the incumbents for pulpits in the earlier days. Naturally Germany furnished the large majority between 1840 and 1881, since which time, as in so much else, Russia has been predominant. Sephardim were at first in the majority, and organized the four earliest congregations in the country; namely, those of New York, Newport, Savannah, and Philadelphia. As early as 1766 a translation of the prayers into English by Isaac PINTO — probably the first English-Hebrew prayer-book ever issued—was published in New York.

In Jamaica and in Canada there have always been more or less direct relations with England; but in the United States the entire religious life of the Jews has been especially characterized by the absence of dependence upon any European authority, as well as by the absence of any central authority in America. Congregational autonomy has been emphasized, and is perhaps the most striking characteristic of American Jewish religious development.

Reform Movement Begun in Charleston.

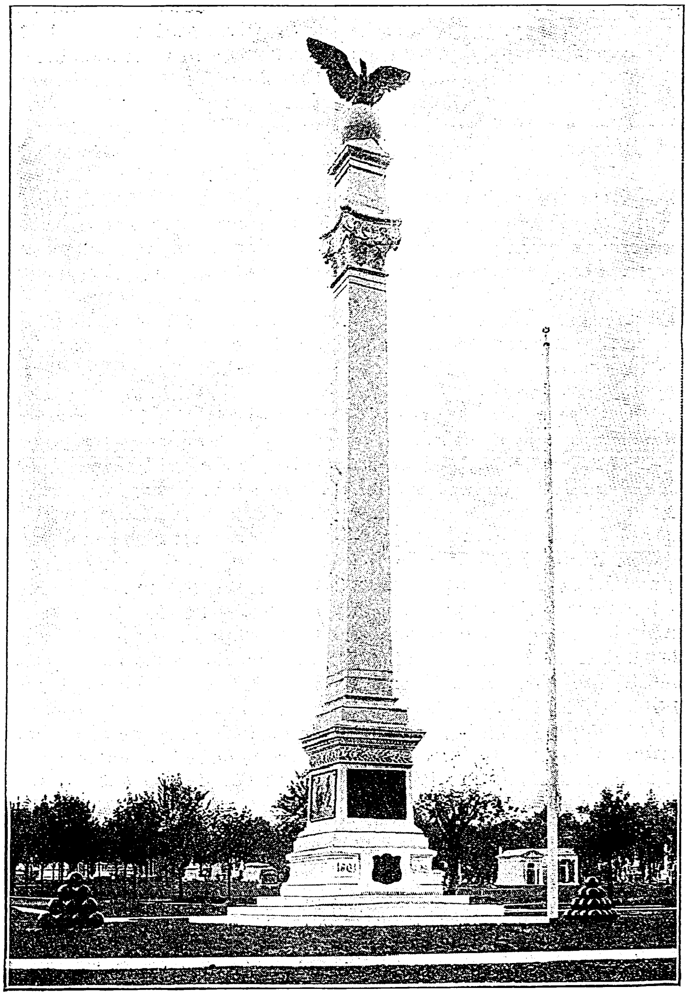
Prior to 1825 all the congregations followed the Orthodox ritual. In that year, however, a movement for ceremonial reform began in Charleston, whose congregation was made up almost exclusively of Sephardim. Meeting with some success at first, the movement soon languished, only to be revived upon a more enduring basis in 1840. The Reform movement made no headway until about the middle of the nineteenth century, when Isaac M. Wise at Albany gave it considerable standing. But little was accomplished, however, until the arrival in the United States of David Einhorn and, later, Samuel Hirsch. Under the influence of these men and of other rabbis —principally from Germany—the trend toward alterations in the liturgy and ritual set in very strongly about 1860. In 1869 attempts were made to formulate the principles of Reform Judaism, followed by others in 1871 and 1885. But the large amount of autonomy common to all congregations and the absence of any generally recognized authoritative head have rendered any acceptance of a program by all congregations impossible. As a consequence the Reform movement varies from the extremes of Sunday services only, on the one hand, to a conservatism that lends its support to an Orthodox seminary, on the other. The reaction against excessive radical tendencies attained force about 1880, resulting in the formation of an intermediate or distinctly conservative group. This wing has grown in importance and has been largely instrumental, in cooperation with the outspokenly Orthodox, in the reorganization of the Jewish Theological Seminary on a firm basis. One of the results of Reform was the introduction of changes in the prayer-ritual, culminating in the adoption by most congregations of a Union Prayer-Book in 1895. This is not used universally, and individual idiosyncrasy still shows a decided preference for other forms.

An outgrowth of certain phases of the trend toward extreme liberalism was the society for Ethical Culture, founded in New York by Prof. Felix ADLER in 1876, and still claiming numerous adherents (see ETHICAL CULTURE, SOCIETY FOR).

The Reform movement has not failed to arouse a vigorous opposition from the representatives of the Orthodox rite; chief among them, in the days of the inception of Reform, was Isaac LEESER, to whom Sabato MORAIS proved an able successor. In the main, holding that its principles, having been tried by time, needed no defense, the representatives of Orthodoxy have supported their views with an intelligent perception of the needs of the new environment and conditions. The Orthodox seminary already referred to is to some extent the outgrowth of a desire effectively to counteract the inroads of Reform, as also to render a service in fitting the ancient forms to American conditions. The influx of Russian Jews during the past twenty-five years has given to the Orthodox greatly increased strength, for the Reform movement has made but slight impression upon the Russian mind as yet.

Indicative of a recognition that congregational autonomy is not free from a tendency to develop into a characterless individualism are the formation of the Union of American Hebrew (Reform) Congregations in 1873, and, more recently (1889), the establishment of the Central Conference of American Rabbis. A recent development has been an agitation for the calling of an American Jewish synod. As a means of strengthening Orthodox Judaism a Union of Orthodox Jewish Congregations in the United States and Canada was formed in 1898, followed by the creation of a similar organization, representing Russian Orthodoxy, in 1901. A Society of American Cantors was established in 1894. For further details see AMERICA, JUDAISM IN, and REFORM JUDAISM.

7. **Military, Naval, and State Service:** From the Dutch settlements in Brazil and other parts of South America the services rendered by the Jews to the states of their adoption or nativity have been largely in excess of their proportionate share. It is likely that a few of the more adventurous pioneers engaged in conflicts with the Indians, and, as already mentioned, Asser LEVY, as early as 1655, claimed, on behalf of himself and his associates, the right to serve in Stuyvesant's expedition against the Swedes on the Delaware, instead of paying a tax for exemption from military service. An occasional Jewish name appears in the rosters of those serving in the colonial expeditions against the French and Indians, and one or perhaps two Jews were with Washington on his expedition across the Alleghanies in 1754, and were among the recipients of grants of land for their services.



Monument Erected in Memory of the Jewish Soldiers Who Died in the Civil War, Cypress Hill Cemetery, Brooklyn, New York.
(From a photograph.)

At the outbreak of the Revolutionary movement and before the formation of strong parties was brought about, the Jews were almost to a man supporters of the colonial contentions. Though numbering only a bare 2,000 in a total population of 2,000,000, they had developed large commercial interests in Newport, Philadelphia, Charleston, Savannah, and New York. None the less, in all these cities they were ardent supporters of the various measures of non-importation designed to frustrate the British acts, and this in the face of the fact that they were greatly engaged in intercolonial and English trade and in some places, as in Philadelphia and Newport, were the largest ship-owners. At least eight Philadelphia Jews were among the signers of the non-importation resolutions adopted in that city in 1765, and five subscribed to those of New York in 1769. When war actually broke out Jewish names occurred on the first rosters. Though no complete figures have been compiled, it is probable that not less than 100 officers and men served at one time or another in the Revolutionary war. Noteworthy in this connection are the forty Jews among the sixty men who composed Capt. Richard Lushington's company of Charleston. Twenty-four officers have been counted, among the most distinguished being Lieut.-Col. David S. FRANKS, Lieut. Isaac FRANKS (lieutenant-colonel of Pennsylvania militia, 1794), and Major Benjamin Nones. The slight increase in the Jewish population between the close of the Revolutionary war and the outbreak of the War of 1812, and the divided sentiments which prevailed during the latter war, render it likely that less than fifty Jews participated in it, and none appears to have gained special distinction. In the Mexican war about sixty Jews saw service, the most prominent being Major and Surgeon David de LEON, who twice received the thanks of Congress for gallantry, and who as surgeon-general of the Confederate armies organized their medical departments.

The effect of the increase of the Jewish population between 1848 and 1860 is shown in the military records of the Civil war. Between 7,000 and 8,000 Jews, in all ranks, saw service on both sides of this terrible conflict, some with rare distinction. Included in this number are 9 generals, 18 colonels, 8 lieutenant-colonels, 40 majors, 205 captains, 325 lieutenants, 48 adjutants, etc., and 25 surgeons. In the recent Spanish-American war (1898) Jews formed a far greater proportion of the forces, and served with distinction. The numbers engaged were as follows: Officers: army, 32; navy, 27; non-commissioned officers and men: army, 2,450; navy, 42.

A considerable number of Jews have always been found in the regular army and navy. As officers the following have been conspicuous: Major Alfred MORDECAI (1804-87), expert on ordnance and explosives; Commodore Uriah P. LEVY (1792-1862), secured the abolition of corporal punishment in the navy; Capt. Levi M. HARBY (1793-1870); Capt. Adolph MARIX (1848); Col. Charles H. LAUCHHEIMER (1859); and Capt. E. L. ZALINSKI (retired 1894).

From the days when Georgia was a colony and a Jew occupied the governor's chair, and from those when Haym SALOMON not only sustained the weak credit of the Congress of the Revolution but out of his private purse supported some of the most prominent of the leaders of the time when, without his aid, the country would have been deprived of their services, down to the appointment in 1902 by President Roosevelt of Oscar S. STRAUS to the position of successor to the late President Harrison as member of the Permanent Court of Arbitration at The Hague, there has been a full record of service.

Though five Jews have been elected to the Senate (David L. YULEE [1845-61]; Judah P. BENJAMIN [1852-61]: Benjamin F. JONAS [1879-85]; Joseph SIMON [1897-1903]; and Isidor RAYNER [1905]), it is a noteworthy fact that none of these has ever held a position of leadership in the Jewish community, and their selection has been made irrespective of any support from specifically Jewish sources. Nor has any, with the exception of Judah P. Benjamin, attained a position of leadership among his colleagues in the Senate. Benjamin's services to the Confederacy as secretary of state after his resignation from the Senate, and his subsequent career in England stamp him as the foremost Jew of American birth. The House of Representatives has had about forty Jewish members, of whom four are serving at the present time. Henry M. GOLDFOGLE, representing a constituency made up largely of Jews, has displayed an intelligent activity in promoting measures of specifically Jewish interest, and has taken a prominent part in the endeavor to compel Russia to recognize American passports held by Jews. In 1904, moreover, both political parties adopted declarations in their platforms, pronouncing in favor of the institution of measures to insure the equal treatment and protection of all American citizens sojourning or traveling in foreign countries; and in his message to Congress of Dec., 1904, President Roosevelt spoke vigorously against the Russian attitude as affecting American Jewish citizens. Of Jews who have served their communities in the lesser offices, ranging from that of city alderman or councilman to the higher state positions, the numbers are so great that no account is possible here. Yet space must be allowed for the mention of Judge Mayer SULZBERGER of Philadelphia, conspicuous among American Jews not only by reason of his exceptional learning, but also because of his activity in all fields of Jewish activity.

Especially noteworthy also is the fact that the first statue presented to the United States, thereby originating Statuary Hall in the Capitol at Washington, was the gift, in 1838, of a Jew, Lieutenant, later Commodore, Uriah P. LEVY. The statue is one of Thomas Jefferson, in bronze, and was executed by the French Jewish sculptor David d'Angers.

8. Civil and Political Rights: It was within the bounds of what soon became the United States that Jews for the first time in modern history were put upon a plane of absolute equality with other races. Rhode Island, founded by Roger Williams as a refuge for the persecuted of all forms of religious beliefs, welcomed the Jews not less than others. For that reason the Jewish community in that colony attained prominence at an early date, and contributed largely to its development along commercial lines. New York, South Carolina, Pennsylvania, and Georgia gave the Jews a generous welcome as well, and attracted in consequence considerable Jewish communities at an early period of their respective histories. The unfavorable environment of Puritan New England, which actuated Roger Williams to establish his colony as a protest against the illiberal views which predominated in the adjoining colonies, rendered the establishment of any sort of Jewish community in their midst an impossibility. This was all the more remarkable since the earlier forms of government and laws were fashioned in a manner upon Old Testament lines. This was particularly the case in Massachusetts (whose first criminal code [1641] gave chapter and verse from the Bible as its authority), as also in Connecticut. The records of the colony of New Haven, founded in 1638, have a distinctly Old Testament character, and Biblical precedent is quoted for almost every governmental act. One can form some opinion of the measure of Old Testament influence when one considers that in the code of colony laws adopted in New Haven in 1656 there are 107 references to the Old Testament to 29 to the New, and of the latter 5 are of an ecclesiastical character.

But Jews as individuals contributed little or nothing to direct the trend of the colonial legislation of this early period. The few who arrived previous to the birth of liberal ideas during the period of the Revolution were contented to be allowed the rare opportunity of living in unmolested exercise of their religion, and made no contest for political rights, though an occasional bold character, such as Asser LEVY and Rabba Couty, helped much to make it known that the heavens would not fall if a Jew were accorded certain political privileges. The participation of Jews in the control of the Dutch West India Company caused the extension of liberal political ideas to the colony of New Amsterdam, and they do not appear to have been seriously curtailed after the English occupation. Jews were naturalized occasionally in most of the colonies elsewhere than in New England; and in New York they appear to have voted for state officials before 1737 (see page 348). Under the Parliamentary Act of 1740 foreigners who had been resident in the British colonies for a period of seven years could be naturalized without taking the sacrament, merely an oath of fidelity taken upon the Old Testament being required. Before 1762 there is record that thirty-five Jews availed themselves of this privilege, and after that date many others must have taken the oath. Georgia, Rhode Island, and South Carolina placed no obstacles in the way of a Jew holding any office, though in most of the other colonies Jews were barred because of the necessity, on the assumption of office, of taking an oath either "upon the true faith of a Christian" or declaring a belief in the divine inspiration of the New Testament. Similarly, in the more illiberal colonies the right of suffrage was restricted to Christians, though it is likely that the restrictions were not severely enforced.

Naturalization Act of 1740.

Though the constitutions established during the Revolutionary period fixed no religious qualifications for the suffrage, except that of New Hampshire, they were far more stringent where the matter of holding office was concerned. All but Rhode Island, New York, and South Carolina restricted office-holders to those professing the Christian religion, and this too in spite of the fact that the preambles to most of the constitutions proclaimed emphatically the rights to which man was by nature entitled. To men of logical mind, like Jefferson and Madison, this inconsistency was always a thorn in the flesh, and in their own state, Virginia, they soon began an agitation that culminated in 1785 in the passage of the Religious Freedom Act. This liberal movement was responsible for the guaranties embodied in the ordinance of 1787, which effectively insured for all time the fullest degree of civil and religious liberty in the territory northwest of the Ohio River. Within a few months the same idea was written in the Constitution, which provides that "no religious test shall ever be required as a qualification to any public office or public trust under the United States"; this clause, strengthened by the first amendment, "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof," fixed the federal law and established the absolute equality of citizens of all creeds in all the territory over which the United States had control. Though there is no evidence that Jews had any direct hand in placing this fitting capstone to the constitutional structure, the influence exerted by the example of so commanding a figure as Haym Salomon, and the services rendered the United States by the Jewish soldiers in the field, probably played their part. In this connection may be mentioned the petition which Gershom Mendes Seixas, Simon Nathan Asher Myers, Barnard Gratz, and Haym Salomon, the mahamad of the Mickvé Israel synagogue of Philadelphia, on Dec. 23, 1783, sent to the Council of Censors of Pennsylvania praying for the removal of the declaration of belief in the divine inspiration of both the Old and the New Testament as a qualification for membership in the Pennsylvania assembly; and the letter which Jonas Phillips addressed to the Federal Convention, Sept. 7, 1787, requesting that it abolish the same qualification ("Publ. Am. Jew. Hist. Soc." No. 2, p. 107). Before the close of the century there was great advance in conforming the state constitutions to the more liberal federal constitution. The spread of democratic ideas, started by the election of Jefferson to the presidency, which was characteristic of the first quarter of the nineteenth century, broke down the barriers of intolerance everywhere but in Maryland, and that state gave way just as the period was brought to a close. The effective work accomplished by the Cohen and Etting families in pushing through the "Jew Bill" after more than twenty-five years of agitation has already been referred to and can be found treated in detail in the article Maryland. It is the only instance in American history where the establishment of a fundamental constitutional principle can be credited directly to the specific labors of individual Jews.

Principle of Religious Liberty.

There have been numerous instances in which Jews have come in conflict with the universal Sunday laws. In practically all cases the right of the state to enact Sunday laws as police regulations has been sustained. The statutory laws of New York and Indiana exempt one who observes some day of the week other than the first day and refrains from labor thereon, from suffering prosecution under the Sunday laws ("Publ. Am. Jew. Hist. Soc." No. 11, p. 101). In 1901 S. H. Borofsky, a member of the Massachusetts House of Representatives, introduced a bill exempting persons who observed the seventh day as Sabbath from any penalty for laboring on the first day. The bill passed the House, but was defeated in the Senate. That the Sunday laws in many cases inflict direct hardship upon large sections of the Jewish community can not be denied, and any interpretation of them except as police regulations would undoubtedly be construed as infringements upon the religious liberty of the individual. A solution of the difficulty might be found in the general adoption of the New York and Indiana statutes, but there is as yet no indication of any movement to bring this about. In cases where Jews are interested parties or witnesses, objection has at times been raised against going to trial or giving testimony on the seventh day of the week. Occasionally a postponement has been allowed or a witness excused, but the prevailing attitude of the courts has been that where duties to one's religion and to the state come in conflict the latter must prevail. The fact that there has been a general tendency on the part of even the higher courts to maintain that this is a Christian country, and that legislation which is in conflict with the doctrines of Christianity can not be allowed to prevail, has not failed to arouse decided opposition in many Jewish quarters.

Sunday Laws.

9. Science, Art, Literature, and the Learned Professions: Jews have been members of all the learned professions—principally the legal and medical—and they have contributed notably to the advancement of nearly all the sciences and of the fine

Jews Eminent in All Departments.

arts. Many eminent physicians, medical writers, and professors in medical schools are Jews. There has been at least one distinguished Hebrew sculptor, Moses EZEKIEL, and there are several others of rank, among whom Ephraim KEYSER and Katherine M. Cohen should be mentioned. Louis LOEB is one of the leading painters of the country, and has done illustrating of a high order; the Rosenthals of Philadelphia, father and son, are distinguished as etchers and engravers. Among other artists of note are Toby Rosenthal, L. Dessar, E. C. Peixotto, Henry Mosler, and Albert E. Sterner; Leo Mielziner is both sculptor and portrait-painter. As caricaturists Henry Meyer and F. Opper have made their mark. Bernard Berenson is one of the foremost living art-critics, and Charles Waldstein is one of the leading authorities on ancient art. Jews are also found as inventors, *e.g.*, Emil Berliner, inventor of the telephone-transmitter, and Louis E. and Max Levy, inventors of photoengraving processes; as architects, such as Dankmar Adler of Chicago, and Arnold W. Brunner of New York; and as engineers, the most distinguished of whom is Mendes Cohen of Baltimore, one of the pioneer railroad-builders of the country, and at one time president of the American Society of Civil Engineers.

Many Jews hold professorships in colleges: M. Bloomfield and J. H. Hollander at Johns Hopkins; Franz Boas, Richard Gottheil, and E. R. A. Seligman at Columbia; Morris Loeb at the University of New York; Morris Jastrow and Leo S. Rowe at the University of Pennsylvania; Joseph Jastrow at the University of Wisconsin; Charles Gross at Harvard; Ernst Freund at the University of Chicago; Jacques Loeb at the University of California; Isidor Loeb at the University of Missouri; while a much larger number are assistant professors or instructors. Simon FLEXNER is one of the leading pathologists, and is director of the Rockefeller Institute of Medical Research; and Franz Boas is eminent as an anthropologist.

The most distinguished Jewish writer of poetry in the United States was Emma LAZARUS; Michael Heilprin gained eminence as an editor and writer, as have Louis Heilprin as an encyclopedist, Angelo Heilprin as a geologist, and Fabian Franklin as a mathematician; A. Cahan, Ezra S. Brudno, Annie Nathan Mayer, Mary Moss, and Emma Wolf are successful novelists; and Morris Rosenfeld is a gifted Yiddish poet. Martha Wolfenstein has written Jewish tales of rare literary charm.

Newspapers.

Of Jewish periodicals and newspapers published in the United States the number has been legion (see PERIODICALS). The wide distribution of the Jewish community and the marked division into the Orthodox and Reform camps have rendered impossible the establishment of one central organ for the Jews of the country, as in England. Weekly newspapers, largely of local interest, though containing much readable material upon general Jewish affairs, and making some pretense to produce articles of literary quality, are published in all the large cities. The first Jewish periodical published in the United States was "The Jew," issued at New York in 1823–1825; and unquestionably the most significant was the "Occident," published at Philadelphia by Isaac LEESER from 1843 to 69 (the last volume edited by Mayer SULZBERGER).

Among the more important weeklies are "The American Israelite," Cincinnati, 1854; "The Jewish Messenger," New York, 1857–1902; "The Hebrew," San Francisco, 1863; "The American Hebrew," New York, 1879; "The Jewish Exponent," Philadelphia, 1887; "The Reform Advocate," Chicago, 1891; and "The Jewish Comment," Baltimore, 1895. At the present time three Jewish monthlies are issued: "The Menorah" (1886), organ of the B'nai B'rith and the Jewish Chautauqua; "The Maccabean" (1901), the Zionist organ; and "The New Era Literary Magazine" (1903); all published at New York. The United Hebrew Charities of New York also publishes a magazine, "Jewish Charity," devoted to sociological work, and there are numerous publications of a similar nature issued by other philanthropic organizations.

Several periodicals have been published in German, and, since the Russian immigration, a number in Hebrew. All of these have been organs representing specifically Jewish religious and literary interests. In this respect they have differed from the multitudinous issues of the Yiddish press which have seen the light since 1882, and which, though reflecting Jewish conditions, have in only a few instances had any religious cast; they have been more literary and scientific than religious.

Music and the Stage.

In music a number of Hebrews have acquired a reputable position; and Fanny Bloomfield-Zeisler is one of the greatest of living pianists. Jews are prominent also as actors and as dramatic authors. Among actors of bygone times may be mentioned Aaron J. Phillips, who first appeared in New York at the Park Theater in 1815 and was a very successful comedian; Emanuel Judah, who first appeared in 1823; and Moses S. Phillips, who acted at the Park Theater in 1827. Mordecai M. NOAH, best known as journalist, politician, and diplomat, was also a dramatic author of considerable note. Other dramatists and authors were Samuel B. H. Judah (born in New York in 1790) and Jonas B. Phillips; and at the present time David BELASCO is a most successful playwright. The control of theatrical productions in this country is mainly in the hands of Jews at the present time. The introduction of opera into the United States was due largely to Lorenzo da PONTE. Alfred Hertz now conducts at the Metropolitan Opera House, which is under the direction of Heinrich Conried.

10. Commerce and Industry: In commerce Jews were notably important in the eighteenth century. In the early colonial period, more especially in Pennsylvania and in New York, many of the Jews traded with the Indians. The fact that the earliest settlers were men of means, and were Spanish and Portuguese Jews who had relatives and friends settled throughout the Levant, gave them specially favorable opportunities for trading. Some were extensive ship-owners, as Aaron Lopez of Newport, who before the Revolutionary war had a fleet of thirty vessels; and David and Moses Franks of Philadelphia. Jews very early traded between the West India Islands and the North-American colonies, as well as with Amsterdam, Venice, etc.

The Jewish immigrants who arrived in America during the nineteenth century were in the main poor people who commenced trading in a small way, usually by peddling, which, before the existence of railroads, was a favorite method of carrying merchandise into the country districts. By industry and frugality they laid the foundations of a considerable number of moderate fortunes. The Jews of New York became an integral part of that great trading community.

Jews Active in Financial Circles.

The organization out of which grew the Stock Exchange of New York originated in an agreement in 1792 to buy and sell only on a definite commission; and to this document were attached the signatures of four Jews. Since then Jews have been very active in the Stock Exchange and in banking circles, both in New York and elsewhere. The great-grandson of Haym Salomon, William, is a factor of consequence in New York financial circles. Jacob H. Schiff and James Speyer are counted among the leading financiers of the country. The Jews have also taken an important part in controlling the cotton trade, and in large measure the clothing trade has been throughout its history in their hands (see below). They are likewise very prominent in the manufacture of cloaks and shirts, and more recently of cigars and jewelry.

11. Social Condition: The social organization of the Jews resident in America has differed little from that in other countries. In the early colonial period the wealthier Hebrews seem to have taken part with their Christian fellow citizens in the organization of dancing assemblies and other social functions, and clubs. Nevertheless, in the main, and without any compulsion, Jews preferred to live in close proximity to one another, a peculiarity which still prevails.

Jews and Christians Cooperate.

At the time when little toleration was shown in other countries, there were in America many interchanges of mutual good-will between Christians and Jews. Rabbi Ḥayyim Isaac Carregal was one of the close friends of Ezra Stiles, president of Yale College; and as early as 1711 the Jews of New York made a contribution of £3.12s. for the building of a steeple on Trinity Church. Gershom Mendes Seixas, minister of the Shearith Israel congregation, New York, was a trustee of Columbia College (1784–1815), although this organization was under the Episcopal Church; and the Episcopal bishop of New York occasionally attended service in the synagogue. After 1848 there arrived a large number of Jews who could not speak the English language, and to them a certain odium attached on this account; but this seems gradually to have worn off. The general American public exhibited great sympathy for the Jews in 1840 at the time of the Damascus murders, in 1853–57 at the time of the Swiss troubles, and again in 1882, 1903, and 1905 on the occasion of the persecutions in Russia. Hermann Ahlwardt, on his visit to America in 1895, found the soil an unfavorable one for his anti-Semitic propaganda, and when he projected it was protected from violence by Jewish policemen.

Though there is nothing corresponding to the anti-Semitic movements of continental Europe, an undoubted and extensive social prejudice against the Jews exists, which manifests itself in numerous petty though not insignificant ways, mainly in the Eastern States, where their numbers are greatest. It has assumed the form of excluding Jewish children from certain private schools, and their elders from clubs and some hotels.

Hebrew Clubs.

Very early the Jews in America began to form social organizations. A club was started in Newport as early as 1769; and social clubs—some comprising many members and possessed of magnificent properties—have been established in many sections of the country. The development of Hebrew social clubs has been larger in the United States than elsewhere. American Jews have also been especially given to the forming of secret orders, which, while they had primarily an educational and charitable purpose, had much social influence, and tended powerfully toward the continued association of Jews with one another when the hold of the synagogue upon them relaxed. These were supplemented later by the formation of Young Men's Hebrew Associations, which, like the orders, partake to some extent of the nature of social organizations.

A. H. F.

12. Russian Immigration: Individual Russian and Polish Jews, especially the latter, emigrated to the United States at the time of the American Revolution, among whom was Haym Salomon, one of the noblest examples of devotion to American liberty and a friend of Kosciusko. The Russian ukase of 1827 drafting Jewish boys at the age of twelve to military service (see Jew. Encyc. iii. 549b, *s.v.* Cantonists), and that of 1845 extending the conscription to Russian Poland were the starting-points of emigration to England and thence to America. The epoch-making period of 1848 and the revolt in Poland in 1863 were factors in increasing the emigration of Jews from Russia. But the Russo-Jewish emigration en masse did not begin till 1881. Prior to that date it had been restricted almost entirely to the provinces lying about the Niemen and the Düna, and the emigrants were voluntary ones who desired to better their economic condition and to tempt fortune elsewhere.

Emigration.

With the anti-Jewish riots of April 27, 1881, at Yelizavetgrad, and the later riots in Kiev and other cities of South Russia, Jewish emigration to the United States assumed an entirely different character, and received an impetus so remarkable as to create a new epoch in American Jewish history. The first group of the new class of immigrants, consisting of about 250 members of the Am 'Olam Society ("Eternal People"), arrived in New York city July 29, 1881; the third and last group of the same society arrived May 30, 1882, and was followed by streams of Russo-Jewish refugees. The immigration largely increased from 1892, and still more from 1901 (see Migration).

The forced emigration of the Russian Jews owing to their persecution by the Russian government evoked loud protests from prominent men in the United States, and much sympathy was expressed for the refugees. The most important meeting, convened by ex-President U. S. Grant and seventy others, was held Feb. 1, 1882, at Chickering Hall, New York, and was presided over by the mayor, William R. Grace. In Philadelphia a similar meeting was held a fortnight later (Feb. 15) under the presidency of Mayor Samuel King; and through the efforts of Drexel, the banker, a fund of $25,000 for the relief of the refugees was collected. Indeed, funds in aid of the Russian Jews were raised in all the principal cities of America. The Hebrew Immigrants Aid Society of the United States collected in 1882 about $300,000, of which the Alliance Israélite Universelle of Paris contributed $40,000, the General Committee of Paris $20,000, the Berlin Committee $35,000, the Mansion House Committee of London $40,000, and the New York Russian Relief Fund (Jacob H. Schiff, treasurer) $57,000. Altogether the last-named fund amounted to about $70,000. In 1883 about $60,000 more was collected, for the immediate relief of the Russian immigrants, and temporary quarters were built on Ward's Island and at Greenpoint, L. I. About 3,000 immigrants were temporarily housed and maintained there until they found employment.

Agricultural Colonies.

Michael Heilprin induced the various committees to colonize the immigrants; but nearly all such undertakings proved unsuccessful. **The Jewish Agricultural and Industrial Aid Society,** however, reports for 1904 some improvement in this respect ("American Hebrew," March 17, 1905; see also Jew. Encyc. i. 256 *et seq.*, *s.v.* Agricultural Colonies in the United States). This society is endeavoring to extend its work by starting small agricultural settlements at different points. Many farms in Connecticut and Massachusetts have passed into Jewish hands, and the number of Jewish farmers in the United States is now estimated at 12,000. Altogether the various committees and societies assisted probably 5 per cent of the total Jewish immigrants. Of the remainder, some were dependent on relatives and friends; but a great majority, independent of any assistance, worked out their own destiny as did their countrymen who preceded them.

The Hebrew Immigrants Aid Society of New York helps to find the relatives and friends of Jewish immigrants, and pleads for the discharge of detained immigrants. The society engages lawyers to defend cases of deportation. From Sept. 1, 1902, to Aug. 1, 1904, it appealed 217 cases, 128 of which were sustained and 89 dismissed. The cost of the appeals amounted to $1,305.78. The total income of the society for that period was $6,029.29.

Development of Industry.

The Jewish pioneers from Russia and Poland became glaziers, cigar-makers, pedlers, small shopkeepers, and proprietors of supply stores for pedlers. In the fifties there were about a dozen Russian Jews in New York engaged in various trades, as tobacco, jewelry, passementerie, millinery, hats and caps, and general dry-goods. During the sixties there were Russo-Jewish manufacturers of hoop-skirts, cloaks, and clothing. A few Russian Jews were among the California pioneers, and achieved their successes not as miners, but as merchants. Others drifted to the South, especially to Charleston and New Orleans, where they prospered as business men, cotton-planters, and even as slave-owners. Some became importers and exporters of merchandise. Abraham Raffel, a native of Suwalki, exported agricultural machinery and windmills to Moscow in 1862. Moses Gardner, a native of Sherki (b. 1815; d. 1903 in New York), imported linen crashes and furs from Russia, making annual trips to St. Petersburg, Moscow, and Nijni-Novgorod for that purpose. Solomon Silberstein, a native of Grodno, arrived in New York in 1849, went to California in 1850, and prior to 1867 was engaged in the importation of furs from Alaska, then a Russian possession. Silberstein even ventured across Bering Strait to Kamchatka and Vladivostok to import merchandise to California. His business increased to such an extent that he chartered a special vessel to transport his goods; and it may be added that he

* Joined non-Jewish unions.

gave orders to the captain not to begin the voyage on a Sabbath-day. Russian Jews were largely interested in the Alaskan Fur Company.

Reuben Isaacs, a native of Suwalki, arrived in New York in 1849 and went to California in 1850. From 1868 he was engaged with his brother Israel in the exportation of kerosene oil to Japan. Later, under the firm name "R. Isaacs & Bro.," they opened a branch at Yokohama and Kobé, Japan, and, as "The American Commercial Co.," they established another at Manila, Philippine Islands. There are several American-Russian Jews now (1905) doing business with Japan.

Up to the eighties the Russian Jews were principally pedlers, shopkeepers, and manufacturers, but with the Jewish persecution in Russia many skilled laborers were forced to emigrate to America. These were later organized into various unions; and many affiliated with the **United Hebrew Trades** of the state of New York, organized in 1889 by Morris Hillquit and Joseph Barondess. The skilled Jewish laborers in New York city now number over 75,000, of whom two-thirds are Russian Jews. The United Hebrew Trades represent about 25,000, but in times of strikes they increase to 50,000. Abraham Lippman, secretary of the United Hebrew Trades, has furnished the above table on page 368, showing the various unions, their average memberships, and the number of Russo-Jewish members in Jan., 1905.

Russo-Jewish skilled laborers are found elsewhere than in New York. In the silk-factories of New Jersey, in the machine-shops of Connecticut, and in the jewelry-factories of Rhode Island they are to be seen side by side with the best non-Jewish working men.

Russian Jews have also helped to develop the real-estate market in the principal centers of the United States. In the city of New York they are among the largest operators; and they have built up Brownsville, a suburb of Brooklyn, and a considerable part of the Bronx on the Harlem River. Russo-Jewish activity in every line of industry extends to all cities of the Union, but more particularly to New York, Philadelphia, Baltimore, Boston, Chicago, Pittsburg, and St. Louis.

Criminal statistics show a low percentage of crime among the Russian Jews as compared with the general population. The report of Dr. A. M. Radin, visiting chaplain of New York state prisons, for the year 1903 presents the following details concerning the Jewish prisoners:

Penal Institutions.	Total Prisoners.	Total Jews.	Russian and Polish Jews.
Albany Penitentiary	700	4	1
Auburn "	1,100	36	8
Blackwells Island Almshouse	2,170	7	3
Blackwells Island Workhouse	1,100	11	..
Clinton Prison	900	25	13
Elmira Reformatory	1,450	99	18
Kings County Prison	800	3	3
Sing Sing Prison	1,600	72	26
Totals	9,820	257	72

Dr. Radin gives the following figures for the New York city prisons for the years 1902, 1903, and 1904:

Penal Institutions.	1902.			1903.			1904.		
	Total Prisoners.	Total Jews.	Russian Jews.	Total Prisoners.	Total Jews.	Russian Jews.	Total Prisoners.	Total Jews.	Russian Jews.
Blackwells Island Workhouse	1,930	55	......	1,800	48				
[Blackwells Island Workhouse during the year]	[17,745]	[465]	......	[19,963]	[767]	......	[19,520]	[1,036]	about 600
Brooklyn Disciplinary Training School	225	19	......	240–250	16–20	......	275	21	3
City Penitentiary	630	47	about 2/3	580–620	45-50	about 2/3	746	52	22
House of Refuge	850-900	227	......	850–950	210–250	......	850	253	92
Tombs	430–450	30-35	......	450-500	30–40	......	1,380	153	60

The large percentage of Jewish boys in the House of Refuge on Randalls Island is accounted for by the existence of special sectarian protectories, which care for a large number of boys, while the Jews have no separate house of refuge. These statistics, from the densest and most crowded Jewish population in the Union, are the best evidence of the moral and law-abiding character of the Jews in general and of the Russo-Jewish immigrants in particular. Where the Jews are not so thickly congregated few if any are to be found in the prisons: in each of three of the penal institutions of the upper part of the state of New York, namely, the Syracuse Penitentiary, the Monroe County Penitentiary at Rochester, and the Erie County Penitentiary at Buffalo, there was in 1903 only one Jew.

Education.

The Russian Jews, even those who have neglected or have had no opportunity to study in Russia, learn the English language as soon as they arrive in America; and some study the higher branches of English literature. Their children almost without exception attend the public schools; and many avail themselves of the education afforded in the high schools, the City College, and the Normal College, as well as the universities. More than 60 per cent of the students in these colleges are Russo-Jewish immigrants or the children of Russian Jews. The majority of the parents are poor; but they pinch themselves to keep their children in college rather than let them contribute to the support of the family.

Among the Russian Jews in New York city there are about 400 physicians, 1,000 druggists, 300 dentists, 400 lawyers, and 25 architects, besides many in other professions, particularly musicians and composers of popular music. Biographies of the more prominent professional men will be found in the "American Jewish Year Book for 5665." Also many Russian Jews are clerks in the city departmental offices; and a large number are teachers in the public schools.

Since about 1885 the Russian Jews in America have created an amount of literature in Yiddish exceeding the productions of the same kind that have been published in Russia and elsewhere during the same period (see L. Wiener, "A History of Yiddish Literature in the Nineteenth Century," New York, 1899). Six daily Yiddish newspapers are printed in the city of New York (circulation exceeding 100,000 copies), which inform the Jewish immigrants of the general topics of the day and serve by their advertisements as aids in securing employment. They serve also to help the immigrants in the reading of newspapers in English. There are, besides, the Hebrew weekly "Ha-Leom" and other Yiddish and Hebrew periodicals.

Yiddish Press.

The Yiddish and Hebrew press is almost exclusively in the hands of Russian Jews, who are well represented also among the reporters and journalists of the secular press (see Drachman, "Neo-Hebraic Literature in America," in "Seventh Report of Jewish Theological Seminary Association," New York, 1900).

Russo-Jewish educational work in the city of New York is conducted by **The Educational Alliance,** of which David BLAUSTEIN is superintendent and Adolph M. Radin and Harris Masliansky are lecturers. Others hold special classes in various branches of science and literature. Russian Jews are devoted frequenters of the public libraries, reading the best selected literature and but little fiction. Their principal literary societies are the OHOLE SHEM ASSOCIATION and Mefiẓe Sefat Eber. Among earlier literary societies were Doreshe Sefat Eber, founded in 1880 (issued "Ha-Me'assef," No. i., 1881); the Hebrew Literary Society of Chicago (issued "Keren Or," 2 Nos., Chicago, 1889); Mefiẓe Sifrut Yisrael be-Amerika (issued "Ner ha-Ma'arabi," New York, 1895-97); and the Russian American Hebrew Association, organized by Dr. A. Radin in 1890.

The first Russo-Jewish congregation, the Beth Hamidrash Hagodal, was organized in New York in 1852. There are now more than 300 large and small congregations and ḥebras; also orders, lodges, and benevolent and charitable societies and institutions, foremost among which are the Beth Israel Hospital and the Gemiluth Ḥasadim Association. With regard to the synagogues it should be noted that the Russian Jew does not adopt Reform customs, but is strictly Orthodox. Short biographical sketches of their rabbis and cantors will be found in the "American Jewish Year Book for 5664."

The Russian Jew is quickly adapting himself to American life. According to Dr. M. Fishberg, Russo-Jewish immigrants improve in stature, chest-development, and muscular strength after their arrival. Their descendants, he says, are improving physically, morally, and intellectually under the favorable influence of American conditions. When called upon the Russian Jews in America do not hesitate to fight for the country which has given them freedom. During the war with Spain the number of Russian Jews who enrolled as volunteers in the United States army was greater in proportion to their population than that of other foreigners. The regular army also has a goodly number of Russian Jews in its ranks; and their bravery, energy, and power of endurance have frequently been praised by their officers.

H. R. J. D. E.

13. Statistics: The growth of the Jewish population in the United States during the nineteenth century has been quite extraordinary. At the beginning of the century it probably did not number more than 2,000 (800 in Charleston, 500 in New York, 150 in Philadelphia, and the remainder scattered throughout the rest of the original states). The population received accretions, mainly from England and Germany, up to 1848, when the number had increased to 50,000. Then from the Teutonic lands there occurred a great immigration due to the failure of the Revolution of 1848, and up to 1881 the immigrants probably numbered over 100,000; then the population was estimated at 230,257. During the twenty-five years 1881-1905 very nearly 1,000,000 Jewish immigrants reached the United States, as follows:

Years.	New York.	Philadelphia.	Baltimore.	Totals.
1881-84......	....	....	....	62,022
1885-98......	404,101	36,390	18,677	459,168
1899.........	29,088	1,649	1,463	32,200
1900.........	53,687	3,870	2,439	59,996
1901.........	37,952	2,253	1,343	41,548
1902.........	54,594	2,475	1,566	58,635
1903.........	60,815	3,357	2,993	67,165
1904.........	89,442	5,310	6,606	101,358
1905........	100,338	9,392	5,086	114,816
Totals....	830,017	64,696	40,173	996,908

Against the extraordinary immigration must be counted a certain amount of emigration, including about one per cent who are deported, and a large number of Russian Jews who suffer from nostalgia ("American Hebrew," May 15, 1904), but no complete figures are ascertainable with regard to the numbers thus returning. On the other hand, a considerable number of Jews, especially from England and Germany, travel above the steerage class; and the statistics above given do not include persons who went through Canada. Allowing for the natural increase, the Jewish population can not at present be much below 1,700,000.

The original 250,000 who were in the United States in 1877 would by natural increase have reached 400,000 by this time, and the 1,000,000 immigrants that have poured in since then must have increased at least 200,000 if they are reckoned on a mean population of 400,000 immigrants during the last twenty-five years. The movement of population within the last thirty years may be estimated as follows:

	Native (1877).	Immigrant (1881-1905).	Totals.
Numbers enumerated....	250,000	1,000,000	1,250,000
Deaths..................	100,000	150,000	250,000
Births..................	250,000	350,000	600,000
Increase................	150,000	200,000	350,000
Total...................	400,000	1,200,000	1,600,000
Born in America.........	350,000	300,000	650,000

The above is quite a conservative estimate. For example, the increase on the immigration reckoned at 1.02 per annum upon a mean population of 400,000 would by geometrical progression for twenty-five years reach 1.66 (= 1.02 raised to the 25th power). This would imply an increase of 266,000 rather than 200,000. Similarly, applying an increase rate of 1.02 to the 250,000 original inhabitants of 1877, it would increase to 1.78 (1.02 to the 28th power) during the twenty-eight intervening years, and would show an increase in numbers of nearly 200,000 instead of the 150,000 estimated. If these figures were adopted, the total number for the United States at the present time (1905) would be 1,700,000, of whom 750,000 would have been born in the country.

The Jews are spread unequally throughout the United States. On the whole, their relative density of population corresponds to that of the population in general except as regards the North Atlantic States. A large proportion of them have landed on the Atlantic coast, and have for various reasons remained in the Eastern States. It is, however, a mistake to think that all immigrants remain in the cities at which they land.

Distribution. Apart from the exertions of institutions like the Agricultural Aid and Removal Society, many immigrants of their own accord move inland. It is on record, for example, that of the 830,017 who reached New York during the years 1885-1905, 227,523 left the city during the year in which they arrived. The following table represents the distribution of Jews according to states, with the chief towns in each state, the population, and the dates of settlement so far as can be ascertained, according to the estimate of 1877 and that made in the articles relating to the various states in The Jewish Encyclopedia. Both are estimates, and are therefore likely to be somewhat above the reality, but each is incomplete, and it is probable that the incompleteness counterbalances the overestimation. In a few instances names of towns and agricultural colonies in which Jews settled but no longer reside are given in parentheses:

The accompanying map gives most of this information in graphic form, indicating the relative importance of towns by the size of the characters in which their names are printed, and indicating those towns in which Jews were settled before 1800 in red; those between 1801 and 1848 in purple; those from 1849 to 1881 in green; and the remainder in black.

It will be of interest to compare the distribution between 1877 and 1905 in the various geographical divisions:

Geographical Divisions.	1877.		1905.	
	No.	Per Cent.	No.	Per Cent.
North Atlantic Division..	116.017	50.64	1,103,700	70.80
South Atlantic Division..	21,158	9.23	64.425	4.13
South Central Division..	23,964	10.41	62,085	3.98
North Central Division..	46.478	20.24	277,000	17.77
Western Division	21,465	9.32	51.500	3.30
Totals	229,082	99.84	1,558,710	99.98

Owing to the enormous numbers that remain in New York and the vicinity, the North Atlantic Division has greatly increased its quota during the last quarter of a century. Next to this, the greatest relative increase has been in the North Central Division, from 46,478 to 277,000. The increase in the Western States has not been relatively large, but from 21,465 to 51,500 is by no means insignificant considering the difficulties and the expenses of transportation to the Pacific coast.

No materials exist for deciding upon the nationalities of the Jewish settlers in the United States as a whole, but for the immigration of the last twenty years (1884–1905) the countries from which the Jewish immigrants have come have been noted, and the numbers and percentages, together with the percentages of the 10,015 of different nationalities of those applying to the United Hebrew Charities for aid during the year 1904–5, are as follows:

Nationalities.

Nationality.	Numbers.	Per Cent.	Per Cent Applying for Charity.
Russians	551,708	67.94	50.70
Austrians	192,509	23.70	29.26
Rumanians	43,757	5.38	5.77
Germans	16,619	2.04	5.89
French	451	.05	.12
Dutch	499	.06	.21
English	3,603	.44	.76
Turks	2,074	.25	.43
Syrians	3	....	....
Danes	261	.03	....
Swiss	1	....	.03
Spanish	6	....	.24
Swedes	421	.05	.03
South-Americans	5	....	.05
Bulgarians	7	....	....
Greeks	12	....	....
Totals	811,936	99.94	

These figures, which relate only to the immigrants arriving in New York, do not, of course, apply to the whole Jewish population, and especially leave out of account the English and German immigrants of superior social standing, whose numbers are not counted in the immigration returns. Besides this, the offspring born on American soil for the last thirty years must by this time be at least one-third of the total number (see above).

It will be observed that the Russian Jews who have arrived in the United States constitute only two-thirds of the Jewish immigration, nearly a quarter of it coming from Austria. The number of Jews from Denmark and Sweden seems rather large compared with the Jewish population of those countries. The Turks include Jewish inhabitants of Asia Minor and Palestine, as well as of Constantinople and Salonica.

It will also be observed that the Russian Jews apply for charity in somewhat smaller proportions than those of the numbers of arrivals of the same nationality, while the Austrian Jews apply in larger numbers, thus confirming the impression of the greater "Judenelend" of Galicia. Only 2.39 per cent of the applicants were American-born Jews.

The actual figures for the chief occupations of 88,827 Russian and Polish Jews and 24,221 Jewesses in New York, 1900, are:

	Males.	Females.
Engaged in manufacture of clothing	25,674	8,545
Laborers (not specified)	4,088	......
Agents	1,663	......
Clerks and copyists	2,754	......
Hucksters and peddlers	4,215	......
Retail merchants	9,016	......
Salespeople	3,256	1,306
Boot- and shoe-makers	1,554	......
Carpenters and joiners	1,574	......
Lawyers	217	......
Hat- and cap-makers	1,543	......
Manufacturers and officials	2,513	......
Tobacco and cigar operatives	1,778	......
Teachers and professors in colleges	526	132
Physicians and surgeons	305	......
Clergymen	298	......
Dentists	75	......
Musicians	403	114
Electricians	135	......
Servants and waitresses	......	2,878
Dressmakers	......	2,168
Actresses	......	37

SORMAY & CO., N.Y.

THE JEWISH ENCYCLOPEDIA, Vol. XII.

Copyright, 1905, by Funk & Wagnalls Company, New York & London.

INSET: Enlarged Map of North Atlantic States.

Settlements during 1654-1800, indicated in Red; 1801-1848, in **Brown**; 1849-1881, in Green; 1882-1905, in Black.

The relative importance of the different communities is designated by the size of the type in which their names are printed; colonies in italics; communities no longer in existence in parenthesis.

Occupations.

As with nationalities, it is impossible to give full details of the occupations of American Jews, but the Poles and Russians in New York are almost exclusively Jewish (there is only one Orthodox Greek church in the city), and their occupations are given in the Twelfth Census.

It is possible to add to the above the occupations of the more recent Jewish immigrants. Out of 106,236 (65,040 males, 41,196 females) who arrived from July 1, 1903, up to June 20, 1904, there were:

Tailors	16,426	Merchants and clerks	3,464
Carpenters	4,078	Servants	9,292
Butchers	1,401	Professionals	843
Bakers	1,173	Miscellaneous	672
Painters and glaziers	1,970	Without occupation, chiefly wives and children	38,485
Seamstresses	2,468		
Shoemakers	2,763		
Other artisans	14,830		
Unskilled laborers	8,371		106,236

Clothing Trade.

It will be observed that the predominant industry of the Russian Jews is tailoring, and Jews in general have been more intimately connected with the clothing trade than with any other occupation in the Union. The history of this connection has been recently investigated by J. E. Pope ("The Clothing Industry in New York," Columbia, Mo., 1905). Up to about 1840 the working classes mainly depended for their every-day clothing either on homespun goods or on renovated second-hand garments. The trade in the latter was mainly in the hands of the Jews, and this led to a connection with the clothing trade, just at the time when the sewing-machine made the ready-made trade possible.

The Jews not alone made clothing, but it was they who first developed a system of distributing ready-made clothing, and it was due to them that clothes which were sold in the general stores up to about 1840 were deposited and distributed in clothing stores almost entirely manipulated by Jews from that time onward. Outside of the jewelry trade the clothing trade was almost the sole occupation of the Jews up to 1860, and many merchants and firms that afterward branched out as general merchants, as the Seligmans, Wormsers, and Seasongoods, began in the clothing industry, but were diverted from it by the Civil war, which suddenly broke off the large trade with the South. Several of the Jewish tailoring establishments endeavored to replace this business by supplying uniforms for the Federal soldiers, but other firms had to divert their attention to new lines of industry. On the cessation of hostilities very large demands for clothing arose from the million and a half men suddenly released from their uniforms, and these were mainly supplied by Jewish tailors, who about this time appear to have introduced the contract system, letting out to subcontractors in the rural districts contracts for large consignments of clothing to be delivered at the great centers, and thence distributed throughout the country. In this development of the tailoring industry, which lasted from about 1865 to 1880, Jews became mainly the large contractors and distributors, but the actual work was done apart from the great centers of Jewish activity.
